Editor's Preface

A fuller text, more richly illustrated and widened in scope, is here presented in contemporary and attractive form and entirely brought up to date – especially in developments in technology and science – so that *Hutchinson's New 20th Century Encyclopedia* is more than ever the ideal one-volume reference work, indispensable in the schoolroom desk, on the office shelf, or beneath the television set in the family sitting-room. Aiming at comprehensiveness, we have not forgotten that facts, figures and abbreviations in close array tend to be indigestible – and unconsulted. In contrast, we have tried to stimulate rather than jade the appetite for knowledge and have made the encyclopedia selective, readable, companionable, browseable, and even – on the appropriate occasion – amusing, so that it might not be classed either by younger or older readers among the dull reference tomes condemned by Charles Lamb as ‘Things in book's clothing’.

Note to the Reader

Pronunciation is indicated approximately by the following simple system:

VOWEL SOUNDS

a as in rack	eh as in Fr. née	oi as in boil
ā as in rake	i as in rick	oo as in book
ah as in father	ī as in mite	ōō as in boot
ār as in mare	o as in rock	ow as in cow
aw as in raw	ō as in so	u as in but
e as in wreck	ö as in Fr. jeune	ū as in Fr. dune
ē as in mete	oh as in Fr. eau	ū as in mute

CONSONANT SOUNDS

b, d, f, h, j, k, l, m, n, p, r, t, v, w, z, present no difficulty; c, q, x, are not used in this key.

ch as in chip	ks for x	ngg as in finger
dh is soft as in this	kw as in quick	s is hard as in set
g is hard as in get	ñ is nasal as in Fr. bon	th is hard as in think
kh as ch in Scots loch	ng as in singer	y is consonantal as in yet
		zh as in treasure (trezhur)

Abbreviations follow the standard forms and are included in the appendix, page 1113, an exception being the adoption of F.W.W. and S.W.W. to indicate the First and Second World Wars. In any article the title word (or words) may be represented by its initial letter (or letters), e.g. in the article AACHEN the letter A stands for Aachen.

A table of Customary Forms of Address follows on p. 1117.

A The first letter in nearly all the alphabets. The English *a* is derived from the Etruscan *a* through the Lat. alphabet, which is the parent of the West-European alphabets. The Greeks called the first letter *alpha*; the Semites *aleph* or *alph*, which meant 'ox', but more probably because the word began with this letter — a simple mnemonic device — than because the letter was formed as the rough outline of an ox-head, as some scholars have claimed.

AACHEN (ah'khen). German cathedral city and spa in the *Land* of North Rhine-Westphalia, about 5 m. E. of the frontier of Dutch Limburg and 45 m. W.S.W. of Cologne. It is a thriving industrial centre and one of Germany's principal railway junctions. A. was the Roman *Aquisgranum*, and from the time of Charlemagne until 1531 the German emperors were crowned there. Charlemagne was b. and buried in A., and he founded the cathedral in 796. The 14th cent. town hall, containing the hall of the emperors, is built on the site of Charlemagne's palace. During the S.W.W. A. was the first important German town captured by the Allies (U.S. 1st Army); it was severely damaged by bombing and 7 days' street fighting. Pop. (1966) 177,699.

AALBORG (awf'-). Danish port about 20 m. inland from the Kattegat, on the S. shore of the Limfjord. One of the oldest towns in Denmark, it has a castle and the fine Budolfi church. Pop. (1965) 85,632.

AALST. Flemish form of Alost.

AALTONEN (ahl'-), Wäinö (1894–1966). Finnish artist. At first a painter, he later turned to sculpture, and was a pioneer in the revival of carving directly from the stone, his favourite medium being granite. His works incl. portrait busts, notably one of Sibylla, and statues for the Finnish Parliament House and the Univ. of Helsinki.

AARDVARK (ahrd'-). Afrikaans name for the ant-bear (*Oryzomys afer*) found in central and southern

ABADAN. A general view from Bralm Creek to Abadan town with the Bahmashire river in the background. Courtesy of Iranian Oil Participants.

AACHEN. Ancient bust of Charlemagne in gold and enamel preserved at Aachen, it was made as a reliquary in the 14th century.

Africa. A timid, defenceless animal about the size of a pig, it has a long head, pig-like snout, and large asinine ears. It feeds at night on termites, which it licks up with its long, sticky tongue.

AARDWOLF (*Proteles cristatus*). One of the Carnivora, resembling a small striped hyena. It is found in E. and S. Africa, usually in the burrows of the aardvark, and feeds on termites.

AARHUS (aw'r'hoos). Second city of Denmark, on the E. coast overlooking the Kattegat. It is the cap. of A. co. in Jutland, and a shipping and commercial centre with a univ. Pop. (1965) 117,748.

AARON (ā'ron). In the Bible, the elder brother of Moses and leader with him of the Israelites in their march from Egypt to the Promised Land of Canaan.

AASEN (aw'sen), Ivar Andreas (1813–96). Norwegian philologist, poet and playwright. Through a study of rural dialects he evolved by 1853 a native 'country language', which he called *Landsmaal*, to take the place of literary Dano-Norwegian.

A'BACUS. Method of calculating with a handful of stones on 'a flat surface' (Lat. *abacus*), familiar to the Greeks and Romans, and used by earlier peoples, possibly even in ancient Babylon, and which still survives in the F. in the more sophisticated bead frame form of the Russian *schoty* and the Japanese *soroban*. In the West arithmetic with written Arabic figures, the so-called 'pen-reckoning', replaced 'counter-casting' for some 200 years, but is today being replaced by adding machines and electric calculators, themselves based on the principle of the A. The metal reckoning counters or jettons of the 13th–18th cents. are often very attractive. See CAPITAL.

ABADAN. Persian is. on the E. side of the Shatt-al-Arab. The Nat. Iranian Oil Co. maintains an inst. of technology and A. is the chief refinery and shipping centre for Persia's oil industry, nationalised 1951, when disputes with the Anglo-Persian Oil Co. interrupted production at A. until 1954 A. Consortium, Brit. Petroleum holding 40% of the shares, then took over production.

ABAKA'N. Town of the R.S.F.S.R., cap. of Khakass autonomous region, Krasnoyarsk territory, E. Siberia. It lies just N. of the junction of the A. and Yenisei rivers. Pop. (1967) 78,000.

ABALONE (abalōn'i). Marine, snail-like animal (family Haliotidae), also known from its shape as the ear shell. It provides a bluish mother-of-pearl much used in ornamental work, and the animal itself is edible. California has several valuable species, and A. are eaten there, as well as in China and Japan.

ABACUS. An illustration from Reisch's *Margarita Philosophica* (1503) showing Boetius using the Arabic and Pythagoras the abacus system, reproduced from J. M. Pullan, *The History of the Abacus*.

ABBAS the Great (c. 1557–1628). Shah of Persia from 1586, he defeated the Uzbeks near Herat in 1597 and also the Turks. Bandar-Abbas is named after him. At his death his dominions reached from the Tigris to the Indus.

ABBAS II, Hilmi (1874–1944). Last khedive of Egypt, 1892–1914. On the outbreak of war between Britain and Turkey in 1914, he sided with Turkey and was deposed following the establishment of a British protectorate over Egypt.

ABBASIDS. Dynasty of the Mohammedan empire who reigned as caliphs in Baghdad 750–1258. They were descended from Abbas, Mohammed's uncle, and some of them, e.g. Harun-al-Rashid (786–809) and Mamun (813–33), were outstanding patrons of cultural development. Later their power dwindled, and in 1258 Baghdad was burnt by the Tartars. Thence until 1517 they were caliphs of Egypt.

ABBAYE (abbā). Group of French writers, artists, and musicians, who in 1906 estab. a self-supporting community in an old house at Créteil, near Paris. They included Georges Duhamel, the poets René Arcos and Charles Vildrac, and the cubist painter André Gleizes, and published *La Vie Unanime*, written by Jules Romains as the manifesto of the new doctrines of brotherhood inspiring the movement, which became known as *Unanimisme*. The community broke up after 14 months, but the movement continued.

ABBEVILLE (ahbvēl). Town in N. France in the Somme dept., 12 m. inland from the mouth of the Somme. During the F.W.W. it was an important base for the British armies. Pop. (1962) 22,816.

ABBEY, Edwin Austin (1852–1911). American artist. He painted historical subjects, and was official painter at the coronation of Edward VII.

ABBEY. In the Christian church, a monastery of monks or a nunnery or convent of nuns, all vowed to a life of celibacy and religious seclusion, governed by an abbot or abbess respectively. Sometimes the word is applied to a religious edifice which was once the church of an A., e.g. Westminster A., or to a building or society that has long since been secularized, e.g. Battle Abbey. The first As. as established in Syria or Egypt were mere collections of huts, but in course of time there were built massive and extensive buildings. St. Benedict's A. at Monte Cassino in Italy – so strongly built that for weeks in 1944 it defied blasting by bomb and shell – set the pattern, and soon every country of Christendom could boast a number of noble As. England, esp. the north, is rich in A. ruins.

ABBEY. Among modern foundations is Buckfast Abbey in Devon where the Benedictine community excels in the arts and crafts. At work on a stained glass window are designer Father Charles Norris (right) and Father Paulinus Angold (left); the glass, specially imported from France, is an inch thick and will be set in concrete.
Photo: Associated Press.

ABBEY THEATRE. Playhouse in Dublin associated with the Irish literary revival of the early 1900s that owed its origin to the co-operation of the writers George Russell (Æ) and W. B. Yeats, with the actors W. G. and Frank Fay. The theatre was opened in 1904, and provided a stage for the works of a number of brilliant dramatists, including Lady Gregory, Yeats, J. M. Synge, Lennox Robinson, Padraic Colum, Conal O'Riordan, St. John Ervine, Seumas O'Kelly, and Sean O'Casey. Burned out in 1951, the A. T. was rebuilt 1966.

ABDE EL-KRIM, el-Kheftabi (1881–1963). Moroccan Arab chief known as the 'Wolf of Riff'. With his brother Mohammed, he led the Riff revolt, inflicting disastrous defeat on the Spanish at Annual in 1921, but surrendering to a large French army under Pétain in 1926. Banished to the isl. of Réunion, he was released in 1947 and d. in voluntary exile in Cairo.

ABDICATION. Renunciation of an office or dignity, usually the throne, by a ruler or sovereign. See the table on page 3.

ABDUL-HAMID II (1842–1918). Last sultan of Turkey 1876–1909. In 1908 the Young Turks under Enver Bey forced A.-H. to restore the constitution of 1876, and in 1909 insisted on his deposition. He d. in confinement. For his part in the brutal suppression of the Armenian revolt of 1894 he was known as the Great Assassin.

ABDULLAH, Sheikh Mohammed (1905–). Kashmiri leader, known as the 'Lion of Kashmir'. He headed the struggle for constitutional government against the Maharajah of Kashmir, and in 1947 became P.M. He agreed to the accession of the state to India to halt tribal infiltration, but was imprisoned from 1953 (with brief intervals) until 1968, when he reaffirmed the right of the people of K. 'to decide the future of the State by their free will'.

ABDULLAH ibn Hussein (1882–1951). King of Jordan. The son of Hussein ibn Ali and brother of Feisal I of Iraq (qq.v.), he worked with Lawrence in the Arab revolt of the F.W.W. From 1921 he was Emir of Transjordan, and assumed the title of King in 1946 when the country – until then a British mandate – became independent. He incorporated Arab Palestine into his kingdom, which then became the Hashemite Kingdom of Jordan, following the 1948–9 Arab-Israeli war. He was assassinated by an Arab fanatic.

ABEL (ā'bel). In Genesis, 2nd son of Adam and Eve. He was a shepherd, and his burnt offerings were more acceptable to the Lord than were the fruits of Cain, his brother. Filled with jealousy, Cain killed A.

ABEL, Sir Frederick Augustus (1827–1902). British scientist. Chemist to the War Dept., he introduced a new method of making gun-cotton, was joint inventor with Dewar of cordite, and invented the Abel closest instrument for determining the flash point of petroleum.

A'BELARD, Peter (1079–1142). French scholastic philosopher. B. near Nantes, he became canon of Notre Dame in Paris, and master of the cathedral school in 1115. When his seduction of, and secret marriage to, his pupil Héloïse became known, she took the veil and he was castrated by ruffians at the instigation of her uncle, Canon Fulbert, and became a monk. Resuming teaching a year later, he was cited for heresy and became a hermit at Nogent, where he built the oratory of the Paraclete, and later abbot of a monastery in Brittany. His autobiographical *Historia Calamitatum* drew from Héloïse the famous love letters. He d. at Châlons-sur-Saône, on his way to defend himself against a new charge of heresy. Héloïse was buried beside him at the Paraclete in 1164, their remains being taken to Père Lachaise, Paris, in 1817. A. has a great place in medieval thought as a 'conceptualist', for whom 'universals' have only a mental existence.

ABEOKUTA (abē-ōkoo'tah). Town in Nigeria, West Africa, on the Ogun river, 64 m. N. of Lagos. Pop. (1968) 84,000.

ABERBROTHOCK. Another name for ARBROATH.

ABERCROMBIE (ab'ercumbi), Sir Patrick (1897-1957). British authority on town and country planning. As prof. of Civic Design at Liverpool 1915-35, he attained an international reputation, and produced plans for Dublin, Haifa, Plymouth, and Greater London (1944). His brother LASCELLES A. (1881-1938) was a distinguished poet and critic.

ABERCROMBY, Sir Ralph (1734-1801). Scots soldier who in 1801 commanded an expedition to the Mediterranean, charged with the liquidation of the French forces left behind by Napoleon in Egypt. He decisively defeated the French at Aboukir Bay, but was mortally wounded in the action.

FAMOUS ABDICATIONS

Sulla, Roman dictator 79 B.C.	Constantine of Greece 1917 and 1922
Diocletian, Roman emperor A.D. 305	Ferdinand I of Bulgaria 1918
Edward II of Eng. 1327	Wilhelm II of Germany 1918

Nicholas II of Russia 1917	

ABERDEEN. One of the sights for the visitor to Aberdeen is the fish market, one of the largest in Britain. Ranged in boxes the catch is laid out for inspection by the buyers.

Photo: George Outram & Co. Ltd.

ABERDEENSHIRE. County in the E. of Scotland, with an area of 1,971 sq. m. In the W. it is mountainous, the peaks of the Cairngorm constituting some of the most impressive scenery to be found in Britain. Here are the sources of the rivers Don and Dee. Eastern A. is mixed farming land with many cattle. The coast is rocky; Buchan Ness is the most easterly point of Scotland. Chief towns are Aberdeen, the co. town; Peterhead, Fraserburgh, Inverurie, Ballater, and Huntly. A. is mainly an agricultural county; important fishing industry is centred at Aberdeen, Fraserburgh, and Peterhead. Pop. (1961) 298,503. See also ANGUS.

ABERFAN (abervan'). Mining village of Glamorgan, Wales, nr. Merthyr Tydfil. An avalanche of coalmine waste overwhelmed a school and houses in 1966: 144 d. incl. 116 children.

ABERGAVERN (abergen'i, -gaven'i). Market town (bor.) in Mon., England, at the confluence of the Usk and the Gavenny, 5 m. W. of Monmouth. Pop. (1961) 9,625.

ABERHART, William (1878-1943). Canadian politician. He was a schoolmaster before organizing in Alberta a Social Credit (q.v.) party. He was premier of Alberta from 1935 until his death, but his Social Credit proposals were disallowed by higher authority.

ABERNETHY, John (1764-1831). British surgeon. B. in London, he was a surgeon at St. Bartholomew's hospital, 1815-27, and soon became famous for his lectures and eccentric personality.

ABERRATION. Astronomical term for the apparent displacement of a star resulting from the combined effects of the speed of light, 186,271 m. per sec., and the speed of the earth as it moves in its orbit round the sun, about 18½ m. per sec. The *constant of A.* is 20.47 sec. *Chromatic A.* appears as coloured fringes when objects are illuminated and seen through simple lenses.

ABERTYLLERY. Town (U.D.) of Mon., England, in the Ebbw valley. It has numerous collieries, and ironworks. Pop. (1961) 25,160.

ABERYSTWYTH. Holiday resort and university town, also a borough, in Cardiganshire, Wales, at the mouth of the Ystwyth river. The town developed round the fortress rebuilt by Edward I in 1277. The Univ. Coll. of Wales was founded in A. in 1872, and maintains the Welsh Plant Breeding Station. On the outskirts of A. is the National Library of Wales. Tanning is an industry. Pop. (1961) 10,418.

ABIDJAN. Town in W. Africa, cap. of the Ivory Coast rep. It is an important port dealing in palm kernels, cocoa, coffee, etc. Pop. (1965) 250,000 (incl. 7,500 Europeans).

ABERDARE. Town (U.D.) in Glam., Wales. It has a 12th cent. church. Coalfields discovered locally in the early 19th cent. produce first-rate steam coal. Pop. (1961) 39,044.

ABERDEEN, George Hamilton Gordon, 4th earl of (1784-1860). British statesman. B. in Edinburgh, he succeeded his grandfather as earl in 1801, and was a prominent diplomat. In 1828 he was Foreign Secretary under Wellington, and again in 1841. Although a Tory, he supported Catholic emancipation and followed Peel in his conversion to Free Trade. In 1852 he became P.M. in a govt. of Peelites and Whigs or Liberals, but resigned in 1855 because of the hostile criticism aroused by the miseries and mismanagement of the Crimean War.

ABERDEEN. Royal burgh, city, seaport and holiday resort on the E. coast of Scotland, co. town of Aberdeenshire. It is Scotland's third largest city, and is rich in historical interest and fine buildings, including the Municipal Buildings (1867); King's College (1494) and Marischal College (founded 1593; housed in one of the largest granite buildings in the world, 1836) which together form Aberdeen University; St. Machar Cathedral (1378), and the Auld Brig o' Balgownie (1320). The 2 rivers which flank it, the Dee and the Don, are famous in history and the 2 miles of promenade and the sandy beach attract many holiday visitors. Industries include the manufacture of agricultural machinery, paper and textiles; fishing, shipbuilding, granite-quarrying, and engineering. The civic leader is the Lord Provost. Pop. (1961) 185,379.

ABINGDON. Ancient market town (bor.) in Berks, England, where the Ock joins the Thames, 6 m. S. of Oxford. There are remains of the 7th cent. abbey around which it was built. The 15th cent. bridge over the Thames was rebuilt in 1929. The grammar school was founded in 1563. Pop. (1961) 14,283.

ABINGTON, Fanny (1737–1815). English actress. A flower girl in St. James's Park, London, and then a street singer, she was the original Lady Teazle.

ABNER. In the O.T. Saul's cousin and chief captain. After his master's death he went over to David, only to be treacherously murdered by Joab.

ABO (aw'boh). Port in Finland, now Turku, q.v.

ABOMEY. Town and port of the Rep. of Dahomey, W. Africa, once cap. of the kingdom of Dahomey. The old town was defended by a mud wall 6 m. in circumference. Pop. (1965) 23,000.

ABOMINABLE SNOWMAN. Man-like creature, with long arms and a thick-set body covered with reddish-grey hair. Travellers and climbers have said that it exists in the Himalayas, where it is locally known as the Yeti.

ABORIGINES. The intelligence which enables these hunters with their spears to survive, even in the 'dead heart' of Central Australia, is finding new outlets through the Federal Government's educational scheme.

Courtesy of Australian News and Information Bureau.

ABORIGINES (abōr'jinēz). Those inhabitants of a country who are believed to have been there from time immemorial (Lat. *ab origine*, from the beginning). The word now more particularly refers to the native peoples of those lands which have become the scene of European settlement, e.g. the As. of Australia.

ABORTION. In law, the expulsion of the contents of the pregnant womb at any time before full term; in medicine, the expulsion before the foetus is capable of living—before the 6th month. Expulsion after that is called miscarriage or premature labour. A. may be spontaneous, therapeutic, or criminal. In many countries A. is a recognized method of birth control, and in 1968 it was legalized in certain circumstances in Great Britain and Wales.

ABRAHAM (fl. c. 2300 B.C.). Founder of the Jewish nation. B. at Ur, Abram was the son of Terah, and migrated to Haran, N. Mesopotamia, with his father, his wife Sarah, and his nephew Lot. Proceeding to Canaan, he received Jehovah's promise of the land to his descendants, and after sojourning in Egypt during a famine, separated from Lot at Bethel before settling in Hebron. On re-naming him Abraham 'father of many nations', Jehovah promised him a legitimate heir, and then tested him by a command to slay the boy Isaac in sacrifice. By his 2nd wife, Keturah, A. had 6 sons. He was buried in Machpelah cave, Hebron.

ABRAHAM, Edward Penley (1913–). British biochemist. Professor of chemical pathology at Oxford from 1964, he succeeded (with his group) in isolating the antibiotic cephalosporin (q.v.), capable of destroying penicillin-resistant bacteria.

ABRAHAM, Plains (or Heights) of. Plateau near Quebec, Canada, where on 13 Sept. 1759 the French under Montcalm were defeated by Wolfe, whereby Canada was won for the British Empire. It is now the National Battlefield Park.

ABRASIVES. Substances used for cutting and polishing or for removing small amounts of the surface of hard materials. They are divided into *natural* As., e.g. quartz, sandstone, pumice, diamond, corundum, and emery; and *artificial*, e.g. bath brick, rouge, whiting, and carborundum. They are usually referred to Mohs' Scale of Hardness, a list of 10 minerals ranging from diamond as the hardest and number 10, to talc as the softest and number 1.

ABBRUZZI (ahbroots'i). Mountainous area of south central Italy, culminating in the Gran Sasso d'Italia (9,560 ft.), highest point of the Apennines.

ABSALOM. In the O.T., the 3rd and favourite son of King David. He headed a revolt against his father, was defeated in battle, and as he fled on a mule, his long hair caught in an overhanging branch. In this predicament he was slain by Joab, David's captain.

ABSINTH. Strong alcoholic drink containing from 60 to 80 per cent of alcohol, which owes its 'toxic' qualities to the oil of wormwood which gives its characteristic flavour. It attacks the nervous system and causes acute symptoms of narcotic poisoning.

ABSOLUTE ZERO. The lowest temperature which could possibly exist, equivalent to -273.16°C . when molecules would have no energy. Near this temperature the physical properties of materials change substantially, e.g. some metals lose their electrical resistance.

ABSTRACT ART. Abstract works of art may be classified as (1) *semi-abstract* – i.e. those works which are based on nature, though they bear little resemblance to natural forms; and (2) *pure abstract* – i.e. those works which have no relation to nature, but consist of shapes and colours of the artist's own invention. In (1) we may group Cubism, Futurism, Vorticism, and the work of certain artists, such as Henry Moore and Archipenko, who have evolved their own individualistic styles. In (2) we may include Constructivism, Suprematism, and Neo-Plasticism. There are other movements, such as Expressionism, which defy classification. In Expressionist paintings forms are created instinctively, according to the promptings of the artist's emotions, but such works usually consist of lines and shapes, and can therefore be considered as abstract. Surrealist works are also executed in a similar way – they are the expressions of a dream-world – but since their chief interest lies in their subject-matter they cannot, strictly speaking, be classed as A.A. For definitions of the different movements see CUBISM, CONSTRUCTIVISM, FUTURISM, etc.

ABSD, Theatre of the. See ALBEE, E.; BECKETT, S.; IONESCO, E.; and SIMPSON, N. F.

ABU (ah'boo). An isolated granite peak of the Aravalli range in Rajasthan, India. It is 5,650 ft. in height, and one of the most sacred centres of Jain worship.

ABU-BEKR (573–634). Mohammed's father-in-law and the first caliph. B. at Mecca and originally named Abd-el-Ka'ba, he was one of the first notable converts to Mohammed's teaching, accompanied the Prophet on his flight to Medina, and took the name Abu-Bekr, 'Father of the Virgin', when Mohammed married his daughter Ayesha (c. 618). As Mohammed's successor (632) he proved a vigorous ruler, adding Mesopotamia to the Moslem world.

ABU DHABI. The largest of the Trucial States on

the Persian Gulf. Its borders are ill-defined and there has been dispute with Muscat and Saudi Arabia over ownership of the villages of the Buraimi Oasis. Its oil resources (production began 1962) are said to rival Kuwait. The cap. is Abu Dhabi on an island in the Gulf. Pop. (est. 1962) 20,000.

ABYDOS (abī'dos). Ancient city of upper Egypt, 7 m. W. of the Nile, about 100 m. above Asyut. The Great Temple built here by Seti I (c. 1300 B.C.), is one of the most imposing Egyptian temples.

ABYSSINIA. Another name for ETHIOPIA.

ACACIA (akā'sha). Genus of trees and shrubs of the family Leguminosae. Most of the 400 species flourish in the tropics of Africa and Australia. See WATTLE and MIMOSA.

ABSTRACT ART. 'Still Life' a typical example of the work of French artist Georges Braque (q.v.). Dated 1936, it is in the decorative style of Cubism, and falls into the semi-abstract group.

ACADEMY (Gk. *akadēmela*). Name given to the Platonic school of philosophy, which met in the gardens of Academe, in the N.-W. of Athens. Here among the olive groves Plato and his successors taught their disciples, until in A.D. 529 Justinian closed all the pagan schools.

First of the As., in the modern sense of a recognized society estab. for the promotion of one or more of the arts and sciences, was the Museum of Alexandria, founded by Ptolemy Soter in the 3rd cent. B.C.

The *Académie française* originated as a literary society in 1629, and was granted letters patent by Louis XIII in 1635. Since 1639 its membership has been restricted to 40 at a time, the '40 Immortals'. It is conservatively influential, and is the guardian of the purity of the French tongue, of which it prepared the first standard dictionary 1639-94.

The Soviet *A. of Sciences* was originally estab. by Catherine I in 1725 as the Académie Impériale des sciences de Saint-Petersbourg. Responsible for such achievements as the *Sputnik*, the A. formerly admin. many of the country's 3,000 scientific establishments, but in 1961 was reorganized to concentrate on the most promising lines of theoretical research. The practical side of scientific research work was entrusted to the newly-created State Committee of the Council of Ministers for the Co-ordination of Scientific Research Work.

In Britain an 'academy' generally means a society dealing with the arts, such as the Royal Academy, those dealing with the sciences and with historical and philosophical studies being known as 'societies'. The British Association comes within this category.

ACADIA, or ACADIE (ahkahidé). Name given to Nova Scotia by the original French settlers in 1604. France renounced her claim to the colony in 1713. Many of its inhabitants migrated to New England and

Louisiana; some 4,000 others were expelled in 1755.

ACANTHIUS. Genus of herbaceous plants, family Acanthaceae, of the Mediterranean region. The A. was frequently used as a motif in classical architecture, the Greeks preferring the species *A. spinosus* (natural leaf and stylized form as illus.) and the Romans *A. mollis*. The latter, often grown as an ornamental plant and also called bear's breach, grows

some three feet high. The spineless, hairy leaves are shiny, and the flowers form handsome white or pinkish spikes.

ACAPULCO (ak'apōō'lkō). Mexican holiday resort, famed for its beauty and deep-sea fishing, set in an almost land-locked bay 190 m. S.W. of Mexico City. Pop. (1963) 35,000.

ACCAD. Ancient town on the left bank of the Euphrates from which a Semitic people of N. Babylonia took their name—Accadians. It was the chief city of the empire of Sargon I.

ACCELERATION. The rate of increase in the velocity of a moving body, usually expressed in feet or centimetres per second per second. The acceleration due to gravity is the A. shown by a body falling freely under the influence of gravity, either in a vacuum or after allowing for the retardation due to air resistance; it varies slightly at different latitudes, but is equivalent to c. 32.16 ft per sec per sec. Retardation is actually A. in the reverse direction, e.g. a rising rocket is actually being accelerated towards the centre of the earth.

ACCESSARY. In Eng. law, an *accessary before the fact* is one who instigates another person to commit a felony which that person then commits. If he is present when the crime is committed, he is not an A. but an *abettor* or principal in the second degree. An *A. after the fact* is one who assists a person whom he knows has committed a felony.

ACCOLADE. Gentle blow on the shoulders with the flat of the sword given by the Sovereign, or a representative in conferring a knighthood. The word comes from the French for an embrace or clasp about the neck, and in earlier times the knightly ritual included such an embrace and sometimes a kiss.

ACCOMPLICE. One who is associated with another in the commission of a crime. In law, the word is applied not only to persons who played a minor part in the crime, but also to the principal offenders.

ACCORDION. Portable musical instrument invented by Damian of Vienna in 1829. Box-like in form, it comprises a pair of bellows with many folds and a keyboard of up to 50 keys. On these

ACAPULCO. Though the town is now famous as a swimming and boating centre for the tourist, some of the picturesque features of the fishing village remains and dried squid are still thought to be hung above the house doors as a charm against evil spirits. Photo. Parashy's Picture Library

being pressed and the bellows worked, wind is admitted to metal reeds, whose length and thickness determines the notes they emit.

ACCOUNTANCY. The art or practice of an accountant. The accountant today enjoys professional status and is entrusted not only with the control of the book-keeping functions and the preparation of Trading and Profit and Loss Accounts and Balance Sheets, but with numerous other duties in connection with the financial affairs of an organization. The auditing of accounts is the work of professional accountants who may also be required to serve as liquidators of companies, receivers for debenture holders, etc.

In the British Isles there are Inst. of Chartered Accountants for England and Wales, Scotland, and Ireland and other professional organizations; the American Inst. of Accountants dates from 1887.

ACCRA' Capital and port of Ghana, W. Africa. It is an important commercial and industrial centre with good road, rail, and air communications. The Univ. of Ghana (1961) is at nearby Legon, with its medical school in A. itself. Pop. of the Greater A. region (created 1964) 491,820.

ACCRINGTON. English town (bor.) in Lancs, 20 m. N. of Manchester. Industries incl. engineering, textiles. Pop. (1961) 40,987.

ACETALDEHYDE (CH₃CHO). In chemistry, one of the chief members of the group of organic compounds known as aldehydes. It is a mobile inflammable liquid boiling at 20.8°C. (69.6°F.).

ACETIC ACID (CH₃COOH). One of the simplest members of a series of organic acids called the fatty acids. In the pure state it is a mobile colourless liquid with an unpleasant pungent odour; it solidifies to an ice-like mass of crystals at 16.7°C., and hence is often called glacial acetic acid. See VINEGAR.

ACETONE (CH₃COCH₃). A colourless mobile inflammable liquid used extensively as a solvent. It boils at 56.5°C., is miscible with water in all proportions, and has a pleasant and characteristic odour. Very large quantities are used in the manufacture of nitrocellulose lacquers and aeroplane dope.

ACETYLENE (C₂H₂). A colourless inflammable gas produced by the action of water on calcium carbide. It was discovered by Edmund Davy in 1836 by the action of water on some impure by-products of the preparation of potassium.

The most important modern development in the use of A. is its conversion into artificial rubbers. Since the combustion of A. provides more heat relatively than almost any other fuel known – its calorific power is 1,500 Btu ft³ as compared with about 500 for coal gas and 300 for hydrogen – the gas is of great value in obtaining an intensely hot flame, e.g. in oxyacetylene welding and cutting.

ACHAEA (ak'e'a). Ancient name for Greece. The name Achaeans was originally used for the fair-haired invaders from the N. who swept over the whole of Greece some time before 1100 B.C., submerging the ancient Aegean civilization of Mycenae, and who then captured Troy, as told in the Iliad.

The Achaean League of 275 B.C. united most of the cities of the northern Peloponnesus, and achieved victory over Sparta, but it was worsted by the Romans in 146 B.C.

ACHARD (akh'hahrd), Franz Karl (1753–1821). Prussian chemist, b. in Berlin. He was a pioneer in producing sugar from beetroot.

ACHERON (a'keron). In Greek mythology, one of the rivers of the lower world. The name was taken from a river in S. Epirus which flowed through a deep gorge into the Ionian Sea.

ACHESON, Dean Gooderham (1893–). American statesman and lawyer. He was Under-Secretary of State 1945–7, and was closely associated with George C. Marshall in the preparation of the 'Marshall Plan'. He succeeded him as Sec. of State from 1949

until the end of the Truman régime in 1953. In 1961 he was appointed by Kennedy to head an advisory group studying U.S. policy vis-à-vis the N.A.T.O. alliance.

ACHILL (ak'il). Largest of the Irish islands, lying off the coast of Mayo. The scenery is wild and mountainous, and on the N. and W. are cliffs reaching 900 ft. Area, 57 sq. m.; pop. c. 5,000.

ACHILLES (ak'il'ez). Greek hero, the central figure of Homer's Iliad. He was the son of Peleus, king of the Myrmidons in Thessaly. His mother Thetis dipped him into the r. Styx and thereby made him invulnerable except for the heel by which she held him. Bravest and handsomest of all the Greeks, he took part in the Trojan War, and in a mighty combat killed Hector. In the end he was himself slain by Paris, whose poisoned arrow wounded him in the heel.

ACCRA. Christianborg Castle was one of the 3 forts (British Dutch and Danish) which formed the nucleus of the settlement, and was named after Christian V (1646–99) of Denmark. Ceded to Britain in 1850, the castle was later used as Government House, and on Ghana's independence was extended to house the President's Office.

Courtesy of Ghana Information Services.

ACID (Lat. *acidus* acid, sour). In chemistry, a substance which in solution in an ionizing solvent (usually water) gives rise to hydrogen ions. The more obvious properties of As. are their sharp taste, and their ability to turn litmus red, to neutralize alkalis to form well-defined salts, and act as solvents. The first known A. was vinegar. Inorganic As. include boracic, carbonic, hydrochloric, nitric, phosphoric, sulphuric, and sulphuretted hydrogen; and among organic acids are acetic, benzoic, citric, formic, lactic, oxalic, and salicylic. As. combine with bases (alkalis are soluble bases) to form salts. 'Strength' of an acid is measured by its hydrogen-ion concentration, indicated by pH value and expressed on a scale of numbers from 0 = extremely acid, through 7 = neutral, to 14 = extremely alkaline.

ACLAND, Sir Richard (1906–). British politician. The son of a prominent Liberal, he developed left-wing views and in 1942, in association with J. B. Priestley, became founder and leader of Common Wealth. In 1943 he gave the A. family estates at Killerton to the National Trust. He was a Labour M.P. 1947–55.

ACNE (ak'-). A skin eruption due to inflammation of the sebaceous glands that secrete an oily substance called sebum, the natural lubricant of the skin. Sometimes their openings become stopped and they swell; the contents decompose and pimples form.

ACONCA'GUA. An extinct volcano (23,000 ft.) in the Andes on the W. border of Argentina. Formerly reputed the highest peak in the Americas, it was found in 1956 to be surpassed by Ojos del Salado (q.v.): it was first climbed in 1897.

A'CONITE. Genus of poisonous plants of the Ranunculaceae family. Of some 60 species, *Aconitum*

napellus, or Monkshood, is the common European species; also known as *A. lycoctonum*, wolf's bane. The roots yield aconitine.

Â'CORN. Fruit or seed of the oak tree. It is a nut, based in a shallow cup or cupule. The sea-acorn or acorn-shell (*Balanus*) is a genus of Cirripedia, allied to the barnacles.

ACOUSTICS (akoo'- or akow'-). In general, the experimental and theoretical science of sound; but more specially, that branch of the science that has to do with the phenomena of sound in space, e.g. public buildings, concert halls, cinemas, etc. Acoustical engineering is concerned with the technical control of sound, and the subject also enters into architecture and building, with the necessity for the control of vibration, for sound-proofing and the elimination of noise; it also includes all forms of sound recording and reinforcement, and hearing-aids. See SOUND.

ACQUAVIVA (ahkwah-), Claudius (1543-1615). A Neapolitan, he was General of the Jesuits from 1581 and one of their ablest organizers and educators.

ACQUITTAL. In law, the clearing or setting free of a person charged with a crime or accusation. In an English court this follows on a verdict of 'not guilty', but in a Scottish court the verdict may be either 'non-proven' or 'not guilty'. A. by the jury must be confirmed by the judge.

Â'CRE. City and port of Israel, on a promontory at the northern extremity of the Bay of A. It has played an important part in history, owing to its strategic position. In 1517 it became part of the Turkish empire. Napoleon besieged it in 1799, but was withstood by the Turkish Jezzar Pasha, supported by a British fleet under Sir Sidney Smith. During the F.W.W., General Allenby captured it from the Turks (1918): the Israelis captured it in 1948. A. has lost importance owing to the growth of Haifa, 9 m. S. but exports olive oil, corn, and wool. There is a Naval Officers' School. Pop. c. 10,000.

Â'CRE. English land measure, comprising 4,840 sq. yds. Originally the word meant a field, and it was of a size that a yoke of oxen could plough in a day. But as early as Edward I's reign a statute limited it to a plot 40 poles (220 yards or 1 furlong) long by 4 poles (22 yds.) wide = 4,840 sq. yds., or 4 roods or 160 sq. rods, poles, or perches. A present-day allotment usually consists of 10 rods, i.e., 1/16th of an acre. The Scottish acre is 6,150.4 sq. yds., and the Irish is 7,840 sq. yds. Leicestershire, Cheshire, and Westmorland have their own local acres.

Â'CRIDINE (C₁₃H₉N). An organic compound which occurs in crude anthracene oil, from which it may be extracted by dilute acids. It is also obtained synthetically. It gives rise to many dye-stuffs and some valuable drugs.

ACROME'GALY. A disease distinguished by an unsightly enlargement of the prominent parts of the body (Gk. *akra*, high parts), e.g. the hands and feet, and the lips, nose, tongue, and jaws. It is due to an excessive output of growth hormone by the front lobe of the pituitary gland.

ACRO'POLIS. The citadel of an ancient Greek town. Best known is the A. at Athens, famous for the ruins of the beautiful temples built there during

ACONITE

Â'CRE. The strong walls guarding the seaward side of the city reflect its troubled history, but, though pitted by shot, still stand firm. Courtesy of the Israel Government Tourist Office.

the great days of the Athenian empire. See illus. pp. 8 and 491.

ACROSTIC. A verse or set of verses whose initial letters form a word, phrase, or sentence; the term comes from the Gk. for 'at the end of a line or row'. Sometimes the end letters form the same (or different) words as the initial ones, and sometimes, too, the letters run down the middle of the verse like a seam. Thus we have single, double, and triple As.

ACTAEON (akté'on). Greek mythical hero. The son of Aristaeus and Cadmus' daughter Autonoe, he was a famous hunter. He accidentally spied upon Artemis as she was bathing, and the goddess changed him into a stag, whereupon he was torn to pieces by his own hounds.

ACTINIDES. Those chemical elements with nos. 89-103, all radioactive and man-made above uranium, no. 92. They are grouped because of their chemical similarities, and also by analogies with the rare-earth elements (lanthanides). See Table p. 244.

ACTINIUM. Rare radioactive element, at. no. 89, at. wt. 227, the first of the actinides, a weak emitter of high-energy alpha-rays. Made in quantity by bombarding radium with neutrons.

ACTION. One of the proceedings whereby a person enforces his civil rights in a court of justice. The best-known proceedings not commenced by action but by petition are bankruptcy and divorce.

ACTION FRANÇAISE (ahksyon' fronsáz'). French political group, Royalist and extreme Right in principle, whose centre was the newspaper *L'Action Française*, founded in 1899 and long edited by Charles Maurras. J. Bainville and Léon Daudet were leading contributors. Maurras was condemned as a collaborator with the Nazis in 1945, and the paper and movement came to an end.

Â'CTIUM. Ancient name of a promontory in western Greece on the gulf of Arta, where the fleets of Antony and Cleopatra were defeated by Octavian in 31 B.C.

ACROPOLIS. The earliest city was comprised within the bounds of the Acropolis, 1,000 ft. long from east to west. Now modern Athens, glimpsed through the Ionic columns of the north porch of the temple of Erechtheus, legendary founder of the city, stretches far into the distance.

Courtesy of the National Tourist Organization of Greece.

ACT OF CONGRESS. In U.S.A. a bill or resolution that has been passed by the Senate and the House of Representatives and has received the President's assent. If he vetoes it, it may become an A. of C. if it is returned to Congress again and passed by a majority of two-thirds in each House.

ACT OF GOD. Legal term meaning some direct, violent, sudden, and irresistible act of nature which could not reasonably have been foreseen, e.g. extraordinary storms, snow, or frost.

ACT OF INDEMNITY. An Act of Parliament passed to relieve some person from the consequences of some action or omission which, at the time the action or omission took place, was illegal, or of which the legality was doubtful.

ACT OF PARLIAMENT. A parliamentary statute; a decree of the sovereign legislature having the force of law. Acts of P. are of two kinds, public and private, but there is no distinction as to their force, only as to their application; i.e. public Acts of P. have a general effect, while private Acts deal with matters of purely local interest.

Acts are known not only by the year of the reign, but by a short title, e.g. that of 22 Geo. 5 c. 4. is commonly referred to as the Statute of Westminster, 1931.

The body of English statute law comprises all the Acts passed by Parliament, and the existing list opens with the Statute of Merton, passed in 1235. An Act (unless it is stated to be for a definite period and then to come to an end) remains on the statute book until it is repealed.

ACTON, John Emerich Edward Dalberg-Acton, 1st baron A. (1834–1902). British historian. B. at Naples, of old English R.C. stock, he was elected a Liberal M.P. in 1859 and became a friend and admirer

of Gladstone. As leader of the Liberal R.Cs. he opposed the promulgation in 1870 of the doctrine of papal infallibility. Appointed prof. of modern history at Cambridge in 1895, he planned and edited the *Cambridge Modern History*, but d. when only the first 2 vols. were completed.

ACTUARY. An official of a government department, insurance co., or friendly soc., whose task it is to make the calculations concerning human longevity, etc., on which the tables of mortality, sickness, accident, etc., and hence the premiums or charges, are based. Professional bodies are the Inst. of Actuaries (England, 1848), Faculty of Actuaries (Scotland, 1856) and Society of Actuaries (U.S., 1949, by a merger of 2 earlier bodies).

ACUPUNCTURE (ak'ū-). Method of healing involving the insertion of gold needles into the body (Lat. *acu* with a needle) at points determined according to a system which in China, where A. originated, requires a decade of study. There is a British College of A. at Leamington.

ADAM. Four brothers – Robert, John, James, and William – distinguished Scottish architects and interior decorators.

Robert A. (1728–92), was b. at Kirkcaldy, travelled in Italy and Dalmatia, and was appointed Architect to the King in 1762. With the assistance of his brothers, he designed the district of London between Charing Cross and the Thames, which was named after them the Adelphi (from the Gk. for brothers). The area was largely rebuilt in 1936. The A. brothers were responsible for a great improvement in architectural taste, and developed a style which was decidedly their own. Robert A. also earned a considerable reputation as a furniture designer.

James A. studied in Rome, and succeeded Robert as Architect to the King in 1768; William A. is described as an architect and a banker; and John A. succeeded his father as an architect in Edinburgh.

ADAM (ahdōn'), Adolphe Charles (1803–56). French composer of light operas. Some 50 of his works were staged; he is best known for the classic ballet *Giselle*.

ADAM (or Adan) DE LA HALLE (c.1235/40–87). French troubadour, known as the 'Hunchback of Arras'. His *Jeu de Robin et Marion* is the earliest French comic opera, and *Le jeu Adan or Le jeu de la Feuillée* a precursor of the modern revue.

ADAM and EVE. In the Bible, the first parents of the human race. According to Gen. ii, 7–iii, 24, Jehovah (Yahweh) formed man from the dust, breathed into his nostrils the breath of life, and put him in the Garden of Eden, where the fruit of the Tree of Knowledge of Good and Evil was forbidden him. God formed a woman from a rib of the man while he slept. The woman was tempted by the serpent to eat the forbidden fruit, persuaded A. also to eat, and they were expelled from Eden.

ADAMOV, Arthur (1908–). Russian-born French playwright. He has pub. translations of Gorki, Chekhov, and Gogol and their influence is noticeable in his plays: *La Parodie*, *Le Ping-Pong*, *En Fiacre* and *Spring '71*.

ADAMS, Henry Brooks (1838–1918). American author. A grandson of President John Q. A., his best-known works are the studies of the 13th cent. *Mont-Saint-Michel and Chartres* (1904), and of the contrasting complexities of the 20th, *Education of H.A.* (1907).

ADAMS, James Truslow (1878–1949). American historian, author of *The Epic of America* (1931), and many other works.

ADAMS, John (1735–1826). 2nd President of the U.S.A. B. at Quincy, Mass., he was a member of the Continental Congress, 1774–8, and signed the Declaration of Independence. In 1779 he went to France and negotiated the treaties that closed the

ADAM AND EVE. A scene from Michelangelo's world-famous Biblical frescoes on the vaulting of the Sistine Chapel at Rome. In the centre is the Tree of Knowledge of Good and Evil, round which is coiled the tempting serpent. On the left our first parents are plucking 'the fruit' (in Milton's words) 'of that forbidden tree, whose mortal taste brought death into the world, and all our woe, with loss of Eden'. Adam and Eve are driven from Paradise (right), and go out naked into a cold and hostile world.

War of American Independence. In 1785 he became the first American ambassador in London. Returning home, he was Vice-President (1789–97), and President 1797–1801.

ADAMS, John Couch (1819–92). British astronomer. B. in Cornwall, he deduced the existence of the planet Neptune in 1845, and in 1858 became professor of astronomy at Cambridge.

ADAMS, John Quincy (1767–1848). 6th President of the U.S.A. Eldest son of President John Adams, he was b. at Quincy, and became U.S. minister in turn at The Hague, Berlin, St. Petersburg, and (1815) London. In 1817 Monroe made him Secretary of State, and 1825–9 he was President.

ADAMS, Léonie (1899–). American poet. B. in N.Y., she became instructor in writing at Columbia Univ. in 1947, and is noted for her romantic, metaphysical lyrics, as in *Those Not Elect* (1925) and *This Measure* (1933).

ADAMS, Samuel (1722–1803). American statesman. B. in Boston, he was a 2nd cousin of President John Adams, and was a leader of the revolutionary party in Massachusetts. He sat in the Continental Congress 1774–81, and signed the Declaration of Independence. In 1776 he anticipated Napoleon in calling the English a nation of shopkeepers.

ADAMS, Sherman (1899–). American statesman. A New Englander, he is descended from the 8th son of an English West Country immigrant: the 7th son founded the line which produced the 2nd and 6th American presidents. He was gov. of New Hampshire from 1949 until his appointment as assistant to President Eisenhower in 1953: during the President's illnesses great power devolved on him. He resigned in 1958 after it was revealed that he had accepted valuable gifts from a Boston manufacturer, but he emphatically denied influencing the decisions of Government agencies in return. In 1961 he pub. an account of the Eisenhower administration, *First-Hand Report*.

ADANA (ahdah'nah). Town in Turkey-in-Asia, cap. of the il of Seyhan, on the r. Seyhan. It has cotton, tobacco, and agricultural machinery factories. Pop. (1960) 230,024.

ADDAMS, Jane (1860–1935). American sociologist and feminist. A founder and head of the social settlement of Hull House, Chicago, she was active in the peace movement: co-winner Nobel prize 1931.

ADDER. See VIPER.

ADDINGTON, Henry (1757–1844). British Tory statesman, Prime Minister of U.K., 1801–4. In 1805 he was created Viscount Sidmouth.

ADDINSELL, Richard (1904–). British composer. B. in London, he studied at the Royal College of Music and abroad, and wrote music for many theatrical productions and films, e.g. *Dangerous Moonlight*, which includes the 'Warsaw Concerto'.

ADDIS ABABA (Amharic, meaning new flower). Cap. of Ethiopia, and of Shoa prov., founded 1887 by Menelik, then chief of Shoa, at the request of his wife Taitu who found the climate of his existing cap. Entotto, lying farther north, too severe. The region chosen for the new cap., formerly uninhabited, lies at 8,000 ft. a.s.l., but is protected by the surrounding

ADAM. Osterley Park, Isleworth, was remodelled by Robert Adam from the Elizabethan mansion built in 1557 for Sir Thomas Gresham. Here is the Eating-Room, with paintings by Antonio Zucchi, which is among the best examples of his decorative work. Photo: Victoria and Albert Museum.

Shoa highlands, and includes hot springs. Eucalyptus woods were planted nearby by Menelik who, when he ascended the throne of Ethiopia in 1889, made A.A. cap. of the whole country. A.A., which is linked by a railway completed 1917 with Djibouti on the coast of the Terr. of the Afars and the Issas, was cap. of Italian East Africa 1936-41. Of the four royal palaces in the city, one was presented by Haile Selassie to Ethiopia's first university, inaugurated by him in 1961; in the grounds of another is a compound of lions, symbolic of the Emperor's role as Lion of Judah. Pop. (1965) 637,831.

ADDISON, Christopher, 1st visct. (1869-1951). British politician. As a Liberal M.P. 1910-22, he was one of the most prominent of Lloyd George's lieutenants in the struggle to secure National Health Insurance, and was the first Minister of Health in 1919-21. He joined the Labour Party in 1922, and his posts under Attlee included that of Dominions Sec. 1945-7, and Lord Privy Seal 1947-51. He was created a baron in 1937, and a visct. in 1945.

ADDISON, Joseph (1672-1719). British essayist and poet, b. in Wilts. In 1699 he was granted a pension

to enable him to qualify for the diplomatic service by foreign travel, and in 1704 celebrated Marlborough's victory at Blenheim in his poem 'The Campaign'. In 1706 he became Under-Sec. of State, and in 1708 secretary to the Lord-Lieutenant of Ireland, and an M.P. In 1709 he began to contribute to the *Tatler*, just started by his friend Steele; and in 1711 the two together estab. the *Spectator*, to which A. contributed the 'Coverley Papers'. In 1713 his successful tragedy *Cato* was performed, and he contributed to Steele's *Guardian* and in 1714 to the revived *Spectator*. In 1716 he was appointed a commissioner for trade, and in 1717 a Sec. of State, but failing health led to his withdrawal from public life in 1718.

ADDISON, Thomas (1793-1860). Physician. B. nr. Newcastle, he became physician to Guy's Hospital, London, in 1837. He was the first to recognize the condition known as *Addison's disease* - a disease of the suprarenal capsules.

ADELAIDE (1792-1849). Queen of William IV. Daughter of the duke of Saxe-Meiningen, she m. William, then duke of Clarence, in 1818. No children of the marriage survived infancy.

ADELAIDE. Capital of South Australia. Founded in 1836, and named after William IV's queen, it stands on high ground overlooking Holdfast Bay and sheltered on the S. and E. by hills of which the highest peak is Mt. Lofty (2,334 ft.). It is a noteworthy example of town-planning. The residential districts are separated from the commercial by the r. Torrens, dammed to form a lake. The most impressive streets are King William St. and North Terrace. A.'s fine buildings include Parliament House (built of marble), Government House, the Anglican cathedral of St. Peter, the R.C. cathedral, the University, the State observatory, museum and art gallery. Pop. (1961) 587,656. See illus. p. 12.

ADELIE LAND. See ANTARCTICA.

ADELSEBERG. German name of Postojna. See CARNIOLA.

ADEMOLA, Sir Adetokumbo (1906-). Nigerian judge. The son of Sir Ladapo A., Alake of Abokuta, he became in 1958 chief Justice of the Federal Supreme Court.

Kit-Cat Club Portrait by G. Kneller. Photo: N.P.G.

A'DEN. Twin peninsulas of barren volcanic rock, A. and Little A., linked by a coastal strip and commanding the southern entrance to the Red Sea, at the S.W. corner of Arabia: from 1967 part of the People's Rep. of Southern Yemen. A. was annexed by Britain in 1839; the harbour was strongly fortified, and after the opening of the Suez Canal, A. developed rapidly as a fuelling and transhipment station. Chief towns are Crater, Sheikh Othman, Tawahi, Maalla, and Khormaksar: there is a large oil refinery in Little A. completed 1954. Created a colony in 1937, A. became in 1963 a state of the Federation of S. Arabia. Area 75 sq. m.; pop. (1966) 250,000.

The protectorates of Western A. and Eastern A. were known from 1963 as the South Arabia Protectorate: area 112,000 sq. m.; pop. (est. 1966) 1,000,000. In 1959 six amirates of the Western A. Protectorate founded the Federation of South Arabia, which other states as well as A. itself later joined: this was intended as the basis of an eventually independent new state. However, from 1964 there was intensive terrorist activity by the Front for the Liberation of Occupied South Yemen (FLOSY), supported by Egypt and also engaged in internecine warfare with the National Liberation Front (N.L.F.). Following Egypt's withdrawal from neighbouring Yemen, the Fed. of S. Arabia, incl. Aden, became independent as the People's Rep. of Southern Yemen in 1967.

ADENAUER (ah'denower), Konrad (1876-1967). German statesman. He was Lord Mayor of his native city of Cologne from 1917 until his imprisonment in 1933 by Hitler for opposition to the Nazi régime. After the war he headed the Christian Democratic Union, and in 1949 became Chancellor of the Federal Republic, being re-elected in 1953 and 1957. A strong supporter of all measures designed to strengthen the Western bloc in Europe, e.g. his support of Britain's entry into the Common Market, he regarded the re-unification of Germany as the primary element in world tension. He retired in 1963.

ADENOIDS. Popular word for the glandular tissue on the back of the upper part of the throat, into which the nose opens. This is apt to overgrow in children as a result of infection, and to cause chronic blocking of the nose and mouth-breathing. The open mouth makes the child's expression look vacant, and the voice has a dull twang. The child is subject to constant colds, is in danger of middle-ear disease and deafness, and often suffers from chronic tonsillitis. The treatment is the removal by surgery of the tonsils and overgrown adenoid tissue.

ADER (ah'där), Clement (1841-1925). French pioneer airman. B. at Muret, he completed in 1890 his first full-scale flying-machine, the *Eole*, the wings of which were bat-shaped when extended in flight, and folded when on the ground. A. claimed to have made a first flight on 9 Oct. 1890, but the machine crashed. In 1897 he built the *Avion*, somewhat larger; but a trial flight before military witnesses was inconclusive.

ADIABATIC. The A. expansion or contraction of a gas is one in which a change takes place in the pressure or volume of the gas, although no heat is allowed to enter or leave.

ADIGE (ah'dējeh). Next to the Po, the longest river in Italy, it rises in the lakes of the Resia Pass, traverses the Lombardy Plain, and enters the Adriatic a few miles N. of the Po delta. It is about 254 m. long.

ADI GRANTH or **GRANTH SAHIB**. The holy book of the Sikhism (q.v.).

ADIRO'NDACKS. Mountainous area in the N.E. of New York State, U.S.A., famous for its scenery and sport facilities. In Mt. Marcy it reaches 5,345 ft.

ADLER (ah'd'ler), Alfred (1870-1937). Austrian psychologist, founder of the school of Individual Psychology. B. in Vienna, he was a general practitioner and nerve specialist there 1897-1927, serving

as an army doctor in F.W.W. He joined the circle of Freudian doctors in Vienna about 1900, but did not accept the more dogmatic Freudian theories of infantile sexuality. After 10 years of collaboration, he parted company with Freud to develop his own distinctive line of thought. His books incl. *Organic Inferiority and Psychic Compensation* (1907) and *Understanding Human Nature* (1927).

ADLER, Felix (1851–1933). Jewish scholar and ethical leader. B. in Germany, the son of a rabbi who emigrated to U.S.A. in 1857, he became prof. of Hebrew at Cornell, and founded the Society for Ethical Culture, New York.

ADMINISTRATIVE LAW. The laws made and the judicial decisions arrived at by the Executive under powers delegated to them by the Legislature; such legislative powers have been vastly extended in the 20th cent. in many countries and have been attacked by lawyers. In the U.S. the Administrative Procedure Act (1946) was an attempt to cope with the problem.

In Great Britain the very many new powers delegated to Ministers of the Crown are so wide as frequently to enable the Ministers to make regulations which amend or override Acts of Parliament, and in some cases they further take away from the courts of law the power they have hitherto exercised of confining the legislative activities of the Executive within the limits of the authority delegated to them by Parliament by declaring any regulation that exceeds these limits to be *ultra vires*, and so of no effect.

ADENAUER. Together in Bonn in 1961 Chancellor Adenauer and President de Gaulle symbolize the Franco-German friendship which was one of the most striking developments of the years following the Second World War.

Courtesy of the German Embassy.

ADMIRAL. Naval officer of the highest rank: in the R.N. (in ascending order) rear-admirals, vice-admirals, admirals, and admirals of the fleet; in the U.S.N. there are 4 corresponding grades.

ADMIRALTY. From the reign of Henry VIII until 1964, the Board of A. was the dept. of State charged with the provision, control and maintenance of the Royal Navy; its functions—apart from that of management—then passed to the new unified Min. of Defence (q.v.). The 600-year-old office of Lord High Admiral, in commission in the A., then reverted to the Sovereign, to prevent its extinction.

ADONIS. In classical mythology, a beautiful youth beloved by Aphrodite. While hunting a boar he was gored to death; from his blood sprang the anemone. He was permitted to return each year from the underworld to his mistress for six months. He was worshipped as Adon by the Phoenicians, and earlier still the cult is found in Babylonia and Assyria.

ADOPTION. The legal acquisition of the rights and duties as to the custody and maintenance of a child not one's own legitimate offspring. In antiquity – as in Greece and Rome – emphasis tended to be on the acquisition of an heir, and, as in India, might have religious significance. A. was legalized in England only in 1926, and the modern emphasis is on the welfare of the child and its complete acceptance as if lawfully born to the adopter, e.g. by the Act of 1958 an adopted child inherits on an intestacy as if it were the child of the adopter, and closer restrictions were placed on A. societies. In the U.S. there is a particularly high rate of A., conditions being regulated by the laws of the various states. Stress on care of the child is illustrated by international As., e.g. those of Korean refugee children adopted in the U.K. through the International Social Service of Great Britain.

ADOWA. Alternative form of ADUWA.

ADRENAL GLANDS. A pair of glands situated on the upper poles of the kidneys and known also as 'suprarenal' glands. They are soft and yellow, and consist of 2 parts. The cortex (outer part) secretes various hormones (steroids) related to sex hormones, controls salt and water metabolism, and other processes. The medulla (inner part) secretes adrenalin, whose nature was discovered by Oliver and Schäfer in 1894, and which constricts the blood vessels of the belly, lungs, and skin so that more blood is available for the heart, lungs and voluntary muscles – an emergency preparation for 'fight or flight' causes a large output of adrenalin.

ADRIAN IV. Pope, 1154–9; Nicholas Breakspear, the only Englishman to sit in the papal chair. He was b. at Abbots Langley, became a monk in France, and in 1137 abbot of St. Rufus, near Arles. Elected pope at the end of 1154, he secured the execution of Arnold of Brescia, crowned Frederick I Barbarossa as German emperor; refused Henry II's request that Ireland should be granted to the English crown in absolute ownership; and was at the height of a quarrel with the emperor when he d. at Anagni.

ADRIAN, Edgar, 1st baron (1889–). British physiologist. He received the Nobel Prize for medicine in 1932, for his work with Sherrington in the field of nerve impulses, and was prof. of physiology at Cambridge 1937–51, and Master of Trinity Coll. 1951–65. His books incl. *The Basis of Sensation* (1928) and *The Physical Basis of Perception* (1947). Awarded the O.M. in 1942, he was created a baron in 1955.

ADRIANOPOLE. Older name of EDIRNE, after the Emperor Hadrian, who rebuilt it c. A.D. 125.

ADRIA TIC SEA. Large arm of the Mediterranean Sea, lying N.W. to S.E. between the Italian and the Balkan peninsulas. The western shore is Italian; the eastern Yugoslav and Albanian. The sea is about 500 m. long, and its area is 52,220 sq. m., of which 1,290 are islands. Its greatest depth is 850 fathoms off Durres; average depth 130 fathoms.

ADSHEAD, Stanley Davenport (1868–1946). British pioneer of town planning. He was professor of civic design at Liverpool 1909–14, and of architecture at London 1914–35. His dau. Mary A. (1904–) is a mural painter.

ADULTERY. Extra-marital act while married. In Britain A. by either husband or wife is a ground for divorce, for judicial separation, or for a separation order in a magistrate's court. In the U.S. adultery is universally recognized as ground for divorce; in some states it is a crime punishable by fine or imprisonment but the law is not widely enforced.

ADUWA (ad'u-wa). Chief town of the prov. of Tigré, Ethiopia, about 110 m. S.S.W. of Massawa at an altitude of 6,270 ft. It was formerly the cap. of Ethiopia, and it was here that the Ethiopians defeated the Italians in 1896.

ADVENT (Lat. *adventus*, approach, arrival). That season in the Christian calendar which is celebrated

as a preparation for the festival of Christmas. It includes the four Sundays before Christmas, beginning with the Sunday which falls nearest (before or after) to St. Andrew's Day (30 Nov.).

ADELAIDE. Among the most beautiful of Australia's cities, it has been called the 'Athens of the South', and owes much of its charm to the river Torrens, which is dammed to form a lake. The railway station, seen here to the left, is the terminus of all country and interstate passenger lines in S. Australia.

Courtesy of Agent General for South Australia.

ADVENTISTS. Those who hold the view that Christ will return to make a second appearance on the earth. Expectation of the Second Coming of Christ is found in N.T. writings generally. Adventist views are held in particular by the Seventh Day Adventists, Christadelphians, Jehovah's Witnesses, and the Four Square Gospel Alliance.

ADVOCATE (Lat. *advocatus*, one summoned to one's aid, esp. in a court of justice). A professional pleader in a court of justice. The English term is barrister or counsel, but A. is retained in Scotland and in other countries, e.g. France, where the Roman law is still retained. The *Lord Advocate* is the principal law-officer of the Crown in Scotland, a political member of the ministry of the day, retiring with the government by whom he was appointed. A *Judge-Advocate* manages the prosecution in courts-martial, the *Judge-Advocate-General* being the chief of the legal department of the respective Service. The term A. has no special significance in the U.S.

ADVOCATES. Faculty of. Scottish legal body, incorporated in 1532 under James V. Members closely resemble in their powers English barristers.

AEGEAN (ējē'an) **SEA.** Branch of the Mediterranean between Greece and Turkey. The Dardanelles connect it with the Sea of Marmara. The numerous islands in the A. Sea incl. Crete, the Cyclades, the Sporades, and the Dodecanese.

AEgina (ējī'na). Greek island in the Gulf of A. about 20 m. S.W. of Piraeus. In 1811 remarkable sculptures were recovered from a Doric temple in the N.E. (restored by Thorwaldsen) and taken to Munich.

AEGIR (Igir). In Scandinavian mythology, the god of the sea.

AEGIS (ējīs). In Gk. mythology, the shield of Zeus, symbolic of the storm cloud associated with him. In representations of deities it is commonly shown as a protective animal skin.

AELFRIC (c. 955-1020). Old-English prose writer. He became a priest and taught at Cernel monastery (now Cerne Abbas) in Dorset, and was abbot of Eynsham from 1005. He is celebrated for his writings in the vernacular, particularly for his two collections of homilies and the *Lives of the Saints*.

AENEAS (ēnē'as). In classical legend, a Trojan

prince who became the ancestral hero of the Romans. According to Homer, he was the son of Anchises and the goddess Aphrodite. During the Trojan war he several times owed his life to the intervention of the gods. The legend on which Virgil's *Aeneid* is based describes his escape from Troy and eventual settlement in Latium. The Latins accorded him divine honours, and the house of Julius claimed to be descended from him.

AEOLIAN ISLANDS. Another name for the **LIPARI ISLANDS**.

AEOLUS. In Gk. mythology, god of the winds, ruler of the Aeolian islands, where he kept the winds imprisoned in a cavern.

AERONAUTICS. The science of aerial locomotion within the earth's atmosphere, including aerial navigation, aerodynamics, aircraft structures, and jet and rocket propulsion. It should not be confused with *Astronautics*, which is the science of travel through space; *Astronautics* is, however, used in aircraft as in ships and is a part of A. Aerodynamics comprises the study of the airflow around bodies moving through it, and speeds in excess of the speed of sound (760 m.p.h. at sea level) have made subdivision necessary. Subsonic A. has been known in the past under the general term and the aerodynamic forces have increased as the square of the speed, and were thus simply calculated. Streamlining has been all-important. Transonic A. covers the speed range from just below to just above the speed of sound, where shock waves are experienced. Ordinary sound waves move at 760 m.p.h., and air in front of an aircraft moving slower than this is warned by the waves so that it can move aside. But as the flying speed approaches that of the sound waves, the warning is too late for the air to escape and the aircraft pushes it aside by brute force, creating shock waves which absorb much power and largely unpredictable forces. Supersonic A. concerns speeds well above the speed of sound and is a much older study than A. itself, since as ballistics (q.v.), the study of the flight of bullets was undertaken soon after the introduction of firearms, has been applied to aeroplanes and is now better understood than Transonics. Hypersonics is the study of airflows and forces at speeds about five times that of sound and is used for such vehicles as the V.2 rocket. Superaerodynamics is the science of very high speeds in rarefied air such as is found at very high altitudes of between 50 and 150 miles.

AEROPLANE. A heavier-than-air craft supported in flight by fixed wings (*aerofoils*) when propelled by the reaction from air accelerated rearwards by air-screw(s) or jet(s) to overcome the air resistance (*drag*). Drag depends on frontal area (e.g. large, airliner; small, fighter) and shape (*drag coefficient*); it equals *thrust* in straight, level flight. (Power = thrust × speed. 1 lb. thrust at 375 m.p.h. = 1 THP; at 750 m.p.h. = 2 THP). See **JET PROPULSION**. Less drag (*streamlining*) means increased speed and lower fuel consumption from given power; less fuel need be carried for a given distance (*range*) and the A.'s weight is reduced.

Accelerated airflow over wing resulting in reduced pressure above it.

Here we see (above) how in level flight engine thrust overcomes drag, providing speed which creates lift to support the weight of the aeroplane, in this case a Spitfire; the position of the control surfaces (centre); and the aircraft turning (below).

(crew, passengers, bombs, etc.) may be up to one-third all-up weight.

Control. Aerofoils are unstable and a horizontal *tailplane* is installed behind to overcome this, with hinged flaps (*elevators*) to control pitch (*attitude*). Raising the elevator depresses the tail and the aerofoil is inclined (*angle of attack* increased), which further speeds up the airflow above it until lift exceeds weight, when the A. climbs; the steeper attitude increases drag and more power is needed to maintain speed. Descent results from reducing the angle of attack, when speed builds up rapidly (*diving*) if the engine is not throttled back. Descent without power is *gliding*. Turning (changing direction) is effected not by the rudder (hinged to the vertical *tail-fin*) but by banking A. (*rolling*) so that the lift force inclines inwards to provide a centripetal component as well as supporting the A.'s weight; to do so it must exceed that for level flight, and the angle of attack is increased by raising the elevators. The A. is banked by applying *ailerons* (inter-connected hinged flaps at the rear (*trailing edge*) of the wings, working oppositely). The 'outer' aileron is depressed to increase effectively the camber and therefore the lift, and vice versa. The more aileron applied, the more the A. banks and the quicker it turns, until the wings are nearly vertical. Rudders are

Aerofoils are so shaped and cambered that air passing above them is speeded up, reducing pressure below atmospheric, while that below is slowed. This produces a vertical force (*lift*) to support the A.'s weight. (Lift=weight in level flight.) Minimum weight is thus essential to an efficient A., requiring a smaller wing which has less drag. Very strong but light aluminium alloys are used, and also for the body (*fuselage*) and where possible for controls and in engines. The thin *skin* (outer) panels, with *ribs* and *stringers* at intervals to prevent buckling, support all flight stresses with no separate structure (semi-monocoque construction). The *payload*

fitted only as balance controls, and 'top' rudder (i.e. opposite to the direction of bank) is applied to prevent side-slip inwards when turning, or to fly straight on one engine in a two-engined A.

Flaps are fitted to the rear of wings to increase camber and lift for shorter take-off and landing. To land, the angle of attack is increased until the airflow over the wing breaks down and lift is lost (*stalling*). On the ground, the A. rests on wheels (floats, on water) attached to the *air-frame* by struts; the landing gear (*under-carriage*) is retractable in flight to reduce drag.

These principles apply to all A. types, e.g. biplanes (2 super-imposed wings – now obsolescent), monoplanes, seaplanes, flying boats, airliners, freighters, fighters, bombers, trainers, whether propelled by airscrews, driven by piston engines or by turbines, or by turbo-jets or rocket motors. *Helicopters* (rotating wing aircraft) and *Rockets* are not As.

See FLIGHT, HISTORY OF.

AEGEAN SEA. Seen through the restored columns of the temple of Lindia Athena on the heights of the ancient acropolis of Camiros, on the island of Rhodes. St. Paul once landed in the small port below.

Courtesy of the National Tourist Organisation of Greece.

AEROSOL (ā'rōsol). A colloidal system, e.g. mist or fog, in which air is the dispersion medium; and popularly a form of packaging in which gas under pressure, or a liquefied gas with a pressure greater than atmospheric at ordinary temperatures, is used to spray a very fine mist of liquid droplets from a nozzle; it is generally actuated by a press-button device. As. are used for germicides, insecticides, fire extinguishers, paints, hair lacquers, perfumes, paints, etc.

AESCHINES (ē'skinēz) (4th cent. B.C.). Orator of ancient Athens. Best known of his speeches are those 'Against Timarchus' (345), 'On the Embassy', and 'Against Ctesiphon'.

AESCHYLUS (ē'skilus) (c. 525–456 B.C.), Greek dramatist. B. near Athens, he came of a noble family; fought against the Persians at Marathon (490 B.C.), and wrote nearly 90 plays between 499 and 458 B.C. He twice visited the court of Hiero, king of Syracuse, and d. at Gela in Sicily.

The earliest of his 7 surviving plays is *The Suppliant Women*, performed about 490. There followed *The Persians* (472), *Seven against Thebes* (467) and *Prometheus Bound* (c. 460). Then came the trilogy of the *Oresteia* which won the first prize at the festival of Dionysus in 458; the 3 plays – *Agamemnon*, *Choephoroi*, and *Eumenides* – deal with the curse on the house of Agamemnon which was eventually resolved by the action and suffering of Orestes.

A. became famous for the majesty of his language.

ADRIATIC. No exception to the famed beauty of the many islands of the Adriatic is the Isle of Lopud off the Yugoslav coast near Dubrovnik.

Courtesy of Yugoslav National Tourist Office.

the boldness of his speculation upon problems of religion and human destiny, and the grandeur and simplicity of his plots and characters.

AESCULAPIUS. Lat. form of Asklepios, god of medicine in Gk. mythology. His attribute was a staff with a snake coiled about it (now the badge of the R.A.M.C.), because the snake, since it sloughs its skin, was supposed to renew its youth. Sacred snakes were kept in the sanctuaries of A. at Epidaurus and elsewhere. The customary offering to A. was a cock.

AESOP (ē-). Fabulist of antiquity. Herodotus says he lived in the reign of Amasis of Egypt (mid-6th cent. B.C.). B. a slave, and represented in later art as deformed, he received his freedom and visited Lydia and Greece. No writings by him have survived, and some at least of the fables attributed to him were current in Egypt many centuries earlier.

AESTHETIC MOVEMENT. Artistic movement of the late 19th cent. in England, the chief doctrine of which was Art for Art's sake. It owed much to Pater and Wilde, and found expression in the *Yellow Book*. It was exemplified by painters such as Whistler, draughtsmen like Aubrey Beardsley, poets such as Lionel Johnson and Ernest Dowson, and among critics by J. A. Symonds.

AFGHANISTAN. Her climate has infinite variety—perpetual summer in the south-west, a soft mildness in the central Kabul plains which produces two harvests a year, and winter ice for nine months of the year in the north.

Courtesy of the Afghan Publicity Bureau, Kabul, Afghanistan.

AETOLIA (ēto'-). District of anc. Greece on the N.W. of the gulf of Corinth. The AETOLIAN LEAGUE was a confederation of the cities of A. which, following the death of Alexander the Great, was the chief rival of the Macedonian power and the Achaean League.

AFARS AND THE ISSAS, Fr. Terr. of the. See SOMALILAND, FRENCH.

AFFINITY (in law). The relationship which exists between a man and his wife's blood relations, or between a woman and her husband's blood relations. It is distinguished from consanguinity or blood relationship. Many relationships by A. prevent marriage, e.g. a man cannot marry his step-daughter.

AFFIRMATION (in law). A solemn declaration made instead of taking the oath by a person who has no religious belief or objects to taking an oath on religious grounds (Oaths Act, 1888).

AFGHANISTAN. Kingdom to the N.W. of Pakistan. The country is almost entirely mountainous, the Hindu Kush to the N.E. rising in places to 24,000 ft. The chief rivers are Amu Darya (Oxus), Kabul, and Helmand. By irrigation of the small areas of level land crops of wheat and other cereals, sugar cane and sugar beet, fruits, tobacco, rice and cotton are grown in the N. and E. The river pastures are grazed by cattle, and fat-tailed sheep and yaks are raised in the mountains. Minerals, for the most part undeveloped, incl. iron, coal, copper, gold and silver, gypsum, asbestos and

various gems. Oil also occurs. In larger towns there are some industries, for which water power is used. Transport is by camel, horse, etc., for there are no railways and few of the rivers are navigable. The Khyber, Peiwar, Gomal and Bolan passes link A. with Pakistan, through which country passes 80 per cent of A.'s exports of sheepskins, carpets, fruit, and tobacco. The cap. is Kabul; other towns incl. Kandahar, Herat, and Mazar-i-Sharif.

A. is a constitutional monarchy, with an elected House of the People, and a House of Elders—one-third nominated by the King. Area c. 250,000 sq. m.; pop. (est.) 11–12,000,000, the majority being Mohammedans, principally of the Sunni sect.

AFGHANISTAN. Of ancient renown as warriors, Afghan soldiers find no difficulty in incorporating new-style rifles in the routine of an age-old war dance.

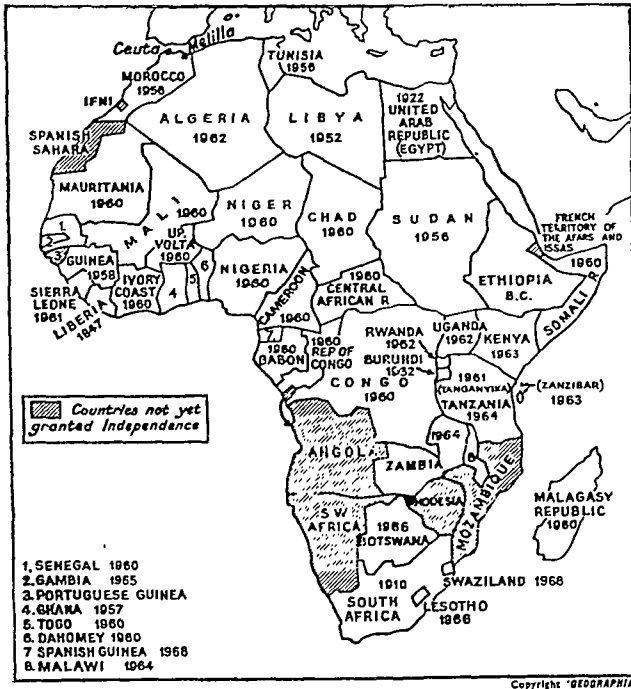

Courtesy of the Royal Afghan Embassy.

History. Once part of Aryana, a region of the ancient Persian Empire, A., occupied by many peoples during its early history, first became an independent amirate in 1747. During the 19th cent. Russian influence in the country threatened British India, and in 1838 A. was invaded by a British force, which secured control of the country; but in 1842 the garrison of Kabul was wiped out and the British evacuated A. A second Afghan War followed in 1878, during which General Roberts captured Kabul and, in 1880, marched to Kandahar. A third Afghan War, in which the Afghans invaded India, lasted only a few months in 1919, and subsequent amicable relations with Britain (since 1947 with Pakistan) have been governed by the Treaty of 1921. The ruler adopted the title King in 1926.

AFINOGENOV (ahfēnogā'nov), Alexei (1904–41). Soviet dramatist, author of several plays embodying the spirit of the new era, including *Distant Point*. A. was killed in an air-raid on Moscow.

AFRICA. Third largest of the continents of the world; with an area of 11,500,000 sq. m., it is smaller than Asia or America, but two-and-a-half times the size of Europe. In population it takes 4th place.

Geography and Resources. The proportion of desert to cultivated land is unusually high: the Sahara covers 2½ million sq. m. while other large desert tracts occur in Egypt, Somaliland, Kenya, S. and S.W. Africa. There are few fertile alluvial plains to compensate for the deserts, the continent being composed of a great plateau rising sharply from the sea. The rivers cut their way from the plateau to sea-level by cataracts and are therefore generally not suitable for navigation. The Nile receives no tributaries in its lower reaches, and without artificial irrigation would water only a narrow strip of land: the Congo and Niger basins are masked by dense tropical forests. The coastline has

AFRICA. The growth of independence

few good harbours, and none at all throughout most of its western length. A wide strip of central A., on either side of the equator, experiences a wet tropical climate; the coast lands of W. Africa are hot, damp, and were long extremely unhealthy for white men, while on the E., though drier, it is even hotter. Great tracts between the tropical regions and the deserts of N. and S. Africa are covered by tropical grassland and bush country. Only the northern and southern extremities and the highlands of the interior are suitable for Europeans to live in comfort.

In some mineral resources A. is poor as compared with other continents, e.g. coal and petroleum, but there are rich reserves of gold in southern A., copper in central A. (Congo Republic and also Zambia), diamonds (S. Africa, Congo Republic, S.W. Africa), manganese (Ghana, S. Africa), phosphate (N. Africa), uranium (Congo Republic, S. Africa), tin (Uganda, Congo Republic), etc. New surveys may reveal further wealth. See SAHARA.

Large areas of the continent are unsuited to arable agriculture, and in other areas the tse-tse fly prevents stock raising; but chemical and other scientific aids, artificial irrigation, and development of hydro-electric power are increasing A.'s agricultural and industrial production. Important crops include cocoa (Ghana, Nigeria), cotton (Uganda, Egypt), coffee (Kenya), sisal (E. Africa), tobacco (E. Africa); wine is produced in Algeria and S. Africa.

Population. Numbering altogether some 200,000,000, the pop. of A. is composed of Bushmen and Hottentots living in the Kalahari region, S.W. Africa and Botswana; Negritos or Pygmies in the Republic of Congo; Negroes in W. Africa; Hamites in Egypt, the Republic of Sudan, Ethiopia, Somaliland, N. Africa and parts of the Sahara; various mixed peoples such as the Hamiticized Negroes or Bantus and the Nilotics of the Republic of Sudan; Semites, including the Arabs of N. and E. Africa; recent immigrants of European and Indian origin in E. and S. Africa, Kenya, and other recently developed territories.

AFRICAN NEGRO ART. The chief centres of

Negro art are in Nigeria, the Rep. of Congo, Ghana, the Ivory Coast, and the Rep. of Cameroon. In S. Nigeria the most notable works were produced by the Negro peoples of Benin and of ancient Ife. The Beni used the *cire-perdue* process – as used in Italy during the Renaissance – in executing their bronze relief work. In the Belgian Congo the Bakuba and Baluba tribes are famous for their wonderful decorative works such as ornamental spoons, bobbins, and head rests. The artists of the Bushango kingdom (15th–16th cents.) produced wood-carvings of singular beauty, and also practised the art of portraiture. The wooden statues of their early kings are most remarkable. Among the most interesting products of the Gold Coast are the brass weights from Ashanti. These are used for measuring gold-dust, and are made in the form of tiny figures which are said to illustrate local legends. The most skilful artists of the Ivory Coast belong to the Baoulé tribe, who are closely related to the Ashanti peoples. Wood-carvings, drinking cups, basketry, statues, and masks are among the artistic products of the Rep. of Cameroon. The masks of the Cross River are particularly famous for their realistic quality. See illus. p. 16.

The Negro art of W. Africa, remarkable for its beauty of form and intense vitality, has had a profound influence on the work of many of the leading European artists, e.g. Picasso, Matisse, Brancusi, Modigliani, and Epstein.

AFRIKAANS. One of the two official languages of S. Africa, the other being English. Spoken by the Afrikaners, mainly descendants of the original Dutch colonists, it is a development of the Dutch language, modified by the influence of German, French, and other immigrant and native tongues. Reaching its modern form in the middle of the 18th cent., it did not become a written language until c. 1875, and real literature did not appear until c. 1900, when the South African war provided a stimulus. Notable writers in A. are the brothers Hobson and C. H. Kuhn; the poets J. D. du Toit ('Totius'), J. F. E. Celliers, E. N. Marais, C. J. Langenhoven, A. G. Visser and, more

AFRICAN NEGRO ART. One of a series of 25 typical bronze plaques from Benin, this specimen is 20 inches high and shows one of the rulers or Obas of Benin with attendants.

Photo: British Museum.

recently, N. P. van Wyk Louw, E. Eybers, W. E. G. Louw, and Uys Krige. C. M. van den Heever and T. J. Haarhoff write in prose and verse. A. A. Pienaar's *Adventures of a Lion Family* is famous beyond S. Africa, as are the popular stories of C. J. Langenhoven. Other prose-writers are J. van Bruggen, J. H. H. de Waal, and Leon Maré.

AFRIKA KORPS. Name of the German army in the Western (Libyan) Desert in the S.W.W. They first came into contact with British troops at El Agheila on 24 March 1941, and were finally driven out of N. Africa in May 1943.

AFYON' KARA'HISAR'. Town of an il of the same name in Asiatic Turkey, about 200 m. E. of Izmir. A railway junction, it is a centre for opium. Pop. (1950) 29,881.

AFZELIUS (ahftseh'li-oos), Arvid August (1785–1871). Swedish writer. Parish priest of Enköping, he collaborated with the historian Geijer in a collection of folk-songs, translated the Elder Edda and the Herwara Saga, and was also a poet and dramatist.

AGA. Title of nobility, probably of Tartar derivation. The Turks applied it to military commanders, and, in general, to men of high station.

AGADIR (—dër). Most southern seaport in Morocco, near the mouth of the Sus. When Fez was occupied by the French in July 1911, the Panther, a German gunboat, appeared off A., and the Emperor William II of Germany made a claim for territorial concessions. On 1 March 1960, the town was virtually destroyed by an earthquake, about a third of its 30,000 inhabitants being killed. Foundation stones of a new town on solid rock nearby were laid on 30 June 1960.

AGA KHAN (ah'ga kahn) III, Aga Sultan Sir Mahomed Shah (1877–1957). Indian statesman, spiritual head of the Ismaili Moslem sect from 1885. He was knighted in 1902, and in recognition of his loyal services during the F.W.W. was granted the status of a first-class prince. On several occasions he led the Indian delegation at the League of Nations, and strove for Hindu-Moslem agreement within India.

*Pending construction of new cap. Beida in Cyrenaica.

**Independent 1968

Prominent on the Turf, he won the Derby in 1930, 1935, 1936, 1948, and 1952.

Aga Khan IV, Shah Karim (1937–) succeeded his grandfather, by whom he had been nominated, on the latter's death in 1957.

AGAMEMNON. Greek hero. The son of Atreus, king of Mycenae he m. Clytemnestra, and became by her the father of three daughters – Iphigenia, Chrysothemis, and Laodice (Electra) – and a son, Orestes. The most powerful of the Greek princes, he was their leader in the Trojan war. When Troy was captured, A. received Cassandra, daughter of King Priam, as his prize, and sailed for home, where he was murdered by Clytemnestra and Aegisthus.

AGAR-AGAR. Organic substance, usually met with as a straw-coloured powder or as pale strips which dissolve in hot water to give a solution which sets to a jelly on cooling. It is obtained from the *Gelidium* species of red algae, and is useful in bacteriology for growing bacteria at blood temperature.

AGARICUS or A'GARIC. Genus of fungi of the class Basidiomycetes. It includes the common mushroom (*Agaricus campestris*) and the horse-mushroom (*A. arvensis*): closely allied is the genus *Amanita* (q.v.) with many poisonous species.

AGASSIZ (ahghahsè), Jean Louis Rodolphe (1807–73), Swiss-American naturalist. He became professor of natural history at Neuchâtel in 1832, pub. *Researches on Fossil Fishes and Freshwater Fishes of Europe*, studied the Alpine glaciers, and in 1848 was appointed professor of geology and zoology at Harvard.

AGATE (ag'ât). Banded or cloudy kind of silica, used to form ornamental stones and objects of art. A. stones are used to burnish and polish gold deposited on glass and ceramics.

AGA'THOCLES (361–289 B.C.). Tyrant of Syracuse in Sicily from 317 B.C. He was defeated by the Carthaginians at Himera in 310, but later invaded their homeland in N. Africa.

AGAVE (agā'vè). Genus of plants of the family Amaryllidaceae. All the species are found in the warmer parts of the New World, especially Mexico. Their leaves are stiff and spiny and the flowers are borne on an upright scape, which sometimes reaches a height of over 30 ft. *A. americana*, the best-known species, was introduced into Europe during the 16th cent.

A'GINCOURT. French village, 40 m. S.E. of Calais, famous for the victory of the English under Henry V over superior French forces on 25 Oct., St. Crispin's Day, 1415. Pop. c. 300.

AGNI. In Hindu mythology, the god of fire, the protector of men against the powers of darkness, the guardian of their homes.

AGNON, Shmuel Yosef (1888–). Israeli novelist. B. in Buczacz, Galicia (now in U.S.S.R.), setting of his most famous book *A Guest for the Night*, he writes in Hebrew and shared a Nobel prize 1966.

AGNOSTIC. Word coined by T. H. Huxley in 1869: person believing that in the nature of things we cannot know anything of what lies behind or beyond the world of natural phenomena. It would seem he had in mind the Greek words *Agnosto theo* (To an unknown God) which St. Paul found inscribed on an altar in Athens.

An atheist denies the existence of gods or God; an agnostic asserts that God or a First Cause is one of those concepts – others are the Absolute, Infinity, Eternity, Immortality, etc. – which lie beyond the reach of human intelligence.

AGOULT (ahgoo'), Marie Catherine Sophie de Flavigny, Comtesse d' (1805–76). French writer. Daughter of a French officer, she was b. at Frankfurt-am-Main, m. the Count d'Agout in 1827, and left him to become the mistress of Franz Liszt, by whom she had 3 children. She held a famous literary and artistic *salon* in Paris, and wrote under the pseudonym of Daniel Stern a novel *Nélida* (1854) picturing her relations with Liszt.

AGRA (ah'grah). City of Uttar Pradesh, Republic of India, on the Jumna, about 100 m. S.S.E. of Delhi.

Baber, the first great Mogul ruler, made it his capital in 1527. His grandson Akbar rebuilt the Red Fort of Salim Shah (1566), and is buried outside the city in the splendid tomb at Sigandra. In the 17th cent. the buildings of Shah Jehan made A. one of the most beautiful cities in the world. The Taj Mahal, completed 1650, and erected as a tomb for the emperor's wife Mumtaz Mahal, took more than 20 years to build. A.'s political importance dwindled from 1658 when Aurangzeb moved the capital back to Delhi. It was taken from the Mahrattas by Lord Lake in 1803. Pop. (1961) 509,108.

AGRAM. German name of ZAGREB.

AGRI'COLA, Georg (1490–1555). German metallurgist, known as the 'father of mineralogy'.

AGRI'COLA, Gnaeus Julius (A.D. 37–93). Roman general and statesman. B. in Provence, he became consul in A.D. 77, and next year was made Governor of Britain. He advanced the Roman power as far north as the Firth of Forth, defeated the Caledonians at the battle of Mons Graupius (Grampian hills), and built a chain of forts. His fleet sailed round the N. of Scotland, thus proving for the first time that Britain was an island. He was recalled to Rome in A.D. 85. His daughter m. in A.D. 78 the historian Tacitus, who wrote a biography of A.

AGRICULTURE. All the processes of farming in its widest sense. With some peoples A. has still not reached the stage of soil cultivation, e.g. the Australian aborigines and the nomadic pastoralists of Africa, whereas in ancient Egypt there were extensive estates with very varied produce. The settler-farmer was typical of early Greece and Rome, but later huge estates run by slave labour were common. The medieval economy rested on the manorial system which broke down under the enclosure movement: see ENCLOSURES. Modern A. first developed principally in Britain: see JETHRO TULL, ROBERT BAKEWELL, ARTHUR YOUNG. In the U.S. stress was on the individual working his own land, e.g. the Homestead Act (1862) passed by Lincoln, and using every mechanical device for greater productivity and efficiency, so that American practice is greatly influential in the mechanization now overtaking under-developed countries. The International Institute of A. (1905) was absorbed

AGRICULTURE. Invaluable in modern farming, the combine harvester not only harvests the crop, but also threshes the grain and bales the straw. Key: 1, Reel; 2, Reel adjusters; 3, Driving platform and controls; 4, Threshing drum speed adjusting levers; 5, Steering column and wheel; 6, Driver's seat; 7, Grain tank; 8, Radiator air intake; 9, Top elevator for grain tank; 10, Air intake pipe for engine; 11, Tool box; 12, Side and top panels over shakers; 13, Engine exhaust pipe and silencer; 14, Rear hood; 15, Canvas cover for rear hood; 16, Rear wheels (used for steering); 17, Tailings elevator trunking; 18, Oil bath air cleaner for engine air; 19, Main chassis; 20, Diesel engine (behind main wheel); 21, Main or driving wheel; 22, Front elevator; 23, Feed table and cutter bar; 24, Crop dividers. Courtesy of Ransomes, Sims and Jefferies.

by the Food and A. Organization estab. in 1945, also with its H.Q. at Rome: the International Federation of Agricultural Producers (1943) has its H.Q. at Washington.

Agricultural Chemicals. General term for (a) *Herbicides*, mainly selective weedkillers of the 'growth regulating' or 'hormone' type which are used chiefly in cereal crops, e.g. MCPA (4-D Dichlorophenoxy-acetic Acid). This is quickly absorbed by the leaves of broad-leaved plants, passes to the stem and root and affects the growing points, causing malformation and eventual death: 4 ozs per acre will kill practically every charlock plant in a cereal crop. (b) *Insecticides* which defeat soil pests (wireworms, cutworms), root feeding larvae (carrot fly, onion fly, cabbage-root fly), and foliage feeding caterpillars and beetles (flea beetles), e.g. DDT and other direct contact insecticides. Aphids (greenfly and blackfly) which rely on suction of the plant sap and often escape under foliage can be combated by systemic insecticides (organo-phosphorus compounds)—use restricted in U.K. from 1964) which enter the plant tissues and render the leaves poisonous to them. (c) *Fungicides*, used as seed dressings (cereals and peas) or, in the case of potato blight, on the growing plant. Bordeaux mixture, or other copper fungicides, are a common choice for this last. From 1900 to 1940 only comparatively few were in use, but today a full range is available and their choice and application calls for advanced technological knowledge.

AGRIGENTO (ahgrējen'toh). City in Sicily, Italy. The Roman Agrigentum, it was long called Girgenti until renamed Agrigento under the Fascist regime. There are fine remains of Greek temples. Pop. (1961) 47,094.

AGRIMONY. Species of plants (*Agrimonia eupatoria*) of the family Rosaceae, growing in hedge-banks, dry sunny banks, and fields. The flowers are small and pale yellow, and are borne on a slender spike.

AGRI'PPA, Marcus Vipsanius (63–12 B.C.). Roman general. Commander of the fleet at Actium (q.v.), he m. Augustus' daughter, Julia.

AGRIPPA von NETTESHEIM, Heinrich Cornelius (1486–1535). German philosopher, physician, and cabalist. B. at Cologne, he served the emperor Maximilian, and wrote *De incertitudine et vanitate scientiarum*.

AGUASCALIENTES (ah'gwahskahlē-ān'tes). Industrial city in central Mexico. Pop. (1967) 157,000.

AGULHAS (ahgoo'yahs), Cape (Port., the needles). Most southerly point of Africa, about 110 m. E.S.E. of the Cape of Good Hope.

AGUTI (agoo'ti) (*Dasyprocta*). Mammal of the order Rodentia, related to the porcupines but not armed with spines, the coat consisting mostly of short speckled hairs. Swift-running and about the size of a rabbit, As. live in forested parts of South America and the Antilles.

Ā'HAB. King of Israel, c. 875–854 B.C. His empire included the suzerainty of Moab, and Judah was his subordinate ally; but his kingdom was weakened by constant wars with Syria. By his marriage with Jezebel, princess of Sidon, A. was led to introduce into Israel the worship of the Phoenician god Baal, thus provoking the hostility of Elijah and the prophets. A. d. in battle against the Syrians at Ramoth Gilead.

AHA'GGAR. Plateau of the central Sahara whose highest point, Tahat, 9,850 ft., lies between Algiers and the mouth of the Niger. It is the home of the nomadic Tuaregs.

AHASUERUS. Latinized Hebrew form of the Persian Khshayarsha (Gk. Xerxes). Name given to several Persian kings in the Bible, notably to the

AGRICULTURE. A selective weedkiller acts by reducing the weeds to a few strands (centre), leaving the crops unaffected on either side. Courtesy of Fisons Pest Control Ltd.

husband of Esther. Traditionally it was also the name of the Wandering Jew.

AH'MADI. Town of Kuwait, the residential and local admin. centre of the Kuwait Oil Co. Some 22 m. S. of Kuwait town, it is c. 6 miles both from the oil port of Mina-al-Ahmadi and from the oilfields at Burgan and Magwa. It was created by the co. amid barren desert and is a model city. Pop. c. 8,000.

AHMA'DIYYA. Islamic religious movement inaugurated by Mirza Ghulam Ahmad (1835–1908) of Qadian, Punjab, India, who in 1879 claimed to be the Mahdi and the Promised Messiah. In 1914 there was a split, rival Khalifas establishing themselves at Qadian and Lahore. Many regular missions in foreign countries are run under the auspices of the former. There is an A. mosque at Southfields, London.

AHMAD SHAH (1724–73). First ruler of Afghanistan. Elected king in 1747, he had made himself master of the Punjab by 1751. He defeated the Mahrattas at Panipat in 1761, and then the Sikhs.

AHMEDABA'D or **AHMADABA'D.** City of India, on the Sabarmati, provisional cap. of Gujarat state. It was founded in the reign of Ahmad Shah in 1412, and came under the control of the East India Co. in 1818. It has many edifices of the Hindu, Mohammedan and Jain faiths. Pop. (1961) 1,149,852.

AHMEDNA'GAR or **AHMADNA'GAR.** City of India in Maharashtra state, 120 m. E. of Bombay, on the left bank of the Sina. It is a centre of cotton trade and manufacture. Pop. (1961) 118,266.

AH'RIMAN. Name given to the evil principle in the Zoroastrian religion (Parseeism). He is the lord of darkness and death, and wages eternal war with Ahura Mazda (Ormuzd).

AHU'RA MA'ZDA or **ORMUZD.** Name given to the supreme good principle in Zoroastrianism. He is the god of life and light, and will finally prevail over his enemy, Ahriman.

AHVENANMAA. Finnish name of ÅLAND ISLANDS.

AHWA'Z. Town of Persia at the head of navigation on the Karun, 46 m. S. of Shushtar. Pop. (1968) 145,000.

AICARD (ākahr'), Jean François Victor (1848–1921). French writer. B. at Toulon, he was widely acclaimed for the purity and glow of his verse. Two of his vols. were crowned by the *Académie*, and he also wrote plays, of which *Le Père Lebonnard* (1890) was most successful, and many novels, of which *Maurin des Maures* and *L'illustre Maurin* were translated into English.

AIDAN. St. (d. 651). Monk of Iona; first bishop of Lindisfarne. He christianized Northumbria, settled on Lindisfarne, erected churches and monasteries, and founded a school. He d. at Bamburgh.

AIGUN (T'goon). Port and railway town on the Amur, Heilungkiang prov., China. Here in 1857 China ceded the left bank of the Amur to Russia. Pop. (1952) 42,800.

AIKEN (āk'en), Conrad Potter (1889–). American poet and novelist. B. in Georgia, he long lived in Sussex. His 1st vol. *Earth Triumphant* (1914) was written under the influence of the realist school. He then became associated with the Imagist movement, and all his work shows a lyric facility: *Collected Poems* (1953). Among his novels the most remarkable are *Great Circle* (1933), reflecting events of his own life – when he was a boy his father committed suicide after killing A.'s mother—*Conversation* (1940), and *Ushant* (1952).

AILSA CRAIG (āl'sa crāg). Rocky islet in the Firth of Clyde, Scotland, about 10 m. off the Ayrshire coast, opposite Girvan.

AIN (an). French river giving its name to a dept.; it is a right-bank tributary of the Rhône.

AINSWORTH, William Harrison (1805–82). British historical novelist. B. at Manchester, the son of a solicitor, he had a great success with his first novel, *Rookwood* (1834), which had Dick Turpin as its hero. He produced in all some 40 novels, of which the best-known are *Jack Sheppard* (1839), *The Tower of London* (1840), *Old St. Paul's* (1841), *Windsor Castle* (1843), and *The Lancashire Witches* (1848).

AIN TAB. Syrian name of GAZIANTEP.

AINTREE. Racecourse outside Liverpool, Lancs., where, in addition to flat racing, the Grand National, the premier event of the steeplechase season, was estab. 1839. See HORSE-RACING.

AINU (i'noo). Caucasoid race of hunters and fishermen, fair-skinned, blue-eyed and hairy. Until driven out in the 4th cent. A.D. by the Yamato (ancestors of the modern Japanese), they were the dominant race in Japan, but today only a few thousands survive on Hokkaido, where an Institute of A. Studies at the univ. works to prevent their extinction. Possibly originating in Scandinavia, they have tended to intermarry with the 'oriental' population, and to decline with the eradication of their culture, which may go back to 7 or 8,000 B.C. Their language may be one of the world's oldest, having few links with any other, and their religion is a complex animism, one of its features being a communal bear's festival. A blue tattoo of face and lips is practised, especially by the women.

AIRCRAFT CARRIER. A sea-going aerodrome. The germ of the modern A.C. of large dimensions was inherent in the 22-knot Cunard liner *Campania*, converted into a carrier in 1915–6, but her flight deck was small and she mainly carried only sea-planes.

The first genuine A.Cs. were the *Argus* and *Furious* which served in the last year of the F.W.W. and throughout the S.W.W. H.M.S. *Hermes* (completed 1924, sunk off Ceylon) was the 1st A.C. specially designed as such. Most famous of the A.Cs. of the S.W.W. was the

AIRCRAFT CARRIER. H.M.S. *Victorious* leaves Singapore for Hong Kong. Crown Copyright.

Ark Royal (completed 1938, torpedoed off Gibraltar and foundered in tow Nov. 1941) which the enemy repeatedly claimed to have sunk. Typical features of modern A.Cs. are fully-angled flight decks, launching catapults, and arrester gear, to prevent over-running on landing. See WARSHIP.

AIRD, Ian (1905–62). British surgeon. Professor of surgery at London Univ. from 1946, he was also head of the Hammersmith postgraduate medical school research unit, and celebrated for his studies of hole-in-the-heart operations and the separation of Siamese twins.

AIRDRIE (ār'drē). Scottish industrial town (burgh) in Lanarkshire, 10 m. E. of Glasgow. Coal and ironstone are mined. Chief industries are engineering, brass-founding, and paper-making. Pop. (1961) 33,620.

AIREDALE TERRIER. British breed of dog. It originated about 1850 in the Aire and Wharfedale districts of Yorks, as a cross of the otter hound and Irish and Welsh terriers.

AIR FORCE. At the anniversary ceremonies of the Allied Nations of AIRCENT (Supreme Command of the Allied Forces Central Europe) a star formation of jetfighters. From the top (clockwise) a Gloster Javelin (R.A.F.), F-105 Thunderchief (U.S.A.F.), CF-104 Super Starfighter (R.C.A.F.), F-104 G. Starfighter (Belgian Air Force), Mirage 111-C (French Air Force) and F-104 G Starfighter (Netherlands Air Force).

Courtesy of United Press International News Age.,cy.

AIR FORCE. A nation's fighting aircraft, and the organization to maintain them. The emergence of the aeroplane at first brought only limited recognition of its potential value as a means of waging war; like the balloon, used from the American Civil War, it was considered a way of extending the vision of surface forces. The need for a unified A.F. – foreseen in the U.K. in 1911 – was realized with the formation of the R.A.F. in 1918 by merging the Royal Naval Air Service and the Royal Flying Corps. During the inter-war period, unity of air control was achieved by Italy (1923), France (1928), Germany (1935, after repudiating the arms limitations of the Versailles treaty), and by the U.S.A. in 1947. While the main specialized groupings formed during the F.W.W. – combat, bombing, reconnaissance, transport, etc. – were adapted and modified in the S.W.W., activity was extended, with self-contained tactical A.Fs. to meet the needs of surface commanders in the main theatres of land operations; and for the attack and defence of shipping over narrow seas.

In 1945–60 the piston engine was superseded by the jet engine which propelled its craft at supersonic speeds; exquisitely precise electronic guidance systems lessened the difference between missile and aircraft; and flights of unlimited duration became a reality by means of air-to-air refuelling. Together with Polaris-armed submarines, the 24 hr.-a-day patrol of the U.S. strategic air command's bombers, armed with

AIR FORCE. Here seen flying over the East Anglian coast, the Avro Vulcan B. Mk. 2 – the world's first four-jet delta wing bomber – is the spearhead of Royal Air Force, Bomber Command. This aircraft, equipped with the Avro-designed and manufactured stand-off bomb, Blue Steel, forms the frontline of Britain's nuclear deterrent force. Courtesy of A. V. Roe & Co.

thermo-nuclear weapons, constitute the West's main deterrents. In the progress towards 'push button' warfare, even the pilot may become obsolete.

AIR RAID CASUALTIES. During the F.W.W. (1914–8) the total number of air raid casualties in Great Britain was 1,316 killed and 3,000 wounded. In the S.W.W. (1939–45) civilian casualties in Great Britain amounted to 60,584 killed and 86,159 seriously injured. The total number in the London area was 29,890 killed and 50,497 seriously injured.

AIRSHIP. Essentially a power-driven balloon. Lift derived from the gas is known as static lift, but in addition As. have a dynamic lift due to their movement through the air. All As. have streamline envelopes or hulls, which contain the inflation gas. There are 3 main types: non-rigid, semi-rigid, and rigid.

The Zeppelin Co. pioneered the rigid type, and were the most successful in operating them, but British and American designers also played an important part. The first British rigid A. to fly was R9, of 889,310 c.f., on 27 Nov. 1916. She was followed by the R23, 27, and 31 classes during the F.W.W., and R36 and 80, R100 and R101 (destroyed by fire 1930), after. The building of As. then virtually ceased.

AIRY. Sir George Biddell (1801–92). British astronomer, Plumian prof. of astronomy at Cambridge from 1828, and Astronomer Royal 1835–81. He did remarkable work in planetary and lunar theory, and in determining the mean density of the earth.

AISNE (ân). River of N. France, giving its name to a dept. For the Battles of the Aisne, see **FIRST** and **SECOND WORLD WARS**.

AITKEN, Sir Max (1910–). British newspaper proprietor. Already director and chairman of Beaverbrook Newspapers Ltd., he succeeded his father in the baronetcy in 1964, but renounced the barony. See **BEAVERBROOK**.

AITKEN, Robert Grant (1864–1951). American astronomer. B. in California, he was attached to Lick Observatory from 1895, and was director 1930–5. He discovered some 3,000 double stars.

AIX-EN-PROVENCE (äks-). Town in the dept. of Bouches-du-Rhône, France, 18 m. N. of Marseilles. The former capital of Provence, it is the see of an archbishopric, and has a fine Gothic cathedral. Pop. (1962) 67,943.

AIX-LA-CHAPPELLE. French name of **AACHEN**.

AIX-LES-BAINS (äks-lä-bän). Spa in the dept. of Savoie, France, near Lake Bourget, 8 m. N. of Chambéry. There are sulphurous hot springs and the climate is healthy. Pop (1962) 18,270.

AJACCIO (ajas'siö). Cap. of the French island of Corsica. Situated on the W. coast, on the northern shore of the Gulf of A., it has been French since 1768. It was the birthplace of Napoleon. Pop. (1962) 42,282.

AJANTA. Village in Maharashtra state, India, famous for its Buddhist cave temples, dating from 200 B.C. to 7th cent. A.D., and discovered in 1817 and first described by J. Ferguson in 1843.

AJAX. Homeric hero. Son of Telamon, king of Salamis, he was second only to Achilles among the Greek heroes in the Trojan War. When Agamemnon awarded the armour of the dead Achilles to Odysseus, A. is said to have died of rage, or to have killed himself.

AJMER (ahjmër). Town of Rajasthan state, Rep. of India. Situated in a deep valley in the Aravalli mountains, it has many ancient remains, notably a Jain temple. It was formerly the cap. of the small state of A., which was merged with Rajasthan in 1956. Pop. (1961) 230,999.

AKABA. Alternative transliteration of **AQABA**.

AKASHI. Japanese town in the W. part of Honshu, 12½ m. W. of Kobe. On its meridian 135, Japanese standard time is based. Pop. (1950) 65,642.

AKBAR, Jellaladin Mohammed (1542–1605). Greatest of the Mogul emperors of India. He succeeded his father in 1556, and gradually established his rule throughout the whole of India N. of the Deccan. The firmness and wisdom of his rule won him the title 'Guardian of Mankind'. Though reared as a Mohammedan, he showed remarkable religious tolerance.

A KEMPIS, Thomas. See **THOMAS A KEMPIS**.

AKENSIDE, Mark (1721–70). British poet and physician, author of *The Pleasures of Imagination* (1744).

AKHETATON (modern Tell-el Amarna). New cap. estab. by Ikhnaton (q.v.) – to replace Thebes and its associations with the old religion – when he promulgated his monetheistic cult of Aten, the sun's disc. The name means 'horizon of the sun's disc'.

AKHNATON. See **IKHNATON**.

A KINS, Zoe (1886–1958). American writer. B. in Missouri, she wrote poems, literary criticism, and plays, of which the best-known is *The Greeks Had a Word for It* (1930).

AKKAIA. See **ACHAEA**.

AKO. Israeli name for **ACRE**.

AKOLA. Town in Maharashtra state, India, near the Purna r. It is an important centre for the cotton and grain trade. Pop. (1961) 115,820.

AKRON. City of Ohio, U.S.A., on the Cuyahoga, first settled in 1807. Dr. B. F. Goodrich estab. a rubber factory there in 1870, and its rubber factories grew immensely with the rising demand for motor car tyres from c. 1910. A. has a univ. founded 1870. Pop. (1960) 290,351.

AKSA'KOV, Sergei Timofeyevich (1791–1859). Russian writer. B. at Ufa, in the Urals, he became a civil servant, entered the censorship, and, under the influence of Gogol, wrote autobiographical novels, including *Chronicles of a Russian Family*, *Years of Childhood*, etc.

AKSU'. Chinese town (pop. c. 20,000), once the capital of a khanate, and oasis (pop. c. 90,000) in Sinkiang-Uighur near the base of the Tien-Shan mts.

A'KSUM. Ancient city of ruins in the province of Tigré, Ethiopia, 12 m. W.N.W. of Aduwa.

ALABAMA (alabah'ma). State of U.S.A., known as the 'cotton state'; it is in the 'Deep South', with an outlet to the Gulf of Mexico. Through this corridor flows the main waterway, the river A. The state comprises the Cumberland Plateau in the N.; the Black Belt, or Canebrake, excellent cotton-growing country, in the centre; and S. of this the coastal plain, or Piny Woods.

A. was settled by the French in the early 18th cent., and passed to Britain in 1763. At the close of the

18th cent. nearly the whole of A. was included in U.S.A., and in 1819 it became a state. It is mainly agricultural. Cotton, sugar, tobacco, rice, and fruits are grown. Some oil is worked. The capital is Montgomery, and Mobile is the only port. The largest town is Birmingham. The state univ. is at Tuscaloosa, and at Tuskegee is an institute founded for Negroes by Booker Washington. Area 51,609 sq. m., pop. (1960) 3,266,740.

AJANTA. Some thirty in number, the caves once formed a Buddhist 'monastery' and the frescoes and carvings decorating their walls are a priceless record of pre-Hindu art. Mara's attack, illustrated above, is from Cave 26 and dates from the 7th cent. Courtesy of High Commissioner for India.

ALABAMA. Cruiser (1,040 tons) belonging to the Confederate States in the American Civil War. Built at Birkenhead, she was allowed to slip out by the British authorities, and sank many U.S. merchant vessels before being herself sunk by a U.S. man-of-war in 1864. In 1871 a court of arbitration at Geneva decided in favour of the U.S.A., and Britain had to pay damages amounting to \$15,500,000.

ALABASTER. Naturally-occurring form of gypsum which, chemically, is hydrated calcium sulphate, $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$. It is a soft mineral, used for carvings and household ornaments.

ALAIN-FOURNIER (ahlan' foorniyeh'). Pseudonym of Henri Fournier (1886–1914), French novelist, who was killed in action on the Meuse in the F.W.W. His reputation rests on *Le Grand Meaulnes* (1913), an autobiographical fantasy of romantic adventure, a search for *The Lost Domain*, as the book is titled in English. His life is intimately recorded in his correspondence with his brother-in-law Jacques Rivière.

ALAMEIN (alamān'). One of the decisive battles of history, fought 23 Oct.–4 Nov. 1942, during the S.W.W., when the British 8th Army, under Montgomery, completely routed the Axis (German and Italian) forces in the Western Desert of North Africa. A memorial was unveiled there in 1954.

ALANBROOKE, Alan Francis Brooke, 1st viscount A. (1883–1963). British soldier. Son of Sir Victor Brooke, Bart., of Co. Fermanagh, he served in the artillery, received the D.S.O. in the F.W.W., and after-

wards held important military posts. In the S.W.W. he commanded the 2nd Corps of the B.E.F. (1939–40) and was C-in-C. of the Home Forces (1940–1). He became Chief of the Imperial General Staff (1941–6), and a Field Marshal in 1944. He was created a baron in 1945 and a viscount in 1946. Sir Arthur Bryant's *The Turn of the Tide* (1957) based on A.'s war diaries caused much controversy.

ÅLAND (aw'land) ISLANDS. Group of some 300 islands, belonging to Finland, in the Baltic Sea, at the S. extremity of the Gulf of Bothnia. Only 80 are inhabited; the island of Å. is the largest and contains a small town, Marienhamn. Area 572 sq. m.; pop. (1960) 20,981.

ALARCON (ahlahrkōn'), Juan Ruiz de (c. 1580–1639). Spanish dramatist. B. in Mexico, he was ed. in Spain and settled there. His best-known plays are the comedy *La Verdad sospechosa*, and the drama *El Tejedor de Segovia*.

ALARCON, Pedro Antonio de (1833–91). Spanish journalist and poet, b. at Guadix. Out of his experiences as a soldier in Morocco he produced a *Diario* which was acclaimed as a masterpiece. Among his outstanding works were *El sombrero de tres picos* (The Three-cornered Hat, 1874) and *Cuentos amatorios*.

ALARIC (c. 370–410). King of the Visigoths. In 396 he invaded Greece and retired with much booty to Illyria. In 400 and 408 he invaded Italy, and in 410 captured and sacked Rome, but d. the same year on his way to invade Sicily, and was buried in the r. Busento.

ALASEHIR. Town of Asiatic Turkey (anc. Philadelphia), 83 m. E. of Izmir, famed for its temples. Pop. c. 12,000.

ALASKA. Detached state of the U.S.A., at the N.W. extremity of N. America. It was discovered in 1741 by Behring, and a settlement was made in 1744 by Russia, from whom it was bought in 1867 by the U.S.A. at a cost of 7,200,000 dollars (a penny an acre). Much of A. is mountainous and includes, besides other lofty peaks, Mt. McKinley (20,464 ft.), the highest peak in N. America, surrounded by a national park of nearly 2 million acres. Reindeer thrive in the Arctic tundra and elsewhere there are extensive forests. Agriculture is rendered difficult by the short summers and the variation of climate from great heat to extreme cold. There are numerous rivers, the largest being the Yukon. The coast is rocky and deeply indented, fringed with many islands; one of these, Little Diomedé, is only 24 m. from Big Diomedé (or

ALABAMA. Cotton-picking used to be done laboriously by hand, but the machine is taking over. To facilitate the gathering of the crop the leaves of the plant are withered chemically after the ripening of the boll.

Courtesy of the Cotton Board, Manchester

Ratmanov Is.) in the U.S.S.R. The capital is Juneau, and there are 5 other towns.

Gold was discovered in 1880; other minerals incl. coal, copper, and oil. There is an important fur trade. Salmon fisheries and canneries, and lumbering are thriving industries. Reindeer provide food for the Eskimos and hides. The chief railway runs from Seward to Fairbanks, which is linked by motor road (via Canada) with Seattle. Air services are frequent. Near Fairbanks is the Univ. of Alaska. Area 586,400 sq. m.; pop. (1960) 226,167.

ALASKA HIGHWAY. Road which runs from Fort St. John, British Columbia, to Fairbanks, Alaska (1,523 m.). It was built in 1942 during the S.W.W., primarily as a defence measure in the event of a Japanese attack on Alaska.

ALBACETE (ahlbah'teh'teh). City in S.E. Spain, cap. of a province of the same name. Once famous for its cutlery and notably for daggers, it is a market town. Pop. (1960) 74,417.

ALBACORE. Name loosely applied to several sorts of fish found in the Atlantic, in particular to a large tunny and to several species of mackerel.

ALBA IULIA. Town in Transylvania, Rumania, on the right bank of the Muresul. Pop. (1960) c. 14,500.

ALBAN, St. (d. A.D. 303). First Christian martyr in England. According to tradition, he was b. at Verulamium, served in the Roman army, became a convert to Christianity after giving shelter to a priest, and on openly professing his belief, was beheaded. In 793 King Offa founded a monastery on the site of A.'s martyrdom, and round this the city of St. Albans grew up.

ALBANI (ahlbah'nē). Stage-name adopted by Emma Lajeunesse (1852-1930), Canadian soprano. B. in Chambly, Quebec, she had remarkable vocal flexibility. From her Italian début in 1870 in *La Sonnambula*, she was an established success and was created D.B.E. in 1925.

ALBÂNIA (Alban. Shqiperia). Republic forming part of the Balkan peninsula. The Dinaric Alps extend over the greater part, with thickly forested slopes which are the haunt of wild boars and wolves. Swift streams descend to the alluvial lowland, which fringes the coast. The lowland soil is fertile, but primitive methods are still in use and industry scarcely exists. Roads link the principal towns, and Durrës is connected by rail with Tirana and Elbasan. Foreign trade is limited.

The capital is Tirana, Durrës is the only port. Other towns are Shkoder, Korçë, Gjirokastër, Elbasan, and Vlone. Politically linked with China, A. broke off relations with the U.S.S.R. in 1961. See HOXHA, ENVER.

After forming part of the East Roman empire, A. was overrun by the Turks in 1467 and remained part of the Turkish empire until 1912, when it became a principality under Prince William of Wied. Civil war followed, in which Italy intervened. A. became a republic in 1925, and in 1928 its president, Ahmed Beg Zogu, was proclaimed king and remained on the throne until 1939, when the country was invaded by the Italians. In 1940 the Greeks almost succeeded in expelling the Italians, but were forced to surrender in 1941 to the Germans. These in turn were expelled in 1944, and in 1946 A. became again a republic with a Communist form of govt. There is no state religion, and though two-thirds of the people are traditionally Moslem and the rest Orthodox Christians and R.C., many mosques and churches were closed in 1967 and the govt. claimed A. as the world's first atheist state. Area, 10,629 sq. m.; pop. (1960) 1,625,000.

ALBANY (awl'ban), Dukes of. Scottish title created in 1398 for Robert Stewart, earl of Fife, brother of King Robert III. It repeatedly died out and was revived. In 1881 LEOPOLD GEORGE DUNCAN ALBERT (1853-84), youngest son of Queen Victoria, received

the title. His posthumous son, CHARLES EDWARD (1884-1954), succeeded him. In 1900 he became duke of Saxe-Coburg, fought for Germany 1914-8, and was deprived of his title as duke of A. in 1917.

ALBANY, Louise Maximillienne Caroline, Countess of (1752-1824). B. at Mons, the daughter of Prince Gustavus Adolphus of Stolberg, she was m. to Prince Charles Edward Stuart, the 'Young Pretender' (self-styled Count of Albany), in 1772, but left him in 1780 to live with the Italian poet Alfieri.

ALBANY. Capital of New York State, one of the oldest towns in U.S.A., on the Hudson, about 140 m. N. of New York City. Pop. (1960) 129,726.

ALBATROSS. Genus of oceanic birds (*Diomedea*) closely related to the petrels, and belonging to the order Procellariiformes. The best-known species is

D. exulans of the Pacific, which breeds on Tristan da Cunha and other oceanic islands and is the largest sea-bird, having a wingspan of 10 ft. or more.

ALBEE, Edward (1928-). American playwright. B. in Washington, D.C., he was adopted as an infant into a N.Y. family with theatrical links, but did not begin writing until he was 30. His plays belong to the drama of the Absurd and incl. *The Zoo Story* (1961), *The American Dream*, and *Who's Afraid of Virginia Woolf* (1962), and *Little Alice* (1966).

ALBÉNIZ (al-bā-nēth), Isaac (1860-1909). Spanish composer and pianist, b. in Catalonia. He composed the suite *Iberia* and other impressive piano pieces, making use of traditional Spanish tunes.

ALBERONI (ahlbeh'rō'nē), Giulio (1664-1752). Spanish-Italian cardinal and statesman. B. in Parma, he became a priest. Philip V made him in 1715 Prime Minister of Spain. In 1717 he became a cardinal. He introduced many reforms, but was forced to flee to Italy in 1719.

ALBERT (1819-61). Prince Consort of the U.K. The second son of Ernest, Duke of Saxe-Coburg-Gotha, he was ed. privately and at the Univ. of Bonn, showing great aptitude in natural science and the arts. His union with Queen Victoria, his first cousin, was the cherished plan of their uncle, King Leopold I of Belgium, and the marriage took place in 1840.

Albert planned the Great Exhibition of 1851, and the surplus profits of £150,000 went to estab. the Victoria and Albert Museum in South Kensington. He d. at Windsor of typhoid, and was buried at Frogmore. Though hard-working and conscientious, he was regarded by the British people with groundless suspicion because of his German connections.

ALBERT I (1875-1934). King of the Belgians. The younger son of Philip, Count of Flanders - the brother of Leopold II - he m. in 1900 the Duchess Elisabeth of Bavaria. He became king in 1909, and in the F.W.W. commanded the Allied army that conquered the Belgian coast in 1918, re-entering Brussels in triumph on 22 Nov. He was killed in a mountaineering accident in the Ardennes.

ALBERT (Victor Christian Edward) (1864-92). Duke of Clarence and Avondale and Earl of Athlone. B. at Frogmore Lodge, Windsor, he was the eldest son of Edward, Prince of Wales, afterwards Edward VII, and his consort Alexandra. In 1891 he was betrothed to Princess Victoria Mary of Teck, afterwards Queen Mary, but before the marriage could take place he d. at Sandringham after a short illness.

ALBERT (ahlbār'), or Alexandre Martin (1815-95). French Socialist. He was a member of the Provisional Republican Government in 1848, and was the first factory-hand to hold a government position. An ardent disciple of Louis Blanc, he was deported for 10 years on political grounds, and took part in the Paris Commune of 1871.

ALBERT. French town in Somme dept., 17 m. N.E. of Amiens. During the F.W.W. a statue precariously balanced from Oct. 1914 to March 1918, when it fell on the tower of a shattered church, became known as 'the hanging Virgin'. Pop. (1962) 10,423.

ALBERT, Lake. Lake in Central Africa. Occupying an area of about 1,650 sq. m., some 80 m. N.W. of Lake Victoria, it lies in the Great Rift Valley. It was discovered by Sir Samuel Baker in 1864 and named after the Prince Consort.

ALBERTA. Prov. of Canada, created in 1905 out of part of the North-western Territory. It lies between Saskatchewan and the Rocky Mountains, many of whose highest peaks it includes; and most of it is arable. In the centre and S. is the dry, treeless prairie; towards the N. this merges into a zone of poplar, then mixed forest. The valley of the Peace River is the most northerly farming land in Canada (except

Eskimo pastures), and there are good grazing lands in the foothills of the Rockies.

A. is pre-eminently agricultural, millions of acres being devoted to wheat, barley, and oats. Sugar-beet is grown in the S. More than a million head of cattle are fed on the natural pastures E. of the Rockies.

A. has the most extensive coal resources in Canada, the principal mines being near Edmonton and at Anthracite, Mountain Park, Lethbridge, Canmore, etc.

EDWARD ALBEE

A. is also Canada's leading producer of petroleum and natural gas. An oil pipe line extends from Edmonton to L. Superior. The McMurray district has large deposits of bituminous sand. Lumbering is important.

The cities are Edmonton, the capital; Calgary, Lethbridge, Medicine Hat, Wetaskiwin, Red Deer, and Drumheller. A. is represented in the Canadian Legislature by 6 senators and 17 members in the House of Commons. The provincial government is vested in a Lieut.-Governor and a Legislative Assembly of 61 members. The theories of Social Credit have attracted much support in A. and a Social Credit government has been in power since 1935. Area, 255,285 sq. m.; pop. (1961) 1,331,944.

ALBERTA CANAL. Designed as part of Belgium's frontier defences; also links the industrial basin of Liège with the port of Antwerp. Built 1930-9, it was named after King Albert I.

ALBERTI, Rafael (1902-). Spanish poet, and friend of Lorca. A fine technician, he published such volumes as *Sobre los ángeles* (1928), politico-surrealist impressions of angels; *Retornos de lo vivo lejano* (1952) written in exile in the Argentine - he was on the losing side in the Spanish Civil War; and *Ora Maritima* (1953) in praise of his birthplace, Cadiz.

ALBERTUS MAGNUS (Albert the Great) (1193 or 1206-80). Scholastic philosopher. B. in Swabia, he studied at Bologna and Padua, and entered the Dominican order in 1223. He taught at Cologne and lectured from 1245 in Paris university. St. Thomas Aquinas was his pupil there, and followed him to Cologne in 1248. In 1254 he became provincial of the Dominicans in Germany, and was made bishop

of Ratisbon in 1260. Two years later he resigned and eventually retired to his convent at Cologne. He was a man of vast learning on a variety of subjects - theology and philosophy (especially Aristotle), but also the natural sciences, chemistry, physics, etc. He figures as the *doctor universalis* among the Schoolmen, and as a magician in popular legend. He wrote numerous works and was canonized in 1932.

ALBI (ahlbē'). Chief town in the dept. of Tarn, S. France, on the Tarn, 45 m. N.E. of Toulouse. It was the centre of the Albigensian heresy and has a 13th cent. cathedral. Pop. (1962) 41,268.

ALBIGENSES or CATHARISTS. Heretical sect of Christians who flourished in S. France near Albi and Toulouse during the 11th to 13th cent. They adopted the Manichean belief in the duality of good and evil and pictured Jesus as being a rebel against the cruelty of an omnipotent God. They showed a consistently anti-Catholic attitude with distinctive sacraments, especially the *consolamentum*, or baptism of the spirit. In 1209 Pope Innocent III ordered a crusade against the As. Their lands were invaded by armies under Simon de Montfort, and thousands perished before peace was restored by the treaty of Paris (1229).

ALBINISM. Absence or great deficiency in the body of the dark pigment melanin. As a result the hair is very light or white, the skin is white, and the eyes pink, yellow, or pale blue. It probably occurs sporadically among most races of mankind; it has been observed in most domestic and many wild animals, and also among plants. Poor daylight vision in albinos, formerly only ameliorated by dark glasses, may be overcome even in infants by fitting coloured contact lenses (q.v.).

ALBION. Ancient name of Britain, mentioned by Pytheas of Massilia (4th cent. B.C.). It is probably of Celtic origin; but the Romans, having in mind the white cliffs of Dover, assumed it to be derived from *albus* (white). The kindred name of Albany was given to the Scottish highlands in the 10th cent.

ALBOIN (reigned c. A.D. 561-73). King of the Lombards, who were at that time settled N. of the Alps. Early in his reign he attacked the Gepidae in Rumania, killing their king and taking his dau.

ALBERTA. Surrounded on all sides by landscaped parks, the new city hall at Edmonton typifies in its size and modernity the rapid development and forward outlook of the province.

Courtesy of the Alberta Government.

Rosamund to wife. About 568 he invaded Italy, conquering the country as far as Rome. He was murdered at the instigation of his wife, whom he had forced to drink from a wine-cup made from her father's skull.

ALBUERA (ahlboo-eh'rah). Spanish village, 13 m. S.E. of Badajoz, where on 16 May 1811, during the Peninsular War, the French under Soult were defeated by Beresford.

ALBUMIN. A class of proteins which occur in most animal fluids and tissues, and also in the seeds of plants. The most common are: *leucosin*, in the seeds of wheat, rye, and barley; *legumelin*, in the seeds of pea, lentil, soya-bean, etc.; *egg-a*, from the white of hens' eggs; and *serum-a*, from blood serum.

ALBUQUERQUE (ahhbook'keh), Alfonso de (1453-1515). Viceroy of the Portuguese Indies from 1508. He conquered Goa, Ceylon, Malacca, and Ormuz, and d. at sea on his way home.

ALBUQUERQUE (al'baker'ki). Largest city of New Mexico, U.S.A., situated E. of the Rio Grande, in the Pueblo district. Here is the Univ. of New Mexico, founded 1889. Pop. (1950) 201,189.

ALCHEMY. A wood engraving attributed to Holbein, from the German translation of Boethius' *De Consolatione Philosophiae* (Augsburg, 1537).

Photo: Radio Times Hulton Picture Library

ALBURY. Town in N.S.W., Australia, on the r. Murray, commercial centre of the Riverina. Pop. (1951) 18,617.

ALCAEUS (al'se'us) (c. 611-c. 580 B.C.). Greek lyric poet. B. at Mytilene in Lesbos. He was a member of the aristocratic party and went into exile when the popular party triumphed. He wrote odes, and the Alcaic stanza is named after him.

ALCALA' ZAMORA Y TORRES. Niceto (1877-1949). Spanish Republican statesman. He was Premier following the revolution of 1931 and Pres. of the Spanish rep. 1931-6. After the Civil War he went abroad.

ALCANTARA (ahlkahn'tahrah). Spanish town on the Tagus in the province of Cáceres. It takes its name (Arabic for 'the bridge') from the bridge built by Trajan about A.D. 105. Pop. c. 4,000.

ALCATRAZ. Small island in San Francisco Bay, Calif., U.S.A., with a famous long-term federal prison (penitentiary). Dangerous currents meant few successful escapes, but damp involved high maintenance costs, and in 1952 it was decided to close the prison.

ALCAZAR (ahlkah'tahrah). Name of Moorish palaces in Spain. There were 5 in Toledo, of which one, defended by Nationalist troops, held out for 71 days against the Republicans during the Spanish Civil War in 1936.

ALCHEMY. The supposed art of transmuting base metals, such as lead and mercury, into silver and gold. A certain field of A. constituted the chemistry of the Middle Ages. More broadly, however, A. was a system of philosophy which dealt alike with the mystery of life and formation of inanimate substances. A. was a complex and indefinite conglomeration of chemistry, astrology, occultism, and magic, blended with obscure and complex ideas derived from various religious systems and other sources.

ALCIBIADES (alsib'radēs) (c. 450-404 B.C.). Athenian general and politician. In 422 he became

leader of the war party in Athens during the Peloponnesian War, and in 415 he was appointed one of the 3 commanders of the expeditionary force to Sicily. Shortly before its departure the pillars of the god Hermes in the streets of Athens were mutilated, and the scapegoat was attributed to A. who was recalled to stand his trial. He escaped to Sparta, and was condemned to death in his absence. In 411 the Athenians recalled him, and under his leadership they gained a number of victories. But in 407 he was superseded, and retired to the Carian coast. After the fall of Athens in 404 he took refuge in Phrygia, and was there murdered.

ALCMAEONIDAE (al'kmā'-ō'-nīdē). A noble family of anc. Athens: its members include Pericles and Alcibiades.

ALCOCK. Sir John William (1892-1919). British airman. B. at Manchester, he was apprenticed to a motor-works. In 1912 he took his air pilot's certificate. During the F.W.W. he served in the Royal Naval Air Service. On 14 June 1919, he and Lt. Whittam-Brown made the first crossing of the Atlantic in an aeroplane, a Vickers-Vimy machine. Both were given the R.B.E. A. was killed in a flying accident near Rouen.

ALCOFORADO (ahlkoh'fōrah'cōh), Marianna (1640-1723). Portuguese nun. She entered a Franciscan nunnery at Beja at the age of 16, and in 1665-7 had a passionate love affair with Noel Bouton, afterwards Marquis de Chamilly, who abandoned her when their relations were discovered. Five of her letters to him were pub. anonymously in French (1669), and translated by Sir Roger L'Esturgeon appeared in 1673 as *the Letters of a Portuguese Nun*.

ALCOHOLIC LIQUORS. Alcohol, or, more properly, ethyl alcohol, is the basis of all the common intoxicants. These fall into 3 groups: (1) Wines, cider, perry, and other drinks in which the alcohol is produced by direct fermentation of their sugars by yeasts; (2) Malt liquors (beers and stouts); the starch of grain is converted into sugar by mashing, and the sugar is then fermented into alcohol by the action of yeasts; (3) Spirits, distilled from malted liquors or wines.

Elsewhere in Europe the strength of spirits is measured as a percentage of pure A., but in Britain 'proof spirit' has 57.1 per cent, and in the U.S.A. 50 per cent of A. by volume. In an average person, a concentration of alcohol in the blood of 0.15 per cent causes mild intoxication, 0.3 per cent causes definite drunkenness and partial loss of consciousness, and 0.6 per cent endangers life. Periodic bouts of acute alcoholism are called *dipsomania*.

ALCOHOLS. In chemistry, a group of organic compounds characterized by the presence of one or more OH-groups in the molecule. They may be liquids or solids, according to the size and complexity of the molecule.

The 5 best-known A.s. form a series in which the carbon and hydrogen atoms increase progressively, i.e. each of the series differs from its predecessors by the presence of an extra CH₂- (methylene) group in the molecule, viz. methyl alcohol or wood spirit (CH₃OH); ethyl A. or spirit of wine (C₂H₅OH), known also as ethanol or simply as A.; propyl A. (C₃H₇OH); butyl A. (C₄H₉OH); and amyl A. (C₅H₁₁OH). The lower spirits are liquids miscible with water. The higher members such as amyl A. are oily liquids not miscible with water, and the highest are waxy solids, e.g. cetyl A. (C₁₆H₃₃OH) and myristyl A. (C₁₄H₂₉OH) which occur in spermaceti and beeswax respectively.

The main uses of A. are: in alcoholic liquors; as a solvent for gums, resins, etc., in the lacquer and varnish industry, and also in the making of dyes; for essential oils in perfumery; and for medical substances in pharmacy. It is also used as a raw material in the manufacture of chloroform, ether, chloral, iodoform, etc. Certain brands of motor spirit:

contain A., where it is claimed to give increased power to the engine. A. is also used as a fuel.

ALCOTT, Louisa May (1832–88). American writer for girls. B. near Philadelphia, she was the dau. of Amos B. Alcott (1799–1888), a poet and transcendentalist philosopher. Her *Little Women* (1868), the most popular of all American books for girls, had *Good Wives* among its sequels.

ALCUIN (735–804). English scholar. B. at York, he went to Rome in 780, and in 782 took up his residence at Charlemagne's court in Aachen. From 796 he was abbot of Tours. Though not a profound scholar like Bede, he disseminated the achievements of Anglo-Saxon scholarship, organized education and learning in the Frankish empire, gave a strong impulse to the Carolingian Renaissance, and was a prominent member of Charlemagne's academy.

ALDABRA (ahldah'brah). High limestone is. some 260 m. N.W. of Madagascar, and incl. in the Brit. Indian Ocean Terr. (q.v.). Uninhabited, A. is remarkable for rare animal and plant life, being the last home of the giant land tortoise. Plans for a military staging post aroused controversy 1967, but were abandoned because of modified defence plans.

ALDANOV (ahldah'nov), Mark Alexandrovitch (1889–1957). Pseudonym of the Russian novelist Mark Landau. B. in Kiev, he strongly opposed the Bolshevik Revolution, emigrated in 1919, and spent the rest of his life in exile, mainly in France. His novels incl. *The Ninth Thermidor* (1923) and 3 sequels, dealing with the French Revolution, and *The Fifth Seal* (1939), scathingly satirical of the Soviet Union.

ALDEHYDES (al'dehīdz). In chemistry, a group of organic compounds prepared by oxidation of primary alcohols. The name is made up from alcohol *dehydrogenatum*, i.e. alcohol from which hydrogen has been removed. As. are usually liquids and include acetaldehyde, formaldehyde, benzaldehyde, and citral.

ALDER. Genus of trees and shrubs (*Alnus*) of the family Betulaceae, allied to the birch. The common or Black A. (*A. glutinosa*) is found throughout the temperate zone of the northern hemisphere.

ALDER. The tree, with leaves and catkins.

ALDERMAN (awl'-, Old Eng. *ealdorman*, older man). Senior member of a borough or county council in England and Wales, or of a municipal corporation in certain towns in the U.S.A.

In England Aldermen on borough and county councils (qq.v.) are elected by the councillors: abolition of the office was recommended by the Maud Committee 1967. See also LONDON, CITY OF.

ALDERMASTON. Village of Berks., England, site of an atomic weapons research establishment. In 1958 nuclear disarmament campaigners made it the goal of a great Easter protest march from London, and until 1964 marches were made in the reverse direction.

ALDERNEY (awl'-). Third largest of the Channel Islands. It is 3½ m. long, and 1 m. wide, with an area of 1,962 acres. The soil is fertile and well suited for grazing the famous A. cattle. The only settlement of importance is St. Anne (the capital) with an airport.

It suffered severely under the German occupation 1940–5. Pop. (1951) 1,321.

ALDERSHOT (awl'-). English town (bor.) in Hants, 35 m. S.W. of London, H.Q. of A. and Hants Military District of Southern Command. Its military camp and barracks were estab. in 1854. Before the S.W.W. the annual 'Tattoo', or military parade with massed bands, attracted huge crowds. Pop. (1961) 31,260.

ALDHelm (c. 640–709). English saint, prelate, and scholar. He was abbot of Malmesbury from 673 and bishop of Sherborne from 705. Of his poems and treatises in Latin, some survive, notably his Riddles in hexameters, but his English verse has perished. He was also a skilled architect.

ALDINGTON, Richard (1892–1962). English writer and poet. B. in Hants, he pub. vols. of Imagist verse, working with Hilda Doolittle (q.v.), to whom he was m. 1913–37. His novels incl. *Death of a Hero* (1929) and *All Men Are Enemies* (1933); his biographical studies of D. H. Lawrence *Portrait of a Genius*, but . . . (1950) and *Lawrence of Arabia* (1955) were controversial.

ALE'GRIA, Ciro (1900–). Peruvian novelist. He became a reporter on a Trujillo newspaper and worked with a road construction firm. Later he was imprisoned for his associations with the Popular Revolutionary Alliance. Released by the revolutionaries he left for Chile, where he remained as an exile. Of his books, the most widely read is *Broad and Alien is the World*.

ALEMÁN (ahlehmanh'), Mateo (1547–c. 1610). Spanish novelist, b. at Seville, author of the picaresque novel *Guzmán de Alfarache* (1599).

ALEMBERT (ahlonbār'), Jean Le Rond d' (1717–83). French mathematician and encyclopaedist. B. in Paris, he was a founding ed. by the Jansenists, and studied law and medicine before devoting himself to mathematics. He made substantial contributions to contemporary mathematical science. He was associated with Diderot in planning the great *Dictionnaire Encyclopédique*, for which he wrote the *Discours préliminaire*.

ALENÇON (ahlonson'). French town, cap. of Orne dept., in a rich agricultural plain, 55 m. S.S.E. of Caen. A. is famed for its lace, now a declining industry. Pop. (1962) 27,024.

ALEPPO. City of N. Syria, cap. of the mohafazet of Aleppo, situated in the fertile valley of the Kuwaib. A beautiful city, A. was once the trade centre between Europe and Asia, and is still an important market. It dates from c. 2,000 B.C. Pop. (1960) 425,467.

ALESSANDRIA (ahlessahn'dreah). City and episcopal see in N. Italy, on the Tanaro, 56 m. E.S.E. of Turin. Pop. (1961) 92,291.

ALETSCHE (ah'tech). Most extensive glacier in Europe, stretching for 10 m. along the southern slope of the Jungfrau in the Bernese Alps.

ALEUTIANS (ale-ōō'shi-anz). Chain of islands in the N. Pacific, stretching from Alaska for 1,200 m. W.S.W. They comprise 14 large and more than a hundred small islands, and many rocks and islets. Politically they are part of Alaska, U.S.A. They are ice-free all the year round, but are often wrapped in fog. The is. are mountainous and volcanic, treeless, but with grass and sedge.

The Aleuts are a branch of the Eskimos. Very few are full-blooded today. Most of them belong to the Greek Orthodox Church, speak a language related to Eskimo, and live by hunting and fishing. Pop. 5,520.

ALEXANDER III. Pope 1159–81. Leader of the papal opposition to the emperor Frederick Barbarossa. Shortly after his election he was compelled to flee to France but in 1178 returned to Rome and received the emperor's homage. He supported Henry II of England in his invasion of Ireland, but humbled him after the murder of Thomas à Becket. He held the 3rd Lateran council in Rome in 1179.

ALEXANDER VI. Pope 1492–1503. The infamous

Borgia pope. B. in Spain in 1431, he was speedily advanced in the church by his uncle Pope Calixtus III (1455-8). He secured his own election as pope by bribery, and his papacy became noted for nepotism, immorality, treachery, and ostentatious extravagance. But, himself a man of great gifts, he was a patron of art. When Savonarola in Florence preached against his corrupt practices, A. secured his execution. A. died of poison which he is said to have prepared for his cardinals. He was the father of Cesare and Lucrezia Borgia.

ALEXANDER I (1777-1825). Tsar of Russia. Son of Paul I, he came to the throne in 1801 on his father's assassination, joined the coalition against Napoleon in 1805, and was present at Austerlitz, where his forces were defeated. Defeat at Eylau and Friedland led A. to seek peace, and a treaty was concluded at Tilsit (1807). For a time A. seems to have fallen under the spell of Napoleon's personality, but admiration turned to detestation, and he broke with Napoleon's economic policy and opened his ports to British goods and ships. In 1812 Napoleon invaded Russia, where the determined resistance of the Tsar and his people, the Russian winter and the vastness of the country, proved his undoing. A. led the Russian hosts from Moscow to Paris, and was recognized as the greatest of European potentates. He gave a constitution to Poland, but was also the prime mover in the Holy Alliance which endeavoured to make reaction permanent. His last years were clouded by fear of the liberal movements.

ALEXANDER II (1818-81). Tsar of Russia. Eldest son of Nicholas I, he succeeded him in 1855, when Russia was fighting the Crimean War against Britain, France, and Turkey. The war was concluded in 1856 by the treaty of Paris. In 1863-4 a Polish insurrection was sternly repressed, and in 1877-8 there was war again with Turkey, in which the Russians were successful. Although the serfs were emancipated in 1861, A. became increasingly autocratic and reactionary, and he was assassinated by Nihilists.

ALEXANDER III (1845-94). Tsar of Russia. Son of Alexander II, he succeeded on the assassination of his father in 1881. He m. Dagmar (1847-1928), dau. of Christian IX of Denmark and sister of Queen Alexandra of the U.K., in 1866. Essentially a reactionary, he ruled the empire with a firm hand. The Jews were persecuted, and the subject peoples were relentlessly Russified.

ALEXANDER THE GREAT (356-323 B.C.). King of Macedonia and conqueror of the Persian empire. The son of Philip, king of Macedonia, and Olympias, he was ed. by the philosopher Aristotle. He first saw fighting in 340, and at the battle of Chaeronea (338) contributed to the victory by a cavalry charge. When his father was murdered in 336, the Macedonian throne and army passed into his hands. He first secured his northern frontier, suppressed an attempted rising in Greece by his capture of Thebes, and in 334 crossed the Dardanelles for the campaign against the vast Persian empire. A. marched with 20,000 foot and 5,000 horse, and at the r. Granicus near the Dardanelles won his first success. In 333 he routed the Pers. king Darius at Issus, and then set out for Egypt, where he was greeted as Pharaoh, son of the god Ra, and hailed as son of Zeus. He founded Alexandria, the future centre of Hellenistic civilization. Meanwhile, Darius collected half-a-million men, with scythed chariots and elephants, for a final battle, but at Arbela on the Tigris in 331 A. with 47,000 men drove the Persians in headlong retreat.

After the victory he stayed a month in Babylon, then marched to Susa and Persepolis, and in 330 to Ecbatana. Soon after he learned that Darius was dead. In Afghanistan he founded colonies at Herat and Kandahar, and in 328 reached the plains of Sogdiana,

A posthumous coin-portrait.

A. took Darius' daughter for his 2nd wife. He d. at Babylon of a malarial fever.

A. left no successor, and his empire broke up into independent kingdoms. But his personality left deep impressions on East and West; peoples of the East all had their traditions of him, whilst medieval romances made him a hero of the type of Arthur and Charlemagne.

ALEXANDER. Name of three kings of Scotland. **ALEXANDER I (c. 1078-1124)**, known as 'the Fierce', reigned from 1107. **ALEXANDER II (1198-1249)**, the son of William the Lion, succeeded his father in 1214, and supported the English barons in their struggle with King John after Magna Charta. By the treaty of Newcastle in 1244 A. acknowledged Henry III of England as his liege lord. His son **ALEXANDER III (1241-85)** reigned from 1249. In 1263 he extended his authority over the Western Isles which had been dependent on Norway, and strengthened the power of the central Scottish government. He d. as the result of a fall from his horse at Kinghorn, leaving as heiress his granddaughter, Margaret, the Maid of Norway.

ALEXANDER (OBRENOVICH) (1876-1903). King of Serbia from 1889 while still a minor, upon the abdication of his father King Milan. He took power into his own hands in 1893, and in 1900 m. a widow, Mme Draga Mashin. In 1903 A. and his queen were murdered, and Peter Karageorgevich was placed on the throne.

ALEXANDER I (KARAGEORGEVICH) (1888-1934) King of Yugoslavia, 2nd son of Peter Karageorgevich King of Serbia, he was declared regent for his father in 1912, and in 1921, on his father's death, became king of the state of South Slavs - Yugoslavia - which had come into being in 1918. Rivalries of neighbouring powers and of the Croats, Serbs and Slovenes within the country led A. to estab. a personal dictatorship in 1929. He was assassinated on a state visit to France, and Mussolini's govt. was later declared to have instigated the crime.

ALEXANDER, Albert Victor, 1st earl A. of Hillsborough (1885-1965). British Labour politician. The son of an artisan engineer, he was Co-operative M.P. for Hillsborough 1922-31 and 1935-50, when he was created a visct. He was 1st Lord of the Admiralty 1929-31, and in Churchill's National Govt. 1940-5, and was again re-appointed under Attlee 1945-6. He was Min. of Defence 1947-50 and Chancellor of the Duchy of Lancaster 1950-1. In 1963 he was created an earl.

ALEXANDER, Frederick Matthias (1869-1955). Australian founder and teacher of the psychophysical method named after him. At one time a professional reciter, he developed throat and voice trouble, and his experiments in curing himself led him to work out the system of mental and bodily control described in his *Use of the Self*.

ALEXANDER, Sir George (1858-1918). British actor, the typical actor-manager of his period. From 1891 he produced at the St. James's Theatre a number of plays by H. A. Jones, Pinero, and Wilde, and was knighted in 1911.

ALEXANDER, Harold Rupert Leofric George, 1st earl A. of Tunis (1891-). British soldier. 3rd s.

where he m. Roxana, dau. of King Oxyartes. India now lay before him, and he pressed on to the Indus. Near the Hydaspes he fought one of his fiercest battles against the rajah Porus. At the r. Hyphasis his men refused to go farther, and reluctantly he turned back down the Indus and along the coast. They reached Susa in 324, here

of the 4th earl of Caledon, he was ed. at Harrow and Sandhurst and commissioned in the Irish Guards. After distinguished service during the F.W.W., he held various staff appointments until 1938 when he commanded the 1st Division taking it to France in 1939. As lieutenant-general he commanded the 1st Corps and organized the last phases of defence and final evacuation from Dunkirk. He was then G.O.C.-in-C. Southern Command until he became G.O.C.-in-C. in Burma in March 1942, where he fought a delaying action for 5 months against vastly superior Japanese forces. In Aug. 1942 he went to N. Africa, and in

LORD ALEXANDER
OF TUNIS

1943 became deputy to Eisenhower in charge of the Allied forces in Tunisia. When the Axis forces in N. Africa surrendered, A. became deputy C.-in-C. of the Mediterranean Combined Operations and was promoted G.O.C., then Supreme Allied Commander in the Mediterranean and, in 1944, field marshal. Appointed Gov.-Gen. of Canada in 1946, he was created earl A. of Tunis in 1952, and was Min. of Defence 1952-4. In 1959 he was awarded the O.M.

ALEXANDER, Samuel (1859-1938). Australian philosopher, prof. at Manchester 1893-1924, and originator of the theory of Emergent Evolution. According to this, matter is supposed to have emerged from the original space-time matrix, and life to have similarly evolved from matter, which in its turn has given birth to mind; finally God is supposed to emerge from mind. His books incl. *Space, Time and Deity* (1920), and he received the O.M. in 1930.

ALEXANDER NEVSKI (1220-63). Russian hero and saint. Son of the grand-duke of Novgorod, he was a great warrior and in 1240 defeated the Swedes on the banks of the Neva, thus acquiring the name of Nevski. Two years later he won a victory on Lake Peipus against the Knights of the Teutonic Order.

ALEXANDER OF HALES (c. 1175-1245). English scholar and theologian. B. in Glos, he held the chair of theology in Paris, and attempted to combine the thought of Aristotle and the Arabians with the prevailing Augustinianism of his day.

ALEXANDER SEVERUS (A.D. 208-35). Roman emperor. B. in Palestine, he succeeded his cousin Heliogabalus in 218. His campaign against the Persians in 232 achieved some success, but in 235 when proceeding to defend Gaul against German invaders he was killed in a mutiny.

ALEXANDRA (1844-1925). Queen Consort of Edward VII of the United Kingdom. Eldest dau. of Christian IX of Denmark, she m. Albert Edward, Prince of Wales, in 1863; 3 sons and 3 daus. were born of the marriage. She founded Queen A.'s Imperial Nursing Service in 1902; and in 1912, to mark the 50th anniversary of her coming to England, she instituted A. Rose Day in aid of the hospitals. Widowed in 1910, she spent her closing years at Sandringham.

ALEXANDRA (1872-1918). Last tsarina of Russia. Dau. of Louis IV, grand duke of Hesse, and Princess Alice, dau. of Queen Victoria. She m. in 1894 Tsar Nicholas II. In 1907 she fell under the spell of Rasputin, a dissolute monk who had been brought to the palace to help cure the young Tsarevitch, who was a victim of haemophilia. Rasputin was murdered in Dec. 1916, and on 15 March 1917 the tsar was compelled to abdicate. With her husband, their son

ALEXANDRIA. The beaches of the city are among the finest in the world, and here at Stanley Bay there is every holiday attraction, so that its importance as a port is rivalled by its value as a tourist centre.

Courtesy of the Egyptian State Tourist Administration.

and daus. A. was sent to Siberia by the Bolsheviks; and on 16 July 1918, in a cellar at Ekaterinburg (Sverdlovsk), the whole royal family were murdered.

ALEXANDRA PARK. Public recreation ground in N. London, containing A. Palace (1875), originally a place of popular entertainment. Britain's 1st television station was established here, and it is now the B.B.C. centre for experiments in colour TV.

ALEXANDRETTA. See **ISKENDERUN**.

ALEXANDRIA. City in the United Arab Republic and chief port of Egypt, situated between the Mediterranean and Lake Maryut. It was founded in 331 B.C. by Alexander the Great, and for over 1,000 years was the capital of Egypt and the principal centre of Hellenistic culture. Since the 4th cent. A.D. it has been the seat of a Christian patriarch. In 641 it was captured by the Mohammedan Arabs, and after the opening of the Cape route its trade rapidly declined. Early in the 19th cent. it began to recover its prosperity, and its growth was encouraged by its being the main British naval base in the Mediterranean during both the World Wars: the Egyptian cotton trade passes through the port and there is an oil refinery.

Few relics of antiquity remain. The Pharos, the first lighthouse and one of the Seven Wonders of the ancient world, has long since disappeared. The world-famous Alexandrian Library was finally destroyed by the Arabs in 641. 'Pompey's Pillar' is a column erected, as a landmark from the sea, by Diocletian. Two obelisks that once stood before the Caesareum temple are now in London ('Cleopatra's Needle') and New York respectively. A univ. was founded in 1942. Pop. (1960) 1,513,000.

ALEXANDRIAN SCHOOL. Name given to the writers and scholars of Alexandria who from about 331 B.C. to A.D. 642 made the city the chief centre of culture in the Western World. They include the poets Callimachus, Apollonius Rhodius, and Theocritus; Euclid, father of geometry; Eratosthenes, the geographer; Hipparchus, who developed a system of trigonometry; Ptolemy, who gave his name to the Ptolemaic system of astronomy that endured for over 1,000 years; and Philo, the Jewish philosopher. The Gnostics and Neo-Platonists also flourished in Alexandria.

ALEXANDROPOL. First name of **LENINAKAN**.

ALEXANDROVSK. Older name of **ZAPOROZHJE**.

ALEXEI (SERGEI VLADIMIROVICH SIMANSKY) (1877-). Russian churchman. He became a priest in 1903, and in 1943 was appointed metropolitan of Leningrad and Novgorod. In 1945 he became patriarch, and secured some measure of understanding with the Soviet govt. See p. 28.

ALFALFA. Spanish name for a kind of lucerne or medic (*Medicago sativa*) of great importance as a

ALEXEI

Courtesy of C. de Grunwald.

and Paris. On the outbreak of the Revolution, they fled to Florence, where they resided until A.'s death. His whole output betrays an ardent love for freedom and a glowing hatred of tyranny. The masterpieces among his 28 plays, tragedies most of them, are *Saul* and *Mirra*.

ALFONSO V. King of Aragon, 1416–58. Named 'the Magnanimous', he was one of the most notable figures of the Renaissance period, a patron of letters and a Latin scholar. He inherited the crown of Sicily and acquired the crown of Naples.

ALFONSO VIII. King of Castile, 1158–1214. He formed the alliance of Christian powers which inflicted disastrous defeat upon the Moors at the Navas de Tolosa in 1212; and m. Leonora, dau. of Henry II of England.

ALFONSO X (1221–84). King of Leon and Castile 1252–84. Known as 'the Wise', he is a most important figure in early Spanish literature. At his instigation many great literary projects were undertaken, and he assembled 50 of the greatest astronomers of his time at Toledo to improve the Ptolemaic planetary charts (Alfonsine Tables, 1252).

ALFONSO XIII (1886–1941). King of Spain, 1886–1931. The posthumous son of Alfonso XII, he assumed power in 1906, following the regency of his mother, and in the same year m. Princess Ena of Battenburg, granddau. of Queen Victoria. The wedding was marred by one of several attempts at assassination. Popular discontent, aided by economic depression, led to the proclamation of a republic in 1931, and A. settled in Rome, where he d.

ALFORD, Henry (1810–71). C. of E. divine and hymn-writer. He was appointed dean of Canterbury in 1857, was the 1st editor of the *Contemporary Review*, and composed many hymns, including 'Come, ye thankful people, come'.

ALFRED THE GREAT (c. 848–c. 900). English king. B. at Wantage, Berks, the youngest son of Ethelwulf, King of the West Saxons, he gained a brilliant victory over the Danes at Ashdown in 871, and succeeded his brother Ethelred after a series of defeats later in the same year. Five years of uneasy peace followed until the Danes attacked once more in 876, and in 878 A. was forced to retire to the stronghold of Athelney, whence he finally emerged to win the victory of Edington, Wilts. By the Peace of Wedmore in 878 the Danish leader Guthrum agreed to withdraw from Wessex and from Mercia W. of Watling Street. A new landing in Kent encouraged a revolt of the East Anglian Danes, which was suppressed (884–6) and after the final foreign invasion under Hasten was defeated (892–6), A. strengthened the navy to prevent fresh incursions.

In the peace that followed, A. extended and consolidated the shire system of local government, and supervised finance, the administration of justice, and the codification of the law. He also revived learning

fodder-plant. It is grown in many parts of the Old World, and extensively cultivated in the Canadian prairies.

ALFIERI (ahl'fē-ā'rē), Vittorio, count (1749–1803). Italian dramatist. B. at Asti in Piedmont, he inherited a large fortune at the age of 14, and travelled abroad 1766–72. In 1775 his tragedy *Cleopatra* was successfully performed. In 1777 he met the Countess of Albany, the separated wife of the 'Young Pretender', in Florence, following her to Rome, Colmar,

by establishing a school at his court, to which he invited scholars such as Asser of S. Wales and John the Saxon, and encouraged writing in the vernacular. He himself translated Pope Gregory's *Pastoral Care*, Orosius' *Universal History* (to which he made many additions from his own knowledge), Bede's *Ecclesiastical History*, and Boethius' *Consolation of Philosophy*, and fostered the Anglo-Saxon Chronicle. A. was buried at Winchester. See **ATHELNEY**, ISLE OF.

ALFRETON (al'ferton). English town (U.D.) in Derbyshire, the market centre for a densely populated area and traditionally founded by Alfred the Great. Pop. (1961) 22,998.

ALGAE (al'jē; Lat. seaweeds). Subdivision of plants belonging to the Thallophyta or lower plants distinguished from the more advanced classes by their simplicity of structure, in which there is no distinction of stem, root and leaf; and from the fungi, the other main division of the Thallophyta, by the presence of green colouring-matter (chlorophyll), and in the majority of cases by their aquatic habit. They show great variety of form, the lowest

ALGAE. 1, *Chondrus crispus*; 2, *Alavia esculenta*; 3, *Fucus vesiculosus*; 4, *Halidrys siliquosa*; 5, *Phyllophora rubens*; 6, *Corallina officinalis*; 7, *Himantalia loria*.

types consisting of only a single cell, while some of the higher seaweeds attain to considerable size and complexity of structure.

They are divisible into 7 groups, largely to be distinguished by their pigmentation, viz. the *Chlorophyta*, green and incl. the Chlorophyceae, the simplest forms, found mostly in fresh water or damp earth and the Charophyceae or stone-worts; *Euglenophyta*, mostly green and freshwater; *Pyrrophyta*, yellow to brown; *Chrysophyta*, yellow-green to yellow-brown, mostly freshwater; *Phaeophyta* or brown seaweeds, ranging from Ectocarpus to the kelps, *Laminaria* and its allies, the largest of all algae; *Rhodophyta* or red seaweeds, amongst the most specialized A. and mainly marine; and *Cyanophyta*, blue-green of simple cell structure, in which reproduction is never sexual, mostly freshwater or terrestrial. See **CHLORELLA** and **SEAWEED**.

ALGEBRA. That department of mathematics that deals with calculations in which quantities are designated by symbols.

In ancient times it was developed in connection with certain learned professions, such as astronomy, notably in Babylon, Egypt, and India. This knowledge was preserved by the Arabs and later transmitted to Europe. The word is derived from *Al-jabr w'almuqabalah*, the title of one of the works of Mohammed ibn Musa (c. A.D. 820). A. received its modern form in the 16th and 17th cents. in Europe. Descartes connected A. with geometry in 1637. Applications of algebra were found in preparing tables for navigation, in the design of gears for clocks, in scientific investigations, in shipbuilding, in military matters, etc. On this foundation of elementary A. mathematicians have built various types of higher

mathematics. The function of higher mathematics is to interpret and classify, to investigate what problems can be solved by what methods, and why.

ALGECIRAS (aljesër'as). Port in Spain, province of Cadiz, 6 m. W. of Gibraltar across the Bay of A. Founded by the Moors in 713, A. was taken from them by Alfonso XI of Castile in 1344; virtually destroyed in a fresh attack by the Moors, it was re-founded 1704 by Spanish refugees from Gibraltar when that place was bombarded and captured by the British. Pop. (est.) 22,000.

ALGERIA. Republic in N. Africa, cap. Algiers. *Northern A.* consists of the Atlas area, and resembles S. Europe in scenery, climate, and products. Its coast is rather inhospitable, but it has a number of ports: Algiers, Oran, Bougie, Philippeville, Mostaganem, etc. S. of the wail of mountain that borders the desert lie the vast territories of *Southern A.*, a region of stony desert and sand dunes, dotted with oases supporting a small nomadic population. The economic value of the desert has been transformed by the discovery since the S.W.W. of oil (Edjélé, Hassi Messaoud, El Gassi) and natural gas (Djebel Berga, Hassi R'Mel), and pipelines to the coast have been constructed.

Other mineral products of A. are iron, antimony, zinc, silver, phosphates, marble, coal, kaolin, and salt. Agriculture is the chief source of livelihood, products including wheat, barley, tobacco, oranges, dates, esparto grass. Sheep, goats, and other livestock are reared. Wine making is an important industry, others being distilling, flour-milling; there are factories making perfume and cement and treating tobacco. There are over 2,700 m. of railway, the road system is good, and there are a number of airfields. Area 840,000 sq. m.; pop. (1963) 10,453,000, the great majority of Arab or Berber blood and Islamic religion.

History. A. formed part of the Roman Empire, but was Islamized and subjugated by the Arabs in the 7th cent. A.D. In the 16th cent. it was overrun by the Turks, but the Sultan's rule was often nominal, and in the 18th cent. A. became a pirate state dominated by *deys*, who preyed on Mediterranean shipping. European intervention became inevitable, and in 1816 an Anglo-Dutch force bombarded Algiers. In 1830 a French army landed and seized Algiers; by 1847 the N. had been brought under control, and in 1848 was formed into the depts. of Algiers, Oran, and Constantine. Many French colonists settled in these depts. which in 1881 were made part of Metropolitan France. The mountainous region inland inhabited by the Kabyles, occupied 1850–70, and the Sahara region, subdued 1900–9, remained under military rule.

After the defeat of France in 1940, A. came under the control of the Vichy government until the Allies landed in N. Africa in 1942. Algiers was the H.Q. of the French Committee of National Liberation from 1943 until it was able to move to a liberated France as the provisional govt. Post-war hopes in France of integrating A. more closely with France were frustrated by opposition in A. from those of both French and non-French origin; and long-drawn-out fighting, violence, and terrorism among various groups did not come to an end until 1962 when A., after referendums in France and in A., was recognized by France as an independent republic. More than 15,000 French military personnel died in the struggle, as well as an uncounted number of civilians of French blood and of Moslem Algerians.

ALGIERS (aljerz'). Cap. of Algeria, N. Africa, situated on the narrow coastal plain between the Atlas mts. and the Mediterranean. Founded by the Arabs A.D. 935, A. was taken by the Turks in 1518, and by the French in 1830. The old town is dominated by the Kasbah, the palace and prison of the Turkish

rulers. The new town, constructed under French rule, is in European style. Pop. (1967) 943,000.

ALGŌ'A BAY. Broad and shallow inlet in South Africa, Cape Province, where Diaz landed after rounding the Cape in 1488.

ALGREN, Nelson (1909–). American novelist, whose books deal with the 'little' people of Chicago, the social fringe of gamblers, drug addicts and petty criminals, e.g. *A Walk on the Wild Side* (1956) and *The Man with the Golden Arm* (1949).

ALHA'MBRA. Fortified palace at Granada, Spain, built by Moorish kings mainly between 1248 and 1354. It stands on a rocky hill and remains the finest example of Moorish architecture.

ALI (ah'le) (c. 600–61). 4th Caliph. B. at Mecca, he was the son of Abu Talib, uncle to Mohammed, who gave him his dau. Fatima in marriage. On Mohammed's death in 632, A. had a claim to succeed him, but this was not conceded until 656. After a stormy reign, he was assassinated. Around A.'s name has raged the controversy of the Sunnites and the Shiites, the former denying his right to the caliphate and the latter supporting it.

ALI (Ali Pasha) (1741–1822). Turkish statesman, known as Arslan (the lion). An Albanian, he was appointed pasha of Janina in 1788, and there he maintained a semi-barbarous court, visited by Byron. He was murdered by the Sultan's order.

ALI, Muhammad (1942–). Name adopted by American Negro boxer Cassius Marcellus Clay on joining the Black Muslim movement. He became world heavyweight champion 1964, but in 1967 resisted drafting under the Selective Service System and was prevented from defence of his title.

ALIBI (al'ibi; Lat., elsewhere). In law, a defence to a charge of crime that the person accused was, at the time the crime was committed, at some place other than the scene of the crime and so could not be guilty of it.

ALICANTE (ahlēkan'teh). Leading seaport of Spain on the S.E. coast, 46 m. N.E. of Murcia, and cap. of the prov. of A. Pop. (1960) 122,200.

ALICE SPRINGS. Australian town, originally a telegraph station, in Northern Terr., on Todd r., at 2,000 ft. a.s.l. Terminus of the railway from Adelaide, cap. of S. Australia, it was named after the wife of Sir Charles Todd who directed the construction of the S.–N. transcontinental telegraph line. A strategic highway, completed 1941 along an old trail, connects A.S. with Birdum, terminus of the railway from Darwin. A.S. is a tourist centre, only town in an area producing livestock and opals, and H.Q. of the 'flying doctor' service. Pop. (1961) 4,668.

ALICE SPRINGS. Founded in 1860, almost in the centre of the continent, this remote cattle and mining town is backed by rugged mountain ranges. The scale of the cattle holdings in the surrounding country is vast – the Victoria River Downs station is 5,495 sq. m. in extent.

Courtesy of Australia News and Information Bureau.

WASHINGTON ALLSTON. Imaginatively beautiful scenes such as this 'Moonlit Landscape' in the Museum of Fine Arts at Boston are typical of America's earliest romantic painter, who greatly influenced his generation.

ALIEN. Person owing allegiance to a foreign state. Under the British Nationality Act of 1948 anyone unrecognized as a British subject in any part of the Commonwealth. As. may enter the U.K. only by leave of an immigration officer, but may acquire British citizenship by naturalization: from 1949 women marrying As. lose British citizenship only if they renounce it formally, and alien women marrying British subjects may apply for registration as such themselves but do not acquire citizenship automatically. Since 1960 As. need not register with the police except in certain circumstances. Citizens of the Rep. of Ireland have reciprocal citizenship rights, and are not regarded as As. within the Commonwealth.

In the U.S. all As. are subject on arrival to scrutiny by the Immigration and Naturalization Service and for permanent residence must have an immigrant visa from a U.S. consul located abroad. American women marrying As. only lose their citizenship if they formally renounce it. Certain classes are excluded, e.g. the insane, narcotic drug addicts, and members of organisations listed under the Subversive Activities Act of 1950. Until 1968, when a pool was substituted, As. were not allowed to enter in excess of a normal quota specified for each foreign country.

ALIGARH (ahlēgahr'). City of Uttar Pradesh, India. The Moslem Univ. here, constituted in 1920, was opened to non-Muslims in 1956. Pop. (1961) 183,753.

ALIMONY. In law, a money allowance which a court may order a husband to pay for the support of his wife during the marriage. In Britain, permanent A. ordered after a decree of judicial separation, is usually about a third of the joint incomes of husband and wife. Guilty women often get nothing.

ALIPHATIC (alifa'tik) **COMPOUNDS.** Chemical term for a group of organic substances of which the most typical are fats. They also include carbohydrates (starch, sugar, etc.), alcohols, and paraffins.

AL ITTIHAD. Town a few m. inland from Aden, founded in 1959 as the cap. of the Federation of South Arabia. In 1967 it became, as Madinet al-Shaab, the cap. of Southern Yemen.

ALKALI. In chemistry a base that is soluble in water. As. neutralize acids, turn red litmus to blue, and are soapy to the touch. The word comes from the Arabic *al-qaliy*, 'ashes', since soda and potash were derived from the ashes of plants. The hydroxides of metals are As., those of sodium (caustic soda) and of

potassium (caustic potash) being chemically powerful.

ALKALOIDS. Physiologically active and frequently poisonous substances contained in certain plants. The As. or vegetable As. are usually bases, i.e. they form salts with acids and, when soluble, give alkaline solutions. But substances are included in the group rather by custom than by scientific rules. Examples of As. are morphine and cocaine, quinine, strychnine, nicotine, and atropine.

ALKEN, Henry Thomas (1784–1851). British sporting artist. Fox-hunting and steeplechasing were the subjects that most frequently occupied him, but the whole range of field sports was covered in his *National Sports of Great Britain* (1821).

ALKMAAR (ahlkmahr'). Town in N. Holland, 20 m. N.N.W. of Amsterdam, on the North Holland canal. It is a centre for cheese export. Pop. (1967) 49,451.

AL'LAH (Arabic *al, the; ilāh, God*). The name given to the One True God by the Mohammedans.

ALLAHABAD. Indian city, in the state of Uttar Pradesh, at the junction of the Ganges and Jumna. A univ. town, it is a centre of culture, commerce, and communication. In the grounds of the fort is one of the surviving pillars bearing an edict of Asoka (d. c. 228 B.C.). Remains of a palace built by Akbar are nearby. A. is regarded as a Holy City by Hindus, and is the scene of yearly pilgrimages. Pop. (1961) 431,007.

ALLAN, David (1744–96). Scottish historical painter. He studied in Rome and, after a period in London, he became in 1786 director of the Academy of Arts in Edinburgh. A vein of humour appears in his 'Scotch Wedding', etc.

ALLAN, Sir William (1782–1850). Scottish historical painter, b. at Edinburgh. He spent several years in Russia and neighbouring countries, returned to Edinburgh in 1814, was elected R.A. in 1835, President of the Royal Scottish Academy in 1838, and was knighted in 1842. His paintings include scenes from the Waverley novels.

ALLBUTT, Sir Thomas Clifford (1836–1925). British physician, inventor of the short clinical thermometer. He specialized in nervous pathology, and was Regius prof. of physic at Cambridge from 1892.

ALLEGHENY MOUNTAINS. Range more than 500 m. long extending from Pennsylvania to Virginia, rising to more than 4,800 ft. with an average elevation of 2,500 ft. In places very beautiful, but wild and difficult, they proved for many years an effective barrier to western migration, the first settlement to the W. being Marietta in 1788.

ALLEGIANCE. The duty of obedience owed by a subject to a Sovereign, who in return gives protection. An *Oath of A.* must be taken by aliens on naturalization, by M.P.s, by certain ministers of the Crown, etc. Aliens becoming U.S. citizens swear A. to the 'Constitution and laws of the U.S.A.'

ALLEGORY. Figure of speech; the description or illustration of one thing in terms of another, it is equivalent to an extended metaphor or parable, and it makes use of obviously fictitious figures. A well-known A. is Bunyan's *Pilgrim's Progress*.

ALLEGRI (ahlleh'grē), **Gregorio** (1582–1652). Italian composer. B. at Rome, he became a priest, and entered the Sistine chapel choir in 1629. His *Miserere* for 9 voices was treasured at the Sistine.

ALLEN, Hervey (1889–1949). American novelist, best known for his mammoth historical novel *Anthony Adverse* (1933) set in the Napoleonic era. He was a high school teacher at Charleston, S.C., and later lectured at Columbia Univ., and included among his other works vols. of poetry and *Israfel* (1926), a biography of Poe.

ALLEN, William (1532–94). English cardinal. Principal of St. Mary's Hall, Oxford, under Queen

Mary, he refused to take the oath of supremacy on the accession of Elizabeth. In 1568 he founded a theological seminary at Douai, and moved it in 1578 to Rheims, where his followers commenced the Douai version of the Eng. Bible. On being made a cardinal in 1587, he encouraged the Eng. Catholics to rise against Elizabeth, but after the failure of the Armada his influence diminished.

ALLEN. Lough or lake in Co. Leitrim, Rep. of Ireland, on the upper course of the Shannon. It is 7 m. long and 3 m. broad.

ALLEN, Bog of. Morasses E. of the Shannon in Rep. of Ireland, comprising about 240,000 acres of Offaly, Leix, and Kildare.

ALLENBY, Sir Edmund Henry Hynman, 1st visct. A. (1861–1936). British field marshal. He saw much service in S. Africa, and in the F.W.W. was with the B.E.F. in France before taking command in 1917–9 of the British Forces in the Near East. He proceeded to crush the Turks in Palestine, the crowning victory being at Megiddo in Sept. 1918, which was followed almost at once by the capitulation of Turkey. He was created a visct. and promoted to field marshal, and in 1919–25 was British High Commissioner in Egypt.

ALLENSTEIN (ah'l'en'stín). Town in former E. Prussia, placed under Polish admin. 1945, 60 m. S. of Kaliningrad. It was H.Q. of the Grand Master of the Teutonic Knights from medieval times to 1945. Polish form of the name is Olsztyn.

ALLERGY. A special sensitiveness of the body which makes it react abnormally to the introduction of a foreign substance, proteins (organic substances containing nitrogen). The person subject to hay-fever in summer is allergic to one or more kinds of pollen. Many asthmatics are allergic to certain kinds of dust; some cannot sleep on a feather pillow or go near a horse. Others come out in nettle-rash, or are violently sick if they eat shellfish or egg.

ALLEYN (al'en), Edward (1566–1626). English actor. B. in London, the son of an innkeeper, he joined the earl of Worcester's players, was associated with Philip Henslowe, and became proprietor of several playhouses. He founded Dulwich College.

ALLIER (ah'lyeh?). River in central France, tributary of the Loire; it is 350 m. long, and gives its name to a dept. Vichy is the chief town on it.

A'LLIGATOR. Genus of reptiles, of which there are 2 species – *A. mississippiensis* in the southern states of U.S.A., and *A. sinensis* of the Yangtze-Kiang in China. The former grows to 12 ft. but the latter is smaller. The genus *Caiman* of Central and South America is closely allied.

As. closely resemble crocodiles in their general habits, swimming well with the assistance of lashing movements of the tail, and feeding on fish and mammals, though seldom attacking man. The eggs are laid in sand. The skin is of value for fancy leather, and A. farms have been established in U.S.A.

ALLINGHAM (al'-), Margery Louise (1904–66). British writer of detective fiction, e.g. *Death of a Ghost*, *Flowers for the Judge*, *The Case of the Late Pig*, and *More Work for the Undertaker*.

ALLIUM. Genus of plants belonging to the Lily family (Liliaceae). They are usually acrid in their properties, but form bulbs in which sugar is stored. Cultivated species incl. onion, garlic, chives, leek, etc.

ALLOA (al'ôa). Co. town (burgh) of Clackmannanshire, Scotland, on the Forth. Industries include

brewing and whisky-distilling, and the manufacture of agricultural implements. Pop. (1961) 13,895.

ALLOPATHY. The treatment of disease of one kind by exciting a disease process of another kind or in another part; commonly used as a name for orthodox medicine, in distinction from homeopathy (q.v.), which means treatment with minute doses of drugs which induce the same ailment.

ALLOY. A blending together of a metal with one or more metallic (or non-metallic) substances. Some As. have been known to mankind for many thousands of years, e.g. bronze. Most are made by liquefying one metal (usually that with the higher melting point) and adding the others, usually in solid form. As. may be several times stronger than any of the metals used in their manufacture, have generally lower melting points than some of their constituents. Duralumin As. were specially developed for strength and resistance to corrosion, copper with a small proportion of beryllium for toughness, and combinations of iron, nickel, titanium, manganese for a wide range of permanent and non-permanent magnets.

ALL SAINTS' DAY. 1 Nov. Also known as All-Hallows or Hallowmass. The festival for all saints and martyrs, for whom the Church calendar does not provide a separate day.

ALL SOULS' DAY. Festival in the Catholic Church, held on 2 Nov., following All Saints' Day. It was instituted in 993, and its observation is based on the doctrine of the Communion of Saints and the belief that the faithful on earth are able, by prayers and self-denial, to hasten the deliverance of souls expiating their sins in purgatory.

ALLSPICE. Spice prepared from the dried berries of the A. tree or pimento (*Eugenia pimenta*), cultivated chiefly in Jamaica.

ALLSTON, Washington (1779–1843). American artist and writer; he painted chiefly religious subjects, and for the richness of his colours was called 'the American Titian'.

ALMA. River in Ukraine S.S.R. flowing across the S.W. of the Crimean peninsula; it gives its name to a battle fought on 20 Sept. 1854, when the Russians were defeated by the Franco-British armies.

ALMA ATA (ah'ta). Cap. of Kazakh S.S.R., U.S.S.R., at the foot of the Ala-Tau mts. It is an industrial centre with a univ. and a link in the Turkistan-Siberian railway. Pop. (1959) 455,000.

ALMADÉN. Span. town in Ciudad Real province, noted for deposits of quicksilver. Pop. c. 12,500.

ALMA MATER (mah'ter; Lat., bounteous mother). Title given by the Romans to the goddess Ceres, and now applied to universities and schools, which are considered as the 'foster-mothers' of their pupils.

ALMANSA (ahlmahn'zah). Spanish town in Albacete, about 50 m. N.W. of Alicante, where on 25 April 1707 British and allied forces were defeated by the French under the Duke of Berwick. Pop. c. 14,500.

ALMA-TADEMA (ah'lma-tah'dema), Sir Laurence (1836–1912). Anglo-Dutch painter. B. at Dronrijp, Holland, he settled in England in 1873. Some of his best-known paintings depict scenes from Greek and Roman life. He was knighted in 1899.

ALMEDI'NGEN, 'E(dith) M(artha) (1898–). British author. Great-great-granddaughter of Peter Khlebnikov, a Moscow seed and corn merchant who was ennobled by Catherine the Great for his services to literature, she can also trace her descent through an English grandmother from Edmund Spenser and Robert Southey. She was b. in St. Petersburg, but settled in England in 1923. Besides poetry and novels, she is noted for the living authenticity of her portrayal of Russian history in such biographies as *The Empress Alexandra* and *Catherine the Great*.

ALMEIDA (ahlmá'edah), Francisco de (c. 1450–1510). 1st viceroy of Portuguese India 1505–8. He

was killed in a skirmish with the Hottentots at Table Bay, S. Africa, and was buried where Cape Town now stands.

ALMERÍA (ahlmā-rē'ah). Spanish city, chief town of a prov. of the same name on the Mediterranean. The prov. is famous for its white grapes and in the Sierra Nevada are rich mineral deposits. Pop. (1960) 86,808.

ALMOND. Fruit of the A. tree (*Prunus amygdalus*), which is closely related to the peach and the apricot. Originally a native of N. Africa and the Near East, it has for a long time been introduced into Europe, and its fruit will ripen in southern England.

ALPS. The ascent of the Matterhorn by Whymper's party in 1865 was a landmark in mountaineering, but four of the seven members of the team were killed on the descent. Seen here from the Mettelhorn, on the Swiss side, the mountain appears an isolated peak, but actually forms the end of a ridge.

Courtesy of the Swiss National Tourist Office.

ALMQVIST (ahlm'kvist), Karl Jonas Ludvig (1793–1866). Swedish writer. B. at Stockholm, he won fame by a series of novels, *The Book of the Thorn Tree* (1832–5) and wrote lyrics, dramas, novels, and philosophic studies.

ALOE (al'ō). Genus of African plants of the family Liliaceae, distinguished by their long fleshy leaves. From the juice of the leaves of several species is prepared the drug aloes, a powerful cathartic.

ALOST (ah'lōst). Town in East Flanders, Belgium, on the Dender. The chief industry is linen bleaching. Pop. (1966) 45,900.

ALOYSIUS (alō-is'i-us), St. (1568–91). Patron saint of youth. B. Luigi Gonzaga at Castiglione in N. Italy, he joined the Jesuits at Rome, and d. while nursing victims of the plague. He was canonized in 1726.

ALPA'CA. S. American mammal, a domesticated variety of the guanaco (*Llama huanaco*), found in Chile, Peru, and Bolivia, and herded at high elevations in the Andes. Its flesh is eaten, but it is mainly valued for its wool.

ALPHA and **ΩMEGA** (A and Ω). The first and last letters of the Greek alphabet; hence the beginning and the ending, or the sum total of anything.

ALPHA (al'fa) **PARTICLE.** Positively charged particle ejected with very great velocity from a nucleus. It is one of the products of the spontaneous disintegration of radioactive substances such as radium and thorium and is identical with the nucleus of a helium atom, i.e. it consists of 2 protons and 2 neutrons.

ALPHABET (from *alpha* and *beta*, the first two Greek letters). A set of conventional symbols called letters, each denoting a given sound or sounds. It represents the last stage in the long history of writing (q.v.).

Attempts have been made to trace the A. to the cuneiform of Sumer, Babylon, and Assyria; the

syllabic writing of Cyprus; and the Hittite hieroglyphics, etc. However, the many attempts at alphabetic systems discovered in the area of Palestine and Syria make it certain that this was the cradle of our A.

HISTORICAL EVOLUTION. The *South Semitic A.* either like the *North Semitic* a descendant of a Proto-Semitic A., or derived from the N. Semitic A. itself, has produced only one modern offshoot, the Amharic script of Ethiopia.

The *North Semitic A.*, however, in use from the 13th cent. B.C. and consisting of 22 letters which, at first, expressed only consonants, developed into all the main alphabetic scripts of today. See **UGARIT**. The principal branches are:

(i) The *Early Hebrew A.* (11th–5th cents. B.C.), with the Moabite and Ammonite As. as its closest relations;

(ii) the *Phoenician A.*, employed in Phoenicia (4th–2nd cents. B.C.), Cyprus, and the Carthaginian dependencies; its offshoots are the Numidian, original of the mod. Tifinagh script of the Tuaregs, and the Iberian As.;

(iii) the *Aramaic A.*, first known from the 9th–7th cents. B.C., producing numerous eastern As., such as the Nabataean, Arabic, Square Hebrew, Palmyrene, Syriac (with its chief variant Estrangelo), Mandaean, Manichaean As. It also fathered the As. of many non-Semitic languages of Central, S., and S.E. Asia, including the Pehlevi, Sogdian, Mongolian (written downwards), Armenian (c. A.D. 400), Brahmi (parent of the c. 200 Indian As. and offshoots all over the Far East) and others;

(iv) the *Classical As.* of which (a) the *Greek A.* was adopted from Semitic sources about the 9th cent. B.C.; from the Gk. derived local As. of Asia Minor, the Coptic (1st or 2nd cent. A.D.), Etruscan (9th cent. B.C.), and Italic (Umbrian, Oscan, and Faliscan from Etruscan; Messapian direct from Gk.) As. (b) the *Latin A.*, created in the 7th cent. B.C. from 21 letters of the Early Etruscan A., changing some of their values and adding the two last letters of the Gk. A. Medieval additions were J, U and W.

From the Gk. uncial script derive the Gothic A. (4th cent. A.D., with Lat. additions), and the Cyrillic A., which is the parent of the Russian, Bulgarian, Serbian, Ukrainian, Early Rumanian, Sirtyen (Finns of N. Russia), and Ossetic (Caucasus) As. From the Gk. cursive descend the Glagolitic A., now used for liturgical purposes, and local Albanian scripts. The Runic As. (Common Teutonic, Anglo-Saxon, Scandinavian) show peculiarities of Lat. and N. Etruscan descent, and the cryptic Ogham script of S. Ireland and Wales (5th–6th cents. A.D.), is based on the Runes. The Latin A. through the European peoples became the script of the greater part of the world, and was adapted to many different languages, e.g. English, French, Italian, German, Spanish, Polish, Czech, Croatian, Hungarian, Finnish, Turkish, etc.

ALPHEGE (al'fej), St. (954–1012). Anglo-Saxon churchman, bishop of Winchester from 984, archbishop of Canterbury from 1006. When the Danes attacked Canterbury he tried to protect the city, was thrown into prison, and, refusing to deliver the treasures of his cathedral, was stoned and beheaded at Greenwich on 19 April, his feast-day.

ALPS. The mountain-chain which forms the northern barrier to Italy and extends in the form of a crescent from the Mediterranean on the W. to the Adriatic on the E.: 3 depts. of France (Alpes-Maritimes, Basses-Alpes, Hautes-Alpes) take their name from these mts. Among the most famous peaks are Mont Blanc (15,781 ft.), the Matterhorn (14,782 ft.), Monte Rosa (Dufourspitze, 15,217 ft.), Finsteraarhorn (14,026 ft.), and the Eiger (13,000 ft.), remarkable for its almost vertical rock wall (7,730 ft.) on the north face, first scaled in 1938. (See **HEINRICH HARRER**.)

Many of the streams and rivers have been harnessed to provide electricity for small iron and textile industries, railways and lighting. 'The Alps' is used by the alpine people to describe the high summer pastures which are of immense importance for agriculture. Cattle are grazed on the lower parts in June, gradually working upwards as summer advances. The economic conditions of the Alpine peoples have been revolutionized in the last two cents., mainly owing to tourist and winter sports traffic. The chief sports resorts and spas incl. St. Moritz, Davos, Baden, and Tarasp-Schuls-Vulpera in Switzerland, Garmisch-Partenkirchen in Bavaria and Kitzbuhel in Austria. The A. are pierced by rail and road tunnels (Mont Blanc, Gt. St. Bernard, San Bernadino, and the projected St. Gotthard).

ALSACE-LORRAINE (ahlzahs'-lorān). Alsace and Lorraine were 2 ancient provs. of N.E. France. Bismarck introduced the term Elsass-Lothringen (Ger. for Alsace-Lorraine) in 1871 for the territory annexed by Germany, i.e. Alsace, and the N.E. part of Lorraine, an area of 5,605 sq. m., and comprising the present French depts. of Moselle, Bas-Rhin, and Haut-Rhin. Lorraine, rich in coal and iron, is highly industrialized; Alsace produces textiles and is agriculturally important.

Forming part of Celtic Gaul in Caesar's time, the provinces were invaded by the Alemanni and other Germanic tribes in the 4th cent., remaining part of the German Empire till the 17th cent. In 1648, part of the territory was ceded to France; in 1681, Louis XIV seized Strasbourg. The few remaining districts were seized by the French after the Revolution, but A.-L. was conquered by the Germans 1870-1, and declared 'Imperial Territory' (*Reichsland*). France did not regain possession of A.-L. until 1919. In 1940 the country was again annexed by the Germans until liberated in 1944 by the Allied armies.

ALSÁTIA. The old name for Alsace. In 17th cent.

ALTDORFER. Thought to be the earliest European landscape painting - c. 1518-20 - 'Landscape with a Footbridge' was acquired by the National Gallery in 1963. The only other purely landscape picture by this artist is in the Alte Pinakothek, Munich. Photo: Courtesy of the National Gallery.

London this name was given to the district of Whitefriars between Fleet St. and the Thames. It afforded sanctuary to debtors and other lawless characters, a privilege derived from the convent of Carmelites, estab. there in 1241. In 1697 this privilege was withdrawn.

ALSATIAN. Breed of dog introduced from Germany into Britain as the Alsatian Wolfdog after the F.W.W. It has a wolf-like appearance, a beautiful coat with many varieties of colouring, and distinctive gait. As war dogs and as guide dogs for the blind, the tractability of the breed has been recognized.

ALTAI (ahl'ti') MTS. Mountain system of W. Siberia and Mongolia. It is divided into 2 parts, the Russian A., which includes the highest peak, Mount Belukha (15,157 ft.), and the Mongolian or Great A. A territory of the R.S.F.S.R. takes its name from the range.

ALTAMIRA (ahl'tahmē'rah). Cave near the Spanish village of Santillana del Mar in Santander prov. where in 1879 remarkable palaeolithic wall-paintings were discovered.

ALTAMURA (ahl'tahmōō'rah). Town of Apulia, S. Italy, 25 m. S.S.W. of Bari. It has a Romanesque cathedral built in 1232. Pop. (1951) 39,970.

ALTDORF (ahl't'dorf). Mountain-encircled cap. of the Swiss canton Uri at the head of Lake Lucerne. It is the scene of the legendary exploits of William Tell. Pop. (1950) 6,583.

ALTDORFER, Albrecht (c. 1480-1538). German artist. Probably the 1st European painter of a finished picture excluding the human figure, his work breaks with the medieval tradition of 'story-telling'. Few of his pictures survive. He was b. at Regensburg, where he worked as an architect.

ALTENBERG, Peter. Pseudonym of the Austrian poet Richard Engländer (1859-1919). He was the typical representative of Viennese Bohemianism, and pub. many collections of sketches, such as *Wie ich es sehe* (1896).

ALTERNATING CURRENT. Electric current which flows for an interval of time in one direction and then in the opposite direction, i.e. a current which flows in alternately reversed directions through or round a circuit. A.C. power is the usual form in which electric energy is generated in a power station, and A.Cs. may be used for both power and lighting. The value of A.C. over direct current (as from a battery) is that its voltage can be raised or lowered economically by a transformer, high voltage for generation and transmission, and low voltage for utilization and safety, e.g. railways, factories, and domestic appliances.

ALTGELD, John Peter (1847-1902). American political and social reformer. B. in Prussia, he was taken in infancy to U.S.A. During the Civil War he served in the Union Army. He was a judge of the supreme court in Chicago 1886-91, and as Governor of Illinois 1893-7 was champion of the worker against the government-backed power of Big Business.

ALTHING. The parliament of Iceland, created c. 930, the oldest parliamentary assembly in the world.

ALTMARK INCIDENT (1940). The *Altmark*, a German auxiliary cruiser, was intercepted on 15 Feb. 1940, by H.M. destroyer *Intrepid* off the coast of Norway. She was carrying the captured crews of Allied merchantmen sunk by the German battleship *Admiral Graf Spee* in the S. Atlantic, and took refuge in Jösing fjord. There she was cornered by H.M.S. *Cossack*, under Capt. Vian, and ran aground. Vian's men released 299 British sailors.

ALTRINCHAM. Town (bor.) of Cheshire, 8 m. S.W. of Manchester. Its first charter dates from 1290. Pop. (1961) 41,104.

ALUM. A white crystalline powder readily soluble in water. It is a double sulphate of potassium and aluminium. Its chemical formula is $K_2SO_4 \cdot Al_2(SO_4)_3 \cdot 24H_2O$, and it is the commonest member of a group of double sulphates called As., all of which have

similar formulae, the same crystalline form, and the same number of molecules of water of crystallization.

ALUMINA (Al_2O_3). Oxide of aluminium which occurs widely distributed over the surface of the earth in clays, slaty rocks, and shales. It is formed by the decomposition of the feldspars in granite. Typically it is a white powder, soluble in most strong acids or caustic alkalis, but not in water, and is used extensively in the manufacture of clay articles such as pipes and of various paints.

ALUMINIUM. The most abundant metal, valuable for its light weight, having at. no. 13, at. wt. 26.98, and chemical symbol Al. Nearly one-twelfth of the substance of the earth's crust is composed of A. compounds, but A. in its pure state was not readily obtained until the middle of the 19th cent., for it oxidizes rapidly, and much energy is needed to separate the metal from chemical combination. Pure A. is a soft white metal. It is one of the lightest of metals, its specific gravity being 2.70, and for this reason is widely used in shipbuilding and aircraft. In the pure state it is a weak metal, but when alloyed with other elements such as copper, silicon, or magnesium, alloys of great strength are obtained. Commercially, A. is obtained from bauxite (q.v.) and requires large supplies of electric power, as at Kitimat in Western Canada. A. is much used in steel-cored aluminium overhead cables and for canning uranium slugs for reactors. A. is an essential constituent in the Alcomax series of magnetic materials; and as a good conductor of electricity is used in the form of foil in electrical capacitors. In the U.S.A. the original name suggested by Sir Humphry Davy ALUMINUM (alōō'-) is retained.

ALVA, or **ALBA**, Ferdinand Alvarez de Toledo, duke of (1508-82). Spanish statesman and general. He commanded the Spanish armies of Charles V and Philip II, and in 1567 was appointed Governor of the Netherlands, where he set up a reign of terror to suppress the revolt against the Spanish tyranny and the Inquisition. In 1573 he retired, and returned to Spain.

ALVARADO, Pedro de (c. 1485-1541). Spanish conquistador. In 1519 he accompanied Hernando Cortez, and distinguished himself in the conquest of Mexico. In 1523-4, he conquered Guatemala.

ALVAREZ (ahl'vahreth), Don Jos (1768-1827). Spanish sculptor. His works incl. groups and portrait busts (Ferdinand VII and Rossini).

ALVAREZ, Luis Walter (1911-). American physicist. Ed. at the Univ. of Chicago, he became prof. of physics at the Univ. of California in 1945, being also Assoc. Director of the Lawrence Radiation Laboratory 1954-9, he headed the research team which in 1959 discovered the Xi-zero atomic particle. He was awarded a Nobel prize in 1968.

ALWAR (ul'war). City in Rajasthan, India, chief town of the district (formerly princely state) of the same name. It has fine palaces, temples and tombs. Pop. (1961) 72,724.

ALWYN, William (1905-). British composer. Prof. of composition at the R.A.M. 1926-55, he is well known as a writer of film music (*Desert Victory*, *The Way Ahead*), and has also composed symphonies and chamber music.

AMADEUS (1845-90). King of Spain. As duke of Aosta, the 2nd son of Victor Emmanuel of Italy, he was elected to the Spanish throne in 1870, but had to abdicate in 1873, and returned to Italy.

A'MALEKITES. Ancient Semitic tribe of S.W. Palestine and the Sinai peninsula. According to Exodus xvii they harried the rear of the Israelites after their crossing of the Red Sea, were defeated by Saul and David, and finally crushed in the reign of Hezekiah.

AMALFI. Port of Italy at the foot of Monte Cerrato, on the Gulf of Salerno, 24 m. S.E. of Naples. For 7 cents. it was an independent republic. It is an

ancient archiepiscopal see, and has a fine Romanesque cathedral. Pop. (1951) 6,117.

AMALIA, Anna (1739-1807). Duchess of Saxe-Weimar-Eisenach. As widow of Duke Ernest, from 1758 until her son Karl August succeeded her in 1775, she reigned with admirable prudence and skill, making the court of Weimar a literary centre of Germany. She was a friend of Wieland, Goethe, and Herder.

AMANI'TA. Genus of fungi, closely allied to *Agaricus* (q.v.) and often treated merely as a sub-genus. It is distinguished by having a ring, or *volva*, round the stem, and warty patches on the cap, and by the clear white colour of the gills. Many of the species are brightly coloured and highly poisonous. Fly agaric (*A. muscaria*), with bright red cap and white warty patches, is dangerous, and the Death's Cap (*A. phalloides*) is deadly: both are found in Britain.

AMANULLAH KHAN (1892-1960). Emir of Afghanistan, 3rd son of Habibullah Khan. On his father's assassination in 1919 he seized the throne and concluded a treaty with the British, but his policy of westernization led to rebellion in 1928. A. had to flee, abdicated in 1929, and settled in Rome.

AMARNA TABLETS. Collection of clay tablets with cuneiform inscriptions, found in the ruins at Tell el Amarna (the ancient Akhetaton), about 190 m. S. of Cairo on the E. bank of the Nile. The majority of the tablets, which comprise royal archives and letters of 1411-1375 B.C., are in the British Museum. They possibly represent the 'waste-paper basket' of officials who discarded inessential documents when the city was abandoned.

AMARYLLIDACEAE (amarilidă'sē-ē). Family of monocotyledonous flowering plants allied to the Liliaceae, but distinguished by the ovary being inferior. Its European species include the narcissus, daffodil, and snowdrop.

AMA'TERA'SU. In Japanese mythology, the sun-goddess, grandmother of Jimmu Tenno, first ruler of Japan, from whom the emperor claimed to be descended.

AMATI (ahmah'tē). Italian family of violin-makers, fl. in Cremona, c. 1550-1692.

A'MATOL. An explosive consisting of ammonium nitrate (A/N) and T.N.T. in almost any proportions.

A'MAZON. South American river. The largest river in the world as regards volume, and the third longest; its main head-streams, the Marañon and the Ucayali, rise in Central Peru and unite to flow eastward across Brazil for some 2,500 m. The total network is 30,000 m. of navigable waterways, draining an area of 2½ million sq. m., nearly half of the S. American land-mass. The A. reaches the Atlantic on the Equator, its estuary is 50 m. wide and discharges a volume of water so immense that 40 m. out to sea fresh water remains at the surface. The name A. is probably derived from Indian *Amossón*, 'destroyer of boats'. Navigation is difficult, owing to floods, rapids, and tidal waves.

A'MAZONS. Legendary nation of female warriors, whom the ancients believed lived in Pontus, near the Black Sea. They were governed by a queen, made warlike excursions into the adjoining lands, and cut off their right breasts so as to be able to use the bow.

ALUMINIUM. A crucible of molten metal. Courtesy of Aluminium Co. of Canada, Ltd.

AMBA ALAGI (alah'gē). Mt. in Ethiopia, 10,000 ft., 80 m. N. of Magdala. During the S.W.W. this was the last stronghold of Italian resistance in East Africa, the Duke of Aosta and his forces formally surrendering on 16 May 1941.

AMBALA. Other form of **UMBALLA**.

AMBASSADOR. Officer of the highest rank in the diplomatic service, who represents the head of one Sovereign State at the court or cap. of another. As personal representatives of the Heads of their States, they enjoy many privileges and powers, which extend also to their families and households.

A'MBEDKAR, Bhimrao Ramji (1893–1956). Indian champion of the Depressed Classes. Himself an Untouchable, the son of a soldier, he studied in Britain and the U.S.A., and was called to the English Bar in 1923. On the attainment of Indian independence, he was Law Minister 1947–51, resigning because he felt that later developments had not sufficiently safeguarded the full rights of his people. In 1948 he m. a Brahmin. Just before his death he and many of his followers embraced Buddhism.

AMBER. Fossilized gum which exuded from coniferous trees of Middle Tertiary age. A light substance, usually yellow or brown in colour, it is found chiefly on coasts such as the Baltic and in Sicily, having been washed up by the sea. It is mined in E. Prussia. Amber has been used as an ornament since prehistoric times.

AMBERGRIS (-grēs). Fatty substance, resembling wax, found in the stomach and intestines of the sperm whale, and used in perfumery as a fixative. Basically intestinal matter, A. is not the result of disease, but probably the pathological product of an otherwise normal intestine.

AMBLER, Eric (1909–). British novelist. B. in London, he makes brilliant use of Balkan/Levant settings in the thrillers *The Mask of Dimitrios* (1939) and *Journey into Fear* (1940).

AMBOINA. Small island in the Moluccas, Republic of Indonesia. The town of A., formerly an historic centre of Dutch influence, has shipyards. Pop. c. 51,000.

AMBON. Other form of **AMBOINA**.

A'MBROSE, St. (c. 340–397). A Father of the Christian Church. B. at Trèves, in S. Gaul, the son of a Roman prefect, A. became governor of N. Italy. In 374 he was chosen bishop of Milan, although he was not yet a member of the Christian Church. But he was baptized forthwith, and was consecrated as bishop 8 days later, on 7 Dec. (St. Ambrose's day). His writings on theological subjects earned him a prominent place among the Latin fathers of the Church; he also wrote many hymns, and devised the arrangement of church music known as the *Ambrosian Chant*.

AMBRŌ'SIA. In Greek mythology, the food of the gods (from the Gk. *ambrotos*, 'immortal'), which was said to confer immortality upon all who ate it.

AMEN. Hebrew word signifying affirmation ('so be it'), commonly used at the close of a prayer or hymn. As used by Jesus Christ in the N.T. it is usually translated 'verily'.

AMENHŌ'TEP III. Pharaoh of Egypt, c. 1400 B.C. He erected many famous buildings, especially the great monuments at Thebes. His 2 portrait-statues were known to the Greeks as the Colossi of Memnon.

AMERICA. The western hemisphere of the globe, containing the continents of N. America and S. America, with Cent. America in between. This great land-mass extends from the Arctic to the Antarctic, from beyond 75° N. lat. to past 55° S. lat. The area is nearly 16 million sq. m.; and the U.N. est. the pop. in 1960 at some 405 million.

The name A. is derived from Amerigo Vespucci, the Florentine navigator who was falsely supposed to have been the first to discover the American mainland in 1497.

AMERICAN CIVIL WAR. See UNITED STATES OF AMERICA.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS (AFL-CIO). Federation of trade unions in U.S.A. The A.F.L. was founded at Pittsburgh in 1881 by Samuel Gompers, pres. till his death in 1924; pres. 1924–52 William Green; and from 1952 George Meany. Its general outlook is conservative and non-political. In 1935 several unions, objecting to its policy of catering only for craft unions of skilled workers, broke away to form the C.I.O. on a basis of industrial unionism. A merger re-united them in 1955, George Meany remaining pres.: membership c. 15½ million.

AMERICAN INDEPENDENCE, WAR OF (1775–83). The revolt of the British colonies in N. America, which resulted in the establishment of the U.S.A. The struggle originated in the resentment of the colonists against such measures as the Navigation Acts, which subordinated American to British commercial and industrial interests. When the British government imposed a stamp tax (1765) and later a tea tax on the colonists, they were bitterly opposed, and measures of repression provoked the colonists to arm. The first shots were fired at Lexington (19 April 1775), where troops sent to seize illegal military stores were attacked by the local militia, and the first battle fought at Bunker Hill, near Charlestown (17 June). Soon after, the Continental Congress appointed George Washington to command its ill-armed and undisciplined forces, and on 4 July 1776 it issued the Declaration of Independence.

An American assault on Quebec (Dec. 1775) was bloodily repulsed. Washington occupied Boston and later New York, but after his defeat at Long Island (27 Aug. 1776), had to retire to Pennsylvania, although he won 2 successes at Trenton (26 Dec.) and Princeton (3 Jan. 1777). The British government planned a junction between Sir William Howe, advancing from New York, and General Burgoyne from Canada; Howe was not given precise instructions, however, and Burgoyne was compelled to surrender at Saratoga (17 Oct.). Meanwhile, Howe invaded Pennsylvania, defeated Washington at Brandywine (11 Sept.) and Germantown (4 Oct.), and occupied Philadelphia. During the winter of 1777–8, which he spent at Valley Forge, Washington had great difficulty in keeping his troops together.

In the summer of 1778 France and Spain entered the war as America's allies; a French fleet was sent to American waters, and a small force under Rochambeau went to Washington's assistance. Howe's successor, Clinton, withdrew from Philadelphia to New York, with an indecisive battle at Monmouth (28 June). The British now carried the war into the south, where loyalists were most numerous; Savannah was captured (29 Dec. 1778), followed by Charleston (12 May 1780), and victories were won at Camden (16 Aug. 1780) and Guilford Court House (15 March 1781). Nevertheless, the British attempt to enforce conscription, and certain excesses of the Loyalists, alienated support from them. It had been planned that Cornwallis, having conquered the south, should march north to join Clinton in New York, but the prolonged struggle in S. Carolina delayed him. Entering Virginia, he withdrew to Yorktown, where he was besieged by Washington and Rochambeau and blockaded by a French fleet. His surrender on 19 Oct. 1781 virtually ended the land fighting.

At sea the Americans built up a strong force of privateers, their best-known commander being John Paul Jones. The entry of France and Spain into the war initiated a hard struggle for naval supremacy, which ended with Rodney's victory off Martinique on 12 April 1782. After Yorktown the other southern ports fell, until only New York remained in British

hands. Peace negotiations opened in 1782, and on 3 Sept. 1783 the Treaty of Paris recognized American independence.

AMERICAN INDIANS. See **INDIANS, AMERICAN.**

AMERICAN LEGION. Organization in U.S.A. of ex-servicemen of the F.W.W., founded in 1919. Veterans of the S.W.W. were made eligible to join in 1942. Unlike the British Legion, the A.L. has from time to time engaged in political activity to advance its objects. Its membership in 1968 was 2,553,782.

AMERICAN LITERATURE. See **UNITED STATES OF AMERICA.**

AMERICA'S CUP. International yacht-racing trophy. Won from the Royal Yacht Squadron in 1851 by the schooner-yacht *America*, owned by J. C. Stephens, in a race round the Isle of Wight, the silver cup was presented to the New York Yacht Club in 1857 to be held and competed for internationally: New York still retains it. Originally the yachts were often very large, as they had to sail to wherever the races were held, but since the S.W.W. this rule no longer applies. Although only 12-metres now compete, they cost several hundred thousand pounds and only syndicates are able to finance them.

AMERICA'S CUP
Weatherley, winner in 1962.
Courtesy of H. D. Mercer.

AMERICIUM. Man-made transuranic element produced from plutonium. At. no. 95, its isotope of mass 243 has half-life of 480 years. Possible source for radiographic diagnosis because of suitable gamma-emission.

AMERSFOORT (ah'mersfoh'rt). Ancient town of the Netherlands, 12 m. E.N.E. of Utrecht. Pop. (1961) 70,620.

A'MERY, Leopold Stennett (1873–1955). British Cons. statesman. B. in India, he was ed. at Harrow and Oxford, and was on the staff of *The Times* 1899–1909. For 34 years from 1911 he was Unionist M.P. for S. Birmingham, and was a foremost advocate of a united and fully-developed Commonwealth and Empire. He was Colonial and Dominions Sec. 1924–9, and Sec. of State for India and Burma 1940–5. His most famous speech was made in May 1940 when he addressed to Neville Chamberlain the words once used by Cromwell – 'In the name of God, go!' His books incl. *Empire and Prosperity* (1930), *India and Freedom* (1942), and *My Political Life* (1953–5). His son Julian (1919–) was a Cons. M.P. 1950–66, and was 1960–4 Min. for Air (of Aviation from 1962).

A'METHYST. A kind of quartz coloured violet by the presence of small quantities of manganese, and used as a semi-precious stone. As. are found chiefly in Russia, India the U.S.A., and Brazil.

AMIEL (ahmē-el'), Henri Frédéric (1821–81). Swiss philosopher and writer. B. at Geneva, he became professor of philosophy at the university there. His fame rests on his *Journal intime*, pub. 1882–4.

AMIENS (ahmē-ah'). Ancient city of N.E. France at the confluence of Somme and Avre; capital of Somme dept. It has a magnificent Gothic cathedral with a spire 370 ft. high, and gave its name to the battles of Aug. 1918, when Haig launched his victorious offensive. Pop. (1962) 109,869.

AMINES (am'inz) and **AMINO COMPOUNDS.** Nitrogenous substances, usually basic, i.e. they will form salts with acids. The parent substance of most is ammonia, NH_3 , to which they are related by the substitution of one or more of the hydrogen atoms by the radicals or groups of atoms. The *simple As.*

are divided into primary, secondary, or tertiary according to whether 1, 2, or 3 hydrogen atoms of the ammonia molecule are replaced. The *methyl As.* have rather unpleasant ammonia odours and occur in decomposing fish. They are all gases at ordinary temperature. *A. acids* are compounds of which the basic and acidic groups exist in the same molecule. The simplest is glycine. Of the *aromatic A. compounds* the most important is aniline. Other interesting *A. compounds* are the metal amides and the acid amides.

A'MIS, Kingsley (1922–). British author. Ed. at Oxford, he lectured in English at Swansea Univ. Coll. 1949–61, and was fellow of Peterhouse, Cambridge, 1961–3. *Lucky Jim* (1954) is a novel humorously symbolic of 'red-brick' provincial university life as a factor in modern England.

AMMAN. Capital and chief industrial centre of Jordan, on the site of the ancient Rabbath-Ammon (Philadelphia). The Univ. of Jordan was estab. here 1962, and A. is the centre of a road network and on the Cairo-Baghdad air route. Pop. (1966) 321,000.

A'MMETER. An instrument which measures electric current in amperes. The most common types are moving magnet, moving iron and moving coil, in which the passage of current through the instrument causes movement of a magnet, a piece of soft iron or of a coil. This is balanced by a restoring force (e.g. from a hair spring or the earth's magnetic field) in the opposite direction, and a pointer moving over a scale indicates the amount of current flowing through the instrument.

AMMON. Egyptian deity, identified by the Greeks with Zeus and by the Romans with Jupiter. In art he is represented as a ram, as a man with ram's head, or as a man crowned with feathers.

AMMONIA (NH_3). A colourless, pungent-smelling gas of about two-thirds the density of air, and soluble in water, forming ammonium hydroxide, NH_4OH . The solution is strongly alkaline, and forms crystalline salts on neutralization with acids.

Appreciable amounts of ammonium carbonate are found in the guano deposits of S. America, and in the mineral deposits at Stassfurt. It is also produced

AMIENS. Seen from the town belfry the cathedral, begun in 1220 and reputed the finest Gothic building in France, lives up to Viollet-le-Duc's description of it as 'the Parthenon of Gothic architecture'.

synthetically in gas works, being a product of the destructive distillation of coal, and by the Haber and Cyanamide processes.

AMMONITES. Ancient Semitic people living to the N.W. of the Dead Sea on the edge of the Syrian desert. Worshipers of Moloch, to whom they offered human sacrifices, they were frequently at war with the Israelites.

AMMAN. The Roman theatre, the city's most dramatic monument, dates to the 2nd or 3rd century A.D., and restoration has been undertaken. The three tiers of seats accommodate 6,000 spectators. Courtesy of the Jordan Embassy.

AMMONITES. Extinct cephalopod molluscs akin to the modern Nautilus. The shell is curled in a plane spiral and made up of numerous chambers, only the outermost of which is inhabited by the animal. As. flourished in the Mesozoic times.

AMOEBIA (amē'ba). One of the simplest living animals, consisting of a single cell and belonging to the group Protozoa, found in fresh water. The body, which is just visible to the naked eye, consists of colourless protoplasm. The chief organ within the body is the nucleus which largely controls the A's activities. The A. feeds by flowing round and enclosing organic debris, etc., which it encounters. It has no eyes or other sense organs, and no sexual reproduction.

AMOEBIA. The nucleus is the large dark spot (right).

AMORITES. Ancient people of Semitic or Indo-European origin, who were among the inhabitants of Canaan at the time of the Israelite invasion.

AMOS. First of the Hebrew O.T. prophets whose utterances were preserved in literary form (c. 760 B.C.). A sheep-farmer of Tekoah, he was roused by the increased moral laxity and corruption of Israel under Jeroboam II.

AMOY. Chinese port, on Amoy Is. in Amoy Bay, Fukien Province. One of the original 5 treaty ports, 1842-1943, it has a fine harbour; chief exports are sugar, tobacco, bamboo, paper. Pop. c. 150,000.

AMPERE (onpär'), André Marie (1775-1836). Fr. physicist and mathematician, prof. at the Collège de France in Paris. The instrument for measuring current, the *ammeter*, is named after him, as is the *ampere*, the unit of electric current, which is defined as the current required to deposit 0.00118 g silver on the cathode of a silver voltameter in 1 sec.

AMPHIBIA. Class of vertebrates standing in zoological classification between the fishes and the reptiles. The A. were the first four-legged animals to inhabit the earth, and our knowledge of them goes back to the Carboniferous age. The modern A. are

divided into 3 orders: *Apoda* or *Gymnophiona* (the Caecilians, limbless and with very short tail); *Caudata* or *Urodela* (salamanders and newts, with limbs and tail); *Salientia* or *Anura* (frogs and toads, with 4 limbs and no tail).

The A. are cold-blooded vertebrates, with the body covered with skin instead of scales and passing the first part of their life in a larval or tadpole state. The majority spend their adult lives on land, generally near water, and salt water except in great dilution is fatal to them.

AMPHINEURA. Class of mollusca, including the coat-of-mail shells. They are sluggish animals found in salt water, adhering to rocks, and distinguished from the other mollusca by their double ventral nervous system.

AMPHITHEATRE. Large oval or circular building used by the Romans for the exhibition of gladiatorial contests, fights of wild beasts, and other similar spectacles; the arena of an A. is completely surrounded by the seats of the spectators, hence the name (Gk. *amphi*, around). The Romans built many As., the best-known being the Colosseum at Rome, completed in A.D. 80, and holding 87,000 spectators.

AMPHITRITE (amfitri'tē). Greek sea-maiden, daughter of Nereus and wife of Poseidon.

AMPHORA (amf-). Large earthenware vessel in common use among the ancient Greeks and Romans, having a handle on both sides of the neck and a pointed lower end that was thrust into the ground.

AMPULLA. Small vessel with a round body and narrow neck, used for holding oil, perfumes, etc., used by the Greeks and Romans for toilet purposes. At British coronations the oil is contained in an eagle-shaped A.

AMRITSAR. City in the Punjab, India, founded 1577. It is the religious centre of the Sikhs and contains the Golden Temple and a college of the Univ. of Punjab. Pop. (1961) 375,542.

At A. on 13 April 1919, 5,000 unarmed Indian demonstrators were fired on by British troops at the order of Brig.-Gen. Dyer, 379 being killed, 1,200 injured.

AMSTERDAM. Capital, largest city, commercial and intellectual centre of the Netherlands, on the Amstel where it joins the IJ, an inlet of the IJsselmeer (remnant of the Zuider Zee). A. became important on the decline of Antwerp in the 16th cent. When vessels became too large to navigate the Zuider Zee the port lost some of its importance, but regained it with the opening of the North Holland Canal to Helder in 1825. In 1876 the 15 m. long North Sea Canal to IJmuiden was opened; this has been repeatedly enlarged and deepened, so that the largest ocean-going ships can now reach A. Various industries are carried on, and A. is the chief diamond market of the world, and has long been famous for its cutting industry. A. has many docks and quays, and is intersected by many canals. Most of the heavy transport is water-borne. Notable buildings are the Royal Palace (1655); the Nieuwe Kerk (1408); the Oude Kerk (14th cent.); the St. Antonieswaag, an old weighhouse, used to house the city's archives, and the Rijksmuseum. There are 2 universities. Pop. (1967) 866,421. See illus. p. 38.

AMU DARYA (ahmoo dah'ryah). River in Soviet Central Asia, rising in the Pamirs and flowing through a wide delta into the Aral Sea. It was anciently known as the Oxus and is 1,490 m. long.

AMU DARYA. See ARAL.

AMUNDSEN (ah'moondsen), Roald (1872-1928). Norwegian explorer. B. in Borge, he was the first to navigate the N.W. Passage in 1906. In 1910 he set sail in the *Fram* to discover the North Pole, but on hearing that he had been forestalled by Peary, he raced Scott to the South Pole instead (1911). In 1918 he made an unsuccessful attempt to drift across the

North Pole in the *Maud*, and in 1925 essayed a flight from Spitzbergen to the Pole by aeroplane. This too failed, but the following year he and Ellsworth joined the Italian General Nobile in his dirigible the *Norge*, which circled the pole twice and landed in Alaska, having journeyed 2,700 m. in 71 hours. A. lost his life when searching by plane for Nobile and his airship *Italia*.

AMUR (ahmoor'). River in the Far East of Asia. Formed by the Argun and the Shilka, the A. enters the sea of Okhotsk. At its mouth at Nikolaevsk it is 10 m. wide. For a large part of its total course of over 2,700 m. it forms the boundary between the R.S.F.S.R. and China. It gives its name to two regions of the R.S.F.S.R., Amur and Lower Amur.

AMYL (a'mil) **ALCOHOL** ($C_5H_{11}OH$). A clear colourless oily liquid, usually having a characteristic rather choking odour.

ANACONDA. World's greatest copper plant in Montana, U.S.A. The city founded as Copperopolis 1883, by the Anaconda Copper Mining Co., was incorporated as A. in 1888. A. is 5,300 ft. above the sea, and 26 m. N.W. of Butte. Pop. (1960) 12,054.

ANACONDA. South American snake, allied to the boa-constrictor; one of the largest snakes, it reaches 30 ft. and more.

ANAEMIA (anē'mia). A disease condition in which the patient has too little blood, too few red blood cells or too little haemoglobin. Deficiency in quantity or quality may be due to excessive bleeding, faulty nourishment, or failure to use the food properly. Blood may be destroyed by chemical poisons or infections, and may be impaired by certain diseases of the blood or the lymphatic system. A patient with chronic A. tires quickly on exertion and becomes faint and breathless through lack of oxygen in the tissues. The remedy is proper nutrition and iron.

Pernicious or Addison's A. is a disease due to the failure of the stomach to secrete a certain substance which is necessary to produce blood from the food. It can be rectified by the administration of liver or its extract. Acute A. is also caused by a large whole-body dose of nuclear radiation.

ANAESTHESIA (anesthē'sia). Absence of sensation (Gk. *an-*, not; *aisthēsis*, sensation). A. of a part of the skin, so that the patient is insensitive to a pin-prick or other stimulus, is a sign of nerve disorder, but the more common meaning of A. is a loss of sensation or consciousness produced by an anaesthetic drug.

The beginning of modern A. was the discovery by Thomas Beddoes in 1776 of nitrous oxide. Sir Humphry Davy, inventor of the miner's lamp, did much of the experimental work and first suggested its application to surgery. Horace Wells, a New England, U.S.A., dentist, had a tooth extracted under nitrous oxide (laughing gas) for the first time in 1844. Ether was successfully used by Dr. Crawford Long of Georgia in 1842 for the removal of a tumour of the neck. The credit for the discovery of A. is, however, given to W. T. G. Morton, another dentist, of Boston, Mass., who in 1846 anaesthetized a patient with ether for the removal of a skin tumour at the Massachusetts General Hospital. Prof. James Simpson of Edinburgh used it soon afterwards on women in childbirth, and met great opposition from religious persons. Meanwhile chloroform had been known in France since 1831, and Simpson began to use it in preference to ether. Its use by Queen Victoria at the birth of Prince Leopold in 1853 settled the religious controversy. In 1868 Andrews of Chicago, and after him many American surgeons, developed the use of a mixture of nitrous oxide and oxygen, which is used to this day. The many later developments in anaesthetics incl. ethyl chloride (1847); cyclopropane (1933) espec. useful in chest surgery; the alkaloid d-Tubocurarine (1935) obtained from curare (q.v.) and producing a light plane of anaesthesia useful in

AMSTERDAM. Its growth through the centuries is marked by the 4 great canals, each following the line of a former city wall or moat, and numerous others make a criss-cross pattern. This little bridge is on Prince's Island.

Courtesy of Netherlands National Tourist Office.

abdominal operations; trichloroethylene (1941) an alternative to nitrous oxide in childbirth; and bromochlorotrifluoroethane (1956) which avoids the inflammability of cyclopropane.

Local A. came into use about the beginning of the 20th cent. Cocaine was used as long ago as 1847, but is too poisonous and too likely to lead to addiction to be generally useful. The relatively harmless synthetic substance novocaine, invented about 1905, marked the beginning of the general use of local A. Large areas of the body can be anaesthetized by injecting As. into nerve junctions.

ANALGESICS (-je'siks). Medicines that give freedom from pain, e.g. cocaine and novocaine for local application; opium and its derivatives, antipyrine, aspirin, and certain barbiturate drugs, for internal use.

ANALOG COMPUTER. See **COMPUTER**.

ANANDA (fl. 5th cent. B.C.). Favourite disciple of the Buddha. At his plea, a separate order was established for women.

ANARCHISM. A term in political theory derived from the Gk. *anarkhos*, 'without ruler'. It does not mean 'without order'; most theories of A. imply an order of a very strict and symmetrical kind, but they maintain that such order can be achieved by co-operation, and they claim that other methods of achieving order, which rely on authority, are both morally reprehensible and politically unstable. A. must not be confused with nihilism, a purely negative and destructive activity directed against society as such, it is essentially a pacifist movement.

The religious type of A., claimed by many anarchists to be exemplified in the early organization of the Christian church, has found expression in modern times in the social philosophy of Tolstoy and Gandhi. The growth of political A. may be traced through William Godwin, Shelley, and P. J. Proudhon to Bakunin (q.v.) who had a strong following in Latin Europe, especially France and Spain, until the suppressive dictatorships of Mussolini and Franco. The theory of A. is best expressed in the works of Kropotkin (q.v.).

ANASTASIA (1901–1918). Russian Grand Duchess, youngest dau. of Nicholas II (q.v.). She was murdered with her parents, but it has been alleged that A. escaped, and of those who claimed her identity

the most famous is Anna Anderson. Alleged by some to be a Pole, Franziska Schanzkowsky, she was rescued from a Berlin canal in 1920: Hamburg provincial court of appeal rejected her claim 1967.

ANATOLIA. Alternative name for **TURKEY** — in Asia.

ANATOMY (Gk., cutting up, dissection). The study of the structure of the parts of the body, as distinguished from physiology, which is the study of their functions.

Herophilus of Chalcedon (fl. c. 300 B.C.) and Erasistratus of Chios are regarded as the fathers respectively of anatomy and physiology. In the 2nd cent. A.D. Galen of Pergamum produced an account of A. which was the only source of anatomical knowledge until the period of the Renaissance, in particular until the appearance in 1543 of *On the Working of the Human Body* by the Belgian, Andreas Vesalius (1514–64). In 1628 William Harvey pub. his demonstration of the circulation of the blood. A. was immensely advanced by the invention of the microscope, and the Italian Malpighi (1628–94) and the Hollander Leeuwenhoek (1632–1723) laid the foundations of the study of minute anatomy, or histology. In 1747 B. Albinus (1697–1770), with the help of the artist J. Wandelaar (1691–1759), produced the most beautiful and exact account of the bones and muscles, and in 1757–65 the Swiss Albrecht von Haller (1708–77) gave the most complete and exact description of the organs that had yet appeared. The A. of the nervous system was advanced by the Frenchman Vicq d'Azyr (1748–94), comparative A. by G. Cuvier (1769–1832), whilst in England J. Hunter (1728–93) developed an anatomical museum.

Among the most notable anatomical writers of the early 19th cent. were the London surgeon Sir Ch. Bell (1774–1842), Jonas Quain (1796–1865), and Henry Gray (1825–61). Later in the century came the inventions of staining tissues by dyes for microscopic examination, and the method of mechanically cutting very thin sections of stained tissues. Radiographic A. has been one of the triumphs of the 20th cent. which has also been marked by immense activity in embryological investigation. See **HUMAN BODY**.

ANAXAGORAS (c. 500–428 B.C.). Greek natural philosopher. B. near Smyrna, he lived in Athens, where he was a friend of Pericles, who saved him from death when A. was charged with impiety and treason.

ANCESTOR WORSHIP. Religious attitude adopted by many primitive peoples towards the deceased of the tribe or family. Thus the Zulus used to invoke the spirits of the great warriors of their race before engaging in battle. The Greeks deified their early heroes, and the ancient Romans held in reverential honour the *manes* or departed spirits of their forbears. Particularly prevalent in old China, A.W. gives way under Communist teaching.

ANCHOVY. A fish (*Engraulis encrasicolus*) of the herring family (Clupeidae). It breeds abundantly in the Mediterranean, and is also found on the Atlantic coast of Europe. It is distinguished by its projecting snout and deep cleft to the mouth, grows to a length of 7 or 8 in., and is dark green, with a broad silvery band on the sides.

ANCIEN RÉGIME (oñsiañ' rāzhēm'). (Fr., old order of things). The system of government under the French monarchy, which was swept away by the Revolution of 1789.

ANCIENT LIGHTS. In Britain the right of an owner of a building, arising through long use, to receive an uninterrupted flow of light at one or more of the windows of the building. The right may be acquired in various ways, but usually under the Prescription Act, 1832, by the enjoyment of the right for 20 years without interruption.

ANCŌNA. Italian town and naval base on the

Adriatic Sea, capital of A. province. It has a Romanesque cathedral and a former palace of the popes. Pop. (1961) 99,678.

ANDALU'SIA. Ancient prov. of S. Spain, in 1833 divided into the 8 provs. of Seville, Cadiz, Malaga, Cordoba, Jaén, Granada, Almeria, and Huelva. A. forms an extensive and mostly fertile plain, ringed by mountains, producing copper, manganese, molybdenum, etc., and is watered by the Guadalquivir and many other rivers. The principal towns are Seville, Malaga, Granada, and Córdoba. Area c. 33,700 sq. m.; pop. (1960) 5,900,000.

ANDAMANS. Group of islands in the Bay of Bengal, between India and Burma. There are 5 principal islands (forming the Great Andaman), the Little Andaman, and about 204 islets. The A. were formerly used as a penal settlement, abolished 1945, and were occupied by the Japanese 1942–5. Area 2,508 sq. m.; pop. (est.) 40,000. With the Nicobars (q.v.), they form a territory of the Rep. of India.

The aboriginal pop. number only a few hundred; they are pygmies, probably the remnants of a race once spread over S.E. Asia.

ANDERS, Wladyslaw (1892–). Polish general. On the German invasion of the Soviet Union in the S.W.W., he was appointed to command the Polish forces being formed in Russia, and in 1944 commanded the 2nd Polish Corps in Italy under Alexander. In 1945 he was C-in-C. of all Polish armed forces outside Poland. He later settled in England.

ANDERSEN, Hans Christian (1805–75). Danish writer. The son of a shoemaker, he was b. at Odense in Fünen. His first book was pub. when he was only 17, but it was not until 1829 that he attracted notice. In 1835 his novel *The Improvisatore* brought him popularity, and he began to compose the immortal fairy tales which have been translated into all languages. A.'s other works include romances and a genial autobiography.

ANDERSEN-NEXÖ (ahn'dersen-neks'ö), Martin (1869–1954). Danish novelist. Of humble birth and trained as a shoemaker, he ed. himself and took up teaching. His finest work is the great epic on the life of the Danish proletariat, *Ditte, Child of Man*.

ANDERSON, Carl David (1905–). American physicist. B. in New York, he became prof. at the California Institute of Technology in 1939. Engaged on gamma and cosmic ray research from 1930, he in 1932 discovered the positive electron, or positron, and for this was a 'joint' Nobel prizewinner in 1936.

ANDERSON, Elizabeth Garrett (1836–1917). British pioneer woman doctor, *née* Garrett. She began to study medicine in 1860, and in 1865 was granted a licence to practise by the Society of Apothecaries. She held hospital posts in London, 1866–1903, and m. in 1871 J. G. S. Anderson, shipowner. In 1908 she became mayor of Aldeburgh, the first woman mayor in England.

ANDERSON, Sir John. See **WAVERLEY**.

ANDERSON, Dame Judith (1898–). Australian actress. B. in Adelaide, she excels in strongly dramatic roles, e.g. Lavinia Mannon in *Mourning Becomes Electra*, Gertrude in *Hamlet* and Lady Macbeth. She was awarded the D.B.E. in 1960.

ANDERSON, Marian (1902–). American contralto singer. B. in Philadelphia, she made her début in 1924, her voice being of remarkable richness. In 1955 she appeared as Ulrica in Verdi's *The Masked Ball* at the Metropolitan Opera, N.Y., the 1st Negress to appear there, and achieved outstanding success.

ANDERSON, Maxwell (1888–1959). American dramatist. Son of a Baptist minister, he spent some time in journalism, among other very varied occupations, before making his name in collaboration with Laurence Stallings with *What Price Glory?*, a trenchant war play. His other works range from blank verse historical dramas (i.e. *Elizabeth the Queen* and *Mary of*

Scotland) to one-act plays and a musical comedy, *Knickerbocker Holiday*.

ANDERSON, Sherwood (1876–1941). American short-story writer. B. in Ohio, he became manager of a paint factory but abandoned commerce to join the literary circles of Chicago. He estab. a reputation with *Winesburg, Ohio* (1919), with its relish of small-town life and another short story vol. *The Triumph of the Egg* (1921). He deals with the frustration of instinct in modern industrialized society: his novels incl. *Windy McPherson's Son* (1916) and *Dark Laughter* (1925).

ANDES (an'déz). The great mountain system or cordillera that forms the western fringe of S. America, extending through some 67° of latitude and the republics of Colombia, Venezuela, Ecuador, Peru, Bolivia, Chile, and Argentina. For about half of their length of over 4,000 m. the mts. exceed 12,000 ft. in altitude. Geologically speaking, they are new mountains, having attained their present height by vertical upheaval of the entire strip of the earth's crust as recently as the latter part of the Tertiary era and the Quaternary. But they have been greatly affected by weathering. Rivers have cut profound gorges, and glaciers have produced characteristic valleys. The majority of the individual mountains are volcanic, some are still active volcanoes.

The whole system may be divided into two almost parallel ranges. The southernmost extremity is Cape Horn, but the range extends into the sea and forms islands. Among the highest peaks are Cotopaxi and Chimborazo in Ecuador, Cerro de Pasco and Misti in Peru, Illampu and Illimani in Bolivia, Aconcagua in Argentina, and Ojos del Salado in Chile, at least 23,290 ft., the highest mt. in the New World.

The A. are rich in minerals, and the extraction of silver and gold has never ceased. The ores which are of present-day world importance are tin, tungsten, and bismuth in Bolivia, and vanadium, copper, and lead in Peru. Difficult communications make mining expensive. Transport was for long chiefly by pack animals, but air transport has greatly reduced difficulties of communications. Three railways cross the A. from Valparaíso to Buenos Aires, Antofagasta to Salta, and Antofagasta via Uyuni to Asunción. New roads are being built, incl. the Pan-American Highway from Alaska to Cape Horn.

The population is sparse on the whole. The majority are dependent upon agriculture, the nature and products of which vary with the natural environment.

ANDHRA PRADESH. State of the Rep. of India, created 1953 from the Telugu-speaking areas of Madras (q.v.), and enlarged 1956 from the former Hyderabad state. Rice and sugar cane are grown, there are textile and paper mills, and Vishakhapatnam has an oil refinery and shipyards. Area 106,286 sq.m.; pop. (1961) 35,980,000.

ANDORRA. Small European republic in the eastern Pyrenees between France and Spain, consisting of gorges and narrow valleys surrounded by high mountains. Traditionally it received its independence from Charlemagne, and in 1278 it was placed under the joint suzerainty of the count of Foix in France and the bishop of Urgel in Spain. The former's rights are now vested in the President of the French Republic, but the bishop still retains his prerogatives. Bi-annual dues of 960 francs are paid to France and 460 pesetas to the bishop. There is an elected Council General, of 24 members, while the executive power is wielded by a First Syndic. There are no railways but a road links the French and Spanish frontiers via the cap., Andorra la Vella, pop. c. 800. The people speak Catalan and are R.C. Area, 191 sq. m.; pop. (1968) 15,500 (5,500 citizens, the rest Spanish).

ANDOVER. English market town (bor.) of Hants, 14 m. N.W. of Winchester, on the Anton. Its corn and cattle markets, and its November sheep-fair, have been held for centuries. Pop. (1961) 16,974.

ANDRADE (andrād'), Edward Neville da Costa (1887–). British physicist. B. in London, he was Quain prof. of physics at the Univ. of London 1928–50, and Director of the Davy-Faraday Research Laboratory at the Royal Institution 1950–2. His books incl. *The Structure of the Atom* and a study of Isaac Newton.

ANDRÉ (an'drā), John (1751–80). British soldier. B. in London, the son of a merchant from Geneva, he served with the British army in America from 1774, and when Arnold offered to betray West Point to the British, Major A. was chosen to negotiate the surrender. Captured by the Americans, he was hanged as a spy. A monument to A. was set up in Westminster Abbey.

ANDREA (ahndrā'ah) **DEL SARTO** (1486–1531). Italian painter, b. at Florence. His name was Andrea d'Agnolo; he was called Del Sarto because he was the son of a tailor. He was apprenticed to a goldsmith, later studied under Giovanni Barile and Piero di Cosimo, but he owed more to his study of Masaccio, Michelangelo, and others. In 1516 he m. Lucrezia del Fede, a beautiful woman who appears in many of his pictures. In 1518 he went to Paris at the invitation of Francis I, and for him painted the 'Charity' now in the Louvre. In 1519 he returned to Florence, and with the money Francis had entrusted to him for the purchase of works of art built a house for himself. In 1525 he painted the 'Madonna del Sacco', a fresco, usually considered his masterpiece. He d. of the plague.

ANDRÉE (ondreh'), Salomon August (1854–97). Swedish balloonist. In July 1897 he ascended from Danes Island, Spitzbergen, and nothing more was heard of him and his 2 companions until 6 Aug. 1930 when their last camp and their bodies and diaries, etc., were discovered on White Island (Kvito) by a party of Norwegian scientists. From the diaries it transpired that they had remained in the air for 3 days, reaching long. 83° 4' N. before the balloon was forced down, and that they perished in Oct. 1897.

FRA ANGELICO. A detail from the central panel of the predella or altar-piece 'Christ Glorified in the Court of Heaven' in the National Gallery. Angels, saints, and Dominican beati unite in a chorus of praise. Photo: National Gallery.

ANDREW, St. (d. c. A.D. 70). Apostle. A native of Bethsaida, he was Simon Peter's brother. With Peter, James, and John, who worked with him as fishermen at Capernaum, he formed the inner circle of the 12 disciples. According to tradition he went with John to Ephesus, preached in Scythia, and was crucified at Patras on an X-shaped cross (St. Andrew's cross). His feast is held on 30 Nov. He is the patron saint of Scotland.

ANDREWES, Lancelot (1555–1626). C. of E. divine. B. in London, he went to Cambridge, and took holy orders in 1580, becoming bishop successively of Chichester (1605), Ely (1609), and Winchester (1618). He took part in preparing the text of the A.V., and was remarkable for his fine preaching and saintly life.

ANDREWS, Éamonn (1922–). Irish broadcaster. Himself a former All-Ireland Amateur Junior Boxing Champion (middle-weight), he has made a reputation as a general sporting commentator and as interviewer for *What's My Line, This is Your Life*, etc. In 1960–6 he was chairman of Radio Telefís Éireann, the Irish radio and television authority.

ANDREWS, Roy Chapman (1884–1960). American naturalist-explorer. B. in Wisconsin, he entered the American museum of Natural History in 1906, retiring as Director in 1942. Until 1914 his main interest was in whales, but he led 3 Asiatic expeditions 1916–32 and discovered great fields of fossils and the first-known dinosaur eggs, also mapping large areas of the Gobi desert.

ANDREYEV (andrá'yev), **Leonid Nicolaievich** (1871–1919). Russian author. B. at Orel, he achieved success with a collection of stories in 1901. Later works, obsessed with death and madness, incl. the symbolic drama *Life of Man* (1907), the melodrama *He Who Gets Slapped* (1915); and novels *Red Laugh* (1904), *Seven that were Hanged* (1908), and *S.O.S.* (1919) pub. in Finland, where he had fled from the Revolution.

ANDRIC (andrěch), **Ivo** (1892–). Yugoslav novelist. A former member of the nationalist Young Bosnia organization, another member of which shot Francis Ferdinand (q.v.), he began writing while a political prisoner in Austria. He later became a diplomat and then entered the Yugoslav Parliament. A's most outstanding work is the trilogy which incl. *The Bridge on the Drina*. He was awarded a Nobel Prize in 1961.

ANDROMACHE (androm'akē). Heroine of Homer's *Iliad*; the wife of Hector, who was killed in combat with Achilles, and mother of the boy Astyanax, who was flung from the battlements by the conquerors. After the fall of Troy she was awarded to Neoptolemus, Achilles's son.

ANDROMEDA. In Gk. mythology, a beautiful Ethiopian princess who was chained to a rock and exposed to a sea-monster. Perseus slew the latter and married her. When she d. the gods placed her among the stars.

ANEMONE. Genus of plants of the crowfoot family Ranunculaceae. The wood A. (*A. nemorosa*) or wind-flower is a familiar plant in the shady woods, flowering in spring. *A. pulsatilla*, the Pasque flower, and *A. pratensis* are powerful emetics. *A. hepatica* is common in the Alps. The garden A. (*A. coronaria*) is among the florists' flowers.

ANEROID. See BAROMETER.

WOOD ANEMONE

ANGKOR. Built in the 12th cent. by Suryavarman II the great temple of Angkor Wat was dedicated to Siva, and represents the height of Khmer classical art. Above the gallery roof rise the turrets of one of the two libraries. Constructed in various-coloured sandstones, no cement being used, it is profusely decorated with scenes from legend and subsidiary floral motifs. Courtesy of the National Tourist Office of Cambodia.

ANEURIN (anī'rin) (fl. c. A.D. 600). Welsh poet. A Strathclyde Briton and member of the Gododdin tribe, he wrote the greater part of the poem 'Gododdin', telling of a disastrous military expedition against the Saxons of which A. is said to have been the only survivor.

ANGEL (Gk., messenger). In Christian, Moham-medan, and Jewish belief a class of supernatural beings, intermediate in status between God and man, whose function is to praise and serve the former, and act as the mediators to man. Later Christian belief evolved a celestial hierarchy of 9 orders: the Seraphim, Cherubim, and Thrones, who contemplate God and reflect his glory; Dominations, Virtues, and Powers, who regulate the stars and universe; and Principalities, Archangels, and Angels, who minister to humanity. In R.C. belief each human soul has a Guardian A., to protect and watch over it.

ANGELFISH, or **Monk Fish** (*Squatina squatina*). A fish related to the sharks, found in warm waters, including the Mediterranean. So called from its wing-like pectoral fins. It may be 5 ft. long.

ANGELICA. Genus of umbelliferous plants. *A. sylvestris*, the species found in Britain, is a tall perennial herb, with wedge-shaped leaves and clusters of white, pale violet, or pinkish flowers.

ANGELICO (ahnjel'ēkoh), **Fra** (1387–1455). Italian painter, whose real name was Guido di Pietro. B. in Tuscany, he entered the Dominican order. For 10 years from 1436 he lived in the monastery of S. Marco in Florence where he executed some fine frescoes. In 1446 he moved to Rome at the summons of the Pope. Among his outstanding pictures are 'The Coronation of the Virgin' in the Louvre, and a Christ with 265 saints, in the National Gallery, London. He was a mystic, and his saintly character is revealed in all his works. The name *Angelico* was given him because of the angelic beauty of his character.

ANGELL (ān'jel), **Sir Norman** (1872–1967). British writer on politics and economics. In 1910 he acquired an international reputation with his book *The Great Illusion*, in which he maintained that any war must prove ruinous to the victors as well as to the vanquished, and in 1933 was awarded a Nobel peace prize. He was a Labour M.P. 1929–31, and in 1931 was knighted.

ANGELLIER (ōnzhelych'), **Auguste Jean** (1848–1911). French poet and critic, author of an acute study of Robert Burns and of *A l'Amie perdue*, a series of sonnets addressed to a former love.

ANGERS (ōnzhá'). Ancient French town, cap. of Maine-et-Loire dept., on the r. Maine. It has a 12–13th cent. cathedral and castle, and was formerly the cap. of the duchy and prov. of Anjou whose people are

called Angevins—a name also applied by the English to the Plantagenet kings. Pop. (1962) 122,269.

ANGINA (anj'i'na). Sore throat; an agonizing spasmodic pain. *A. pectoris* is a sudden agonizing pain in the chest, sometimes extending to the left shoulder and down the arm, associated with a terror of immediate death; it is due to spasm of the coronary arteries which supply blood to the heart muscle, or to an aneurysm of the aorta.

ANGIOSPERMS. One of the 2 great divisions of flowering plants (Phanerogamia). In contrast to the gymnosperms ('naked seeds')—which comprise only the conifers and cycads—the As. have their seeds enclosed in a fruit, and show a generally higher and more advanced organization.

ANGKOR. Name applied to the ruins in and around the ancient ruined cap. of the Khmers in Cambodia, S.E. Asia. The remains date mainly from the 10-12th cent. A.D., and comprise temples originally dedicated to the Hindu gods, shrines associated with Hinayana Buddhism, royal palaces, etc. Many are grouped within the great enclosure called Angkor Thom, but the great temple of Angkor Vat (early 12th cent.), one of the most imposing edifices in the world, lies some little distance outside. A. was abandoned in the 15th cent., and the ruins were not adequately described until 1863. See illus. p. 41.

ANGLER. A fish (*Lophius piscatorius*) of the order Pediculati, inhabiting the waters of the N. Atlantic, and found off British shores. It has an enormous flattened head and a wide mouth with sharp teeth, and may reach 5 ft. in length. Other names for it are sea devil, frog fish, and goose fish.

ANGLESEY, Henry William Paget, 1st marquess of (1768-1854). British cavalry leader during the Napoleonic wars. He led a great charge at Waterloo, in which he lost a leg, and was made a marquess for his conspicuous services. He was twice Lord-Lieutenant of Ireland, and succeeded his father as earl of Uxbridge in 1812.

ANGLESEY. Welsh island and co., separated from the mainland (Caernarvonshire) by the Menai Straits, which are crossed by the Britannia tubular railway bridge and Telford's suspension bridge, built 1819-26 but since rebuilt. Nature-lovers visit A. for its fauna (especially bird-life) and flora, and antiquarians for its many buildings and relics of historic interest; it is also a popular holiday resort. The ancient granary of Wales, A. now has growing industries, e.g. toy-making, electrical goods, and bromine extraction from the sea. Holyhead is the principal town and port; but Beaumaris is the county town. Area 276 sq. m.; pop. (1961) 51,700.

ANGLICAN COMMUNION. The family of churches incl. the Church of England and those holding the same essential doctrines, i.e. the Lambeth Quadrilateral (1888) — Holy Scripture as the basis of all doctrine, the Nicene and Apostles' Creeds, Holy Baptism and Holy Communion, and the historic episcopate.

The Church of England originated during the Roman occupation c. 2nd cent., and, after a period of decline, was estab. as part of the Catholic Church by the mission of St. Augustine who became first Abp. of Canterbury in 597. At the Reformation the chief change was political, the Sovereign (Henry VIII) placed the Pope and assumed the right to appoint abps. and bps. The Book of Common Prayer (q.v.), the basis of worship throughout the A.C., dates from Edward VI's reign; the Thirty-Nine Articles, the Church's doctrinal basis, were drawn up under Elizabeth I; and the canons of ecclesiastical discipline are essentially those framed under James I, who also authorized the version of the English Bible still generally used.

The Church was early carried by colonizers and explorers to N. America (where 3 American bps. were

ANGUS. The black, polled Aberdeen Angus cattle which are mainly bred for beef originated here and have reached a high standard in both Britain and the U.S., where they were introduced in 1873. Lindertis Evulse, the 13 month-old bull seen here, was bred in Angus and sold to a U.S. breeder for a record price of £63,000 in 1963. Photo: Alex C. Cowper.

consecrated after the War of Independence, whose successors still lead the Episcopal Church in the U.S.A.), Australia and New Zealand, and by traders to India. The main missionary effort, however, came in the 19th cent., especially in S. America.

In England the 2 abps. head the provs. of Canterbury and York (qq.v.), divided respectively into 29 and 14 bishoprics. See PARLIAMENT. The Church Assembly (set up 1919) has 3 houses (bps., other clergy and laity), and is empowered to frame legislation in Church matters, subject to parliamentary sanction and the royal assent. A decennial Lambeth Conference (first held 1867) attended by some 340 bps. from all parts of the A.C. is presided over in London by the Abp. of Canterbury; it is not legislative but its decisions are often put into practice. The Church Commissioners for England (1948) estab. by an amalgamation of the Ecclesiastical Commissioners (1836) and Queen Anne's Bounty (1704) manage the estates of the Church and endowment of livings.

The 3 main parties, all products of the 19th cent., are: the Evangelical or Low Church, which maintains the Church's Protestant character; the Anglo-Catholic or High Church, which stresses continuity with the pre-Reformation Church (see KEBLE, FROUDE, NEWMAN, PUSEY) and is marked by ritualistic practices, the use of confession, maintenance of religious communities of both sexes, etc.; and the Liberal or Modernist, concerned with the reconciliation towards reunion with other churches incl. the Anglican-Methodist Unity Commission (1965, which issued details in 1968 of a proposed Anglican-Methodist Reconciliation Act) and the R.C.-Anglican Preparatory Theological Commission (1967).

ANGLING. The art of fishing by means of rod and line as opposed to the use of nets. It has been practised from the earliest times, and the best-known work on the subject is Izaak Walton's *Compleat Angler* (1653). The principal equipment of an angler is rod, reel, line, and hook, with some lure or bait to attract the fish. Trout and salmon are the freshwater fish most highly prized by anglers. Trout are angled for by many methods, of which the artificial fly is the most common. Salmon are caught on artificial flies of gaudy patterns or by spinning lures. Other freshwater fish caught incl. roach, perch, pike, barbel, carp, tench, chub, grayling, dace and gudgeon. Equally popular is sea A., including 'big-game' fishing for tunny, etc., and the recently developed underwater fishing with specialized 'frogman' equipment.

PHYLA OF THE ANIMAL KINGDOM

1. PORIFERA or PARAZOA	Sponges.
2. COELENTERATA	Jelly-fish, sea-anemones, corals, sea-pen.
3. PLATYHELMINTHES	Flat worms, including tapeworms and flukes.
4. NEMERTINEA	No popular name, but Nemertine worms.
5. ROTIFERA or ROTATORIA	Wheel-animalcules.
6. NEMATODA	Round or thread worms.
7. ANNELIDA	Leeches, earthworms, lugworm, sea-mouse.
8. ARTHROPODA	Barnacles, crabs, woodlice, spiders, ticks, scorpions, centipedes, millipedes, insects.
9. MOLLUSCA	Mussels, oysters, limpets, snails, cuttlefishes, squids, nautilus, ammonites.
10. POLYZOA	Moss-polyps, sea-mat.
11. BRACHIOPODA	Lamp-shells.
12. CHAETOGNATHA	Arrow-worms.
13. PHORONIDEA or PODAXONIA	No popular name.
14. ECHINODERMATA	Starfishes, sea-urchins, sea-cucumbers, stone-lilies.
15. CHORDATA	Sea-squirts, lancelet, vertebrates, including fishes, frogs, reptiles, birds, and mammals with man.

ANGLO-EGYPTIAN SUDAN. *See* SUDAN, Republic of.

ANGLO-SAXONS. The Teutonic invaders who conquered Britain between the 5th and 7th cents. According to Bede they consisted of the Angles, who settled in E. Anglia, Mercia, and Northumbria; the Saxons, in Essex, Sussex, and Wessex; and the Jutes, in Kent and S. Hampshire. The Jutes probably came from the Rhineland and not, as was formerly believed, from Jutland. The Angles and Saxons came from Schleswig-Holstein, and may have united before the invasion. There must have been a good deal of inter-marriage with the Romanized Celts, although the latter's language and civilization almost disappeared. After the conquest a number of kingdoms were set up, commonly referred to as the Heptarchy; these were united in the early 9th cent. under the overlordship of Wessex. The English-speaking peoples of Britain, the Commonwealth, and the U.S.A. are often referred to today as A.-Ss., but the term is completely unscientific, as the Welsh, Scots, and Irish are mainly of Celtic descent, and only 35 per cent of Americans are of British stock.

ANGOLA. Portuguese overseas prov. in W. Africa, lying between the Congo Rep. and S.W. Africa. With a coastline of some 1,300 m. it has an area of 481,000 sq. m. divided into 13 districts. The cap. is São Paulo de Luanda: other towns are Huambo, Benguela, Mossâmedes, and Lobito.

The coastal area is flat, unproductive, and unhealthy, but behind a mountainous edge stretches a vast area of plateau, comparatively healthy and fertile. The principal rivers are the Congo, upper reaches of the Zambesi, Kwanza, Kubango, and Kunene. The staple industry is agriculture—coffee, maize, sugar, and palm kernels and oil are exported: there are also diamonds, and oil was discovered 1967. Benguela is linked by rail with Mozambique. Nationalist guerilla activity has been continuous from 1961. Pop. (1968) 5,000,000, incl. 300,000 Europeans.

ANGORA. Alternative form of ANKARA.

ANGOSTURA. Name 1824–49 of CIUDAD BOLIVAR, Venezuela.

ANGOULÊME (oŋgoolâm'). French town, cap. of the dept. of Charente, on the Charente, with a fine cathedral and a castle and papermills dating from the 16th cent. Pop. (1962) 51,223.

ANGRY YOUNG MEN. Group of British writers who emerged after the creative hiatus which followed the S.W. They included Kingsley Amis, John Wain, John Osborne (qq.v.), Colin Wilson, Bill Hopkins, Stuart Holroyd. Also linked with the group were Iris Murdoch, Ken Tynan, Lindsay Anderson.

ÅNGSTRÖM (awng'-), Anders Jonas (1814–74). Swedish physicist, who did notable work in spectroscopy and solar physics. After him is named the *Angstrom unit*, used to express the wavelength of electro-magnetic radiations (light, radiant heat, X-rays). One Å. or Å.U. is equal to 10^{-8} cm. (one ten-millionth of a millimetre).

ANGUS. County on the E. coast of Scotland. Part of the Grampians, the 'Braes of Angus', occupies the N.; in the S. are the Sidlaw hills, while in the centre is the Vale of Strathmore. Chief among the rivers are the North and South Esk, the Isla, Tay, Mark, Tarf, Dean, and Prosen. The co. was known as Forfarshire from the 16th cent. until 1928.

The chief industries are jute and linen manufacture, farming and fishing. Dundee is the largest centre of population. Other towns are Arbroath, Montrose, Forfar (county town), Kirriemuir, and Brechin. Though native to the county, the A. breed of cattle is not now usually reared there, but rather in Aberdeenshire. Area 873 sq. m.; pop. (1961) 278,370.

ANGUILLA. *See* under LEEWARD ISLANDS.

ANHUI. Other form of Anhwei, prov. of China.

ANILINE (Aminobenzene, $C_6H_5NH_2$). The simplest aromatic base known, originally prepared by the dry distillation of indigo, whence its name (Port. *anil*, indigo). When pure it is a colourless oily liquid; it has a characteristic odour, and turns black in contact with air. It occurs in coal tar, and was discovered in 1826. It is highly poisonous.

ANIMALS. One of the two 'kingdoms' of living things, the science of which is zoology, the other being the vegetable kingdom or plants, the science of which is botany.

As. and plants are fundamentally similar in microscopical structure, being composed of a substance, protoplasm, and the tissues in the more elaborately organized examples of the two kingdoms alike consist primarily of minute particles of protoplasm known as cells. But the macroscopical structure of all the familiar As. and plants is so different that there is no difficulty in distinguishing one from the other, and there is also the important physiological difference that As. are capable of living and developing only by the nutritive assimilation of the protoplasmic tissues of other living organisms, plant or A. As. are dependent on plants, and must have succeeded them in the evolution of living things. But these differences, both anatomical and physiological, between the more complex and familiar As. and plants break down in the simplest, most primitive forms of As., the Protozoa, which are so distinct from other As. that they are given the rank of a sub-kingdom, the rest being

assigned to the sub-kingdom Metazoa. Owing to the dying out of formerly existing links, the Metazoa can be classified into a number of primary, definable groups, each of which is known as a phylum, meaning a stock or line of descent; and the classification, or taxonomy, of As. is based on the conception that fundamental structural resemblances indicate kinship, not superficial resemblances such as exist between a whale and a shark, and have been acquired as adaptations to a similar mode of life.

The views of zoologists differ to a certain extent regarding the number of phyla of Metazoa that may be admitted, but on p. 43 is a list widely adopted, together with the names of some familiar animals included in each phylum.

Some of these phyla, e.g. Chaetognatha and the Phoronidea, are comparatively unimportant, and the chief interest of the Brachiopoda is geological. On the other hand, the Arthropoda, Mollusca, and Chordata contain a vast number of widely different living forms, quite apart from those known only from their fossil remains.

All the more extensive phyla, including the Protozoa, are subdivided into numerous groups of subordinate status, bearing names of Greek or Latin derivation, the principal subdivisions commonly admitted and arranged according to rank, being subphyla, classes, sub-classes, orders, suborders, tribes, families, sub-families, genera, species, and sub-species.

ANKARA. Chosen as his capital by Atatürk, A. is a focal point of communications in Anatolia and since 1925 has developed with astonishing rapidity. The Youth Park offers beauty as well as recreational facilities. *Courtesy of the Turkish Embassy.*

ANIMAL WORSHIP. A common feature of many primitive religions, arising from animism, totemism, belief in the transmigration of souls under animal forms, or from a desire to propitiate the dangerous or encourage the useful animal. Every variety of A. is eligible, although a preference may be shown for particular types, e.g. the widespread cult of the serpent. Among the animals revered are the ancient Egyptian bull, cat, jackal, hawk, ibis, and hippopotamus; the Israelite golden calf; the Hindu cow, monkey, and elephant; and the N. American Indian beaver, buffalo, and deer.

ANIMISM (Lat. *anima*, soul). In psychology and physiology, the view of human personality which rejects materialistic mechanism as a valid explanation of man. In religious theory, the primitive conception of a spiritual reality behind the material one: e.g. the native beliefs in the soul as a shadowy duplicate of the body capable of independent activity, both in life and death. Linked with this is the worship of natural objects such as stones and trees, thought to harbour spirits (naturism), fetishism, and ancestor worship.

ANJOU (onzhoo'). An old countship and former prov. in the N. of France: cap. Angers. In 1154 the count of A. became King of England as Henry II, but the territory was lost by John in 1204. In 1480 the countship was annexed to the French crown. The dept. of Maine-et-Loire and part of Indre-et-Loire, Mayenne, and Sarthe cover the area.

ANKARA. Cap. of Turkey, standing on the Anatolian plateau of Asia Minor and having Roman and earlier relics. In 1415 it became permanently Turkish. Constantinople (Istanbul) being in Allied occupation 1918–23, after the F.W.W., in 1923 Mustafa Kemal (Atatürk) declared A. the cap. of the Turkish rep., and proceeded to turn the small provincial town into a 20th cent. city. The President's palace, the palace of the Grand National Assembly, and Atatürk's mausoleum are among the chief buildings; the Technical Univ. for the Middle East (founded 1956) draws many students from abroad, as does the Univ. of A. (formed from already existing faculties in 1946). Pop. (1960) 646,151.

ANNABA. Arabic form of Bône (q.v.).

ANNAM. Country of S.E. Asia, incorporated in Vietnam (q.v.) in 1946 as Central Vietnam. A flourishing Bronze Age civilization was in existence in the area when Chinese conquerors penetrated it and held it for centuries. Mongolization was not complete and the people remained basically Indonesian. The Chinese named their conquest An-Nam, 'peaceful south'. Their rule ended in 968 when the 1st native dynasty was estab. In 1884 A. became a French protectorate, and the kings were virtually vassals. The Japanese occupied A. during the S.W.W. and a strong nationalist movement, fostered by the Japanese, sprang up.

ANNAPOLIS. Seaport of the U.S.A., cap. of Maryland, situated 2 m. from Chesapeake Bay on the Severn r. It was founded c. 1648 as Providence, renamed Anne Arundel, and, in 1695, Annapolis. While Congress met here, Nov. 1783–June 1784, it received Washington's resignation of his commission as C.-in-C. (1783) and ratified the peace treaty (1784) of the War of American Independence. The U.S. Naval Academy (1845) is at A.; John Paul Jones (q.v.) is buried in the chapel crypt and there is a museum with relics of U.S. naval history. Pop (1960) 23,385.

ANNE (1665–1714). Queen of Great Britain and Ireland. The 2nd daughter of James, duke of York, who became James II, and Anne Hyde, she received a Protestant upbringing, and in 1683 m. Prince George of Denmark. Of their 17 children only one survived infancy, William, duke of Gloucester, who d. at the age of 12. For the greater part of her life A. was dominated by her friend, Sarah Churchill, wife of John Churchill, afterwards duke of Marlborough; the Churchills' influence led her to desert her father for her brother-in-law, William of Orange, during the revolution of 1688, and later to engage in Jacobite intrigues. She succeeded William on the throne in 1702. Her devotion to the Church of England led her at first to sympathize with the Tories, but she later acquiesced in the establishment of a Whig government, again under the Marlboroughs' influence. The outstanding events of her reign were the War of the Spanish Succession (1702–13), Marlborough's victories at Blenheim, Ramillies, Oudenarde, and Malplaquet, and the union of the English and Scottish parliaments in 1707. A. finally broke with the Marlboroughs in 1710, when Mrs. Masham succeeded the duchess as her favourite, and supported the Tory government of the same year.

ANNE (1950–). Princess of the U.K. She was b. at Clarence House, London, on 15 Aug. 1950, and is the 2nd child of Queen Elizabeth II and the Duke of Edinburgh. Her education has been undertaken privately, and from 1963 at Benenden School, Kent,

and her chief public appearances have been as bridesmaid at the weddings of Princess Margaret in 1960, the Duke of Kent in 1961, and Princess Alexandra in 1963.

ANNE OF AUSTRIA (1601–66). Queen of France. Daughter of Philip III of Spain, she m. Louis XIII of France in 1615, and on his death in 1643 became regent for her son, Louis XIV. She was much under the influence of Mazarin, to whom she was supposed to be secretly married.

ANSERMET. His earlier experience as a prof. of mathematics at Lausanne makes him a skilled interpreter of the most complex scores, attentive – as in this moment at the Royal Festival Hall, London – to the slightest nuance.

Photo: Godfrey MacDonnic.

ANNE OF CLEVES (1515–57). 4th wife of Henry VIII of England. Daughter of John, duke of Cleves, she was recommended to Henry by Thomas Cromwell, who desired an alliance with German Protestantism against the emperor. She proved to be so plain and stolid that Henry had the marriage declared null and void, A. receiving a comfortable pension.

ANNE OF DENMARK (1574–1619). Queen consort of Great Britain. Daughter of Frederick II of Denmark and Norway, she m. in 1589 James VI of Scotland, who became James I of Great Britain in 1603. A. was suspected of Catholic leanings, and was notably extravagant.

ANNECY (ahn'sé'). Capital of the dept. of Haute-Savoie, France, at the northern end of A. Lake. A beautiful town, it has some light industry. Pop. (1962) 45,715.

ANNE'LIDA. Phylum of animals, including the segmented worms. They are distinguished from the Arthropoda by the absence of jointed appendages, and by the presence of a cavity, part of the coelom, surrounding the alimentary canal. There is a distinct head, and the body is divided into a number of similar segments, which are shut off from one another internally by membranous partitions. The A. are divided into 3 principal classes, the *Polychaeta* (or many-bristled worms), *Oligochaeta* (or few-bristled worms) – these two together forming the *Chaetopoda* – and the *Hirudinea* (or leeches), which are entirely destitute of bristles.

ANNIGÒNI, Pietro (1910–). Italian artist. He is noted for the etheralized Renaissance style of his portraits, e.g. Elizabeth II in 1955; other sitters incl. the Duke of Edinburgh and Princess Margaret.

ANNO DO'MINI (Lat., in the year of our Lord). In the Christian chronological system, dates since the birth of Christ, denoted by the letters A.D. Earlier years are denoted by the letters B.C. (Before Christ). There is no year 0, so A.D. 1 follows immediately after the year B.C. 1. The system is based on the calculations made in A.D. 525 by Dionysius Exiguus, a Scythian

monk, but the birth of Christ should more correctly be placed in 3 B.C. or 4 B.C. It became the standard reckoning when adopted by Bede in the 8th cent.

ANNUNCIATION. The tidings brought to Mary by the angel Gabriel concerning the Incarnation (Luke i, 26–38). The Feast of the A. is kept on 25 March, known as Lady Day.

ANOA. See **BUFFALO**.

A'NODE. The electrode at which positive current enters a device. It is the positively charged electrode of an electrolytic cell, the electrode on which the primary stream of electrons impinges in a vacuum tube and the negative terminal of a battery.

ANOPHELES. See **GNAT**.

ANOUILH (anōōiy'), Jean (1910–). French playwright and film writer. Though b. in Bordeaux, he grew up in Paris and became a law student and advertising agency man before finding his true bent in the theatre. Constantly concerned with the anti-thesis of innocence and experience, his plays have frequently been staged in English versions *L'invitation au Château* (1947: Ring Round the Moon), *Colombe* (1950), and *Becket, ou l'honneur de Dieu* (1959), concerned with Becket and Henry II.

ANSCHLUSS (ahn'shloos: Ger., joining). Term used for the union of Austria with Germany, accomplished by Hitler on 12 March 1938.

ANSELM, St. (1033?–1109). Churchman, b. near Aosta, in Piedmont. Educated at the abbey of Bec in Normandy, which as an abbot (from 1078) he made the greatest centre of scholarship in Europe, he was appointed abp. of Canterbury by William II in 1093, but was later forced into exile. He was recalled by Henry I, with whom he bitterly disagreed on the investiture of the clergy; a final agreement gave the king the right of temporal investiture and the clergy that of spiritual investiture. A. was canonized in 1494. He holds an important place in the development of scholasticism. In his *Proslogion* he developed the ontological proof of theism, which infers God's existence from our capacity to conceive of a perfect Being. His most important work, *Cur deus homo*, deals with the Atonement.

ANSERMET (onsärrmeh'), Ernest (1883–). Swiss conductor and composer. As permanent conductor for Diaghilev's Russian Ballet (1915), he conducted at the premières of several Stravinsky ballets, and has since toured the world.

AN'SHAN. Chinese city and iron and steel centre, in Liaoning prov., 55 m. S.S.E. of Shenyang (Mukden). Started here in 1918, expanded by the Japanese, dismantled by the Russians, the iron works were restored by the Communist govt. of China: production 1.5 million tons of pig iron annually. Pop. c. 600,000.

ANSON, George, baron (1697–1762). British admiral. B. in Staffs, he entered the navy at the age of 15. In 1740, during the war with Spain, he commanded a squadron of 6 ships with which he attacked Spanish colonies and shipping in S. America. After circumnavigating the globe, he returned to England in 1744 with only a single ship, but bringing back £500,000 of Spanish treasure. In 1747 he routed a French convoy off Cape Finisterre, and was created Baron A. of Soberton. His *Voyage Round the World* (1748) is a maritime classic.

ANT. Insect of the family Formicoidea of the order Hymenoptera, to which also belong the wasps and the bees.

About 3,500 different species of As. are known. All are social in habit, and live in nests of various kinds. Each A. society or community consists of a number of sterile wingless females, termed workers, and a smaller number of fertile females and males, which are usually winged. The male is smaller and more slender than the female. At certain times of the year the winged males and females leave the parental nest in large numbers on their nuptial flight.

Mating takes place in the air, after which the males soon perish, while the fertilized females (or queens, as they are now called), lose their wings and settle down to colony founding. In some As. the workers are all alike, but in others large-headed 'soldiers' may be distinguished from the small-headed workers.

The most primitive As. are carnivorous and hunt other insects. The tribal As. of the tropics lead a wandering nomadic life. Others are pastoralists, feeding chiefly upon saccharin matter obtained from the extra-floral nectaries of various plants, but more especially on honey dew, discharged by aphids and related insects. The As. induce the aphids to void this substance by stroking them with the antennae; some As. even keep and protect them. Honey As. use certain of their own workers or soldiers as receptacles for storing collected honey dew; when hungry, they stroke these 'repletes' and receive from them regurgitated honey dew. Harvesting As. collect, husk, and store plant seeds in special chambers or granaries. The robber As. (*Formica sanguinea*) raid nests of other As., in particular those of *F. fusca*, and carry off *Fusca* pupae to their own nests, where they are destined to live as slaves, tending the brood of their captors. The so-called white As. or termites (q.v.) belong to a very different group of insects.

ANTANANARIVO (ahntahnahnahr'vo). Cap. of the rep. of Madagascar, situated on a hill in the centre of the island. Pop. (1965) 321,654.

ANTARCTICA. Continent surrounding the South Pole, having an area of about 5,300,000 sq. m., and the ice-covered sea surrounding it. In a broad sense the term covers all land and sea S. of about latitude 60° S. There are no inhabitants on the land. The continent is a vast faulted plateau of very ancient rocks with flanking Tertiary deposits showing affinity with geological occurrences in New Zealand and S. America. In places isolated peaks break through the icy surface, or ranges of mountains stand up from the plateau. The great ice sheet which covers the

RED ANT. 1, Male; 2, worker; 3, female; 4, larva; 5, nymph; 6, cocoon.

ANTARCTICA. Paradise Bay in the Antarctic, looking towards Le Mare Island. Courtesy of Anglo-Chilean Society.

continent reaches a thickness of about 2,000 ft. The Ross or Great Ice Barrier is a great shelf of ice formed by several glaciers coalescing in the Ross Sea. The coasts are backed by huge walls of ice. Bases are maintained for scientific research, and the dry valleys of 'McMurdo Oasis' may be used as a natural training ground for astronauts.

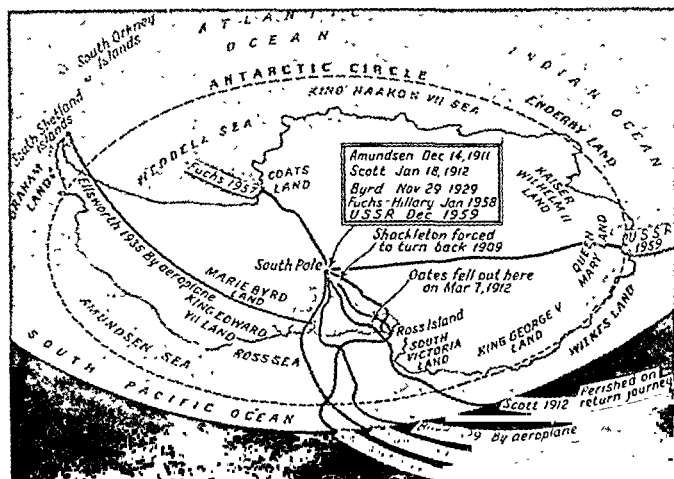

A number of islands, all barren and windswept, lie off the continent: these include the Shetlands, the S. Orkneys, the S. Sandwich islands, and Peter 1st Is.

CLIMATE, VEGETATION. Winter is almost continuous in A., no month being free from frost, and even the summer mean temperature is below freezing-point. Winter temperatures are often below zero F. Southerly winds of great velocity are common. Rain never falls. There is very little soil cover. Lichens and mosses encrust the rock faces; there are no trees, and few other plants. Whales, seals, and penguins visit the seas and shore, and many sea birds nest there in summer.

POLITICAL CLAIMS. Claims to sovereignty in A. began when whaling expeditions in the 20th cent. revealed the region's possibilities. There is no part unclaimed, the claims being made in sectors reaching to the Pole. British areas are the Falkland Islands Dependency (1908), the Ross Dependency of New Zealand (1923), and Australian Antarctic Territory (1936). Peter 1st Is. was placed under Norway 1933. There are also Adélie Land (French, 1938) and Norwegian Antarctic Dependency (1939). Marie Byrd Land and Ellsworth Highland are unofficially claimed by U.S.A.; both Argentina and Chile claim the Falkland Islands Dependencies.

Exploration. The first to sail in Antarctic seas was James Cook in 1773-4, and early in the 19th cent. discoveries were made to the south of S. America (E. Bransfield, J. Biscoe, Bellinghousen, and J. Weddell) and Australia (D. d'Urville and C. Wilkes). In 1841-2 James Ross found great land areas in S. Victoria Land and sighted the Great Ice Barrier. The *Challenger* crossed the Antarctic Circle in 1872 and de Gerlache wintered in A. in 1897-9. Scott's initial attempt to reach the S. Pole in 1902-4 (82° 17' S.) was followed by a number of others, e.g. Shackleton 1908-9; Amundsen succeeded on 16 Dec. 1911, and Scott himself on 18 Jan. 1912. In 1957-8 Vivian Fuchs made the 1st overland journey across the continent via the Pole.

The first aerial flights were made in 1928 by H. Wilkins over Graham Land, and in 1929 R. E. Byrd flew to the Pole and back from the Ross Ice Barrier in 19 hours. In 1935

ANTARCTICA. Routes of the most famous expeditions.

L. Ellsworth flew 2,300 m. across unknown territory. The largest expedition ever attempted was that under Byrd in 1946, which consisted of 4,000 men, 13 ships, 29 land-based planes, and 35 seaplanes from tenders.

ANTEATER. Name given to several mammals that live wholly or mainly on ants, for which diet they are structurally adapted with toothless jaws, extensible tongue, and powerful fore-paws for breaking up the ant-hills. The Great A. or Ant Bear (*Myrmecophaga jubata*), is common in Brazil, and stands about 2 ft. high. The name is also applied to the aardvark, the echidna, and the pangolins (qq.v.).

ANTELOPE. Popular name for a number of distinct kinds of hoofed animals of the family Bovidae of the order Artiodactyla. A few medium-sized genera are found in Asia, notably the chiru of Tibet; the saiga of Tartary; several sorts of gazelles that inhabit the deserts of Persia and Arabia spread into India, to which the blackbuck, the four-horned A., and the nilgai are restricted. But most As. are known from Africa where they range from the extreme N. to the Cape Province; some of the duikers do not surpass a cat in height, whereas the eland is as bulky as large cattle. Other important species are the kudu, oryx or gemsbok (q.v.), sable A., gnu or wildebeest (q.v.), hartebeest, waterbuck, impala, and springbok (q.v.). There are no true As. in the Americas, although the prongbuck passes under that name in the U.S.A.

ANTELOPE (Eland)

ANTHEIL (ahn'til), George (1900-59). American composer, the son of a Polish political exile. He was at one time a concert pianist, but was best known for his *Ballet Mécanique*, scored for anvils, aeroplane propellers, electric bells, automobile horns, and 16 player pianos.

ANTHONY (an'toni), St. (c 250-350). Founder of Christian monasticism. B. in Egypt, he renounced at the age of 20 all his possessions and lived in a tomb, and at 35 sought yet further solitude on a mountain in the desert. In 305 he founded the first cenobitic Order, or community of Christians following a rule of life under a superior. When he was about a hundred, A. went to Alexandria and preached against the Ariens. A.'s temptations in the desert were a popular subject in art.

ANTHONY OF PADUA, St. (1195-1231). B. at Lisbon, the son of a nobleman, he became an Augustinian monk, but in 1220 joined the Franciscans. He opposed the relaxations introduced into the Order. Like St. Francis, he is said to have preached to animals. He d. at Padua and was canonized in 1232.

ANTHOZO'A (Gk., flower-animals) or Actinozoa. Class of animals of the phylum Coelenterata, including sea-anemones, corals, etc. They are sedentary polyps, and never pass through a medusa stage. The most important divisions are the Alcyonaria, Actinaria, and Madreporaria.

ANTHRACENE (C₁₄H₁₀). White glistening crystalline hydrocarbon with a faint blue fluorescence when pure. Its melting-point is about 216° C., and its boiling point 351° C. It occurs in the high boiling fractions of coal tar, where it was discovered in 1832 by Laurent and Dumas.

ANTHRACITE (Gk. *anthrakos*, coal). A hard, dense glossy variety of coal, containing over 90 per cent of fixed carbon, and a low percentage of ash and of volatilizable matter, which causes it to burn without flame, smoke, or smell. It gives an intense heat, but is slow-burning and slow to catch alight, and is therefore unsuitable for use in open fires. Its characteristic

composition is thought to be due to the action of bacteria in disintegrating the coal-forming material when it was laid down in the carboniferous age. Amongst the chief sources of A. coal are S. Wales, Pennsylvania, the Donbas (q.v.), and the Shansi province of China.

A'NTHRAX. A disease caused by the anthrax bacillus; woolsorter's disease. It is principally a disease of animals, especially cattle and sheep, and is caught by man from infected hides and fleeces. Consequently, most countries have strict laws regulating the importation of these articles. The disease is so deadly to animals and so dangerous to man that to guard against its spread every animal exposed to it must be slaughtered and burnt. The first sign is a boil on the part of the body exposed to contact; after a few days this grows into a large red area with a dark scab surrounded by clear blisters.

A'NTHROPOID APES (from Gk. for 'resembling man'). A group of the Primates comprising fossil and extinct species, and also living species (gorilla, chimpanzee, orang-utan, and gibbon, qq.v.), referred to as the family Simiidae, which is associated with the Hominidae (Man) in the section Anthropomorpha.

ANTHROPOID APES. So called because of their resemblance to man, which can be seen especially in the shapes of the spine, breastbone, and pelvis. In this drawing after T. H. Huxley their skeletons are compared: a, gibbon; b, orang-utan; c, chimpanzee; d, gorilla; e, man.

ANTHROPO'LOGY (Gk. *anthropos*, man; *logos*, science). The natural history of Man. The term was first used by Otto Casmann in 1594, but A. did not develop as a science until the general adoption of evolutionary theory in the 2nd half of the 19th cent. It deals with man's development from non-human stocks (Physical A.), the races of mankind as they are today (ethnology), social, political and economic organization (Cultural A.), the purposes that cultures are intended to serve (Functional A.), etc. In encouraging the development of colonial peoples the British govt. has made considerable use of applied A. in this century (Social Science Research Council for the Colonies, estab. 1944) and in the U.S. research is co-ordinated by the Society for Applied A. (estab. 1941) and has been particularly active in extending the field of A. to advanced cultures and western societies.

ANTHROPO'METRY. The science that deals with the measurement of the human body, particularly stature, body-weight, cranial capacity, length of limb, etc., in the two sexes and the different living and extinct races of mankind. Anthropology in general is descriptive; anthropometry brings to its study numerical and graphical modes of expression. The founder of A. was Quetelet, the Belgian statistician, whose *L'Anthropométrie* was pub. in 1871. Francis Galton, Karl Pearson, and A. Hrdlička made valuable contributions.

ANTHROPOMOR'PHISM. The attribution of human characteristics to beings above or below humanity in the order of the universe. Plants, animals, and even inanimate objects or forces such as stones

ANTHROPOSOPHY—ANTI-SEMITISM

or the winds are sometimes given human qualities, but A. is generally limited to the conception of gods in human form. Seen in its fullest development in the mythologies of Scandinavia and Greece, it tends in more advanced religions such as Christianity to be reduced to metaphor.

ANTHROPOPHY. System of mystical philosophy developed by Rudolf Steiner (q.v.), who claimed to possess a power of intuition giving him access to knowledge not attainable by scientific means. The Anthroposophical Society was founded in 1913. **ANTIBES** (onté'b). Port and pleasure-resort on the French Riviera, dept. Alpes-Maritimes. Pop. (1962) 35,976.

ANTIBIOTIC. A chemical substance produced by living micro-organisms such as moulds and bacteria, which is capable of destroying or preventing the growth of other micro-organisms. Under some conditions a disease-causing organism, originally susceptible, may become resistant to the effect of an A., hence 2 or more As. are often used in combination with other drugs. Since the introduction of the first A., penicillin (q.v.) in the 1940s, they have greatly contributed to the decline of tuberculosis, venereal diseases, pneumonia, etc.

ANTICHRIST. The great opponent of Christ, by whom he is finally to be conquered. Although the term first occurs in Christian writings, the idea of conflict between Light and Darkness is present in Persian, Babylonian, and Jewish literature, and influenced early Christian thought. A. may be a fake Messiah, or be connected with false teaching, or be identified with an individual, e.g. Nero at the time of the persecution, and the Pope and Napoleon in later Christian history.

ANTICLINE. Geological term for a fold in the earth's crust in which the beds dip on each side of a central axis, thus forming a sort of arch, which, however, is seldom preserved intact. The fold may be undulating or sharply curved. Should one side of an anticlinal fold be compressed until it is nearly vertical, it forms a monocline. A **SYNCLINE** is the geological term for the converse – the structure produced when beds are folded so that they dip towards a central axis, giving rise to a trough or basin.

ANTI-COMMUNIST PACT (Anti-Communist Pact). Agreement signed between Germany and Japan on 25 Nov. 1936, opposing Communism as a menace to peace and order. The pact received the adhesion of Italy in 1937 and of Hungary, Spain, and Manchukuo in 1939. It became a dead letter in 1945.

ANTI-COSMOS. See **MOHOLE**.

ANTICYCLONE and CYCLONE (sī'klōn). Terms referring to conditions of atmospheric pressure. A cyclone is an area of low pressure, an anticyclone one of high pressure. *Anticyclones* are caused by descending air, which becomes warm and dry. From a calm centre winds radiate, taking a clockwise direction in the N. hemisphere, and anticlockwise in the S. hemisphere. They are associated with clear weather and are distinguished by the absence of rain and violent winds. In summer they bring hot, sunny days, and in winter fine, frosty spells, though fog and low cloud are not uncommon in winter anticyclonic weather. *Cyclones* are formed by the mixture of cold, dry polar air with warm, moist equatorial air. These masses of air meet in temperate latitudes; the warm air rises over the cold, resulting in rain. Winds blow in towards the centre in an anticlockwise direction in the N. hemisphere, clockwise in the S. hemisphere; the systems are characterized by variable weather, and are common over the British Isles. They bring rain or snow, winds up to gale force, low cloud, and

sometimes fog. Tropical cyclones are a great danger to shipping. The tornado is a rapidly moving cyclone.

ANTI-GONE. In Greek legend, a daughter of Jocasta, by her son Oedipus (q.v.).

ANTI-GONUS (382–301 B.C.). A general of Alexander the Great, after whose death in 323 he made himself master of Asia Minor. He was defeated and slain by Seleucus at the battle of Ipsus.

ANTIGUA (ahntē'gwah). Largest of the Leeward Islands, an assoc. state of the U.K. from 1967. Discovered in 1493 by Columbus and not inhabited until English settlers occupied it in 1632. There are fine harbours at St. John's the cap., and English Harbour. Sugar is the chief export. Area 171 sq. m.; pop. (1960) 54,354, incl. the dependent islands of Barbuda and (uninhabited) Redonda.

ANTIILLES. Name sometimes used to describe the whole group of West Indian Islands, which are divided into Greater A. (Jamaica, Cuba, Puerto Rico, and Haiti-Dominican Rep.), and Lesser A.

ANTIMONY. A metallic element, symbol Sb, at. no. 51, at. wt. 121.76. In the ordinary form it is a silver-white metal, brittle, and readily powdered. It occurs chiefly as stibnite, and is used in a number of alloys and as a photosensitizer, with response in blue and blue-green.

ANTIOCH (-ok). Ancient capital of the Greek kingdom of Syria, founded 300 B.C. by Seleucus Nicator in memory of his father Antiochus, and for long famed for its splendour and luxury. Under the Romans it was an early centre of Christianity. The site is occupied by the Turkish town of Antakiah; pop. c. 33,000.

ANTIOCHUS (-ok). Name of 13 kings of Syria of the Seleucid dynasty. A. I (b. 324; reigned 281–261 B.C.), son of Seleucus, one of the generals of Alexander the Great, earned the title of A. Soter or Saviour by his defeat of the Gauls in Galatia (278 B.C.). His son A. II (b. 286; reigned 261–246 B.C.), was known as A. Theos, the Divine. During his reign the eastern provinces broke away from the Graeco-Macedonian rule, and set up native princes. A. III the Great (b. c. 241; king 223–187 B.C.), grandson of A. II, secured a loose suzerainty over Armenia and Parthia (209), overcame Bactria, and returned by way of the Persian Gulf (204 B.C.). He took possession of Palestine, entering Jerusalem in 198 B.C. He crossed into N.W. Greece, but was decisively defeated by the Romans at Thermopylae in 191 and at Magnesia in 190 B.C. He had to abandon his domains in Asia Minor, and perished at the hands of the people of Elymais. A. IV (king 175–164 B.C.), 2nd son of A. III, was known as A. Epiphanes, the Illustrious; he occupied Jerusalem about 170 B.C., seizing much of the Temple treasure, and instituted worship of the Greek type in the Temple. This produced the revolt of the Jewish people under the Maccabees, and A. died before he could suppress it.

A. VII Sidetes (king 138–129 B.C.), the last strong ruler of the dynasty, took Jerusalem in 134 B.C., reducing the Maccabees to subjection, and fought successfully against the Parthians. Under A. XIII Asiaticus (reigned 69–65 B.C.), the last of the dynasty, Syria was converted into a province by Pompey.

ANTIPODES (Gk. *anti*, opposite; *podes*, feet). Places exactly opposite one another on the globe. In Britain, Australia and New Zealand are sometimes so called. The Antipodes islands S.E. of New Zealand are approx. the A. of London.

ANTIRRHINUM (antir'in'um) or Snapdragon. Genus of plants belonging to the same group as the foxglove and toad flax (Scrophulariaceae). A. majus, a native of central and southern Europe, is a familiar garden flower.

ANTI-SEMITISM. Opposition to the Jews. A. first appeared soon after Christianity had been adopted as

ANTIBES. In 'Cap d'Antibes' with its solitary windswept pine, bold against the sea and sky, Claude Monet captures the essence of this part of the Mediterranean coast.

Courtauld Institute Galleries, London.

© S.P.A.D.E.M., Paris, 1964

the official religion of the Roman Empire, and was fanned into activity by the religious enthusiasm of the Crusades. During the 12th and 13th cents. Jews were persecuted in, and expelled from, England, France, and Germany, while they were finally expelled from Spain, where they had flourished under the Moorish domination, in 1492. These persecutions caused an emigration eastwards, and were the beginning of the large Jewish communities in Poland and Russia. Their causes were partly religious and partly economic. Forbidden to own land, excluded from the craft guilds, the Jew was forced to become a middleman. Since usury was forbidden by the Church, Christians who needed money borrowed from the Jews, who became hated as usurers.

In the early 19th cent. the Jews attained their emancipation, shared the commercial prosperity of the bourgeoisie, and won considerable influence; nevertheless, they remained a convenient scapegoat in hard times. During the economic crisis in Germany following the Franco-Prussian War a court chaplain, Stöcker, who called himself a Christian Socialist, led an anti-Semitic agitation and preached racial doctrines derived from Hegel. In Austria, where, as in Germany, finance was largely Jewish-controlled, A. arose about the same time, and lasted much longer. In Russia the Tsarist government, fearful of revolution, deliberately diverted the anger of the miserable peasantry against the Jewish traders and money-lenders; pogroms began in 1881, and continued sporadically up to the F.W.W. In France the clericals and other opponents of the republic exploited the economic crises and financial scandals of the late 19th cent. to stir up an anti-Semitic campaign which culminated in the Dreyfus case. Even in Britain the influx of Jewish refugees from Russia and Poland aroused some popular feeling, which caused the passing of the Aliens Act (1905).

The persecution begun by Hitler in 1933 was made possible by the economic crisis of 1929, which brought ruin to Germany. The workers and middle classes were assured that Jewish finance was responsible for their sufferings, while the propertied classes were told that Hitler was their champion against Jewish Bolshevism, and the constant repetition of these contradictory assertions achieved a large measure of popular approval for the elimination of the Jews from Germany's industrial, political, and cultural life. The same phrases were taken over by Fascist movements in many other countries, including Britain and the U.S.A., and won particularly strong support in Austria, Hungary, and Rumania. This outburst of A., the worst in history, reached its climax during the

S.W.W. in the extermination of millions of German, Polish, Dutch, and French Jews in German concentration camps. In the post-war period there have been sporadic revivals, and not least in the Communist world, as in the mid-1960s, when attacks were supposedly limited to those on 'Pro-Zionists'.

ANTISEPTICS. Substances which hinder the growth of microbes or prevent their action; substances which *kill* microbes are called disinfectants or germicides. As. began to be evolved almost as soon as Pasteur's discoveries made medical men familiar with the properties of microbes about the middle of the 19th cent. Lord Lister revolutionized surgery by operating in a spray of carbolic acid, but 'antiseptic' has now been almost entirely replaced by 'aseptic' surgery. The number of different As. in use today is very large.

ANTI-VIVISECTION. Movement for the abolition of vivisection, i.e. experiments upon living animals. Vivisection is defended on the grounds that it results, or may result, in discoveries of great importance to medical science. It is attacked on the grounds that it is immoral to inflict pain on helpless creatures, even for the best of motives, that it is unjust that animals should suffer in order that men may benefit, that it is unscientific in that results achieved with animals may not be paralleled with human beings, and that vivisection has not added to man's power over disease. Anti-vivisectionists demand the repeal of legislation permitting experiments on animals by licensed scientific workers.

ANT LION. Larval form of the family of winged insects Myrmeleonidae common in Europe (not Britain) and the U.S. The common A.L. (*Myrmeleon formicarius*) has at this stage a large head and big toothed mandibles. It snares its prey by making, and lying concealed at the bottom of, a pit of loose sandy soil which sends unwary passing insects slipping down into its waiting jaws.

ANTOFAGA/STA. Chilean town on the Pacific coast, about 650 m. N. of Valparaiso. Its port and smelting works serve the silver-mining districts of S.W. Bolivia. Pop. (1952) 62,272.

ANTONE/SCU, Ion (1882–1946). Rumanian marshal and politician. Leader of the fascist Iron Guard, he became Prime Minister in 1940, abolished the constitution, and on the abdication of King Carol and the succession of Michael, assumed the royal powers. In October, German troops occupied the country, and in June 1941 Rumania joined Germany in attacking the Soviet Union. When the Red Army entered Rumania in Aug. 1944 A. was arrested; in May 1946 he was tried as a war criminal and shot.

ANTONINE'S WALL. Line of fortifications built by the Romans across central Scotland from the Clyde to the Forth in A.D. 142, during the reign of the emperor Antoninus Pius. By 200 it was abandoned in favour of Hadrian's Wall.

ANTONINUS PIUS (A.D. 86–161). Roman emperor. The son of a consul, he was adopted as heir by the emperor Hadrian early in 138, and became emperor a few months later, on Hadrian's death. His long reign was peaceful and prosperous, and he made various legal reforms.

ANTONIO. Stage-name of A. Ruiz Soler (1921–), Spanish dancer. B. at Seville, he began his career while a child, and has achieved a world-wide reputation for his fiery interpretation of national dance.

ANTONIO/NI, Michelangelo (1912–). Italian film director, famous for his subtle analysis of neuroses and personal relationships among the leisured classes of society, e.g. *L'Avventura* (1960), *La Notte* (1961), and *Blow-Up* (1967).

ANTONY, Mark. See MARK ANTONY.

ANTRIM, N.E. county of Northern Ireland, separated from Scotland by the 20 m. wide North Channel. The coastal districts are hilly, and on the

N.W. coast is the remarkable structure of the Giant's Causeway. The boggy lowlands of the interior produce peat. The pop. is mainly Protestant and of Scottish descent. Industries, of which the chief is linen manufacture, are located in and near Belfast. Including Belfast, the area is 1,122 sq. m.; pop. (1961) 687,912.

ANTUNG. Chinese port in Liaoning province, near the mouth of the Yalu and the Korean border; it is a silk and timber centre. Pop. c. 300,000.

ANTWERP (Antwerpen). City and chief commercial centre of Belgium, one of the principal ports of N.W. Europe; it is situated on the Escaut (Scheldt), 55 m. from the North Sea, and its trade passes down the estuary of the Scheldt, which lies in Dutch territory.

It was not until the 15th cent. that A. rose to prosperity; from 1500 to 1560 it was the richest port in N. Europe. After this A. was distracted by religious troubles and the Netherlands revolt against Spain. In 1648 the treaty of Westphalia gave both shores of the Scheldt estuary to the United Provinces, which closed it to Antwerp trade. The treaty of Paris, 1814, opened the estuary to all nations on payment of a small toll to the Dutch, abandoned 1863. During the F.W.W. A. was in German hands from Oct. 1914 to Nov. 1918; during the S.W.W. from May 1940 to Sept. 1944.

Architecturally the city is well laid out. The Gothic cathedral was begun in the 14th cent., but finished only in 1518; also noteworthy are the Bourse (1872), the house of the 16th cent. printer Plantin, and the Museum. Besides the extensive merchant business, A. has a considerable industry in ship-repairing and ship-building, diamond-cutting, oil-refining, and manufacture of silk, cotton, and woollen goods. Pop. (1960) 256,219.

ANUBIS: Egyptian god of the tomb, usually shown with the head of a jackal. He is often identified with the Greek Hermes.

ANURADHAPURA or Anuradha. Cap. of North Central province, Ceylon, 80 m. N. of Kandy. It possesses what is left of the famous Bo-tree, said to be a cutting from that under which Gautama was transformed into Buddha. A. is a great Buddhist pilgrimage centre. Pop. c. 13,000.

ANVERS. French form of ANTWERP.

ANYANG (anyang'). Archaeological site in N. of Honan province, China, where in 1934 an archaeological expedition discovered royal tombs of c. 1350 B.C., the first remains of the Shang dynasty to be found *in situ*. The evidence revolutionized conceptions of early Chinese history.

ANZENGRUBER (ahn'tsengrōō'ber), Ludwig (1839-89). Austrian dramatist. B. at Vienna, he became a bookseller, an actor, and from 1866 held a position in the Viennese police department. In 1870 his play *Der Pfarrer von Kirchfeld*, a flaming protest against intolerance and tyranny of the clergy, made him famous. Nearly all his 14 plays, the best of which deal with the tragic or comic side of peasant life, express an ethical tendency. He also wrote novels and short stories.

ANZHERO-SUDENSK (ahnzhe'ro soojensk'). Coalmining town in W. Siberia, R.S.F.S.R., 50 m. N. of Kemerovo. Pop. c. 116,000.

ANZIO (ahn'tsē-oh). Seaport on the W. coast of Italy, 33 m. S.S.E. of Rome, the site of the Roman town of Antium. The battle of A. beachhead (22 Jan.-23 May 1944), was one of the most famous and bitterly contested operations of the S.W.W.

ANZUS. Word coined from the initial letters of the countries of the Pacific Pact (1951): Australia, New Zealand, and United States. They are pledged to mutual aid in the event of a member being subject to armed attack, and the Pacific Council, consisting of the 3 Foreign Ministers, meets annually for the better co-ordination of security arrangements. Britain was excluded, but the need for some more compre-

hensive agreement to maintain collective security in the area according to U.N. principles was met by S.E.A.T.O. (q.v.).

AO'MORI. Port at the head of Mutsu Bay, on the N. coast of Honshu Island, Japan, 25 m. N.E. of Hiroasaki. The port handles a large local trade. Pop. (1965) 224,000.

ANTWERP. A storehouse of Flemish art the Mayer van den Bergh Museum, a reconstructed house with a Gothic frontage, contains not only pictures but furniture, embroidery, lace, china, sculpture and ivory of the 9th to 14th cents.

Courtesy of Belgian National Tourist Office.

AOSTA (ah-os'tah), Amadeo Umberto, 2nd duke of A. (1898-1942). Italian soldier. He succeeded Graziani as viceroy of Abyssinia in 1937, and on Italy's entry into the S.W.W. became C-in-C. in East Africa. He was taken prisoner in 1941 and d. in Nairobi.

AOSTA. Italian city, cap. of Valle d'Aosta (French-speaking) autonomous region, 49 m. N.N.W. of Turin. It has extensive Roman remains. Pop. (1961) 30,127.

APACHES (apach'ēs). A group of N. American Indian tribes, formerly inhabiting Arizona and New Mexico, U.S.A. They were reputedly treacherous and savage, and were not subdued until 1886. Only a few thousand survive, living in reservations. The name A. (pron. apash') has also been given to the Parisian gangster type.

APARTHEID. See RACIAL DISCRIMINATION.

APE. Originally a synonym of monkey, and still applied to some species of the latter, such as the Barbary ape of Gibraltar, and the black ape of Celebes; zoologically the term usually signifies the 4 man-like or anthropoid apes (q.v.).

A'PENNINES. Chain of mountains stretching the length of the Italian peninsula. A continuation of the Maritime Alps, from Genoa it swings across the peninsula to Ancona on the E. coast, and then back to the W. coast and into the 'toe' of Italy. The system is continued over the Strait of Messina along the N. Sicilian coast, then across the Mediterranean sea in a series of islands to the Atlas mountains of N. Africa.

AP'ERIENT. See PURGATIVES.

APHIDES (a'fidéz). Family of insects of the sub-order Homoptera, commonly known as green fly or

plant lice; the singular is *aphis*. They are small, greenish or brownish insects, and live in colonies on the leaves and stems of certain plants, whose sap they suck. Several As. are of commercial importance, e.g. the phylloxera of the vine, which was accidentally introduced into Europe from America, and has caused great havoc. See ANT.

APHRODISIAC (from *Aphrodite*, the Greek goddess of love). Anything arousing or increasing sexual desire, the commonest A. drug being alcohol. Most preparations sold as As. are quite valueless, e.g. those from rhinoceros horn sold in the East, or dangerous, e.g. cantharidin. Indian hemp, often considered an A., is more likely to be the reverse.

APHRODITE. Greek goddess of love and wedlock, identified with the Roman Venus, the Syrian Astarte, and the Babylonian Ishtar. According to Homer, A. was the daughter of Zeus and Dione, but Hesiod says she sprang from the foam of the sea. She was the wife of Hephaestus (Vulcan), and the mother of Eros, and received the prize of beauty from Paris. Cyprus, Cythera, Corinth, and Eryx in Sicily were centres of her worship. The Greeks distinguished between A. Urania (goddess of the sky) and A. Pandemos (goddess of all the people, i.e. of marriage and family life), and in the course of time the former became goddess of the higher, purer type of love, while the latter represented sensual lust.

APIA (ah'pē-ah). Port on N. coast of Upolu island, in Samoa, W. Pacific. Chief export copra. It is the cap. of the republic of (W.) Samoa. Robert Louis Stevenson made it his home 1889-94. Pop. (est.) 16,000.

ĀPIS. Sacred bull, worshipped by the anc. Egyptians as a god, chiefly at Memphis.

APO'CALYPSE. Form of religious writing which emerged during the Jewish Hellenistic period. The earliest example is the O.T. book of Daniel; during the 19th cent. many later apocalyptic books were discovered. In the N.T. the book of Revelation is frequently referred to specifically as the A.

All As. share a common purpose of stimulating faith in God in times of distress by graphic portrayal of the future in terms of triumph and deliverance. They also emphasize that the victory of God at the end of the world will be preceded by evil and suffering.

APOCALYPSE. Movement among writers which developed during Surrealism in 1938, and included G. S. Fraser, Henry Treece, J. F. Hendry, Nicholas Moore, and Tom Scott. Largely influenced by the work of Dylan Thomas, it favours Biblical symbolism and thrusts aside the extremes of political theory and the pressures of a mechanized age in an attempt to obtain integrated expression of the self. Apocalyptic writers have also been active in America under the name of the International Workshop.

APOLLINAIRE (ahpollēnār'), Guillaume. Abbreviated name of Guillaume Apollinaire de Kostrowitsky (1880-1918), French poet. Of aristocratic Polish descent, although of illegitimate birth, he was b. in Rome and ed. in Monaco, but in 1898 went to Paris. There he was a leader of the *avant garde* in literary and artistic circles. His lyrics (*Alcools* and *Calligrammes*), his novel *Le Poète Assassiné*, and play *Les Mamelles de Tirésias* show him as a representative of the cubist and futurist manner, and his work greatly influenced younger French writers, such as Aragon.

APO'LLO. Greek god, son of Zeus and Leto, and twin brother of Artemis. A. was the leader of the Muses, the god of music,

ANUBIS by the bier of the dead.

song, and poetry, of agriculture and the pastoral life. He was supposed to have been born on the island of Delos, and he features in a great number of the Greek myths and legends. The chief centres of his cult were Delphi, Delos, and Didyma in Asia Minor. From Delphi his worship spread to Italy, where he was recognized as the god of healing, oracles, and prophecy. Ancient statues show A. as the embodiment of the Greek ideal of male beauty.

Apollo Belvedere (4th cent.) in the Vatican Museum.

APOLLONIUS OF RHODES (fl. 220-180 B.C.). Greek poet and grammarian, whose epic poem, the *Argonautica*, is amongst the most famous examples of the poetry of the Alexandrian school.

APOLLONIUS OF TY'ANA (fl. A.D. 50). Greek ascetic philosopher of the Neo-Pythagorean school. He travelled in Babylonia and India, where he acquired a wide knowledge of oriental religions and philosophies, and taught at Ephesus. He was credited with many miraculous powers.

APOLLO OF RHODES. Huge bronze figure, one of the 7 wonders of the ancient world, said to have been erected by the Rhodians about 280 B.C. Its height was 105 ft., and it took 12 years to construct. In 226 B.C. it was overthrown by an earthquake, and in A.D. 653 the Saracens sold the statue as scrap metal.

APOLOGE'TICS (Gk. *apologeisthai*, to speak in defence). Refutation of attacks on the Christian faith. Famous apologists include Justin Martyr, Origen, St. Augustine, Thomas Aquinas, Blaise Pascal, and Joseph Butler. The questions raised by modern scientific and historical discoveries have widened the field of A. Principal topics are: the claim that religion is merely a projection of the group mind or a psychological illusion; the denial of the existence of God as a Creative Mind in the light of evolutionary theory; the nature of Revelation: the historical truth of the gospel story; and the basis of Christian ethic, first assailed in modern times by Nietzsche.

A'POPLEXY. Sudden loss of consciousness and paralysis caused by the breaking of a blood-vessel in the brain, or the blocking of one of the arteries of the brain by a blood-clot; a stroke, an apoplectic fit. The cause of the rupture of the blood vessel is usually a combination of high blood pressure with hardening of the arteries through age or disease, or through chronic poisoning by alcohol or lead.

APO'STLE (Gk., envoy). In the N.T., the missionaries sent out by Jesus, esp. the Twelve Disciples. In the earliest days of Christianity the term was extended to include some who had never known Jesus in the flesh, notably St. Paul; the *Apostolic Age* in Church history is the period during which the affairs of the infant church were directed by men who either had personal knowledge of Jesus or had received their knowledge and their commission to instruct and preach from members of the Twelve or St. Paul.

APOSTOLIC SUCCESSION. The doctrine in the Christian Church that certain spiritual powers and supernatural grace were received by the first Apostles direct from Christ Himself, and have been handed down in the ceremony of 'laying on of hands' from generation to generation by those who are the only true representatives of the Faith originally entrusted to the Saints.

APOTHECARY. An early name for a person who mixed and dispensed medicines, a pharmacist. The word retains its original meaning in U.S.A. and other countries, but in England an A. became a licensed

medical practitioner. The Society of Apothecaries (constituted by Royal Charter in 1617) was by Act of Parliament (1815) given the legal right to grant licences to practise medicine in England and Wales.

APPALA'CHIANS. Mountain system of eastern N. America, stretching nearly 1,500 m. from Alabama in the S.W. to Quebec prov. in the N.E., composed of very ancient rocks, much worn down. They consist of 4 zones: the Allegheny and Cumberland plateaus; the great A. valley; the Blue Ridge, containing the highest peaks, Mt. Mitchell (6,684 ft.) and the Black Brothers (6,690 ft. and 6,620 ft.); and the Piedmont plateau. The E. edge is marked by a fall line, where Philadelphia, Baltimore, Washington, and other large cities stand. The A. are generally forested; coal is mined in the E. The *A. Trail*, a 2,000 m. scenic foot trail crossing 14 eastern states and running from Mt. Katahdin, Maine to Springer Mt., Georgia, was among the first to be designated (1967) in a bill to estab. a series of nat. trails.

APPEASEMENT. Name given to the generally conciliatory policy adopted by the British government, particularly under Neville Chamberlain, towards the Nazi-Fascist dictators. It was strongly opposed by Winston Churchill, but the Munich Pact of 1938 was almost universally hailed as its justification. When Czechoslovakia was occupied by the Germans in March 1939, A. was definitely abandoned.

APPENDICITIS (-sī'tis). Inflammation of the vermiform *appendix*, a small blind extension of the bowel about the size of a little finger, leading off the bottom of the caecum or blind gut, which forms the first part of the large bowel and lies low on the right-hand side of the abdomen. The appendix is very liable to inflammation, because it is narrow, can easily become twisted and kinked, and is a blind alley, so that faecal matter is easily trapped in it and decomposes, and the bacteria which swarm in the bowel multiply to a harmful extent. Sometimes a foreign body sets up inflammation. In acute A. the festering contents suddenly break through into the peritoneum, and the infection spreads rapidly through the abdomen. Often the attack comes on suddenly, usually in the night, with a sharp stabbing pain low down in the right side of the belly, making the patient vomit. He has a high temperature and quick pulse and breathing. The belly is very tender and hard. The usual treatment is operation at the earliest moment: the abdomen is cut open and the appendix is removed. The appendix is not necessary to healthy life.

A'PPERLEY, Charles James (1777–1843). British sportsman and sporting writer, known as 'Nimrod'. Among his books are *The Chase, The Turf and the Road* (1837) and *Hunting Reminiscences* (1843).

APPERT (ahpär'), **Nicolas** (1750–1841). French pioneer of food preservation by canning; author of *L'art de conserver les substances animales et végétales*.

APPLE. Fruit of *Pyrus malus*, a tree of the family Rosaceae. It has been an important food-plant in Europe from the earliest times, all the cultivated varieties being probably derived from the wild crab-apple. There are several thousand varieties of cultivated As., which may be divided into eating, cooking, and cider apples. They grow best in temperate countries with a cool climate and plenty of rain during the winter. The continent of Europe and N. America (both the U.S.A. and Canada) are the main sources of supply, but As. are also produced in Australia, New Zealand, South Africa, and some parts of Asia. As. may be produced from seeds, or by budding and grafting.

APPLETON, Sir Edward Victor (1892–1965). British physicist. B. in Bradford, Yorks, the son of a millhand, he won scholarships to Cambridge, and from 1920 worked under Rutherford in Cambridge. A.'s researches found the Kennelly-Heaviside (E)

APPOMATTOX COURT HOUSE. The courthouse building in April 1865, as Grant saw it when he rode up on his great black horse 'Cincinnati', asked a group of Union officers whether Lee was present, and was directed on to the McLean House. *Courtesy of the Signal Corps, U.S. Army.*

layer at 60 km. and the Appleton (F) layer, with branches, between 100–200 km., with diurnal and seasonal variations affecting radio. A. was prof. of physics at London, 1924–36, and prof. of natural philosophy at Cambridge, 1936–9. Sec. of the Dept. of Scientific and Industrial Research 1939–49, he was knighted in 1941. He was closely associated with the initial work in England on the atom bomb. In 1947 he received a Nobel Prize. He became principal of the univ. of Edinburgh in 1949.

APPOMATTOX COURT HOUSE. Village in Virginia, U.S.A., 3 m. from the modern village of A. and scene of the surrender on 9 April, 1865 of the Confederate Army under General Robert E. Lee to the Federals under General Ulysses S. Grant – the end of the Civil War. In 1954 a National Historical Park was estab. incl. A.C.H. which is being restored to its appearance in 1865.

APPONYI (op'pönyë), **Albert**, count (1846–1933). Hungarian statesman. B. at Pest, he was a liberal Catholic, and entered parliament in 1872, subsequently becoming leader of a conservative group. In 1919 he headed the Hungarian peace delegation to Paris, and was a League of Nations delegate, 1924–5.

APPROVED SCHOOL. In Britain a school approved by the Home Secretary under the Children and Young Persons Act, 1933. A child or young person may be sent to an A.S. by a court if he has committed any crime or is in need of care and protection or is refractory.

A'PRICOT. Fruit of *Prunus armeniaca*, a tree closely related to the almond, peach, plum, and cherry. A native of the Far East, it has long been cultivated in Armenia, whence it has been introduced into Europe and U.S.A.

APRIL FOOL'S DAY. The first of April, when it is customary in W. Europe to expose somebody to ridicule by causing him to believe some falsehood or to go on a fruitless errand. When he falls into the trap he is known in England as an April Fool; in Scotland as a gowk (cuckoo or fool); and in France as a *poisson d'avril* (April fish).

APSLEY HOUSE. London mansion at Hyde Park Corner, the residence of the dukes of Wellington since the 1st duke acquired it in 1820. In 1947 it was presented to the nation by the 7th duke, and part of it was opened as a Wellington Museum in 1952.

APULEIUS (apulë'us), **Lucius** (fl. A.D. 160). Roman author and philosopher, who travelled in the eastern parts of the Roman empire, where he became initiated

into mystery religions, practised as an advocate at Rome, and retired to N. Africa, giving the rest of his life to literature. In his *Golden Ass* the hero undergoes many romantic adventures. In this work are preserved a number of anc. legends, notably the story of Cupid and Psyche.

APULIA. Region of ITALY.

AQABA (a'kaba), Gulf of. Extending for 100 m. between the Negev and the Red Sea, its coastline is uninhabited except where at its head the frontiers of Israel, Egypt, Jordan, and Saudi Arabia converge. Here are the 2 ports Eilat or Elath (Israeli) and A. (Jordanian, and the country's only port).

AQUAE SULIS. Roman name of BATH.

AQUARIUM. Institution for the study and display of living aquatic plants and animals. These have been common since Roman times, but the 1st modern public A. was opened in Regent's Park, London, in 1853. A recent development is the Oceanarium (q.v.).

AQUATINT (a'kwa-). A process of etching in tone. It deals with broad masses in various gradations of tone, and thus differs from the usual type of etching, in which lines are bitten into a metal plate. J. B. le Prince (1734-81) is credited with its invention, and Goya is the most famous exponent of A.

AQUAVIVA (ahkwahv'e'vah), Claudio (1543-1615). 5th general of the Society of Jesus. B. at Naples, of noble family, he entered the order in 1567, and became its head in 1581. Under his rule the Society greatly increased in numbers, and the revolt of the Spanish Jesuits was put down. He pub. a treatise on education.

AQUEDUCT (a'kwi-). Artificial channel or conduit for the conveyance of water, commonly an elevated structure of stone, wood, or iron built for conducting water across a valley. Greek As. were marvels of engineering skill, and many of those built by the Romans are still standing, e.g. the A. at Nîmes in S. France, built about A.D. 18, and the A. at Segovia, in Spain, built about A.D. 100, consisting of 109 arches made of rough-hewn granite stones cleverly held together without mortar or rivets. The first modern A. in Britain was that carrying the Bridgewater Canal over the Irwell at Barton, built 1759-72.

AQUINAS, Thomas (Thomas of Aquino) (c. 1226-74). Christian theologian and philosopher, most famous of the Schoolmen of the Middle Ages, and known as *Doctor Angelicus*. Of noble descent, he was b. at the castle of Roccasecca, prov. of Naples, S. Italy, and ed. at Monte Cassino. From 1239 he studied at the univ. of Naples, and in 1244 joined the Dominicans. Under Albertus Magnus he studied at

Paris and Cologne. In 1256 he became licentiate in theology at Paris, and soon was remarked for his profound knowledge and dialectical ability. Nine years of teaching, chiefly in Rome (1259-68), were followed by another 4 in Paris. In 1272 he accepted a professorial chair at Naples; he refused the archbishopric, and summoned to the General Council at Lyons by Gregory X, he d. at Fossa Nuova on the way there. In 1323 he was canonized, and in 1567 Pius V ranked him officially with the great Latin fathers of the Church.

A.'s earliest writings were commentaries on the Scriptures, Boethius, and Aristotle. In 1259-64 he wrote the *Summa contra gentiles*, showing that reason and faith are complementary and not antagonistic. In 1265 he began to work on the *Summa theologica*, which consists of 3 parts, concerned respectively with the existence and nature of God, the rules of morality, and the life and work of Christ. This last part was not completed. The complete works of A. were pub. in 1787; a modern ed. was launched in 1882 by Leo XIII, who in 1879 directed that A.'s teaching should be the basis of the theology of the Catholic Church.

AQUITAINE. Ancient province of France, bounded on the S. by the Pyrenees, on the E. and N.E. by the Central Plateau, and on the W. by the Bay of Biscay. A. roughly coincided with the Roman province of Aquitania. It was an English possession 1154-1452.

ARAB EMIRATES. Fed. of Federation formed 1968, following Britain's decision to withdraw her forces from the Persian Gulf, by Bahrein, Qatar, and the Trucial States (qq.v.).

ARABIA. Large peninsula, for the most part desert, in the extreme S.W. of Asia, separated from Africa by the Sinai peninsula, Red Sea, and Gulf of Aden. On the E. it is bounded by the Gulf of Oman and the Persian Gulf, on the S. by the Arabian Sea, and on the northern (landward) side by Jordan and Iraq. Arabia proper comprises the independent states of Saudi Arabia, Yemen and Southern Yemen; the independent sultanate of Muscat and Oman; the Fed. of Arab Emirates, and the sheikdom of Kuwait.

A sandy coastal plain of varying width borders the Red Sea, behind which a high mountain chain rises abruptly to 7,000-8,000 ft. Behind this range is the extensive plateau of Nejd, averaging 3,500 ft., with subsidiary ridges superimposed upon it. The land becomes gradually lower towards the E. coast. The interior is occupied by a vast sandy desert. The rainfall is scanty, and day temperatures are high. The total pop. is c. 12 millions.

The Beduin tribes of the interior lead a nomadic life, their number indeterminate. On the Oman coast there are a number of Negroes.

Camel and sheep rearing is carried on, but the formerly renowned horses and pearls of A. are no longer in great demand. Most important among the considerable mineral wealth is petroleum, discovered in 1933 and obtained in increasing quantity from Bahrein, Saudi Arabia, Kuwait and Qatar. Mecca and Medina rely largely on the profitable pilgrim traffic: other towns incl. Riyadh, Jidda, Hail, Dhahran (petroleum centre) and the Persian Gulf port of Ras Tanura (oil refineries). There are some roads, but desert transport is still largely by camel caravan: a railway, 350 m. long, linking Dhahran with Riyadh, was opened 1951.

History. The Arabian civilization was revived by Mohammed during the 7th cent. A.D. from the political chaos which existed. In the new empire which was subsequently created A. itself became merely a subordinate state, and its cities were eclipsed by Damascus, Baghdad, and Cairo. Until the 20th cent. the interior was unknown and unexplored, though the outer rim had become fully known. The exploration of the interior deserts and oases was due to the efforts of notable travellers - Gertrude Bell, Harold Ingrams,

AQUEDUCT. The Pont du Gard at Nîmes in southern France is a magnificent Roman example dating from c. A.D. 18. The three tiers of arches reach a height of 160 feet. It was built by Agrippa, responsible also for aqueducts supplying Rome, the Virgo and Julia.

*Members of the Arab League

T. E. Lawrence, H. St. John Philby, Freya Stark, C. Doughty, etc. See SAUDI ARABIA, etc.

ARABIAN NIGHTS, or *The Thousand and One Nights*. Collection of tales dealing with scenes in Persia. They had been current for many centuries before being introduced to the West by the French orientalist, A. Galland, in 1704. Collections of stories had existed orally since the 10th cent., some being Arabian.

ARABIC. The main representative of the southern branch of the Semitic languages. Classical Arabic emerged in Cent. Arabia in the 6th cent. A.D. out of the many dialects spoken throughout the peninsula; as the literary language of Islam, with the Koran as its perfect and inimitable ideal, it spread along with the faith of the Prophet to Syria, Palestine, and Mesopotamia; to Egypt, N. Africa, the Sudan, Nigeria, and several more southerly districts; and today, in various distinct dialects, it is the *lingua franca* over a wide area of the Near East and Africa. It has long lost its footholds in Spain (Mozarabic), Sicily, and elsewhere in the Mediterranean, but the Maltese still speak an A. dialect. The A. vocabulary influenced the Persian, Turkish, Hindustani, and Malay languages; it also left traces in Spanish, and other European languages took up terms of astronomy, chemistry, etc., such as *alchemy*, *alcohol*, *alkali*, *alchemist*, *algebra*, and many more. A. calligraphy was a highly developed art, and ornamental inscriptions play an important part in interior architecture of Islamic countries. The complexity of the script, requiring the printer to use 300 to 1,000 separate characters has been an important factor in maintaining a low level of literacy in Arab countries. However, in 1961 Nasri Khattar, a Lebanese, perfected a 'unified' Arabic alphabet of 30 letters which is being widely adopted.

ARABIC LITERATURE. The literature of the Arabic-speaking peoples began with poetry which is a developed art, even in the earliest examples. Only the ode is used, varying in length from 30 to 100 lines with a single rhyme throughout. Most A. poems have been composed since A.D. 550, but some may be a hundred years earlier. The works of Pre-Islamic poets have come down to us in the form of *diwans*, consisting of the collected works of an individual poet, and anthologies. The most famous early

Islamic poets were Farazdak, Jarir, and Akhtal. The first love-lyrics were composed by 'Umar ibn al-Rabi'a. Under the Abbasid caliphs, the poets gave up writing about Beduin life, and drew their inspiration from the life of the towns. Typical of this period were Abū Nuwās (d. 810) and Bashshār ibn Burd (d. 783) whose poems deal with wine, women, and song, but the most outstanding poet was Mutanabbi (d. 965). A great deal of literature was of a practical nature, such as works on political and economic geography; handbooks for civil servants; and dictionaries, the first of these being by Khalil ibn Ahmad (d. 791). *Rhymed prose* was used for the introduction of books and in a monarch's letters. The Arab is very fond of sitting about and talking, and this custom was exploited in literature in works which consisted of short talks or sketches, such as those by Hamadhāni (d. 1007) and Hariri (d. 1122). The oldest Arabic grammar extant is one by a Persian, Sibawaihi (d. c. 795). Among the most famous theological works are the commentary on the Koran by Tabari; the *Kashshāf* by Zamakhshari (d. 1143) which was later abridged by Baidāwi (d. 1286); a commentary by Rāzi (d. 1209); and an 'Introduction' to the study of the Koran by Suyūti.

Modern A.L. shows western, esp. French, influences. Among the most famous literary personalities are the poets Shawki and Ḥāfiẓ Ibrāhīm in Egypt, and Zuhāwī in Iraq; Jurji Zaydān, a writer of popular historical novels; and the Egyptian essayists Manfalūti and 'Abbād.

ARABIC NUMERALS. The signs 0 1 2 3 4 5 6 7 8 9 which were in use amongst the Arabs before they were taken over by the peoples of Europe during the Middle Ages in place of the Roman numerals. They appear to have originated in India, and reached Europe by way of Spain.

ARAB LEAGUE. League formed at Cairo on 22 March 1945, by Egypt, Syria, Iraq, Lebanon, Transjordan (Jordan, 1949), Saudi Arabia, and Yemen. Its object was to promote unity among the Arab states. Those members bordering Israel (q.v.) fought the Israelis in 1948, but during 1949 made armistices though refusing to recognize Israel. Libya was admitted 1953, Rep. of Sudan 1956, Morocco and Tunisia 1958, Kuwait 1961, Algeria 1962. An Arab Common Market, open to League members, was estab. in 1965. In 1967 Iraq, Jordan, Lebanon and Syria were engaged in further hostilities with Israel (q.v.), and sporadic incidents continued.

ARACHNE (arak-nē). In Greek mythology, a Lydian girl who was so skilful a weaver that she challenged the goddess Athena to a contest. Athena tore A.'s beautiful tapestries to pieces, whereupon A. hanged herself in despair and was transformed into a spider and her weaving became a cobweb. A. in Greek means 'spider'.

ARACHNIDA. A class of animals of the phylum Arthropoda, distinguished by the single pair of preoral appendages being modified as jaws, typically composed of 2 or 3 segments and commonly pincer-like or chelate. They are classified according to certain external characters and breathing organs, which in marine forms are gills and in land forms either lung-books or fine tubes (tracheae) permeating the tissues, into the following 12 orders: *Xiphosura* (king crabs), *Gigantostoma* (extinct form of marine swimming species), *Scorpiones* (scorpions), *Pedipalpi* (whip-scorpions), *Palpigradi* (minute degenerate pedipalpi), *Araneae* (spiders), *Solifugae* (false spiders), *Pseudoscorpiones* (false scorpions), *Podogona* (obscure isolated order surviving unchanged from the Carboniferous period, living in the forests of Brazil and W. Africa), *Opiliones* (harvest spiders), *Acari* (ticks, mites and gall mites), and *Pycnogonida* (small aberrant and isolated order, including the British species *Pycnogonum littorale*). See SPIDER, etc.

ARABIA. An old-style fort at Saiwun in the Wadhi Hadramaut, Kathiri State, S. Arabia Protectorate. In the foreground a modern truck loaded with a 1,000 gallon rubber-nylon fabric collapsible container used for gas, petroleum vapour, and a variety of fluids. Courtesy of Dunlop Rubber Co. Ltd.

ARAD (or'od). Rumanian town on the Mures, 100 m. N.E. of Belgrade; an important route centre with many industries. Pop. (1966) 126,005.

ARAGON (ahrahgoñ'), Louis (1897-). French poet and novelist. Beginning as a Dadaist, he became one of the leaders of Surrealism, pub. vols. of verse and in 1930 joined the Communist party. Taken prisoner in the S.W.W., he escaped to join the underground, experiences reflected in the poetry of *Le Crève-Cœur* (1942), *Les Yeux d'Elsa* (1944), and the short stories *Servitude et grandeur des Français* (1945). *La Semaine Sainte* (1958, *Holy Week*) is a novel.

ARAGON. Ancient kingdom of N.E. Spain with the cap. Saragossa. It was a Roman province until taken by the Visigoths, who lost it to the Moors in the 8th cent. In 1035 it became a kingdom; it was united to Catalonia in 1137, and to Castile in 1479.

ARAKA'N. A natural division of Burma, some 400 m. long, forming a tapering strip of territory on the Bay of Bengal coast which narrows from 90 m. wide in the N. to 15 m. in the S. The coast is strewn with islands, and the chief town is Akyab. The ancient kingdom of A. with the cap. Myohauing, now in ruins, was conquered by the Burmese in 1782, and passed to the British in 1826. The majority of Arakanese are Buddhists. Pop. c. 1,150,000.

ARAL. Inland sea or lake in western Asia, U.S.S.R. Lying about 200 m. E. of the Caspian Sea, it is 235 m. long, and 180 m. wide. Its area (c. 24,000 sq. m.) is decreasing through evaporation. It is fed by the Sir Darya and the Amu Darya.

ARAM, Eugene (1704-59). British murderer. B. in the West Riding, he was a schoolmaster at Knaresborough, and in 1745 was tried and acquitted on a charge of being concerned in the disappearance of a local shoemaker. After achieving some distinction as a philologist, he was arrested at Lynn in Norfolk, following the discovery of a skeleton in a cave at Knaresborough. He was tried at York, confessed to the murder after his conviction, and was hanged. He is the subject of works by Lytton, Hood, etc.

ARAMAIC. A Semitic language in the Near East, the vernacular of Jesus Christ and the Apostles, and probably the one in which the Gospels were first written. The Aramaeans were nomads who set up states in Mesopotamia in the 13th cent. B.C., and flowed over into N. Syria in 12th and 11th cents. B.C. Damascus, Aleppo, and Carchemish were among their chief centres, but all were subjugated by Assyria by

the end of the 8th cent. By the end of the 7th cent. Syria and Mesopotamia had become thoroughly Aramaized. A. was the *lingua franca* of the day, and under the Achaemenides it became one of the official languages of the Persian empire. In some isolated villages A. dialects are still spoken by native Christians.

ARAN. Group of 3 rocky islands (Inishmore, Inishmaan, Inisheer) across the mouth of Galway Bay, Rep. of Ireland, forming a natural breakwater. The inhabitants are Irish-speaking fisherfolk. Area 18 sq. m.; pop. c. 2,600.

ARANJUEZ (ahrahn-hweth'). Spanish town on the Tagus, 25 m. S.S.E. of Madrid. The palace was for centuries a royal residence. Pop. c. 22,000.

ARANY (or'ony), János (1817-82). Hungarian writer, b. at Nagyszalonta (now in Rumania). His comic epic *The Lost Constitution* (1846) was followed in 1847 by *Toldi*, one of the finest products of the popular national school. In 1860 he settled in Pest as editor of literary reviews. In 1864 appeared his epic masterpiece *The Death of King Buda*. During the last years of his life A. produced the remainder of the *Toldi*-trilogy, and his most personal lyrics.

ARARAT. Mountain mass in Turkey, near the borders of Armenia S.S.R. and Persia, consisting of Great A., 17,000 ft., and Little A., 12,900 ft. Tradition ascribes to A. the resting-place of the Ark after the deluge, and the U.S.-sponsored Archaeological Research Foundation sought to estab. that wood fragments found in 1955 and 1958 were part of its timbers.

ARAUCANIAN INDIANS (arökän'ian). Original inhabitants of central Chile, comprising various tribes. An agricultural and hunting people, they lived in small villages, and were excellent warriors, defeating the Incas and opposing the Spanish forces for 200 years. Some 120,000 still survive living in reserves.

ARAUCA'RIA. Genus of coniferous trees allied to the firs, natives of the southern hemisphere, and often attaining a gigantic size. They include the monkey-puzzle tree (*A. imbricata*), the Bunya-Bunya pine (*A. bidwillii*) of Australia, and the Norfolk Island pine (*A. excelsa*).

ARBITRATION. The procedure whereby two nations refer their differences for settlement to a selected person or persons. In the 19th cent. the head of a friendly state or an international commission was usually selected as arbitrator; the 20th cent. has seen 3 attempts to establish permanent machinery for the settlement of disputes—the Hague Court, the League of Nations, and the United Nations.

Proposals for a permanent court were put forward in the 18th cent. by the Abbé de St. Pierre and Jeremy Bentham, but the practice of referring disputes to A. did not come into general use until the 19th cent. A well-known example is the dispute between the British and U.S. govts. over the *Alabama* during the American Civil War.

The Hague Peace Conference of 1899 led to the setting up of a permanent court of A., and after the F.W.W. the Hague Court was maintained, and a Permanent Court of International Justice also set up to deal with disputes of a legal nature. A number of disputes, mainly frontier problems arising from the peace settlement, were successfully settled between 1920 and 1925. By the Locarno Pact of 1925 France and Germany, and by the Kellogg Pact of 1928 fifty-nine states, agreed to renounce war as an instrument of policy and to refer all differences to A.

Under the Charter drawn up at San Francisco (June 1945), the United Nations pledge themselves to seek a solution to all disputes by negotiation, arbitration, or other peaceful means. If these fail, the parties are to refer the matter to the Security Council. Legal disputes should normally be referred to the International Court of Justice.

ARBOR DAY. Day set apart in U.S.A. for the planting of trees along the highways, in parks, etc. It is also observed in S. Australia and New Zealand.

ARBROATH (arbrōth). Scottish fishing town (burgh) on the coast of Angus. Pop. (1961) 19,533.

ARBUTHNOT, John (1667–1735). British physician and author. B. in Kincardineshire, he practised medicine in London, and was physician to Queen Anne 1705–14. He was the friend of Pope, Gay, and Swift, and was the chief author of the satiric *Memoirs of Martinus Scriblerus*. He also developed the national character of John Bull in his *History of John Bull* (1712).

ARBUTUS, or strawberry tree (*Arbutus unedo*). Plant of the family Ericaceae, familiar in cultivated state as an ornamental garden tree. It produces handsome white flowers and bright red fruit.

ARCACHON (ahrkashon). Coastal town and fashionable holiday resort in Gironde dept., S.W. France. Pop. (1962) 15,820.

ARCADIA. Central plateau district of Peloponnesus, S. Greece; area 2,020 sq. m., pop. (1961) 135,042. In antiquity it was inhabited by shepherds and hunters, whose mode of life has been idealized in literature as carefree and idyllic, e.g. by Sidney.

ARCADE TRIOMPHE (ahrk'-de-trëonf'). Triumphant arch in the Place de l'Étoile, Paris, begun by Napoleon and completed in 1836 to commemorate his victories of 1805–6. Beneath it rests France's 'Unknown Soldier'.

ARCH, Joseph (1826–1919). British Radical politician and trade unionist. B. at Barford, Warks, the son of an agricultural labourer, he worked in the fields from boyhood. Entirely self-taught, he became a Methodist local preacher, founded the National Agricultural Union (the first of its kind) in 1872, and was Liberal-Labour M.P. for N.W. Norfolk.

ARCH. A curved structure consisting of several wedge-shaped stones or other hard blocks which are supported by their mutual pressure. The term is also applied to any curved structure which is an A. in form only, but not in function.

ARCHAEOAN (arkē'an). In geology, the earliest system of rocks. Underlying rocks of the Cambrian System, they may be composed of igneous, metamorphic, or stratified rocks, and often contain valuable minerals. 'Azoic' and 'Eozoic' are synonymous with A.

ARCHAEOLOGY. The study of the material products of the past, providing in the case of prehistoric man, or of peoples who had no written records, our only source of knowledge, but also supplementing our information on the historic and recorded peoples. The oldest man-made implements found are c. 1,820,000 yrs. old, and the written documents of Egypt and Mesopotamia go back c. 5,000 yrs.

Systematic classification began when J. C. Thomson placed the specimens in the Danish Nat. Museum c. 1818 according to 3 periods, which he called the Stone, Bronze, and Iron Ages. Effective recording of excavation and conservation of objects was practised c. 1840 by the early marine salvage workers, the brothers Charles and John Deane, and Gen. Sir Charles Pasley, who had meticulous watercolours made of their finds, complete with encrustations, and pioneers on land were Pitt-Rivers and Petrie (qq.v.), see also Schliemann, Evans, Rawlinson, Layard, Ventris, Wheeler, Emery, and Leakey.

During the 20th cent. there has been a widening of scope, for example, to medieval and industrial A., and use of scientific 'tools', e.g. carbon-14 dating (see CARBON); chemical methods of conservation, as

with the Swedish warship *Vasa* (see illus. p. 1002); and location of sites by aerial photography and sonar, e.g. Alexander McKee's search for Henry VIII's battleship *Mary Rose* off Portsmouth in 1967–8.

ARCHAEOPTERYX (arkēop'teriks). The earliest known bird, remarkable for its reptilian features. Two fossil specimens have been dug out of the Jurassic limestone of Bavaria.

ARCHANGEL. Seaport in N. Europe in R.S.F.S.R. on the N. Dvina river, at the head of the Gulf of A. It is blocked by ice for some 6 months of the year, but is nevertheless the chief timber-exporting port of the U.S.S.R. Pop. (1967) 308,000.

A. was colonized by Norsemen under Othere in the 10th cent. Chancellor in 1553 built an Eng. factory there. Boris Godunov made it an open port, and it was of prime importance until Peter the Great built St. Petersburg. It was a centre for the interventionist armies after the Revolution of 1917, and during the S.W.W. was a receiving station for Anglo-American supplies.

A. gives its name to a region, area 230,000 sq. m., pop. c. 1,050,000, of which the chief industry is lumbering.

ARCHBISHOP. In the Christian Church, a bishop of superior rank, who has authority over other bishops in his jurisdiction. Very often an A. is also a metropolitan, i.e. the head of an ecclesiastical province. In the Church of England there are two As., both of them metropolitans—the A. of Canterbury ('Primate of All England') and the A. of York ('Primate of England').

ARCHDEACON. Originally an ordained dignitary of the Christian Church charged with the supervision of the deacons attached to a cathedral. Today in the R.C. Church the office is purely titular; in the C. of E. an A. has still many duties of a business character, e.g. the periodic inspection of the churches.

ARCHER, Frederick James (1857–86). British jockey. B. at Cheltenham, he won 2,748 of the 8,084 races in which he rode, incl. 5 Derbys (1877, 1880, 1881, 1885, 1886), 4 Oaks, 6 St. Legers, and 5 Two Thousand Guineas. His record of 246 winners in one season was not beaten till 1933 (see RICHARDS, GORDON). He shot himself while ill with typhoid fever.

ARCHERY. The use of the bow and arrow in war and the chase. Flint arrowheads have been found in very ancient archaeological deposits, and bowmen are depicted in the sculptures of Assyria and Egypt and indeed all the nations of antiquity. Until the introduction of gunpowder in the 14th cent., bands of archers were to be found in every European army. The English archers distinguished themselves in the French wars of the later Middle Ages; and to this day the Queen's bodyguard in Scotland is known as the Royal Company of Archers. The Honourable Artillery Company was originally a body of archers.

Up to the time of Charles II the practice of A. was fostered and encouraged by English rulers. Henry VIII in particular loved the sport, and it was in his reign that Ascham wrote his *Toxophilus*. By the mid-17th cent. A. was no longer important in warfare and interest waned until the 1780s, although in the N. of England shooting for the Scorton Arrow has been carried on, with few breaks, from 1673. Organizations incl. the European Fédération Internationale du Tir

ARCHAEOPTERYX

ARCH. S – springs;
K – key-stone.

à l'Arc (1931); the British Grand National A. Soc. (1961); and in the U.S. the National A. Asscn. (1879) and, for actual hunting with the bow, the National Field A. Asscn. (1940).

ARCHAEOLOGY. Cutting a cargo-filled lump from the sea-bed concretion over a wrecked Roman ship in the Mediterranean.

Courtesy of Pennsylvania University Museum Expedition.

b. at Kiev. He produced his first Cubist sculpture in 1911, went to New York in 1923, and has experimented with carved plastic.

ARCHITECTURE. The first of the plastic arts — those concerned with modelling or moulding materials into various forms — the combination of function and beauty in the art of building. From earliest times until the mid-19th cent. all permanent building was governed by 3 structural principles: the post and lintel, the wooden truss and the masonry arch. Latterly the steel skeleton and reinforced concrete have revolutionized A., being the first entirely new principles evolved since Roman times, thus liberating it from limitations imposed by the weight of stone and brick at each floor level, allowing great flexibility in design and buildings of immense height. Further developments have entirely removed the need for structural walls and roofs as separate entities, e.g. the geodesic dome of Buckminster Fuller (q.v.). The basic problem of the A. has always been how best to enclose space to fulfil the varied needs of human occupation, and, in so doing, the trends of contemporary life must be considered, and will be reflected in the shape of buildings. The earliest permanent buildings, dating from c. 4,000 B.C. in Egypt, reflect the grandeur of the ruling classes and their system of worship. Progressive changes tended to embrace more varied and specialized structures to suit the needs of a greater proportion of the population. In the 19th cent. the acceptance of the division of A. into ecclesiastical (churches, etc.), civil (houses and public buildings), military and naval, illustrates the rigidity which had overtaken the subject, so that the A. had become merely the creator of academic styles. In the 20th cent. men such as Le Corbusier, Gropius, and Mies van der Rohe broke free from these shackles, and contemporary A.s., such as Doxiadis (q.v.), widen their scope beyond the individual building or group of buildings to the whole city and its environs, adapting themselves to new synthetic materials and factory-made components, and also to the necessity of making their work capable of change and growth to meet the expansion of a city or the alteration of individual housing requirements as families first increase and then dwindle when children leave home. See **EKISTICS**.

Architects throughout the world are linked through the International Union of Architects (1948): import-

ant national organizations are the Royal Inst. of British Architects (1835) and the American Inst. of Architects (1857). See **GOTHIC A.** and sections under individual countries, also illus. p. 58.

ARCHIVES. Historically valuable records and papers which may belong to public bodies, institutions, families, individuals, etc. In 1945 the National Register of Archives was estab. in London to record details of local and private collections and contains over 11,000 reports. The records of the courts of law and govt. depts. since the Norman Conquest are housed at the Record Office (q.v.). In the U.S. the Declaration of Independence, the Constitution of the U.S., and the Bill of Rights are exhibited at the National A. Hall, Washington. The National A. and Records Service is responsible for the permanent preservation of federal records and administers the presidential libraries: the Franklin D. Roosevelt at Hyde Park, N.Y.; Harry S. Truman at Independence, Missouri (q.v.), and Dwight D. Eisenhower at Abilene, Kansas.

ARCOT. Chief city of the district of N. Arcot on the Palar, 65 m. W.S.W. of Madras, India. It is famous for Clive's defence in 1751, when with only 80 Europeans and 150 Sepoys able to carry out their duties he held it for 50 days against 10,000. Pop. c. 20,000.

ARCTIC. Regions lying around the N. Pole, comprising those areas of land and water in which typically polar conditions prevail, or those N. of the line of tree growth. Most of this area is taken up by the Arctic Ocean (area 5,440,000 sq. m.), divided into a number of seas. These seas have a low salinity, and freeze readily, the whole ocean being generally impassable to vessels. Some of the pack ice is carried by currents beyond the Arctic Ocean, the main current being a rotary one, which sweeps down the Greenland coast to meet the warm Atlantic drifts, fogs being frequent where the two meet. Often breaks appear in the ice, but the water is never clear for long; the pack ice renders unnavigable the channels of the N.W. Passage, and hinders shipping in the N.E. Passage and N.W. areas of the N. Atlantic.

CLIMATE, VEGETATION, FAUNA. The A. regions have a cold winter and a brief, warm summer lasting up to 2 months. Temperatures fall below zero F. for the winter months, but the A. is not as cold as N.E. Siberia or the Antarctic. There is a slight summer rainfall, replaced by snow in winter, amounting to an annual precipitation of 10–12 in. Vegetation is scattered, occurring in small patches with moss and Alpine plants. In summer brightly-coloured wild flowers occur. There are some bushes but no trees. On the scanty growth of moss, reindeer and musk-oxen

ARCHITECTURE. The American Embassy (1962) in Grosvenor Square is the focal point of 'Little America' in London's Mayfair. Eero Saarinen's design is an example of modern styling planned to harmonize with an existing architectural setting, and blends excellently with the older buildings surrounding the square.

Courtesy of the United States Information Service.

flourish; hares, lemming, foxes, and wolves also dwell on land, while polar bears, seals, and the walrus live on sea products. Birds are rarely seen except in summer.

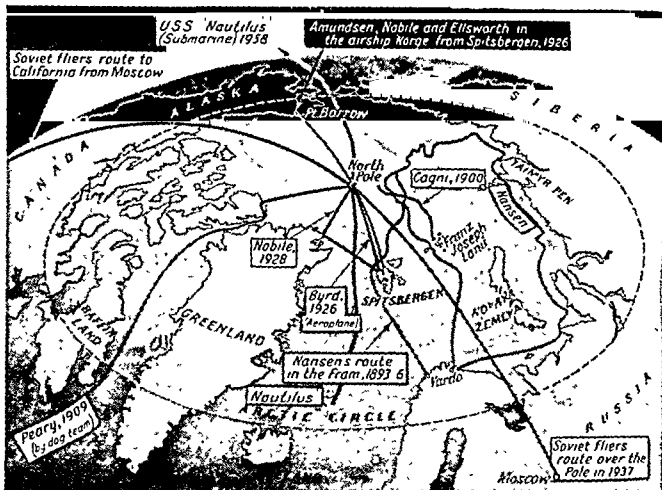

POPULATION. The only native inhabitants are the dwindling Eskimos of the Canadian Arctic and Greenland. Temporary visitors include fur traders, miners, and trappers, while some of the islands serve as meteorological bases.

Exploration. The desire to find trade routes to the E. was the main incentive to early exploration in the N. of America and Asia. First in the long quest for the N.W. Passage was John Cabot in 1497; M. Frobisher in 1576 discovered the Frobisher and Hudson Straits; H. Willoughby and R. Chancellor began the search for the N.E. Passage in 1553. W. Barents (1596) and H. Hudson (1607) tried to cross the Arctic Ocean, Barents discovering Spitsbergen. Franklin discovered the N.W. Passage, but perished in the attempt. The 1st to sail through it was Amundsen in 1903–5. The N.E. Passage was navigated by A. E. Norden-skjöld in 1878–9. Attention was then turned to the N. Pole. W. E. Parry had made an attempt from Spitsbergen and there were many more attempts before R. E. Peary reached the Pole on 6 April 1909. Aerial exploration began in 1897 when S. A. Andrée made a disastrous balloon flight. Airships were tried by W. Wellman in 1907 and 1910, and hydroplanes by Amundsen in 1925; R. E. Byrd claimed to have flown over the Pole in a monoplane in 1926, but doubt has been cast on the possibility that he could have covered the distance in the time he took; Nobile accompanied by Amundsen crossed the Pole in an airship in 1926; and C. F. Blair made the 1st solo flight in 1951. In 1958 the U.S. submarine *Nautilus* crossed the Pole beneath the ice.

Scandinavian Air Lines began the first commercial service on a 'great circle' route over the Pole in 1954, and from 1960 a Russian nuclear-powered ice-breaker has kept open for 150 days a year a 2,500 m. Asia-Europe passage along the N. coast of Siberia. A number of weather stations are maintained.

ARDEBIL (ahrdebél'). Persian town, near the Russian frontier. An important road centre, it also has an airfield. A. exports dried fruits, carpets, and rugs. Pop. (1966) 76,780.

ARDECHE (ahrdash'). River of S.E. France, a

ARCTIC. Routes of famous flights and expeditions.

tributary of the Rhône. Near Vallon it flows under the Pont d'Arc, a natural bridge. It gives its name to a dept.

ARDENNES. A wooded plateau extending from N. France through S.E. Belgium to N. Luxembourg. It has an area of 2,020 sq. m. and is cut through by the Meuse and other rivers in wooded gorges. Towns incl. Sedan, Mézières, Malmédy, Dinant, and Spa. A dept. of France is called A.

Early in the F.W.W., the A. was the scene of fierce fighting, while in the S.W.W. the Germans thrust through it in 1940 to separate the British from the French forces. The A. was retaken in 1944, but in Dec. of that year Rundstedt made a last desperate bid to break through once more to Dinant and Liège. This was defeated and the Allied line restored, 31 Jan. 1945. Nearly 77,000 Americans were killed, missing or wounded in this battle.

ARDIZZONE (ahrđitzō'ni), Edward Jeffrey Irving (1900–). British artist. An official war artist 1940–6, he is also a book illustrator of individuality, both for adults and children.

ARECA. Genus of palms, native to tropical Asia. The seeds, known as A. nuts, have purgative properties, and *A. catechu* provides the betel-nut.

AREQUIPA (ahrākē'pa). City of Peru at the base of the volcano El Misti. Founded by Pizarro in 1540, it is the cultural focus of S. Peru, and a busy commercial centre. Pop. (1965) 160,836.

ARES (ā'rēz). Greek god of war, identified by the Romans with Mars. The son of Zeus and Hera, he was worshipped chiefly in Thrace.

ARĒTHŪ'SA. In Greek mythology, a Nereid and nymph of the fountain and spring of A. in the island of Ortygia near Syracuse.

ARETINO (ahrātē'noh), Pietro (1492–1557). Italian poet and satirist. B. at Arezzo in Tuscany, he was banished for a satirical sonnet on indulgences, but found favour with Leo X at Rome. After he pub. the obscene *Sonetti Lussuriosi*, he removed to the Medicean court at Florence, and later settled in Venice. He is said to have killed himself accidentally by falling off a stool while laughing at an amusing story. His works include sonnets, comedies, a tragedy, and devotional books.

AREZZO (ahrēt'sō). Italian town in the valley of the Upper Arno, 40 m. S.E. of Florence; it has a Gothic cathedral and a citadel. Pop. (1961) 74,245.

ARGALI (ahr'gali) or Arkal. The huge Wild Sheep (*Ovis ammon*) of the Altai and other parts of

ARCHITECTURE. Britain is celebrated for her schools. Breaking away from the stiff conventional lines, Tuxford County Secondary in Nottinghamshire has the aspect of a pleasant residential close. Photo: Architectural Review.

Central Asia, where it is represented by many local races. The ram may stand from 3½ to 4 ft. at the shoulder, and has massive, spirally twisted horns.

ARGENTEUIL (ahrzhohntöy). French town on the Seine, 5 m. W.N.W. of Paris, in Seine-et-Oise dept. Pop. (1962) 82,458.

ARGENTINA. S. American rep. stretching from within the tropics to the tip of the S. American mainland and including the E. part of the island of Tierra del Fuego; area 1,073,000 sq. m., the 2nd largest country in S. America. The Falkland Is., a British group off the S.E. coast, are claimed by A., as are the Falkland Is. Dependencies in the Antarctic.

The western part of A. is occupied by the high Andes, and includes Aconcagua (23,000 ft.), long thought to be the highest peak of the Americas, displaced 1956 by Ojos del Salados. Chile, 23,293 ft. The long gentle eastward slopes lead down to the rolling plains of central A.; rainfall is sparse, so much is semi-desert, particularly in the Patagonian steppes. Further N. crops can be grown with irrigation, while in the Gran Chaco region of the extreme N. the surface is covered with forest, savannah, and swamp. In the E., between the Parana and Colorado rivers, lie the pampas, a rich pastureland which supports the bulk of A.'s cattle. The country is drained N.W. to S.E. by the Uruguay and the Parana with its tributary the Salado (which enter jointly the estuary of the Plate), the Colorado, the Negro, and lesser ones.

Population. In 1965 the est. pop. was 22,520,000, the great majority being of European origin, particularly Italians and Spaniards. Indians, descended from the original natives, number only 20,000. Immigration on a large scale began during the late 19th cent., when European settlers from the Latin countries poured in. Roman Catholicism is the religion of the majority, and is supported by the State.

Economic Development. Agriculture provides the basis of economy. Livestock are reared extensively on the rolling pampas. High-quality beef cattle are reared on specially grown grasses and fodder crops; millions of acres of poorer land are under alfalfa. Much meat is chilled or frozen for export, a great deal is canned into corned beef. Sheep-rearing, in which A. formerly ranked second to Australia, has greatly declined. Wool, frozen beef, mutton and lamb, and wheat, which is the leading cereal crop, are exported. Mineral wealth, almost untapped, includes oil and gas deposits, gold, silver, iron, copper, etc. Industrial development has been hampered by the lack of hard coal and iron, but industries based on local raw materials have grown up in some cases employing hydro-electric power.

Towns and Communications. The Federal cap. is Buenos Aires. Rosario, Parana, Córdoba, La Plata, Tucumán, Mendoza and Sante Fé are other large cities. The main centres are linked by rail, the system centring on Buenos Aires. There is a network of national roads, and a system of air services.

History. The early exploration and colonization of the area which became A. was carried out by Spaniards in the 16th cent. The belief that rich mineral resources occurred in the interior led to settlement during the 17th and 18th cents.; early in the 19th cent. the states of S. America overthrew their Spanish rulers, and in 1816 the United Provinces of the River Plate (Argentina, Uruguay and Paraguay) declared their independence. A long struggle with Spain ensued, and aid was given to other S. American countries also striving for independence.

The federal republican constitution adopted 1853 endured until Gen. Juan Perón, pres. 1946–55, abandoned his initial apparent liberalism and made himself dictator. He was overthrown by a military coup, but Peronista activities revived and to counteract them Lt.-Gen. Juan Carlos Onganía became pres. in 1966 after a bloodless coup. The National Congress

(Senate and House of Deputies) was abolished, the pres. combining executive and legislative functions: for local administration A. is divided into 22 provs. and a federal district.

ARGENTINITA. Spanish dancer, her real name being Encarnación Lopez (1898–1945). B. in Buenos Aires, she soon achieved fame in Spain. With Garcia Lorca, she started in 1932 the Madrid ballet.

ARGON. Chemically inert gaseous element, at. wt. 39.944, symbol A., at. no. 18. Discovered in air by Rayleigh and Ramsay after all oxygen and nitrogen was removed chemically, it is used in electric discharge lamps.

ARGONAUT, or Paper Nautilus. Genus of dibran-
chiate cephalopods (*Argonauta*) belonging to the division Octopoda. *A. argo* inhabits the Mediterranean, and was well known to the ancient Greeks.

ARGONAUT

ARGONAUTS. In Greek legend the band of heroes who accompanied Jason when he set out in the ship *Argo* to fetch the Golden Fleece. See JASON.

ARGONNE (ahrgron'). Wooded plateau in N.E. France, separating Lorraine and Champagne. It was the scene of fierce fighting in the F.W.W.

ARGOS. Ancient Greek city in the N.E. Peloponnese, near the head of the gulf of Nauplia. In the Homeric age it was one of the chief cities of Greece, and the name Argives was sometimes used instead of Greeks. The modern town is a rly. junction. Pop. c. 15,000.

ARGUS. In Greek mythology, a giant with 100 eyes, set by the jealous Hera to watch over Io, the beloved of Zeus, who had been turned into a cow. Hermes charmed A. to sleep with his flute, cut off his head, and Hera transplanted his eyes to the tail of her favourite bird, the peacock.

ARGYLL (argil'), Earls and Dukes of. Line of Scottish peers who trace their descent to the Campbells of Lochow. The earldom dates from 1457. Archibald, the 8th earl (1607–61), led the Covenanting party during the Civil Wars, crowned Charles II in 1651, submitted to Cromwell in 1652, and was beheaded after the Restoration. Archibald, 9th earl (1629–85), was executed for leading a rebellion in co-operation with Monmouth's rising. Archibald, 10th earl (1651–1703), received a dukedom in 1701. John, 2nd duke (1678–1743), became a peer of the U.K. for helping to promote the Union.

George Douglas, 8th duke (1823–1900), was Secretary for India 1868–74, and opposed Irish home rule. In his writings he attempted to reconcile Christianity with scientific discovery. John Douglas Sutherland, 9th duke (1845–1914), m. Princess Louise, dau. of Queen Victoria, in 1871, and was Gov.-Gen. of Canada, 1878–83.

ARGYLLSHIRE. Second largest co. of Scotland, on the W. coast and including many of the Western Isles. It is mountainous, with a deeply indented coastline. The sea lochs include Moidart, Linnhe, Etive, Fyne, and Long, while Loch Awe is the largest of the fresh-water lochs. The climate is wet and bleak. The farms are run mainly by crofters, and much of A. is moorland. Inveraray is the county seat; other towns include Campbeltown and Lochgilphead, Dunoon, Oban, and Ballachulish. Area 3,124 sq. m.; pop. (1961) 59,345.

ARIADNE. In Greek legend, the dau. of Minos, king of Crete. When Theseus came from Athens as one of the victims offered to the Minotaur, she fell in love with him and gave him the ball of thread by means of which he was able to find his way out of the labyrinth.

ARIANISM. A system of Christian theology,

founded about A.D. 310 by Arius (q.v.), and condemned as heretical at the Council of Nicaea in 325. Certain 17th and 18th cent. theologians held Arian views akin to those of modern Unitarianism.

ARID ZONES. Infertile areas with a small, infrequent rainfall that rapidly evaporates because of high temperatures, and which form a serious problem in Morocco, Pakistan, Australia, America, etc. The problem involved is not merely finding new sources of water, although constant research goes on to discover, for example, cheaper methods of distilling sea water, but the conservation of existing sources by avoiding evaporation (e.g. the artificial recharging of natural groundwater reservoirs) and the eradication of salt in irrigation supplies from underground sources or as a surface soil deposit in poorly drained areas.

ARIEGE (ahr-ē-āzh'). River in S. France, a tributary of the Garonne. It gives its name to a dept.

ARIOSTO (ahr-ē-ost'ō), Ludovico (1474-1533). Italian poet, b. at Reggio. He wrote Latin poems and comedies on classical lines, joined the household of Cardinal Ippolito d'Este in 1503, was frequently engaged in embassies and diplomacy, and pub. the *Orlando Furioso* at Ferrara in 1516. This is a romantic epic, dealing with the wars of Charlemagne against the Saracens, and the love of Orlando (Roland) for Angelica, a princess of Cathay. The perfection of its style and its unflagging narrative interest place A. among the great Italian poets. In 1521 A. became governor of a province in the Apennines, and after 3 years retired to Ferrara, where he d.

ARISTARCHUS (ark-) (c. 220-143 B.C.). Greek grammarian and critic. B. at Samothrace, he became head of the Alexandrian library about 180 B.C. He carefully revised the poems of Homer.

ARISTARCHUS OF SAMOS (c. 310-264 B.C.). Greek astronomer, famed as being the first to maintain that the earth revolves round the sun.

ARISTIDES (c. 530-468 B.C.). Athenian statesman. He was one of the 10 Athenian generals at Marathon in 490 B.C., and was elected chief archon. Later he came into conflict with the democratic leader Themistocles, and was exiled c. 483 B.C. He returned to fight against the Persians at Salamis in 480 B.C., and next year commanded the Athenians at Plataea. His popular title 'the Just' was probably derived from his just assessment of the contribution to be paid by the Greek states who entered the Delian league against the Persians.

ARISTIPPUS (c. 435-356 B.C.). Greek philosopher, founder of the Cyrenaic or Hedonist school. A pupil of Socrates, he developed the doctrine that pleasure is the only good in life. He lived at the court of Dionysius of Syracuse, and later with his mistress Lais, the courtesan, at Corinth.

ARISTOPHANES (c. 448-380 B.C.). Comic dramatist of ancient Athens. His early comedies are remarkable for the violence of the satire with which he ridiculed the democratic war leaders. In 425 he produced the *Acharnians*, a plea for peace with Sparta. The *Knights* (424) shows the figure of the 'Demos' or 'democracy' beguiled by Cleon. The *Clouds* (423) pours ridicule on the new learning of Socrates. The *Wasps* (422) is a satire on the Athenian love of litigation. The *Peace* (421) was written when negotiations for peace with Sparta were far advanced. In the *Birds* (414), written after the renewed outbreak of the Peloponnesian War, A. tells how two Athenians persuade the birds to build a kingdom in the air known as 'Cloud-cuckoo-land'. In the *Lysistrata* (411) the women, tired of the war, deny conjugal relations to their husbands until they have made peace with Sparta. The *Thesmophoriazusae* (Priestesses of Demeter) (411) satirizes Euripides and the women of Athens. The *Frogs* (405) tells how the god Dionysus was sent to the lower world to bring back Aeschylus to Athens. The *Ecclesiazusae* or *Women in Parliament* (393) describes what happened

when the women seized the Athenian parliament. In *Plutus* or *Wealth* (388) the abolition of poverty results in a series of comic episodes. Besides the 11 extant plays A. is known to have written about 40 comedies which are now lost.

ARISTOTLE (384-322 B.C.). Greek philosopher. B. at Stagira in Thrace, he studied at Athens under

ARMAGH. The Protestant cathedral (left) is the oldest in Ireland, having been founded by St. Patrick in 445, though the building itself dates from the 6th to 12th centuries and was restored in the 19th. On the facing hill, to the far right is St. Patrick's Roman Catholic cathedral built 1840-73 following Catholic Emancipation.

Courtesy of the Northern Ireland Tourist Board

Plato, became tutor to Alexander the Great, and in 335 opened a school at Athens. When Alexander d he was forced to flee to Chalcis, where he d.

Of A.'s works some 22 treatises survive, dealing with logic; metaphysics; physics, astronomy, and meteorology; biology; psychology; ethics and politics; and literary criticism.

A. maintained that sense-experience is our only source of knowledge, and that by reasoning we can discover the essences of things, i.e. their distinguishing qualities. The essence of a thing he regards as real, but not as capable of existing apart from it. He conceives of all being as potentiality and actuality, in the physical order represented by matter and form; God alone is all actuality. Change consists in bringing the potentiality of a substance into actuality. All change is caused, the Supreme Cause being God.

A. held that all matter consisted of a single 'prime matter', which was always determined by some form. The simplest kinds of matter were the 4 elements, earth, water, air, and fire, which in varying proportions constituted all the things we know. A. saw nature as always striving to perfect itself, and first classified organisms into species and genera to show how they subserve this purpose.

The principle of life he terms a soul, which he regards as the form of the living creature, not as a substance separable from it. The intellect can discover in sense-impressions the universal, and as the soul thus transcends matter, it must be immortal. In his works on ethics and politics A. suggests that man's happiness consists in living in conformity with nature, according to reason and moderation. He derives his political theory from the recognition that mutual aid is natural to man, and refuses to set up any one constitution as universally ideal. Art embodies nature, but in a more perfect fashion, its end being the purifying and ennobling of the affections. The essence of beauty is order and symmetry.

In the Middle Ages A.'s philosophy became the

foundation of Islamic philosophy, and was incorporated into Christian theology.

ARITA (ahrē'tah). Japanese town, on the A. river, N. of Nagasaki on Kyushu. High-quality white clay abounds in this area, and for 350 yrs. (since the introduction of potters who had been captured in warfare in Korea) it has been the producing centre of *Akai* porcelain which is predominantly red in colour. Each May a chinaware fair is held.

ARITHMETIC. The branch of mathematics that deals with all questions into which numbers enter, such as counting, measuring, weighing.

Simple A. existed already in prehistoric times. In China, Egypt, Babylon, and early civilizations generally A. was used for commercial purposes and for records of taxation as well as for astronomy. During the Dark Ages in Europe, knowledge of A. was preserved in India and later among the Arabs. European mathematics revived as conditions became more settled, with the development of trade and overseas exploration. The Arabic numerals replaced Roman numerals and allowed calculations to be made in writing, instead of by the abacus (q.v.) method. With the invention of logarithms in 1614, and of the slide rule in 1620–30, A. reached its modern form. The chief development since then has been the growing use of calculating-machines and ready-reckoners.

The basic operation in A. is counting. Most questions of A. could be answered by counting alone, though with great labour and expenditure of time. The object of formal calculations is to achieve the same result more quickly. The fundamental operations are addition and subtraction, and multiplication and division. Fractions arise naturally in the process of measurement. Decimals are a form of fractions.

Powers, i.e. repeated multiplications of the same number, are represented by an index, e.g. $2^5 = 2$ to the 5th $= 2 \times 2 \times 2 \times 2 \times 2$. Roots are the reverse of powers: If we ask, 'What number multiplied by itself five times gives 32?' the answer is called the 5th root of 32, i.e. 2, since $2 \times 2 \times 2 \times 2 \times 2 = 32$. See also **LOGARITHMS**.

ARIUS (c. A.D. 256–336). Founder of Arianism, a Christian heresy which denied the complete divinity of Christ. B. in Libya, he became a priest of Alexandria in 311. In 318 he was excommunicated and fled to Palestine, but his heresy spread to such an extent that the emperor Constantine called a council at Nicaea, where Athanasius confuted the Arian doctrines and persuaded the bishops to draw up a creed in which the dogma of the Trinity was categorically affirmed. A. and his adherents were banished, though later he was allowed to return.

ARIZONA. A south-western state (the 'Grand Canyon' state) of the U.S.A. Its main waterway is the Colorado, which flows through the famous Grand Canyon – one of the most impressive natural features of the world. To the E. of the Colorado is a vast barren area called the Painted Desert. In the N.E. lies the Colorado Plateau, another barren region. The Gila desert occupies the S.W. of the state. The deserts of A. are arid, and have the highest temperatures in the U.S.A.

A. is believed to derive its name from the Spanish *arida-zona* (dry belt). The first Spaniard to visit A. was the Franciscan Marcos de Niza in 1539. By 1715 A. was part of New Spain; in 1824 it became part of the United Mexican States. After the Mexican War it passed to U.S.A. in 1848, became a territory in 1863, and developed rapidly as a result of the gold-rush in neighbouring California. In 1912 it was admitted as a state of the Union. Irrigation has been carried out

on a colossal scale, e.g. the Roosevelt dam on Salt river, and Hoover Dam on the Colorado between A. and Nevada, provide the state with both hydro-electric power and irrigation water. At the end of the 19th cent. rich copper deposits were found in A. and there exist deposits of many other minerals. Phoenix is the capital. Area 113,909 sq. m.; pop. (1960) 1,302,161 (83,387 Indians).

ARKANSAS (ahr'kansaw). South-central state of the U.S.A., called the 'wonder state' because of its remarkable natural features.

The Mississippi runs along the eastern boundary; and from the eastern plains the land gradually rises to the Ouachita and Boston mountain ranges, lying S. and N. of the A. river, which runs across the state from W. to E. The climate is warm and healthy. The chief towns are Little Rock, the cap.; Fort Smith, Hot Springs, and Pine Bluff.

A. is primarily an agricultural state, famous for its fruits. Cotton is grown extensively, A. in 1966 being 4th in output in the U.S.A. and 3rd in rice. Natural gas was discovered in 1888, petroleum in 1901; and there are refineries near El Dorado. Bauxite and diamonds are other mineral products.

The first white man to explore the area was the Spaniard Hernando de Soto in 1541. The first European settlement was Arkansas Post by some of the companions of the French explorer La Salle in 1686 who began trading with the local Indians. In 1803 it formed part of the Louisiana purchase by the U.S.A. There followed a wave of immigration and in 1836 A. was constituted a state of the Union, seceded 1861, readmitted 1868.

Area 53,102 sq. m.; pop. (1960) 1,786,272; of whom about 25 per cent were Negroes.

ARKWRIGHT, Sir Richard (1732–92). British inventor and manufacturing pioneer. B. at Preston, Lancs, he experimented in machine-designing with a watchmaker, John Kay of Warrington, and in 1768, with Kay and John Smalley, he set up his celebrated 'spinning-frame' at Preston. He shortly removed to Nottingham to escape the fury of the spinners who feared that their handicraft would be dispensed with. In 1771 he went into partnership with Jedediah Strutt, a Derby man who had improved the stocking-frame, and Samuel Need, and built a water-powered factory at Cromford in Derbyshire. In 1790 he installed steam-power in his Nottingham works. His business prospered and he was knighted in 1786.

ARLEN, Michael (1895–1956). British novelist. B. at Ruschuk, Bulgaria, of Armenian parents, he changed his name from Dikran Kuyumjian when he became a naturalized British subject in 1922. His greatest success was the cynically smart *The Green Hat* (1924), story of a *femme fatale*. He d. in New York.

ARLES (ahr'l). Ancient city in Bouches-du-Rhône dept., S.E. France on the left bank of the Rhône, in a great fruit- and vine-growing district. Roman relics include an amphitheatre for 25,000 spectators. The cathedral of St. Trophime is the finest Romanesque structure in Provence. Pop. (1962) 42,353.

ARLINGTON. Name of the National Cemetery of the U.S.A., on the banks of the Potomac, in Virginia, facing Washington. The mansion was Robert E. Lee's, and the grounds were first used as a military cemetery in 1864 during the American Civil War. Up to 1960, 136,567 military, naval, and civilian persons from every war in which the U.S.A. has been engaged have been buried there, incl. one Unknown Soldier of the F.W.W., one of the S.W.W., and one of the Korean War. Pres. J. F. Kennedy and his brother Robert Kennedy are buried here.

ARMADA. See **SPANISH ARMADA**.

ARMADILLO. A mammal of the family Dasypodidae, provided with a protective armour of bony plates, joined in such a way that the body can be rolled up like a hedgehog's. The family ranges from

ARMADILLO

Texas to Patagonia, and contains many species. The largest, the Giant A. (*Prionon gigas*) of Brazil and Guiana, is 3 ft. long. See illus. p. 61.

ARMAGH (ahrmah'). Smallest of the 6 cos. of N. Ireland. In the N. it is flat, and there are extensive bogs. The better drained parts are under crops, especially flax. The chief rivers are the Bann and Blackwater, flowing into Lough Neagh, and the Callan tributary of the Blackwater. Chief towns are A., the cap. pop. (1961) 9,974, Lurgan, Portadown, and Keady. Area, 489 sq. m.; pop. (1961) 117,970. See illus. p. 60.

ARMED MERCHANT CRUISERS. During both World Wars, a number of merchant ships were converted into cruisers as an emergency measure.

Two deserve special mention. The *Rawalpindi* (Capt. E. C. Kennedy, R.N.) fought on 23 Nov. 1939, S.E. of Iceland, a most gallant action with the German battleships *Scharnhorst* and *Gneisenau*, and went down with her flag flying. On 5 Nov. 1940 the *Jervis Bay* (Capt. E. S. Fogarty Fegen, R.N.) was similarly sunk by the pocket battleship *Admiral Scheer*, while escorting the ships in her convoy. Fegen was awarded a posthumous V.C. During the enemy action, 17 armed merchant cruisers were lost by F.W.W., and 15 during the S.W.W.

ARMENIA. A mountainous region in S.E. Europe and S.W. Asia, divided between U.S.S.R., Turkey, and Persia, and situated between the Black Sea, the Little Caucasus, and the plateaux of Persia and Asia Minor. In legend, it is the site of the Garden of Eden, and the Ark, after the Flood, came to rest on the 'Mountains of Ararat', the highest part of the plateau. In the last cents. of the 2nd millennium B.C. the country was occupied by a people called Urartu, Ararat, Vannic, or Khaldian. Their kingdom flourished in the 9th-7th cents. B.C., and was overrun by an Indo-European people from the W. or N., the two peoples amalgamating and representing the ancestors of the modern Armenian. A. owed allegiance in turn to Assyria, Persia, the Romans, the Byzantine Empire (7th cent.), the Seljuks and Mongols, and in the 16th cent. was divided between Persians and Turks. Russia obtaining a portion during the 19th cent. The *Armenian Question* arose in 1878 when promised reforms never materialized; unrest broke out and there were massacres by Turkish troops in 1895. Again in 1909 and 1915, the Turks massacred altogether more than a million Armenians, and deported others into the N. Syrian desert where they died of starvation; those who could fled to Russia or Persia, and only some 100,000 were left in Turkish Armenia.

After the Russian revolution of 1917, Russian Armenia in 1920 proclaimed itself a republic; it was one of the reps. of the Transcaucasian S.F.S.R. (the others being Georgia and Azerbaijan) from 1922 until it became a constituent republic of the U.S.S.R. in 1936.

ARMENIAN CHURCH. A. adopted Christianity in the 3rd cent., and about 295 Gregory the Illuminator (c. 257-332) was made exarch of the Armenian church, which has developed along national lines. The Seven Sacraments, or Mysteries, are administered, baptism being immediately followed by confirmation. The Catholicos or exarch is the supreme head, and Echmiadzin, 7 m. W. of Yerevan, is his traditional seat.

ARMY. Key man of the modern army, a section leader with the latest-type bayonet-machine-gun, goes ahead of his men. The khaki uniform, designed for maximum ease of movement, is a striking contrast with the ceremonial uniform of his regiment - the celebrated Black Watch. Photo: Crown copyright.

LANGUAGE. The Armenian language constitutes one of the main divisions of Indo-European. Old Armenian, the classic literary language, is still used in the liturgy of the Church. Armenian was not written down until the 5th cent. A.D., when an alphabet of 36 (now 38) letters was evolved. Literature flourished in the 4th-14th cents., revived in the 18th; contemporary Armenian, with modified grammar and enriched with words from other languages, is used by a group of 20th cent. writers.

PEOPLE. The total number of Armenian-speakers in the world has been estimated at 4,000,000; about 1,500,000 live in Soviet A., 50,000 in Turkey, 210,000 in Syria and Lebanon, and others in Persia, Iraq, India, etc. Some 100,000 have emigrated to the U.S.A.

ARMENIAN S.S.R. Constituent Rep. of the U.S.S.R., situated in the S. of Transcaucasia and mainly mountainous and wooded. Livestock are raised in the mountains round Yerevan, the cap., and in the Aras valley cotton, tobacco, fruits are grown with the help of artificial irrigation. Area 11,500 sq. m.; pop. (1967) 2,253,000 (c. 88% Armenians).

ARMENTIÈRES (ahrmon-té-är'). French manufacturing town in Nord dept., on the Lys, 10 m. N.W. of Lille. The song 'Mademoiselle from A.' originated in the F.W.W. when the town was held by the British. Pop. (1962) 27,254.

ARMINTIUS (17 B.C.-A.D. 21). German chieftain whose annihilation of a Roman army led by Varus led to the Teutoburger Wald in A.D. 9 led to the Roman withdrawal to the Rhine frontier.

ARMINIUS (1560-1609), the Dutch Protestant divine who founded Arminianism, a school of theology opposed to Calvinism. B. in S. Holland, he was ordained at Amsterdam in 1588, and from 1603 lived as professor of theology at Leyden. A's views were developed and systematized after his death by his follower, Episcopius. A. opposed Calvin's doctrine of predestination, and asserted that forgiveness and eternal life are bestowed on all who repent of their sins and unfeignedly believe in Jesus Christ. In England Arminianism was adopted as the theology of Wesleyan Methodism, in opposition to the Calvinist views of the followers of Whitefield.

ARMISTICE DAY. See REMEMBRANCE, NATIONAL DAY OF.

ARMOUR. Protective covering in warfare. The

ARMOUR

ARMY. 1. Uniforms, introduced in the late 17th century with the growth of national armies, reached in the late 18th and early 19th centuries the height of elaboration and discomfort: (left to right) Austrian (1809), French (1779), and Russian (1812) standard bearers.

use of body A. is very ancient and is frequently depicted in Greek and Roman art. In the Middle Ages chain mail was extensively developed, and in the 14–16th cents. came the growth of plate A. which eventually encased the whole body and represented a superb degree of craftsmanship. The invention of gunpowder led, though only by degrees, to the virtual abandonment of A. until in the F.W.W. the helmet reappeared as a defence against shrapnel. The pre-requisites of practical modern A., lightness and flexibility, were not met until the development of the nylon and fibre-glass A. which began to come into use in the S.W.W. and the Korean War. A. is also used on tanks, aircraft, ships, and cars.

ARMSTRONG, Anthony. Pen-name of A. A. Willis (1897–). British author of humorous novels and ingenious thriller play *Ten-Minute Alibi*.

ARMSTRONG, Louis (1900–). American jazz musician, nicknamed Satchmo. A trumpet-player of virtuoso ability, he was b. in New Orleans, joined Kid Ory's band in 1917, and formed his own 7 yrs. later. His reputation is as worldwide as the distribution of his records, and his films incl. *High Society*.

ARMSTRONG, Thomas (1899–). British novelist. B. in the W. Riding, he entered the wool trade and estab. his name with *The Crowthers of Bankdam* (1940), dealing with a family in the trade in the 19th cent.

ARMY. An organized military force: these were common to all ancient civilizations: Sumeria, Babylonia, Egypt, Assyria, China, India, Persia, Greece, Carthage and – above all – Rome. In Britain the Anglo-Saxon *fyrd*, or local militia, saved the country from being wholly overrun by the Danes, but the 1st body of standing troops was raised by Canute. After the Norman Conquest military organization was based on the feudal system common to all Europe, whereby vassals supplied their overlords with a certain number of men for so many days a year, with its obvious drawbacks for continuous campaigning,

though mercenaries were also employed. The superiority of the mounted knight was ended by the longbow (Crécy, Poitiers, Agincourt), and firearms and cannon favoured centralization in the hands of professionals and the development of sustained campaigns and strategy. In Tudor England small standing bodies of troops were employed for external and internal defence, but the defects of raw levies; noble amateurs and mercenaries led to Cromwell's creation of the New Model Army for the larger campaigns of the Civil War. After the Restoration Charles II estab. a small standing army, the beginning of the modern British army, which was expanded under James II and William III. Under George III it failed to subdue the American colonists, showing the superiority of the citizen, or people's army, dramatically illustrated in Europe by the forces of the French Revolution. Conscription was 1st adopted in Prussia to counter Napoleon's imperial ambitions. The British A. under Wellington which eventually broke Napoleon was one of the best ever-put into the field, but it afterwards decreased in numbers and efficiency. Its weaknesses were patent in the Crimean War and, despite reforms by Cardwell and Wolseley, in the South African War.

R. B. Haldane (on the advice of Roberts) organized an expeditionary force, and for home defence a territorial force, though these were still inadequate. In the 19th cent. there had been immense development of rapidly produced missile weapons, use of railways (the American Civil War has been called the 'railway war'), etc. The F.W.W. was one of trench warfare in which enormous As. were bogged down, e.g. the British A. expanded from 750,000 to 5½ million men. In the inter-war period As. were greatly reduced until the rise of the Italo-German forces led to reluctant increases: Britain was in many respects less prepared

2. The splendour of British cavalrymen in the Napoleonic period: (left to right) Royal Horse Guards officer, Life Guards trooper, Life Guards officer, Dragoon officer and Royal Horse Guards trooper.

Models such as those illustrated on this page are hand-made and painted, accurate even to the last detail of complexion, and are used in adult 'war games' which reconstruct and sometimes throw fresh light on battles of the past.

Photos: Norman Newton Ltd., London.

3. Still dashing, but tending to the more functional and loose-fitting, uniforms of Confederate troops of the American Civil War: (left to right) soldier of the 1st Virginia Cavalry (with saddle), an infantryman, a cavalry standard bearer, and a Zouave (q.v.) who reflects the French influence in some Southern states.

in 1939 than 1914. The As. of the S.W.W. were remarkable for mobility and the enormous distances they covered, notably Allied forces in the Pacific area, and also for close co-ordination of land, sea and air forces. Nuclear weapons development after the S.W.W. led to a reduction of conventional As. — announced by the U.S. in 1955, followed by the gradual ending of conscription in Britain from 1957, and drastic reductions by the Soviet Union in 1960.

ARNAULD (ahrnoh'). Name of a French family closely associated with the Jansenist movement in the 17th cent. **ANTOINE A.** (1560–1619) was a Paris advocate, strongly critical of the Jesuits. Many of his 20 children were associated with the abbey of Port Royal, a convent of Cistercian nuns near Versailles, that became the centre of Jansenism; the 2nd daughter, **ANGÉLIQUE** (1591–1661), became abbess through her father's instrumentality at the age of 8. Later she served as prioress under her sister **AGNES** (1593–1671), and her niece, **LA MÈRE ANGÉLIQUE** (1624–84), succeeded to both positions. A.'s youngest child, **ANTOINE** (1612–94), the 'great Arnauld', was religious director of the nuns at Port Royal. With Pascal, Nicole, and others, he produced not only Jansenist pamphlets, but works on logic, grammar, and geometry. For years he had to live in hiding, and the last 16 years of his life were spent in Brussels. See **JANSENISM**; **PORT ROYAL**, etc.

ARNE, Thomas Augustine (1710–78). British composer. B. in London, he composed operas and oratorios, as well as much music for the theatre, but is best remembered for his songs, which include 'Where the bee sucks' and 'Rule, Britannia'.

ARNHEM (arn'hēm). Cap. of Gelderland prov. of the Netherlands, on the right bank of the Rhine, 35 m. E.S.E. of Utrecht. Sir Philip Sidney died there in 1586. Pop (1967) 134,921. In the S.W.W. it was the scene of a great airborne operation and battle (17–27 Sept. 1944) when 10,095 British troops under Major R. E. Urquhart were dropped in the region of A. with the object of securing a bridgehead over the N. Rhine and facilitating an Allied drive into the heart of Germany. Forces also landed by air at Nijmegen were unable to fight their way along the road to Arnhem, and after a fierce struggle the survivors in that town had to be withdrawn; 7,605 were lost, killed, wounded, or missing.

ARNIM, Ludwig Achim von (1781–1831). German Romantic poet and novelist. B. in Berlin, he wrote short stories, a romance, *Gräfin Dolores* (1810), and plays, but left his finest work, the historical novel *Die Verurtheilten* (1817) unfinished. With Clemens Brer.

In 1811 he m. Brentano (359), who as a girl had an intimate friendship with Goethe. In 1835 she pub. her correspondence with the poet.

ARNIM, Mary Annette von (1866–1941). Novelist B. in Sydney (née Beauchamp), she m. H. von A. (1856–1910), and in 1898 became famous with *Elizabeth and her German Garden*. Other books characterized by the same light but effective humour followed. Her later works, like *The Enchanted April* (1923), maintained her reputation. In 1916 she m. the 2nd earl Russell. Her books appeared under the pseudonym 'Elizabeth von A.'

ARNO. Italian river, 150 m. long, rising in the

Apennines, and flowing westward to the Mediterranean. Florence and Pisa stand on its banks.

ARNOLD (d. 1155). Italian religious reformer, known as Arnold of Brescia. B. probably at Brescia, he studied in Paris and became an Augustinian monk. Leading a highly ascetic life himself, he strongly condemned the prevailing laxity in the Church, and opposed the temporal power of the papacy. Banished from Italy by Innocent II in 1139, he returned in 1145, and played a part in the short-lived Roman republic. In 1155 he was forced to flee, but was taken, condemned to death, and hanged. His followers were probably merged in the Waldenses.

ARNOLD, Benedict (1741–1801). American soldier, chiefly remembered for an act of treason to the American side in the War of American Independence. A merchant in Newhaven, Conn., he joined the Colonial forces, but in 1780 plotted to betray the strategic post at West Point to the British. Major André was sent by the British to discuss terms with him, but was caught and shot as a spy. A. escaped to the British, who gave him a command in the army.

ARNOLD, Sir Edwin (1832–1904). British scholar and poet. After leaving Oxford, he was a schoolmaster and principal of a college at Poona. In 1861 he joined the staff of the *Daily Telegraph*. He is famed for his *Light of Asia* (1879), a rendering of the life and teaching of the Buddha in blank verse. *The Light of the World* (1891) is a less successful attempt to re-tell the life of Christ.

ARNOLD, Henry H. (1886–1950). American general. Head of U.S. Air Force, 1943–6. B. at Gladwyne, Penn., he was trained at the U.S. Military Academy, and during and after the F.W.W. held commands at various U.S. air fields. In 1940 he was made Deputy Chief of Air Staff, and during the S.W.W. was largely responsible for the efficiency and numbers of the U.S. Air Force.

ARNOLD, Malcolm (1921–). British composer. Principal trumpet in the London Philharmonic Orchestra 1941–4 and 1945–8, he has composed symphonies and film music for *The Bridge on the River Kwai*.

ARNOLD, Matthew (1822–88). British poet. B. at Laleham, he was the son of Dr. A., headmaster of Rugby, and after a short period as assistant master at Rugby was one of H.M. inspectors of schools (1851–86). His first vols. of poetry, *The Strayed Reveller* (1849) and *Empedocles on Etna* (1852), were unsuccessful and anonymous, but 2 further publications under his own name in 1853 and 1855 caused him to be elected professor of poetry at Oxford (1857–67). A classical tragedy, *Merope* (1858) and *New Poems* (1867) followed, and much literary criticism is contained in *Essays in Criticism* (1865 and 1888), and other vols. He also pub. studies in education, *Literature and Dogma* (1873), and a masterly indictment of 19th cent. Philistinism, *Culture and Anarchy* (1869). As a poet and as critic A. held steadfastly to the standard set by classical unity, and demanded 'high seriousness' and 'a criticism of life'.

ARNOLD, Thomas (1795–1842). British schoolmaster. Ordained in the C. of E. in 1818, he was headmaster of Rugby School 1828–41, and his rule there has been graphically described in Thomas Hughes's *Tom Brown's Schooldays*. His emphasis was on training of character, and his influence on public school education was profound.

ARNOULD (ahrnoo'), Madeleine Sophie (1740–1802). French actress and opera-singer, immensely popular from her début in 1757 to her retirement in 1778. She was also renowned for beauty and vivacious wit.

ARP, Hans or Jean (1887–1966). French painter and sculptor. B. at Strasbourg, he was one of the founders of Dadaism in Zurich c. 1917, and was later a member of the Surrealist and Abstract-Creation groups. His

MATTHEW ARNOLD

G. F. Watts

Photo: N.P.G.

early painting is fluid, and when he turned to sculpture it was notable for its boneless curves; also remarkable are his *papiers déchirés*, torn paper designs pasted on a white ground.

ARRAN. Large island in the Firth of Clyde, Scotland, part of Butheshire. It is 20 m. by 10 m.: has an area of 165 sq. m., and a pop. (1961) 3,705.

ARRAS (ahr'ahs'). French town, cap. of Pas-de-Calais dept., on the Scarpe, 100 m. N. by E. of Paris. Formerly it was famed for its tapestry. Pop. (1962) 45,643.

It gave its name to five battles of the F.W.W., when it was almost destroyed. The fiercest was fought April 1917, with losses on either side in killed, wounded, and missing of 145,000. A. was captured in the German advance on Dunkirk in 1940.

ARRAU (ara'ow), Claudio (1903-). Chilean pianist. A concert performer since the age of 5, he excels in Bach and Beethoven.

ARREBOE (ahrebö'), Anders-Kristensen (1587-1637). Danish poet. B. in the island of Aeroe, he became bp. of Trondhjem in 1618. In 1622 he was deprived of his bishopric for misconduct, but afterwards he reformed and was appointed priest at Vordingborg. His best-known work is the *Hexameron rhythmico-danicum* (1641 and 1661), a poem on the Creation.

ARREST. Deprivation of personal liberty with a view to detention. In Britain, since the abolition of imprisonment for debt (1869), an A. in civil proceedings now takes place only on a court order, usually for contempt of court. In criminal proceedings an A. may be made on a magistrate's warrant, but a police constable is empowered to arrest without warrant in all cases where he has reasonable ground for thinking a felony has been committed. Private persons may, and are indeed bound to, arrest anyone committing a felony or breach of the peace in their presence. In the U.S. peace officers and private persons have similar rights and duties.

ARRHENIUS (ahr'ra'ne-oos), Svante August (1859-1927). Swedish scientist, the founder of physical chemistry. B. near Uppsala, he became a professor at Stockholm in 1895, and made a special study of electrolysis. He wrote *Worlds in the Making*, *Destinies of the Stars*, etc., and in 1903 received the Nobel prize for chemistry.

ARROL, Sir William (1839-1913). British civil engineer. B. in Renfrewshire, he set up as a boiler-maker in 1868, later started the Dalmarnock iron-works, and his firm (Wm. Arrol & Co.) built many bridges, including the Tay, the Forth, and Tower Bridges.

ARROMANCHES (ahromonsh'). Bathing resort and fishing village in Normandy on the Channel coast, where a prefabricated port was assembled for the British armies to assault the German 'Atlantic Wall' on D-day, 6 June 1944. Pop. (1962) 298.

AR'ROWROOT. Starchy substance derived from the roots and tubers of various plants. The true A. (*Maranta arundinacea*) was used by the Indians of South America as an antidote against the effects of poisoned arrows. The W. Indian island of St. Vincent is the main source of supply today.

ARSENIC. Greyish white semi-metallic crystalline element, symbol As, at. wt. 74.91, at. no. 33. It occurs in many ores, and is widely distributed, being present in minute quantities in the soil, the sea, and the human body. The chief source of A. compounds is as a by-product from metallurgical pro-

cesses. A. is used in insecticides and medicine; as it is a cumulative poison, its presence in food and drugs is very dangerous. The symptoms of A. poisoning are vomiting, diarrhoea, tingling in the limbs and possibly numbness, and collapse.

Arsenous oxide (As_2O_3), or white A., is an important inorganic compound of A. Arsine (AsH_3) has been made as a war gas. Of the organic arsenicals the best known is Salvarsan (q.v.).

ARSON. At common law, the malicious burning of the house of another. In England the Malicious Damage Act, 1861 laid down heavy penalties for specific offences incl. setting fire to places of worship, ships, and growing crops. See also CAPITAL PUNISHMENT. Setting fire to one's own house, and unintentionally damaging another's in the process is A., and such an act with intent to defraud an insurance co. is also a serious offence. In Scotland A. is termed fire-raising.

ART. The creation of something aesthetically satisfying. The *fine* As. incl. painting, sculpture, engraving, and the *useful* As. such activities as weaving, metal work and furniture-making which combine beauty and practical purposes: in modern usage, however, the distinction becomes increasingly blurred.

In the Middle Ages the term was used, chiefly in the plural, to signify a branch of learning which was regarded as an instrument of knowledge; the seven *Liberal Arts* consisted of the *trivium*, i.e. grammar, logic, and rhetoric, and the *quadrivium*, i.e. arithmetic, music, geometry, and astronomy.

ARTEL. Association of owner-producers in Russia. Formed for the development of agriculture and industry, it has been organized, on the one hand, into collective farming, and on the other hand, into industrial co-operative societies (incops). There are also groupings of intellectual and artistic workers, which may be described as As.

ARTEMIS (ahr'témis). Greek goddess, identified with the Roman Diana. She was the goddess of chastity, the virgin huntress, who presided over childbirth and the young. Ephesus was a chief centre of her cult.

ARTERY. One of the vessels which convey blood from the heart. The largest is the aorta, which leads from the left ventricle up over the heart and downwards through the diaphragm into the belly. As. are flexible, elastic tubes consisting of 3 coats. The cutting of an A. of any size is a dangerous injury. With middle and old age the As. normally lose their elasticity; the walls degenerate, and often also become impregnated with lime - arteriosclerosis, hardening of the As.

ARTESIAN WELLS. Artificial borings made through impermeable rock to water-containing beds, when the water rises to the surface by hydrostatic pressure or is pumped up. The name comes from Artois, the French province where they were first adopted in Europe.

ARTHRITIS. Inflammation of a joint or joints. A joint is lined by a layer of cartilage covered by a thin and very smooth 'synovial' membrane, which provides a lubricated surface for smooth action. This membrane may become infected by various organisms such as rheumatism, gonorrhoea, or tuberculosis, or as a result of injury, such as a sprain or dislocation. The infection may enter through an injury or be carried to the joint in the blood.

HANS ARP. 'L'araignée' - the spider - in bronze. Photo: Galerie Denise René.

CLAUDIO ARRAU Photo: Godfrey MacDonnic.

ARTHROPODA—ARUM

Tuberculosis A. is a slow process, usually affecting the joints of the hip, knee, and spine. *Rheumatoid A.*, also known as rheumatic gout, osteo-arthritis, or arthritis deformans, is commonest in its acute form in young women. In a severe chronic form many joints are infected (polyarthritis). See CORTISONE.

ARTHROPODA. A main branch or phylum of the animal kingdom. They have the body bilaterally symmetrical and composed primitively of a series of similar segments, and are distinguished essentially by having one or more pairs of limbs near the mouth modified to act as jaws. The integument also, although sometimes thin, is not slimy, but horny, or chitinous.

The A. are divided into the following classes, sometimes given the rank of sub-phyla, essentially distinguished by the number, structure, and function of the appendages in front of the mouth (preoral), and of those behind the mouth (postoral), concerned with mastication. The position of the generative orifices and the nature of the breathing organs, which may be air-tubes (*tracheae*) for land forms, or gills (*branchiae*), for water forms, also supply valuable characters for classification, which is as follows:

Prototracheata, or *Onychophora* (a solitary primitive member, Peripatus). *Arachnida* (king crabs, scorpions, spiders, ticks, etc.). *Trilobita* (an extinct marine palaeozoic group, Trilobites). *Crustacea* (crabs, shrimps, woodlice, barnacles, etc.). *Chilopoda* (centipedes). *Insecta*, sometimes called Hexapoda (insects). *Diplopoda* (millipedes). *Pauropoda* (minute forms without popular names). *Symphyla* (minute forms somewhat resembling centipedes).

ARTHUR. Legendary early British king and hero. He is supposed to have been b. at the end of the 5th cent., and to have led the armies of the kings of Britain against the pagan Saxon invaders. Nennius (fl. 796), says he was a Christian warrior in Kent, and fought 12 battles. The story of the Round Table first appears in 1155. Geoffrey of Monmouth (1147) introduces a mythical element, and the interment of A. at Glastonbury (q.v.) is first mentioned in 1195.

ARTHUR (1187-1203). English prince, nephew of King John, who is supposed to have had him murdered on 3 April 1203 because he was a possible rival to the English throne. The story of John's order to blind A. is a famous scene in Shakespeare's *King John*.

ARTHUR, Chester Alan (1830-86). 21st President of U.S.A. Son of a Baptist minister, he was b. in Vermont, and became a lawyer and eloquent Republican spokesman. In 1880 he was elected vice-president; and when Garfield was assassinated in the following year, succeeded him as president, holding office until 1885.

ARTHUR'S SEAT. Hill of volcanic origin standing in King's Park, to the E. of Edinburgh, Scotland. It is 822 ft. high, and provides magnificent views.

ARTICHOKE. Two plants of the family Compositae, both familiar as table-vegetables. The true A. (*Cynara scolymus*) is tall, with purplish blue flowers; the bracts of the unopened flower are eaten. The Jerusalem A. (*Helianthus tuberosus*) has edible tubers; it is a native of N. America, and its name is a corruption of the It. *girasole*, sunflower.

ARTIFICIAL RESPIRATION. The process of maintaining breathing in a helpless person, unconscious persons who have suffered electric shock or are apparently drowned; also in cases of infantile paralysis (anterior poliomyelitis) in which the mechanism of breathing is affected. In cases of electric shock or apparent drowning the first choice is the expired air method (kiss of life), by means of mouth-to-mouth breathing, since it gives greater ventilation than other methods, such as the Holger Nielsen or Silvester Brosch. In cases of paralysis 'iron lungs' are used.

ARTILLERY. One of the 2 main divisions of firearms (q.v.). In general use in Western Europe from the mid-14th cent., A. consisted of very small

guns, made of cast iron or bronze, smooth bored; and firing lead, iron or stone balls at low velocities. The barrel, closed at one end (the breech), was filled with a charge of gunpowder, tamped down with a soft 'wad', and the ball placed on top. A tiny 'touch' hole in the breech was filled with powder and lit, forming a 'train' through the barrel to explode the charge. Edward III used guns in his Scottish campaign of 1327, and in the English fleet at the battle of Sluys, 1340. In the 15th cent. attempts were made to eliminate the difficulties involved in obtaining sound metal castings for the bigger guns by fabricating barrels from rods, beaten and welded together lengthwise, and reinforced by iron rings. With the inadequate techniques of the period, this highly unsound method was responsible for many accidents, including the death of James II of Scotland in 1460. With the advent of improved methods, casting prevailed from the 16th cent., but in spite of considerable warfare little progress was made in the next 300 years, except that cannon grew bigger: there had already been a passing fashion in the late 14th cent. for giant cannon, e.g. 'Duille Grete' made in Ghent c. 1382, which weighed 15 tons and fired a 600 lb. stone ball. The period 1845-85 saw the evolution of the rifled barrel, permitting greater accuracy, and a return to built-up steel construction. Higher velocities and elongated missiles added considerably to penetrating power, diminishing the need for 'big' guns.

ARTIODACTYLA. The 'cloven-hoofed' mammals; more scientifically, those animals distinguished by the structure of their feet, in which the median axis passes between the enlarged, symmetrically paired 3rd and 4th digits, constituting the main hoof. The 2nd and 5th digits are also commonly represented by a pair of small hoofs, which seldom reach the ground. By the structure of their teeth and stomach the A. are divided into the *Suina* (pig-like animals), comprising the *Suidae* (pigs and peccaries), and *Hippopotamidae* (hippopotami); and the *Ruminantia* (ruminant-like animals), including the *Tylopoda* (camels), the *Tragulina* (chevrotains), and the *Pecora* (true ruminants: deer, giraffes, antelopes, goats, sheep, oxen, etc.).

ARTOIS (ahrtrwah'). Old prov. of N. France, bounded by Flanders and Picardy, and almost corresponding with the modern dept. of Pas-de-Calais. Its cap. was Arras.

ARTS COUNCIL OF GREAT BRITAIN. Semi-official organization for the advancement of cultural activities among the people as a whole. It originated in 1940 as a committee of the Pilgrim Trust to encourage the arts in wartime. It was at first known as the Council for the Encouragement of Music and the Arts (C.E.M.A.), but in 1945 it was incorporated under its present name. It is assisted by Committees for Scotland and Wales, and specialist panels for music, drama, and the visual arts.

ARTSYBA'SHEV, Mikhail Petrovich (1878-1927). Russian novelist and dramatist. Impregnated with disenchanted sex, such novels as *Sanin* (1907) and *Breaking-Point* (1912), and the plays *Jealousy* and *The Law of the Savage*, created a sensation. Exiled as a counter-revolutionary in 1921, he settled in Warsaw.

ARUM. Genus of plants of the family Araceae. The typical species (*A. maculatum*), known as cuckoo-

ARUM or 'cuckoo-pint'.

pint or lords-and-ladies, is a common British hedge-row plant. The A. or trumpet lily (*Zantedeschia aethiopica*), a well-known ornamental plant, is a native of Africa.

ARUNDEL, Thomas (1353–1413). English churchman: 3rd son of the earl of A., he was in turn bishop of Ely, archbishop of York, and (1396) archbishop of Canterbury. He was five times Lord Chancellor. The Lollards suffered severely under his rule.

ARUNDEL, Thomas Howard, 2nd earl of A. (1586–1646). English statesman and patron of the arts. The A. Marbles, part of his collection of Italian sculptures, were given to Oxford university in 1667 by his grandson.

ARUNDEL. Town (bor.) in Sussex, England, 6 m. up the r. Arun, 10 m. E. of Chichester. Situated in a gap in the S. Downs, it has a magnificent castle, the seat for centuries of the earls of A. and dukes of Norfolk. The parish church of St. Nicolas dates from the 14th cent.; the R.C. church of St. Philip Neri was built by the 15th duke in 1873. Pop. (1961) 2,614.

A'VAL BRETHREN (Lat. *Fratres Arvales*, brothers of the field). Body of priests in ancient Rome who offered annual sacrifices to the *Lares* or divinities of the fields in order to ensure a good harvest. They formed a college of 12 priests, and their chief festival fell in May.

ARVÍDA. Industrial town in Quebec prov., Canada, on Saguenay r., site of a huge smelter which produces up to 350,000 tons of aluminium a year. Pop. (1961) 14,460.

ARYAN (ár'ian or ah'rian). Name given to a broad division of the human race, who are supposed to have inhabited the great stretch of country from Central Asia to Eastern Europe, and to have reached India about 3000 B.C. German theorists conceived of the As. as a white-skinned master race, identifiable with the 'Nordic' or Teutonic race, but there is little or no evidence for such a view. With more reason A. is applied to a division of the Indo-European family of languages, comprising Sanskrit and Iranian, but it ought not to be used as synonymous with Indo-European.

ARYANA. Ancient name of AFGHANISTAN.

ARYA SAMAJ (ah'rya sahmahj'). Hindu religious sect founded by Dayanand Saraswati (1825–88), about 1875. He was a Brahman who renounced idol-worship, and urged a return to the purer principles of the Rig Veda.

ASBESTOS. Name given to several related minerals of fibrous structure which offer great resistance to heat through their non-inflammability and poor conductivity. They are silicates of iron, calcium, and magnesium. Commercial A. is made from chrysotile, a kind of serpentine which comes chiefly from Quebec and Rhodesia, or from tremolite and actinolite and other less common minerals of the hornblende group. The uses of A. incl. brake linings, suits for spacemen and firemen, insulation of electric wires in furnaces and when subjected to heavy neutron bombardment in reactors, and (blended with cement) A. cement sheets and pressure pipes for the building industry. Exposure to A. is a recognized cause of industrial cancer (mesothelioma).

ASBURY, Francis (1745–1816). First bishop of the Methodist Episcopal Church to be consecrated in U.S.A. B. in Staffs, the son of a farmer, he was a domestic servant and blacksmith's apprentice. From 1768 he was a disciple of Wesley, who chose him in 1771 for missionary work in the Eng. colonies in America. There he was consecrated bishop in 1784, and in his 45 years' work travelled over 275,000 m., mostly on horseback.

A'SCARIS. Genus of thread-worms of the class Nematoda. *A. lumbricoides*, the round worm, inhabits the human intestines, and may reach a length of 14 in.

ASCENSION. British island of volcanic origin in the S. Atlantic, 700 m. N.W. of St. Helena. Area 34

ARUNDEL. Overlooking the River Arun – unseen in the foreground – Arundel castle began as an earthwork built by Alfred against the Danes. Important in the Civil War, it was restored to its present splendour by Charles, 11th Duke of Norfolk, in the 18th cent. Photo: Aerofilms Ltd.

sq. m. Most of the pop. (336 in 1961) live in Georgetown, the cap. Discovered on Ascension Day, 1501, by a Portuguese navigator, A. was uninhabited till 1815, when occupied by a British R.N. garrison: attached to the colony of St. Helena in 1922. There are British and U.S. space stations.

ASCENSION DAY. In the Christian calendar, the feast day commemorating Christ's ascension into heaven. Known sometimes as Holy Thursday, it is the 40th day after Easter.

ASCETICISM (aset'isism). The renunciation of the physical pleasures, e.g. in eating and drinking, or the exercise of sexual instincts; and the courting of discomfort, or pain. It ranges from the primitive tabu to the self-denial of the great religions.

ASCH (ahsh), Sholem (1880–1957). Polish writer of Jewish descent. He lived for many years in the U.S. and was the last of the great classic writers of Yiddish literature. He produced a great cycle of biblical novels.

ASCHAM (as'kam), Roger (c. 1515–68). English classical scholar, educationist, and writer. B. in Yorks, he became 1st Regius prof. of Greek at Cambridge in 1540. His prose treatise on archery, *Toxophilus* (1545), recommended him to Henry VIII, so that in 1548 he became tutor to the Princess Elizabeth. From 1550 to 1553 he was sec. to Sir Richard Morrison, ambassador to the court of the emperor Charles V, then, in spite of his Protestant views, became Queen Mary's Latin sec. and subsequently was Queen Elizabeth's sec. and tutor. His original views on education are put down in the *Scholemaster* (1570).

ASCO'RBIIC ACID or Vitamin C. A relatively simple organic acid found in fresh fruits and vegetables. It prevents scurvy.

A'SCOT. Village in Berks, 6 m. S.W. of Windsor. The racecourse, on Ascot Heath, was laid down in 1711 by order of Queen Anne, who presented a piece of plate as a trophy. The circular course is 1½ m. long. The Royal A. meeting in June is one of the chief events of the London 'season'. Pop. c. 6,500.

ASDIC. See SONAR.

ASE'PSIS. Freedom from bacteria, particularly in surgery. Modern surgery rests on a meticulously careful technique of A., by which germs are not ever allowed to reach a surgical wound, and are removed from an accidental wound by cutting out damaged tissues and careful cleansing. Similar precautions are used in childbirth and accidents. See illus. p. 68.

ASEXUAL ('without sex'). Biological term applied to those plants and animals which reproduce by division. Unlike sexual reproduction, this does not involve the fusion of two cells, and never needs two parents. Examples are bacteria, amoeba, yeast, strawberry plants, shallots, and apple trees.

ASH. Group of trees of the genus *Fraxinus*, belonging to the order Oleales. *F. excelsior* is the

common species. The timber is of importance. The mountain A. or rowan (*Sorbus aucuparia*) belongs to the Rosaceae.

ASHANTI. Region of Ghana, W. Africa; area 9,700 sq. m.; pop. (1960) 1,108,548. Kumasi is the cap. Crops are cocoa and other tropical products. A. art, notably brass figures, gold work, and drums, provides fine examples of African craftsmanship.

For more than 200 years forming an independent kingdom, during the 19th cent. the warlike Ashanti people came into conflict with the British on the Gold Coast who sent 4 expeditions against them, and in 1901 formally annexed their country. Otomfuo Sir Osei Agyeman, nephew of the then deposed king, Prempeh I, was made head of the re-established A. confederation in 1935 as Prempeh II, and the Golden Stool, symbol of the A. peoples since the 17th cent., was returned to Kumasi. From 1954 A. was represented in the Gold Coast cabinet, and when the Gold Coast attained dominion status as Ghana in 1957, A. became one of its regions.

ASHBY-DE-LA-ZOUCH (ash'bi-de-la-zoosh'). Market town (U.D.) in Leicestershire, England, 17 m. N.W. of Leicester. Coal is mined in the vicinity, and there are ruins of a 15th cent. castle. Pop. (1961) 7,425.

ASHCROFT, Dame Peggy (1907-). British actress. B. in Croydon (q.v.), she made her 1st stage appearance with the Birmingham repertory in 1926. Her many parts incl. such Shakespearian roles as Desdemona, Juliet, and Rosalind, and the subtle modernity of Miss Madrigal in *The Chalk Garden*. She was created D.B.E. in 1956.

ASHDOD. Deep sea port of Israel, on the Mediterranean 20 m. S. of Tel-Aviv, which it superseded 1965. Planned to be second only to Haifa, it stands on the site of the ancient Philistine stronghold of Askalon. Pop. of the completed city will be c. 150,000.

ASHES, The Cricket trophy, theoretically held by the winning team in any series of Test Matches between England and Australia. A humorous obituary notice of 'English cricket', pub. in the *Sporting Times* in 1882, stated that the 'body' would be cremated and the ashes taken to Australia. During the winter of 1882-3, Ivo Bligh, captain of a successful English

ASIA. Physical features of the great land mass.

team visiting Australia, was presented by Melbourne ladies with an urn containing the ashes of the stumps and bails used in the match. The urn is in the keeping of the M.C.C. at Lords.

ASHFORD. Town (U.D.) and railway junction on the Stour in Kent, England, 14 m. S.W. of Canterbury. It has large locomotive shops, brickworks, etc. Pop. (1961) 27,962.

ASHKENA'ZY, Vladimir (1937-). Russian pianist. He has a technique rather differing from

ASH, with leaves, flowers, and fruit.

ASEPSIS. Modern drug manufacture. The production of sterile grade material under aseptic conditions: the setting suggests space fiction rather than the factory.

Courtesy of Pfizer Ltd.

standard Western practice and in 1962 was joint winner of the Tchaikovsky competition with John Ogdon. He excels in Rachmaninov, Prokofiev and Liszt.

ASHKHA'B'D. Cap. of the Turkmen S.S.R. in a region on the fringe of the Kara-Kum desert, but well watered by irrigation canals. Founded in 1881, it has textile mills, a large glass factory, etc., and is the business and cultural centre of the Republic. Pop. (1967) 238,000.

A'SHMOLE, Elias (1617-92). British antiquary. B. at Lichfield, he became a lawyer, served with the Royal forces during the Civil War, and after the Restoration held posts in the excise and other offices. He wrote books on alchemy, and on antiquarian

subjects, amassed a fine library, and a collection of curiosities, both of which he presented to Oxford Univ. His collection was housed in the 'Old Ashmolean' (built 1679-83), and forms the basis of the present Ashmolean Museum, erected in 1897.

ASHMORE AND CARTIER ISLANDS. Territory transferred to the authority of the Commonwealth of Australia by Britain in 1931, and comprising Middle, East and West Is. (the Ashmores) and Cartier Is., in the Indian Ocean c. 200 m. off the N.W. coast of Australia. They are admin. as part of the Northern Territory and are uninhabited, although W. Ashmore has an automatic weather station.

A'SHRAM. An Indian community, the members of which lead a simple life of discipline and self-denial, and devote themselves to social service, e.g. that of Mahatma Gandhi at Wardha, and the poet Sir Rabin-drannath Tagore's at Santiniketan.

ASHRIDGE. The former seat of the earls Brownlow near Berkhamsted, Herts, England, which in 1928 was bought and endowed as a college of citizenship on conservative and constitutional lines as a memorial to Bonar Law. After various changes, it was in 1959 converted into a management training centre with the backing of major British industries.

ASHTON, Sir Frederick (1906-). British dancer and choreographer. B. in Ecuador, he was trained under Massine and Marie Rambert, subsequently producing and dancing for the Rambert and Camargo ballets. Joining the Vic-Wells in 1935, he was knighted in 1963 and succeeded De Valois as director of the Royal Ballet. Later ballets incl. *Marguerite and Armand* (1963) based on Dumas and *The Dream* (1964) on Shakespeare.

ASHTON UNDER LYNE. Market and manufacturing town (bor.) of Lancs, England, 6½ m. E. of Manchester, on the Tame. Coal-mining and cotton are the chief industries. Pop. (1961) 50,165.

ASH WEDNESDAY. The first day of Lent, so called from the use of ashes as a symbol of penance. In the Catholic Church, members of the congregation are marked on the forehead with a cross in ash, obtained by burning the palms from Palm Sunday of the previous year. The ceremony was abandoned in the C. of E. in the 17th cent., the service of Communion taking its place.

ASIA. The largest of the continents, forming the larger eastern part of Eurasia and the main land-mass of the old world. It occupies ¼ of the total land surface of the globe, stretching from within the Arctic Circle almost to the Equator, the most northerly point being Cape Chelyuskin, 78° N., the most southerly Cape Romania, at the tip of the Malayan peninsula, 1° N. The E. Indian islands extend to 10° S. of the Equator. The continent, which has an area of about 17,000,000 sq. m., is surrounded by the Arctic, Pacific, and Indian Oceans on the N., E., and S., and adjoins Europe along the Urals, and the shores of the Caspian, Black, and Mediterranean Seas. The isthmus of Suez, cut in two by the Suez canal, joins A. to Africa, while Bering Strait in the N.E., at its narrowest 45 m. wide, separates it from America.

Geography. There are 5 main geographical divisions: (1) The central triangular mountain mass, composed of a number of huge ranges diverging from the Pamir region, and including the Himalayas with the highest mountains in the world. N. of the Himalayas is the great Tibetan plateau, bounded on the N. by the Kun-lun Mountains. To the N. of the plateau lie a series of ranges and enclosed basins, most notable of which is the Tarim basin. The Gobi (desert) occupies a vast plateau of central A. (2) The S.W. plateaux and ranges, which form the complicated relief of Afghanistan, Baluchistan, and Persia. (3) The northern lowlands, stretching from the central mountainous mass to the Arctic Ocean, and drained by several huge rivers, e.g. Ob, Yenisei, Lena, which are frozen over for much

*Within the British Commonwealth

of their course for some 6 months of the year. Great floods occur in spring when the rivers are full and their mouths still frozen. (4) The eastern margin and the islands, where a large part of the pop. is concentrated. The lowlands are crossed by large rivers, e.g. Menam, Mekong, Si-Kiang, Yangtze Kiang, and Hwang Ho. Off the E. coast of A. lie the islands of Sakhalin, the Kuriles, Japan, Formosa, etc., while off the S.E. coasts lies the great group of the E. Indian islands,

with Sumatra, Java, Borneo, the Philippines, and hundreds of others. Other small groups lie off India and Burma. (5) The southern plateaux and river plains which include the ancient masses of Arabia, the Deccan, and the alluvial plains of the Euphrates and Tigris, Indus, Ganges, and Irrawaddy.

Climate. Climatically, A. experiences great extremes and contrasts, the heart of the continent becoming bitterly cold in winter and greatly heated in summer. It is this fact, with the resulting pressure and wind systems, that is basically responsible for the Asiatic monsoons, which bring heavy rain to all S.E. Asia, China, and Japan, between May and October, with a more or less dry season the other half year. The most southerly latitudes have an equatorial climate, while the far N. is arctic.

Vegetation and Agriculture. The vegetational cover varies with the climate, from tropical rain forest, through temperate grassland, to semi-desert scrub. In the wet tropical parts the main crop is rice, the staple food crop of Asiatic peoples. Where rainfall or temperature is unsuited to rice, millet, maize, wheat, or soya bean takes its place. Cotton, jute, tea, rubber, dates and other fruits, olives, and tobacco are grown and silk is reared where the climate is suitable. Timber is an important product from the coniferous woods of Siberia, the hardwood forests of China, and the tropical zones, where teak is found.

ASIA, Soviet Central. Formerly Russian Turkestan, it consists of the Kazakh, Uzbek, Tadzhik and Kirghiz S.S.Rs. Unsatisfactory agricultural production, due in part to nationalities, among the population, led in 1962 to the creation of a Central Asian Bureau of the Party Praesidium, in order to bring control from Moscow.

ASIA MINOR. Historic name for a part of W. Asia virtually contiguous with TURKEY-IN-ASIA.

ASIENTO (ahsē-en'tō; Span., 'contract'). Name given to the treaty of 1713, whereby British traders were permitted by Spain to introduce 144,000 Negro slaves into the Spanish-American colonies in the course of the next 30 years. In 1750 the right was bought out by the Spanish government for £100,000.

ASKHABAD. Another transliteration of ASHKHABAD.

ASMARA (asmah'ra). Town in Ethiopia, N.E. Africa, cap. of Eritrea. About 40 m. S.W. of Massawa on the Red Sea, it is a communications centre, with an airfield and is a growing industrial centre. Pop. (1965) 137,700.

ASNIÈRES (ahnē-ār) N.W. suburb of Paris, France, on the left bank of the Seine; a boating centre and pleasure resort. Pop. (1962) 82,201.

ASŌKA (reigned 264–228 B.C.). Indian king, who made Buddhism the state religion. The grandson of Chandragupta, founder of the Maurya dynasty, he reigned over the ancient kingdom of Magadha, became converted to Buddhism, issued edicts enjoining the adoption of the leading tenets of the new faith, and had these carved on pillars (many of which have survived), and on the walls of caves, rocks, etc.

ASP, or **Aspic**. Name applied to several species of poisonous snakes. The A. of S. Europe (*Vipera aspis*) is a species of viper closely allied to the adder. The Egyptian horned A. (*Cerastes cornutus*) is supposed to have been the one with which Cleopatra ended her life. The African A. (*Naja haje*) is related to the cobras.

ASPARAGUS. Genus of plants of the lily family (Liliaceae). *A. officinalis* is cultivated, and the young shoots are eaten as a vegetable.

ASPASIA (fl. 440 B.C.). Mistress of Pericles, the Athenian statesman; since she was b. in Miletus their marriage was not recognized by Athenian law, but their son, Pericles, was subsequently legitimized. Her salon was a famous meeting-place for the celebrities of Athens.

ASPEN. Species (*Populus tremula*) of poplar (q.v.).

A'SPHALT. A mixture of different hydrocarbons forming a kind of semi-solid, brown or black bitumen. Considerable natural deposits occur round the Dead Sea and in the Philippines, Cuba, Venezuela, and in the pitch lake of Trinidad. Bituminous limestone occurs at Neufchâtel. A. is mixed with rock chips to form paving material, and the purer kinds are used for insulating material and for waterproofing masonry.

A'SPHODEL. Genus of plants (*Asphodelus*) belonging to the Liliaceae. *A. albus*, the white A. or king's spear, is found in Italy and Greece, sometimes covering large areas, and providing grazing for sheep. *A. luteus* is the yellow A. These beautiful plants were connected by the Greeks with the dead, and were supposed to grow in the Elysian fields.

ASPIDISTRA. Small genus of Asiatic Liliaceae. The broad-leaved Japanese A. (*A. elatior*) survives much ill-treatment as an indoor plant, and was popular in Britain in the Victorian parlour.

A'SPRIN. Name of drug given by the firm of Bayer, Meister & Lucius to a synthetic acetylsalicylic acid which they invented in the early years of the 20th cent., and which soon became immensely popular as a household remedy for headaches and minor pains.

ASPLENIUM. Genus of ferns of the family Polypodiaceae, and generally known as spleenworts.

ASQUITH, Herbert Henry, 1st earl of Oxford and Asquith (1852–1928). British Liberal statesman. B. in Yorks, he was ed. at the City of London School and Balliol Coll., Oxford, and was called to the Bar in 1876. Elected M.P. in 1886, he was Home Sec. in Gladstone's 1892–5 govt. and in 1905 he became Chancellor of the Exchequer in Campbell-Bannerman's govt.; he introduced the 1st provision for old age pensions, and on the P.M.'s death he succeeded him.

The rejection by the Lords of Lloyd George's budget in 1909 produced a political crisis. In 2 general elections in 1910 the Liberals were returned to power with reduced majorities; the budget was passed, and the Parliament Act (1911) limited the Lords' right to veto legislation. The Home Rule Bill (1912) met with even fiercer opposition, until the outbreak of the F.W.W. temporarily united the nation.

A coalition govt. formed in May 1915 lasted till the reverses suffered by the Allies forced A. to resign in Dec. 1916, when he was succeeded by Lloyd George. At the 1918 election A. and his followers were heavily defeated, he himself losing the seat he had held for 32 years. He returned to the House in 1920.

After the collapse of the coalition in 1923 an alliance was formed between the followers of A. and Lloyd George. The Liberals held the balance of power in the next parliament, and it was A.'s support which enabled the Labour Party to take office. Defeated in the 1924 general election, he was raised to the peerage in 1925, and remained leader of the Liberal Party until 1926, when he resigned following dissensions over the general strike.

His eldest son Raymond A. (1878–1916) was killed in action in the F.W.W.; his 2nd son Herbert A. (1881–1947), barrister, poet and novelist, m. Lady Cynthia Charteris (1887–1960), dau. of the 11th earl of Wemyss, who wrote reminiscences and a diary.

Most famous of his children are, Lady Asquith of Yarnbury (1887–) who, as Lady Violet Bonham-Carter (she m. in 1915 Sir Maurice Bonham-Carter, who d. 1960), was an active Liberal, being pres. of the Party Organization 1945–7; see GRIMOND. In 1964 she was created a life peeress, taking the title Lady A. Anthony A. (1902–68), director of such films as *Quiet Wedding*, *The Winslow Boy* and *The Millionaire*; and Elizabeth (1897–1945) who m. Prince Antoine Bibesco and wrote short stories, novels and poems. Both the last-named were his children by his 2nd wife, Margot Tennant (1868–1945), daughter of a Glasgow ironmaster, whom he m. in 1894 and

M. F. Cernot	1894	R. F. Kennedy	1968

who was a celebrated wit. Her vols. of memoirs offended many by their lack of reticence.

ASS. A mammal (*Asinus*), related to the horse, zebra, and quagga, and with them constituting the family Equidae. The typical form is the African A., which is the source of our domestic breeds. Apart from its familiar 'braying roar', it differs from the horse (*Equus*) chiefly in its smaller size, much larger ears, tufted tail, characteristic fur and markings, narrower hoofs adapted for sure-footed traversing of rocky hillsides. The colour is usually grey.

ASS (Nubian)

ASSAM. Indian state lying between E. Pakistan and Burma, consisting mainly of the valleys of the Surma and Brahmaputra and a surrounding fringe of jungle-clad mountains. The cap. is Shillong. Area, 47,000 sq. m.; pop. (1961) 11,860,059.

Part of British India from 1826. A. in 1874 was made a separate prov. and in 1947 was included in the Dominion of India, save for most of the district of Silhet, which went to Pakistan. Tea is the principal industry, and 3/5ths of Indian tea comes from A. Oil has been worked since 1888, and the Digboi field is important. Rice, coal, and timber are produced.

In 1968 it was agreed that the Garo, Khasi, and Jaintia tribal hill areas should form an autonomous state within A. (Meghalaya), the Mikir and N. Cachar optionally joining later, and eventually the Mizo. Area (initially) 7,100 sq. m.; Pop. 79,000.

ASSASSINATION. Treacherous and violent murder, especially of royal or public personages. Some of the famous As. in history are given in the Table.

ASSAYING. The determination of the quantity of a given chemical substance present in a given amount of a sample to be tested. Usually it refers to determin-

ing the purity of the precious metals. The assay may be carried out by 'wet' methods, when the sample is wholly or partially dissolved in some suitable reagent (often an acid), or by 'dry' or 'fire' methods, in which fusion techniques are used.

ASSENT. Royal. Formal consent given by a British sovereign to the passage of a bill through parliament, after which it becomes an Act of Parliament. The last instance of a royal refusal was the rejection of the Scottish Militia Bill of 1702 by Queen Anne. The ceremony in the House of Lords, with representatives of the House of Commons being summoned, and commissioners usually acting on behalf of the Sovereign, has normally been replaced from 1967 (to save debating time) by the A. being given by Letters Patent, i.e. the Lord Chancellor in the Lords, and the Speaker in the Commons, make a formal announcement that A. has been given.

ASSISI (ahsē'sē). Town of Umbria, Italy, 12 m. E.S.E. of Perugia. It is the birthplace of St. Francis, and the Franciscan monastery, completed in 1253, contains his tomb. The churches of St. Francis are adorned with frescoes by Giotto, Cimabue, and others. Pop. c. 30,000.

ASSIUT. Alternative transliteration of ASYUT.

ASSIZ'ES. In Britain, the courts held by the judges of the High Court in each co. to try civil and criminal cases. The judges go in the capacity of the Queen's commissioners. The assize towns are grouped into 7 circuits, and usually 2 judges go to each circuit, visiting each of the assize towns in it.

ASSOCIATION FOOTBALL. See FOOTBALL.

ASSOCIATED STATE of the United Kingdom. Status proposed in a British Colonial Office White Paper in 1965, as a solution for the problems of the Leeward and Windward Is. It involves full internal self-govt., leaving Britain responsible for external relations and defence, and was first adopted by Antigua in 1966.

ASSUAN. Alternative transliteration of ASWAN.

ASSUMPTION. Principal feast of the Blessed Virgin in the R.C. Church, held on 15 Aug., when her translation into heaven is commemorated.

ASSY. Village and sanatorium in Haute-Savoie, France, 3,280 ft. above sea level, where the church of Notre Dame de Toute Grace, begun in 1937, consecrated 1950, is adorned by Braque, Chagall, Matisse, Derain, Rouault, and other artists.

ASSYRIA. Empire of antiquity in the Near East. The land of A. originally consisted of a narrow strip of alluvial soil on each side of the Tigris, starting where the Lower Zab joins the river, and reaching to the foothills beyond Dur-Sharrukin, the old city of Sargon. The area was settled about 3500 B.C., and the empire collapsed in 612 B.C.

Sumerian civilization in Mesopotamia came to an end about 2500 B.C., with the rise to power of Sargon of Akkad; for nearly 200 years A. was subject first to the dynasty of Akkad and then to the Gutians, barbarians from the north. The first Assyrian kings are mentioned during the wars following the decline of the 3rd dynasty of Ur. For many centuries yet, however, A. was under Babylonian and subsequently Egyptian suzerainty. About 1450 B.C. a fresh resurgence of A. began. Under king Ashur-uballit (reigned c. 1380-1340 B.C.) the future greatness of A. as a military power was laid. His work was continued by Adad-nirari I, Shalmaneser I, and Tukulti-enrta I, who conquered Babylonia and assumed the title of king of Sumer and Akkad. During the reign of Nebuchadrezzar I (1150-1110 B.C.), A. was subject to Babylonia, but Tiglath-pileser I threw off the yoke. In the Aramaean invasions, most of the ground gained was lost. From the accession of Adad-nirari II in 911 B.C. A. pursued a triumphant course of expansion and conquest, culminating in the mastery of Elam, Mesopotamia, Syria, Palestine, the Arabian marches,

and finally of Egypt. Of this period the O.T. records and many 'documents' such as the Black Obelisk celebrating the conquest of Shalmaneser III in the 9th cent. B.C. survive.

The reign of Ashur-nazir-pal II (885-860 B.C.) was spent in unceasing warfare, in which he is said to have introduced 'frightfulness' as evidenced by many bas-reliefs. Shalmaneser III warred against the Syrian states. At the battle of Qarqar (854 B.C.) the Assyrian advance received a setback, and there followed a period of decline. The final period of Assyrian ascendancy began with the accession of Tiglath-pileser III (746-728 B.C.). Sargon, Sennacherib, Esarhaddon, and Ashurbanipal raised A. to the highest peak of its glory, culminating in the conquest of Egypt by Esarhaddon in 671 B.C. From this time the empire seems to have fallen into decay, and a union of Nabopolassar of Babylonia and Cyaxares of Media led to its destruction. Nineveh was destroyed, and A. became a Median province and subsequently a principality of the Persian empire.

Much of Assyrian religion, law, social structure and artistic achievement was based on, or derived from, neighbouring sources. The Assyrians adopted the cuneiform script invented by the Sumerians, and took over the Sumerian pantheon, although their national god, Ashur (Assur), assumed the chief place in the cult. They adopted in the main the Sumerian structure of society. The famous library of Ashurbanipal excavated at Nineveh witnesses to the thoroughness with which Babylonian culture was being assimilated. See BABYLONIA.

ASTAIRE, Fred (1899-). American dancer. B. in Omaha, Nebraska, he danced in partnership with his sister Adele A. (1898-) from 1916 until her mar. with Lord Charles Cavendish, younger son of the Duke of Devonshire, in 1932. Entering films in 1933, he appeared in *Roberta*, *Top Hat*, *Follow the Fleet*, *Easter Parade*, *Funny Face*, and others which contained many sequences designed by himself. Most famous of his later partners was Ginger Rogers.

ASTARTE. Semitic goddess, the Ashtoreth of the Bible. She was the embodiment of the female principle, a great nature goddess watching over fertility, and her rites provided occasion for sexual licence.

ASTATINE. Symbol At, at. no. 85, at. wt. 210; halogen-like and highly radioactive. It is artificially made by bombarding bismuth in a cyclotron.

A'STER, or Starwort. Genus of plants of the Compositae, belonging to the same division as the daisy. The sea aster (*A. tripolium*) grows wild on sea cliffs in the S.W. of England, but many more species are familiar as cultivated garden flowers. These include the Michaelmas Daisy (*A. tradescanti*). The China aster (*Callistephus hortensis*) belongs to a closely allied genus; it was introduced to Europe from China and Japan in the early 18th cent.

ASTEROIDS. The As., more properly known as Minor Planets, are small bodies circling the Sun between the paths of Mars and Jupiter - though a few, such as Eros, depart from the main swarm and may approach the Earth fairly closely. The largest A., Ceres, is 430 miles in diameter, and was discovered by Piazzi in 1801. It has been suggested that the As. were formed as the result of the break-up of an old planet or planets, but proof of this theory is lacking, and will be very difficult to obtain. Only one A. (Vesta) is ever visible to the naked eye.

ASTHMA (asth' or as'ma). Disease distinguished by recurring attacks of breathlessness, caused by a spasm of the diaphragm or breathing tubes, or congestion of the membrane lining the tubes. *Ordinary A.* is essentially a reaction to a foreign protein, e.g. dust, eggs, milk, and the hair or scurf of an animal. As such it belongs to the same group of diseases as hay-fever, nettlerash, and some forms of epilepsy - the so-called *allergic diseases*. *Cardiac A.* is a distinct

ASSYRIA. A temple statue (left) of Ashur-nazir-pal II and (right) a bas-relief of a priest, wearing divine winged apparel and a bird-headed mask, taken from the royal palace at Nimrud and now in the British Museum.

condition, in which the breathlessness is caused by a form of heart disease.

ASTI (ahs'tē). City of Piedmont, 30 m. S.E. of Turin, on the Tanaro. It is the seat of a bishopric and has a Gothic cathedral. The sparkling wine of Asti prov. is famed. Pop. (1961) 60,217.

ASTON, Francis William (1877-1945). British physicist. From 1910 he worked in the Cavendish Laboratory, Cambridge. He pub. his *Isotopes* and received the Nobel Prize for chemistry in 1922. His researches were of the utmost value in the development of atomic theory.

ASTOR, John Jacob (1763-1848). American millionaire. B. near Heidelberg, in Germany, he set up as a fur trader in America, operating from the Great Lakes to the Pacific. He increased his wealth enormously by astute investment, and d. worth \$30 million. His eldest son, WILLIAM BACKHOUSE A. (1792-1875), became known as the 'landlord of New York', and made a further fortune by land deals.

ASTOR, William Waldorf, 1st visct. (1848-1919). Great-grandson of John Jacob A. (q.v.), he was an American diplomat and writer before becoming a naturalized Briton in 1899. In 1917 he was made a visct. His son, WALDORF ASTOR, 2nd visct. (1879-1952), was Cons. M.P. for Plymouth 1910-9, when he succeeded to the peerage. He was chief proprietor of the *Observer*, Lord Mayor of Plymouth, 1939-44, and was keenly interested in the Turf.

He m. in 1906 Nancy Witcher Langhorne (1879-1964), LADY ASTOR. B. in Virginia, U.S.A., she succeeded her husband as M.P. for Plymouth (1919-45), and was the 1st woman M.P. to take her seat in the House of Commons. An opponent of the Drink Trade, she was a famous political hostess, and govt. policy was said to be decided before the S.W.W. at her Cliveden (q.v.) house parties. Their eldest son WILLIAM ASTOR, 3rd visct. (1907-66), was a Cons. M.P. 1933-45 and 1951-2, and was succeeded by his only son WILLIAM ASTOR, 4th visct. (1951-); another son DAVID ASTOR (1912-) ed. the *Observer* from 1948.

JOHN ASTOR, 1st baron A. of Hever (1886-), a younger son of the 1st visct., was Unionist M.P. for Dover 1922-45, and as principal proprietor of *The Times* 1922-66 played a great part in securing for that newspaper a position of unrivalled influence.

ASTRAKHAN (ahstrakhahn). City in the R.S.F.S.R., on the delta of the Volga, cap. of A. region. Anciently a Tartar cap., it became Russian in 1556. It is the chief port for the Caspian fisheries. Pop. (1967) 361,000.

ASTROLOGY (astrolo'oji). So-called art or science of foretelling the future from the positions of the stars (Gk. *astron*, star; *legein*, speak). The superstitious belief that the fortunes of men and nations are affected for good or evil by the movements of the stars and planets flourished in ancient Babylon. It spread to the Mediterranean world, and was widely held among the Greeks and Romans. During the Middle Ages A. had a powerful vogue, and astrological beliefs are frequently encountered in Elizabethan and Jacobean literature. In spite of the rise of modern science, popular interest in A. has never completely died. The 1st edition of *Old Moore's Almanac* appeared in 1700, and there have been annual editions since. Astrological forecasts are a prominent feature in popular newspapers and journals.

The astrologer 'casts a horoscope' based on the date and hour of his subject's birth, i.e. draws a diagram showing the position at that moment of the sun and moon, the planets, and the 12 signs of the Zodiac. These heavenly bodies are supposed to represent different character traits and influences, and by observing their positions and inter-relations the astrologer professes to assess the person's character and to foretell the main outlines of his career.

ASTRONAUT. U.S. term for man making flights into space. See **SPACE RESEARCH**.

ASTRONOMER ROYAL. Title of the astronomer in charge of the Royal Observatory estab. at Greenwich, England, in 1675. Since 1958 the observatory has been located at Herstmonceux Castle, Sussex, to avoid the obscuring smoke and lights of London.

The A.R. besides his strictly astronomical work has various public duties relating to weather, time, Summer Time, and the broadcast time signal (rhythmic and pips). The A.R. for Scotland is Prof. H. A. Brück.

ASTRONOMERS ROYAL

John Flamsteed	1675	Sir W. H. M. Christie	
Edmund Halley	1720		1881
James Bradley	1742	Sir Frank Dyson	1910
Nathaniel Bliss	1762	Sir H. Spencer Jones	
Nevil Maskelyne	1765		1933
John Pond	1811	Sir Richard van der	
Sir Geo. Biddell Airy	1835	Riet Woolley	1956

ASTRONOMY. The science that deals with the celestial bodies – the Sun; the Moon; the planets and other members of the Solar System; the stars, and the galaxies. It is concerned with the positions and motions of these bodies; with the explanation of their motions; with their distances, sizes, masses, temperatures and physical conditions.

The oldest branch of A. – *observational A.* – is concerned with the appearances of the celestial bodies, and so provides the fundamental data. This leads on to *theoretical A.*, which deals with the interpretation of the observations according to mathematical and physical principles; the detailed mathematical explanation of the motions of the celestial bodies is known as *celestial mechanics*, and studies of the constitution of stars and galaxies come under the heading of *astrophysics*. Much more recently, *radio A.* has been developed, together with *radar A.*; the instruments used here are quite different from those of optical A., but have provided a great deal of information which could not have been obtained in any other way. The latest branch of astronomical science

is *rocket A.*, in which scientific instruments are flown beyond the dense lower layers of the Earth's atmosphere. Equipment has also been flown successfully by balloons up to altitudes of 80,000 ft.

There can be little doubt that A. is the oldest science in the world, since there are observational records from Babylonia, China and Ancient Egypt. The first true astronomers, however, were the Greeks, and the work of men such as Thales, Pythagoras, and Hipparchus will always be remembered. The Greeks knew that the Earth is a sphere, and not flat, as earlier peoples had believed; Eratosthenes of Cyrene even measured the size of the Earth with considerable accuracy. Star-catalogues were drawn up, the most celebrated being that of Hipparchus. Fortunately, the work of the Greek philosophers was summarized by Ptolemy of Alexandria in a great book which has survived in its Arab translation, the *Almagest*. The main defect of Greek A. was that the Earth was still regarded as the centre of the universe – though even this had been doubted by some philosophers, notably Aristarchus of Samos, who maintained that the Earth moves round the Sun.

Ptolemy, the last famous astronomer of the Greek school, died in or about the year A.D. 180, and little progress was made for some cents. When A. revived, it did so by way of the Arabs, who carried out theoretical researches from the 8th and 9th cents., and who also produced good star-catalogues. Unfortunately, true A. was handicapped by a general belief in the pseudo-science of astrology, and this continued to be the case until the end of the Middle Ages.

The dawn of a new era came in 1543, when a Polish canon, Copernicus, pub. a work entitled *De Revolutionibus Orbium Coelestium*, in which he demonstrated that the Sun, not the Earth, is the centre of the planetary system. Copernicus was wrong in many respects – for instance, he still believed that all celestial orbits must be perfectly circular – but he had taken the fundamental step. Tycho Brahe, of Denmark (q.v.), increased the accuracy of observations by means of improved instruments, allied to his own personal skill, and his observations were used by the German mathematician Johann Kepler (q.v.) to prove the validity of the Copernican system. However, there was considerable opposition to the idea of removing the Earth from its proud position in the centre of the universe; the Christian Church was openly hostile, and ironically, Tycho Brahe never accepted the idea that the Earth could move round the Sun. Yet before the end of the 17th cent. the theoretical work of Sir Isaac Newton had placed celestial mechanics upon a really firm footing.

The telescope was invented in or about 1608, by Hans Lippershey in Holland, and was first applied to astronomy by the Italian scientist Galileo (q.v.) in the winter of 1609–1610. Immediately Galileo made a series of spectacular discoveries. He found the 4 satellites of Jupiter, which gave strong support to the Copernican theory; he saw the craters of the Moon, the phases of Venus, and the myriad faint stars of the Milky Way. His telescope was feeble by modern standards, and magnified only 30 times, but before long larger telescopes were built, and official observatories were established. Greenwich Observatory, for example, dates from 1675.

Galileo's telescope was a *refractor*; that is to say, it collected its light by means of a glass lens or object-glass. Certain difficulties led Newton, in 1671, to develop the *reflecting telescope*, in which the light is collected by means of a curved mirror. (Newton was not the first to suggest this principle, but he seems to have been the first to construct such an instrument.) Modern telescopes are of tremendous size. The largest refractor, at Yerkes Observatory, has a 40-inch lens, and the Hale reflector at Palomar, in the U.S.A., has a mirror 200 in. in diameter.

ASTRONOMY. Ready for launching at the Palestine Balloon Flight Station, Texas, the 36-inch telescope Stratoscope II which weighs 6,300 lb. is seen parked near the balloon inflation area prior to attachment to the flight train. Lifted to a height of 79,000 ft. it was then used to make an infra-red study of Mars and came down near Pulaski, Tennessee.

Photo: U.S. National Science Foundation.

Theoretical researches continued, and astronomy made rapid progress in all directions. New planets were discovered — Uranus in 1781, by Herschel, and Neptune in 1846, by Adams and Le Verrier; even more significant was the first measurement of the distance of a star, in 1838, when the German astronomer Bessel established that the star 61 Cygni lies at a distance of about 11 light-years. (A light-year is the distance travelled by light in one year; it is equal to about 5,880,000,000,000 miles.) Astronomical spectroscopy was developed, first by Fraunhofer in Germany and then by men such as Secchi and Huggins, while Kirchhoff successfully interpreted the spectra of the Sun and stars; and by the 1860s good photographs of the Moon had been obtained, so that by the end of the cent. photographic methods had started to play a leading role in research. Today, it is probably true to say that almost all serious work is carried out by photographic methods, and it is seldom that visual observations are made through the world's largest telescopes.

William Herschel (q.v.), probably the greatest observer in the history of A., investigated the shape of the star-system or galaxy during the latter part of the 18th cent., and concluded that the stars are arranged roughly in the form of a double-convex lens. Basically, Herschel was correct, though it is now known that he was wrong in placing the Sun near the centre of the system; in fact, the Sun is well out toward the edge, and lies some 25,000 to 30,000 light-years from the galactic nucleus. Herschel also studied the luminous 'clouds' or nebulae, and made the tentative suggestion that those nebulae capable of resolution into stars might be separate galaxies, far outside the Galaxy in which the Solar System is situated. It was not until 1923 that Hubble (q.v.), using the 100-in. reflector at the Mount Wilson Observatory, was able to prove the correctness of this view. It is now known that the 'starry nebulae' are galaxies in their own right, and that they lie at immense distances. The brightest galaxy visible from Europe, the Great Spiral in Andromeda (faintly visible to the naked eye), is more than 2,000,000 light-years away; the most remote galaxy so far measured lies at about 5,000 million light-years. It has also been found that the galaxies tend to form groups, and that each group is receding from each other group, so that the whole universe is in a state of expansion.

In the present cent. A. has made remarkable pro-

gress, and made use of new tools such as radio-astronomy and rockets which allow observation beyond Earth's shielding atmosphere. Yet we still know very little about the way the universe came into existence, and in the 1960s A. was to a certain extent in a state of flux. The modern concept of the structure of the universe rests largely on Hubble's Law, based on the observation of ordinary galaxies some few hundred thousand light years away, which relates the distance of an object to the amount spectra shift towards red—the red shift. However, objects such as quasars, discovered by optical and radio astronomers in the 1960s, have been shown to have wide variations in individual characteristics, e.g. one quasar may have differing red shifts for different aspects of its spectrum.

ASTROPHYSICS. The science that is (a) physical astronomy, the study of the physical conditions in the heavenly bodies; and (b) astronomical physics, a branch of physics in which the behaviour of matter and radiant energy is studied under conditions unattainable on the earth. From this point of view a star or a nebula is a special laboratory in which extremes of temperature and density unknown in terrestrial laboratories are reached, and the effect of these conditions on the familiar elements of chemistry is ascertained. An approach to these extreme conditions is attempted in thermonuclear machines.

ASTURIAS. An ancient Spanish prov., once a kingdom. The eldest son of a king of Spain was called Prince of A. It corresponds to the modern prov. of Oviedo.

ASTURIAS, Miguel Angel (1899–). Guatemalan author and diplomat. He has pub. poetry, Guatemalan legends, and novels, such as *The President* (1946), in which he has attacked Latin-American dictatorships and 'Yankee imperialism'. He became ambassador to France in 1966 and in 1967 was awarded a Nobel prize.

ASUNCION (ahsoönthēōn). Cap. of the S. American rep. of Paraguay, on the Paraguay river. Founded in 1537, it is a commercial centre with good docks. There are 2 univs. Pop. (1962) 288,882.

ASWAN (ahswahn). Town of the United Arab Rep., in Upper Egypt, cap. of the sparsely populated administrative division of A. It stands near the 1st or

ASTRONOMY. The centre of the galaxy lies in the direction of Sagittarius (the Archer), which is therefore the richest part of the Milky Way. The galactic nucleus can never be seen because light from it is blocked by obscuring material, but it may be studied by means of radio telescopes, since radio waves are not similarly blocked. In this photograph of the Small Star Cloud in Sagittarius it is also possible to see dark patches, representing nebulae which have no suitable stars to excite them to luminosity.

Courtesy of Lick Observatory, Univ. of California

lowest cataract of the Nile, and has famous ruins. Pop. (1960) 48,000. The A. High Dam (1960–70) some 5 m. upstream has a storage capacity of 5,500 m. cu. metres and maintains the level of the Nile constant throughout the year without flooding.

ASYUT (ahsyoot'). City of the United Arab Rep., in Upper Egypt, cap. of A. prov. It is near the Nile, 200 m. S. of Cairo. An ancient Graeco-Egyptian city, it has many tombs of 11th and 12th dynasty nobles. *Asyut Univ.* was founded 1957. The A. barrage (1902: later much enlarged) supplies much of Middle Egypt with irrigation water. Pop. (1960) 122,000.

ATACAMA (ahtahkah'mah). Extensive desert in S. America, covering large areas of northern Chile. Inland are mountains, and the coastal area is rainless and barren. Silver and copper mines are worked, and in the N. Chile coastal province of A. are extensive nitrate deposits.

ATAHUALPA (ahtahwahl'pah) (c. 1502–33). Last of the Incas of Peru. He was taken prisoner in 1532 when the Spaniards arrived, and agreed to pay a huge ransom, but was accused of plotting against Pizarro and sentenced to be burnt. On his consenting to Christian baptism, the sentence was commuted to strangling.

ATALANTA. In Greek mythology, a huntress of Arcadia who declared that a suitor must first compete with her in a foot race; if he lost he must die. Milanion received from Aphrodite three golden apples which he dropped one by one during the race. A. stopped to pick them up and Milanion won.

ATATÜRK (1881–1938). Name assumed by Mustafa Kemal Pasha, Turkish statesman and soldier. B. at Salonika, the son of a customs official, he distinguished himself at a military academy, but was banished in 1904 to Damascus for having joined a revolutionary society. Later he was pardoned and promoted, and was largely responsible for the successful defence of the Dardanelles against the British in 1915. In 1918 he was sent into Anatolia to carry through the demobilization of the Turkish forces in accordance with the armistice terms, but instead estab. a provisional govt. opposed to that of Constantinople (under Allied control), and in 1921 led the Turkish armies against the Greeks who had occupied a large part of Asia Minor. He checked the invaders at the 21-day battle of the Sakaria, 23 Aug. to 13 Sept. 1921, for which he was granted the title of Ghazi (the Victorious) by the Assembly, and within a year had finally expelled the Greeks from Turkish soil. War with the British was averted by the statesmanship of K. and Gen. Harrington, and Turkey in Europe passed under K.'s control. On 29 Oct. 1923, Turkey was proclaimed a rep. with Kemal as 1st president. A one-party dictatorship was set up and a policy of consistent and radical westernization was embarked upon. In 1934 Kemal adopted the surname of Atatürk (Head of the Turks).

ATHANASIAN CREED. One of the three ancient creeds of the Christian Church consisting in the main of a definition of the doctrine of the Trinity. Although not written for many years after the death of Athanasius, it came to be attributed to him as he was the chief upholder of Trinitarian doctrine.

ATHANASIUS (c. 298–373). Christian bishop of Alexandria and reputed author of the Athanasian creed. Probably b. at Alexandria, he was a disciple of St. Anthony the hermit, and became early prominent in the great Arian controversy. Arianism was officially condemned at the council of Nicaea in 325, and in 328 A. was appointed bishop of Alexandria. Banished in 335 by the emperor Constantine because of his intransigence towards the defeated Arians, in 346 he was restored to his see, but suffered three more banishments before his final reinstatement about 366.

ATHEISM (Gk., without god). Disbelief in, or denial of, the existence of God or gods. A. takes many

forms and expressions. *Dogmatic A.* asserts that there is no God. *Sceptical A.* maintains that the finite mind of man is so constituted as to be incapable of discovering that there is or is not a God. *Critical A.* holds that the evidence for Theism is inadequate. This is akin to *Philosophical A.* which fails to find evidence of a God manifest in the universe. *Speculative A.* comprises the belief of those who, like Kant, find it impossible to demonstrate the existence of God – although, again like Kant, they may believe in the existence of God on other grounds.

There were Atheists in ancient Greece, e.g. Democritus, Leucippus, and their followers of the materialistic schools. In Rome the outstanding A. was Lucretius. The early Christians were called Atheists by the pagans since they denied the familiar gods of the Roman world; and in the centuries of Christian domination the term A. was applied in a similarly opprobrious fashion by the members of one sect and church to those of other sects and churches. Buddhism has been called an atheistic religion since it does not postulate any Supreme Being. The Jains are similarly atheistic; and so are those who adopt the Sankhya system of philosophy in Hinduism. Following the revolution of 1917 Soviet Russia became definitely atheistic.

A'THELNEY, Isle of. 'Island' of firm ground, rising c. 40 ft. above the surrounding marshland, c. 7 m. from Taunton in Somerset, England: the name means 'isle of princes'. In 878 Alfred the Great built a fort here as his guerrilla H.Q. against the Danes, and the legend of his burning the cakes is set on A. See *illus.* p. 76.

ATHELSTAN (c. 895–939). King of the Mercians and West Saxons. Son of Edward the Elder and grandson of Alfred the Great, he was crowned king in 925 at Kingston-on-Thames. He subdued parts of Cornwall and Wales, and in 937 defeated the Welsh, Scots, and Danes at Brunanburh.

ATHENA. Greek goddess, identified with the Roman Minerva, and supposed to have been b. from the head of Zeus fully grown and fully armed. She was the maiden goddess of wisdom and of the arts and crafts, and also goddess of war and protectress of the city of Athens, where was her most famous temple – the Parthenon or Maiden's Temple.

ATHENS. Capital city of modern Greece and of ancient Attica. Situated 5 m. inland N.E. of its port of Piraeus on the Gulf of Aegina, it is built around the rocky hills of the Acropolis (412 ft.) and the Areopagus (370 ft.), and is overlooked from the N.E. by the hill of Lycabettus (909 ft.). It lies in the S. of the central plain of Attica watered by the mountain streams of Cephissus and Ilissus.

The Acropolis (q.v.) dominates the city. Here stand architectural remains of the great days of ancient Greece, e.g. the Parthenon, the Erechtheum, and the temple of Athena Nikē. Near the site of the ancient Agora or market-place stands the Theseum, and S. of the Acropolis is the theatre of Dionysus. To the S.E. stand the gate of Hadrian and the columns of the temple of Olympian Zeus. Near by is the marble stadium built about 330 B.C. and restored in 1896.

Site first inhabited c. 3000 B.C. A. became the capital of a united Attica before 700 B.C. Captured and sacked by the Persians in 480, subsequently under Pericles it was the first city of Greece in power and culture. After the death of Alexander the Great the city fell into comparative decline, but it flourished as an intellectual centre until A.D. 529, when the philosophical schools were shut down by Justinian. In 1458 it was captured by the Turks who held it until 1833; it was chosen as the cap. of modern Greece in 1834. Among the modern buildings are the Royal Palace, and several museums. Pop. Greater A. (including Piraeus) (1961) 1,837,041.

ATHLETICS. The practice of athletic games – i.e.

games of skill and endurance, such as hurdling, running, javelin throwing, etc.—and physical exercises. The Greeks were among the first to organize athletic games; the first Olympic games were held about 2,500 years ago. The Romans usually held their games at the festivals of the gods. The Olympic Games (q.v.) were revived in 1896 and the Commonwealth Games are run along similar lines. In Britain, where A. proper is limited to field and track events, the Amateur Athletic Association (1880) is the leading body. In the U.S., where team games are included, leading associations incl. the Amateur Athletic Union (1888) and — typical of the American interest in inter-collegiate competition — the National Collegiate Athletic Association.

MEN'S WORLD ATHLETIC RECORDS

High Jump:

7 ft. 5½ in. V. Brumel (U.S.S.R.), 1963.

Long Jump:

27 ft. 5 in. R. Boston (U.S.A.), 1965.

Triple Jump:

55 ft. 10½ in. J. Schmidt (Poland), 1960.

Hammer:

241 ft. 11 in. G. Zsivotzsky (Hungary), 1965

Discus:

214 ft. L. Danek (Czechoslovakia), 1966.

Javelin:

300 ft. 11 in. T. Pedersen (Norway), 1964.

Pole Vault:

17 ft. 8 in. P. Wilson (1967), R. Seagren (1968), both U.S.A.

Hurdling:

120 yds. 13.2 sec. M. Lauer (Germany), 1959; L. Calhoun (1960), E. McCulloch (1967), both U.S.A.
440 yds. 49.3 sec. G. Pogietier (S. Africa), 1960.

Walking:

20 miles. 2 hrs. 31 min. 33 sec. A. Vedyakov (U.S.S.R.), 1958.

Running:

100 yds. 9.1 sec. R. Hayes (1963), J. Hines, C. Greene (1967), all U.S.A.; H. Jerome (Canada), 1966.
220 yds. 19.5 sec. T. S. Smith (U.S.A.), 1966.
440 yds. 44.8 sec. T. Smith (U.S.A.), 1967.
880 yds. 1 min. 45.1 sec. P. G. Snell (New Zealand), 1962.
1 mile. 3 min. 51.1 sec. J. Ryun (U.S.A.), 1967.
3 miles. 12 min. 50.4 sec. R. Clarke (Australia), 1966.
6 miles. 26 min. 47.0 sec. R. Clarke (Australia), 1965.

ATHLONE, Earl of. Title granted in 1917 to Alexander Augustus Frederick William Alfred George Cambridge (1874–1957), third son of the duke of Teck and Princess Mary of Cambridge, and brother of Queen Mary. He was Gov.-Gen. of the Union of South Africa 1923–31, and of Canada 1940–6.

ATHLONE, Town (U.D.) in Westmeath, Rep. of Ireland, on the Shannon, well known for its tweeds. The broadcasting station of Radio Eireann is near by. Pop. (1961) 9,624.

ATHOS. A peninsular promontory on the Macedonian coast of Greece. Its peak is a white marble pyramid, 6,670 ft. high. The promontory is occupied by a community of 20 Basilian monasteries inhabited by some 3,000 monks and lay brothers. No female creature is allowed within the peninsula.

ATKINS, Robert (1886–). British actor-producer, remarkable for his series of Shakespeare and other plays at the Open Air Theatre, Regent's Park from 1933.

ATKINS, Tommy. Popular name for the British soldier. The earliest discoverable use of the name is

ATHELNEY. In 1693 the superbly worked 'Alfred Jewel' was found some miles W. of the Isle of Athelney. About 2½ in. long, it may have been the head of a bookmark and is of green, red and blue cloisonné enamel work: round the gold rim are the words *Ælfred mec heht gewyrcean*—Alfred had me made.

in a specimen form included in an official handbook circulated by the War Office at the end of the Napoleonic War. A story that T.A. was a British soldier mortally wounded under Wellington in the Netherlands in 1794, and that the Duke chose his name to be used in an army document some 50 years later, seems to have originated in an article by Col. Newnham-Davis in *Printer's Pie*.

ATKINSON, Sir Harry Albert (1831–92). New Zealand statesman. B. at Chester, he emigrated to N.Z. in 1855, entered Parliament in 1863, and from 1874 was thrice Prime Minister, and 4 times Treasurer.

ATLANTA. Cap. and largest city of Georgia, U.S.A. Founded as Terminus in 1837, and re-named in 1845, it was nearly destroyed in 1864 during the American Civil War. It has 2 universities and a college founded in 1885 for Negro students. Pop. (1960) 487,455.

ATLANTIC, Battle of the. Name given to the continuous battle fought in the Atlantic Ocean throughout the S.W.W. (1939–45) by the Royal Navy, the Merchant Navy, and Coastal Command aircraft, under the operational control of the Admiralty, against the sea and air power of Germany.

The battle opened on the first night of the War, when on 4 Sept. 1939 the Donaldson liner, *Athenia*, sailing from Glasgow to New York, was torpedoed by a German submarine off the Irish coast. The Germans tried U-boats, surface-raiders, indiscriminate mine-laying, and aircraft, but every enemy method was successfully countered by, e.g., the convoy system and degaussing. Outstanding incidents were the engagements in which the armed merchantmen *Rawalpindi* (23 Nov. 1939) and *Jervis Bay* (5 Nov. 1940) were sunk by German warships, and the destruction of the great German battleship *Bismarck* on 27 May 1941. The total number of U-boats destroyed by the Allies during the whole war was nearly 800. No fewer than 2,200 convoys of 75,000 merchant ships crossed the Atlantic.

ATLANTIC CHARTER. Declaration issued by Winston Churchill and President Roosevelt following meetings on board H.M.S. *Prince of Wales* and the U.S. carrier *Augusta*, in Aug. 1941. It stated that Britain and the U.S.A. sought no territorial aggrandizement; desired no territorial changes not according with the wishes of the peoples concerned; respected

the rights of all peoples to choose their own form of government; wished to see self-government restored to the occupied countries; would further access by all states to trade and raw materials; desired international collaboration for the raising of economic standards; hoped to see a peace affording security to all nations and enabling them to cross the seas without hindrance; and proposed the disarmament of the aggressor states as a preliminary to general disarmament.

ATLANTIC CITY. City of U.S.A. on the coast of New Jersey, celebrated seaside and pleasure resort. Pop. (1960) 59,544.

ATLANTIC COLLEGE. International educational experiment conceived by Kurt Hahn (q.v.) and Air Marshal Sir Lawrence Darvell. The first A.C. (for boys of 17-18 drawn from N. America and Europe) was opened in 1962 in St. Donat's Castle (once owned by W. R. Hearst, q.v.), 14 m. W. of Cardiff, Wales, which was bought for the college by Antonin Besse.

ATLANTIC OCEAN. The sea lying between Europe and Africa on the E., and America on the W., and probably named after the fabulous island or continent of Atlantis. It extends from the Arctic to the Antarctic Ocean, being divided by the Equator into the North A. and South A., with a total area of 31,500,000 sq. m. Its average depth is just over 2,000 fathoms (more than 2 miles). Running N.-S. along the middle of the ocean is the Mid-Atlantic Ridge which separates two large troughs in each of which the depth reaches more than 4,000 fathoms. The N. Atlantic is the saltiest of the main oceans, and the tides are larger than those of other oceans.

ATLANTIS. An island continent, which according to Plato once existed in the Atlantic opposite the Straits of Gibraltar, but foundered about 9,600 B.C. as a result of submarine convulsions. The story (as originally told by Egyptian priests to Solon) may refer to the volcanic eruption c. 1500 B.C. of Santorin (of which the is. Thera and Therasis c. 70 m. N. of Crete are the remains), causing the collapse of the empire of Minoan Crete by fire and tidal wave.

ATLAS. In Greek mythology, one of the Titans who revolted against the gods; as a punishment A. was compelled to support the heavens upon his head and shoulders. Growing weary, he asked Perseus to turn him into stone, and he was transformed into Mt. Atlas. The use of the word to denote a book of maps was introduced in the 16th cent. by Mercator; such books had a frontispiece showing Atlas supporting the globe.

ATLAS. Mountain system of N. W. Africa, stretching for about 1,500 m. from the Atlantic coast of Morocco to the Gulf of Gabes, Tunisia, and lying between the Mediterranean on the N. and the Sahara on the S. Geologically the A. mts. compare with the Alps in age, but their structure is much less complex. They are recognized as the continuation of the great Tertiary fold mountain systems of Europe.

ATMOSPHERE. The air which surrounds and forms a permanent covering of the earth's surface. It is a mixture of gases which show no measurable variation near the surface of the earth except for the water vapour. The constitution of dry air from which all water vapour has been removed is as follows (percentage by volume): nitrogen 78.09; oxygen 20.95; argon 0.93; carbon dioxide 0.03. Included in the above are minute quantities of other gases, e.g. neon, helium, krypton, hydrogen, xenon, ozone, and radon, each less than 0.0001.

Atmospheric pressure is normally equivalent to 14.73 lb. per sq. in. but varies slightly. It decreases steadily as higher altitudes are reached.

ATOLL. See CORAL REEFS.

ATOM (Gk. *atomos*, indivisible). Name given to the very small, discrete particles of which all matter is composed. There are 100 kinds of A. which differ in chemical behaviour, and correspond to the 100

elements which cannot be broken up by chemical means into anything simpler.

Belief in the existence of As. dates back to the days of the ancient Greek natural philosophers, but it rested on entirely circumstantial evidence, since As. are much too small to be seen even by the microscope; the largest is only about a hundred-millionth of an inch across. Furthermore, they are in constant motion. Of recent times, however, various methods for detecting the presence of single As. have been devised, all making use of effects which can be produced by the energy of a rapidly-moving A. Rutherford showed that As. of certain radio-active elements shoot out spontaneously the so-called alpha rays, single As. of helium issuing with a speed of about 10,000 m. a sec. At this speed an A. has sufficient energy to produce a tiny speck of light when it hits a thin layer of phosphorescent zinc sulphide. Each A. causes a splash of light, and this momentary scintillation can be observed with a microscope. It is then possible to determine its path.

Until near the end of the last century it was believed that every A. was a complete unbreakable entity. Since then the modern theory of atomic structure has been worked out, largely by Rutherford, who by experiments with alpha particles showed that every A. consists of a very minute particle, only one 10,000th as big across as the atom, called the *nucleus*, surrounded by a distribution of particles of negative electricity called *electrons*.

All electrons have identical mass and charge. The different properties of the various chemical elements are due to the different number of electrons in the atom of each element. The simplest element, hydrogen, contains 1 electron; each atom of carbon contains 6; the most complex A. known in nature, that of

Courtesy of the Royal Society, Sir Lawrence Bragg, and the Science Museum, South Kensington.

ATOM. Lithium has the at. no. 3, and the path of the three electrons round the nucleus is shown by the white bands of the model: two move in compact circles, one in a wide ellipse. Below, a photograph of alpha-rays from thorium C. One of the rays strikes the nucleus of a nitrogen atom, causing a transmutation. The ray is absorbed and a hydrogen proton ejected causing the transverse streak seen upper left.

ATOMIC ENERGY. The U.K. was a pioneer from 1955 in the conversion of nuclear fission energy into electricity with the Calder Hall type reactor. A major advance upon this type, however, was the gas-cooled reactor at Windscale, Cumberland, seen above. Photo: U.K.A.E.A.

uranium, has 92. The mass of an A. of any kind is several thousand times as great as the mass of the electrons it contains. Moreover, As. in their normal state have no excess of electric charge. Save in hydrogen, each nucleus is composed of 2 kinds of particle, *protons* and *neutrons*. Each proton has a positive electric charge, equal in magnitude but opposite in sign to that of the electron; the neutrons have no charge. Proton and neutron have nearly equal mass, and this is about 1839 times as great as the mass of the electron. Since the proton and electron charges are equal and opposite and the A. as a whole has no charge, the number of protons within the nucleus of any A. must equal the number of electrons outside the nucleus. The number of units of positive charge (protons) in the nucleus is called the *atomic number*.

The problem of the basic structure of the neutrons and protons that make up atomic nuclei will be brought nearer solution when some fundamental (sub-atomic) particles discovered in recent high energy physics research are better understood. They incl. anti-particles (such as the anti-proton and anti-neutron) which are opposite in some properties but identical in others to known charged and neutral particles; hyperons, with masses greater than protons; and mesons, with masses intermediate between electrons and protons.

As. which have the same number of protons but differ in their number of neutrons are called *isotopes*; these have identical chemical properties since they have the same number of electrons. Most of the chemical elements consist of mixtures of two or more isotopes; e.g. about 1 atom in 4,000 of natural hydrogen contains 1 neutron in addition to the single proton that forms the nucleus of the ordinary hydrogen A. This kind of hydrogen is called heavy hydrogen or deuterium, and is denoted by the symbol H^2 as opposed to H^1 for the more plentiful isotope. At the other end of the list, natural uranium consists of 3 isotopes, U^{234} , U^{235} , and U^{238} , the last forming over 99 per cent of the mixture.

As. as a whole are held together by the electrical forces of attraction between each negative electron and the positive protons within the nucleus. The latter *repel* one another with relatively enormous forces; a nucleus holds together only because other forces, not of a simple electrical character, attract the protons and neutrons to one another. These additional forces act only so long as the protons and neutrons are virtually in contact with one another. If, therefore, a fragment of a complex nucleus, containing some protons becomes only slightly loosened from the main agglomeration of neutrons and protons, the strong natural repulsion between the protons will cause this fragment to fly apart from the rest of the nucleus with high speed, carrying with it energy that is very much greater than the energy released in chemical

reactions between As. — reactions which involve only the weak forces existing between the outer electrons of the As. It is by such fragmentation of atomic nuclei (*nuclear fission*) that 'atomic energy' (more strictly nuclear energy) is released.

Some of the most complex natural nuclei, e.g. those of uranium and radium, are radioactive, that is, they spontaneously disintegrate with the emission of a fragment containing 2 neutrons and 2 protons, a so-called alpha particle. If a large number of As. of say U^{238} are considered, about half of them will have disintegrated after about 4,000 million years; for radium the corresponding hard-life is c. 1,600 years.

ATOM BOMB. See BOMB.

ATOMIC ENERGY. Energy obtained from the inner core or nucleus of atoms, as contrasted with the energy released in chemical processes, which is derived from the electrons surrounding the nucleus.

If a high-speed alpha particle strikes another nucleus it can cause it to disintegrate, e.g. by the emission of a proton or a neutron. The released neutron, having no electric charge, can pass freely through matter unless it strikes a nucleus which it can easily enter since the protons do not repel it as they would a positively-charged particle. It may leave the nucleus again, or may stay in it, in which case it may or may not cause a practically immediate nuclear disintegration. What actually happens depends on the kind of nucleus it strikes and the velocity with which it strikes it. If a neutron enters a nucleus of U^{235} the latter may undergo fission into 2 roughly equal fragments which fly apart, while at the same time a small number of free neutrons (often 2 or 3) are released and travel out through the material. If the material is pure U^{235} , then they may enter other nuclei, causing further fissions, more released neutrons, and so on; an ever-branching 'chain' of nuclear fission spreads with great rapidity through the material with enormous evolution of energy. A certain minimum amount of U^{235} is required to support the nuclear explosion; this critical amount is a military secret. In practice 2 lumps of the materials, each smaller than the critical size, are brought close together, forming a lump above the critical size; as soon as a neutron enters the system, there will be a nuclear explosion. A slow controllable chain reaction may be produced in a *uranium pile*, made of alternate lumps or rods of pure uranium metal and of a material called a moderator. The first successful pile contained 6 tons of uranium metal, with carbon as the moderator. Since the persons operating the pile must be protected from the radiations arising from the fission process and from secondary causes, the pile must be enclosed by thick walls weighing many tons. This fact precludes the use of atomic energy in e.g. motor-cars, but it may be used in ships. The cost of construction is also so great that the use of uranium piles as generators of heat is unlikely at present to mean a large drop in electric-power costs. But it does deprive the steady reduction of coal and oil reserves of much of its menace; and it may be of the greatest significance to countries without these natural sources of power.

Beside producing power, the uranium pile may be used for the production of new radioactive substances that are made from ordinary chemical elements by the action of neutrons (which the pile provides in very great number). An example is radioactive phosphorus, of great value as a 'tracer element' in biological research. First commercial use of a nuclear explosion was in the release of natural gas deposits in New Mexico, 1967. See BOMB.

ATOMIC ENERGY ORGANIZATIONS. Atomic energy and its applications are normally controlled by national govt. organizations.

The nominated U.K. organization is the United Kingdom A.E. Authority (q.v.) with H.Q. in London. The major Commonwealth countries have their own

organizations, in particular: A.E. of Canada Ltd., the Australian A.E. Commission, the Pakistan A.E. Commission, and the Indian Dept. of A.E. Most other leading countries have nuclear energy programmes and national organizations, the largest of these being the United States A.E. Commission, the U.S.S.R. State Committee of the Council of Ministers, the French Commissariat à l'Énergie Atomique, the Swedish organization AB Atomenergi, the Italian Atomic Energy Commission, the Spanish Junta de Energia Nuclear, and the Japanese Atomic Energy Authorities.

In addition the Common Market countries support a joint organization called Euratom, and there is a more broadly based and informal association under O.E.C.D. auspices known as the European A.E. Agency. The International A.E. Agency in Vienna, estab. in 1957, acts as a general clearing house on international matters, and provides a forum for technical discussion. It is guided by a Scientific Advisory Committee of the Sec. Gen. of the U.N.

International organizations exist for research in nuclear physics, the major ones being at Dubna (q.v. in Russia, and Geneva (C.E.R.N., q.v.). Other international organizations exist for co-operative research in the use of isotopes.

ATOMIC NUMBER. The number of electrons, or, what is its equivalent, the positive charge on the nucleus, of an atom. The 103 elements are numbered 1 (hydrogen) to 103 (lawrencium) in the Periodic Table. See CHEMISTRY and INORGANIC CHEMISTRY.

ATOMIC TIME. The measurement of the radia-

tions which atoms emit or absorb, made on the assumption that their properties are constant, as a standard of time. Such measurement can be rapidly and conveniently made in the case of atoms of caesium, and provides a degree of precision far beyond that of the rotation of the earth: it was adopted as world standard 1964.

ATOMIC WEIGHT. The least weight of a chemical element that is present in a molecular weight of any of its compounds. A.Ws. are relative numbers or ratios, not absolute weights. Formerly the A.W. of hydrogen, the smallest element, was taken as unity but it has been found more convenient to take the A.W. of oxygen as exactly 16, when that of hydrogen is 1.008. The absolute weight (or mass) of a hydrogen atom is 1.6×10^{-24} grams.

ATONALITY. In music, name given to a modern system of harmony, in which there is an absence of key. Towards the end of the 19th cent., the chromaticism of such composers as Wagner had the effect of leading the music farther and farther from the original key. Scriabin's later work showed a distinct tendency towards A., and he was the first to attempt to formulate it into a system by building up his harmonies on certain 'synthetic chords'. The system which is now generally called the atonal system, however, was that worked out by Arnold Schönberg about 1911, and finally perfected by him about 1923. This is more correctly called the 'twelve-tone system'; Schönberg and his followers repudiate the term A. as meaningless. Their system, though totally different from that which underlies diatonic harmony, is by no means arbitrary

ATOMIC ENERGY. Operating at considerably reduced cost, as against the Calder Hall type, the Windscale reactor began feeding the National Electricity Grid in 1963. Key: 1, Reactor vessel; 2, Graphite moderator; 3, Fuel element channels; 4, Neutron shield; 5, Hot box; 6, Concentric gas duct; 7, Heat exchanger; 8, Gas circulator; 9, Refuelling floor; 10, Refuelling machine; 11, Transit station for irradiated fuel; 12, Carousel for storage of irradiated fuel; 13, Containment building; 14, Personnel air lock; 15, Goods air lock; 16, Test loops; 17, Fuel element building; 18, Clean fuel preparation room; 19, Stringer breakdown cave; 20, Reactor control room; 21, Turbine hall; 22, Cooling towers; 23, Gas discharge treatment plant; 24, CO₂ and CO plant.

Photo: U.K.A.E.A.

but is bound by strict rules. The chief exponents of A. are Schönberg, Alban Berg, von Webern, and Krenek.

ATONEMENT. Literally, a bringing to be 'at one', i.e. reconciliation. In Christian theology, it is the doctrine that Jesus Christ suffered on the Cross as the means of effecting reconciliation and forgiveness between God and man.

ATONEMENT, Day of. Jewish religious fast held on the 10th day of Tishri (Sept.-Oct.), the 7th month of the Jewish year.

ATROPINE (a'tropin). An alkaloid, the active principle of deadly nightshade, or belladonna, named from the Greek *Atropos*, one of the three Fates who cut men's lives short. Usually given as atropine sulphate, it is a mild local anaesthetic.

ATTAR OF ROSES (Pers. *attar*, essence). Perfume derived from the essential oil of roses, obtained by crushing and distilling the petals of the flowers.

ATTENBOROUGH, Richard (1923-). British actor and film producer. Outstanding among his modern, naturalistic roles was Pinkie in *Brighton Rock* (1943); later films incl. *The Guinea Pig*, *Brothers in Law* and *The Angry Silence* (1959: co-producer). His brother David A. (1926-) led zoological expeditions to Indonesia, New Guinea, Madagascar, etc., was controller BBC 2 (television) 1965-8, and then became director of programmes, television.

ATTERBURY, Francis (1662-1732). C. of E. divine and politician. Taking holy orders in 1687, he was appointed a royal chaplain by William III. Under Queen Anne he received rapid promotion, becoming bishop of Rochester in 1713. His Jacobite sympathies prevented his attaining to the primacy, and in 1722 he was sent to the Tower and subsequently banished. He was a friend of Pope and Swift.

ATTICA. District of ancient Greece, washed on two sides by the Aegean Sea. It is a prefecture of modern Greece with Athens as its cap.

A'TTILA (c. 406-53). King of the Huns, called the 'Scourge of God'. Becoming king in 434 of hordes of Huns roaming the area from the Caspian to the Danube, he embarked on a career of vast conquests ranging from the Rhine to Persia. In 451 he invaded Gaul, but was defeated near Châlons-sur-Marne by the Roman and Visigothic armies under Aëtius and Theodoric. In 452 he led his Huns into Italy and only the personal intervention of Pope Leo I prevented the sacking of Rome. He returned to Pannonia and d. on the night of his marriage with Ildico.

A'TTIS. A Phrygian god, whose death and resurrection symbolized the end of winter and the arrival of spring. Beloved by the goddess Cybele, he was driven mad by her as a punishment for his infidelity, and castrated himself and bled to death. His worshippers sought identification with the god by castrating themselves.

ATTLEE, Clement Richard, 1st earl (1883-1967). British Labour statesman. B. in Putney, the son of a solicitor, he was ed. at Haileybury and Oxford, and practised at the Bar 1906-9. Social work in E. London and co-operation with the Webbs in Poor Law reform led him to become a Socialist: he joined the Fabian Society and the I.L.P. in 1908. He became sec. to Toynbee Hall in 1910 and lecturer in social science at the London School of Economics in 1913. After distinguished service in the F.W.W. he was mayor of Stepney 1919-20; Labour M.P. for Limehouse 1922-50 and for W. Walthamstow 1950-5.

In the 1st and 2nd Labour Govts. he was Under-Sec. for War (1924), and Chancellor of the Duchy of Lancaster and P.M.G. (1929-31). In 1935 he became Leader of the Opposition. In the wartime Coalition Govt. he was Lord Privy Seal (1940-2), Dominions Sec. (1942-3) and Lord Pres. of the Council (1943-5), combining the office of Deputy P.M. with both these latter posts. In July 1945 he became P.M. after a

Labour landslide in the general election, and introduced a sweeping programme of nationalization and a whole new system of social services. The govt. was returned to power with a much reduced majority in 1950 and was defeated in 1951. Following his resignation as P.M., he was awarded the O.M. and in 1955 accepted an earldom, on his retirement as Leader of the Opposition. His books incl. *The Labour Party in Perspective* (1937) and *As it Happened* (1954), an autobiography.

ATTORNEY (ater'ni). Person appointed by another to do certain acts in his stead. In Britain the term is largely obsolete, but the head of the English Bar and principal law officer of the Crown is still known as the *A. General*: he is usually prominent in politics. In the U.S. an A. combines the functions of barrister and solicitor: the *A. General*, a member of the cabinet and appointed by the pres., is the chief law officer of the govt. and head of the dept. of justice.

ATTWELL, Mabel Lucie (1879-1964). British artist, illustrator of many books for children, incl. her own stories and verse. Her apple-faced children are inimitable and have been reproduced on numerous souvenirs. She m. in 1908 Harold Earnshaw who d. in 1937.

AUBE (öb). River of N.E. France, a tributary of the Seine, giving its name to a dept. It is about 150 m. long.

AUBER (öbär'), Daniel François Esprit (1782-1871). French operatic composer. B. at Caen, he studied under Cherubini. Of his about 50 operas, *The Dumb Girl of Portici* (1828) and the comic opera *Fra Diavolo* (1830) are best known.

AUBERT (öbär'), Louis (1877-). French composer. B. near St. Malo, he has composed music in the Spanish idiom, particularly 'Habanera'; also orchestral music and the opera *La Forêt bleue*.

AUBREY (aw'brü), John (1626-97). British antiquary. B. in Wilts, he studied law, but became dependent on patrons such as Ashmole and Hobbes. He pub. *Miscellanies* (1696) of folklore and ghost-stories, whilst the material he collected for surveys of Surrey and Wilts appeared posthumously in 1719 and 1862 respectively. His *Brief Lives* (pub. 1898) contain intimate notes on celebrities of his time. A. was the first to claim Stonehenge as a Druid temple.

AUBRIETIA (awbrë'sha). Genus of spring-flowering dwarf perennial plants of the Cruciferae order, trailing in habit and bearing purple flowers. It was named in 1763 by Adanson after Claude Aubriet (c. 1665-1742), painter for the French Royal Garden.

AUBUSSON (öbüsön'). Town in the dept. of Creuse, France, famous for its carpets and tapestry, the industry dating from the 15th cent. Pop. (1962) 6,279.

AUCH (ösh). French town, cap. of the dept. of Gers. It was the capital of Armagnac and of Gascony, and has a fine Gothic cathedral. Pop. c. 16,500.

AUCHINLECK (awk'inlek), Sir Claude John Eyre (1884-). British soldier. Son of a colonel in the Royal Artillery, he was G.O.C.-in-C. Southern Command in England in 1940, C.-in-C. in India in 1941, and in the Middle East 1941-2. During the summer of 1942 his army was forced back to the Egyptian frontier by Rommel, but there made a magnificent stand. Handing over the command of the 8th Army to Montgomery, he was appointed in 1943 C.-in-C. in India for the second time. In 1946 he was promoted to field marshal, and retired in 1947.

LORD ATTLEE

Photo: Daily Herald

AUCKLAND, George Eden, 1st earl of A. (1784–1849). British statesman. He became Tory M.P. in 1810, and 1835–41 was Governor-General of India. Auckland in N.Z. is named after him.

AUCKLAND. Largest city of New Zealand. It stands between Waitemata and Manukau Harbours on the A. peninsula, and is an important port and industrial and commercial centre. Founded 1840 (cap. of N.Z. till 1865). A. has a univ. (1882), Anglican and R.C. cathedrals, and internat. airport (1965) at Mangere. Pop. (1967) 565,500. See map below.

AUCTION. The sale of property in public, usually to the highest bidder. Auctioneers must take out an annual licence. There are usually conditions of sale by which all bidders are bound. A bid may be withdrawn at any time before the auctioneer brings down the hammer, and the seller is likewise entitled to withdraw any lot before the hammer falls. It is illegal for the seller or anyone on his behalf to make a bid for his own goods unless his right to do so has been reserved and notified before the sale. A reserve price is kept secret, but the amount of an upset price is made public before the sale. An A. where property is first offered at a high price and gradually reduced until a bid is received is known as a *Dutch A.*

AUCTION BRIDGE. Card Game played by two pairs of players. A development of bridge, it originated in India among members of the Indian Civil Service, reached England in 1903, and was first played at the Portland Club in 1908. Its chief characteristic is that trumps are decided by preliminary bid or auction. In 1929 it was largely supplanted by Contract Bridge (q.v.).

AUDE (ôd). River of S.E. France, 130 m. long, which gives its name to a dept. Carcassonne is the chief town on it.

AUDEN (aw'den), Wystan Hugh (1907–). Anglo-American poet. B. in York and ed. at Oxford, he was with C. Day Lewis and Spender (qq.v.), one of the 'committed' poets of the thirties, and pub. his 1st volume in 1930. By the time of *Look Stranger* (1926) much of the earlier obscurity of manner had been discarded, and noteworthy later books are *The Quest* (1941), with some fine sonnets: *Another Time* (1940),

excellent conversational verse; *The Age of Anxiety: A Baroque Eclogue* (1947), and *The Shield of Achilles* (1955). Representing a new departure in drama, both in idea and method, were *The Dog Beneath the Skin* (1935), *The Ascent of F6* (1937), and *On the Frontier* (1938), written with Christopher Isherwood (q.v.). In 1939 he became assoc. prof. of English Literature at Ann Arbor Univ., Michigan, and subsequently adopted American citizenship, but in 1956–61 returned to Oxford as prof. of poetry. A. is a poet of great satiric and lyric gifts, although not free from carelessness and cheap effects. By his daring technique, evolved under the influence of Hopkins and Eliot, he cleared the way for younger writers. His effect on modern drama is undeniable.

AUDENARDE. French form of OUDENARDE.

AUDITOR. A person whose duty it is to examine accounts. In the U.K. the Companies Act 1948 requires that the accounts of companies to which it applies must be audited annually, that the As. must report to the members stating whether they have obtained all the information required and whether the company's balance sheet exhibits a true view of the company's affairs.

AUDUBON (aw'dūbon), John James (1785–1851). American naturalist. B. in Santo Domingo, the son of a French sailor and a Creole woman, he was ed. in Paris and became a trader in Kentucky. In 1827 he pub. the first parts of his *Birds of North America*, with a remarkable series of colour plates. Later he produced a similar work on American quadrupeds. The National A. Soc. (originating 1886) has branches throughout the U.S. and Canada for the study and protection of birds. (see illus. p. 82)

AUER (ow'er), Leopold (1845–1930). Hungarian violinist. A pupil of Joachim, he played in concerts with Brahms and Liszt, taught the violin at St. Petersburg from 1868, conducted the court concert (1887–92), and emigrated to New York in 1918.

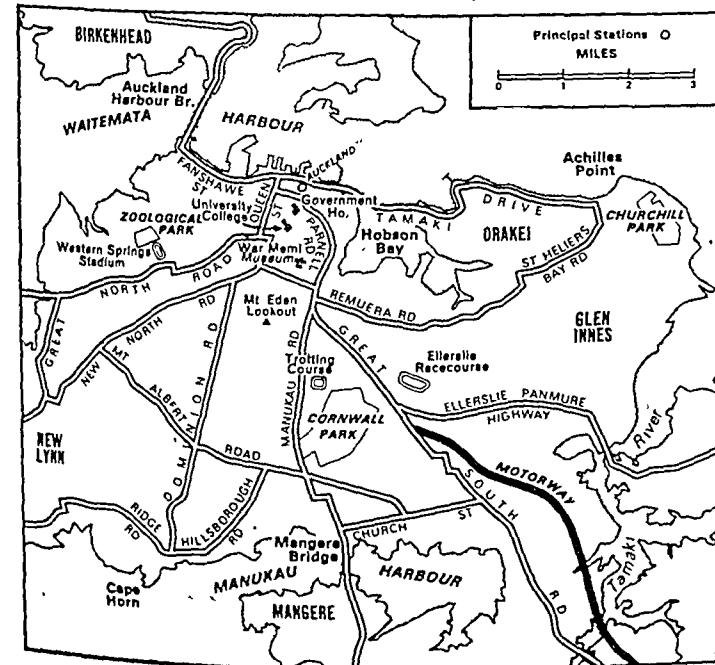

AUER VON WELSBACH (ow'er-fon-wels-bach), (1858–1929). Austrian chemist and inventor. B. in Vienna, he was a research worker in pure chemistry and invented the incandescent gas-mantle and many other lighting improvements.

AUGIER (ôzhê-â), Émile (1829–91). French dramatist. B. at Valenciennes, he studied law but turned to the stage after the success of his verse-play *Cigüe* in 1844. His best-known work is *Le Gendre de M. Poirier*, written in prose in collaboration with Jules Sandeau, a realistic depiction of bourgeois society, has become a classic.

AUGSBURG (owgs'boorg). German city in Bavaria at the confluence of the Wertach and Lech, 32 m. N.W. of Munich. It is named c. 800 after the Roman emperor Augustus who founded it in 15 B.C. During the Middle Ages its merchants, particularly the families of Fugger and Welser, were world-famous. During the S.W.W. the Messerschmitt and other engineering works were frequently bombed. Pop. (1966) 212,549.

The *Confession of A.* was a statement of the Protestant faith as held by the German Reformers, presented to Charles V at the Diet of A. in 1530. It is the accepted statement of the creed of the Lutheran Church.

AUGURS (aw'gerz). College of Roman priests who interpreted the will of heaven from traditional signs

AUCKLAND

or 'auspices', chief of which were the flight of birds, the entrails of animals sacrificed, and the direction of thunder and lightning. Their advice was sought before the commencement of battle, and on other important occasions. Consuls and other high officials had the

right to consult the auspices themselves, and a campaign was said to be conducted 'under the auspices' of the general who had thus consulted the will of the gods.

AUGUSTINE (awgus'tin) (A.D. 354-430). Christian saint, theologian, and a Father of the Church. B. at Tagaste, Numidia, of Roman descent, he studied rhetoric in Carthage where he became the father of a natural son, Adeodatus. He lectured at Tagaste and Carthage and for 10 years was attached to the Manichaean heresy. In 383 he went to Rome, and on

AUDUBON. 'The Wild Turkey Cock'. New York Historical Society, N.Y. City.

moving to Milan came under the influence of Ambrose. After prolonged study of Neo-Platonism A. was converted to Christianity and was baptized by Ambrose together with his son. Resigning his chair in rhetoric, he returned to Africa, his mother St. Monica dying at Ostia on the journey, and settled at Tagaste. His son d. at 17. In 391, while visiting Hippo, A. was ordained priest. In 395 he was given the right of succession to the bishopric of Hippo, and in 396 succeeded to the office. He d. at Hippo during its siege by the Vandals.

Many of A.'s books resulted from his share in 3 great controversies: he refuted Manichaeism; attacked and did much to eliminate Donatism (conference of Carthage, 411); and devoted the last 20 years of his life to the Pelagian controversy, in which he maintained the doctrine of original sin and the necessity of divine grace. He estimated the number of his works at 230, and also wrote many sermons, as well as pastoral letters. A.'s most famous productions are his 'Confessions', his spiritual autobiography, and the influential *De Civitate Dei* (City of God) vindicating the Christian Church and Divine Providence in 22 books.

AUGUSTINE, St. (d. A.D. 604). First archbishop of Canterbury. Originally prior of the Benedictine monastery of St. Andrew, Rome, he was sent to convert England by Pope Gregory I. Landing at Ebbsfleet, Thanet (597), he soon baptized Ethelbert, King of Kent. He was consecrated bishop of the English at Arles (597) and appointed archbishop in 601. In 603 he attempted unsuccessfully to unite the Roman and native Celtic churches at a conference on the Severn. A. was the founder of Christ Church, Canterbury (603), and the abbey of SS. Peter and Paul, now the site of St. A.'s Missionary College. His festival is celebrated on 26 May.

AUGUSTINIANS. Name applied to all religious communities which follow the Rule of St. Augustine of Hippo. It includes the Canons of St. Augustine, Augustinian Friars and Hermits, Premonstratensians, Gilbertines, and Trinitarians.

AUGUSTUS (63 B.C.—A.D. 14). First of the Roman emperors. Caius Julius Caesar Octavianus was the son of a senator who married a niece of Julius Caesar, and he became his great-uncle's adopted son and principal heir. Following Caesar's murder, Octavian (as he was styled) formed with Mark Antony and Lepidus the triumvirate which divided the Roman world between them, and proceeded to eliminate the opposition. Antony's victory in 42 over Brutus

and Cassius brought the Republic to an end. Soon after Antony became enamoured of Cleopatra and spent most of his time at Alexandria, while Octavian consolidated his hold on the western part of the Roman dominion. War was declared against Cleopatra, and the naval victory at Actium in 31 left Octavian in unchallenged supremacy, since Lepidus had been forced to retire.

After his return to Rome in 29 B.C., Octavian was created *princeps senatus*, and in 27 he was given the title of Augustus (venerable). He then resigned his extraordinary powers, and received from the Senate in return the proconsular command, which gave him control of the army, and the tribunician power, whereby he could initiate or veto legislation. In his programme of reforms A. received the support of 3 loyal and capable helpers, Agrippa, Maecenas, and his wife, Livia, while Virgil and Horace acted as the poets laureate of the new regime. A firm frontier for the empire was established: on the N., the friendly Batavians held the Rhine delta, and then the line followed the course of the Rhine and Danube; on the E., the Parthians were friendly, and the Euphrates gave the next line; on the S., Africa was protected by the desert, on the W. were Spain and Gaul. The provinces were governed either by imperial legates responsible to the *princeps*, or by proconsuls appointed by the Senate. The army was made a profession, with fixed pay and length of service, and a permanent fleet was established. Finally, Rome itself received an adequate water supply, a fire brigade, a police force, and a large number of public buildings.

The years after 12 B.C. were marked by private and public calamities; the marriage of A.'s daughter Julia to his stepson Tiberius proved disastrous, while a serious revolt occurred in Pannonia in A.D. 6, and in Germany 3 legions under Varus were annihilated in the Teutoburg Forest in A.D. 9. A. d. a broken man, but his work remained secure. He was an enlightened and generous patron of literature and the arts, and the period of his rule lives in history as the Augustan Age. Our illus. shows Augustus wearing the diadem of a Hellenistic king, which he would not have dared to wear in Rome.

AUK (awk). Family of diving birds (Alcidae) allied to the gulls, and generally included with them in the plover order (Charadriiformes). They are marine birds feeding upon fish, and are confined to the northern hemisphere. The largest of the family, the Great Auk (*Plautus impennis*), became extinct after 1844. It could not fly, but other A.s. use their wings for flying short distances, and as oars in the sea. The smallest is the Little A. (*Alle alle*), which is a winter visitor to Britain. Other members of the family are the razorbills, guillemots, and puffins.

AULD (awld) **LANG SYNE** (Scottish for 'old long since' or 'long ago'). Title of a song written by Robert Burns, c. 1789, and based on lines attributed to Sir Robert Aytoun; it is sung at the conclusion of social gatherings, and is set to an old Scottish air.

AULD REEKIE ('Old Smoky'). Scottish dialect name formerly applied to Edinburgh, on account of its smokiness and dirty streets.

AUNG SAN (1914-47). Burmese statesman. Imprisoned for his nationalist activities while a student in Rangoon, he escaped in 1940 to Japan, returned to lead the Burma Independence Army, which assisted the Japanese invasion of 1942, and

AUGUSTUS, a gem cameo

became Defence Minister in the puppet govt. set up. Before long, however, he secretly contacted the resistance movement, and from March 1945 openly co-operated with the British in the expulsion of the Japanese. As leader of the Anti-Fascist People's Freedom League he became Vice-President of the Executive Council in Sept. 1946, and was assassinated by political opponents in July 1947.

AURANGZEB or *Aurungzebe* (1618–1707). Mogul emperor of Hindustan. 3rd son of Shah Jahan, he made himself master of the court by a palace revolution, and ruled as emperor from 1658. His reign was the most brilliant period of the Mogul dynasty, but A.'s despotic tendencies and Mohammedan fanaticism aroused much opposition. His latter years were spent in war with the princes of Rajputana and Mahrattas.

AURELIAN (c. 214–275). Roman emperor from 270; full name, Lucius Domitius Aurelianus. A successful soldier, he was chosen emperor by his troops on the death of Claudius II. He defeated the Goths and Vandals, defeated and captured Zenobia of Palmyra, and was planning a campaign against Parthia when he was murdered. The *A. Wall*, a fortification surrounding Rome, was built by A. in A.D. 271. It was made of concrete, and substantial ruins exist. The *A. Way* ran from Rome through Pisa and Genoa to Antipolis (Antibes) in Gaul.

AURELIUS (Antoninus), Marcus. Roman emperor. See **MARCUS AURELIUS**.

AURIC (ohrik'), Georges (1899–). French composer. He was one of the musical group known as *Les Six*, who were influenced by Erik Satie. A. composed a comic opera, several ballets, and incidental music.

AURICULA (awrik'ūla). Species of primrose (*Primula auricula*), well known as a garden flower. It is a native of the Alps, but has been grown in Eng. gardens for 3 centuries.

GREAT AUK

AURIGNACIAN (awrignā'shan). In archaeology, the name given to an Old Stone Age culture which came between the Mousterian and the Solutrian in the Upper Palaeolithic. It is derived from a cave at Aurignac in the Pyrenees. See **STONE AGE**.

AURIOL (ohriol'), Vincent (1884–1966). French Socialist statesman. In 1940 he was one of the 80 Socialist deputies who voted against according full powers to Pétain, and was imprisoned. He later took part in the resistance movement, and in 1943 joined

de Gaulle in Algiers. Min. of State from Nov. 1945, he acted as pres. of the 2 Constituent Assemblies of 1946. He was first pres. of the 4th Rep. 1947–53.

AUROCHS (aw'roks). The huge wild cattle (*Bos primigenius*) that formerly inhabited central Europe. It probably survived in the Polish forests up to the end of the 16th cent. It was between 7 and 8 ft. high, and black to reddish or grey in colour.

AURORA. Roman goddess of the dawn, corresponding to the Greek Eos. Daily before dawn she left her husband Tithonus and rose to heaven in a chariot to announce the coming of daylight.

AURORA. Celestial phenomenon known as the *Aurora Borealis* or Northern Lights in the northern hemisphere, and *A. Australis* in the southern. Usually it begins as a luminous arch having its apex in the direction of the magnetic pole, and it assumes the shape of arcs, bands, rays, curtains and coronas, varying in colour from smoky black to flaming red.

It has been suggested that As. are caused by electrified particles emitted by the sun. Certainly there is a close correlation between As. and sunspots.

AUSCULTATION (awskooltā'shon). Listening to sounds inside the body. It is used in the medical examination of the heart, lungs, bowels, arteries, joints, liver, spleen, thyroid gland, and the state of the child within the womb. It was introduced by the French physician Laënnec, who in 1819 invented the stethoscope, originally a trumpet-shaped wooden tube.

AUSGLEICH (ows'glikh; Ger., settlement, agreement, compromise). Name given to the compromise between Austria and Hungary of 8 Feb. 1867, which established the Austro-Hungarian Dual Monarchy, under Habsburg rule. It endured until the collapse of Austria-Hungary in 1918.

AUSSIE (awz'y). Colloquial name for Australian troops, particularly those of the F.W.W., 1914–18.

AUSTEN (aw'sten), Jane (1775–1817). British novelist. B. at Steventon, Hants, where her father was rector, she began writing early, the burlesque *Love and Freindship* (pub. 1922) belonging to 1790. In 1801 the family moved to Bath, and after the death of her father in 1805, to Southampton, finally settling in Chawton, with her brother, Edward.

During 1795 to 1798 she worked on 3 novels. The first to be pub. (like its successors, anonymously), was *Sense and Sensibility* (1811: drafted in letter form c. 1797). *Pride and Prejudice* (1813) followed, but *Northanger Abbey*, a skit on the contemporary Gothic novel (sold to a London publisher in 1803 and bought back in 1816), did not appear till 1818. The fragmentary *Watsons* and *Lady Susan* (written c. 1803–5) remained unfinished.

JANE AUSTEN *Portrait by her sister Cassandra c. 1810.*

The success of her pub. works, however, stimulated J.A. to write in rapid succession *Mansfield Park* (1814), *Emma* (1816), *Persuasion* (1818), and the final fragment *Sanditon* (wr. 1817). She d. at Winchester, and is buried in the cathedral. Although she never went beyond the world of middle-class provincial life, she attains perfection within her range. She shows the utmost delicacy, naturalness, and ironical humour in her character-drawing, and from the outset her style was remarkably mature.

AUSTERLITZ (ow'sterlits). Small town in Czechoslovakia, formerly in Austria, 12 m. E. of Brno, where on 2 Dec. 1805 Napoleon defeated Alexander I of Russia and Francis II of Austria. Its Czech name is Slavkov.

AUSTIN (aw'stin), Alfred (1835–1913). British poet. He made his name with the satirical poem *The Season* (1861), which was followed by mediocre plays and vols. of poetry; from 1896 he was Poet Laureate.

AUSTIN, Herbert, 1st baron (1866–1941). British pioneer motor-car manufacturer. B. at Little Missenden, he went to Australia and was a works manager in Melbourne. Returning to England, he began manufacturing cars in 1905 at Northfield, Birmingham, notably the 'A. Seven' in 1921. From 1919 to 1924 A. was a Birmingham M.P.; in 1924 he was knighted, and in 1936 made a peer. The Austin Motor Co. Ltd. was in 1952 merged in the British Motor Corporation Ltd., itself merged in 1966 in British Motor Holdings Ltd.

AUSTIN, John (1790–1859). British jurist. Son of an Ipswich flour-miller, he was prof. of jurisprudence

at Univ. Coll., London, 1826-32. In his writings he attempted to give precise definitions of sovereignty, liberty, etc., and by his lectures he greatly influenced many thinkers, including J. S. Mill. His wife, Sarah Taylor (1793-1867), wrote on educational and feminist subjects.

AUSTRAL, Florence (1894-1968). Australian singer. B. in Melbourne, she studied both there and in London, and developed as a soprano of remarkable quality. She excelled in Wagnerian roles.

AUSTRALASIA. Geographical term covering the Commonwealth of Australia, the Dominion of New Zealand, and the Pacific islands dependent on them.

AUSTRALIA. Island continent in the southern hemisphere lying between the Pacific and Indian Oceans, with the Timor and Arafura seas to the N. Off the S.E. coast, separated by Bass Strait, is the island of Tasmania, part of the Commonwealth of Australia. The total area is 2,974,581 sq. m., more than $\frac{1}{3}$ of which lies within the tropics.

GEOGRAPHY. A. may be divided into 5 regions: (1) the narrow E. coastal plain, on which many of the large towns are situated; (2) the Western plateau, mainly semi-desert; (3) the central plains with good cattle and sheep country in the N. relying to a large extent on underground water supplies, and the wheat and cattle lands of the Murray basin in the S.; (4) the eastern highlands, with their mountains rising to 7,328 ft. in Kosciusko; (5) the tropical N.E. coast, protected by the Great Barrier reef, 1,200 m. long, where sugar and cotton are grown.

The northern part of A. has a true tropical climate, with a monsoonal rainfall in summer (Nov.-April) and continually high temperatures. The S.E. coastal area receives rain all the year round, and has hot summers and warm winters on the coastal plain grading to a cool mountain climate at higher altitudes. The E. mountain slopes are forested, but the W., receiving less rain, form large expanses of open grassland or scrub, which gives way to semi-desert and desert conditions in the heart of the continent. The extreme S.E. and S.W. of A. have a winter rainfall, and a climate and vegetation closely resembling those of the European Mediterranean region. In the whole continent there is only one important river system, the Murray, with its tributaries.

POPULATION. The Pop. of Australia was 12,000,000 (incl. full-blooded Aborigines) as est. in 1968, of whom a great majority were of British stock. Some modification of the 'white Australia' policy has been envisaged, in order to people parts of the continent

not suited to white immigrants. The Australian Aborigines, numbering perhaps 150,000 when white settlement began, probably do not exceed 30,000 in number. More than half continue to follow the life of nomadic Stone Age hunters; their ingenuity in inventing the boomerang and, indeed, in surviving at all in the land they inhabit, demonstrates that their primitive condition is due to habitat and isolation, not stupidity. Some are employed to care for sheep and cattle in the Northern Territory where most of them live, under Federal protection; those in the States are under State protection.

ECONOMIC DEVELOPMENT. The first successful farming venture in A. was sheep rearing, which today remains the key industry. Large numbers are reared in New South Wales, Victoria, and Queensland, while in the great areas of E. central A., where artesian water is available, cattle are reared. The leading crop is wheat, grown in the Murray basin, whilst almost every known fruit can be grown somewhere within the Commonwealth. W. Australia and Queensland produce fine timbers, among them the durable karri and jarrah pines from W.A. Many types of wine are made, which, by reason of distance, are not yet widely known on the world market. Large areas of land have been brought under cultivation by extensive irrigation systems in the Murray basin; the Snowy river project, started in 1955, expected to take 25 yrs. to complete, and involving diversion of the river into the Murrumbidgee, was undertaken to provide both water and power in Victoria and New South Wales.

A. is rich, espec. in W. Australia where there were remarkable discoveries in the 1960s, in minerals: gold, silver, uranium, iron, lead, zinc, nickel, copper, coal (not of high quality), oil, and natural gas. Industrial development, stimulated by the S.W.W., gains momentum and incl. shipbuilding, textiles, chemicals, machine tools, and aircraft manufacture.

TOWNS AND COMMUNICATIONS. Federal capital of A. is Canberra. The large industrial and commercial towns are mainly situated round the coast, a number of them possessing fine harbours, e.g. Sydney, Melbourne, Adelaide, Fremantle (port for Perth), Darwin, Townsville, Rockhampton, and Brisbane. Inland towns include the mining settlements of Kalgoorlie, Boulder, and Broken Hill, Bendigo, Ballarat, and Mildura. The main cities are linked by rail, but owing to individual state development 3 different gauges are in operation; an act of 1946 authorized standardization of gauges in Victoria and S. Australia. Internal air services are well developed, more than 40,000,000 miles being flown in 1958-9 by some 2,250,000 passengers; A. is also linked by sea and air with all the chief countries of the world.

ADMINISTRATION. The Federal legislature consists of the sovereign, represented by a Gov.-General, the Senate and the House of Representatives. All States have equal representation in the Senate, but proportional representation is adopted in the elected Lower House. Each State (except Queensland, which abolished the upper house in 1922) has a Governor and Parliament of 2 Houses. The A. Capital Territory (911 sq. m.) was acquired by the Federal Govt. in 1911, 28 sq. m. at Jervis Bay being added in 1915. The seat of Federal Govt. was formally transferred to Canberra, A. Capital Territory, in 1927.

The N. Territory is admin. by the Federal Govt. with an administrator at Darwin, its cap. Dependencies incl. A. Antarctic Territory (2,472,000 sq. m.), Papua (S.E. New Guinea), and the U.N. Trusteeship terms. of N.E. New Guinea and (until 1968) Nauru Is.

History. The first voy. to A. were those of the Dutch; in 1606 a Dutch yacht sailed into the Gulf of Carpentaria. Dirk Hartog, Nuyts, and Pelsaert followed, then Tasman, discoverer of Tasmania (Van Diemen's Land) in 1642. William Dampier was the first Englishman to visit A. in 1688 and 1697. James

Cook anchored in Botany Bay in 1770, and in the early years of the 19th cent. the coastline was charted by Bass, Murray, Grant, and Flinders. A. was first used as a convict settlement by Britain in 1788. Penetration into the interior began under Blaxland, Hume, Hovell, Sturt, Mitchell, Eyre, and others. The gold rush of 1857–60 brought many new settlers. New S. Wales was the earliest established colony, followed by Tasmania (1825), W. Australia (1829), S. Australia (1836), Victoria (1851), and Queensland (1859). The Commonwealth came into existence in 1901. During the 2 W.Ws. Australians fought in all the services on many fronts, earning great distinction in all fields.

THE ARTS. A. painting began in the 18th cent. with the miniatures of John Webber (1752–93), and the drawings and water-colours of Thomas Watling and Thomas Wainwright (1794–1847), both convicts. Conrad Martens, who reached A. in the 1830s, was its 1st landscape painter; S. T. Gill made sketches of life in the goldfields of Victoria; Louis Buvelot (1814–88), a Swiss, represented the A. scene with an objective eye. Tom Roberts (q.v.), Arthur Streeton (1867–1943), Julian Ashton (1851–1942) are others who became known outside their native country. 20th cent. artists include Sir William Dobell, Russell Drysdale, Sidney Nolan (qq.v.), and the aboriginal Albert Namatjira. Phil May (1864–1903) and Will Dyson (1883–1938) were famous cartoonists.

Australian literature begins with the letters, journals, and memoirs of early settlers and explorers. First native poet of note was Charles Harpur (1813–68), and idiom and rhythms typical of the country were developed among others by Henry Kendall (1841–82), Adam Lindsay Gordon (q.v.), and Andrew Barton (Banjo) Paterson (1864–1941). More recent poets incl. Christopher Brennan and Judith Wright (qq.v.). Among Australian novelists are

Marcus Clarke, Rolfe Boldrewood, and Henry Handel Richardson (qq.v.). Striking a richly harsh vein in contemporary themes are the dramatist Ray Lawler and novelist-playwright Patrick White (qq.v.).

Distinguished Australians in other fields incl. Melba, Florence Austral, Peter Dawson, Joan Hammond, Percy Grainger, Robert Helpmann, and Judith Anderson (qq.v.).

AUSTRALIA DAY. National commemoration, in Australia, of the foundation of the original British colony in that continent; the date is the anniversary of the arrival of Capt. Phillip in Sydney on 26 Jan. 1788. The day is a public holiday.

AUSTRALIAN COMMONWEALTH. See AUSTRALIA.

AUSTRALIAN CAPITAL TERRITORY. An area, vested in the Australian Commonwealth since 1911, forming the site of the Federal Capital of Canberra. First settled in 1824, it was purely pastoral until its selection as the seat of govt. Its original area was 911 sq. m., to which was added in 1915 28 sq. m. at Jervis Bay, on the N.S.W. coast S. of Sydney, to serve as a port. Pop. (1967) 102,258.

AUSTRIA. Country of Central Europe. It has an area of 32,375 sq. m., and is divided into 9 provs., each with an elected assembly. The head of state is a pres. (popularly elected), and there is an elected National Assembly of 165 Deputies. Pop. (1966) 7,290,500. The language is German, and about 90 per cent of the people are R.C.

GEOGRAPHY. A. comprises 2 geographical regions: the Alpine zone in the S.W. and the Danube lowlands, incl. the Vienna plain. The Austrian Alps are lower and less impenetrable than the Swiss A., being broken by long, wide valleys. Passes include the Brenner, Arlberg, Semmering, and Schober. Stretching towards the Danube is a broad plain; N. of the river the land rises again towards the Bohemian Forest and Moravian heights in Czechoslovakia. The Vienna plain is a triangular lowland between the Alps and the Carpathians, with fertile alluvial soil.

Much of the formerly extensive Alpine forests have been cleared; above the forest belt lie summer pastures where cattle and goats graze from spring to Sept. Agriculture is general, and A. attracts both summer tourists and winter sports enthusiasts. There is little coal; hydro-electricity is a main source of power. Large iron ore deposits occur in Styria; petroleum and graphite are important. Industries, for the most part state-owned, include metallurgical and engineering works, factories making textiles, chemicals, paper, leather goods, and preparing food products; musical instruments also are made.

AUSTRALIAN ART. The reputation of Australian art abroad owes much to the work of Sidney Nolan. 'Pretty Polly Mine' belongs to the mining series which was among the products of his first Australian phase. Photo: Alan McCull.

AUSTRIA. Designed by Fischer von Erlach to rival Versailles, the palace of Schönbrunn at Vienna has associations with Maria Theresa and Napoleon and Marie Louise, whose son was to die there. The main façade, seen from the Neptune Fountain, was completed in 1750.

Courtesy of Austrian State Tourist Department.

TOWNS AND COMMUNICATIONS. Vienna is the cap. and the main route centre. Industrial towns incl. Graz, Wiener-Neustadt, Steyr, Klagenfurt, and Linz. Innsbruck and Salzburg are cultural centres. The Danube is an international route; the head of navigation for large vessels is Linz.

History. A. was inhabited in prehistoric times by Celtic tribes; the country S. of the Danube was conquered by the Romans in 14 B.C., and incorporated in the Roman Empire. After the fall of the empire in the 5th cent. the country now A. was occupied by Vandals, Goths, Huns, Lombards, and Avars. Having conquered the Avars in 791, Charlemagne estab. the East Mark, nucleus of the Austrian empire. In 973 Otto II granted the Mark to the house of Babenberg, who ruled until 1246. Rudolf of Habsburg, who became King of the Romans and Holy Roman Emperor in 1273, seized A. and invested his son as duke in 1282. Until the Empire ceased to exist in 1806 most of the dukes (from 1453 archdukes) of A. were elected Holy Roman Emperor.

A., which in 1526 acquired control of Bohemia, was throughout the 16th cent. a bulwark of resistance against the Turks, who besieged Vienna in vain in 1529. The Thirty Years' War (1618-48) did not touch A., but it weakened its rulers. A 2nd Turkish siege of Vienna was frustrated in 1683, and by 1697 Hungary was liberated from the Turks and incorporated in the Austrian dominion. As a result of their struggle with Louis XIV the Habsburgs in 1713 secured the Spanish Netherlands and Milan. When Charles VI, last male Habsburg in the direct line, d. in 1740, his dau. Maria Theresa became Archduchess of A. and Queen of Hungary, but the Elector of Bavaria was elected emperor as Charles VII. Frederick II of Prussia seized Silesia, and the War of the Austrian Succession (1740-8) followed. Charles VII died in 1745, and Maria Theresa secured the election of her husband as Francis I; but she did not recover Silesia from Frederick.

The Archduke Francis who succeeded in 1792 was also elected Emperor as Francis II; sometimes opposing, sometimes allied with Napoleon, in 1804 he proclaimed himself Emperor of Austria as Francis I, and in 1806 even the name Holy Roman Empire disappeared from history. Under the Treaty of Vienna (1815) Francis failed to recover the Austrian Netherlands (annexed by France in 1797), but received Lombardy and Venetia.

In 1848 the mixed nationalities within the Austrian Empire flared into rebellion, soon crushed. As a result of the Seven Weeks' War of 1866 with Prussia, A.

lost Venetia to Italy. In the next year Francis Joseph estab. the Dual Monarchy of Austria-Hungary. The Treaty of Berlin (1878) gave A. the administration of Bosnia-Herzegovina in the Balkans, though they remained nominally Turkish until A. annexed them in 1908. The F.W.W. began with an Austrian attack on Serbia. Austria-Hungary collapsed in 1918, and A. was reduced to Vienna and its immediately surrounding provs. A republic was proclaimed; it had a precarious existence, and internal tensions gave Hitler the opportunity in 1938 of incorporating A. in Germany. A. recovered rapidly economically after the Allied liberation in 1945, although occupied by them until regaining sovereignty under the 1955 peace treaty. The conservative People's Party was in coalition with the Socialists 1945-66, when it gained a small overall majority.

AUSTRIA-HUNGARY. Name given to the 'Dual Monarchy' estab. by Francis Joseph in 1867 between his Empire of Austria and his Kingdom of Hungary. In 1910 it had an area of 261,239 sq. m. with a pop. of 51 million. It collapsed in the autumn of 1918. There were only 2 king-emperors: Francis Joseph, 1867-1916, and Charles, 1916-18.

AUSTRIAN SUCCESSION. Name given to a war fought 1740-8 between Austria, supported by England and Holland, and Prussia, supported by France. It began when a number of the Austrian archdukes refused the succession of Maria Theresa, dau. of the Emperor Charles VI, when the latter d. in 1740. Frederick the Great of Prussia seized Silesia from the Austrians. At Dettingen in 1743 an army of British, Austrians, and Hanoverians under the command of George II—the last action in which an English sovereign was personally engaged—was victorious over the French, but at Fontenoy in 1745 an Austro-English army was defeated. British naval superiority was confirmed, and there were gains in America and India. The war was ended by the Treaty of Aix-la-Chapelle in 1748.

AUTARKY (Gk. *autos*, self; *arkein*, suffice). Self-sufficiency, especially in the economic sphere; the term came into vogue at the time of the economic crisis of 1931, when a number of countries tried to insulate themselves from the world depression by concentrating on the development of their own resources and furthering their own economic policies, largely regardless of their effects on international relationships. It is distinct from **AUTARCHY** (Gk. *autos* and *archos*, rule) which means political self rule, absolute sovereignty, or despotism.

AUTOBIOGRAPHY. An account of a man's life, written by himself, and distinguished from the journal or diary by being a connected narrative, and from memoirs by dealing less with contemporary events and personalities. A secondary division of A. is the confession, which is concerned with the inner spiritual life, e.g. the Confessions of St. Augustine, Margery Kempe, St. Theresa of Avila, Bunyan (*Grace Abounding*), the German physician and pietist Heinrich Jung (Stilling), and Cardinal Newman.

Classical Greek and Roman literature furnishes no notable example of A., nor did the Middle Ages encourage the expression of individual personality; an exception is Abelard's *Historia calamitatum*. With the Renaissance As. began to be written in ever-increasing quantity. Among the best-known of the 16th to 18th cents. are those of Benvenuto Cellini, Lord Herbert of Cherbury, Colley Cibber, Gibbon, Casanova, Alfieri, and Benjamin Franklin. Rousseau's *Confessions* at the close of the 18th cent. set a new vogue by their stress on psychological and emotional development, and influenced Wordsworth's *Prelude*, Byron's *Childe Harold*, De Quincey's *Confessions of an Opium Eater*, and Goethe's *Dichtung und Wahrheit*. Among other 19th cent. autobiographical writers are Leigh Hunt, B. Haydon, Richard Wagner, Berlioz, Rimsky-Korsakov, Bismarck, Béranger, George Sand, the elder Dumas, A. de Musset, A. Daudet, Tolstoy, Brandes, J. S. Mill, H. Martineau, Herbert Spencer, Mark Rutherford, and A. Trollope.

In the 20th cent. important political As. are those of Hitler (*Mein Kampf*), Mussolini, Lloyd George, W. Churchill, and Mahatma Gandhi. Leading figures in arts and literature who have written As. incl. J. Epstein, Salvador Dali, Theodore Dreiser, H. G. Wells, Sir T. Beecham, and W. B. Yeats.

AUTO-DA-FÉ (ow'to-dah-fä). Port. for 'act of faith': term for the ceremony, incl. a procession, solemn mass, and sermon, accompanying the sentencing of alleged heretics by the Inquisition. Those found guilty were at once handed over to the secular authorities for punishment, usually burning.

AUTOLYCUS (awto'likus). In Greek mythology, an accomplished thief and trickster, son of the god Hermes, who gave him the power of invisibility.

AUTOMATION. The addition of control devices, using electronic sensing and computing techniques which follow the pattern of human nervous and brain functions, to already mechanized physical processes of production and distribution. Fields in which A. has already had a marked impact incl. steel processing, mining, shipbuilding, chemical production, and road, rail, and air control. See CYBERNETICS.

AUTO'MATION. A mechanical figure that imitates the performance of

humans, animals, birds, etc. Such objects have been fashioned throughout history, the earliest recorded one being a wooden pigeon of 400 B.C. In literature the A. has played a part, particularly in the Mary Shelley romance *Frankenstein*, while the Czech writer Karel Capek, in his play *R.U.R.*, popularized the Slav term 'robot'. The charm of the A. has been exploited in ballet, notably in *Coppélia* and *La Boutique Fantasque*.

AUTO-SUGGESTION, or *Self-suggestion*. The acceptance of an idea, which originated in the mind of the believer himself, in such a way that it comes to be believed with firm conviction in spite of the absence of adequate rational proof. The belief so accepted may be either true or false, and either beneficial or harmful. The use of A.-S. in the healing of disease is recommended in Émile Coué's *Self-Mastery by Conscious Auto-suggestion* (1924). His method incl. the repetition of the formula 'Every day, in every way, I am getting better and better'. The use of A.-S. for the conquest of nervous habits is a development of modern psychotherapy.

AUTUN (ōtān'). City in Saône-et-Loire dept., France, 28 m. N.W. of Châlon-sur-Saône, overlooking the Arroux. It has Roman remains and a 12th and 15th cent. cathedral. Pop. (1962) 17,165.

AUVERGNE (ōvār'ny). Ancient prov. of central France, now forming the depts. of Puy-de-Dôme, Cantal, and part of Haute-Loire. It is a mountainous region, lying in the centre of the Central Plateau, composed chiefly of volcanic rocks in several masses, called collectively the A. mountains.

AUXERRE (ōsār'). Cap. of Yonne dept., France, 88 m. S.E. of Paris, beside the r. Yonne. It makes metal goods, cloth, and colours, and the vicinity produces good wine. The Gothic cathedral was begun in 1215. Pop. (1962) 32,961.

AVA (ah'vah). Ancient cap. of Burma, on the Irrawaddy; 30 kings reigned here from 1364 to 1783.

A'VALON. In Celtic mythology, the island of the blest or paradise, and in the Arthurian legend the land of heroes, to which the dead king was conveyed. It has been associated with Glastonbury.

AVATAR (avatahr'; Sanskrit, descent). In Hindu mythology, the descent of a deity to earth in a visible form. Most famous are the 10 As. of Vishnu.

AVEBURY, John Lubbock, 1st baron A. (1834-1913). British banker. A partner in the family firm from 1856, he was a Liberal (from 1886 Liberal Unionist) M.P. 1870-1900, and was largely responsible for the Bank Holidays Act, 1871. An original worker in archaeology and physical anthropology, he wrote many popular scientific books.

AVEBURY. Name of the largest stone circle in Europe, and probably in the world, upon which has been built the village of the same name in Wilts. 6 m. W. of Marlborough. The circle has a diameter of 450 yards, but many of the huge stones (from 5 to 20 f. above ground) have been removed to serve as building material.

AVE MARIA (ah'vā' mahré'ah). Lat. 'hail. Mary'; traditionally, the salutation of the Virgin Mary by the archangel Gabriel (Luke i, 28), when he announced to her that she would be the mother of the Messiah. These words have been set to music by many composers.

AVERNUS. Small circular lake in Italy near Naples and Cumae, which the ancients believed was the entrance to the lower world.

AVERROES (averō'ez) (1126-98). Arabian philosopher: in Arabic, Ibn Roshd. B. at Córdoba in Spain, he became judge of Seville and of Córdoba, but was accused of heresy and banished (1195). Later he was recalled, and d. at Marrakesh. His philosophical writings, incl. the important commentaries on Aristotle, became known to the West through Latin translations, and exercised a great influence on Christian thinkers. 'Averroism' was taught at Paris and

AUTOMATION. By a system of modular (Lat. modulari 'to adjust') units an industrial control system can be devised to fit special needs and gradually developed to make decisions at increasingly advanced levels. Such a system is ARCH (so-named from Articulated Computing Hierarchy) and here a module, or unit, is being replaced in its cabinet. A simple example of its possible use is the determination of how steel billets should best be cut to specified lengths to avoid wastage: the system computes the correct cutting procedure and may also operate the shears in the billet mill automatically. The data may then also be transmitted to units operating at a higher level in accounting and stock control.

Courtesy of Elliott-Automation Limited.

elsewhere by the 'Averroists', who distinguished philosophical truth from revealed religion.

AVEYRON. Dept. of FRANCE.

AVICENNA (979-1037). Arabian philosopher and physician; in Arabic, Ibn Sina. B. near Bokhara, he made a profound study of the Koran, philosophy, and the science of his day, and won a high reputation as physician. He d. at Hamadan, where he had been vizier. His *Canon Medicinæ* was a standard work for centuries. His philosophical writings were influenced by Al-Farabi and by Aristotle and the Neoplatonists, and influenced the Schoolmen of the 13th cent.

AVIGNON (ahvënyon'). French city in Provence, cap. of Vaucluse dept., on the Rhône 52 m. N.W. of Marseilles. An important Gallic and Roman city, it has its 14th cent. walls, the famous half-bridge, a 13th cent. cathedral, and the palace built 1334-42 during the residence here of the Popes. A. was papal property 1348-1791. Pop. (1962) 75,181.

Villeneuve-les-Avignon, virtually a suburb, lies across the Rhône in Gard dept. Pop. (1962) 6,834.

AVILA (ah'vêlah). Spanish town, cap. of prov. of the same name, 56 m. N.W. of Madrid. It has remains of the Moorish castle, a Gothic cathedral, and the convent and church of Sta. Teresa of Avila, who was b. here. Pop. (1960) 24,000.

AVOCADO (avokah'dō). Tree of the laurel family (*Persea americana*) growing to 60 ft. and bearing a fruit (eaten in salads) varying from a few oz. to several pounds in weight, native to Mexico and S. America.

AVOCET (a'voset). Wading-bird (*Recurvirostra avosetta*), belonging to the plover and snipe order (Charadriiformes). It is distinguished by its black and white plumage, long legs, partially webbed feet, and by its upward-curved bill.

AVOGADRO (ahvōgah'drō), Amedeo, Conte di Quaregna (1776-1856). Italian physicist. B. at Turin, he became in 1821 prof. of higher physics in the univ. there. In 1811 he pub. a memoir on what has since been known as 'Avogadro's Law' (equal volumes of gases at the same pressure and temperature contain the same number of molecules).

AVON, Anthony Eden, 1st earl of A. (1897-). British Cons. statesman. Entering parliament in 1923 as M.P. for Warwick and Leamington, he became Lord Privy Seal in 1934, and in 1935 Min. for League of Nations Affairs. In 1935 he succeeded Sir Samuel Hoare as For. Sec., but in Feb. 1938 resigned as a protest against Chamberlain's decision to open conversations with Mussolini. He became Dominions Sec. in 1939, and was again For. Sec. 1940-5, taking part in all the great conferences of the S.W.W. Deputy leader of the Opposition 1945-51, he once more returned to the Foreign Office, also becoming Deputy P.M., in 1951. He was created K.G. in 1954 following his diplomatic triumphs in achieving peace in Indo-China at the Geneva Conference and the rapprochement of France and Germany within Western European Union at the London Conference. In 1952 he had m. Clarissa Churchill, niece of Sir Winston Churchill and, on the latter's resignation in April 1955, he succeeded him as P.M. He was confirmed in office at the May general election, but resigned shortly after the Suez crisis and received an earldom in 1960.

AVON. Celtic word for 'river', name of several rivers in England and Scotland. The chief are: The Upper, or Warwickshire, A., rising in the Northampton uplands near Naseby, joins the Severn at Tewkesbury; length, 96 m. The Lower, or Bristol, A., 75 m. long, rises in the Cotswolds, and flows into the Bristol Channel at Avonmouth. The East, or Salisbury, A. rises S. of the Marlborough Downs, and flows into the English Channel at Christchurch, length, 65 m.

AVONMOUTH. Town in Gloucestershire, England, at the mouth of the Avon, forming part of

AXHOLME. An aerial view of the Isle of Axholme shows strikingly the surviving pattern of medieval strip farming which ensured that each man had a share in good as well as poorer land.
Crown Copyright.

city of Bristol, of which it is the port. It has extensive docks.

AWE (aw). Longest (23 m.) of the Scottish freshwater lochs, in Argyllshire, S.E. of Oban. It is fed by a number of streams, and drained by the river Awe into Loch Etive. Hydro-electric installations based on Loch A. and costing £24,500,000, went into production in 1963.

AXHOLME, ISLE OF. Area of 5,000 fertile acres in Lincolnshire, bounded by the Trent, Don, Idle, and Tame rivers, where 'medieval type' open field strip farming is still practised. The largest village, Epworth, is the birthplace of John Wesley.

AXIS. Name given to the union of Nazi Germany and Fascist Italy before and during the S.W.W. The Rome-Berlin Axis was formed in 1936, when Italy was being threatened with 'sanctions' because of her invasion of Abyssinia, and became a full military and political alliance in May 1939. A 10-year alliance between Germany, Italy and Japan (Rome-Berlin-Tokyo A.) was signed in Sept. 1940, and was subsequently joined by Hungary, Bulgaria, Rumania, and the puppet states of Slovakia and Croatia. The A. collapsed with the fall of Mussolini and the surrender of Italy in 1943.

AXMINSTER. Town in Devon, England, on the Axe, 24 m. E.N.E. of Exeter. The factory making Axminster carpets (which continue to be so-called) was moved to Wilton in 1835. Pop. c. 3,000.

AXOLOTL. Larval form of *Amblystoma tigrinum*, a species of salamander inhabiting Mexico and the U.S.A. This larva is aquatic, and grows to a length of a foot, resembling a gigantic tadpole, and may reach

AXOLOTL. The tadpole-like salamander of America.

sexual maturity and lay eggs, without attaining to the salamander form.

AXUM. Alternative transliteration of AKSUM.

AYALA Y HERRERA (arrá'rah), Adelardo Lopez de (1828–79). Spanish dramatist, poet and politician, b. at Guadalcanal. Of his plays, *Rioja* (1854) is his masterpiece. Among his lyrical works the *Epístola* ranks first.

AYE-AYE.

AYE-AYE (i-i). A lemur (*Daubentonia* or *Chiromys madagascariensis*) from Madagascar, the sole representative of a special family, distinguished by having its front teeth adapted for gnawing like those of the Rodentia. It is about the size of a cat.

AYESHA (ah'yeshah) (c. 611–c. 678).

Favourite wife of Mohammed, whom she m. when she was 9. Her father, Abu-Bekr, through her influence became Caliph on the Prophet's death in 632.

AYLESBURY (älz'beri). Co. town (bor.) of Bucks, England, 39 m. N.W. of London in the Vale of A. There are printing, light engineering and dairy industries. Nearby is Waddesdon Manor, a mansion

in the French Renaissance style bequeathed to the nation in 1957 by James de Rothschild (q.v.). It contains art treasures collected by the family which rival those of the Wallace Collection in magnificence. Pop. (1961) 27,891.

AYLWARD, Gladys (c. 1910–). British missionary, naturalized Chinese and known as Ai-weh-deh 'the virtuous one'. Originally a parlour maid, she went to China in 1930 by a very dangerous route and during the Sino-Japanese war spied for the Nationalists until, with a price on her head, she led 100 children across the mtns. to Thailand in 1940. She continued her work in Formosa.

AYR (är). Co. town (royal burgh) of Ayrshire, Scotland, at the mouth of the r. Ayr. The 'Auld Brig' was built in the 15th cent., the 'New Brig' in 1788 (rebuilt 1879). A. has associations with Robert Burns. Pop. (1961) 45,297.

AYRSHIRE. County of S.W. Scotland, with a 70 m. coastline on the Firth of Clyde. The principal hills are in the S. and S.E., the rivers are short and unnavigable. Loch Doon is 5 m. long. The climate is mild, and suited to dairying. The A. breed of cattle originated here. The A. coalfield is one of Scotland's largest, and deposits of ironstone have given rise to iron and steel industries. At Prestwick is an important airport.

Ayr is the co. town; other towns are Ardrossan, Kilmarnock, Saltcoats, and Troon. Area 1,134 sq. m.; pop. (1961) 342,855.

AYRTON (är'ton), Hertha (1854–1923). British scientist and inventor. B. at Portsea, née Marks, she was ed. at Girton Coll., Cam. bridge, and in 1885 m. Prof. W. E. Ayerton (1847–1908). She wrote *The Electric Arc* (1902), and invented the A. anti-gas fan, used in the trenches in France in 1916.

AYRTON, Michael (1921–). British artist. B. in London, he studied both there and in Paris, and has varied gifts as a sculptor, painter, theatre designer and book illustrator. Particularly notable are his designs for the revival of Purcell's *Fairy Queen* at Covent Garden (1946 and 1951) and his pictures and bronzes on the theme of Icarus (1962).

AYTOUN (ä'ten), Sir Robert (1570–1638). Scottish poet, one of the first of Scots to write in graceful English. His love poems are his best work. James I knighted him, and gave him employment.

AYTOUN (ä'toon), William Edmonstoune (1813–65). Scottish poet, b. in Edinburgh, chiefly remembered for his *Lays of the Scottish Cavaliers* (1848), and for the *Bon Gaultier Ballads* (1855), which he wrote in collaboration with Sir T. Martin.

AYURVEDA (ah'yurvēda). Ancient Hindu system of medicine, the main principles of which are derived from the Vedas. In India there are numerous Ayurvedic hospitals, dispensaries, etc.

AZAD (az'ahd), Abdul Kalam (1888–1958). Indian Congress politician. B. at Mecca and ed. at the El-Azhar Univ. in Cairo, he became prominent in Calcutta in the civil disobedience movement, founded and ed. nationalist papers, was interned and imprisoned several times, and was pres. of the Indian National Congress. He was Min. of Education 1947–58.

AZALEA. Group of plants of the order Ericaceae, closely related to Rhododendron, in which genus they are now generally incl. There are several species, natives of Asia and N. America, and from these many cultivated varieties have been derived which make fine ornamental shrubs—particularly the Japanese As. Several species are highly poisonous.

AZANA (athah'nyah), Manuel (1881–1940). Spanish statesman. Originally a civil servant, he made his reputation as a man of letters. He opposed Primo de Rivera and on the proclamation of the republic in April 1931 became War Minister. He succeeded Zamora as premier in Oct., and in 1936 he was elected Pres. of the republic. After Franco's triumph he withdrew to France.

AZARĪ'AH, Vedanayakam Samuel (1874–1945). Indian Christian divine. Son of an Indian clergyman of the C.M.S., he was ordained in 1909 and in 1912 was appointed bishop of Dornakal, the 1st Indian to become a bishop of the Anglican Church in India.

AZERBAIJAN (ahzerbijahn'). Constituent S.S.R. of U.S.S.R. in the S.E. of Europe on the S.W. shore of the Caspian Sea. Area 33,100 sq. m. It is heavily forested and has large mineral deposits, particularly petroleum. Baku, the cap., is one of the chief centres of Soviet oil production. Artificial irrigation is used, chiefly for cotton production. Pop. (1967) 4,800,000.

Also 2 admin. provs. of N.W. Persia: eastern A. (cap. Tabriz) and western A. (cap. Rezayeh).

AZHAR (azahr'), El. Moslem mosque and univ. at Cairo. Founded by Jawhar, C.-in-C. of the army of the Fatimid caliph, in 970, it is claimed to be the oldest univ. in the world. It became the centre of Islamic learning, with several subsidiary foundations, and is primarily a school of Koranic teaching.

AZILIAN. Name given to an archaeological period following the close of the Old Stone (Palaeolithic) Age, and regarded as one of the cultures of the Mesolithic Age. It was first recognized by Ed. Piette

at Mas d'Azil, a village in Ariège, France.

AZINCOURT. Alternative spelling of AGINCOURT.

AZORES (azorz'). Group of 9 islands in the N. Atlantic, belonging to Portugal, divided into 3 admin. districts. Area 922 sq. m. Of the pop. (1967) of 318,558, more than half live

MICHAEL AYRTON. This striking Interpretation in bronze of the Icarus legend stands 67 in. high. Photo: David Farrell.

Delgada (pop. 1,000). The islands are volcanic in origin, and have a genial climate. Known to the Carthaginians, they were rediscovered in the 14th cent. and annexed by the Portuguese c. 1430. Europe's most westerly land.

AZORES. The scenery of St. Michael's at once betrays the volcanic origin of these islands, further from the mainland than any other Atlantic group. The traditional costumes are particularly attractive. Courtesy of the Portuguese State Office.

they were used as an air base in the S.W.W. to protect Allied shipping, and a French missile-tracking station was estab. 1966 on Flores, the most westerly is.

AZORIN (athorin'). Pseudonym of José Martínez Ruiz (1873–1967). Spanish author. B. in Alicante prov. he studied law, but soon devoted himself to literature. His work was as influential as it is rich and varied in form and incl. vols. of critical essays and short stories, plays and novels, such as the autobiographical *La voluntad* (1902) and *Antonio Azorin* (1903) – the author adopted the name of the eponymous hero of the latter as his pseudonym.

A'ZOV. Inland sea of the U.S.S.R., forming a gulf in the N.E. of the Black Sea.

A'ZTECS. An American Indian race, predominant in Mexico at the time of the Spanish conquest in 1519. They belonged to the racial stock of Nahuatl; and coming from the north in A.D. 1325 they settled

on the marshy island of Tenochtitlan in the lake of Tezco, and on piles driven into the lake bed reared the city of Mexico-Tenochtitlan (the site of Mexico City). They adopted an agricultural basis of life, and in other ways adopted the civilization of the people whom they had politically supplanted, the Toltecs, who in turn had derived their culture from the Maya people of Guatemala.

Under Montezuma I, who reigned from 1440, the A. power was extended over the greater part of what is now central and southern Mexico. Their rule was so oppressive, however, that Montezuma II, who reigned from 1502, was able to put up only very slight resistance to Cortez and his Spanish men-at-arms when they landed at Vera Cruz in 1519. Montezuma was slain and Tenochtitlan was stormed.

The civilization of A. Mexico is chiefly exemplified by its architecture, the massive and substantial character of which is to be observed in the remains of its pyramid temples or Teocallis, immense piles which only slave labour on a huge scale could have raised. The palaces were on a similar gigantic scale, the roads excellent. The govt. was an elective monarchy. Metals were not yet in use for practical purposes, although gold, silver, and copper were used for ornament; tools and weapons were of stone, flint, or obsidian. The jeweller's art had reached a high degree of excellence. The system of writing was a mixture of the hieroglyphic and pictographic. The religion was picturesque but terrible, and there was a system of wholesale human sacrifice. The chief gods were Uitzilopochtli, the national or tribal deity; his brother, Tezcatlipoca, representative of drought; Tlaloc, the rain god; and Quetzalcoatl, the Toltec deity who became chief patron of A. civilization.

AZUELA (ahthoo-á'lah), Mariano (1873–1952). Mexican novelist and physician. His finest work, *Los de Abajo* (1915), was inspired by the 1910 revolution. In several novels A. portrayed Mexican low life in the cities. His later works reflected the contemporary political and social problems of his country, e.g. *El camarada Pantoja* and *La nueva burguesía*.

B Second letter of the alphabet. It corresponds to the Greek *beta* and the Semitic *beth*; and as written in the modern W. European alphabet is derived from the classical Latin.

BĀ'AL. Semitic word meaning 'lord' or 'owner', used as a divine title of their chief male gods by the Phoenicians, Canaanites, etc. Generally deities of fertility, their worship was often orgiastic and of a phallic character, and was strongly denounced by the Hebrew Prophets.

BAALBEK (bah'l'bek). City of ancient Syria, in modern Lebanon, 36 m. E.N.E. of Beirut. There are magnificent ruins of Baal temples. The Greeks identified Baal with Helios, the sun, and renamed B. Heliopolis.

BA'BBITT, Irving (1865–1933). American literary philosopher. B. at Dayton, Ohio, he became prof. of French literature at Harvard (1912). In his *Rousseau and Romanticism* he regarded the Romantic exaltation of the Ego as having led to a confusion of values in art and politics. He opposed to it his own doctrine of 'Humanism', which represents a reaction against 19th cent. ideas.

BĀ'BEL. Hebrew name for Babylon, chiefly associated with the Tower of B., which, in the Genesis story, was erected in the plain of Shinar by the descendants of Noah. The site has been identified with the temple or E-sagila in Babylon and the mound of Birs Nimrud (Borsippa) near the city.

BABEL, Isaak Emmanuilovich (1894–1939/40). Russian Jewish writer. B. in Odessa, he was an ardent supporter of the Revolution and fought with Budenny's cavalry in the Polish campaign of 1921–2, an experience which inspired *Konarmiya* (1926: *Red Cavalry*). Best known of his other works is *Odesskie rasskazy* (1924: *Stories from Odessa*), which brilliantly conveys the life of the Odessa Jews.

BAB-EL-MANDEB (bahb-el-mahn'deb). Strait separating Arabia and Africa, and joining the Red Sea and the Gulf of Aden.

BABER (bah'ber) or Babar ('Tiger'). Title given to Zahir ud-din Mohammed (1483–1530), first Great Mogul of India. He was the great-grandson of Tamerlane, and at the age of 12 succeeded his father as ruler of Ferghana (Turkestan). In 1526 he defeated the emperor of Delhi at Panipat, captured Delhi

and Agra, and estab. a dynasty which endured until 1858.

BABEUF (bahbōf'), François Noël (1760–97). French revolutionary journalist. In 1794 he founded in Paris a paper, later known as the *Tribune of the People*, in which he demanded the equality of all men and the abolition of property. For conspiring against the Directory he was guillotined.

BÁBÍ FAITH, The. Religion founded by Mírzá 'Alí Muhammad (1819–50), known as the Báb ('The Gate'). A native of Shiraz, Persia, he was originally a Moslem, but taught that Islam was not the final revelation of God to men, and revealed a new scripture containing laws abrogating those of the Koran. He was shot by orders of the govt. at Tabriz, and his followers were savagely persecuted. The Bábí Faith developed later into the Bahá'í Faith (q.v.).

BABIRUSA (bahbiroo'sa). A wild pig (*B. alfurus*), found in Celebes, characterized by the great development in the male of the upper tusks which grow upwards through the skin of the snout, and curve back towards the forehead.

BABOON. A large monkey (*Papio*) found in Africa, S. of the Sahara and in S. Arabia, given the popular name 'dog-faced monkey', because of its elongated muzzle. Well-known species are: the chacma from S. Africa, the small ginger-coloured B. of Guinea, the yellow B. of E. Africa, the olive green Anubis B., ranging from E. Africa to Nigeria, and the Hamadryas or sacred B. from Abyssinia and S. Arabia.

BABYLON. Cap. of ancient Babylonia, on the left bank of the Euphrates. The site is in modern Iraq, 60 m. S. of Baghdad and 5 m. N. of Hillah (pop. 50,000), which is built chiefly of bricks from the ruins of Babylon. B. first rose to importance under Hammurabi, and under Nebuchadrezzar I it was a magnificent city. The site of the famous Hanging Gardens, probably built by Nebuchadrezzar II, has not been determined.

BABYLONIA. The great alluvial plain of Mesopotamia, watered by the rivers Euphrates and Tigris, now forming the principal portion of Iraq. In the O.T. it is frequently referred to as the plain of Shinar, Babel, and 'the land of the Chaldees'. In history it was the centre of the Babylonian (and later the Assyrian) empire.

The history of B. is bound up with that of the city of Babylon. B. lay at the meeting-point of 2 great avenues of commerce, the one connecting her with the Mediterranean and Egypt, the other with the Black Sea. Her rise to supremacy followed the penetration of the western Semites into Mesopotamia, and their eventual triumph over the Sumerians. They founded the 1st Amorite dynasty of Babylon in 1950 B.C. Under Hammurabi (1791–1750 B.C.) the 1st Babylonian empire reached on the S.W. to the borders of Syria. From 1650 B.C. the kings of the 1st Sea-land dynasty ruled for 368 years. There followed a period of Kassite domination, which lasted for 576 years. The Kassites are generally supposed to have been an Aryan people. The letters from Tell el-Amarna and from the Hittite archives at Boghaz-Keui throw a good light on the history of their later monarchs. The period was terminated in 1174 by an Elamite invasion.

During the next 300 years B. struggled against the advancing power of Assyria. From 732 until 612 B.C. Babylonia was a subject prov. of the Assyrian empire, and her continued resistance was one of the causes of the downfall of Assyria.

The Neo-Babylonian empire was estab. by Nabopolassar, whose son, Nebuchadrezzar II, raised it to a pitch of prosperity and greatness beyond any it had known. Babylonian rule was extended over the whole of Mesopotamia; Egypt became a tributary; Babylon was rebuilt, fortified, and adorned with magnificent buildings; Jerusalem was captured in 586 B.C., and a large part of the population of Judah carried into exile. After Nebuchadrezzar's death there was a swift decline. In 539 B.C. Babylonia became a prov. of the Persian empire.

The civilization of B. was largely derived from the Sumerians. Their cuneiform or wedge-shaped writing was taken over, and the Sumerian language continued to be used for religious purposes. The Sumerian pantheon was also adopted, together with the chief myths, such as those of the Creation and the Deluge, and the epic of Gilgamesh. Babylonian religious ideas and conceptions of the universe passed into Hebrew culture, and into Europe by way of Greece.

BABYLONIAN CAPTIVITY. The period spent by the Jews in Babylon following the capture of Jerusalem by Nebuchadrezzar the Babylonian emperor, in 605, 597 and 586 B.C. Traditionally it lasted 70 years, but Cyrus permitted the exiles to return to Jerusalem in 536 B.C. The term is applied to the period 1309–77, when the popes were exiled to Avignon.

BACAU (bahk'ow). Town of Rumania, cap. of a region, 155 m. N.N.E. of Bucharest, on the Bistrita. It has petroleum wells. Pop. (1966) 73,481.

BACCARAT (bakarah'). Card game popular with gamblers at Continental casinos, but illegal in England if played for stakes. The more usual variety is *chemin de fer*.

BACCHUS (bak'us). Greek and Roman god of wine, also known in Greece as Dionysus. In Gk. legend B. was the son of Zeus and Semele. He toured the cities of Greece, bringing the gift of the vine to those who welcomed him, and overwhelming those who opposed him with madness and intoxication. The worship of B. took the form of wild and licentious revels, called *Bacchanalia*.

J. S. BACH

BACH (bahkh), Johann Sebastian (1685–1750). German composer. B. at Eisenach, in Thuringia, he came of a distinguished musical family. At 15 he became a chorister at Lüneburg, and at 19 organist at Arnstadt. Subsequent appointments incl. positions at the ducal court of Weimar, and finally, in 1723, that of musical director at St. Thomas's choir school in Leipzig, where apart from his brief visit to the court of Frederick the Great of Prussia in 1747, he remained until his death. B. m. twice, and had numerous children, many of whom died in infancy. His 2nd wife, Anna Magdalena Wülkens, was a soprano singer; she also acted as his amanuensis, when in later years his sight failed.

B.'s music represents the culmination of the polyphonic style of the 17th and early 18th cents., but it was not until the time of Mendelssohn that it began to be generally known and appreciated. Since then both appreciation of his work and careful scholarship in regard to his texts have steadily and rapidly increased, and the extent of his influence on later musicians can hardly be overestimated.

His sacred music incl. the 190 church cantatas, the Easter and Christmas oratorios, the 2 great Passions, according to St. Matthew and St. John, and the Mass in B minor. *Phoebus and Pan* is a secular dramatic cantata. His orchestral music incl. the 6

Brandenburg concertos, and other concertos for clavier and for violin and 4 orchestral suites. B.'s keyboard music, for clavier and for organ, is of equal importance and incl. the collection of 48 preludes and fugues known as *The Well-tempered Clavier*, the Goldberg variations, the Italian concerto, and the French and English suites. Of his organ music the most important examples are the choral preludes. His music also incl. chamber-music and songs, and 2 important works written in his later years illustrate the principles and potentialities of his polyphonic art—the *Musical Offering* and *The Art of Fugue*.

His eldest son, Wilhelm Friedemann B. (1710–84), although famous as an organist, improviser, and master of counterpoint, had an unsuccessful career owing to his dissipated habits. J.S.B.'s 3rd and musically most important son, Karl Philip Emanuel B. (1714–88), b. at Weimar, studied music under his father, was appointed court musician to Frederick the Great, then Crown Prince, and became a member of the royal household on the latter's accession in 1740. He wrote over 200 pieces for the clavier, and pub. an important critical textbook on its technique. From 1768 he was Kapellmeister at Hamburg. His church music incl. the oratorio *The Israelites in the Wilderness*. He is important as a pioneer of the new 'harmonic' (as opposed to 'polyphonic') music, and Mozart, Haydn, and Beethoven all owed a considerable debt to him. J.S.B.'s 11th son Johann Christian B. (1735–82), b. at Leipzig, became well known in Italy as a composer of operas. In 1762 he was invited to London, where he remained till his death and enjoyed great popularity, both as a composer and performer.

BACILLUS (basil'us). Lat. diminutive of *baculus*, rod; the larger, rod-like forms of bacteria (q.v.).

BACKGAMMON. Game played by 2 persons with a board, pieces or draughtsmen, and a pair of dice. From time immemorial it has been popular in the Middle East, and the Romans had a game like it. It was widely played in England in the 18th cent., was fairly popular during the Victorian age, and very much so after the F.W.W. in both Europe and America. In France B. is known as *tric-trac*.

BACKHAUS (bak'how), Wilhelm (1884–). German pianist, a virtuoso interpreter of Beethoven.

BACON, Delia (1811–59). American writer on Shakespearean subjects. In her *Philosophy of the Plays of Shakespeare Unfolded* (1857) she popularized the theory that the plays attributed to S. were written by Bacon and a group of associates.

BACON, Francis (1561–1626). English statesman and philosopher. Youngest son of Sir Nicholas B., the Elizabethan statesman, he was b. in London, ed. at Cambridge, called to the Bar in 1582, and in 1584 became an M.P. Although Lord Burleigh was his uncle, his political ambitions were frustrated and he attached himself to the Earl of Essex. Yet when Essex was disgraced and tried for his life in 1599, B. acted with the prosecuting counsel and in 1601 did much to secure his conviction as a traitor. On the accession of James I. his fortunes improved. He was knighted in 1603, in 1607 became Solicitor-General, and in 1613 Attorney-General. Lord Keeper in 1617, in the next year he was appointed Lord Chancellor and raised to the peerage as Lord Verulam. In 1621 he was

created Viscount St. Albans; but in the same year he was accused in the House of Lords of taking presents from suitors in cases that he had tried. He offered no defence and was ordered to be fined £40,000, imprisoned indefinitely, and banished from Parliament and the Court. After a few days in the Tower he was allowed to retire to Gorhambury, but never again held office.

B.'s brilliant political career was overshadowed at the last by the misfortunes that his alleged malpractices brought upon him. In literature his fame is far more secure. His famous *Essays or Counsels, Civil and Moral*, a series of short discourses upon truth, death, revenge, friendship, etc., appeared in 1597. In 1605 he pub. *The Advancement of Learning* which gave a general view of his ideas upon scientific method, set out more fully in the *Novum Organum Scientiarum* of 1620. B. sought a means of building a natural science which should not be merely theoretical or philosophical, but the principal means of enlarging man's knowledge and power. Among his other writings are a history of Henry VII, a collection of apophthegms, and the *New Atlantis*, a description of a scientific Utopia.

For the theory that Bacon wrote the plays which are attributed to Shakespeare, see **BACONIAN THEORY**.

BACON, Francis (1910–). British artist. B. in Dublin, he was largely self-taught, beginning to paint c. 1930 and holding his 1st one-man show in London in 1949. His work is characterized by lurid colour, and terrifyingly blurred and featureless figures. *Study after Velasquez* (1951) and *Mad Dog* (1952) are in the Tate Gallery, and *Studies of the Human Body* (1947) in the National Gallery of Victoria, Melbourne.

BACON, Sir Nicholas (1509–79). English statesman. B. at Chislehurst, he received grants of Church lands from Henry VIII, held leading legal posts under Mary, and on Elizabeth's accession became Lord Keeper of the Great Seal and a knight. One of his 8 children was Francis B., the philosopher-statesman.

BACON, Roger (c. 1214–92). English philosopher and pioneer scientist. B. in Somerset, and ed. at Oxford and Paris, he became a Franciscan friar and until c. 1251 was in Paris lecturing on Aristotle. Then he wrote a number of works in Latin, e.g. *On Mirrors, Metaphysical Questions, On the Multiplication of Species*, etc., and in 1266, at the invitation of his friend Pope Clement IV, he began his *Opus Majus*, a compendium of all branches of knowledge. In 1268 he sent this with his *Opus Minus* and other of his writings to the Pope. In 1277 he was condemned by the Church and imprisoned for 'certain novelties', but was released in 1292. One of the most original and bold thinkers of the Middle Ages, B. foresaw the magnifying property of convex lenses, the extensive use of gunpowder, and the possibility of mechanical boats and flying machines.

BACONIAN THEORY. The theory that the plays and poems generally attributed to Shakespeare are really the work of Francis Bacon. The theory is said to have been first suggested by the Rev. James Wilmot, a Warwickshire parson, in 1785, but the 1st full and definite claim for the Baconite authorship was made by William Henry Smith in 1856. Since then a considerable literature on the subject has sprung up, especially in U.S.A., and in England the Bacon Society, founded in 1886, exists for furthering these views. See **BACON, Delia**.

BACTERIA. Minute organisms, consisting of a single cell composed of protoplasm. Their place in nature lies between the simplest vegetable organisms, such as the fungi and algae, and the simplest of the microscopic animals, the protozoa, and they are usually classified as plants, although they have no chlorophyll and so are unable to synthesize food from simple organic materials. They are exceedingly numerous, and are present everywhere; and the

FRANCIS BACON

Photo: N.P.G.

BACTERIA. 1, Spirilla. 2, Cocci. 3, Bacilli. 4, Spirochaetae. 5, Vibrios.

names germs, microbes, bacilli, micrococci, and micro-organisms are popularly applied to the group.

CLASSIFICATION. According to their shape there are 5 main classes, viz. (1) *Cocci*, round or oval, e.g. streptococci, in which the cells are held together in chains, and staphylococci, which grow in clusters; (2) *Bacilli*, rod-like or, rather, cylindrical, straight or slightly curved; (3) *Vibrios*, rigid, curved rods, usually with a flagellum (whip) at one end; (4) *Spirilla*, curved and rod-like, with tufts of flagella at the ends; and (5) *Spirochaetae*, non-flagellate, spiral or undulatory.

STRUCTURE. As seen under the microscope, B. are minute, transparent cells, usually colourless, consisting of a mass of protoplasm often surrounded by a wall of sticky material. No nucleus as commonly recognized in other cells has been satisfactorily demonstrated. The unit of bacterial measurement is the micron ($\mu = 1/1000$ mm.). On an average, about 2,500 of the larger forms may measure $1/10$ in. if placed end to end. *Reproduction* is by fission. Cell division may occur every 20 minutes or so, so that an enormous bacterial population may be produced in a few hours. A single specimen may become 16 millions in a day. In the laboratory B. are grown on culture media, extracts of plant, animal, or fish. Heat and drying are destructive to B., and so is light, particularly short ultra-violet rays.

DISTRIBUTION. B. are universally present in nature and their action in breaking down complex substances forms an essential part of the cycle of chemical events occurring in nature, in which plants take from the soil and air simple compounds and synthesize complex substances used by animals as food and built up by them into the complex compounds. Parasitic B. must have living hosts. Saprophytic B. flourish in non-living or inorganic matter. The soil is the great reservoir of the latter; surface soil contains up to 20 million or more B. per gramme. Water is full of B. and has to be purified to eliminate those forms harmful to man. B. are essential in the making of butter and cheese, curing tobacco, tanning leather, retting flax, and in a great many other industrial processes. Sewage disposal is greatly facilitated by the work of aerobic and anaerobic B.

Among harmful B. are those which cause the common cold, pneumonia, diphtheria, scarlet fever, measles, tuberculosis, enteric fever, venereal diseases, anthrax, cholera, etc. Infection is often spread by flies and human 'carriers'.

BACUP. Market town (bor.) in E. Lancs, England, 19 m. N.N.E. of Manchester. Cotton-spinning and weaving, calico-printing, shoemaking, and iron-founding are industries; there are coal mines and stone quarries in the vicinity. Pop. (1961) 17,295.

BADAJOS (bahdah-hōs'). Spanish city, cap. of the prov. of the same name, on the Guadiana. It has the ruins of a Moorish castle; the cathedral dates from the 13th cent. An ancient Roman city, because of its strategic position near the Portuguese frontier it has often been besieged; Wellington stormed it in

1812 with the loss of 59,000 British troops. Pop. (1960) 96,152.

BADDELEY (bad'li), Hermione (1906-). British actress. Specializing in revue, she is as famous for her wit off-stage as on, and has appeared in the U.S. Her sister Angela B. (1904-) is also a well-known actress.

BADEN (bah'den). Former state of S.W. Germany, which had Karlsruhe as its cap. B. was captured from the Romans in 282 by the Alemanni, later it became a margravate, and in 1806 a grand duchy. A state of the German empire 1871-1918, then a rep. and under Hitler a *Gau*, it was divided between the *Länder* of Württemberg-Baden and Baden in 1945, and in 1952 made part of Baden-Württemberg (q.v.).

BADEN. Old Swiss town in Aargau canton, 14 m. N.W. of Zurich, with hot sulphur baths much visited since Roman times. It produces aluminium, chemicals, clothing and food products. Pop. c. 13,000.

BADEN-BADEN. Health resort in Baden-Württemberg, Germany, at the entrance to the Black Forest, 8 m. E. of the Rhine. The medicinal waters of the spa have been famed for centuries. Pop. (1960) 40,000.

BADEN-PÖWELL, Robert Stephenson Smyth, 1st baron (1857-1941). Soldier, and from 1920 'World Chief Scout'. B. in London, he was ed. at Charterhouse and commissioned in the Hussars in 1876. Worldwide fame came to him for his gallant defence of Mafeking during the S. African War. Invalided home, he was knighted in 1909, and retired in 1910 with the rank of lieutenant-general. Earlier he had written *Scouting for Boys* (1908), and he now set about the establishment of the Boy Scouts movement which speedily spread throughout the Empire and beyond. In 1929 he was made Baron B.P. of Gilwell, and in 1937 received the O.M.

His sister, Agnes B.-P. (1854-1945) was a pioneer woman balloonist and aeronaut, and assisted him in the formation of the Girl Guides in 1910.

BADEN-WÜRTTEMBERG (bah'den vür'tem-berg). Land of S.W. Germany formed in 1952 (following a plebiscite) by the merger of the *Länder* Baden, Württemberg-Baden, and Württemberg-Hohenzollern. The Rhine forms its W. and S. boundaries, and the river valley is devoted to vine and fruit-growing, much of the state is rich agricultural country and forestry is carried on. Textiles, chemicals, iron and steel goods, clocks (spec. in the Black Forest), electrical equipment, etc. are produced. The cap. is Stuttgart. Area 13,400 sq. m.; pop. (1966) 8,534,100.

BADGER. Mammal of the weasel family, but with larger jaws and molar teeth of a crushing type adapted to a more vegetable diet, and short strong legs with long claws suitable for digging. It has long coarse hair grizzled with black on the upper side, and the underside and legs are black. The face is white with a broad black stripe on each side. The common B. (*Meles meles*) is c. 3 ft. long. Harmless and of nocturnal habits, it spends the day in deep burrows, called a 'set'. It feeds on insects and roots, but also eggs, mice, and young rabbits.

The so-called sport of *badger-baiting* has been prohibited in Britain since 1850.

BAD HOMBURG. See HOMBURG.

BADMINTON. Game played by 2 or 4 players with rackets and shuttlecocks, usually indoors. The name is derived from B. House, the Gloucestershire seat of the duke of Beaufort, where B. originated in the 1860s. The 1st rules were drawn up in 1876, and the B. Association was formed in 1895.

BADOGLIO (bahdō'lē-oh), Pietro (1871–1956). Italian soldier. A veteran of campaigns against the tribes of Tripoli and Cyrenaica, he in 1935 replaced de Bono as C.-in-C. in Ethiopia, adopting ruthless measures to break patriot resistance, and being created Viceroy of Ethiopia and Duke of Addis Ababa in 1936. Always unfavourable to Fascism, he succeeded Mussolini as P.M. from July 1943 to June 1944.

BAEDEKER (bād'-), Karl (1801–59). German publisher. B. at Essen, son of a publisher and printer, he estab. himself at Coblenz in 1827, and started the famous series of travel guides, recording nothing he had not seen himself. The firm (carried on by his descendants) removed to Leipzig in 1872, was completely destroyed in 1943, and was re-estab. nr. Hamburg after the S.W.W.

BAEKELAND (bāk'-), Leo Hendrik (1863–1944). American chemist. B. in Ghent, he went to U.S.A. in 1889, and undertook research on photographic materials, inventing Velox paper. His subsequent researches covered the fields of plastics, electro-chemistry, organic chemistry, synthetic resins, and electrical insulation. He also invented bakelite.

BAER (bār), Karl Ernst von (1792–1876). German zoologist. B. in Estonia, he held scientific posts at Königsberg and St. Petersburg, and was the founder of comparative embryology.

BAFFIN, William (1584–1622). English navigator and explorer, a Londoner by birth. In 1612 he was chief pilot of an expedition in search of the N.W. passage, and in 1613–4 commanded a whaling fleet near Spitzbergen. In 1615 he became pilot for Robert Bylot on the *Discovery* examining Hudson Strait. In 1616 they discovered Baffin Bay and reached Lat. 77° 45', which for 236 years remained the 'furthest north'. After 1617 B. transferred his services to the E. India Co. and made surveys of the Red Sea and Persian Gulf. In 1622 he was killed in an Anglo-Persian attack on Ormuz.

BAGATELLE. A game resembling billiards, played on a board with numbered cups instead of pockets. The object is to drive the 9 balls into the cups. In ordinary B. each player sends all the balls up in turn. In French B. 2 or 4 players, playing alternately, take part.

BAGEHOT (baj'ot), Walter (1826–77). British economist. Manager of the London office of his family banking house, he pub. a masterly analysis of the London money market *Lombard Street* (1873). Other books incl. *The English Constitution* (1867), a classic explanation of the political system at the end of the Palmerstonian era, and *Physics and Politics* (1869), applying the laws of natural selection to the development of human communities. He ed. *The Economist* from 1860.

BAGGARAS. A Beduin tribe whose home is in the Nile Basin, principally in Kordofan, W. of the White Nile. They are Mohammedans, chiefly occupied in cattle-breeding and big-game hunting. Physically they are of a very fine type. The British soldier nicknamed them 'Fuzzy-wuzzies' on account of their mop-like hair fashions.

BAGHDAD (bahgdahd'; Eng. bag'dad). Cap. of Iraq, on the Tigris. B. was founded in the very early days of history; it was a route centre of great importance, a commercial and intellectual centre during the 8th–9th cents. The present city was founded in 762 and enlarged by Harun-al-Rashid. It was overrun in 1258 by the Mongols, who destroyed the irrigation system. In 1639 it was taken by the Turks. During the F.W.W. B. was captured by Gen. Maude in 1917, and in 1921 was made cap. of the new country of Iraq. Pop. (1967) 1,007,605.

Of the old city of 'Arabian Nights' fame not much remains; the modern city is one of metalled roads, railway stations, public buildings, etc. The

univ. was opened in 1958. B. is still a great centre of communications.

The Baghdad Pact was a treaty made in B. in 1955 between Turkey and Iraq to which Britain, Pakistan, and Persia later adhered. Iraq withdrew from it after the revolution of 1958 and the remaining allies renamed their group the Central Treaty Organization (CENTO) in 1959. The U.S.A. signed bilateral agreements of co-operation.

BAGHDAD RAILWAY. German project to link Berlin with the Mosul petroleum fields. The part of the line in Anatolia was completed in 1896; then the project was held up by opposition from other Powers. In 1911–4 the Germans completed the section from Baghdad to Samarra. During the F.W.W. the British extended the line to Kala Shargat (and also built a narrow gauge line S. from Baghdad to Basra). The last section of the B.R. was completed 1936–40.

BA'GNOLD, Enid (1896–). British author, who m. Sir Roderick Jones of Reuters. Her novel *National Velvet* (1935) achieved great success as a play, and *The Chalk Garden* (1954), staged both in London and N.Y., was a delicate essay in character study.

BAGPIPE. Musical instrument of ancient origin, being known to the Romans and ancient Egyptians and found in different forms in various parts of Europe, as well as in the British Isles. It is developed from the primitive reedpipe, but is distinguished by the presence of a bag for the supply of wind, a chanter or melody pipe and drones, which emit one invariable note and supply a ground-bass. The Scotch B.P. is regarded as the national instrument, and the chanter pipe has a compass of 9 notes. The compass of the Irish bagpipe is wider.

BAGPIPE. The massed pipe bands of the Queen's Own Cameron Highlanders and the Seaforth Highlanders are stirringly impressive as they march past Inverness Castle.

Photo: George Outram & Co. Ltd.

BAGRITSKY, Eduard (1895–1934). Pseudonym of the Soviet poet Eduard Dzyubin. One of the Constructivist group, he pub. a vol. of verse, *South-West*, the heroic poem *Lay About Opanas*, and collections of verse called *The Victors* and *The Last Night*.

BAGUIO (bagwi'o). Summer resort of the Philippine Rep., in Luzon, 125 m. N. of Manila, 4,500 ft. above sea-level. Pop. c. 40,000.

BAHADUR SHAH II (1775–1862). Last of the Mogul emperors of India. He reigned, though in name only, and under the British, as king of Delhi 1837–57, when he was hailed by the mutineers as an independent emperor at Delhi. After the Mutiny he was deported to Rangoon.

BAHÁ'Í FAITH, The. Religion founded in Persia by Bahá'u'lláh (1817–92) as a continuation of that of the Báb (see BĀBÍ FAITH). He taught that divine revelation continues from age to age, and that

State. His books incl. *The Foreign Office* (1955) and *The Diplomatic Career* (1962).

STRANRAER (stranrahr'), Scottish seaport (burgh) in Wigtownshire, at the head of Loch Ryan. There are regular sailings to and from Larne, N. Ireland. Pop. (1961) 9,249.

STRASBOURG (straz'boorg; Ger. Strassburg). Cap. of Bas-Rhin dept., France, on the Rhine, historic cap. of Alsace. There is a Gothic cathedral, and the House of Europe (1950) is the meeting-place of the Council of Europe. Seized by France in 1681, it was surrendered to Germany 1870-1919 and 1940-4. It is noted for preserves and has motor-car and tobacco factories, printing and publishing works, etc. Pop. (1962) 228,971.

STRATFORD-UPON-AVON. English market town (bor.) in Warwicks, the birthplace of Shakespeare whose grave is in the parish church. The Royal Shakespeare Theatre (1932) replaced an earlier

STRATFORD-UPON-AVON. The Royal Shakespeare Theatre, designed by Elizabeth Scott. The Royal Shakespeare Company, in its annual season, attracts tourists from all over the world. Courtesy The Royal Shakespeare Theatre.

building (1877-9) burnt down in 1926. Shakespeare's birthplace, purchased 1847, contains relics of his life and times. Pop. (1961) 16,847. Stratford, city and port of Ontario, Canada, also has a Shakespeare festival.

STRATHCÔNA AND MOUNT ROYAL, Donald Alexander Smith, 1st baron (1820-1914). Canadian statesman. B. in Scotland, he joined the Hudson's Bay Company in 1838, and in 1868 became governor of Hudson Bay. He played a prominent part in railway development, and 1896-1911 was High Commissioner for Canada.

STRATOSPHERE. That part of the atmosphere beyond 6 m. from the earth, wherein the temperature is constant. After the minimum $-55^{\circ}\text{C}.$ is reached, there is even a slight rise up to 25 m. in the extremely rarefied air. Piccard made famous ascents in 1931-2, and important discoveries were made in 1935, when the U.S.A.S. balloon Explorer II reached 72,395 ft. (13½ m.). Exploration now is by rocket.

STRAUS (strows), Oscar (1870-1954). Austrian composer. B. at Vienna, he composed operettas, e.g. *The Chocolate Soldier*.

STRAUSS, Johann (1825-99). Austrian composer. B. in Vienna, he was the son of Johann Strauss (1804-49), a composer of waltz music. In 1862 he relinquished conducting for composition, and wrote operettas, such as *Die Fledermaus*, and numerous waltzes, e.g. 'The Blue Danube', 'Tales from the Vienna Woods', etc., which gained him the title 'The Waltz King'.

STRAUSS, Richard (1864-1949). German composer. B. at Munich, he wrote the symphonic tone

STRAVINSKY. On a visit to Britain, the composer conducts the B.B.C. Symphony Orchestra. Photo: Godfrey MacDonnic.

poems *Don Juan*, *Death and Transfiguration*, and *Till Eulenspiegel* (1895), and many songs. His operas incl. *Salome*, *Elektra*, *Der Rosenkavalier*, *Ariadne auf Naxos*, and *Arabella*. He became president of the Reichsmusikkammer, but resigned in 1935 when his opera *Die schweigsame Frau* was boycotted because the libretto was written by S. Zweig (q.v.).

STRAVINSKY, Igor (1882-). Russo-American composer. B. near St. Petersburg, he studied under Rimsky-Korsakov and, for the Diaghilev ballet, wrote *The Firebird* (1910), *Petrushka* (1911) and *The Rite of Spring* (1913), which aroused controversy on account of their unorthodox rhythm and harmony. Having lived in Paris from 1920, he went to the U.S. in 1939 and in 1945 took American citizenship. His works incl. symphonies, concertos (for violin and piano), chamber music, a mass (1948) and operas, e.g. *The Rake's Progress* (1951) and *The Flood* (1962).

STRAWBERRY. Genus (*Fragaria*) of fruiting plants of the Rosaceae family which incl. the wild S. of Europe (*F. vesca*), and the N. American meadow S. (*F. virginiana*) and the Chilean (*F. chiloensis*) from which the modern cultivated hybrids derive. Although naturally a dwarf perennial, in commercial cultivation the S. is allowed to produce only 2 or 3 crops before being replaced by new stock or 'runners' allowed to develop from selected plants.

STREICHER (stri'kher), Julius (1885-1946). Nazi politician. He began anti-Semitic agitations after the F.W.W., took part in the 1923 *putsch*, and founded and edited *Der Stürmer*. He was tried and hanged.

STREIT (strit), Clarence Kirshman (1896-). American author. He became pres. in 1939 of Federal Union, Inc., a society formed to further his proposals for a union of America and the democracies of western Europe and the British Commonwealth, contained in his book *Union Now* (1939), and in 1958 pres. of the International Movement for Atlantic Union.

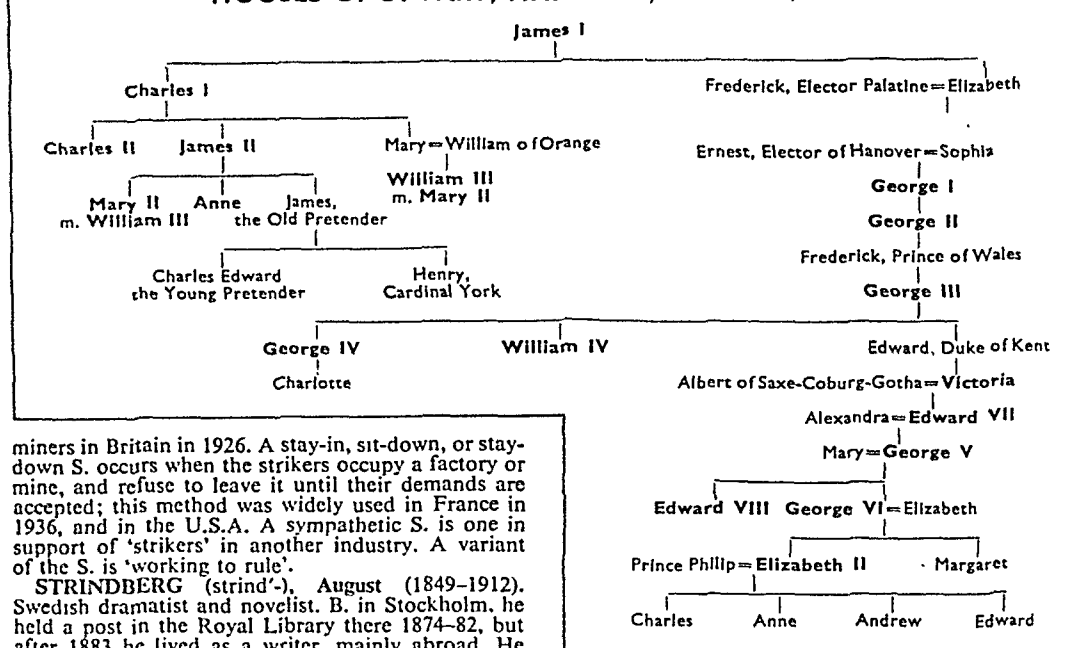

STREPTOMYCIN. Antibiotic (q.v.). Discovered in 1944 by Dr. Selman Waksman at New Jersey, it is prepared from micro-organisms in earth-mould, and is used in the treatment of tuberculosis, influenza meningitis, and other infections, some of which are unaffected by penicillin.

STRESEMANN (strä'semahn), Gustav (1878-1929). German statesman. B. in Berlin, he became leader of the National Liberal Party in 1917. He was Chancellor in 1923 and 1924, and several times For. Min. S. concluded the Locarno Pact in 1925, and in 1926 shared the Nobel peace prize with Briand.

STRETFORD. English industrial town (bor.) in Lancs, 4 m. S.W. of Manchester. Old Trafford, the Lancs county cricket ground, is in S. Pop. (1961) 60,331.

STRIKES and Lock-outs. A S. is a stoppage of work by workpeople in order to obtain or to resist a change in their wages, hours, or conditions; a L. occurs when employers shut out their employees to force them to accept such a change, e.g. the L. of the

HOUSES OF STUART, HANOVER, AND WINDSOR

miners in Britain in 1926. A stay-in, sit-down, or stay-down S. occurs when the strikers occupy a factory or mine, and refuse to leave it until their demands are accepted; this method was widely used in France in 1936, and in the U.S.A. A sympathetic S. is one in support of 'strikers' in another industry. A variant of the S. is 'working to rule'.

STRINDBERG (strind'-), August (1849–1912). Swedish dramatist and novelist. B. in Stockholm. He held a post in the Royal Library there 1874–82, but after 1883 he lived as a writer, mainly abroad. He was a strong critic of contemporary Swedish society, and (although thrice married) a woman-hater and a deep pessimist. He wrote historical dramas, e.g. *Gustavus Adolphus* (1900); pseudo-autobiographies, e.g. *The Son of a Servant* and *The Confessions of a Fool*; satirical comedies – *Bengt's Wife*; and tragedies – *The Father* (1887).

STRINGFELLOW, John (1799–1883). British inventor of the first model power-driven aeroplane (1848).

STROMBOLI (strom'bōlē). Italian island, one of the Lipari Islands, on which is an active volcano, 3,038 ft. high. The island produces Malmsey wine and capers. Area 4.7 sq. m.; pop. 1,200.

STRONTIUM (Strontian, town in Scotland). A silver-white ductile metal, symbol Sr., at. wt. 87.63, at. no. 38. Discovered by a Scot named Crawford in 1790, and isolated electrolytically by Davy in 1808, it is widely distributed in small quantities as the sulphate and carbonate. The metal resembles calcium and its salts give a brilliant red colour to a flame, are used for fireworks, and the oxide is used in sugar refining.

A long-lived radioactive isotope Sr-90 is produced in the fission of uranium and is a dangerous component of fallout since it is taken up by plants and ingested by cattle which pass it to their milk. When ingested by humans it accumulates in bones causing tumours. An underwater sound beacon drawing energy from Sr-90 is being developed as a navigational aid in the U.S.A. It will be used by ships in a similar way to a radio beacon.

STROUD. English market town (U.D.) in Glos, 10 m. S. of Gloucester, in the Cotswolds. Cloth making is the oldest industry. Pop. (1961) 17,461.

STRUTT, Jedediah (1726–97). British inventor, an associate of Sir Richard Arkwright. He invented c. 1755 a machine to produce ribbed hosiery.

STRYCHNINE (strik'nin). A bitter-tasting alkaloid (C₂₁H₂₂O₂N₂), usually obtained by powdering the seeds of plants of the genus *Strychnos*, e.g. *S. nux vomica*. It is a violent tetanizing poison. See also the related drug CURARE.

STRYDOM (strā'dom), Johannes (1893–1958). S.

African National statesman, P.M. 1954–8, he furthered apartheid.

STUART or Stewart, House of. Royal family, who inherited the Scottish throne in 1371, and the English in 1603. See Table above.

STUBBS, George (1724–1806). British artist. B. in Liverpool, son of a currier, he was originally a portrait painter, but in 1758 rented a farm and carried out a long series of dissections which resulted in his book of engravings *The Anatomy of the Horse* (1766). Henceforward he had no lack of commissions, and his paintings are a record of the turf, the hunting field and the golden age of English country life, e.g. 'Phaeton and Pair', 'Gimcrack on Newmarket Heath' 'Haymakers' and 'Reapers'.

STUBBS, William (1825–1901). British churchman and historian. He took orders in 1850, and was prof. of modern history at Oxford 1866–84. His great work is the *Constitutional History of England* (1873–8). He was bp. of Chester 1884–9, and of Oxford 1889–1901.

STUD, National, Estab. at Gillingham, Dorset, and West Grinstead, Sussex, England, maintained by the Horserace Betting Levy Board (until 1963 by the Min. of Agriculture). Founded in Dec. 1915 when Lord Wavertree presented to the nation his stud at Kildare, it removed to England in 1943, and produced thoroughbreds, mainly for export, incl. many notable racehorses, esp. for the sovereign, but since 1964 only stallions have been kept for visiting mares.

STURGEON. Genus (*Acipenser*) of fish incl. the common European S. (*A. sturio*) which reaches c.

SWORD-FISH

(1923–32) has a single span of 1,652 ft., and the Opera House (see illus. p. 809) was begun 1959. S. is Australia's prime internat. airport, has engineering and metal processing industries, and is a wool mart and major financial and educational centre with 3 univs.—Sydney (1850), N.S.W. (1958) and Macquarie (1967). Pop. (1966) 2,539,630.

SYENITE (si'enit). A group of grey, crystalline, plutonic rocks, composed of feldspar and hornblende, distinguished from granite by the absence of quartz.

SYKTYVKAR (siktifkahr'). Russian city, cap. of Komi A.S.S.R., on the Vychegda r., a lumbering centre with saw mills, paper factories, tanneries, etc. It was founded 1740 as a Russian colony. Pop. (1967) 102,000.

SYLHET (sil-het'). Dist. in E. Pakistan, the valley of the Surma, formerly in Assam. The cap. is also called S. Rice, tea, jute, sugar, etc., are cultivated. Pop. (1961) 3,489,589.

SYMBOLISTS. School of French poets, represented by Verlaine, Mallarmé, and Rimbaud, who used words for their symbolic rather than their concrete meaning: the intimate, personal interpretations employed tended to produce obscurity.

SYMINGTON, William (1763–1831). British inventor. B. in Lanarks, he invented the road locomotive, and in 1788 a steamboat engine, building in 1802 at Grangemouth the first successful steamboat.

SYMONDS (si'mondz), John Addington (1840–93). British writer. B. at Bristol, he spent much of his life in Italy and Switzerland, and pub. *The History of the Renaissance in Italy* (1875–86), literary criticism, and a translation of Cellini's autobiography.

SYMONS (si'monz), Arthur (1865–1945). British writer. Son of a Methodist minister, he developed a precocious literary gift, and wide friendships with Toulouse-Lautrec, Mallarmé, Beardsley, Yeats and Conrad. He introduced Eliot to the work of Laforgue and, of his numerous books, *The Symbolist Movement in Literature* (1900) is best known. In 1908 he suffered a severe mental breakdown, but partially recovered.

SYMPHONY (sim'foni). A musical composition for orchestra, traditionally in 4 contrasted but closely related movements. It developed from the smaller sonata form, the Italian overture, and the dance suite of the 18th cent. Haydn estab. a mature form of S. in his later works, written in allegro, slow, scherzo, and allegro movements. Mozart in lyrical mood, and Beethoven with dramatic tones, expanded the classical form, which has been developed further by successive composers, such as Brahms, Tchaikovsky, Brückner, Dvořák, Mahler, Sibelius, Vaughan Williams, Rubbra, Piston, Prokofiev, Shostakovich, Stravinsky, Copland.

SYNAGOGUE (sin'agóg). The building used by Jews for their religious worship. As an institution it dates from the destruction of the temple in Jerusalem in A.D. 70, though it had been in course of development from the time of the Exile.

SYNCLINE (sing'klín). See **ANTICLINE**.

SYNCOPE (sin'kopi). Name for **FADING** (q.v.).

SYNDICALISM (sin'dikalizm). Revolutionary labour movement advocating the ownership and control of each industry by the workers in it, organized in their trade union. It rejects parliamentary activity in favour of 'direct action' by means of strikes, culminating in a revolutionary general strike. S. originated in England under Robert Owen's influence in the 1830s, but first became widespread in France after 1900. It exercised considerable influence in England c. 1910–24, Tom Mann being its principal spokesman, and was preached in the U.S. by the Industrial Workers of the World. After 1918 S. was absorbed by Communism or Anarchism.

SYNGE (sing), John Millington (1871–1909). Irish playwright. B. nr. Dublin, he was ed. at Trinity Coll., Dublin, and when living in Paris in 1898 was persuaded by Yeats to go to the W. of Ireland and the Aran Is. Absorbing the characteristic poetic turns of speech of the local people, he wrote plays incl. *The Shadow of the Glen* (1903), *Riders to the Sea* (1904), *The Well of the Saints* (1907), *The Playboy of the Western World*, and the unfinished *Deirdre of the Sorrows*. His presentation of the Irish tended to upset his compatriots, and when *Playboy* (1907) was first presented at the Abbey Theatre there were riots.

SYNOVITIS (sinovi'tis). Inflammation of the lining of a joint, caused by injury or infection.

SYPHILIS (si'filis). The principal venereal disease, due to infection of the blood by the parasite *treponema pallidum*. It is communicated almost entirely by sexual intercourse. The first sign is a nodule, sometimes ulcerated (chancere); some weeks afterwards a rash appears all over the body, with ulcers in the mouth and throat. Later, swellings occur under the skin and in the internal organs, and destroy the surrounding tissues, incl. bone. The brain cells may be affected (general paralysis of the insane, *locomotor ataxia*). Treatment must be sought early; and in Britain is offered free by all large local authorities.

SYRACUSE (si'rakúz). Port of Sicily, Italy, on the E. coast, 81 m. S.W. of Messina. Chemicals, salt and wine are produced. It has a cathedral and remains of temples, aqueducts, catacombs, and an amphitheatre. S. was founded in 734 B.C. and became a centre of Greek culture and power, especially under the elder and younger Dionysius (406–343 B.C.). S. was taken by the Romans in 212 B.C., and was destroyed by Saracens in 878. The rebuilt town was taken by the Normans in the 11th cent. Pop. (1961) 90,333.

SYRACUSE (si'rakúz). City in New York state, U.S.A., 147 m. W. of Albany at the S. end of Lake Onondaga, and connected with the Great Lakes, the Hudson, and the St. Lawrence by canals. Manufactures incl. typewriters, agricultural implements, clothing, furniture. S. was founded 1805 on the site of an Iroquois cap. Pop. (1960) 216,038.

SYRIA (sir'ia). Asian republic in the Near East. Most of S. consists of a desert plateau. Mt. Hermon and the Anti-Lebanon, both on the Lebanese border, are the main elevations. The country is drained by the Euphrates and its tributaries. Damascus is the cap.; other towns are Aleppo, Homs, and Hama. S. has a coastline of about 120 m. on the Mediterranean, Latakia being its chief port.

Wheat, barley, sorghum, olives, tobacco, cotton, and grapes are cultivated and cattle, sheep, goats, camels, donkeys, and horses are reared. S. is traversed by 3 oil pipelines from Arabia. Silk, soap, tobacco, leather, and brassware are manufactured.

There have been frequent military coups, but under the provisional constitution of 1969 there is an elected People's Assembly which elects a pres., but only the Baath political party (split between more dominant 'nationalists' favouring war with Israel and 'progressives' favouring concentration on the economy) is permitted. Area 72,000 sq. m.; pop. (1962 est.) 5,500,000, the majority Moslem Arabs. Arabic is the

SUBMARINE. Britain's first nuclear submarine H.M.S. *Dreadnought*: (1) reactor compartment, (2) reactor control compartment, (3) auxiliary machinery, (4) diesel generator, (5) escape hatch, (6) main condenser, (7) main turbines, (8) electric propulsion motor (alternative drive), (9) rudders, (10) after hydroplane, (11) surface navigating bridge, (12) periscope, (13) radar and radio aerials, (14) snort, (15) control room, (16) electric batteries, (17) crew's quarters, (18) mess, (19) electrical space, (20) forward hydroplane, (21) torpedo space, (22) torpedo tubes, (23) stowed anchor, (24) galley. Courtesy of Rolls-Royce and Associates Ltd.

10 ft. and in England is a royal fish, traditionally belonging to the Crown, but actually poor eating. The most valuable species, of which the roe is made into caviare, are those of the rivers of the Black and Caspian seas, more especially *A. stellatus*, which is only 5 ft. long, but the *S.* of the Great Lakes of N. America (*A. rubicundus*) is also used.

STUTTGART (shtoot'gahrt). Capital of Baden-Württemberg, Germany, on the river Neckar. There is a publishing trade, and important factories and rail yards. Pop. (1966) 625,258.

STYLE, Old and New. See CALENDAR; OLD STYLE.

STYRIA (stir'ia). Prov. of Austria, in the eastern Alps. *S.* is mainly mountainous. Forestry is important, iron ore, lignite, and graphite are mined, and there are blast furnaces and steel works. Graz is the cap. Area 6,326 sq. m.; pop. (1961) 1,137,460.

STYX (stiks). In Greek mythology the river surrounding the underworld. See CHARON.

SUAKIN (swah'kin). Seaport in Sudan Republic, partly on an islet in the Red Sea, partly on the mainland. It cannot take vessels of more than 20 ft. draught, but is much used by pilgrims going to Mecca. Pop. (est.) 6,000.

SUBMARINE. Submersible boat, operating down to 1,000 ft. and relying on gas or liquid ballast tanks to achieve buoyancy. An early attempt was the *S.* constructed for James I by the Dutchman Cornelius van Drebel in 1620, but serious development began with attempted use of the *S.* in warfare in the 18th cent. The 1st naval *S.* or submersible torpedo boat, the *Gymnare*, was launched by France in 1888 and John P. Holland, an Irish emigrant to the U.S.A., designed a *S.* c. 1875 which was adopted by both the U.S. and British navies for their 1st warships of this kind at the turn of the cent. In both the world wars the *S.*, from the ocean-going to the midget type, played a vital role and after the S.W.W. came the atomic *S.* and in the 1960s developments in oceanography (q.v.) and commercial pipe-laying of less wide-ranging 'submersibles', usually carrying pilot and observer, and divers released to undertake high dexterity tasks — some operate with external manipulators down to 6,000 ft. See PICCARD and WARSHIP.

SUBOTICA. Largest town of Vojvodina, Yugo-

slavia. It is an agricultural centre with many manufactures. Pop. (1961) 75,036.

SUBPOENA (-pē'na) (Lat. 'under penalty'). A writ issued early in litigation requiring a person to be present at a specified time and place to give evidence before a court or a judicial officer.

SUBWAY. See UNDERGROUND.

SUCEAVA. See under BUKOVINA.

SUCKLING FISH. Several genera of fishes having an adhesive disc on the head by means of which they attach themselves to ships, sharks, or turtles.

SUCKLING, Sir John (1609–42). English poet. B. at Whitton, he was an ardent Royalist. His chief lyrics appeared in *Fragmenta Aurea* (1646).

SUCRE (soō'krā). Nominal cap. of Bolivia, commercial and road centre, seat of the supreme court and of the Univ. of San Francisco Xavier (1624), probably the oldest univ. in S. America. *S.* was founded 1538; the cathedral dates from 1553. Brewing, distilling, petroleum refining are industries. Pop. (1965) 57,608.

SUDAN (soodahn'). Geographical term used to describe N. Africa, S. of Algeria, Tunis, Libya, from the Atlantic to the Red Sea.

Sudan Republic lies S. of Egypt, N. of Uganda, with a coastline on the Red Sea. The climate is tropical, hot, and dry. Desert in the N., it is fertile in the S., producing dura, maize, ground-nuts, cotton, etc. Gum arabic is gathered from a species of acacia. The Nile traverses the rep. from S. to N. and is important both for irrigation and as a means of transport; there are 2,800 m. of railways and a govt. air service. Port Sudan is the chief port; the cap. is Khartoum. Area 967,500 sq. m.; pop. (1964 est.) 13,000,000. Subdued by an Anglo-Egyptian army under Kitchener 1896–8, *S.* was admin. as an Anglo-Egyptian condominium 1899–1956, when it became a rep. The *S.* (Negroid and pagan) aims at secession from the N. (Arab and Moslem) as Anzania; revolt began in 1963, but by 1967 the central govt. agreed that under a new constitution the 9 provs. of *S.* would be reconstituted as regions with their own assemblies. There was a military coup in 1969. See also MALI, REPUBLIC OF.

SUDBURY. English market town (bor.) on the Stour, Suffolk. Silk, matting, flour, marine engines

main language. The Syrian univ. (1924) is at Damascus.

HISTORY. S. was originally divided between various small kingdoms which fought against Israel, and were subdued by the Assyrians. It was subsequently occupied by the Babylonians, Persians, and Macedonians, but gained importance under Seleucus

Nicator (301 B.C.), founder of Antioch, and Antiochus the Great. After forming part of the Roman and Byzantine empires, it was conquered by the Saracens in 636. During the Middle Ages it was the scene of many of the Crusaders' exploits. The area forming S. belonged to Turkey 1516–1918. It was occupied by Brit. and Fr. troops 1918–19, and in 1920, with Lebanon, was placed under Fr. mandate (confirmed 1922). The 2 terrs. were separated in 1925, S. gaining full independence in 1946.

Union with Egypt, proclaimed in 1958 and abandoned 1961, was again under discussion later.

SYRIAC (sir'iak). One of the Semitic languages, originally the Aramaic dialect of Edessa. From c. 700 B.C.–c. A.D. 700, it was spoken over a large area of C. Asia. The alphabet was similar to that of Hebrew. S. survives as the ritual language of the Nestorian Church. S. literature was mainly theological in character.

SYRINGA (siring'ga). Genus of shrubs. Lilac (*S. vulgaris*) is the best-known, but the name is given to a number of other plants, notably mock orange, which is in the family Saxifragaceae.

SZCZECIN (sche'chin). Baltic port of Poland, on the Oder, 17 m. above its entrance into the Zalew Szczeciński (Stettiner Haff) and 84 m. N.E. of Berlin. Under the Ger. form of its name, Stettin, it was Germany's chief port on the Baltic until after the S.W.W. when it came under Polish admin. A member of the Hanseatic League from 1278, it was Swedish

1648–1720 when it was occupied by Prussia. The Russians captured it, 1945. Catherine the Great was b. at S. Pop. (1966) 315,000.

SZECHWAN (sech'wahn'). Prov. of W. China, lies high; it is surrounded by mts., well forested, and drained by the Yangtze Kiang and its tributaries. The Red Basin forms the heart of the prov. Chengtu (cap.) and Chungking are the main towns. Chief products incl. timber, rice, winter wheat, millet, ground-nuts, cotton, sugar cane, coal, iron, copper, salt, petroleum. Sikang prov. was merged in S. in 1955; combined area 219,700 sq. m.; pop. (1957) 72,160,000.

SZEGED (seg'ed). City and co. bor. in Hungary, near the confluence of the Maros and Tisa, 100 m. S.E.

SYRINGA

SZEGED. The Tisa, seen here flowing across the centre of the picture, almost completely destroyed Szeged by floods in 1879 and little of the ancient town survives.

Courtesy of the Hungarian News and Information Service.

of Budapest. S. is an industrial and commercial centre, with a univ. It was held by the Turks 1528–1688. Pop. (1967) 118,000.

SZYMANOWSKI (shimanov'ski), Karol (1883–1937). Polish composer. B. in the Ukraine, he became director of the Conservatoire at Warsaw in 1922. S. composed orchestral works, operas, and piano music.

The 20th letter of the alphabet, whose sound is the unvoiced dental stop. The earliest form was X, which the Phoenicians called *tau*, a cross or sign, but in the Gk. alphabet its form was T.

TABLE BAY. Inlet in the S.W. coast of the Cape of Good Hope, S.A., on which stands Capetown. It is overlooked by Table Mountain (3,550 ft.).

TABLE TENNIS. Indoor game developed in Britain c. 1880, possibly from real T., which was known until the adoption of the present name by the International T.T. Assoc. in 1926 as ping pong. It is played by 2 or 4 players using solid-headed wooden bats and celluloid balls on a rectangular table (9 ft. by 5 ft. wide, and 2 ft. 6 in. above the floor), with a net 6 in. high dividing the table into 2 equal courts. Points are scored if the opponent makes a fault (fails to return a ball, strikes into the net, etc.), and 21 points make a game, a match being 2 out of 3 games. The blade may be bare wood or covered with sand-

paper, but in competition additional speed is gained with rubber-covered (first used 1903) or sponge-covered bats. In the 1950s the Japanese, and in the 1960s the Chinese, estab. world supremacy in the game.

TABORA. Cap. of Western prov., Tanganyika. Road and rail centre. Founded by the Arabs c. 1820 as a trading base for slaves and ivory. Pop. (est.) 15,000.

TABRIZ (tahbrēz). Persian commercial city, cap. of prov. 3 (part of Azerbaijan). It has a univ. and makes carpets, textiles, soap, matches, alcohol. Pop. (1964) 387,803. See illus. p. 1018.

TABU or **Taboo.** Polynesian word meaning 'forbidden', applied to magical and religious objects and practices which are generally prohibited.

TACITUS (tas'itus), Cornelius (c. 55–120?). Roman historian. An eminent lawyer, he m. a dau. of Julius Agricola, and in 97 was consul under Nerva. He wrote a life of Agricola; the *Germania*, describing the German

are produced; woollens, introduced in the 14th cent. by Flemings, were formerly made. Pop. (1961) 6,643.

SUDBURY. City in Ontario, Canada, 38 m. N. of Lake Huron; most of the world's nickel is mined here. Pop. (1966) 84,888.

SUDERMANN (zōō'dermahn), Hermann (1857–1928). German dramatist and novelist. B. in E. Prussia, he wrote the novels *Frau Sorge*, *Der Katzensteg*, etc.; and such plays as *Die Ehre* and *Heimat*.

SUDETENLAND (soodeh'ten-). Term applied to an area of Czechoslovakia close to the Sudeten mts., many of whose inhabitants before the S.W.W. were of German origin, settled in the district for generations. Nazi agitation among them led to the Munich crisis in Sept. 1938, following which the S. was ceded to Germany which annexed all Czechoslovakia in 1939. After the S.W.W., S. was returned to Czechoslovakia and more than 2 million of its German-speaking inhabitants were expelled.

SUE (sü), Eugène (1804–57). French novelist. B. in Paris, he served as naval surgeon 1824–30. His novels incl. *The Mysteries of Paris* and *The Wandering Jew*. Elected a member of the National Assembly in 1850, he retired to Annecy after Napoleon III's coup d'état.

SUETONIUS TRANQUILLUS (swēō'n'ius), Gaius (fl. 2nd cent. A.D.). Latin historian, whose *Lives of the Caesars* gives much personal information.

SUEZ (soo'ez). Port of the U.A.R. (Egypt) at the Red Sea terminus of the S. Canal. Pop. (1963) 203,000.

SUEZ CANAL. Artificial waterway from Port Said to Suez, linking the Mediterranean and Red seas, separating Africa from Asia, and providing the shortest sea route from Europe to the East, to Australasia, and to the E. coast of Africa. The French S.C. Company was formed in 1858 to execute the scheme of Ferdinand de Lesseps. The canal was opened in 1869, and in 1875 Disraeli acquired for Britain from the khedive of Egypt 177,642 (out of 400,000) shares for £4 million. The 1888 Convention of Constantinople opened it to all nations. The S.C. was admin. by a co. with offices in Paris controlled by a council of 33 (10 of them British) until 1956 when it was forcibly nationalized by Pres. Nasser. It was blocked by Egypt during the Arab-Israeli war (1967) and subsequently kept closed. Length (incl. dredged approach channels) 103 m.; minimum width 197 ft., average depth 34 ft.

SUFFOLK. An eastern county of England. It has a low undulating surface, and a flat coastline. Most is under plough, producing barley, wheat, and sugar

SUFFOLK. The garden of the birthplace of artist Thomas Gainsborough at Sudbury, now preserved as a museum and containing a number of his landscapes and portraits.

Courtesy of Gainsborough's House Society

beet. It is noted for its horses (S. Punches), formerly much used in agriculture. The principal rivers are the Waveney, Alde, Deben, Orwell, and Stour; part of the Broads (q.v.) is in S., which is divided admin. into East S. (cap. Ipswich) and West S. (cap. Bury St. Edmunds). Ipswich is the co. town. Area 1,482 sq. m.; pop. (1967) 531,430.

SUFISM (sōō'fizm). Mohammedan religious movement which rejected ritual and sought a return to primitive simplicity. It originated in Persia, was influenced by Neoplatonism, and coloured the thought of Hafiz, Sadi, Omar, and other Persian writers. Sufi doctrines are a kind of mystical pantheism.

SUGAR. A substance that, in one or another form, occurs in many plants as they approach maturity. It most commonly occurs in fruits, but the sugar of commerce is derived chiefly from the stems of the sugar cane or the roots of the S. beet. S. cane (*Saccharum*) is native to S.E. Asia, but is now cultivated in many tropical and sub-tropical lands. It grows to 6 or 12 ft. in height and 1½ in. in thickness. S. beet (*Beta*) is a root crop of temperate regions, and was first cultivated in England about 1909.

SUHARTO (1921–). Indonesian general. Anti-Communist, he became army commander 1965, and in 1966 ousted Sukarno, himself becoming chairman of the presidium. He ended confrontation with Malaysia.

SUICIDE. Self-murder. In English law it was until 1960 a criminal offence if committed while of sound mind: technically a felony (*felonia de se*) it was at one time punished by confiscation of the S.'s goods and until 1823 burial was at night, without burial service, and with a stake through the heart. Hence the frequency with which the coroners' juries often found a verdict that the S. committed the act while insane.

SUKARNO (soo'-), Achmed (1901–). Indonesian statesman. B. nr. Surabaja, son of a schoolmaster, he took part in the nationalist movement before the S.W.W., co-operated in the native administration set up by the Japanese during their occupation, and became pres. of the Indonesian Rep. set up in 1945. He became P.M. 1959 and was created head of state for life 1963, but was deprived of the premiership 1966 and of the life presidency 1967 by Suharto (q.v.).

SUKKUR (sookoor'). Town and river port in W. Pakistan, on the lower Indus, with railway workshops. The Lloyd Barrage (1923–32), sometimes called the S. Barrage, lies 2 m. W. Pop. (1961) 103,216.

SULAWESI. Another form of CELEBES.

SULGRAVE. English village in Northants, 2½ m. N.W. of Helmdon. S. Manor, ancestral home 1539–1610 of George Washington's family, was presented in 1914 to the S. Institute and opened as a Washington Museum. See illus. p. 793.

SULLA, Lucius Cornelius (138–78 B.C.). Roman soldier and statesman. He distinguished himself in the Jugurthine, Teutonic, and Social wars, and became the leading figure in the senatorial party. After forcibly suppressing the democrats in 88, he successfully waged war on Mithradates of Pontus. During his absence the democrats seized power, but on his return in 82 he captured Rome and massacred his opponents. Declared dictator, he carried out constitutional reforms, strengthening the senate.

SULLIVAN, Sir Arthur Seymour (1842–1900). British composer. B. in London, he became a choirboy at the Chapel Royal, and studied at Leipzig. He composed oratorios, but became famous for the light operas written in collaboration with Sir W. S. Gilbert (q.v.). These incl. *H.M.S. Pinafore* (1878), *The Pirates of Penzance* (1879), *Patience* (1881), *The Mikado* (1885), *The Yeoman of the Guard* (1888), and *The Gondoliers* (1889), and have achieved a deservedly lasting popularity. The partnership broke down owing to temperamental incompatibility. S. also wrote the serious opera *Ivanhoe*, the ballad 'The Lost Chord', etc.

SULLY (sūlē), Maximilien de Béthune, duc de

TABRIZ. The Shah Goli Lake. Courtesy of the Iranian Govt.

tribes; the *Historiae*, a history of the empire from Galba to Domitian (69–97), and the *Annales*, reaching from Tiberius to Nero. He is famed for the succinct compression of his style.

TACNA. City of S. Peru, cap. of T. dept. Near T., Chile in 1880 defeated a combined Peruvian-Bolivian army and occupied T. until 1929. Pop. (est.) 17,000.

TACOMA. Port of Washington state, U.S.A. Founded 1868, it became important through its choice as the terminus of the N.P.R. (1873). Pop. (1960) 147,979. T. is also another name for Mt. Rainier.

TADEMA. See ALMA TADEMA.

TADZHIK (tahjik') S.S.R. Asiatic rep. of the U.S.S.R., separated on the S. from Afghanistan and China by the Amu-Darya r. The cap. is Dushambe. T. incl. the highest peak in the U.S.S.R. (24,000 ft.), in the Pamir Plateau. With the help of artificial irrigation, cotton, fruits, and other crops are grown; lead, zinc, radium, mica, sulphur are among minerals worked. T. was admitted to the Union in 1929. Area 55,000 sq. m.; pop (1967) 2,654,000.

TAFUWA-BALEWA. Alhaji Sir Abubakar (1912–66). Nigerian statesman. Entering the House of Representatives in 1952, he was Min. of Works (1952–4) and of Transport (1954–7). In 1957 he became P.M. of the Fed. of Nigeria, but was abducted and assassinated in the *coup d'état* of Jan. 1966.

TATFETA (Persian *tafta*, twisted). Light plainly woven silk fabric with a high lustre; the term may be applied to silk and wool mixtures, etc.

TAFFRAIL. See DORLING, H. T.

TAFT, William Howard (1857–1930). 27th President of the U.S.A. B. at Cincinnati, he was Secretary of War 1904–8, and was elected president in 1908 as a Republican. He was defeated in the election of 1912, and served as chief justice of the Supreme Court, 1921–30. His son, Robert T. (1889–1953), a Republican senator from 1939, was a candidate for the presidential nomination in 1940, 1944, 1948, and 1952, and was sponsor of the T.-Hartley Labor Act of 1947 (bitterly opposed by organized labour).

TAGANROG. Port of the R.S.F.S.R., on T. Gulf, an arm of the Sea of Azov. T. is icebound in the winter. It makes metal goods, aircraft, machinery, shoes. Russia annexed it 1769. There is a museum devoted to Chekhov who was b. at T. Pop. (1967) 238,000.

TAGLIONI (tahlyō'nē), Maria (1804–84). Italian dancer. She was particularly successful in *La Sylphide*, composed by her father, and was noted for her ethereal grace.

TAGORE (tagōr'), Sir Rabindranath (1861–1941). Indian writer. B. in Calcutta, in 1901 he estab. the 'Abode of Peace', a school which developed into an international univ. His translations of his collection of lyrics *Gitanjali* and his verse play *Chitra* brought

him world fame, and in 1913 he received a Nobel prize. An ardent social reformer and nationalist, in 1919 he resigned the knighthood he had received in 1915 in protest against British repression. His nephew Abanindranath T. (1871–1951) was the father of modern Indian painting. He drew his subjects from Indian history and mythology. Abanindranath's elder brother Gaganendranath T. (1867–1938) was also a gifted artist.

TÁGUS. River which rises in Spain, in the mountains of Albarracín, and flows through Portugal to the Atlantic at Lisbon: it is 566 m. long, longest river in the Iberian peninsula. The Salazar Bridge (1966) linking Lisbon and Almada is the longest suspension bridge in Europe. The T.-Segura Project (1968) is planned to channel water c. 150 m. to the Murcia. Alicante region in the rainless south, where c. 500,000 acres will be irrigated to produce early fruit and vegetables for the European market.

TAHITI (tahē'ti). Largest of the Society Islands, part of Fr. Polynesia. T. was visited by Captain Cook (1769) and by Bligh of the *Bounty* (1788). T. came under French protection in 1843, becoming a colony in 1880. Papeete is the cap. Area 402 sq. m.; pop. (1962) 45,430.

TAINÉ (tān), Hippolyte Adolphe (1828–93). French critic and historian. He was appointed prof. at the École des Beaux Arts, in 1864. In his critical writings, e.g. *History of English Literature* (1863) and *Philosophy of Art* (1865–9), he analyses literary works as the products of period, race, and environment. He also pub. *Origins of Contemporary France*.

TAIT, Archibald Campbell (1811–82). British churchman. B. in Edinburgh, he was headmaster of Rugby 1842–8, and became bp. of London in 1856, and archbp. of Canterbury in 1868. His attempt to suppress ritualism through the Public Worship Act (1874) aroused much opposition.

TAIWAN (tiwahn'). Chinese name of FORMOSA.

TAIYUAN (tiyoo-ahn'). Walled cap. of Shansi prov., China, on the Fen-ho, seat of Shansi univ. It makes iron and steel goods, cotton textiles, agricultural implements, etc. Pop. (1957) 1,020,000.

TAJ MAHAL (tahzh mahahl'). See AGRA.

TAKAO (tahkow'). Japanese name of KAOHSIUNG. **TAKORA'DI.** Port in Ghana, W. Africa. The harbour, opened in 1928, is the only deep harbour between Sierra Leone and Nigeria. Pop. (1960) 41,000.

TALavera DE LA REINA (tahlahvā'rah dā lah rā'ēnah). Town of central Spain, on the Tagus, 75 m. S.W. of Madrid. In 1809 Wellesley defeated the French here. Pop. (est.) 24,000.

TALBOT, William Henry Fox (1800–77). British photographic pioneer. His development of the talbotype method (1839–41)—contemporary with Daguerre's experiments—laid the foundation of modern photography; he also made instantaneous photographs in 1851 and photo engravings in 1852.

TALC. A magnesium silicate, $3MgO.4SiO_2.H_2O$, occurring in crystals, but the massive form known as steatite or soapstone is more common. French chalk and potstone are varieties of T. It is used in cosmetics, for lubricants, and as a filler in paper manufacture.

TALIEN. Another form of DARIEN.

TALLAHASSEE. Cap. of Florida, U.S.A., c. 160 m. W. of Jacksonville, centre of an agricultural and lumbering area, seat of Florida state univ. T. dates from 1824; De Soto discovered an Indian settlement on the site in 1539. Pop. (1960) 48,174.

TALLCHIEF, Maria (1929–). American dancer. Dau. of an Osage Indian chief and a mother of Scots-Irish descent, she trained as a concert pianist as well as a dancer. A pupil of Nijinska, she was m. 1946–51 to Balanchine, appearing in his ballet *Firebird*. In 1957 she became première danseuse étoile at the Paris Opéra.

TALLEYRAND-PÉRIGORD (tahlērahōn'-pārēgōr').

(1560–1641). French statesman. He served on the Huguenot side during the Wars of Religion, and as Henry IV's superintendent of finances 1598–1611 contributed greatly to France's recovery.

SULLY-PRUDHOMME (-prüdöm'), Armand (1839–1907). French poet. B. in Paris, he wrote philosophical verse showing psychological insight. *Les Solitudes*, *Les Vaines Tendresses*, *La Justice*, and *Le Bonheur* are outstanding.

SULPHA DRUGS. Sulphonamides; synthetic Ds. allied to the aniline dyes, which prevent certain bacteria from multiplying, used in the prevention and treatment of childbirth fever, pneumonia, and wound infection.

SULPHUR. Known from ancient times, it is a pale yellow, odourless, brittle solid; insoluble in water, soluble in carbon disulphide and a good electrical insulator; symbol S, at. wt. 32.066, at. no. 16. Widely distributed as the element in volcanic regions, and as sulphides of many metals. There are two crystalline forms and an allotropic plastic form. It is essential to life, resembles oxygen chemically and can replace this element to form innumerable organic and inorganic compounds. It is widely used in the manufacture of sulphuric acid and in chemicals and explosives, matches, fireworks, dyes, fungicides, drugs, etc., and in vulcanizing rubber, particularly for tyres.

SULPHURIC ACID (H_2SO_4) or Oil of Vitriol. A colourless, oily liquid, used in the manufacture of hydrochloric acid, nitric acid, explosives, coal-tar derivatives, and in many industrial processes.

SULPICIANS. Order of R.C. priests founded c. 1645 by the Abbé Olier to train aspirants to the Church, and named after the parish of St. Sulpice, Paris, where they originated.

SUMATRA (soomah'tra). Largest island of Indonesia. E. of a longitudinal mountain range is a

SUMATRA. Largest of Sumatra's numerous mountain lakes is Lake Toba, 15 m. wide and 45 m. long, with its island Pulau Samosir. Beautiful gardens, such as those seen here, lie along its shores. Courtesy of Indonesian Embassy.

wide plain; both are heavily forested. The chief products are rubber, rice, tobacco, tea, timber, tin, and petroleum. Important towns are Palembang, Padang, Benkulen. In the late 16th cent. the Dutch estab. trading posts. Area 165,000 sq. m.; pop. (1967) 18,300,000.

SUMERIANS. A people possibly akin to the Dravidians of India, who inhabited S. Babylonia from c. 4000 B.C., and founded Babylonian culture.

SUMMERSKILL, Edith, baroness (1901–). British Labour politician. B. in London, she was ed. at King's Coll., London, and Charing Cross Hospital, qualifying as a doctor in 1924, and m. the next year Jeffrey Samuel, a general practitioner. Entering parliament in 1938, she was Min. of National Insurance 1950–1, and became known as a redoubtable fighter for women's rights and an opponent of boxing, e.g. *The Ignoble Art* (1956). Her *Letters to my Daughter*

(1957) were to Shirley S. (1931–), who took her mother's surname, also a doctor and from 1964 Labour M.P. In 1961 she was created a life peeress.

SUMMER TIME. The practice introduced in the U.K. in 1916, whereby legal time from spring to autumn is an hour in advance of Greenwich mean time. It was permanently in force Feb. 1940–Oct. 1945 and from Feb. 1968. Double S.T. (2 hours in advance), was in force 1941–5 and 1947. See TIME.

SUMMONS. Legal term denoting the citation to appear in court on a certain date, which is served on a person by an official, and which states the claim made by the plaintiff.

SUN. The star around which the Earth revolves. It is 864,000 miles in diameter, and lies at a distance of

just under 93,000,000 miles. Like all stars, it is composed of intensely hot gas; hydrogen is a major constituent. The surface temperature is 6,000°C., and the central temperature between 12,000,000° and 15,000,000°C. It produces its energy by nuclear reactions, resulting in the conversion of hydrogen into helium with a steady loss of mass amounting to 4,000,000 tons per second.

Telescopically, the S. is seen to show various dark patches, known as sunspots. These are cooler areas (around 4,000° C.), and are relatively short-lived, though they may become very large. Associated with spot-groups are the bright patches termed *faculae*. The S. shows semi-regular cycles of activity, with maxima occurring about every 11 years. At solar maxima, spot-groups are very frequent, whereas at solar minima the disc may be entirely clear for several days consecutively.

With spectroscopic equipment it is possible to examine the *prominences*, masses of glowing hydrogen rising from the S.'s bright surface or *photosphere*, as well as the short-lived but violent outbreaks known as *flares*, usually associated with spot-groups. Only during a total eclipse may prominences be seen with the naked eye. This also applies to the outer surround or *corona*, composed of highly tenuous gas at a remarkably high temperature.

Modern astronomers regard the S. as a dwarf star and certainly it is in no way exceptional in the Galaxy. Since it possesses a system of planets, there is no reason to doubt that other stars have planetary systems of their own.

SUNBURY-ON-THAMES. English market town and boating centre (U.D.) in Surrey. 17 m. S.W. of London, with petroleum-research laboratories opened 1962. Formerly in the admin. co. of

SUN. These solar prominences were photographed during the total solar eclipse of 1932. Spectroscopic instruments enable the prominences to be studied at any time, but only during a total eclipse are they visible to the naked eye.

Courtesy of Lick Observatory
Univ. of California

Charles Maurice de (1754–1838). French statesman. B. in Paris, he was bp. of Autun, 1789–91. He was a supporter of moderate reform, but fled to the U.S.A. during the Terror. Returning to France in 1796, he served as For. Min. under the Directory 1797–9, and under Napoleon 1799–1807. He represented France at the Congress of Vienna 1814–15, and was ambassador to London 1830–4.

TALLIN. Seaport and cap. of the Estonian S.S.R. on the Gulf of Finland, with a fine harbour closed by ice for 3 months every year. It has a univ., and a castle dating from the 13th cent. Founded 1219 as Reval, it was a Hansa town, passed to Sweden 1561, to Russia 1750. Pop. (1967) 340,000.

TALLIS, Thomas (c. 1505–85). English organist and composer. He was organist at Waltham Abbey until 1540, and with his pupil Byrd was joint organist at the Chapel Royal from 1572. T. wrote masses, anthems, and much other church music.

TALMA (tahlmah'), François Joseph (1763–1826). French tragic actor. He made his début in 1787, and advocated realism in scenery and costume.

TALMUD (late Heb. for 'teaching'). Chief work of Jewish post-Biblical literature, based on the *Mishnah*. To this was added the *Gemara*, discussions centring on its texts, during the 3rd and 4th cents.

TAMARIND. Species of tropical tree (*Tamarindus indica*) in the family Leguminosae. An evergreen, it has pinnate leaves, reddish-yellow flowers, followed by pods, the pulp of which is used medicinally.

TAMARISK. Genus of shrubs (*Tamarix*), which flourish in warm, salty, desert regions where no other vegetation is found. The common T. or salt cedar (*T. gallica*) has evergreen, scale-like leaves and spikes of very small, pink or white flowers. See MANNA.

TAMATAVE (tahahtahv'). Chief port of Madagascar, on its E. coast. Pop. (1965) 49,400.

TAMBOURINE (tam'boorēn). Musical instrument of ancient origin, almost unchanged since Roman times. A shallow drum with a single skin and loosely set jingles which increase its effect.

TAMBO'V. Cap. of T. region, R.S.F.S.R., on the Tsna in the black-earth area, with flour mills, distilleries, railway workshops, artificial-rubber factories, etc. Pop. (1967) 206,000.

TAMERLA'NE or Timur i Leng (1336–1405). Mongol conqueror. B. in Turkestan, he made himself ruler of Samarkand in 1369, conquered Persia, Azerbaijan, Armenia, and Georgia, and broke the power of the Golden Horde. In 1398–9 he invaded the Punjab and sacked Delhi; he then invaded Syria and Asia Minor, and captured the sultan at Angora.

TAMIL. Chief of the Dravidian languages; spoken by c. 18 million in S. India and Ceylon.

TAMIL NADU. See MADRAS.

TAMMANY HALL. Democratic Party organization in New York. It originated in 1789 as the Society of St. Tammany, named after a Red Indian chief. Dominant from 1800 till the 1930s, it gained a reputation for gangsterism and corruption: La Guardia (q.v.) and John Lindsay (1965) were the only Rep. mayors.

TAMMUZ. Sumerian vegetation deity, who died at midsummer and was brought back from the underworld in spring by his lover Ishtar. His cult spread over Babylonia, Syria, Phoenicia, and Palestine. In Greek mythology T. appears as Adonis.

TAMPA. City, port, and resort on the W. coast of Florida, U.S.A., famous for its cigars; it also has fruit and vegetable canneries, shipyards, and factories making boxes, fertilizers, clothing, etc. Pop. (1960) 274,970.

TAMPERE (tahm'pārā). City of Finland between Lakes Näsä and Pyhä, important industrially (textiles, paper, shoes, turbines, etc.). Pop. (1967) 147,340.

TAMPICO (tahmpē'kō). Port and air port of Mexico, on the Pánuco, 6 m. from the Gulf of Mexico. It is surrounded by oilfields. Pop. (1967) 147,700.

TAMWORTH. English market town (bor.) in Staffs on the Tame, 15 m. N.E. of Birmingham. Clothing and paper are manufactured. It was once the cap. of Mercia. Pop. (1961) 13,555. Another T. is a township of N.S.W., Australia, a railway and dairying centre. Pop. (1966) 21,682.

TANA (tah'na). Lake of Ethiopia, the source of the Blue Nile, at a height of c. 6,000 ft. Area c. 1,400 sq. m.

TANABATA. The Japanese 'star festival' celebrated annually on the night of 7 July. It is dedicated to Altair and Vega, 2 stars in the constellation Aquila, who are united once yearly in the Milky Way, according to legend, and represent 2 star-crossed lovers allowed by the gods to meet on that night. Of Chinese origin, T. was introduced to Japan in the 8th cent.

TANAGER (tan'ajer). Family of birds (*Tanagridae*) similar to finches. Found in Central and S. America, they all have brilliant plumage.

TANAGRA. City of ancient Greece, in E. Boetia, where Spain defeated Athens, 457 B.C. Many terracotta statues and statuettes were excavated towards the end of the 19th cent.

TAN'ANARIVE. Fr. form of ANTANANARIVO.

TANGA. Seaport in Tanganyika, E. Africa, on T. Bay, 75 m. N. of Zanzibar. Pop. (1968) 61,000.

TANGANYIKA (-yē'ka). See TANZANIA.

TANGERINE (-nj-). A type of orange (*Citrus nobilis*) similar to a mandarin.

TANGIER (tanjēr'). Seaport and largest commercial city in Morocco, on the Straits of Gibraltar.

Taken by the Portuguese in 1471, it passed to England in 1662 as part of the dowry of Catherine of Braganza, but was abandoned in 1684, becoming later a centre of Barbary pirates. A convention signed 1923, effective 1925, made T. and c. 225 sq. m. behind it an international zone. Spain administered it 1940–5; in 1956 it was restored to independent Morocco. Pop. (1965) 166,290.

TANGIER. The old Casbah.
Courtesy of British European Airways.

TANGO. A slow dance of African origin, in 2–4 time, resembling the Spanish Habanera.

TANGSHAN. Industrial city in Hopei prov. 65 m. N.E. of Tientsin. It makes steel, pottery, cement, etc., and has a power plant based on local coal. Pop. (1957) 800,000.

TANIZAKI, Junichirō (1886–1965). Japanese novelist. B. in Tokyo, son of a family of printers, he was ed. at Tokyo Imperial Univ. His earlier work has a melodramatic and lurid quality, but after the earthquake of 1923 he moved to the Kyoto-Osaka region where ancient tradition is stronger, and his genius flowered. His books incl. a modernized version of *The Tale of Genji* (1939–41), *The Makioka Sisters* (3 vols., 1943–8), and *The Key* (1956). See illus. p. 593.

TANK. Originally a code name given to the first successful tracked armoured fighting vehicle used in the battle of the Somme in 1916. A T. consists of a body or hull of thick steel, on which are mounted

Middlesex, it was excluded from Greater London and transferred to Surrey 1964-5. Pop. (1961) 33,403.

SUNDA ISLANDS. Name given to the islands of Indonesia W. of the Moluccas. The Great S.I. incl.

SUNDA ISLANDS. On the island of Flores, erosion has created this strikingly barren landscape about 1,200 ft. above sea-level on Mt. Inerie. In spite of the cold, herds of wild horses flourish. Courtesy of Indonesian Embassy.

Sumatra, Java, Borneo, Celebes, and Billiton; the Lesser S.I., Bali, Lombok, Sumbawa, Flores, Sumba, Timor.

SUNDAY. The first day of the week and, in the Christian world, the day set apart for divine worship (in memory of Christ's resurrection), thus replacing the Jewish sabbath. In the U.K. labour, the sale of certain goods, and other activities were regulated by law from medieval times, most notably the Sunday Observance Acts of 1625 and 1780 - infringements continuing to be opposed in the 20th cent. by the Lord's Day Observance Society - but under the Sunday Entertainments Bill (1969) curbs on sports, theatres and dancing were to be lifted, introducing the 'Continental Sunday'. In the U.S.A. similar laws to those of England were general in colonial times, but subsequent enforcement has been lax.

Sunday Schools, of which the 1st was estab. at Gloucester, England, by Robert Raikes in 1780, were valuable originally, not merely as sources of religious instruction, but as enabling the poorest children to learn to read and write before the introduction of free day schools. The movement passed to the U.S.A. early in the 19th cent. and still continues, although the tendency is to replace them by special services for the young or combined family worship.

SUNDERLAND, Robert Spencer, 2nd earl of (1640-1702). British politician. He became James II's Sec. of State, and embraced Catholicism. He fled to Holland in 1688, but returned in 1691 and re-entered politics as a Whig. On his advice William III adopted the system of choosing the govt. from the dominant party in the Commons.

SUNDERLAND. English seaport and industrial town (co. bor.) in co. Durham, at the mouth of the Wear, 14 m. N.E. of Durham. Although shipbuilding is a long-established industry, S. owes its growth to coal-mining. There is a polytechnic (1969) and civic theatre - the S. Empire. Pop. (1961) 189,629.

SUNDEW. See INSECTIVOROUS PLANTS.

SUNDIAL. An instrument for measuring time by means of a shadow cast by the sun. It consists of a dial-plane marked with the hours, and a style or gnomon from which the shadow is cast. The style is parallel to the earth's axis, and points to the N.

SUNDSVALL (soonds'vahl). Seaport with timber and wood-pulp industries in the Västernorrland district of Sweden on the Gulf of Bothnia, 260 m. N. of Stockholm. Pop. (1960) 29,355.

SUN-FISH. Large fishes (*Orthogoriscus* and *Ranzania*) distributed throughout temperate and

tropical seas. The body is compressed and almost circular. The rough S. (*O. mola*) is about 7 ft. long and sometimes appears in British waters.

SUNFLOWER. Genus of plants (*Helianthus*) in the family Compositae. The common S. (*H. annuus*) is a native of N. America, grows to c. 15 ft. in favourable conditions, and is commercially cultivated in central Europe and the U.S.S.R. for the oil-bearing seeds which follow the yellow-petalled flowers.

SUNNIS. Followers of the Sunni rite, the more orthodox of the 2 main divisions of Islam (q.v.) and predominant in most Islamic countries except Persia. The name derives from the *Sunna*, a book of rules inspired by Mohammed.

SUNSPOT. See SUN.

SUNSTROKE. Illness resulting from the action of strong sunlight on brain cells, partly through the scalp and back of the neck, but chiefly through the eyes. It is therefore preventable by the wearing of tinted glasses and a thick hat, even in the tropics.

SUN YAT-SEN (1867-1925), Chinese statesman. The son of a Christian farmer, he founded the Kuomintang party in 1894. After many years in exile he returned to China during the 1911 revolution, and was provisional pres. of the rep. in 1912. When the reactionaries obtained control he estab. a republican govt. at Canton in 1921, in which he was proclaimed pres. His '3 people's principles' of nationalism, democracy, and social reform are accepted by both the Kuomintang and the Chinese Communists. His widow Soong Ching-ling (1890-), ed. in U.S.A., remained influential in Chinese politics, being Vice-Chairman of the Rep. from 1959, but was under attack in 1967 in the Cultural Revolution.

SUPERCONDUCTIVITY. The phenomenon of S., discovered by Kamerlingh Onnes in 1911, is exhibited by some metals and metallic compounds whose resistance decreases uniformly with decreasing temperature until at a critical temperature (the superconducting point), within a few degrees of the absolute zero, the resistance suddenly falls to zero. In this superconducting state an electric current induced by a magnetic field in a closed circuit or ring of the material will continue after the magnetic field has been removed, so long as the material remains below the superconducting point. Important industrial applications of this phenomenon are being actively explored. See CRYOGENICS.

SUPERIOR, Lake. The largest freshwater lake in the world, one of the Great Lakes of N. America. Two-thirds lie in the U.S.A., the rest in Canada. It discharges via the St. Mary into Lake Huron. Area 31,820 sq. m.; greatest depth 1,333 ft.

SUPERNOVA. A stellar explosion on a vast scale, when a formerly obscure star suffers a cataclysmic outburst during which it blows most of its material away into space. For a brief period, perhaps a few weeks, the S. emits millions of times as much radiation as the Sun. Only 3 supernovae have been observed in our Galaxy since the year A.D. 1000, though supernovae have been frequently detected in external galaxies.

SUPERSONIC SPEED. Speed greater than that of sound, which at sea-level is about 760 m.p.h. and decreases with altitude until at 40,000 ft. it is only 660 m.p.h.; above that it remains constant. The first airman to achieve S.S. was Englishman Squadron Leader John Derry in a De Havilland 108 research aeroplane on 6 Sept. 1948, in a 35 min. flight: at 30,000-40,000 ft. he dived steeply and reached a speed of about 675 m.p.h.

When an aircraft exceeds the speed of sound (passes the sound barrier) shock waves are built up round the aircraft giving rise to a sonic boom, often heard at ground-level. Supersonic flight with its attendant complexities developed from the 1960s. See SPEED RECORDS.

machine guns and a larger gun. The hull contains the crew (usually consisting of a commander, driver, and 2 or 3 men), engine, wireless, fuel tanks, ammunition, etc. The T. travels on endless bands, or 'tracks', to traverse rough terrain. See SWINTON, SIR ERNEST.

TANKER. Ship with a tank for carrying mineral oil, liquefied gas, molasses, etc. in bulk. They may be of great size, the largest having a gross tonnage of over 300,000, and being more than 1,100 ft. long.

TANNENBERG (tahn'nenberg). Village in Polish-occupied E. Germany where in 1410 the Poles and Lithuanians defeated the Teutonic Knights, and in 1914 Hindenburg defeated the Russians.

TANNIC ACID or Tannin ($C_{14}H_{10}O_6$). Astringent substance occurring in gall nuts, tree barks, and roots, fruits, etc. Its most important property is that of precipitating gelatin to give an insoluble compound, used in the manufacture of leather from hides.

TANNU-TUVA. See Tuvu.

TANSY. Perennial plant (*Tanacetum vulgare*) in the family Compositae, found in Europe and naturalized in N. America. The heads of yellow flowers grow in clusters, and the deeply indented leaves are used in cooking for their bitter flavour.

TANTALUM. Bluish-white metal, ductile and malleable, and resembling platinum when polished: symbol Ta, at. wt. 180.95, at. no. 73. Discovered in 1802 by Ekeberg, it occurs chiefly in the mineral tantalite. T. can be drawn into wire with a very high melting point and great tenacity (useful for filament lamps subject to vibration), and is used in alloys; for corrosion-resistant laboratory apparatus and chemical equipment; as a catalyst in the manufacture of synthetic rubber; in tools and instruments; as a getter in vacuum technique; and in rectifiers and capacitors. T. carbide is an important abrasive.

TANTALUS. In Greek mythology, a king who was punished in the underworld for his crimes by being tormented with hunger and thirst.

TANZANIA. United Rep. of. Country in E. Africa, formed in 1964 by the union of Tanganyika and Zanzibar (q.v.).

The narrow coastal plain of Tanganyika rises to an extensive plateau, with Kilima-njaro to the N. and the Livingstone Mts. (over 9,000 ft.) to the S.W.; parts of Lakes Victoria and Tanganyika are also incl. The climate is equatorial, and sisal, coffee, cotton and timber are produced: minerals incl. diamonds, gold, tin and mica. The Tanzam Highway (1,000 m.) links the Cambian copperbelt with Dar-es-Salaam, which is the cap of both T. and Tanganyika: other important towns in the latter are Tanga and Tabora. During the F.W.W. Tanganyika (formerly part of Ger. E. Africa) was conquered by Britain, under whom it became a League of Nations mandate 1921, changed to U.N. trusteeship 1946. Given independence 1961, it remained as a rep. within the Brit. Commonwealth 1962, as did T. on its formation 1964. Area of T. 363,700 sq. m. (of Tanganyika 362,680); pop. (1967) 12,231,342 (of Tanganyika 11,876,982).

TAOISM (tow'-izm or tah'-ō-izm). Chinese philosophical system and religion, said to have been founded by Lāo Tze probably in the 4th cent. B.C. Tao, meaning 'road' or 'way', denotes the hidden Principle of the Universe. Less stress is laid on doing good deeds than on the avoidance of all positive action. Later Lāo Tze was deified, forming one of the trinity of the Three Pure Ones, and many other spiritual beings were worshipped. The chief text is the *Tao Tē Ching*, attributed to Lāo Tze; Present-day T. is largely a popular system of magic.

TAPE RECORDER. Instrument for recording electrical signals on a layer of iron oxide, coated on to thin plastic tape. The electrical impulses are fed to the electromagnetic recording head, which magnetizes the tape in proportion to the frequency and amplitude of the original signal.

TAPE RECORDER. General view of the Ampex VR 2000 video tape installation at the B.B.C. Television Centre, which records both sound and vision. Courtesy of the B.B.C.

For playback, the tape is passed over (the same or) another head to convert magnetic into electrical impulses, which are then amplified for reproduction. The higher the frequency to be recorded the faster the tape must be passed over the heads. Typical speeds are: 1½ in./sec. (speech); 3½ and 7½ in./sec. (domestic music recording); 15 and 30 in./sec. (professional music recording); and up to 400 in./sec. for radio frequencies.

TAPESTRY. Ornamental textile used for wall-hangings, furniture, and curtains. The T. design is threaded into the warp, and various shades of wool are used. Many ancient peoples made Ts., and during the Dark Ages the art was practised in the monasteries. European Ts. of the 13th cent. were frequently ornamented with oriental designs brought back by the Crusaders. The great European centres of T. weaving were at Arras, Brussels, Aubusson, Beauvais, and Mortlake. The Gobelins T. factory of Paris was made a royal establishment in the 17th cent. In England, William Morris estab. the Merton Abbey looms in 1877. Many fine Ts. are still made in France. See illus. of Coventry Cathedral.

TAPE-WORM or Cestode. Flat parasitic worm with no digestive organs. They have a complicated life-history, and usually reach man within imperfectly

TAPESTRY. Detail of the three figures of the Trinity from 'The Seven Days of Creation', one of a set of 16th century tapestries in silk and wool on the Redemption of Man. Once in the treasury of the cathedral of Toledo, they were given to the M. H. de Young Museum by the William R. Hearst Foundation. Courtesy of the M. H. de Young Memorial Museum, San Francisco.

SUPRARENAL GLANDS. See ADRENAL GLANDS.

SUPREMATISM. Abstract-art movement founded in 1913 by the Russian painter Malevich, who expressed its aim as 'the supremacy of pure feeling or perception in the pictorial arts—the experience of non-objectivity'.

SUPREME COURT. The highest judicial tribunal in the U.S.A., composed of a chief justice (Warren Burger from 1969), and 8 associate justices. Vacancies are filled by the pres. and members can be removed only by impeachment. See LAW COURTS.

SÜR. Arabic name of TYRE.

SURABAYA (soorabah'ya). Chief port of Indonesia, cap. of E. Java prov., on the N. coast of Java. It is an important naval and military base, with ship-building yards; also a centre of the petroleum industry. Pop. (1967) 1,007,945.

SURAJ-UD-DOWLAH (soorahj ood dow'lah). See BLACK HOLE OF CALCUTTA and PLASSEY.

SURAT (soorah't'). City in Gujarat state, India, 167 m. N. of Bombay, at the mouth of the Tapti, site of the 1st E. India Co. factory in India (1612). Cotton and silk are woven. Pop. (1961) 288,026.

SURGERY. The art of treating bodily injuries or disorders by manual means—traditionally the knife. During the S.W.W. plastic surgery was greatly advanced, and more recent developments incl. operations on heart, lung and kidney, using artificial equipment as substitute organs and, increasingly during the 1960s, using organs from live or dead donors—transplant S.: see HEART. Instruments are more varied—in addition to the scalpel and electric cautery, beamed high-energy ultrasonic waves may be used, and the intense light energy of the laser may prove surgically useful.

SURINAM. Country in the N. of S. America, between Guyana and French Guiana, also chief r. of the country at the mouth of which stands the cap. Paramaribo. Sugar, coffee, rice, bananas, and other tropical crops are grown; bauxite is the chief mineral product. Founded as a colony by the English (1650), S. became Dutch in 1667, and under the constitution of 1954 became an autonomous part of the kingdom of the Netherlands; the sovereign is represented by a gov. who is assisted by a ministry, an advisory council, and an elected legislative council. Area 55,143 sq. m.; pop. (1967) 350,000.

SUPERNOVA IN NGC 7331. In the upper picture a supernova is shown; in the lower picture it is not. This supernova, in a remote galaxy, shone millions of times more brightly than the Sun when at its maximum. The surrounding stars are foreground stars belonging to our own galaxy.
Courtesy of Lick Observatory, Univ. of California.

SURREALISM. Art movement which developed from Dadaism, and was founded c. 1924, when André Breton issued its first manifesto. It repudiated all aesthetic values, and derived a great deal from Freudian theories. The movement spread to poetry and had an influence on photography, the film, commercial art, and stage scenery. Its leading exponents incl. Salvador Dali, Hans Arp, Giorgio de Chirico, and others—e.g. Picasso, Henry Moore, and Edward Burra—were influenced by it.

SURREY, Henry Howard, earl of (c. 1517–47). English poet. The son of the 3rd duke of Norfolk, he served in France 1544–6, and was executed on a poorly based charge of high treason. He shared with Wyatt the honour of introducing the sonnet to England, and through his translation of the *Aeneid* pioneered the use of blank verse.

SURREY. A southern co. of England. The chalk North Downs span the county from Farnham in the W. to Caterham in the E., the Wey and Mole flowing N. through 2 gaps into the Thames. Market-gardening and agriculture are carried on. Guildford is the co. town, although co. hall and the assizes are at Kingston upon Thames. Under the reorganization of the London Govt. Act (1963) S. lost considerably both in pop. and rateable value by the incorporation of its metropolitan areas in the new Greater London. Area 650 sq. m.; pop. (1967) 985,930.

SURTEES, Robert Smith (1803–64). British sporting novelist. He created Jorrocks, a sporting grocer, and in 1838 pub. *Jorrocks's Jaunts and Jollities*.

SURVEYING. The art of determining the value of all descriptions of landed and house property and of the various interests therein; the practice of managing and developing estates and the science of admeasuring and delineating the physical features of the earth; the valuation, management, development and survey of mineral property and the measuring and estimating of artificer's work.

SURYA (soor'ya). In Hindu mythology the personification of the Sun.

SUSA (soo'sah). Port and commercial centre (French Sousse) on the E. coast of Tunisia. It has Roman remains. Pop. (1966) 82,666.

SUSLOV (soos'lof), Mikhail (1902–). Soviet politician. Joining the Communist Party in 1921, he headed the Cominform conference in 1948 which led to Yugoslavia's expulsion, was chief editor of *Pravda* 1949–50, and in 1956 was in charge of the suppression of the Hungarian revolt and in 1963 of the abortive negotiations with China. He is a member of the Presidium of the Supreme Soviet (1947) and of the Central Committee of the C.P.S.U., and as Party Sec. in 1964 indicted the Chinese leadership for offences against international Communism.

SUSSEX. A south-coast co. of England. The chalk South Downs extend eastward to Beachy Head, rising at Duncton Beacon to 837 ft. The rivers incl. the Arun, Adur, Ouse, and Rother. According to tradition, a Saxon chief Ella landed in what is now S. in 477, defeated the inhabitants, and founded the kingdom of the South Saxons which was absorbed by Wessex in 825. Among the historic remains are the earthwork at Cissbury; castles at Arundel, Pevensey, Hurstmonceux, Lewes, etc. S. is well wooded; root and cereal crops are grown; and cattle and sheep reared. Coast resorts, Brighton being the largest, range from Bognor Regis to Hastings. S. is divided administratively into E. and W., with their centres at Lewes and Chichester respectively; Lewes is cap. of the co. S. univ. (1961) is at Brighton. Area 1,457 sq. m.; pop. (1967) 1,173,730.

SUTHERLAND, Graham Vivian (1903–). British artist. B. in London, he studied at the Goldsmiths' School of Art, and in his early work was influenced by Blake and the Surrealists. After 1936 his style suddenly matured and broadened, and the detailed presentation

cooked meat or fish, causing anaemia and intestinal disorders.

TAPIO'CA. Perennial plant (*Manihot utilisima*) of tropical S. America. It contains a poisonous juice which is drawn off before the spindle-shaped root is prepared to make T.

TAPIR. Genus of ungulate mammals (*Tapirus*), having a short trunk, thick hairy skin, and 4 toes on the front and 3 on the hind feet. The 4 S. American species are black; the Malayan T. has white hindquarters.

MALAYAN TAPIR

TAR. A dark brown or black viscous liquid, obtained by the destructive distillation of coal, shale, wood, etc. From wood T., creosote and paraffin are produced. Ts. consist of hydrocarbons, acids, and bases. See COAL TAR.

TARA (tah'rah) **HILL.** Site in co. Meath, Rep. of Ireland, 507 ft., of a palace and coronation place of many kings of Ireland, abandoned in the 6th cent. St. Patrick preached at T.

TARANTO. Seaport and naval base of Apulia, S. Italy, on the Gulf of T., site of the ancient Greek Tarentum, founded by Sparta in the 8th cent. B.C. In 1940 the Brit. Fleet Air Arm sank or severely damaged 6 Italian naval vessels during a night air-transported attack. Its steelworks is part of the new industrial complex of S. Italy. Pop. (1961) 191,515.

TARANTULA. Poisonous spider (*Lycosa tarantula*) with a body 1 in. long, so named from its occurrence nr. Taranto in Apulia, Italy. It spins no web, relying on its speed in hunting. In the Middle Ages its bite was thought to cause hysterical ailments for which dancing was the cure, hence the dance named tarantella.

TARBES (tahrb). Cap. of Hautes-Pyrénées dept., S.W. France, a tourist centre for the Pyrénées. It belonged to England 1360-1406. Théophile Gautier and Marshal Foch were b. at T. Pop. (1962) 50,715.

TARE. Another name for VETCH (q.v.).

TARGUM (tah'gum). Collection of Aramaic translations, interpretations, and paraphrases of the O.T. The T. was not written down until c. A.D. 100.

TARIM (tah'rēm). A region of internal drainage in the Sinkiang prov. of China, between the Tien-shan and Kunlun mountains, watered by the Yarkand-Darya. Area 350,000 sq. m.

TARKINGTON. Booth (1869-1946). American novelist. B. in Indiana, he won popularity with his romantic *Monsieur Beaucaire* (1900), and realistic novels of the Middle West, *The Magnificent Ambersons* (1918) and *Alice Adams* (1921).

TARN (tahrn). Fr. river, rising in the Cévennes and flowing 220 m. to the Garonne.

TARO (tah'rō), Cocco or Eddoes. Names given to a plant (*Colocasia antiquorum*) of the family Araceae, native to the South Seas; the tubers are eaten.

TARPON. Large fish (*Megalops atlanticus*) found in the S. Atlantic. It grows to about 6 ft. long.

TARQUINIUS (tahrkwin'ius) **SUPERBUS.** The last king of Rome, who according to legend reigned 534-510 B.C., and was expelled following the violation of Lucretia by his son Sextus.

TARRAGONA. Port in Catalonia, Spain, 55 m. S.W. of Barcelona, cap. of T. prov., noted for its wine. T. has a cathedral and Roman remains, incl. a fine aqueduct. Pop. (1960) 44,000.

TARSHISH. A city mentioned in the O.T., prob-

ably the Phoenician settlement of Tartessus in Spain.

TARSIER. Small primate (*Tarsius spectrum*) intermediate on the evolutionary scale between lemurs and anthropoids. About the size of a rat, it has thick, light brown fur, very large eyes, and long feet and hands. Nocturnal and arboreal, it moves by leaping. It is found in the Malayan islands.

TARSIER

TARSUS. Town of Turkey, on the T. r., c. 10 m. from the sea. Cap. of the ancient Roman prov. of Cilicia, and famous as St. Paul's birthplace, it was a meeting place for Greek and Asiatic culture. Pop. (1965) 51,000.

TARTAN. A worsted cloth woven in a chequered pattern, consisting of stripes of different colours and widths crossing one another. T. kilts and plaids were worn by the Scottish highlanders from the 15th cent., clans having distinctive patterns. After the 1745 rebellion the use of the T. was illegal until 1782.

TARTARIC ACID (C₄H₆O₆). Commonly occurring vegetable acid, present in fruit juices in the form of salts of potassium, calcium, and magnesium, and used in effervescent drinks and baking powders.

TARTARS. See TATARS.

TARTARUS. In Greek mythology, a part of the underworld where the wicked are punished.

TARTU (tah'r'tōō). Town in Estonian S.S.R., on the Embick, said to date from 1030. It belonged to the Teutonic Knights until taken by Russia 1558; Poland and Sweden held it for periods, Russia recovering it in 1704. It has a univ. (1632) founded by Gustavus Adolphus of Sweden. Pop. (1967) 80,000.

TASHKENT. Cap. of Uzbek S.S.R., and of T. region, 160 m. N. of Samarkand. Dating from the 7th cent., it became Russian in 1865. It has a univ., manufactures textiles, metal and leather goods, etc. Largely destroyed by earthquake 1966, it was rebuilt. Pop. (1967) 1,241,000. *Declaration of T.:* see KASHMIR.

TASMAN (tahs'mahn), Abel Janszoon (c. 1603-59). Dutch navigator. In 1642-3 he discovered Tasmania (which he called Van Diemen's Land in honour of the Gov.-Gen. of the Netherlands Indies, but was renamed Tasmania in 1853 in T.'s honour), New Zealand, and the Tonga and Fiji Islands.

TASMANIA. State of the Commonwealth of Australia, consisting of a large island (T.) and various small islands which lie 140 m. off the S.E. of the mainland, from which T. is separated by Bass Strait. T. is triangular in shape; the interior is mountainous, rising in Cradle Mt. to 5,069 ft. The rivers (among which are the Derwent, Huon, Gordon, and Tamar) have been harnessed for electricity. Numerous lakes incl. Great Lake and Lake Sorell. The climate is mild with moderate rainfall except in the mts. of the W. where the rainfall is heavy.

Wheat, oats, peas, fruit, and potatoes are grown, and there are apple orchards in the S. Sheep, cattle, horses, and pigs thrive, and wool, cheese, and butter are exported. Mineral wealth incl. silver, coal, and zinc. Hobart is the cap. and the seat of T. univ. (1890); Launceston the only other town of importance. Area (incl. Macquarie and King Islands and the Furneaux Group) 26,215 sq. m.; pop. (1966) 371,416. T., discovered by Tasman 1642, was settled in 1803, and formed part of N.S.W. until 1825. Responsible govt. was introduced in 1856 and in 1901 T. joined the Commonwealth of Australia.

TASMANIAN DEVIL. Marsupial (*Sarcophilus ursinus*) found in Tasmania. Similar to a bear, it has

of some unusually coloured insect, vegetable or mineral form assumed symbolic force. In his portraits, e.g. Maugham, Beaverbrook, Helena Rubinstein, he has usually achieved popular as well as artistic success, but his study of Churchill was controversial. In 1960 he was awarded the O.M. and his tapestry design for Coventry (q.v.) Cathedral was acclaimed in 1962.

SUTHERLAND, Joan (1926-). Australian soprano. Going to England in 1951, she made her début the next year as First Lady in *The Magic Flute*; other successes incl. *Lucia di Lammermoor*, Donna Anna in *Don Giovanni*, and Desdemona in *Otello*.

SUTHERLANDSHIRE. Extreme N. maritime co. of Scotland. There are deep sea-lochs, and the W. is mountainous, Ben More Assynt rising to 3,278 ft. The Oykel flows S.E. to Dornoch Firth. Sheep are raised, and tweeds manufactured. Dornoch is the co. town. Area 2,028 sq. m.; pop. (1961) 13,442.

SUTLEJ. One of the 'Five Rivers' of the Punjab, flowing through India and Pakistan. It rises in Tibet at 15,200 ft., traverses the Punjab plains, and joins the Chenab nr. Madwala. Length 900 m.

SUTTEE (sutē'). Custom whereby a Hindu widow throws herself alive on her husband's funeral pyre. Forbidden under British rule in 1829, it enjoys sporadic illegal revivals in modern India.

SUTTNER (soot'ner), Bertha, baroness von (1843-1914). Austrian pacifist writer, author of the novel *Die Waffen nieder* (1889). She worked for a time with Alfred Nobel, and won the Nobel peace prize in 1905.

SUTTON COLDFIELD. English town (bor.) in Warwick, with TV transmitter built 1949. Pop. (1961) 72,143.

SUTTON HOO. Village nr. Woodbridge, Suffolk, England, where in 1939 an E. Anglian ship-burial of c. A.D. 650 was excavated. The objects discovered - jewellery, armour, weapons - were placed in the B.M.

SUTTON IN ASHFIELD. English industrial town in Notts, 13 m. N. by W. of Nottingham; hosiery is the chief product; plastics are made and coal is worked. Pop. (1961) 40,438.

SUVA. City, seaport, and cap. of Fiji on S. coast of Viti Levu. Pop. (1966) 54,150.

SVALBARD. Norwegian name of SPITSBERGEN.

SVERDLOVSK. Town of the Russian S.F.S.R., E. of the Urals. Copper, iron, platinum, etc., are mined, and there are heavy industries. S. has a univ. Formerly called Ekaterinburg, it was the site of the murder of Nicholas II and his family (1918). Pop. (1967) 940,000.

Another S., in Ukraine S.S.R., 35 m. S.S.W. of Lugansk, is a coal-mining centre.

SVEVO (zvā'vō), Italo. Pseudonym of Italian writer Ettore Schmitz (1861-1928). His 2 major works, *Senilità* (1898: *A Man Grows Older*), and *La Coscienza di Zeno* (1924: *Confessions of Zeno*), describe, with a dispassionate irony, the bourgeois world of his native Trieste.

SWABIA. Historic region, a duchy 1079-1268, in S.W. Germany, covering parts of S.W. Bavaria, Württemberg-Hohenzollern, and S. Baden. The part in Bavaria is an admin. div. of that Land, cap. Augsburg. Area 3,818 sq. m.; pop. (est.) 1,300,000. Industries incl. making of textiles, cattle raising, dairy farming; much of it is covered by the Black Forest where tourism is important.

SWAHILI (swahē'li). Mohammedan people of mixed Bantu and Arab descent, numbering about a million, and inhabiting the coastal areas of S. Kenya and N. Tanganyika. Their language is of Bantu origin, and has official status throughout both countries.

SWALLOW. Genus (*Hirundo*) of birds incl. the common S. (*H. rustica*) which winters in Africa and visits Europe April-Sept. Steel-blue above and creamy white beneath, it has a red-brown throat and deeply forked tail. Two broods a year are reared in nests of

mud and straw shaped like a half-saucer and built on ledges of rock, etc. In N. America the barn S. (*H. erythrogastra*), which winters in Brazil, is the prevalent species.

SWAN, Sir Joseph Wilson (1828-1914). British inventor (in the U.K.) of the incandescent filament electric lamp. B. at Sunderland, he also made discoveries in photographic development and printing.

SWAN. Genus of birds (*Cygnus*) in the duck family, of which they are the largest members. The mute S. (*C. olor*) is up to 5 ft. long, has white plumage, an orange bill with a black knob surmounting it, and black legs; the voice is limited to a harsh hiss. Mating is generally for life and the young (cygnets) are at first grey, later brownish. Wild in eastern Europe, it is half tame in the west and in England is a royal bird, since it was once highly valued for the table. On the Thames, at the annual swan-upping, the cygnets are still marked on the beak as either the property of the Crown or of the 2 privileged City cos., the Dyers and Vintners. Other species incl. the whooper (*C. musicus*) of N. Europe and Asia, and Bewick's S. (*C. bewicki*) both rare in Britain; the black S. of Australia (*C. atratus*); and N. American trumpeter S. (*C. buccinator*).

SWANAGE. English holiday resort (U.D.) in Dorset, on the Isle of Purbeck, with stone quarries nearby. Pop. (1961) 8,112. See illus. under DINOSAUR.

SWANSEA. Welsh port (co. bor.) in Glam, 45 m. W.N.W. of Cardiff, port for the S. Wales coalfield. S. is the tinplate centre for the country, and copper, zinc, etc., are smelted. Pop. (1961) 166,740.

SWASTIKA. A symbolic ornament of ancient origin. It consists of a cross, at the end of whose lines perpendiculars extend all in the same clockwise or anti-clockwise direction. The S. was used by the Aryans and by Buddhists as a mystic symbol. Hitler decreed that it should become the German flag in 1935, it having previously only represented the Nazi Party. For this purpose the cross was also represented upright.

SWATOW. Port in Kwangtung prov., China, at the mouth of the Han r. Opened to foreign trade in 1858, S. became the chief port for Chinese emigration to Malaya and other parts of S.E. Asia; it exports sugar, tropical fruit, etc., produced locally. Pop. (est.) 200,000.

SWAZILAND (swah'zē-). Kingdom in S.E. Africa, bounded N., W., and S. by Transvaal prov. of S. Africa. E. by Mozambique. Mountainous in the W., veld country in the E., it has a good climate, except for great heat in the lower-lying areas, and is free of malaria. The cap. is Mbabane. The Swazi King, Sobhuza II (1904-), was victorious in the first general election in 1964, as leader of the Imbokodvo Nat. Movement, internal self-govt. followed in 1966, and independence as a sovereign kingdom within the Commonwealth in 1968. Sugar, cotton, rice and citrus fruit are grown, and cattle and sheep raised; minerals incl. anthracite, tin, asbestos, iron ore, calcite and barytes. The iron deposits at Ngenwenya were linked by rail 1964 with Lourenço Marques. Area 6,704 sq. m.; pop. (1966) 389,492.

SWEDEN. A kingdom occupying the E. part of the peninsula of Scandinavia in N. Europe with a coastline c. 4,700 m. long on the Baltic Sea.

PHYSICAL FEATURES. A mountain range runs along most of the Norwegian border, and the main regions are the mountainous two-thirds in the N., culminating in Sarjektjälko (6,971 ft.); the central lowlands; the Småland highlands; and the fertile Skåne in the extreme south. Lakes are numerous, the largest being Vänern, Vättern, Mälaren, and Hjälmaren, all in the central region. The main river is the Göta. Öland and Gotland are S.'s largest islands. The climate varies greatly. An almost treeless region in the extreme N. gives place to a zone of birch forests, while much of the centre of the country is covered by dense coniferous

dark brown fur with white patches on the chest and hind parts, and is nocturnal and carnivorous.

TASSO (tah'sso), Torquato (1544–95). Italian poet. At first a law student at Padua, he was enabled to overcome his father's opposition to a literary career by the success of his romantic poem *Rinaldo* (1562), dedicated to Cardinal Luigi d'Este, who took him to Paris, where he met the members of the Pléiade (q.v.). Later he was under the patronage of the cardinal's brother, Duke Alfonso d'Este of Ferrara, for whose court theatre he wrote his pastoral play *Aminta* in 1573. His great work is his romantic epic of the First Crusade *La Gerusalemme Liberata* (1574: *Jerusalem Delivered*), much superior to the *Gerusalemme Conquistata*, written in the stress of mental instability and delusion which set in from 1576.

TATARS (tah'tahrz). Although sometimes loosely used to incl. other Turkic and Mongol peoples, the name applies more accurately to those speaking a language of the N.W. branch of Turkic. Mainly Moslem, they represent in the U.S.S.R., where they live mainly in the Tatar A.S.S.R. (cap. Kazan), but also in the Uzbek S.S.R. (whence they were deported from the Crimea, q.v., in 1945) and S.W. Siberia, the remnant of the 'Mongol' invasion of the 13th cent. The Crimean Ts. (c. 500,000) agitated 1968–9 for their return from Uzbekistan and the restoration of the Crimean A.S.S.R.

TATE, Harry (1873–1940). British music-hall comedian, famous for his sketches, 'Motoring', etc. He was one of the first comedians to broadcast.

TATE, Nahum (1652–1715). Irish poet. B. in Dublin, he wrote an adaptation of *King Lear*, to which he gave a happy ending, a version of the psalms, and hymns; his best-known poem is 'While shepherds watched'. He became poet laureate in 1692.

PHYLLIS TATE

TATE, Phyllis (1911–). British composer. B. nr. London, she studied at the Royal Academy of Music. Her principal works incl. *Concerto for Saxophone and Strings* (1944), *The Lady of Shalott*, for tenor and instruments (1956), the operas *The Lodger* (1957–8), based on the story of Jack the Ripper, and *Dark Pilgrimage* (for television, 1962), and *Duo Concertante* for trumpet, bassoon and small orchestra (1962).

TATE GALLERY. Art gallery at Millbank, London. It contains national collections of pictures and sculpture, those of the British school from the late 16th cent., and of modern foreign art from 1800. Built by the generosity of Sir Henry Tate (1819–99), sugar merchant and philanthropist, it was opened in 1897, and was greatly enlarged by Sir J. Duveen and his son Lord Duveen of Millbank (the wings to house the Turner Bequest, and Modern Foreign Art, and the Sculpture Hall).

TATIAN (tāshian) (2nd cent. A.D.). Christian apologist. B. in Assyria, he compiled a *Diatesseron*, or harmony of the gospels.

TATTERSALL'S. Bloodstock auctioneers estab. at Knightsbridge Green, S.W. London, since 1864. It is named after Richard T. (1724–95), who founded T. at Hyde Park Corner in 1766.

TATUM, Edward (Lawrie) (1909–). American microbiologist, prof. at the Rockefeller Inst., New York from 1957. See BEADIE, GEORGE WELLS.

TAUBER (tow'ber), Richard (1891–1948). British tenor singer, conductor and composer. B. in Linz, Austria, and a naturalized Briton from 1940, he was

noted for his singing of works by Lehar and Mozart.

TAUNTON. Co. town (bor.) of Somerset, England, 30 m. N.E. of Exeter. Historic buildings incl. the Elizabethan hall in which Jeffreys conducted his 'Bloody Assize' (1685). T. makes gloves, shirts, agricultural implements, etc. Pop. (1961) 35,178.

TAUPO (tau'pō). The largest lake in New Zealand, in N. Island, area 238 sq. m., depth 534 ft.

TAURUS. Mt. range in S. Asia Minor, forming the S. edge of the Anatolian plateau, and rising to over 12,000 ft.

TAVISTOCK. English market town (U.D.) in Devon, on the r. Tavy, 15 m. N. of Plymouth. It has a ruined 10th cent. abbey whose lands were given to John Russell, ancestor of the dukes of Bedford, when the monasteries were dissolved by Henry VIII; the eldest son of the duke uses the title marquess of Tavistock. Pop. (1961) 6,086.

TAWNEY, Richard Henry (1880–1962). British historian. An ardent socialist, he was prof. of economic history, Univ. of London, 1931–49, and produced the major *Agrarian Problem in the 16th Cent.* (1912) and *Religion and the Rise of Capitalism* (1926).

TAXATION. The part of the national revenue raised by compulsory dues and charges, as distinct from that derived from public property. From the 19th cent. when govts. came into existence based on a wide electorate and broadened the scope of legislation needing to be supported by T. (education, transport, defence, health, pensions and allowances) the scheme of T. became increasingly comprehensive, and in the mid-20th cent. T. is used by govts. as a means of stimulating or restraining the national economy, or to modify the national life in any desired direction, e.g. the encouragement by reduction of T. of any type of manufacture or discouragement by heavy T. of consumption of any commodity. In newly emergent countries T., therefore, tends to be very light, e.g. India and Pakistan, because incomes are low and services, etc., undeveloped; midway in the T. scale come countries such as Brazil and the Argentine; and at the top the U.K. with 30 per cent of the gross national product, France and W. Germany 28 per cent, U.S.A. 25 per cent, the Netherlands 23 per cent and Italy 22 per cent.

Direct taxes, which are for the most part graduated according to income, etc., are increasingly used in the West; more expensive to collect because individually assessed, they compensate by being the most productive. Most important is *income tax*, collected by the Inland Revenue in Britain, as are the other direct taxes, i.e. *surtax*, a tax paid in addition to income tax and designed to bear heavily on large unearned incomes; *corporation tax* on co. profits (replacing 1966–7 income and profits tax); *capital gains tax*, aimed from 1961 at preventing the use of capital as untaxed income; and *selective employment tax*, intended from 1966 to redress the balance between manufacturing industry (liable to purchase tax) and the service industries which had no such burden, and to direct labour from the latter to the former; and *death duties*. Another form of direct T. is the *rates* (q.v.) collected by local authorities which are based on the value of buildings on a site: it has been suggested that these be replaced by a local (state) income tax as in the U.S.A.

Indirect taxes, the most favoured method of T. in the U.S.S.R., incl. in Britain the taxes on tobacco, spirits, wine, beer, petrol (see CUSTOMS AND EXCISE); and betting and purchase tax. The last-named, introduced in 1940, is charged when goods are delivered from a registered trader to the retailer: this system is less complicated than a sales tax (as in U.S.A.) where the tax is deducted by the retailer at the moment of sale to the customer, but results in loss or gain to the retailer when tax changes are made on goods already purchased from the registered trader. Generally

SWEDEN. From the theoretical viewpoint the sphere is the most economical form to heat — one reason for its choice by architect Ralph Erskine for this all-season residence on Lisö Island off the Baltic coast. The house is based on the three main areas of the Swedish home — comfy winter area, semi-enclosed area with windscreening for spring and autumn, and the forest and water for summer use. *Courtesy of Ralph Erskine.*

forests. Bears, wolves, and elks haunt the remoter forests, and reindeer are numerous in Lapland.

ECONOMIC. N. Sweden is chiefly important for its minerals and forests, while the central region combines mining and agriculture, and the S. specializes in raising wheat and sugar beet and stock. Timber, pulp and paper milling industries give valuable exports. Huge iron deposits are worked in Lapland and other minerals incl. lead, zinc, sulphur, copper, silver and uranium. Hydroelectricity supplies power for engineering, shipbuilding, vehicle, electrical equipment, tool, petrochemical and plastics industries. The chief towns are Stockholm (the cap.), Göteborg, Malmö, Norrköping, Hålsingborg, Örebro, and Uppsala.

AREA AND POPULATION. Of mainly Nordic stock, the Swedes have a good educational system, with univs. at Uppsala, Lund, Göteborg, Stockholm, and Umeå. Most of the pop. belong to the State Lutheran Church. Area 173,629 sq. m.; pop. (1968) 7,893,704.

History. S. was divided in early times between 2 peoples, the Swedes in the N. and the Goths in the S., who were united under one king by Sverker (1134–55). Christianity became generally accepted about the same time, and a series of crusades in the 12th–14th cents. brought Finland under Swedish rule. The Riksdag, incl. representatives of the nobles, clergy, and burgesses, was founded in 1359; peasant representatives were added in 1435. The Union of Kalmar (1397) united Denmark, Norway, and S. under a Danish dynasty, but Swedish national feeling led to several revolts, the last of which, in 1520–3, ended the union, and placed Gustavus Vasa on the throne. Lutheranism became the national religion in 1527.

S.'s ambitions to dominate the Baltic coastline involved her in the 16th–18th cents. in many wars with Denmark, Poland, Russia, and Brandenburg, which in spite of the victories of Gustavus Adolphus (1611–32), Charles X (1654–60), and Charles XII (1697–1718), left her exhausted and impoverished. Ruled by a corrupt oligarchy, S. sank into insignificance until Gustavus III (1771–92) estab. an enlightened despotism. When in 1818 the Vasa line became extinct the crown passed to the French marshal Bernadotte, who reigned as Charles XIV (1818–44) and estab. a dynasty whose sixth member, Gustaf VI Adolph (1882–), ascended the throne in 1950.

S. lost Finland to Russia in 1809, but seized Norway in 1814, a union dissolved in 1905. Since 1814 S. has pursued a policy of neutrality. A new constitution adopted in 1809 ended the period of absolutism; this

was amended in 1866, when a Riksdag of 2 chambers replaced the 4 estates (a commission recommended a single chamber 1967), and in 1907, when universal suffrage was adopted. The Social Democrats, founded in 1889, are the strongest party, and have contributed to S.'s record as a pioneer in social-security legislation.

SWEDENBORG, Emanuel (1688–1772). Swedish philosopher. B. at Stockholm, son of an unorthodox bp., he distinguished himself as a scientist — in geology, magnetic theory, functions of the brain, etc. — being much ahead of his time, and then from 1747 devoted himself to scriptural study, living much in London. His writing (in Latin) incl. *Divine Love and Wisdom*, in which he taught that the Last Judgment having taken place in 1757 there had succeeded The New Church signified by the New Jerusalem in the Revelation of which he was the prophet. An actual sect., for which his writings are the scriptures (Swedenborgians), was not estab. until 1788 by a Clerkenwell printer Robert Hindmarsh.

SWEDISH. A member of the northern or Scandinavian division of the Germanic languages. By the 14th cent. there were a number of rhymed chronicles, ballads and folk songs, but modern literature begins in the 17th cent. with the epic poet Georg Stjernhjelm (1598–1672). In the 18th cent. the names of Linnaeus, Celsius and Swedenborg typify the country's intellectual ferment, and the poet-historian Olof von Dalin was an outstanding literary figure. The period 1771–1809, covering the reigns of Gustavus III (himself a playwright) and Gustavus IV, saw much literary activity, e.g. the song lyrics of Karl Michael Bellman (1740–95), and the dramas of Gudmund Jöran Adlerbeth (1751–1818) and Henrik Kellgren (1751–95), who assisted the king in the royal theatre. Outstanding names of the Romantic era are those of poet-playwright Per Daniel Amadeus Atterbom (1790–1855), the poets Esaias Tegnér and Eric G. Geier (1783–1847) who sought inspiration in the legendary heroic past, and Afzelius, editor of national folk songs. To the period of romantic transition belong the novelist and poet Viktor Rydberg, the classic poet Carl Snoilsky (1841–1903), and the Finnish epic poet Johan Ludvig Runeberg (1804–77), but realism emerged in the novels of Carl Almqvist and Frederika Bremer (1801–65), and broke through in tortured agony in the work of Strindberg. A new romantic idealism followed, e.g. the poets Gustaf Fröding (1860–1911), Erik Axel Karlfeldt and Verner von Heidenstam (1859–1940), and the novelist Selma Lagerlöf — the last 3 all Nobel prizewinners. Among more recent writers are the novelists Hjalmar Söderberg (1869–1941), Sigfrid Siwertz (1882–), Gustaf Hellström (1882–1953), Elin Wagner (1882–1949), Hjalmar Bergman (1883–1930), Agnes von Krusenstjerna (1894–1940), and Vilhelm Moberg (1898–); the poet Hjalmar Gullberg (1898–), and those equally at home in both mediums — Birger Sjöberg (1885–1929), Karin Boye (1900–41), Harry Martinson (1904–), Artur Lundkvist (1906–), and Pär Lagerkvist, another Nobel prizewinner.

SWEDISH ART. The rise of Sweden in the 17th cent. ushered in a great cultural era. In the environs of Stockholm are the royal residences of Ulriksdal (1660), Karlsborg (1696–1718), and Drottningholm. Renaissance churches of Stockholm incl. Maria Magdalen (1650), St. Catherina (1725), and the church of Adolphus Frederick (1751–71). Towards the end of the 18th cent. French influence is apparent. From 1830 to 1880 Swedish architecture reflected various tendencies in fashion in Germany and Denmark, but from 1890 the teachings of William Morris were influential on Swedish arts and crafts, and in the 20th cent. Sweden became a world leader in industrial art. Contemporary Swedish architecture has also attracted much attention, the tendency is towards austerity.

SWEET, Henry (1845–1912). British philologist,

speaking, unless limited to luxury goods, indirect tax bears more heavily on the poorer classes. The European Common Market adopted 1967 plans for a value-added tax system based on the French T.V.A. (Taxe sur la Valeur Ajoutée), which is charged at each stage in production and distribution on the value added to the product.

TAXODIUM. Genus of trees in the family Taxodiaceae. The American deciduous cypress, *Taxodium distichum*, grows in or near water, and is a timber tree.

TAYLOR, Alan John Percivale (1906–). British historian. Lecturer in international history at Oxford 1953–63, he has made a popular as well as a scholarly reputation by such books as *From Napoleon to Stalin* (1956) and *The Origins of the Second World War* (1961), and by his lectures on TV.

TAYLOR, Elizabeth (1932–). British actress. Going to Hollywood, where she finished her education, she estab. her position as the world's most highly paid actress with *A Place in the Sun* (1950), *Giant* (1956), *Butterfield 8* (1960), for which she gained an Academy Award, and *Cleopatra* (1963). She m. (1) Conrad Hilton, Jr., (2) actor Michael Wilding – both being divorced – (3) impresario Mike Todd, killed in an air crash, (4) singer Eddie Fisher, and (5) actor Richard Burton.

TAYLOR, Sir Geoffrey (1886–). British scientist. In 1944 he was awarded the Copley Medal for work in aerodynamics, hydrodynamics and structure of metals, and worked 1944–5 at Los Alamos on the first atom bomb. In 1969 he received the O.M.

TAYLOR, Jeremy (1613–67). Anglican divine. B. at Cambridge, he was deprived of his living by the Puritans in 1644, and thrice imprisoned as a royalist under the Commonwealth. His books incl. *Liberty of Prophesying* (1646), a defence of toleration, and *Holy Living* (1650) and *Holy Dying* (1651). He became bp. of Down in 1661.

TAYLOR, Zachary (1784–1850). 12th President of the U.S.A. B. in Virginia, he commanded the invasion of Mexico in 1846–7, and was elected president as a Whig in 1848.

TBILISI (tbilye'sē). Cap. of Georgian S.S.R., on the Kura, close to the foothills of the Caucasus. It dates back to the 5th cent. The seat of a univ., it manufactures textiles, machinery, ceramics, tobacco, etc. Pop. (1967) 842,000.

TCHAIKOVSKY (chikov'ski), Peter Ilyich (1840–93). Russian composer. B. at Kamsko-Votinsk, he became a prof. of harmony at Moscow in 1865, and later met Balakirev and the nationalist circle. The 2nd symphony was performed in 1873, and the piano concerto in B flat minor in 1875. T. wrote several operas, incl. *Eugene Onegin*; ballet music, *The Swan Lake*, *The Sleeping Beauty*, and *The Nutcracker*; orchestral fantasies, *Romeo and Juliet*, *Francesca da Rimini*, and *Hamlet*; 3 piano concertos and a violin concerto; and chamber and vocal music. All these enjoy wide popularity, as do the 4th, 5th and 6th symphonies.

TEA. Plant (*Thea sinensis*) from the leaves of which the beverage of the same name is made. Left to itself it develops into a 40 ft. tree, but is restricted in cultivation to bushes 3–5 ft. high, from which at c. 5 yrs. the young shoots and leaves are picked. After 24 hrs. spread on shelves in the 'withering' lofts, the leaves are broken up by rolling machines, which release the essential oils, and

allowed to ferment. This process is then halted by passing the leaves through ovens where moisture is removed and the blackish-brown T. emerges ready for sifting into the various grades.

Known in China as early as 2737 B.C., T. was first brought to Europe in A.D. 1610, but was not in use in England until 1657. It rapidly became a fashionable drink but remained expensive because cargoes had to be brought from China in the specially fast T. clippers. In 1823, however, T. was found growing wild in northern India, and some 10 years later plantations were estab. in Assam and then in Ceylon: other modern producers incl. Africa, S. America, Russia, Indonesia and Persia. Methods of consumption vary: in Japan special T. houses and an elaborate T. ceremony have evolved; in England 'afternoon' T. had its own ritual; and in Tibet hard slabs of compressed T. are used as money before being finally brewed.

TEAK. Timber tree (*Tectona grandis*) grown in India, Burma, and Java. The wood is very hard and is used for shipbuilding.

TEAL. Small duck (*Anas crecca*). The drake has a reddish-brown head with green and buff markings on either side, and a black and white line on the wing. The female is buff and brown.

TEASEL. Species of plant (*Dipsacus fullonum*). It grows in waste places to a height of 6 ft. The purple flowers grow in an egg-shaped head, divided by hooked bracts. T. brushes are made from the heads.

TEBALDI, Renata (1922–). Italian soprano, remarkable for the controlled purity of her voice and excelling in roles from Puccini.

TECHNETIUM. The first artificially made element (Gk. *technetos*, artificial), symbol Tc, at. wt. 99, at. no. 43. Originally produced by Perrier and Segré (California) in 1937 by bombarding molybdenum with deuterons or neutrons, it was later isolated in large amounts from the fission products of uranium and may have importance in alloys.

TECHNOCRACY. Govt. by technical experts. Certain contemporary writers, e.g. J. Burnham in *The Managerial Revolution*, have maintained that modern society is tending towards T.

TECHNOLOGY. The practical application of the arts and sciences in industry and commerce. Britain's industrial revolution preceded that of Europe by half a century, and her prosperity stimulated Continental countries to encourage technological education in order to emulate her. France estab. the École Polytechnique, the 1st technological univ., in 1794 and Germany founded the remarkable series of Technische Hochschulen with one in Berlin in 1799. In Britain education in T. was catered for by the mechanics institutes, notably the Univ. of Manchester Inst. of Science and T. (founded 1824, created univ. 1966) which, together with the Imperial College of Science and T. (estab. 1907), still form the focus of technological work. America was quick to grasp the importance of T., most of her univs. having schools of engineering and T., and also estab. a number of institutes on European lines of which the most famous are the Massachusetts (1861) and California Institutes of T. and the Rensselaer Polytechnic Institute (founded at Troy, N.Y., in 1824). The mass production of technologists, exceeding the pace of both western

TEASEL

TEA. Leaves, flowers and fruit.

Courtesy of the Tea Bureau.

author of works on Old and Middle English, who transplanted to England German scientific techniques of study. He was said to be the original of Prof. Higgins in *Pygmalion*.

SWEET WILLIAM. Garden plant (*Dianthus barbatus*), also called bearded pink because of its bearded petals. The clusters of small flowers are pink, red or white, the leaves elliptical and dark green. The S.W. is named after William, duke of Cumberland, also known as 'Butcher' Cumberland.

SWEYN (swān) (d. 1014). King of Denmark. Succeeding to the throne c. 986, he repeatedly raided England, and conquered it in 1013, being accepted as king. His early death led to the recall of Ethelred to the throne.

SWIFT, Jonathan (1667–1745). Irish writer and churchman. B. in Dublin, he became sec. to Sir William Temple at Moor Park, Surrey, where began his friendship with 'Stella'—Hester Johnson (1681–1728). Returning to Ireland, he was ordained in the English Church (1694), and in 1699 was made a prebendary of St. Patrick's, Dublin. His satirical *Battle of the Books* and *Tale of a Tub* were pub. in 1804. In 1710 he became a Tory pamphleteer, and obtained the deanery of St. Patrick in 1713. His *Journal to Stella* is a series of letters, 1710–13, in which he described his life in London. In 1714 he returned to Ireland, where he wrote *The Drapier's Letters*, opposing the introduction of inferior copper coins into Ireland. In 1726 appeared his best-known work, *Gulliver's Travels*. For some years before his death he was insane. He may have m. Stella, but was deeply involved 1708–23 with Esther Vanhomrigh (1690–1723), whom he called 'Vanessa'.

SWIFT. Family of birds (Micropodidae), the fastest creatures alive, with a flying speed of 70–100 m.p.h. The common S. (*Apus apus*) migrates from Africa to Europe in summer: drab-coloured, it has a short forked tail, poorly developed feet and legs, and curved wings longer than the body. The nests of the closely related genus *Collocalia* are used in China for birdsnest soup.

SWIMMING. The self-propulsion of the body through water. The dog paddle is probably the original 'instinctive' stroke, but the first to be developed in Europe as a skilled technique was the breast stroke in the 16th cent., still used in competitive S., as is the faster but exhausting variant originating in the U.S.A. in the 1930s, the butterfly breast stroke, although the other developments from it—the side and overarm strokes—are out of fashion. Fastest known stroke is the crawl (developed by the Australians at the beginning of this cent. from a method in use by the South Sea Islanders), from which in turn came the back crawl in the 1920s, especially popular in competition S. because it allows the swimmer to breathe freely throughout. The water is entered by the 'racing plunge' or by diving, the latter being divided for competition purposes into spring-board and firmboard events. Earliest of competitive S. bodies was the English Amateur S. Assocn. (1869), and the Fédération Internationale de Natation Amateur (1903) was founded in London. With the invention of frogman equipment—slippers for the feet, breathing apparatus, and even mechanical propulsion, underwater S. has developed special techniques of its own. See also CHANNEL SWIMMING.

SWINBURNE. Algernon Charles (1837–1909). British poet. B. in London, he was ed. at Eton and Balliol Coll., Oxford, and attained fame with the

tragedy *Atalanta in Calydon* (1865). *Poems and Ballads* (1866) was also acclaimed for its lyric fire, but in both Britain and the U.S.A. its pagan spirit brought unfavourable comment. In a wrangling controversy that lasted some years he and Rossetti were attacked in 1871 by Robert W. Buchanan, as leaders of 'the fleshly school of poetry'. Among the best of later verse are *Songs Before Sunrise* (1871), revolutionary in its political attitude, and 2 further vols. of *Poems and Ballads* (1878 and 1889). In 1879 he moved to the home of Watts-Dunton (q.v.) at Putney, where he lived in retirement after a career of excess.

SWINDON. Town (bor.) in Wilts, 77 m. W. of London. The railway works (1841) to which it owed its growth declined in the 1950s, and varied new industries moved in. Pop. (1961) 91,736.

SWINE FEVER. Name given to 3 infectious diseases of swine, viz. swine plague, infectious pneumonia, and hog cholera, which are compulsorily notifiable.

SWING MUSIC. An offshoot of jazz (q.v.) which flourished from c. 1930 to the late 1940s; characterized by a simple harmonic base (of varying tempo) supplied by the rhythm section (percussion, guitar, piano), with a superimposed melodic line carried usually by a solo instrument, e.g. trumpet, clarinet or saxophone.

FRANK SWINNERTON

SWINNERTON, Frank Arthur (1884–). British novelist and critic. He estab. his reputation during many years as a publisher's reader (1900–25). A friend of Hugh Walpole, E. V. Lucas, Kathleen Mansfield, etc., between the wars, his histories *The Georgian Literary Scene* (1935), *Background with Chorus* (1956), and *Figures in the Foreground* (1963), intimately surveyed the literary scene 1900–40, and his prodigious output of novels, noted for their speed,

sagacity and compassion, incl. *Nocturne* (1917), *A Woman in Sunshine* (1944) and *Death of a Highbrow* (1961). He is an attractive essayist.

SWINTON, Sir Ernest (1868–1951). British soldier and historian. Entering the army in 1888, he served in S. Africa and the F.W.W., rising to the rank of major-gen., and was the inventor of the tank in 1916. Knighted in 1923, he was Chichele prof. of military history at Oxford, 1925–39.

SWITHIN or **SWITHUN**, St. (d. 862). A chancellor of King Ethelwolf, he was bp. of Winchester 852–62. In 971 his body was to be reburied, but the day chosen, 15 July, now St. S.'s Day, was so wet that the translation was delayed. This gave rise to the superstition that if it rains on that day it will be rainy for 40 days.

SWITZERLAND. Confederate republic of W. Europe, bounded by Germany on the N., Austria on the E., Italy on the S., and France on the N.W.

PHYSICAL FEATURES. S. is extremely mountainous; a central plain traversed by the Aar is shut in by the Alps to the S. and by the Jura to the N. The Upper Rhine and Rhône lie between the Bernese Oberland and the main chain of the Alps. The Swiss Alps culminate in Monte Rosa (15,217 ft.). The Rhine, its tributary the Aar, the Rhône, and the Ticino, are the main rivers. There is a large number of lakes: Lake Geneva, through which flows the Rhône, lies partly in France; Lake Constance, which is traversed by the Rhine, is shared with Germany and Austria, and Lakes Maggiore and Lugano with Italy.

The climate shows considerable variations. The

Europe and the U.S.A., has been concentrated upon by the Soviet Union and increasingly by China.

In 1950 an *International Vocational Training Competition* was inaugurated by Spain and is held each year in a different country.

TECUMSEH (tekum'se) (1768–1813). Shawnee Indian chief. He attempted to unite all the Red Indian tribes into a confederation, and was killed while fighting the Americans as an ally of the British.

TEDDER, Arthur William, 1st baron (1890–1967). Marshal of the Royal Air Force. He was Air Officer Commanding R.A.F. Far East 1936–8, and Middle East 1941–3, where his method of pattern bombing known as 'Tedder's carpet' became famous. As Deputy Supreme Commander under Eisenhower 1943–5, he was largely responsible for the initial success of the 1944 Normandy landings.

TEDDINGTON. Part of Twickenham, in the Greater London bor. of Richmond upon Thames. T. Lock, 74 m. upstream, is the highest point reached by the tide. The National Physical Laboratory (1900) is at T.

TEESSIDE. Co. bor. in N. Riding, Yorks, created 1968 by amalgamation of Middlesbrough, Stockton on Tees, Redcar (qq.v.), etc. There are oil refineries, petrochemical works, a reorganized steel industry, an airport and modern port facilities. Pop. (1968) 400,000.

TEETH. Hard structures within the mouth, growing from each jaw in 2 semicircular rows and meeting (occlusion) in the act of biting. The first set, the milk teeth, appear from age 6 months to 2½ yrs., and number 20. The permanent dentition replaces these from the 6th year onwards, the wisdom teeth (3rd molars) sometimes not appearing until the age 25 or 30. It consists of 32 teeth: 2 incisors, 1 canine (eye tooth), 2 premolars, and 3 molars on each side of each jaw. A tooth is made of bony substance called dentine. It has a root or roots set in a socket of fine bone (alveolus), a neck covered by gum, and a crown covered with hard white enamel. It is hollow and filled with a highly sensitive pulp made of nerves and blood vessels. The chief diseases of teeth are misplacements resulting from defect or disturbance of the tooth-germs before birth; eruption out of the proper places; caries (decay), and pyorrhoea.

TEHRAN (tārah'n). Cap. of Persia, 60 m. S. of the Caspian Sea, hub of road and rail communications; with an airport. Cotton, tobacco, soap, and sugar are manufactured. In 1943 T. was the scene of the first meeting between Stalin, Roosevelt, and Churchill. Pop. (1966) 2,803,130.

TEHRAN. Rapidly expanding as a centre of commerce and finance – the Markazi Bank is seen to the left – the capital has trebled its population since the S.W.W.

Courtesy of Imperial Iranian Embassy.

TEL AVIV. A view of the waterfront. Courtesy of the Israel Government Tourist Office.

TEIGNMOUTH (tin'muth). English port, resort, and market town (U.D.) on the S. coast of Devon, 15 m. S. of Exeter. Pop. (1961) 11,576.

TEILHARD DE CHARDIN (tāyahr de zhahr'dīn'), Pierre (1881–1955). French mystic and palaeontologist. B. in the Puy-de-Dôme, of well-to-do parents, he entered the Society of Jesus in 1899, was ordained in 1911, and during the F.W.W. was a stretcher bearer, taking his final vows in 1918. His *Letters from a Traveller* describes his travels in little-explored China, in Europe and America, as a palaeontologist. His books on philosophical themes were not allowed to be pub. by his superiors as they seemed to tend to pan-psychism. He attempted to relate psychic and physical energy, and evolved his concept of the *noosphere* – the union of thought of human beings. His other books incl. *The Phenomenon of Man* and *Le Milieu divin*. From 1951 he lived in the U.S.

TEJO. Port. form of TAGUS.

TEKIRDAG (tekir'dah). Turkish port on the European shore of the Sea of Marmara, cap. of T. il. It is said to have been founded by the Samians. Pop. (est.) 20,000.

TEL AVIV-JAFFA (avēv'). City in Israel, on the Mediterranean, 33 m. N.W. of Jerusalem. Textiles, sugar, chemicals are made; printing and publishing are important. T.A. (founded 1909) was combined with Jaffa (q.v.) 1949: their sister ports were superseded by Ashdod 1965. Pop. (1967) 389,700.

TELECOMMUNICATIONS (Gk. *tele*, afar). The 1st apparatus used for communication over a distance, apart from such devices as semaphore, heliograph, etc., was the *telegraph*. The earliest practicable instrument was invented by Cooke and Wheatstone in 1837, and used by railway cos., the 1st public line being laid between Paddington and Slough in 1843. Morse invented a signalling code (still used), and a recording telegraph, 1st used commercially between England and France in 1851. As a result of Hertz's discoveries using electromagnetic waves, Marconi estab. wireless communication between England and France (1899) and across the Atlantic (1901). On the principal telegraph routes *teleprinters* (keyboard-operated telegraph machines in which the transmitted baudot code – 5 unit, with start and stop – automatically prints the received message) are used in conjunction with voice-frequency carrier apparatus. This enables a large number i.e. 36 telegrams to be signalled simultaneously on the same circuit.

The *telephone* was invented in 1876 by Alexander Graham Bell, as a result of Faraday's discovery of electromagnetism, and today it is possible to communicate with most countries by telephone cable.

Muhammad though a great Prophet was not the only or the final one. Bahá'u'lláh was succeeded in the leadership by his son 'Abdu'l-Bahá (d. 1921), who was knighted by the British in 1920 for his services during the F.W.W. The latter's grandson, Shoghi Effendi (1896–1957), then became 'Guardian of the Cause': on his death the succession was disputed. An international council now presides.

Followers of the B. Faith claim it incorporates what is best in all religions. It stresses the oneness of mankind regardless of race, colour, class, or creed.

BAHAMAS (ba-hah'maz). Group of islands in the British W. Indies, off the S.E. coast of Florida. They comprise 700 is. and about 200 cays. Only 21 are inhabited. The total land area is 4,404 sq. m.; and of the pop. of 142,846 (est.) in 1966 not more than 15 per cent were white. Tomatoes, salt, timber, crawfish are exported, but the tourist trade is of supreme importance.

The B. were visited by Columbus in 1492. During the 17th and 18th cents. the British and Spanish held them alternately until they became British in 1783.

The chief islands are New Providence, on which stands Nassau, the cap.; Grand Bahama, Abaco, Eleuthera, Cat, Andros, Exuma, Mayaguana (on which a site was leased for 99 years to U.S.A. for a naval base in 1940), Crooked, Long, Great Inagua, and San Salvador. Internal self-govt. was introduced 1964 and there are a Senate and House of Assembly. In 1967 the first Negro P.M. (Lynden O. Pindling) took office.

BAHAWALPUR (bah-hahwahlpoor'). Town of W. Pakistan, once cap. of a former state of the same name. It is on the Sutlej, 50 m. S. of Multan, and has textile factories and rice mills. Pop. (1961) 326,671. B. is also the name of a commissioner's division of W. Pakistan, area 32,443 sq. m.; pop. (1961) 2,574,066.

BAHIA (bah-ē'ah). Coastal state of N.E. Brazil, 1st part of the country sighted by Portuguese navigators in 1500. Apart from the fertile plain, it is for the most part a barren plateau. B. produces 90 per cent of Brazilian cocoa. Its cap. is Salvador (formerly also called B.). Area 217,670 sq. m.; pop. (1967) 6,885,000.

BAHIA BLANCA. Industrial town in S. Argentina, on the Naposta, 3 m. from its mouth. It has extensive dockyards and is a meat-packing centre. Pop. (1960) 150,000.

BAIR, Hermann (1863–1934). Austrian author and dramatist. He wrote social dramas in the manner of Ibsen and Strindberg, but was most successful with amusing and witty comedies such as *Der Krampus* (1902) and *Das Konzert* (1909).

BAIHEIN (bahrān'). Group of islands in the Persian Gulf, 20 m. E. of the Arabian coast. On the largest island, also called B., is the cap. Manama. B. has been inhabited for 5,000 years. The Arabs seized it in the 7th cent., it was occupied by Portugal 1521–1602, after which it was disputed by various countries until in 1861 the ruling sheikh placed it under British protection. Long famous for its pearls, it became an important centre of production and refining of petroleum after the discovery here of this mineral in 1932. In 1968 B. joined the Fed. of Arab Emirates (q.v.). Area 231 sq. m. Pop. (1965) 182,203.

BAIKAL (bī'kahl). Largest freshwater lake in Asia, deepest in the world (up to 5,710 ft.), in the R.S.F.S.R. between Irkutsk region and Buriat-Mongol A.S.S.R. Fed. by more than 300 rivers, it is drained only by the Lower Angara. Area 12,150 sq. m.; length 390 m.

BAIKONOUR (bikohn'ōr). Small coalmining town in Kazakh S.S.R., 30 m. W. of Karakpai, in W. Karakanda region. It has been used as the launching point for Russian cosmonauts.

BAIL. The setting at liberty of a person in the custody of the law on an undertaking, usually backed

BAILEY BRIDGE. Components in use on a building site.

Courtesy of Acrow Engineers Ltd.

by some security, given either by him or by someone else, that he will attend at a court at a stated time and place. If he does not attend, the bail is 'estreated', i.e. forfeited.

BAILEATHA CLIATH. Official Irish name of DUBLIN from 1922.

BAILEY, Sir Donald Coleman (1901–). British engineer, inventor during the S.W.W. of the Bailey Bridge. Made up of interlocking sections, speedily manhandled, the bridges can be easily transported and erected: the girders are built up from prefabricated panels and all parts are interchangeable. He was Dean of the Royal Military College of Science 1962–6.

BAILEY, Henry Christopher (1878–1961). British author. B. in London, he specialized in crime and mystery, his *Mr. Fortune* stories being particularly famous.

BAILLIE, Isobel (1895–). British soprano. B. in Hawick, Scotland, she became celebrated for her work in oratorio, her voice having a singularly pure quality. She was prof. of singing at Cornell Univ. 1960–1.

BAILLY (bahyē'), Jean Sylvain (1736–93.). French astronomer, who wrote on the satellites of Jupiter and the history of astronomy. Early in the French Revolution he was president of the National Assembly and mayor of Paris, but resigned in 1791 and was guillotined during the Terror.

BAILY (bā'li), Edward Hodges (1788–1867). British sculptor of bas-reliefs on Marble Arch and the figure of Nelson in Trafalgar Square, London.

BAILY, Francis (1774–1844). British astronomer, originally a stockbroker and actuary. In 1836 during an eclipse of the sun he noticed *Baily's beads*, due to the breaking-up of the solar crescent into separate portions of light by prominences on the moon.

BAIN, Alexander (1818–1903). Scottish philosopher. Originally a weaver, b. at Aberdeen, in 1845 he became prof. at Glasgow, and in 1860 prof. of logic and English at Aberdeen. He wrote *Logic* (1870). *Mind and Body* (1872), and founded the journal *Mind*.

BAINBRIDGE, Kenneth Tompkins (1904–). American physicist. B. in Cooperstown, N.Y., he worked at the Cavendish Laboratory, Cambridge, 1933–4. Returning to America, he taught at Harvard, and directed the Alamogordo atom bomb test in 1945. He has also carried out research in radar, and since 1961 has been George Vasmer Leverett prof. of physics at Harvard.

BAINES, Sir Frank (1877–1933). British architect, designer of the Imperial Chemicals building on Millbank, Westminster and restorer of Westminster Hall.

BAINTON, Edgar Leslie (1880–1956). British composer. B. in London, he was a pupil of Stanford, and is remembered for his choral symphony *Before Sunrise*, and a *Concerto-Fantasia* for the piano. As Director of the State Conservatorium of Music in Sydney, N.S.W. 1934–46, he did much for Australian music.

BAINVILLE (bahvēl'), Jacques (1879–1936). French historian, editor of the Royalist *Action Française* from 1899. He wrote *L'histoire de deux peuples* (1915), in which he analysed the antagonism of France and Germany, and *Histoire de France* (1923).

BAIRD, John Logie (1888–1946). British pioneer of

JOHN LOGIE BAIRD
Bronze by D. Gilbert.
Photo: N.P.G.

In 1941 he demonstrated television in natural colour. From 1941 B. was consulting technical adviser to Cable and Wireless Ltd.

BAIREUTH, Alternative form of **BAYREUTH**. **BAIRNSFATHER**, Bruce (1888–1959). British artist, celebrated for his 'Old Bill' cartoons of the F.W.W. In the S.W.W. he was official cartoonist to the U.S. Army in Europe, 1942–4.

BAJA CALIFORNIA. Mexican name of **LOWER CALIFORNIA**.

BAKER, Sir Benjamin (1840–1907). British civil engineer. B. in Somerset, he was chief assistant to Sir John Fowler in building the Metropolitan and District Railway, London, and with Fowler designed the Forth Bridge (1890) and the original Aswan Dam, Egypt.

BAKER, Sir Herbert (1862–1946). British architect. In 1892 he went to S. Africa, where he designed the Union Buildings and Govt. House, Pretoria, cathedrals in Pretoria, Rhodesia, and Cape Town, Rhodes's tomb in the Matopos and memorial on Table Mountain. Before the F.W.W. he went to India, where he helped Sir Edwin Lutyens in designing the New Delhi. In London he reconstructed the Bank of England, and designed India House, Africa House, and Church House, Westminster. He was knighted in 1926.

BAKER, Josephine (1905–). Coloured American singer and dancer. B. in Missouri, she joined a troupe of Negro actors at 13. In 1925 she rose to fame at the Folies Bergère in Paris and has toured the world.

BAKER, Richard St. Barbe (1889–). British forestry expert, founder of the Men of the Trees Society, which in 1932 became world-wide. In 1959 he settled in New Zealand.

BAKER, Sir Samuel White (1821–93). British explorer. B. in London, he founded an agricultural colony in Ceylon, built a railway across the Dobruja, and in 1861 set out to discover the source of the Nile. In 1863 he met Speke and Grant, who had anticipated him, but he pushed on into Central Africa to be the first to sight the Albert Nyanza and to find that the Nile flowed through it. His wife, Florence von Sass, accompanied him. In 1859–73 he was Gov.-Gen. of the Nile equatorial regions.

BAKEWELL, Robert (1725–95). British agricultural pioneer. B. at Dishley, Leics, he introduced the fine new Leicestershire breed of sheep, and a breed of cattle known as the Dishley or Leicestershire long-horn.

BAKEWELL. Market town (U.D.) in Derbyshire, England. Close by are Chatsworth House and Haddon Hall. It has textile industries founded by Arkwright (q.v.). Pop. (1961) 3,603.

BAKST, Léon (1866–1924). Russian artist whose real name was Rosenberg. B. at St. Petersburg, he displayed remarkable gifts as a theatrical designer, and

from 1900 was scenic artist to the Imperial theatres. In 1909 he painted the scenery for Diaghilev's Russian ballets. The latter part of his life was spent in Paris, and he exercised worldwide influence on the decorative arts of the theatre.

BAKU (bahkoo'). Cap. city of the Azerbaijan S.S.R. (U.S.S.R.), on the Apsheron peninsula, in the Caspian Sea. It is the principal centre of the Russian oil industry, which began here in the 1870s. Pipelines lead to Batumi on the Black Sea. B. is also chief port on the Caspian. Pop. (1967) 1,196,000.

BAKUNIN (bahkoon'yén), Mikhail (1814–76). Russian anarchist. B. in the Tver prov. of a noble family, he served in the Imperial Guard, but, disgusted with Tsarist methods in Poland, resigned his commission, and travelled abroad. In 1848 he was expelled from France as a revolutionary agitator. For his share in a brief revolt at Dresden in 1849 he was sentenced to death. The sentence was commuted to imprisonment, and he was handed over to the Tsar's government and sent to Siberia (1855). In 1861 he managed to escape to Switzerland, where he became recognized as the leader of the anarchist movement. In 1869 he joined the 'First International', but after stormy conflicts with Marx, was expelled in 1872. He had a large following, particularly in the Latin countries. He wrote books and pamphlets, including *God and the State*.

BALA (bah'lah). Town (U.D.) in Merionethshire, N. Wales, 18 m. N.E. of Dolgellau. During the 18th and 19th cents. it was renowned for its educational and religious associations. Pop. (1961) 1,603. B. Lake (Llyn Tegid) is the largest natural lake in Wales.

BALACLAVA (balaklah'va). Town in Ukraine S.S.R., in the Crimea, 6 m. S.E. of Sevastopol, which gives its name to a battle fought on 25 Oct. 1854, during the Crimean War, rendered famous by an ill-timed but gallant charge of the British Light Brigade of cavalry against the Russian entrenched artillery. About 700 all ranks were engaged; only 195 returned.

BALAKIREV (bahlah'kêrev), Mily Alexeievich (1837–1910). Russian composer, b. at Nijni-Novgorod. At St. Petersburg he won fame as a pianist, attached himself to Glinka, estab. the Free School of Music (1862), which stressed the national element, and was director of the Imperial Chapel 1883–95. He wrote orchestral and pianoforte music and songs, all imbued with the Russian national character and spirit.

BALALAIKA (balali'ka). Musical instrument, not unlike a guitar, much used by Russian peasants. It has a triangular sound box and 2, 3 or 4 strings played by plucking with the fingers.

BALANCE OF PAYMENTS. Summary of the financial results of economic relations between one country and the rest of the world over a certain period, usually a year. It consists in effect of 2 lists: on the one side, of the transactions which give rise to a demand for foreign currencies, i.e. to pay for which pounds have to be sold for dollars, francs, etc.; and on the other, of those transactions which are payable in sterling, i.e. foreign currencies have to be sold for pounds.

BALANCHINE (balantshin'), Georges (1904–). American choreographer. B. in St. Petersburg, he left Russia after the revolution, and was ballet master for Diaghilev 1925–9. In 1933 he went to U.S., became an American citizen, and since 1948 has been artistic director of the N.Y. City Ballet Co. He staged the ballet *Slaughter on Tenth Avenue* for *On Your Trees* (1936); others incl. *The Prodigal Son*, *Serenade*, and *Ballet Imperial*.

BALANOGLOSSUS. Genus of marine wormlike animals which, with a few near allies, forms the class Hemichordata or Enteropneusta, the lowest division of the Chordata. They burrow in sand or mud at the sea bottom, live at moderate depths, and are found in the warm and temperate parts of the world.

TELECOMMUNICATIONS. An artist's conception of the *Intelsat III* satellite off the east coast of Brazil. The 41-in. high cylinder is covered by 10,000 solar cells which convert sunlight into electricity. The many electrical and electronic components are housed in the antenna system, making the satellite a self-contained unit.

Courtesy of the American Telephone and Telegraph Co.

e.g. a submarine cable between Britain and Belgium can carry 216 simultaneous conversations. However, the chief method of speeding long-distance calls on land is microwave radio transmission, the drawback to this being that the transmissions follow a straight line from tower to tower, so that over the sea the system becomes impracticable.

The solution was found in the suggestion in 1954 by John R. Pierce of the Bell Telephone Laboratories that space satellites be used for overseas communications, and on 10 July 1962 *Telstar* (developed by Bell) was launched from Cape Kennedy. Such early types were fast-moving and low-orbiting, but the 1969 series of four *Intelsat III* commercial communications satellites are placed in synchronous orbit c. 22,300 miles from Earth and appear to be almost stationary. Two are over the heavy traffic area of the Atlantic, and one each over the Indian Ocean and Pacific. Telephony and television transmissions are carried simultaneously, and as the satellite spins clockwise to maintain stability, the antenna (which enables the satellite to receive and transmit signals) spins anti-clockwise at the same speed, so keeping it always pointed towards Earth in the correct communications position. The number of Earth stations is rapidly increasing (Etam, U.S.A. and Goonhilly, q.v., being noted for research), and by 1971 *Intelsat IV* satellites, with capacities exceeding 5,000 telephone circuits are contracted for service.

TELEGRAPH. See **TELECOMMUNICATIONS**.

TEL EL AMARNA. See **AMARNA TABLETS**.

TEL-EL-KEBIR (-keber). Village of Lower Egypt. Here Arabi Pasha was defeated by Sir Garnet Wolseley in 1882.

TELEPATHY (Gk. for 'feeling from afar'). The term was coined by F. W. H. Myers who defined it as 'the communication of impressions of any kind from one mind to another, independently of the recognized channels of sense'. The card experiments of Prof. J. B. Rhine of Duke Univ., N. Carolina, and of Dr. S. G. Soal of London Univ. have tended to prove the reality of the phenomenon. In the U.S.S.R., experiments have been made with T. as a means of communication between astronauts.

TELESCOPE. An instrument for magnifying distant objects. The 2 essential components are an object-glass - i.e. a lens or concave mirror - which

collects and focuses light, and an eyepiece for magnifying this image. Lippershey is credited with the 1st T. in 1608, but Galileo constructed several famous instruments from 1609. Newton designed the 1st reflecting T. The largest T. in the world is that at the Mount Palomar Observatory, 130 m. S.E. of Pasadena, California, which was installed in 1948. It has a 200-in. lens, and enables 'island universes' 2,000,000,000 light years distant to be seen. See also **RADIO TELESCOPE**.

TELEVISION. Name given to the reproduction by radio of scenes enacted at a distance. In 1873 it was realized that since the electrical properties of selenium vary according to the amount of light to which it is exposed, light could be converted into electricity, and the electricity could be used to re-convert them into light, and so be the 'splitting of the picture' so that the infinite variety of light and shade values might be transmitted and reproduced. In 1908 Campbell-Swinton pointed out that the transmission and reception would be better done by the use of cathode-ray tubes. Mechanical devices were used at the first practical demonstration of actual television, given by J. L. Baird in London on 27 Jan. 1926, and cathode-ray tubes used experimentally by the B.B.C. from 1934. The world's first public T. service was started from the B.B.C. station at the Alexandra Palace, in N. London, on 2 Nov. 1936. Both sound and vision programmes are received on the same aerial. The vision programme is taken to the vision receiver, at whose output end is a cathode-ray tube whose flattened end constitutes the viewing screen. The minute currents set up by the incoming vision signals are magnified in order to bring them up to a workable strength. The end of the tube, upon which the scene is to appear, has its inside surface coated with a fluorescent material which is bombarded by a stream of electrons emitted by a gun in the neck; light is thereby produced; a separate signal being used to control brightness. The resulting light and shade patterns give an effective reproduction of the original scene. Twenty-five pictures are built up each second with interlaced scanning (30 in U.S.), with a total of

TELESCOPE. The world's largest telescope at Mt. Palomar. U.S.A.

TIBERIUS, Claudius Nero (42 B.C.–A.D. 37). Roman emperor. The stepson and adopted son of Augustus, he had a distinguished military career, and on Augustus's death in A.D. 14 succeeded to the empire. He was a conscientious ruler under whom the empire prospered. In later life he retired to Capri.

TIBESTI (tēbestē). Mountainous region, rising to 11,000 ft., of the Sahara, in N. Chad, not far from the S. Libyan border. It is famed for its camels.

TIBET. Country of central Asia, occupying a lofty barren plateau bounded by the Himalayas to the S.

TIBET. A case of Buddhas with silver holy water bowls before it which formed the wall of the private sitting room of the Dalai Lama (q.v.) at Potala Palace, Lhasa.

Courtesy of Stuart Gelder

and S.W. and the Kunlun Mts. to the N., traversed from W. to E. by the Bukamagna, Karakoram, and other ranges, and having an average elevation of 13,000–15,000 ft. The Sutlej, Brahmaputra, and Indus rise in T., which has numerous lakes, many salty. The yak is the main domestic animal. Wool is exported, and other products incl. borax, salt, horn, musk, herbs, and furs. Gold, iron pyrites, lapis lazuli, and mercury are mined. Lamaism (q.v.), introduced in A.D. 640, is the prevailing religion. Polyandry is common. Lhasa is the cap.

T. was an independent kingdom from the 5th cent. A.D. From c. 1700 to 1912 it was under nominal Chinese suzerainty, a claim made effective in 1951 when the historic ruler, the Dalai Lama, was driven from the country and the monks (perhaps a quarter of the pop.) were forced out of the monasteries. T. became an autonomous region of China 1965. The Maoist Cultural Revolution was resisted by people and army. Area c. 471,700 sq. m.; pop. (1957) 1,270,000.

TIBULLUS, Albius (c. 54–19 B.C.). Roman poet, author of bucolic elegies and love poems.

TICHBORNE CASE. See ORTON.

TICKS. Two families of Acari in the Arachnida. Allied to the mites T. are blood-sucking disease-carrying parasites on men, animals, and birds.

TIDES. Rise and fall of waters due to the gravitational forces of the moon and sun. High water occurs at an average interval of 12 hours 24½ min. The highest or spring tides are at or near new and full moon, and the lowest or neap tides when the moon is in the 1st or 3rd quarter. Some seas, e.g. the Mediterranean,

have very small tides. Gravitational T. – the pull of nearby groups of stars – have also been observed to affect the galaxies.

TIECK (tēk), Johann Ludwig (1773–1853). German writer. One of the leaders of the Romantic movement, he wrote much poetry, and collected folk-tales, some of which he dramatized, e.g. *Puss in Boots*.

TIEN-SHAN. One of the great mountain systems of central Asia, on the borders of the U.S.S.R. and China, and extending eastwards across Sinkiang-Uighur into Mongolia. Pobeda (victory) Peak rises to 24,406 ft.

TIENTSIN (tyentsi'n). Chinese port, the cap. of Kopei prov., sit. where the Pei-ho joins the Grand Canal, 75 m. S.E. of Peking. Opened to foreign trade 1860, T. suffered badly in the Boxer rising, 1900. Its name means ford of heaven. Pop. (1957 est.) 3,220,000.

TIEPOLO (tē-ā-pōlō), Giovanni Battista (1692–1769). Italian artist. B. at Venice, he was a master of colour and executed delightful decorations in churches and palaces, with transparent atmospheric effects, e.g. the episcopal palace Würzburg and the palace of Madrid.

TIERRA DEL FUEGO (tē-er'rah del fwā'gō). Group of is. separated from the S. tip of S. America by Magellan Strait. The W., 10,460 sq. m., is part of the Chilean prov. of Magallanes; the E. is a prov. of Argentina (area 8,072 sq. m., pop. (1965) 8,000; cap. Ushuaia). The name (Span.) means land of fire. The southernmost point of the group is Cape Horn.

TIFLIS. Russian form of Tbilisi.

TIGER. Largest of the great cats (*Felis tigris*), formerly found in much of Central Asia but increasingly rare. The striped markings – black on reddish fawn – are present from birth, though rare cream or black specimens have been known. The T. reaches a length of 10–12 ft., may be either solitary or one of a family party, is a good swimmer, and feeds for preference on deer or cattle, man-eating being the result of weakened powers or shortage of other game.

TIGRIS. River of Turkey and Iraq, one of the two great rivers of Mesopotamia (q.v.). The T. rises in the Anti-Taurus and flows for more than 1,000 m. to join the Euphrates c. 45 m. above Basra. Mosul and Baghdad stand on it.

TILBURY. English port in Essex on the N. bank of the Thames, with important docks serving London. It dates from Roman times.

TILLEY, Vesta. Stage-name of British music-hall and pantomime artist Matilda Alice Powles (1864–1952), celebrated as a male impersonator.

TILLOTSON, John Robert (1630–94). English churchman, abp. of Canterbury from 1691. Dean of St. Paul's 1689–91, he was renowned as a preacher, and m. a niece of Oliver Cromwell.

TILLY, Jan Tserklaes, count (1559–1632). Imperialist general in the Thirty Years War. Notorious for his storming of Magdeburg in 1631, he was defeated by Gustavus Adolphus at Breitenfeld, and at the Lech, in which latter battle he was mortally wounded.

TILSIT. See SOVIETSK.

TIMARU (timaroo'). Port and airport on Canterbury Bight, S. Island, New Zealand, with an artificial harbour, freezing plants, flour mills, pottery works, breweries, etc. The name, from the Maori, means place of shelter. Pop. (1967) 27,600.

TIMBER. Name given to woods used for building, furniture making, pulp making, etc. It is divided into 3 groups: 1. Tropical hard woods, e.g. mahogany, teak, ebony, and rosewood, obtained from Central

TELEVISION. The complex 'chain' that brings the programme to the viewer: (top left) a studio used for announcements, interviews, weather forecasts, etc.; (top right) the production gallery during a variety show, with (left to right) secretary, assistant to the producer, producer, vision mixer and - far right - the monitor screens; (bottom left) the main control desk in the central apparatus room; (bottom right) the vision transmitter - the final radio-frequency stage is grid-modulated and is capable of a peak power output of approx. 40 kw; (centre) the tower and transmitting aerial system at the Crystal Palace station.

Courtesy of the British Broadcasting Corporation.

405 lines. From 1964 the B.B.C. effected a change to a system using 625 lines, in common with the rest of Europe, in order to facilitate trans-continental programmes (Eurovision).

For colour T. the scene to be transmitted is similarly analysed by the T. camera into a large number, 625, of horizontal lines and the information along each line is transmitted in sequence. In black and white T. it is only the brightness of each part of the line which is important. In colour T. it is necessary to measure the characteristics of the colour at every point along each scanning line, to transmit signals which are a measure of these characteristics, and at the receiver to build up a colour picture based on these signals.

Baird gave a demonstration of colour T. in London in 1928, but it was not until Dec. 1953 that the first successful system was adopted for broadcasting, in the U.S.A. This is called the N.T.S.C. system, since it was developed by the National Television System Committee, and variations of it have been developed in Europe, e.g. SECAM (sequential and memory) system in France and the PAL (phase alternation by line) in W. Germany. All 3 differ only in the way colour signals are prepared for transmission. Agreement on a universal European system failing in 1964, the U.K. in 1967 adopted PAL (as did W. Germany, Netherlands and Switzerland) and France and the U.S.S.R. adopted SECAM.

The method of colour reproduction is related to that used in painting, colour photography and printing. Just as the artist uses a palette with only a few basic colours which he combines to form a full range of hues in his picture, so in colour T. the receiver reproduces only three basic colours: red, green and blue. The effect of yellow, for example, is reproduced

by combining equal amounts of red and green lights, while white is imitated by a mixture of all 3 basic colours. It is then possible to specify the colour which it is required to transmit by sending signals which indicate the amounts of red, green and blue lights which are to be generated at the receiver.

To transmit each of these 3 signals in the same way as the single brightness signal in black and white T. would need 3 times the normal bandwidth, and reduce the number of possible stations and programmes to one third of that possible with monochrome T. The 3 signals are therefore coded into one complex signal which is transmitted as a more or less normal black and white signal, and which produces a satisfactory - or compatible - picture on ordinary black and white receivers. A fraction of each primary red, green and blue signal is added together to produce the normal brightness, or luminance signal. The minimum of extra colouring information is then sent by a special subcarrier signal which is superimposed on the brightness signal. This extra colouring information corresponds to the hue and saturation (see COLOUR) of the transmitted colour, but without any of the fine detail of the picture. The impression of sharpness is conveyed only by the brightness signal, the colouring being added as a broad colour wash. The various colour systems differ only in the way in which the colouring signals are sent on the subcarrier signal.

The colour receiver has to amplify the complex signal and decode it back to the basic red, green and blue signals; these primary signals are then applied to a colour cathode-ray tube. The colour display tube is the heart of any colour receiver. Many designs of colour picture tube have been invented and the most

America, W. Indies, W. Africa, and Asia. 2. Hardwoods of temperate regions in Europe and N. America, include oak, elm, beech, and the hard eucalyptus woods of Australia, known as jarrah and karri. 3. Timber of coniferous trees—pine, fir, spruce, larch, etc., which are the easiest of all trees to work. Sawdust and shavings compacted into sheets with synthetic resins, and often veneered on both sides, are used for their strength and stability. See also FORESTRY.

TIMBUKTU. Town in Mali Rep., 9 m. N. of the Niger on the S. edge of the Sahara. Founded in the 11th cent., it is an important caravan centre. Pop. (1967) 9,000.

TIME. For the purposes of everyday life, the alternation of day and night consequent upon the rotation of the earth on its axis. The natural unit of time is the true or apparent solar day, the period in which the earth makes a complete rotation relative to the sun. Apparent solar time suffers from the disadvantage that the days are not of equal length; a fundamental unit of time is adopted, therefore, the mean solar day, equal to the average length of the apparent solar day. Since the sun crosses different meridians at different moments there is a local apparent time and a local mean time, the local noon being defined as the passage of the sun across the meridian passing through that place. Since 1884 Greenwich meridian has been adopted as the prime meridian, from which all longitudes are measured. The local mean time of places W. of Greenwich is earlier than that of Greenwich, and vice versa (see Map I in Atlas). A system of standard or zone times has been adopted by most countries, the standard of time differing from Greenwich mean time by an integral number of hours. Each hour corresponds to 15° longitude. The meridian of 180° longitude more or less—the date line—separates the half-zone in which the time is 12 hours fast on Greenwich mean time from that in which it is 12 hours slow. The interval of time taken by the earth to make one complete rotation relative to the stars is called the sidereal day. See ATOMIC T.

TIMISOARA (tēmēshwah'rah). Town in W. Rumania, cap. of T. region. It has a univ. (1962), flour mills, breweries, and factories making tobacco, leather, cloth, paper, etc. Pop. (1966) 174,388.

TIMOR. Largest and most easterly island of the lesser Sunda group of the Malay archipelago. The N.E. portion is an overseas prov. of Portugal, area 7,330 sq. m.; pop. (1960) 517,079; cap. Dili. The Portuguese estab. themselves on T. in the 16th cent. The remainder is part of Indonesia (E. Nusa Tenggara), area 24,500 sq. m.; pop. (est.) 1,700,000, cap. Kupang (occupied by the Dutch in 1618). Sandalwood, pearl shell, béche-de-mer, coffee, copra, etc., are exported.

TIMOSHENKO, Semyon Konstantinovich (1895–). Marshal of the Soviet Union. B. in Bestarabia, of peasant parents, he served in the F.W.W., and distinguished himself in the Civil War 1918–21. In 1940 he was made a marshal, and during the S.W.W. held high commands. He was a member of the C.C.C.P. 1939–52.

TIMOTHY. The companion of St. Paul on his missionary journeys, and in his imprisonment, to whom 2 of the Pauline epistles are addressed.

TIN. The most usual of the several varieties of T. is a silver-white, crystalline metal, malleable and somewhat ductile, which crumbles to a greyish powder at low temperatures; symbol Sn (Lat. *stannum*), at. wt. 118.70, at. no. 50. It is found chiefly in the mineral cassiterite SnO₂ in Malaysia, Indonesia and Bolivia, and is chiefly used as a protective coating to resist corrosion on iron and steel, i.e. the 'tin can' food containers. Its use was known in the ancient world and the Romans in Cornwall, where working was renewed in the 1950s, were being worked in the Bronze Age. Other important alloys, besides bronze, incl. solder, type metal, pewter, and metals for bearings.

TINBERGEN, Nikolaas (1907–). Dutch zoologist. Professor in Animal Behaviour, Oxford Univ., from 1966, he has pub. *The Study of Instinct* (1951).

TINDOUF (tëndōōf'). Oasis and village, with an airfield, in the extreme W. of Algeria, c. 80 m. S. of the Moroccan border. Deposits of iron have been found in the neighbourhood, and Morocco in 1963 disputed Algerian ownership of the area.

TINTAGEL (tinta'jel). English village on the Atlantic coast near Camelford, Cornwall. Its castle is associated with the Arthurian legends.

TINTORETTO. Name given to the Venetian painter Jacopo Robusti (1518–94) because his father was a dyer (*Tintore*). Chief painter of the later Venetian school, he did many portraits and biblical scenes. 'The Paradise', in the Ducal palace at Venice, is the largest picture on canvas by any great master (34 × 74 ft.).

TIPPERARY. An inland county of Munster, Rep. of Ireland, watered by the Shannon and Suir. Some parts are mountainous; in the S.W. is the Golden Vale, one of Ireland's most fertile regions. Dairying is the chief industry. Clonmel is the co. town; other towns are Tipperary, Cashel, Carrick-on-Suir, and Nenagh. Area 1,643 sq. m.; pop. (1966) 122,812.

TIPPETI, Sir Michael (1905–). Brit. composer. Ed. at the R.C.M., he was director of music at Morley College 1940–51, and the same sensitive concern for humanity which led to his brief imprisonment as a conscientious objector in 1943 appears in his oratorio *A Child of Our Time* (1941). Later works incl. operas, notably *King Priam* (1961), two piano sonatas, a Magnificat and Nunc Dimittis written for St. John's Coll., Cambridge (1961), and incidental music for *The Tempest* (1962). He was knighted 1966.

TIPPOO SAHIB (1753–99). Sultan of Mysore, India, from 1782, when he succeeded his father Hyder Ali. He was killed in a war with the British.

TIRANA (tērāh'na). Cap. of Albania, 20 m. E. of Durrës. Founded in the 17th cent., T. makes cotton textiles, soap, cigarettes, etc., and is the seat of a univ. Pop. (1966) 152,500.

TIROL. Alpine prov. of Austria, lying between Bavaria and Italy. It is watered by the Inn and its tributaries. Cap., Innsbruck. Area, 4,883 sq. m.; pop. (1961) 462,476.

TIRPITZ (tir'pits), Alfred von (1849–1930). German admiral. As Sec. for the Navy 1897–1916 he was largely responsible for the F.W.W. U-boat campaign.

TIRSO DE MOLINA (tērsō dō mōlē'nah). Name taken by Gabriel Tellez (1571–1648), Spanish dramatist, who wrote some 400 comedies.

TIROL. The mountains surrounding Innsbruck are a winter sports paradise. Ski tracks lead down between the trees to the valley, and the Glungezer (8,837 ft.) rises in the distance. Courtesy of Austrian State Tourist Department.

successful of these is known as the shadow mask tube. It operates on similar electronic principles to the black and white T. picture tube, but the screen is composed

of a fine mosaic of over one million dots arranged in an orderly fashion. One-third of the dots glow red when bombarded by electrons, one-third glow green and one-third blue. There are 3 sources of electrons,

respectively modulated by the red, green and blue signals. The tube is so arranged that the shadow mask itself shadows the green and blue glowing dots from the red electrons, and so on. The glowing dots are

so small that from a normal viewing distance the colours merge into one another and a picture with a full range of apparent colours is seen.

TELFORD, Thomas (1757–1834). Scottish civil engineer. A shepherd's son, and erstwhile poet, mason and surveyor, he opened up N. Scotland by building 920 m. of new roads; constructed many aqueducts and canals incl. the famed Caledonian (1803–23); and erected the Menai bridge on the suspension principle, scarcely tried previously in England.

TELL, William. Swiss hero, who is said to have been sentenced, for refusing to salute the Habsburg badge, to shoot an apple off his son's head. Having accomplished this, he shot the tyrannical Austrian ruler. This story has no historical basis.

TELLURIUM. Silver-white, brittle, semi-metallic element of the sulphur group, discovered by Müller von Richterstein in 1782 and named by Klaproth in 1798 from Lat. *tellus*, earth; symbol Te, at. wt. 127.61, at. no. 52. It is used in colouring glass (blue to brown) and in the electrolytic refining of zinc. Its strength and hardness are greatly increased by addition of 0.1 per cent lead, when it is used for pipes and cable sheaths.

TEMA. Port of Ghana, 17 m. E. of Accra. Opened 1962 it superseded the 'surf' ports at Accra, Cape Coast, etc.

TEMESVAR. Hungarian form of TIMISOARA.

TEMPERA. A method of painting in which a gelatinous substance is employed. A form of T. was used in ancient Egypt, and by many Italian masters.

TEMPERATURE. The state of hotness or coldness of a body (measured in degrees Centigrade or Fahrenheit) and the condition which determines whether or not it will transfer heat to, or receive heat from, another body according to the laws of thermodynamics (q.v.). The normal temperature of the human body taken in the mouth is 98.4°F. Variation by more than a degree or so indicates ill-health, a rise signifying excessive activity (usually due to infection), and a decrease signifying deficient heat production (usually due to lessened vitality). To convert °C to °F multiply by $\frac{9}{5}$ and add 32; °F to °C subtract 32 then multiply by $\frac{5}{9}$.

TEMPEST, Dame Mary (Marie) Susan (1866–1942). British actress, noted for her stylish playing in such comedies as Somerset Maugham's *Penelope*.

TEMPLARS. A religious order, founded in 1119, of knights who took vows of poverty, chastity, and obedience and devoted themselves to the recovery of Palestine from the Saracens. They played a distinguished part in the Crusades of the 12th and 13th cents. The enormous wealth of the order aroused the envy of Philip IV of France, who arranged for charges of heresy to be brought against its members in 1307, and the order was suppressed.

TEMPLE, William (1881–1944). British churchman. Son of Frederick T. (1821–1902), liberal theologian and abp. of Canterbury 1896–1902, he became headmaster of Repton (1910–14), rector of St. James's, Piccadilly (1914–18), and as bp. of Manchester (1921–9) won a high reputation for his application of Christian beliefs to social matters. He was abp. of York 1929–42 and of Canterbury 1942–4, and wrote *Christianity and the State* (1928) and *Nature, Man and God* (1934), more influential than intellectually sound.

TEMPLE, Sir William (1628–99). English statesman. He had a distinguished diplomatic career, and negotiated the Triple Alliance with Holland and Sweden in 1668, and the marriage of Princess Mary to William of Orange in 1677. After 1681, disapproving of Charles II's policy, he retired to Moor Park, Surrey, where he wrote his attractive essays.

TEMPLE. A group of buildings S. of Fleet St., London, which formed the English headquarters of the Templars 1185–1313, and since the 14th cent. has been occupied by 2 of the Inns of Court, the Inner T. and the Middle T. The round church built by the Templars and consecrated 1185, severely damaged by air raids 1941, was restored by 1958.

TEMPLE. The centre of Jewish national worship at Jerusalem. Three Ts. occupied the site: Solomon's

TEMPERATURE. The industrial use of extremely low temperatures is illustrated by the liquefaction plant at Arzew, where natural gas from the Saharan field is reduced to –258°F. In the background are the 6,000 ton storage tanks, and a tanker Methane Progress. See Gas. Courtesy of the Gas Council.

TIRUCHIRAPALLI (tiroochirapa'li). Indian city in Madras state, on the Cauvery, cap. of T. dist. It makes cotton textiles, cigars, gold and silver filigree. A place of pilgrimage, it was cap. of Tamil kingdoms from the 10th–17th cent. The name means three-headed demon. Pop. (1961) 249,862.

TIRYNS. Site of Greek city in Argolis, with massive remains of the Mycenaean culture.

TISCHENDORF, Konstantin von (1815–74). German biblical scholar, who discovered in the monastery on Mt. Sinai the 4th cent. Codex Sinaiticus of the N.T.

TISSOT (tēsō'), James Joseph Jacques (1836–1902). French artist. Serving in the Franco-Prussian War, he subsequently went to London and produced a number of highly detailed and attractive renderings of the Victorian social scene.

TIT or **Titmouse**. Name given to members of the Passerine family Paradae, of birds. Six species, all insect eaters, are found in Britain, viz. the crested, blue, cole, great, marsh and long-tailed.

'TITANIC'. The supposedly unsinkable British White Star liner that struck an iceberg in 1912. More than 1,500 people were drowned.

TITANIUM. Lustrous, steel-like white metal resembling iron, burning in air, and the only metal to burn in nitrogen: symbol Ti, at. wt. 47.90, at. no. 22. Discovered by Gregor (1791), it was named by Klaproth in 1795 and obtained pure by Hunter in 1910. Its compounds occur in practically all igneous rocks and their sedimentary deposits. The oxide is used in high-grade white pigments, and some barium compounds are used in high value capacitors. Of great strength and corrosion-resistance, it is used in Concorde and spacecraft, and was found on the Moon in the Sea of Tranquillity.

TITANS. In Greek mythology, the sons and daus. of Uranus and Ge, who warred against Zeus, but were thrust into the underworld.

TITHES (literally, tenths). In England payment exacted from the inhabitants of a parish for the maintenance of the church and its incumbent. Originally it was payable in kind, and was levied on all yearly profits, but in the 19th cent. a rent charge was substituted. By the Tithe Act, 1936, rent charge was replaced by 'redemption annuities' payable to the Crown, govt. stock being issued to T.-owners.

TITHWA. Chinese name for URUMCHI.

TITIAN (tish'an). Anglicized form of the name of Italian artist Tiziano (Vecellio) (c. 1477–1576). He studied under the Bellinis, and was strongly influenced by Giorgione. In 1548 he painted the equestrian portrait of Charles V, and later executed many pictures for Philip II of Spain. His most important works incl. 'Bacchus and Ariadne', 'Venus and Adonis', and the 'Entombment of Christ'.

TITICACA (tētēkah'kah). Mountain lake in the Andes, part in Bolivia and part in Peru, over 12,500 ft. above the sea. It is 130 m. long; area 3,200 sq. m. Its waters are harnessed for hydro-electric power and irrigation. See illus. p. 148.

PRESIDENT TITO
Courtesy of the Yugoslav
Embassy.

TITO (tē'tō). Assumed name of the Yugoslav soldier and statesman Josip Broz (1892–). B. in Croatia, he served in the Austrian army during the F.W.W., was captured by the Russians, and fought in the Red Army during the Civil Wars. Returning to Yugoslavia in 1923, he became prominent as a Com-

munist. After the German invasion of 1941, he organized the National Liberation Army which carried on guerrilla warfare against the occupying forces. He received the title of marshal in 1943. In 1946 he became P.M. of the Federal Rep. and C.-in-C. of the armed forces, and was largely responsible for the settlement of the Yugoslav minority question on a federal basis. Under a new constitution in 1953 he became Pres., and was re-elected in 1954, 1958 and 1963. Denounced by the Cominform, particularly the U.S.S.R., in 1948 for his (successful) system of decentralized, profit-sharing workers' councils, very popular with the peasantry, his belief that there are different national roads to socialism, and his subsequent foreign policy of 'positive neutralism', Tito became one of the principal leaders of the uncommitted nations in world politics. Subsequently relations with the U.S.S.R. improved.

TITOGRAD (tē'tograd). Yugoslav town, cap. of Montenegro, on the Moracha. A commercial centre with tobacco factories and sawmills. It is on the site of Diocletian's birthplace. Until the S.W.W., when it was badly damaged, it was called Podgorica; it was rebuilt, and renamed in 1948 in honour of Marshal Tito. Pop. (1961) 30,657.

TITUS, Flavius Sabinus Vespasianus (A.D. 40–81). Roman emperor. Eldest son of Vespasian, he was a distinguished soldier and stormed Jerusalem in A.D. 70. He became emperor in 79.

TIVERTON (tiv'-). English town (bor.) in Devon on the Exe, 13 m. N. of Exeter. Here is Blundell's School (1604); the original building was given to the National Trust in 1954. Pop. (1961) 12,296.

TIVOLI (tē'vōlē). Ancient town of Italy, 20 m. E.N.E. of Rome, with ruins of Hadrian's villa and other Roman remains; also the Villa d'Este (1549) with its gardens.

T.N.T. (C₆H₅(NO₂)₃CH₃). Short for trinitrotoluene, a powerful high explosive; a yellow crystalline solid, prepared from toluene acted upon by sulphuric and nitric acids.

TOAD. Genus of amphibians, of world-wide distribution, except in Australia and Madagascar. The common T. (*Bufo vulgaris*) of Europe and Asia has a rough, usually dark brown skin in which there are glands secreting a poisonous fluid which makes it unattractive as food for other animals: it needs this protection as its usual progress is a slow, ungainly crawl. The eggs are laid, not in a mass as with frogs, but in long strings. The common T. of N. America, *B. lentiginosa*, is very similar.

TOADSTOOLS. See FUNGI.

TOBACCO. A narcotic plant of the genus *Nicotiana*, family Solanaceae, whose dried leaves are prepared for smoking, chewing, and as snuff. The generally cultivated species is *N. tabacum*, a native of America: it was introduced to Europe as a medicinal plant in the 16th cent. and the habit of smoking T. was probably brought to England c. 1556 by Hawkins. See CIGAR; CIGARETTE. The best-known Ts. are grown in U.S.A. (Virginia, N. and S. Carolina, Georgia, Kentucky, Tennessee); the Commonwealth (Ontario, Rhodesia, Malawi); and Turkey, Greece, and Bulgaria. By 'topping' the plants about a dozen large leaves are produced which are cured by exposure to the sun, air currents, or artificial heat, and subsequently mature for 2 or 3 years in the warehouse.

TOBAGO. See under TRINIDAD.

TOBATA. See under KITAKYUSHU.

TOBOGGAN. Flat-bottomed vehicle with curved-up tip, carrying runners, which is used in coasting

T., which was destroyed by Nebuchadrezzar; Zerubbabel's T., built after the return from Babylon; and Herod's T., which was destroyed by the Romans in A.D. 70. The Mosque of Omar occupies the site. The Wailing Wall is the surviving part of the western wall of the platform of the enclosure of the T. of Herod, so-called by tourists because of the oriental chanting style of the Jews in their prayers there. Under Jordanian rule Jews had no access to the spot, but took this part of the city in the 1967 campaign.

TEMPLE BAR. Western gateway of the City of London, England, standing between Fleet St. and the Strand. Rebuilt by Wren in 1672, it was removed in 1878 to Theobald's Park, Herts, but in 1967 it was proposed to return it to the City. The heads of traitors were formerly displayed on spikes on T.B. A figure of a griffin marks the site.

TEMPLER. Sir Gerald (1898-). British field marshal. He served in both world wars, but is especially remembered for his work as High Commissioner in Malaya 1952-4, following the assassination of his predecessor, Sir Henry Gurney. He was C.I.G.S. 1955-8.

TEMPLEWOOD. Samuel John Gurney Hoare, 1st visct. T. (1880-1959). British Cons. statesman. When For. Sec. in 1935, public indignation at the Hoare-Laval agreement for the cession of Ethiopian territory to Italy forced his resignation, but his later offices incl. Home Sec. 1937-9, Air Min. 1940, and ambassador to Spain 1940-4.

TENBY. Lord. See LLOYD GEORGE.

TENCH. Freshwater fish (*Tinca vulgaris*). A member of the carp family, it is about 18 in. long, olive-green above and grey beneath. The scales are small, and there is a barbel at each side of the mouth.

TENERIFE (tə'nɛrɪf). The largest of the Canary Islands, Spain. Santa Cruz de T., the main town, is the cap. of one of the 2 provs. of the group. The chief feature of the island is the active volcano of T. 12,815 ft. high. Area 795 sq. m., pop. (1960) 387,000.

TENIERS (ten'ɪəz), David (1582-1649), the Elder. Flemish painter. B. at Antwerp, he studied under Rubens and Elsheimer, and painted scenes of everyday life in Flanders. His son, David T. (1610-90) the Younger, was influenced by Rubens and Brouwer, became court painter to Archduke Leopold William, and is considered the finest of Flemish genre painters.

TENNESSEE (ten'esē). S. central state of the U.S.A., having the Unaka and Great Smoky mountains (part of the Appalachians) as its E. boundary, and the Mississippi as the W. The T. river waters the valley between the Appalachians and the Cumberland plateau, and re-enters the W. of the state, joining the Ohio in Kentucky. In the N., the Cumberland is the main river. Lumbering is important, and maize, wheat, cotton, tobacco are grown. Coal, zinc, pyrites and phosphate are among minerals worked. Research centres incl. Oak Ridge (q.v.) and the Arnold Engineering Development Centre for aircraft. The cap. is Nashville, the largest town Memphis. T. entered the Union in 1796. Pop. (1960) 3,567,089.

TENNESSEE VALLEY AUTHORITY. An organization in the U.S.A. created by an Act of Congress, 1933, to develop the Tennessee river system for navigation, flood control, and generation of hydro-electric power. A system of publicly owned dams was constructed to utilize the waters to improve land-management practices, and experiments in agricultural chemistry and biology were carried out.

TENNIEL (ten'i-el). Sir John (1820-1914). British humorous artist. B. in London, he joined *Punch* in 1850, and for over 50 years he was a leading cartoonist on that magazine. He illustrated *Alice in Wonderland* and other books.

TENNIS. An ancient game played by the English and French aristocracy from the 14th cent. It is now called Royal, Court, Lord's, or Real T. It is played

indoors on a court bisected by a net. Inlet into each end and one side of the court is a sloping roof, against which the ball may be hit. See LAWN TENNIS.

TENNYSON, Alfred, 1st baron (1809-92). British poet. B. at Somersby, Lincs, he was ed. at Trinity Coll., Cambridge, where he became the friend of A. H. Hallam. In 1827 he pub. *Poems*, by *Two Brothers*, written with Charles T. (1808-79), and in 1830 *Poems*, chiefly *Lyrical*. His full power emerged in the *Poems* of 1832. The death of Hallam in 1833 inspired the *In Memoriam*, not published until 1850. A further vol. of *Poems* appeared in 1842, and the less successful *Princess* in 1847. In 1850 T. m. Emily Sellwood, and succeeded Wordsworth as poet laureate. *Maud* followed in 1855, and the series of Arthurian legends *The Idylls of the King* appeared 1857-85. Among the later vols. are *Enoch Arden* (1864), *Lucretius* (1868), *The Revenge* (1878), *Ballads and other Poems* (1880), *Tiresias* (1885), *Demeter* (1889), and *The Death of Oenone* (1892). He also wrote verse dramas, the most successful being *Becket* (1884). In 1884 T. was raised to the peerage. He was buried in Westminster Abbey. His poetry is characterized by craftsmanship and musical utterance. His brother Charles T. adopted the additional surname

of Turner in 1830, and is remembered for his fine sonnets.

TENPIN BOWLING. A game of very early origin, said to have been taken to the U.S.A. by Dutch settlers in the 17th cent. Modern bowling lanes measure 60 ft. to the nearest pin and have an extra 15 ft. approach area; they are 3 ft. 6 in. wide. Balls weighing from 10 to 16 lb. are made of rubber composition and drilled with holes for thumb and two fingers. Pins made of maple are 15 in. high. The game is usually between two players or teams of 3, 4, or 5 players a side. A game of tenpins is made up of 10 'frames'. The frame is the bowler's turn to play and in each frame he may bowl twice. He scores one point for each pin knocked down, with bonus points for knocking all ten pins down in either one ball or two. The player or team making the greater score wins.

The U.S. National Bowling Association was formed in 1875. The game, in its modern form, is now finding considerable popularity in Britain.

TEPLICE. Industrial city and spa in Czechoslovakia 10 m. W. of Usti. Peat and lignite are mined, glass, porcelain, cement, paper, etc., made. Its springs give warm radioactive water. Goethe and Beethoven met at T. in 1812. Pop. (1967) 52,000.

TERBIUM. A metallic element, symbol Tb, at. wt. 158.93, at. no. 65. It is one of the group of rare earths.

TER BORCH (ter borch), Gerard (1617-81). Dutch painter. B. at Zwolle, the son of a painter, he came under the influence of Frans Hals, visited England, and painted studies of refined Dutch life, e.g. 'A Lady at Her Toilet' in the Wallace Collection. 'The Peace

down snow slopes or on artificial curved courses or 'chutes' of high-banked snow and ice, e.g. the Cresta run. As incl. in the Winter Olympics, tobogganing consists of two-man or four-man 'car' events in which steering is by a pivoting front section, and the action of the 'brakeman' from behind; the 2 single-man events are in fixed Ts., in which the competitor either sits (steering by leaning), or lies on his stomach (steering by footwork).

TOBOLSK. Town in Tyumen region, R.S.F.S.R., where the Tobol joins the Irtysh. It dates from 1587. Formerly engaged in the fur trade, it is a general trade centre with shipyards, sawmills, etc., and a theatre founded 1797. Pop. (est.) 46,000.

TOBRUK (tobrook). Port in Libya, the anc. Antipyrghos, 60 m. W. of Bardia, with the best harbour in Cyrenaica. Occupied by the Italians in 1911, during the S.W.W. it was taken by the Brit. in 1941, and was the site of a memorable unsuccessful siege by Axis forces April-Dec. 1941. In June 1942 the Brit. 8th Army retreated to Egypt, leaving a garrison at T. which was captured by the Germans later the same month, an event that led to changes in the N. African Brit. command. Pop. (est.) 5,000.

TOC H. Organization for Christian fellowship, founded at Poperinghe in 1915 by the Rev. Neville Talbot and the Rev. P. T. B. Clayton; it was named Talbot House in memory of Gilbert Talbot who was killed in action in July 1915. Toc H is the army signaller's designation of the initials.

TOCQUEVILLE (tokvèl'), Aléxis Charles Henri Clérel de (1805-59). French historian, author of *Démocratie en Amérique* (1835) and *L' Ancien Régime et la Révolution* (1856).

TOKYO. Seen here from the Imperial Palace grounds is Japan's most famous bridge, the Nijubashi, or Double Bridge, which crosses one of the several surrounding moats and leads to the main gate. It is used only on official occasions, such as when a foreign envoy presents his credentials to the Emperor. Courtesy of Japanese Embassy.

TODD, Alexander Robertus, baron (1907-). British organic chemist. B. in Glasgow, he was prof. at Manchester 1938-44, and Cambridge from 1944. Elected F.R.S. in 1942, he was awarded a Nobel prize in 1957 for his work on the nucleic acids: important in inherited characteristics - for transmitting and putting them into effect.

TODMORDEN. English industrial and market town (bor.) in Yorks W. Riding, 19 m. N.E. of Manchester. It is a cotton spinning and weaving town. Pop. (1961) 17,416.

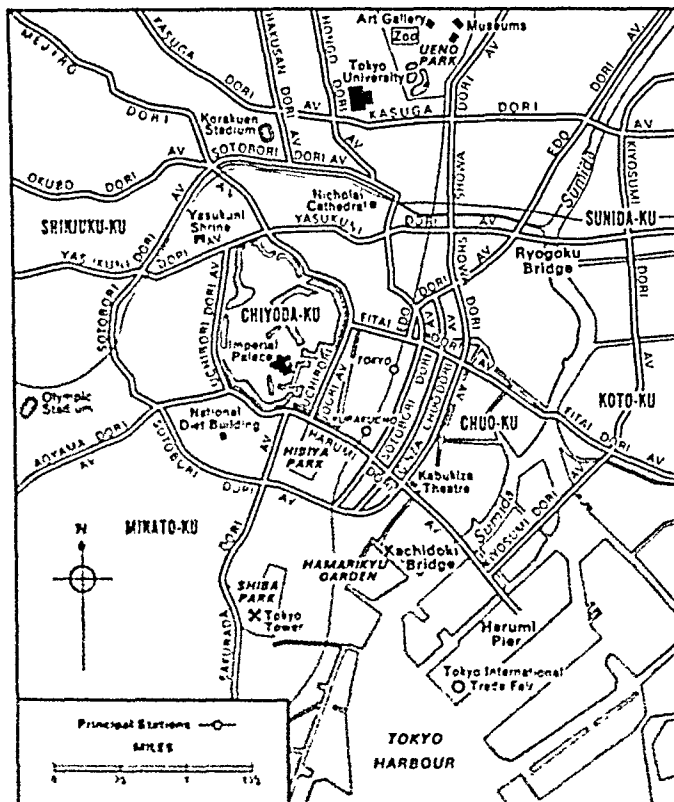

TODT (tôt), Fritz (1891-1942). German engineer. He was responsible for the Siegfried Line and the great autobahn roads, and as Min. for Armaments 1940-2 built the Atlantic Wall.

TÔGÔ. Rep. in W. Africa, between Ghana and Dahomey, with a short coastline on the Gulf of Guinea. Area 20,000 sq. m.; pop. (1965) 1,650,000, cap. Lomé. Cocoa, coffee, palm kernels, bauxite, chromite, and phosphates are among its products. The rep. is part of the German colony of T. which in 1922 was divided between France and Britain under League of Nations mandate, transferred in 1946 to U.N. trusteeship. In 1956 British Togoland voted for integration with Ghana (q.v.); French T. chose to become an independent rep. outside the Fr. Community. Independent T. suffered much unrest (see OLYMPIO) and in 1967 the army assumed power by a bloodless coup.

TÔJÔ, Hideki (1884-1948). Japanese politician. As P.M. 1941-4 he was mainly responsible for the attack on Pearl Harbor. He was tried and hanged as a war criminal.

TOKAJ (tô'koi). Hungarian town at the confluence of the Bodrog and the Tisa, famous for its wine. Pop. (est.) 6,000.

TÔKYÔ. Cap. of Japan, on T. Bay on the island of Honshu. The delta of the Sumida r. separates the city proper from the suburb of Honjo. Formerly

TOKYO

of Munster' (1648) in the National Gallery is one of his principal works.

TEREBINTH or Turpentine Tree. Small tree (*Pistacia terebinthus*) which yields Cyprus turpentine from the bark.

TERENCE (Publius Terentius Afer) (c. 190–159 B.C.). Roman dramatist. B. at Carthage, he was brought to Rome as a slave. After receiving his freedom he devoted himself to literature, and enjoyed the patronage of Scipio. His surviving 6 comedies, mostly imitated from Greek models, are distinguished for their subtle characterization and purity of style.

TERESA, St. (1515–82). Spanish mystic. B. at Avila, she entered a Carmelite nunnery, and in 1562 founded a new and stricter order. She was subject to fainting fits, during which she claimed to see visions. She wrote *The Way to Perfection*, *The Castle of the Soul*, and other mystical works, besides an autobiography. In 1622 she was canonized.

TERMITES. Soft-bodied insects forming the order Isoptera, also known as white ants. They are different in structure and metamorphosis from ants, but are social in habit, often building huge nests or *termitaria*. There are 5 chief castes or types, comprising 2 sterile forms and 3 reproductive forms. In the chief reproductive caste both males and females are winged; other reproductive members are short-winged or wingless. The sterile castes are wingless and are divided into *soldiers* which defend the colony, and *workers* which construct the termitaria. They feed largely on wood and do much damage in tropical and sub-tropical countries.

TERMITES. 1, queen; 2, winged male; 3, worker; 4, soldier.

TERMS. Periods of the year during which law courts, univs., or schools are open. In England the law courts sit usually from a date in Jan. to one in March (Hilary T.); April to May (Easter T.); May to July (Trinity T.); and Oct. to Dec. (Michaelmas T.). At Oxford the full Ts. are Hilary or Lent, Trinity, and Michaelmas T. At Cambridge the corresponding Ts. are Lent, Easter, and Michaelmas.

TERN. Genus of sea-birds (*Sterna*). Of the 8 species, 5 breed in Britain. They are characterized by long wings and a forked tail. The underparts are white or grey and the crown of the head black.

TERRA COTTA. A form of baked clay used in building, sculpture, and pottery. It was first employed in ancient countries where there was no stone available. The term is specifically applied to small figures or figurines, e.g. those found at Tanagra (q.v.).

TERRAPIN. Name commonly given to freshwater members of the tortoise order. The diamond back T., a N. American conical species, is considered a delicacy.

SCULPTURED TERRAPIN

TERRIER. Group of dogs formerly used in hunting rabbits and game. Small and fleet-footed, they are highly intelligent. They incl. the Fox Ts., Aberdeen T., Irish T., Sealyham T., and Bull T.

TERRITORIAL ARMY. Created in Britain as the

T. Force (1908) from volunteer regiments formally incorporated in 1872, it was raised and admin. by County Associations and intended primarily for home defence: it was renamed T.A. in 1922. Merged with the Regular Army in the S.W.W., it was revived 1947, but replaced 1967 by a smaller, more highly trained Territorial and Army Volunteer Reserve.

TERRY, Dame Ellen (1847–1928). British actress. She made her début in 1856, and from 1878 was Irving's leading lady, portraying Shakespearian roles. In 1864 she m. G. F. Watts (q.v.), but separation and divorce followed. While she lived with E. W. Godwin 1868–74, 2 children were born to her (see CRAIG, E. G.); and she subsequently made 2 further unsuccessful marriages. Later she appeared in plays by her friend, G. B. Shaw, with whom she had a delightful correspondence.

TERTIARIES. Associations of R.C. laymen who, without abandoning their family life or their usual callings, attempt to live in accordance with the teachings of the friars. The first such order was founded by St. Francis in 1221.

TERTULLIAN (c. 155–222). Christian father. B. at Carthage, he was converted c. 192. His theological works are the earliest important Christian writings in Latin. In later life T. became a Montanist.

TERZA RIMA. Italian metre used in Dante's *Divine Comedy*, consisting of 3-line stanzas in which the 2nd line rhymes with the 1st and 3rd of the following stanza. The best-known English example is Shelley's 'Ode to the West Wind'.

TEST ACT. Act passed in England in 1673 requiring all holders of public office to renounce transubstantiation and take the sacrament in an Anglican church, thus excluding R.C.s. and Nonconformists from office. Its clauses were repealed in 1828–9.

TETANUS. Lockjaw; an acute infectious disease caused by a bacillus chiefly found in richly manured soil. Its toxins affect the central nervous system, producing violent and painful spasm of the muscles.

TETRAZZINI (tetrahts'ne), Luisa (1871–1940). Italian coloratura soprano. B. at Florence, she made her début in 1895, and toured Europe and America.

TETUAN (tetoo-ahn'). Town in N.E. Morocco, near the Mediterranean coast, 40 m. S.E. of Tangier. Pop. (1961) 101,000.

TEUTONIC KNIGHTS. German military order, founded in 1190, which from 1228 devoted itself to crusading against the pagan Prussians and Lithuanians. They ruled Prussia until the 15th cent.

TEXAS. Southern state of the U.S.A., on the Mexican border and the Gulf of Mexico, until Alaska became a state (1959) largest in the Union. The Rio Grande del Norte and Red river form the S.W. and N.E. boundaries respectively. Other large rivers are the Canadian, Colorado, and Brazos. In the extreme W. is the barren Llano Estacado plateau which falls rapidly to the Great Plains and prairies. Texas leads all states in cotton, cattle, and petroleum production. Maize, oats, wheat, and fruit are cultivated. There are petroleum refineries, flour-mills, lumber-mills, and meat-packing factories. Austin is the cap., Houston the largest town, and both have univ. Area 267,339 sq. m.; pop. (1960) 9,579,677.

TEXEL (tek'sel). Dutch is., largest and most westerly of the Frisian islands, separated from N. Holland by the Marsdiep. Off T., Blake defeated Tromp and de Ruyter in 1654. Area 64 sq. m.

TEXTILES. Materials woven from spun thread. The art of weaving textiles is one of the earliest developed by man. Sheep's wool, linen, and silk were used in the Old World, cotton and animal fibres (from e.g. the llama) in the New. Spinning and weaving (qq.v.) remain essentially what they have always been, but the adaptation of machinery to both processes from the 18th cent. onwards not only made possible much quicker production, but also added greatly to

called Yedo and founded in the 16th cent., it was named T. (eastern city) in 1868 when the emperor removed his court there from Kyoto. T., badly damaged by an earthquake in 1923 when some 58,000 people were killed, was 80 per cent destroyed from the air in the S.W.W. Rebuilding was rapid, and in the 1960s there has been a movement of pop. to the perimeter, and the growth of Shinjuku to rival the central Ginza shopping area. Within T. are the Imperial Palace, National Diet, Nat. Theatre, T. Univ. (1877) and many others, museums, the Nat. Athletic Stadium, and it is the H.Q. of broadcasting, publishing and economic life. T. Internat. Airport is at Haneda. Pop. (1969) 11,000,000.

TOLEDO (tōlā'dō). (1) Spanish city on the Tagus, 42 m. S.W. of Madrid; capital of T. prov. Its cathedral was built 1227–1493, and there are Moorish remains. For centuries T. sword blades were famous; cloth and steel cutlery are manufactured. Pop. (est.) 35,000.

(2) City and port in Ohio, U.S.A., on Maumee Bay at the W. end of lake Erie. Very important industrially (motor vehicles, electrical appliances, glass, food processing, etc.). Pop. (1960) 318,003.

TOLKIEN (tol'kēn), John Ronald Reuel (1892–). British scholar. Merton prof. of English at Oxford 1945–59, he is celebrated for his creation of a world—Middle-Earth—peopled with Hobbits, Dwarfs, Men, etc., with their own language, history and myth, as described espec. in the 3 vols. of his epic story *The Fellowship of the Ring* (1954–5).

TOLLER, Ernst (1893–1939). German playwright. Taking part in the abortive Socialist revolt in Bavaria in 1919, he was imprisoned for 5 years, was an exile under Hitler, and committed suicide in New York. His Expressionist plays incl. *Massemensch* (1921: *Masses and Man*) and *Feuer aus den Kesseln* (1930: *Draw the Fires*).

TOLPUDDLE MARTYRS. Six farm labourers of Tolpuddle, nr. Dorchester, who in 1834 were transported to Australia for forming a Trade Union. After a nation-wide agitation they were pardoned 2 years later.

TOLSTOY (tol'stoi), Alexei Nikolaievich (1882–1945). Russian author. B. at Kuibyshev, he trained as an engineer, and in 1907 pub. a vol. of symbolist lyrics. After being a soldier in the White army, he went to Paris, and before returning to Russia in 1922 wrote the 1st part of his trilogy *Khozheniye po mukam* (*Road to Calvary*), awarded a Stalin prize in 1942. Other works are the historical novel *Peter the Great* (1929–34) and the play *Ivan the Terrible*.

TOLSTOY, Leo Nikolaievich (1828–1910). Russian novelist. B. of noble family at Yasnaya-Polyana in Tula, he fought in the Crimean War. A series of *Tales from Sebastopol* made him famous. His masterpieces are *War and Peace*, dealing with the Napoleonic struggle (1866), and *Anna Karenina* (1877). Later he devoted himself to preaching a gospel of brotherhood and love. Such books as *What is Religion?* and the *Kreutzer Sonata* have a didactic and religious purpose. *Resurrection*, his last novel, appeared in 1900. Excommunicated for his heretical views, he gave up the use of his property, lived as a peasant, and d. a fugitive from his home at Astapovo.

TOLTECS. Ancient people of Central America whose culture preceded that of the Aztecs and Mayas.

TOLUENE (tōl'ū-ēn). A colourless, inflammable liquid, $C_6H_5CH_3$, b.p. 110°C, and insoluble in water. Obtained as a by-product in the distillation of coal-tar, it is used as a solvent, and as a starting point in the manufacture of many substances incl. explosives (see T.N.T.), dyes, perfumes and sulphonic acids.

TOMASI (tōmah'si), Giuseppe, Prince of Lampedusa (1896–1957). Italian writer. He became famous for his novel *Il Gattopardo* (1958: *The Leopard*), pub. posthumously, which describes the Bourbon regime,

Garibaldi's victory, and the dawn of modern Italy, in his native Sicily, as experienced by the vividly portrayed character of Prince Fabrizio and his family.

TOMATO. Annual plant (*Lycopersicon esculentum*) of the Solanaceae family, native to S. America, sometimes also known as the 'love-apple' although any aphrodisiac quality of the globose red or yellow fruits is imaginary. As a salad crop Ts. are grown in N. America and Europe under glass.

TOMLINSON, H(enry) M(ajor) (1873–1958). British author. B. in London, he was a war correspondent in the F.W.W. and literary editor of the *Nation* and *Athenaeum* 1917–23. His books, which have the tang of the sea he loved in their writing, incl. *The Sea and the Jungle* (1912), *Gallions Reach* (1927), and *Morning Light* (1946).

TOMMY-GUN. Name for any light automatic carbine or rifle fired from hip or shoulder, derived from the U.S. Thompson sub-machine-gun.

TOMSK. Russian city, cap. of T. region, on the Tom r. and on a branch of the Trans-Siberian railway. It has a univ. (1888); sawmills, distilleries, factories making electric motors, plastics, etc. Pop. (1967) 311,000.

TOM THUMB. Name from an English folk tale frequently given to dwarfs, in particular Charles Sherwood Stratton (1838–83), known as General T.T.

TON. The English or long T. is 2,240 lb., the American or short T. is 2,000 lb. and the metric T. is 1,000 kg. or 2,204.6 lb.

TOINE, Theobald Wolfe (1763–98). Irish nationalist. Called to the Bar in 1789, he was prominent in the revolutionary society of the United Irishmen. In 1798 he accompanied the French invasion of Ireland, was captured and condemned to death, but cut his throat in prison.

TONGA. Polynesian kingdom in the S. Pacific consisting of 3 groups of islands; cap. Nukualofa on Tongatapu. They were visited by Captain Cook in 1773, who called them the Friendly Islands, and came under British Protection in 1900 under a treaty revised in 1958. King Tungi (1918–) succeeded his mother, Queen Salote, in 1965. He is assisted by a cabinet, privy council, and legislative assembly of 21. The state religion is Wesleyanism. Area 270 sq. m.; pop. (1966) 77,429.

TONGKING. See **TONKIN**.

TONGUE. Muscular organ in the floor of the mouth. It has a thick root attached to a U-shaped bone (hyoid) behind; a thin fold of mucous membrane

TOLTECS. These recently excavated monolithic figures 30 ft. high dominate the dusty plain at Tula, a Toltec site in the state of Hidalgo, Mexico.

Courtesy of the Mexican Government Tourism Dept.

fineness and variety of texture. The basic materials—wool from various animals, silk, linen, cotton—continue to be used, but from the invention in 1883 of artificial silk (rayon) thread by Hilaire de Chardonnet, man has developed a number of synthetic

TEXTILES. A drop of oil balances on two strands of a fabric treated with Scotchguard rain and stain repeller; untreated fibres would at once absorb the oil.

Courtesy of Minnesota Mining and Manufacturing Co.

threads, most of them derived chemically from coal or mineral oil, and marketed under trade names, e.g. nylon, terylene, and orlon; these are sometimes used alone, often together with natural fibres. Fabrics made by hand or machine knitting, though not strictly textiles (from Lat. *texere*, to weave) are much used in a similar way, especially for women's suits and dresses. Among the most welcome advances in 20th cent. T. manufacture have been the development of flame resistant and easy-care fabrics—crease resisting, permanently pleated, easily washable, and 'drip-dry', and treated with water and stain repeller.

TEYTE (tāt), Dame Maggie (1888–). British lyric soprano. Having studied under Jean de Reszke in Paris, she made an inimitable reputation in Mozartian roles, e.g. Cherubino in *The Marriage of Figaro*, and was coached as Mélisande by Debussy himself. In 1958 she was created D.B.E.

THACKERAY, William Makepeace (1811–63). British novelist. Son of an E. India Co. official, he was b. in Calcutta, and ed. at Charterhouse and Trinity Coll., Cambridge. After a brief essay at the law in the Middle Temple, he went to study art in Paris, and ultimately settled to journalism in London. For *Fraser's Magazine* he wrote 'The Yellowplush Correspondence' (1837–8), and 'The Great Hoggarty Diamond' (1841), and for *Punch* 'Mr. Punch's Prize Novelists' (1847) and 'The Snobs of England' (1847), using such pseudonyms as Michael Angelo Titmarsh. In 1836 he had m., but in 1840 his wife became insane in childbirth, leaving him with 2 daus. for whom he wrote the fairy tale *The Rose and the Ring* (1855). The 1st and greatest work to appear under his own name was *Vanity Fair* (1847–8), with its splendidly vixenish heroine Becky Sharp; later novels are *Pendennis* (1848), *Edmond* (1852; with a sequel *The Virginians* 1857–9), and *The Newcomes* (1853–5), in which T.'s tendency to sentimentality is most marked. In 1857 T. unsuccessfully attempted to enter Parliament, and 1860–2 was editor of the *Cornhill Magazine*, in which his last 2 novels, *The Adventures of Philip* and *Dennis Duval* were pub.

THAILAND (tā-). Independent kingdom in S.E. Asia, long familiar in the W. as Siam. It is bordered W. by Burma; S. by the Federation of Malaya, the Gulf of Siam, and Cambodia; E. by Laos. The name *Muang Tai*, meaning Land of the Free People and

translated Thailand, was adopted in 1939. T. is mountainous in the N., barren in the E., has a central fertile alluvial plain, and a narrow hilly strip in S. which is part of the Malay peninsula. The main rivers are the Menam (r.) Chao Phraya (important for transport) and its tribs.; the Mekong marks about 600 m. of the E. frontier, the Salween c. 200 m. of the W. The climate is tropical.

Rice is by far the most important crop; others incl. sugar, tobacco, cotton, peanuts; oxen, buffaloes, and pigs are reared. The forests of the N. produce teak; mineral deposits incl. tin, wolfram, rubies, sapphires. There is an inland waterway system, a rail system linked with that of Malaysia, and good modern roads. Bangkok is the capital and chief port, with a modern airport at Don Muang; other important towns are Thonburi and Chiangmai. Area 198,247 sq. m.; pop. (1967) 32,000,000. The people are predominantly Buddhist.

The Siamese monarchy, which until 1932 was absolute, originated c. 1350; the present dynasty dates from 1782. The Portuguese reached Siam in 1511, the Dutch followed in the 17th cent., in which cent. the (Eng.) East India Co. had a factory at Ayuthia for some years. A treaty of friendship and trade between Britain and Siam was signed in 1826; treaties with other European powers followed. After the F.W.W. increasing national consciousness led in 1932 to the promulgation of a constitution restricting the absolute power of the king. Siam was occupied in Dec. 1941 by the Japanese and declared war on Britain and the U.S.A. a few weeks later. Peace was signed in 1946, Siam having taken no active part in operations except to occupy parts of Burma and Malaya (subsequently voluntarily restored). King Ananda Mahidol was assassinated in 1946 and was succeeded by his brother Phumibol Adulyadit. A series of coups d'état, generally bloodless, led to rule by a military junta. Under a new constitution in 1968 there was provision for the King (who must be Buddhist) to appoint a Council of Ministers, who must be neither members of the Senate nor the House of Representatives. Communist guerrillas have been active from 1965, mainly in the N. and E. on the Laotian border, and in the far S. on the Malaysian border, and the U.S.A. has supplied military advisers and aid.

THAIS (thā-is) (4th cent. B.C.). Greek courtesan, mistress of Alexander the Great and later wife of Ptolemy, king of Egypt. She was supposed to have instigated the burning of Persepolis.

THALES (thā'lez) (640–546 B.C.). Greek philosophic scientist who fl. at Miletus in Asia Minor, made important advances in geometry, and as a materialist in philosophy put forward a theory that all matter and life originated from water.

THALYA. The muse of comedy in ancient Greece.

THALIDOMIDE. Tranquillizer developed by a W. German pharmaceutical firm in 1957; more than 5,000 expectant mothers gave birth to malformed children as a result of taking it, and the drug was withdrawn in 1961.

THALLIUM (Gk. *thallos* budding twig). Bluish-grey metal which tarnishes in air, is soft like lead, malleable but of low tenacity: symbol Tl, at. wt. 204.39, at. no. 81. Discovered spectroscopically and isolated by Crookes in 1861 (by Lamy 1862), it is a poor conductor of electricity and its compounds are poisonous, being used as rat poison and insecticide. Tl-104, a strong beta emitter, is used to gauge thickness of materials which absorb beta rays.

THAMES (temz). English river on which London stands. Its headstreams rise in the Cotswold hills above Cirencester and unite above Lechlade. Its chief tributaries from the N. are the Windrush, Evenlode, Cherwell, Thame, Colne, Lea, and Roding; and from the S. Kennet, Loddon, Wey, Mole, Darent, and

connects its lower middle line with the floor of the mouth. It is covered with mucous membrane containing many nerves and also the 'taste buds', which distinguish the qualities called salt, sweet, sour and bitter. It directs food to the teeth, presses food and drink back into the throat in the act of swallowing and by modifying the voice forms articulate speech.

TONKA. Tree (*Dypteryx odorata*) of the family Leguminosae, native to Guiana. Its fruit, a dry, fibrous pod, contains a single aromatic seed used in perfumery.

TONKIN. Name of a former Fr. protectorate, from 1950 part of Vietnam (q.v.). It was in the T. Gulf, after a minor engagement on 2 Aug. 1964, that the U.S. destroyers *Maddox* and *Turner Joy* reported a night attack on 4 Aug. by N. Vietnamese torpedo boats. It has been suggested that radar and sonar effects were misinterpreted, but a retaliatory air attack was made on N. Vietnam which led to the eventual despatch of over 1,000,000 U.S. troops to battle in S. Vietnam.

TONSILS. A pair of gland-like bodies between the 2 arches (fauces) of the soft palate at the back of the mouth. Their function is not understood, but they hold disease germs and are often removed by surgery.

TONSURE. Ritual shaving or cutting of the hair as a symbol of dedication to the clerical state in the R.C. and Eastern Orthodox churches. In the former, where it is now used only by certain orders, the crown is shaved, leaving a fringe all round to resemble Christ's crown of thorns; in the latter the hair is now merely shorn close.

TOOKE, John Horne (1736–1812). British politician and philologist. B. in London, he was in holy orders 1760–3. He was a supporter of Wilkes (q.v.) 1765–71, and his radical opinions led to his trial and acquittal on a charge of treason in 1794. He wrote the philological *Diversions of Purley*.

TOOLS. Machine. Strictly the term incl. wood-working M. Ts., but is generally used for all tools operated by power. They are the basis of industrial production, and their most important use is in the manufacture of engines and machines. The chief M.T. is the lathe, from which the others have developed. The industrial potential of a country is often calculated by the number of M.Ts. available. Automatic control of M.Ts. is an important modern development. See AUTOMATION.

TOOWOOMBA. City, agricultural centre, and health resort in S.E. Queensland, 65 m. W. of Brisbane. Pop. (1966) 55,774.

TÓPAZ. Mineral valued as a gemstone. It crystallizes in the rhombic system and has a perfect basal cleavage. It varies from yellow to white, blue or pink, and is found in Brazil, Peru, Ceylon, and Siberia.

TOPE. Small shark (*Galeus canis*) ranging through temperate and tropical seas. Dark grey above and white beneath, it reaches c. 7 ft.: the young are born alive, sometimes 50 at a time.

TOPE. Kind of tumulus found in India and S.E. Asia; a Buddhist monument usually built over a relic of Buddha or his disciples. They date from 300 a.c.–a.d. 400, and the most famous are at Sanchi, near Bhillika, C. India.

TOPEKA. Cap. of Kansas, U.S.A., on the r. Kansas, 55 m. W. of Kansas City. Laid out in 1854, T. became state cap. in 1861. It has woollen mills, machine shops, foundries, etc. Pop. (1960) 119,484.

TOPLADY, Augustus Montague (1740–78). British Anglican clergyman. B. at Farnham, he pub. his famous hymn 'Rock of Ages' in 1775.

TOPOLSKI, Feliks (1907–). Polish artist. Settling in England in 1935 and becoming naturalized in 1947, he has a versatile gift for war pictures, theatrical settings and costumes, murals and portraits.

TOR BAY. Co. bor. in S. Devon, England, created 1948 from the bor. of Torquay and the U.D.s. of Bradburn and Paignton. Pop. (1966) 96,980.

TORGAU (tor'gow). Town in Leipzig dist., E. Germany. Here Frederick the Great defeated the Austrians in 1760, and U.S. and Russian forces first made contact in the S.W.W. Pop. (est.) 18,000.

TORINO. Ital. form of **TURIN**.

TORNADO. Extremely violent revolving storm, caused by a rising column of warm air propelled by strong wind. The diameter may be a few hundred yards or less, but the T. rises to a great height, and is marked by swirling funnel-shaped clouds. Moving at a speed of c. 30 m.p.h., Ts. are common in the Mississippi basin and cause great destruction.

TORONTO. Canadian city, cap. of Ontario (1797), on the N. shore of Lake Ontario. It is an important

TORONTO. The waterfront has excellent modern facilities, the marine terminal development and the increased number of vessels calling being a direct result of the construction of the St. Lawrence Seaway. Courtesy of the Port of Toronto.

port, and industries incl. making of farm machinery, motor cars, meat packing and other food processing. Cheap power is drawn from Niagara Falls. It is also a great commercial, banking, and publishing centre. Central T. is being re-developed, with underground shopping streets linking the giant complex, of which T.-Dominion Centre and New City Hall form part. It has theatres (O'Keefe Centre, Massey Hall and Royal Alexander Theatre), is the nat. television centre, and mounts an annual Canadian Nat. Exhibition. There is a univ. (1827). T. dates from 1794, built on the site of a French fort (1749); it was constituted a city 1834. Pop. (1966) 664,584; Greater T. 2,158,496.

TORPEDO. Self-propelled submarine projectile used in naval warfare. Invented in 1805 by R. Fulton, the 1st T. consisted of an explosive charge only, and propulsion mechanism was added in 1862 by R. Whitehead. The modern T. is cigar-shaped, 21 in. by c. 20 ft., powered by compressed air, with a warhead of 500 lb. of T.N.T. In the S.W.W. 'human Ts. were piloted by suicide crews. From the 1960s Ts were used by atomic-powered submarines (q.v.), pickets and destroyers.

TORPEDO FISH or Electric Ray. Family of fishes, the Torpedinidae, whose electric organs between the pectoral fin and the head can give a powerful shock. *T. hebetans* is found off England.

TOROUAY (torkē). English seaside resort and residential town in S. Devon on Tor Bay. Once a fishing village, T. dates from the 12th cent., and in 1968 became part of the co. bor. of Tor Bay (q.v.).

TORQUEMADA (törkāmāh'dah), Tomás de (1420–98). Spanish inquisitor. B. at Valladolid, he became a Dominican, revived the Inquisition, and is said to have been responsible for the burning of 10,000 persons. T. also expelled the Jews from Spain.

Medway. From Gravesend the Thames estuary extends to the Nore. There are many bridges across the river, the lowest being Tower Bridge; there are road, underground railway, and pedestrian tunnels underneath the river at various points in the London area; and ferries at Woolwich and Gravesend. Below London Bridge is the Pool, and below again the great London docks. The T. is controlled by the Port of London Authority (1909) from its mouth to Teddington (where a lock prevents the tide from going farther upstream) and thence upstream by the T. Conservancy Board (1857). Length from Lechlade to the Nore, 210 m. To prevent flooding under freak weather conditions, as in 1953, 1956, a fixed barrage has been suggested at Woolwich making the T. non-tidal.

THANET, Isle of. N.E. corner of Kent, England, bounded by the North Sea and the r. Stour. It was an island until the 16th cent. On it stand Margate, Ramsgate, and Broadstairs.

THANKSGIVING DAY. In U.S.A., a national holiday observed on the 4th Thursday in Nov. It was first celebrated in 1621 by the Pilgrim Fathers.

THANT, U (1909-). Burmese diplomat. B. in the Irrawaddy Delta, he became a schoolmaster and, together with his close friend U Nu (q.v.), worked for his country's independence. In 1952 he joined the Burmese mission at the U.N., succeeded Hammar-skjöld as Sec.-General in 1961: term renewed 1966.

THEATRE. The place or building in which dramatic performances are given. The first European Ts. were in Greece and were originally open spaces round the altar of Dionysus. The great stone theatre at Athens was begun c. 500 B.C., and its semicircular plan provided for an audience of 20,000 or 30,000 people sitting in tiers on the surrounding slopes; it served as a model for the Ts. that were erected in all the important cities of the Graeco-Roman world. After the collapse of the Roman Empire the Ts. were

16th cent., and that at Vicenza, built by Palladio (1518-80), still exists. The first London T. was the 'Theatre' in Shoreditch built in 1576 by James Burbage (d. 1597), who also opened the first covered T. in London, the Blackfriars (1596). Famous London Ts. incl. the Haymarket (1720, rebuilt 1821), Drury Lane (1663), and Her Majesty's (1705), both several times rebuilt. In the U.S.A. the centre of the theatrical world is N.Y. City, with numerous Ts. on Broadway, e.g. the Biltmore, Booth, Lunt-Fontanne, Helen Hayes, and Lyceum, although Williamsburg, Va. (1716), and Philadelphia (1766) had Ts. earlier.

In the 20th cent. the large commercial theatres have been affected by the cinema and TV, but there have also been developments resulting in a new infusion of life. These incl. the 'little Ts.' off Broadway, which often give a dramatist his first production, and of which the first was the Theatre Guild (1919), others being the Gate, Phoenix, Greenwich, Mews, and Bowler Lane; in Britain the work of the repertory theatres, e.g. Birmingham, and of the Old Vic (q.v.); and in Ireland the Abbey (q.v.). Since the S.W.W. in Britain Ts. have often been built as a symbol of civic pride, e.g. at Chichester, Coventry and Guildford; and since c. 1925 the U.S.A. has acquired a number of community, regional and univ. Ts., e.g. the Alley Playhouse, Houston; Margot Jones's T., Dallas; the Actors Workshop, San Francisco; Penthouse T., Univ. of Washington, Seattle. Ts. are also often incl. as part of larger cultural centres, e.g. the Lincoln Center, N.Y.; Place des Arts, Montreal; and the National T. planned for London's South Bank as a home for the National T. co. launched in 1963. National Ts., of which the Comédie Française (founded by Louis XIV in 1680 and with a permanent home from 1792) was the first, exist in Stockholm, Moscow, Athens, Copenhagen, Vienna and elsewhere. See illus. pp. 37, 355, 749.

THEBAINE (thē'bā-in) (C₁₇H₂₃NO₃). A highly poisonous alkaloid contained in opium.

THEBES (thēbz). Ancient city of Upper Egypt on both banks of the Nile, probably founded under the 1st dynasty. About 1600 B.C. it became the capital of all Egypt. The present villages of Luxor and Karnak mark its site, and contain magnificent ruins.

THEBES. Capital of Boeotia in ancient Greece. In the Peloponnesian War it was allied with Sparta against Athens, and for a short time after 371 B.C. it was the most powerful state in Greece. Alexander the Great destroyed it in 336 B.C. and although it was restored it was never again important. Pindar (q.v.) lived at T.

THEFT. See LARCENY.

THEISM (thē'izm). Belief in the existence of a God, usually conceived of as a personal being, who has revealed Himself to the world in a special revelation. In its widest use the term means belief in the existence of gods. See DEISM.

THEMIS. In Greek mythology, personification of law and order. She was the dau. of Uranus and Ge.

THEMISTOCLES (c. 514-449 B.C.). Athenian soldier and statesman. In 483 he was largely responsible for the ostracizing of Aristides, and for 10 years he exercised almost supreme power in the state. In the Persian War he played a distinguished part in the battle of Salamis (480) and then rebuilt and strengthened the walls of Athens. About 470 Spartan influence secured his banishment, and he fled into Asia, where Artaxerxes, the Persian king, received him with favour. Henceforth he lived at Magnesia.

THEOCRITUS (fl. c. 270 B.C.). Greek poet. B. probably at Syracuse, he spent much of his life at Alexandria. His *Idylls*, truthful pictures of rustic life distinguished by deep feeling for nature, have served as a model for all subsequent pastoral poetry.

THEODOLITE (thē-o'dolīt). Instrument used in surveying for the measurement of horizontal and

THEATRE. An Elizabethan playhouse designed and made by Dr. Richard Southern, with C. Walter Hodges. Not intended to represent any one Elizabethan theatre in particular, it combines all the information we have about any of them.

Courtesy of the British Council.

deserted, but extant Roman Ts. are at, e.g., Orange, France, and near St. Albans, England. In medieval times, several stages of wood and canvas, one for each scene, were set up side by side in fairgrounds and market squares for the performance of mimes and miracle plays. Small enclosed Ts. were built in the

TORRES STRAIT. An 80 m. wide channel separating New Guinea from Australia, scattered with reefs, discovered by Torres in 1606.

TORRES VEDRAS. Town of Portugal, 25 m. N. of Lisbon. The 'lines of T. V.' were built by Wellington in the Peninsular War. Pop. (est.) 5,000.

TORRICELLI (tor-rêchel'îe), Evangelista (1608-47). Italian physicist. B. at Faenza, he discovered the principle of the barometer, inventing the T. tube and the T. vacuum in 1643.

TORSION. The state of strain set up in a material by virtue of being twisted, e.g. when a thread wire or rod is twisted, the T. which is set up in the material returns or tends to return to its original state. An instrument which makes use of this is the T. balance, a sensitive device for measuring small gravitational or magnetic forces, or electric charges, by balancing these against the restoring force set up by them in a suspended fibre.

TORTOISE. Reptile of the order Chelonia, of which the marine and freshwater forms are known as turtles. It has a characteristic 'shell' consisting of a curved upper carapace and flattened lower plastron which are joined at the sides, and the head and limbs may be retracted within it, to a greater or lesser extent, in time of danger. Herbivorous it has no teeth but the mouth forms a sharp-edged 'beak'; eggs are

N. AFRICAN TORTOISE

laid in mud and hatched by the sun. Best-known species are the small N. African T. (*Testudo graeca*), also found in Asia Minor, often imported to languish in British gardens, and the giant species of the Galapagos and Seychelles which reach a great age, maybe 4 ft. long, and yield c. 200 pounds of meat - hence their almost complete extermination by passing ships.

TORTOISE ISLANDS. Eng. name of the GALAPAGOS Is.

TORTOSA. Fortified town in Tarragona prov., Spain, on the Ebro, with a cathedral founded 1158. T. was a Roman colony. Pop. (est.) 15,000.

TORTURE. The infliction of bodily pain, esp. to extort evidence or confession. At one time a feature of most judicial systems, it was abolished in England c. 1640, in Scotland in 1708, and in France in 1789, but was revived by the Nazis and Japanese during the S.W.W. The usual instruments of T. in Europe were the rack, wheel, thumbscrew, and boot.

TORUN (to'rôony). Town in Poland on the Vistula, 30 m. E.S.E. of Bydgoszcz, founded by the Teutonic Knights (13th cent.). It has a univ. Copernicus was b. at T. Pop. (1966) 115,000.

TORY PARTY. Name applied c. 1680-1830 to the forerunner of the present Conservative Party. The original Tories were Irish guerrillas who warred on the English; hence the name was transferred, at first in a derogatory sense, to the Royalists who opposed the Exclusion Bill. The T.P. largely supported the revolution of 1688, but fell under suspicion of Jacobite sympathies and were excluded from office 1714-60. Under George III they regained power, which they held almost continuously until 1830. They were traditionally the party of squire and parson, as opposed to the Whigs, who drew their support largely from the trading classes and Nonconformists. Of late years the name has been revived as an alternative to Conservative.

TOSCANINI (toskahnē'ni), Arturo (1867-1957). Italian conductor. B. in Parma, he made La Scala, Milan - where he conducted 1898-1903, 1906-8, and 1920-9 - the world's leading opera house. However, he was opposed to the Fascist régime, and in 1936 returned to America, where he had conducted at the

Metropolitan 1908-15, the N.B.C. Symphony Orchestra being formed for him in 1937. He retired in 1954.

TOSTI (tos'tî), Sir Francesco Paolo (1846-1916). Italian song writer, who went to England in 1875, and was appointed singing-master to the royal family. His best-known song is 'Good-Bye'.

TOTALIZATOR or Tote. Device on horse-racing courses and greyhound tracks to record bets and pay winnings without the intervention of a bookmaker.

TOTEMISM. System of belief common among primitive peoples, whereby the members of a clan believe themselves to be descended from an animal or plant: this totem (Algonquin Indian, 'my guardian spirit') is sacred to them, and they are forbidden to eat it. T. is usually associated with exogamy, i.e. members of the same clan are forbidden to intermarry. It still exists among the Australian aborigines and the Red Indians, and formerly prevailed over most of Europe and Asia.

TOTILA (d. 552). King of the Ostrogoths, who warred with Justinian for Italy, and was killed by Narses at the battle of Taginae.

TOTTENHAM. District of the Greater London bor. of Haringey. Settled in Danish times, it has a church (All Hallows) dating in part from the 12th cent. Bruce Castle (16th cent.) was built on a site belonging to Robert Bruce's father. T. Hotspurs are a famous football team.

TOUCAN (tookahn'). Bird of the family Ramphastidae with very large, often brilliantly coloured beak, espec. in the genus *Ramphastes*. Living in small flocks in S. America forests, Ts. often have handsome plumage, are omnivorous, and lay their eggs in holes in trees.

TOULON (toolon'). Sea-port in Var dept., France, on the Mediterranean, 30 m. S.E. of Marseilles. It is the chief Mediterranean naval station of France, with defences commanding the sea and large dockyards. Petroleum refining, and the making of chemicals,

furniture, and clothing are among its industries. The Roman Telo Martius, T. was made a port by Henry IV. Occupied by the Brit. in 1793; Napoleon first distinguished himself in driving them out. Pop. (1962) 172,586.

TOULOUSE (toolôôs'). Cap. of Haute-Garonne dept., S. France, on the Garonne 140 m. S.E. of Bordeaux, T. was an important place before the Roman conquest. Cap. of the Visigoths and later (781-843) of Aquitaine, it has a medieval cathedral and a univ. (c. 1230). Woollens and silks are manufactured. Wellington repulsed Soult at T. in 1814. Pop. (1962) 330,570.

TOULOUSE-LAUTREC (-lawtrek'), Henri Raymond de (1864-1901). B. at Albi, where a L. Museum commemorates him, he was dwarfed and crippled by both his thighs having been broken in boyhood. Of noble descent - the counts of T. - he now preferred to plunge himself into the unquenching and convivial life of Montmartre and produced posters and colour lithographs of striking linear dexterity showing can-can dancers, circus acrobats, brothel scenes, etc. His life was shortened by his heavy drinking. See illus. p. 1042.

TOUQUET-PARIS-PLAGE (tookâ'), Le. Fashionable resort of France, Pas-de-Calais dept., on the Channel coast with fine sands and pinewoods. Pop. (1962) 4,064.

TOURAINÉ (toorân'). Ancient prov. of France

TOUCAN

vertical angles. It consists of a small telescope mounted so as to move on 2 graduated circles, one horizontal and the other vertical, while its axes pass through the centres of the circles.

THEODORA (thē-ōdō'ra) (c. A.D. 508-548). Byzantine empress, consort of Justinian, whom she m. c. 523; earlier she had been his mistress and a common courtesan. As queen she earned a high reputation for courage and charity.

THEODORA'KIS, Mikis (1925-). Greek composer. He gained an internat. reputation by 'Zorba's dance', etc. Active in left-wing politics, he was imprisoned in 1967 for attempting to overthrow the military regime.

THEODORIC I. King of the Visigoths, 418-51. He was a grandson of Alaric, warred successfully against the Romans, but united with them against the Huns under Attila and fell at Châlons.

THEODORIC (455-526). Founder of the Ostrogothic monarchy in Italy; called Theodoric the Great. Succeeding his father as king about 474, he warred intermittently against the Romans and was given permission by the Emperor Zeno to secure Italy from Odoacer. With 250,000 Ostrogoths he overran the peninsula, and on Odoacer's murder was accepted as king. For 33 years he ruled with ability.

THEODOSIUS (thē-ōdō'shius) I (c. 346-395). Roman emperor of the East, called the Great. B. in Spain, he served under his father, a Roman general, in Britain and the Balkans, and in 379 was called to become emperor of the East as the colleague of Gratian, the emperor of the West. In 4 years T. completely dispersed the Goths, concluding peace with them in 382. In 394 T. became sole emperor. The chief blot on his fame is his massacre of 7,000 citizens of Thessalonica in 390 after there had been rioting in the circus.

THEOLOGY. The science of religion, concerned chiefly with God and with man's relationship to Him. Natural T. deals with what may be discovered by reason and a study of the natural world; Revealed T. has for its subject the specific doctrines of Christianity, Islam, and the other world faiths.

THEORBO (thē-ōr'bo) or Archlute. Musical instrument, a large member of the lute (q.v.) family.

THEO'SOPHY. Name applied to various systems of 'divine wisdom', but in particular to the doctrines of the Theosophical Society founded in 1875 by Mme. Blavatsky (q.v.) and Col. H. S. Olcott. These are based on the Hindu principles of karma and reincarnation, with Nirvana as the goal of the aspiring soul.

THEOTOCOPULL. See GRECO, EL.

THÉRÈSE OF LISIEUX (1873-97). French saint. B. at Alençon, dau. of a watchmaker, she entered a Carmelite convent at L. at 15, where her holy life induced her superior to ask her to write her spiritual autobiography. She advocated the Little Way of goodness in small things in everyday life, and is known as Little Flower of Jesus. She d. of tuberculosis and was canonized in 1925.

THERM. Unit of heat used in the measurement of domestic and industrial gas, and equal to 100,000 Btu (British thermal unit, q.v.).

THERMIC LANCE. Tube of mild steel, enclosing tightly-packed small steel rods and fed with oxygen. On ignition temperatures above 3000°C are produced and the T.L. becomes its own sustaining fuel. It rapidly penetrates walls and steel plate, e.g. a 9-in. steel door can be cut through in less than 30 sec. Criminals have used T.L.s but alarm systems can detect the radiation emitted by a T.L. in operation.

THERMIONICS. That branch of science that deals with the emission of electrons from matter under the influence of heat. A thermionic valve, largely used in telegraphy and telephony and still more so in radio and radar, is a device using space conduction by thermionically emitted electrons.

Classification is into diode, triode, and multi-electrode valves, but in many applications valves are now being replaced by transistors (q.v.).

THERMODYNAMICS. The science of the transfer of heat into other forms of energy, on which is based the study of the efficient working of engines, e.g. the steam and internal combustion. The 3 laws of T. are: (1) energy can be neither created nor destroyed; heat and mechanical work being mutually convertible; (2) it is impossible for an unaided self-acting machine to convey heat from one body to another at a higher temperature; (3) it is impossible by any procedure, no matter how idealized, to reduce any system to the absolute zero of temperature in a finite number of operations. Put into mathematical form these have widespread applications in physics and chemistry.

THERMOMETER. An instrument for measuring temperature (q.v.) depending on the nearly uniform

change in physical properties, of expansion in a solid liquid or gas; or the change in electrical properties such as resistance with temperature. The commonest form used at ordinary temperatures is the mercury or alcohol-in-glass T. reading directly against a scale marked in degrees Centigrade (Celsius) or Fahrenheit. (See p. 1027 for conversion factor.) Other instruments incl. *thermocouples* depending on the voltage generated between the junctions of 2 dissimilar metals; *resistance thermometers* depending on the change of electrical resistance of a conductor with temperature; *pyrometers* (q.v.) *thermistors* depending on the change of electrical resistance of a semiconductor with temperature; *bimetallic strips* depending on dissimilar rates of expansion of 2 metals, and *gas thermometers* depending on the gas laws.

THERMOPYLAE (ther-mo'pilē). A narrow pass in Greece from Thessaly to Locris, famous for its heroic defence against the Persians in 480 B.C. by Leonidas, King of Sparta, and c. 1,000 men, who fought to the death.

THESSALONIKI. Port in Greek Macedonia at the head of the Gulf of T. with some industry - textile making, shipbuilding, brewing, tanning, etc. It is on the site of Thessalonica, the Roman city to whose inhabitants St. Paul addressed 2 famous epistles. Founded from Corinth 315 B.C., captured by Saracens A.D. 904, by the Turks 1430. It was restored to Greece 1912. It was an Allied base in the F.W.W., and was occupied by the Germans 1941-44. Pop. (1961) 377,026.

THESSALY. Prov. in Greece, bordering the Aegean, a fertile plain enclosed by mts. and comprising the towns of Kardhitsu, Larisa, Magnesia, and Trikala. Area 5,907 sq. m.; pop. (1961) 694,461.

THIBAUT, J. A. See FRANCE, ANATOLE.

THIERS (tyār), Louis Adolphe (1797-1877). French statesman and historian. B. at Marseilles, he achieved fame with his *History of the French Revolution* (1823-7) and *History of the Consulate and Empire* (1845-60). He held cabinet posts under Louis Philippe, and from 1863 led the parliamentary opposition to Napoleon III. As head of the provisional

THERMOMETER

TOULOUSE-LAUTREC. Dated 1899, 'The tête-à-tête supper' was probably set in the Parisian restaurant Le Rat Mort. It is said that the man was the artist Charles Conder. Courtesy Institute Galleries, London.

whose cap. was Tours. It is covered by Indre-et-Loire dept. and part of Indre.

TOURCOING (toorkwaŋ). Town in Nord dept., France, near the Belgian border, an important textile centre since the 12th cent. Pop. (1962) 90,105.

TOURMALINE. Hard, brittle mineral, a complex of various metal silicates, and containing aluminium and boron. Small Ts. are generally found in granites and gneisses. The common varieties are opaque, ranging from black (schorl) to pink, and the transparent gemstones may be colourless (achroït), rose pink (rubellite), green (Brazilian emerald), blue (indicolite, Brazilian sapphire), or brown (dravite).

TOURNAI (töörnā) (Flem. Doornik). Town in Hainaut prov., Belgium, on the Scheldt. On the site of a Roman relay post, it has a Romanesque cathedral dating from the 11th cent. Carpets, cement, leather are made. Pop. (1966) 33,309.

TOURNAMENT or Tourney. Martial sports popular in the Middle Ages. Events incl. mounted combats and mock fights with sword, spear or dagger. The T. was introduced into England from France in the 11th cent., and flourished until the 16th cent.

TOURNEUR (tur'ner), Cyril (c. 1575-1626). English dramatist. His *Reverger's Tragedy* (pub. 1607) and *Athelst's Tragedy* (pub. 1611) are among the most powerful of Stuart dramas.

TOURS (toor). Cap. of Indre-et-Loire dept., France, in the Loire valley, historic cap. of Touraine. The cathedral (12th-16th cent.) was badly damaged in the S.W.W. Iron and steel goods, boots and shoes are made. Balzac was b. at T. Pop. (1962) 96,472.

TOUSSAINT LOUVERTURE (toosaŋ'loovertür), Pierre Dominique (c. 1746-1803). Negro soldier. B. at Haiti, he was a slave and joined the insurrection of 1791. He helped the French when they abolished slavery, became C.-in-C. of St. Domingo in 1796, and turned against the French when they re-imposed slavery. He was captured and d. in prison in France.

TOVIVY (tö'vi), Sir Donald Francis (1875-1940). British composer. He studied under Parry, was

appointed Reid prof. at Edinburgh in 1914, and was knighted in 1935. He wrote an opera, *The Bride of Dionysus*, and chamber music.

TOWER OF LONDON. Fortress on the Thames bank to the E. of the City. The keep, or White Tower, was built c. 1078 by Bishop Gundulf on the site of British and Roman fortifications. It is surrounded by 2 strong walls and a moat (now dry), and was for cents. a royal residence and the principal state prison. The T.o.L. is today a barracks, an armoury, and a museum. Among prisoners executed there were More, Anne Boleyn, Katherine Howard, Lady Jane Grey, Essex, Strafford, Laud, and Monmouth. See REGALIA.

TOWN PLANNING. System of land use in the best interests of the community, with especial stress on aesthetic as well as practical considerations, such as the separation of traffic and pedestrians, provision of easily accessible shops, schools, cinemas, theatres, etc.

TOWNSVILLE. City in N. Queensland, Australia, on the E. coast, founded 1868, port for sugar and meat. Japanese aircraft attacked T. in 1942. Pop. (1966) 58,760.

TOXAEMIA (toksē'mia). Invasion of the blood by poison, especially that generated within the body.

TOYNBEE, Arnold (1852-83). British economist and reformer. At Oxford he devoted himself to economics and history, and lectured widely in industrial districts on social problems. He went to White-chapel in 1875, and was associated with the work of Canon Barnett. **TOYNBEE HALL**, the first of many social and educational settlements in E. London, was named after him in 1885. His nephew Arnold Joseph T. (1889-) was director of studies at the Royal Institute of International Affairs 1925-55. In his *A Study of History* (10 vols 1934-54) he attempts, as a metaphysician, to discover the laws governing the rise and fall of civilizations. The latter's son Philip T. (1916-) is a novelist and became in 1950 foreign correspondent of the *Observer*. *Pantaloons* and *Two Brothers* (1964) are instalments of a verse autobiography.

TRABLUS. Arabic form of **TRIPOLI** Libya.

TRABZON (trabzon). Turkish city, cap. of T. il,

TOWN PLANNING. Rebuilding the 62 acre Barbican area in the City of London, devastated by bombing in the Second World War, presents in miniature all the problems of town planning. In the centre are St. Giles's Church, Cripplegate, the City of London School for Girls and the Guildhall School of Music and Drama. Besides three 36 storey residential towers, there are residential quadrangles in the immediate foreground and centre background, and the remaining high blocks contain offices. A podium 20 ft. above the street connects the various buildings, shops and tube stations, and separates pedestrians from the traffic, car parks and warehouses below.

Courtesy of Chamberlin, Powell and Bon

govt. in 1871 he negotiated peace with Prussia and suppressed the Paris Commune. He was 1st President of the 3rd Republic 1871-3.

THIRKELL, Angela. See MACKAIL, J. W.

THIRTY-NINE ARTICLES. See ANGLICAN COMMUNION.

THIRTY YEARS WAR. The war fought in Germany 1618-48. Nominally a religious war, it originated in the ambition of the Habsburgs to obtain political control of all Germany. The war began with the revolt of the Bohemians against Austrian rule in 1618-20, and after their defeat was continued by certain Protestant princes, who were aided during 1625-7 by Denmark. Gustavus Adolphus of Sweden intervened on the Protestant side in 1630, and overran N. Germany before he was killed in 1632. After the Swedish defeat at Nördlingen (1634) France entered the war in 1635, and inflicted several defeats on the emperor's Spanish allies. By the Treaty of Westphalia (1648) France received S. Alsace, and Sweden certain provinces on the Baltic, while the emperor's authority over Germany became purely nominal. The war was largely fought by armies of mercenaries, such as those of Wallenstein, Tilly, and Mansfeld, which devastated Germany.

THISTLE. Several genera of plants in the family Compositae, the best-known being *Carduus* and *Cirsium*, found in the N. hemisphere. The flower heads are purple and cottony, the leaves are deeply indented and spiny: a T. is the Scottish national emblem.

THISTLE, Most Ancient and Most Noble Order of the. Scottish order of knighthood (K.T.) founded in 1687. There are sixteen knights, and the Queen is sovereign of the order. Its motto is *Nemo me impune lacessit* (No one provokes me with impunity).

THISTLEWOOD, Arthur (1770-1820). English Radical. A follower of Thomas Spence, he was active in the Radical movement and was executed as the chief leader of the Cato St. conspiracy.

THOMAS, St. One of the 12 apostles. He is said to have preached Christianity in Parthia or India; hence the ancient S. Indian churches are called 'the Christians of St. T.'. He is not the author of the so-called Gospel of St. T. See BIBLE.

THOMAS, Dylan Marlais (1914-53). Welsh poet. B. in Swansea, son of the English master at the local grammar school where he was ed., he worked as a reporter on the *South Wales Evening Post*, then settled as a journalist in London and pub. his 1st vol. *Eighteen Poems* in 1934. He reached a lilting mastery of his medium in *Deaths and Entrances* (1946) and the radio 'play' *Under Milk Wood* (1954): the short stories of *Portrait of the Artist as a Young Dog* (1940) are autobiographical. A dipsomaniac, he d. in N.Y. where he had made a no. of reading and lecture tours. Repeatedly anthologized, e.g. his celebration of his 30th birthday 'Poem in October' and 'Fern Hill', an evocation of his youth, he has become a legend.

THOMAS, (Philip) Edward (1878-1917). British poet and author of books on the English countryside. In 1916 he pub. *Six Poems* under the pseudonym of Edward Eastaway; vols. under his own name were *Poems* (1917) and *Last Poems* (1918), dealing with nature idealistically. T. was killed in action in the F.W.W. at Arras. His wife Helen T. (1877-1967) pub. the biographical vols. *As it was*, and *World without End*.

DYLAN THOMAS. By A. E. John, in Cardiff Museum.

Photo: British Travel and Holidays Association.

THOMAS, Ronald Stuart (c. 1914-). Welsh poet. Rector of Managon 1942-54 and vicar of St. Michael's Eglwysfach from 1954, he has made a reputation with such vols. as *Song at the Year's Turning* (1955), which illustrate the conflict between traditional Welsh values and 'English' sterily encroaching civilization.

THOMAS A KEMPIS. Alternative name of THOMAS HAMMERKEN (c. 1380-1471), German monk. B. at Kempen, near Düsseldorf, he entered the Augustinian monastery of Zwolle. His *Imitation of Christ* is perhaps the best-known devotional work ever written.

THOMPSON, Francis (1859-1907). British poet. B. at Preston, he settled in London, where he fell into poverty and ill health. Wilfrid and Alice Meynell procured the publication of his poems in 1893, incl. 'The Hound of Heaven'. In this and later vols. (*Sister Songs* and *New Poems*) T., who was a Roman Catholic, expressed a mystic view of life.

THOMPSON, John Taliaferro (1860-1940). American colonel, and inventor of the T. sub-machine-gun, predecessor of the tommy-gun. B. in Kentucky, he retired from the army in 1914.

THOMSON, Elihu (1853-1937). American inventor. B. in England, he lived in U.S.A. from 1858, and was prof. of chemistry and mechanics at Philadelphia (1876-80). He founded, with E. J. Houston, the Thomson-Houston Electric Co. in 1882, later merging with the Edison Co. to form the General Electric Co. As director of the research laboratory, he made important advances into the nature of the electric arc, invented the first high-frequency dynamos and transformers. He also contributed to improvements on many aspects of incandescent lighting and radiology.

THOMSON, James (1700-48). British poet. B. in Roxburghshire, he wrote the influential descriptive poem *The Seasons* (1726-30) in blank verse, and the song, 'Rule, Britannia'.

THOMSON, James (1834-82). Scottish poet, who wrote as 'B.V.' (Bysshe Vanolis). B. in Renfrewshire, he became an army schoolmaster and a journalist. His poem 'The City of Dreadful Night' (1880) reflects deep despair.

THOMSON, Sir Joseph John (1856-1940). British physicist. Ed. at Manchester and Cambridge, where he became Cavendish prof. of experimental physics (1884-1918), he organized the Cavendish research laboratory which became a world-famous centre of atomic research. His work resulted in the discovery of the electron which inaugurated the electrical theory of the atom, and his elucidation of positive rays and their application to an analysis of neon led to Aston's discovery of isotopes. He is regarded as the founder of modern physics, and was awarded a Nobel prize in 1906 and the O.M. in 1913. His son Sir George Paget T. (1892-), ed. at Cambridge, was prof. of physics at the Imperial Coll. of Science 1930-52, where he carried out aeronautical and atomic research, and in 1937 received (with C. J. Davisson) a Nobel prize for work on interference phenomena in the irradiation of crystals by electrons. He was master of Corpus Christi Coll., Cambridge, 1952-62.

THOMSON OF FLEET, Roy Herbert (1894-), 1st baron. British newspaper proprietor. B. in Toronto of Scottish descent, he bought his first newspaper in 1934 and came to control many groups in Britain (incl. Kemsley Newspapers 1959 and Times Newspapers Ltd. 1966, producing both *The Times* and *Sunday Times*), Canada and the U.S.A., in addition to several radio and TV stations. In 1962 he set up the T. Foundation, a £5,000,000 trust, to train developing countries in the techniques of mass media. Created a baron in 1964, he lost his Canadian citizenship.

THOR. The Norse god of thunder. He was represented as a man of enormous strength, who defended mankind against demons.

a port exporting fruit, tobacco, hides and skins, and other local produce, on the Black Sea 220 m. S.W. of Batum. T. is on the site of a Greek colony. The Black Sea Univ. was estab. 1963. Pop. (1965) 65,600.

TRACTARIANISM. See OXFORD MOVEMENT.

TRADE MARK. Distinctive indication (either a name or 'mark') attached to the product of a particular proprietor who must register a legal claim: in Britain it must conform to the T.Ms. Act, 1905.

TRADES UNION CONGRESS. Voluntary organization of trade unions, founded in Britain in 1868, in which delegates of affiliated unions meet annually to consider matters affecting their members. Today there are some 150 affiliated unions, with an aggregate membership of 9,000,000. The Annual Congress elects a General Council which functions for the T.U.C. in all matters concerned with trade unions.

TRADE UNIONS. Organizations of employed workers, formed primarily for the purpose of collec-

TRADE UNIONS. Jack Jones of the T.G.W.U. at the Trades Union Congress 1969, and (below) the General Council at the centenary congress of 1968.

Photo: Syndication International

tive bargaining, and also to provide trade and friendly benefits for members. Trade unions of a kind existed in the Middle Ages as journeymen guilds, and combinations of wage earners were formed in the 18th cent., but modern trade unionism is a product of the Industrial Revolution. Five cents. of repressive legislation in Britain culminated in the passing of the Combination Acts (q.v.), but on the repeal of these in 1824-5, organizations of workpeople were permitted to engage in collective bargaining although still subject to legal restrictions and with no legal protection for their funds until the enactment of a series of Trade Union Acts, 1871-6. Successive Acts of Parliament broadened the unions' field of action, e.g. the 1913 Act which allowed the Unions to engage in political activities. The T.U.C. was for many years mainly representative of unions of craftsmen but in the last decade of the 19th cent. the organization of unskilled labour, beginning with the London dock strike of 1899, spread rapidly. Industrial Unionism, meaning the organization of all workers in one industry or trade began about this time; but the characteristic feature of the so-called New Unionism at the time of the 1899 dock strike was the rise of the general labour unions (e.g. the Dock Workers and General Labourers in the gas industry, etc.). In more recent years trade unionism has spread to professional workers, technicians, farm workers, administrative and clerical workers, as well as women.

The restrictive Trade Disputes and T.U. Act (1927), passed after the general strike of 1926, was repealed in 1946. Plans for legislative reform of T.U., outlined in a White Paper *In Place of Strife*, were abandoned by the Wilson govt. in 1969 (incl. compulsory 'cooling-off' periods before strike action; strike ballots and arbitration of inter-union disputes) in favour of allowing the T.U.C. to regulate them.

The great growth of American T.U., apart from the abortive Knights of Labor 1869-86 (see also A.F.L./C.I.O.) came in the post-Depression years. The movement has a record of greater bitterness and violence than in Britain, but at the present-day has the reputation of being more open to the acceptance of new techniques, taking a broader view of these as conducive to eventual greater prosperity. Probably the most advanced T.U. system is that of Sweden where conflicts of U.s. within an industry - frequent in Britain - are largely eliminated, and where employers and U.s. co-operate more freely.

TRAFALGAR, Cape. Low headland in S.W. Spain off which Nelson defeated a Franco-Spanish fleet on 21 Oct. 1805, near the W. entrance to the Straits of Gibraltar. Nelson was mortally wounded in the battle.

TRAHERNE, Thomas (c. 1637-74). English metaphysical writer. B. at Hereford, he was vicar of Teddington 1667-74. His moving lyric poetry and his prose *Centuries of Meditations* (1908), were undiscovered until the late 19th cent.

TRAIL. Canadian city in British Columbia on the Columbia r. At Tadenac, c. 2 m. away, is one of the largest non-ferrous smelters in the Brit. Commonwealth. Pop. (1966) 11,600.

TRAJAN or **Marcus Ulpius Trajanus** (c. A.D. 52-117). Roman emperor. B. near Seville, he distinguished himself as a soldier, and was adopted as heir by the emperor Nerva, whom he succeeded in A.D. 98. A just and conscientious ruler, he carried on a correspondence with Pliny on the Christians. He conquered Dacia 101-106, and much of Parthia 114-117. T.'s column at Rome commemorates his victories.

TRAMWAYS. The conveyance system, characterized by the running of wheeled vehicles along parallel rails laid on or alongside public highways. It originated in the colliery vehicles which ran on iron rails from 1776. The earliest passenger T. system was in 1832, in New York, and in the 1860s horse-drawn trams plied in London and Liverpool. The first electric trams, between Portrush and Giant's Causeway, were opened in 1883. Ts. are now powered either by conductor rails below ground or conductor arms connected to overhead wires. Their lack of manoeuvrability in traffic has led to their supersession by buses.

TRANQUILLIZERS. See SEDATIVES.

TRANSCAUCASIA. Area of the U.S.S.R. to the S. of the Caucasus. Here lie Armenia, Azerbaijan (qq.v.), and Georgia which in 1922 formed the Transcaucasian S.F.S.R., broken up in 1936 when each of its members became a separate rep. of the U.S.S.R.

TRANSCENDENTALISM. A mode of thought, originating with Kant, 'concerned not with objects, but with our mode of knowing objects'. From Germany T. was introduced into England, and influenced Coleridge and Carlyle. In New England T. developed c. 1840-60 into a mystical doctrine which saw God as immanent in nature and the human soul. Outstanding American transcendentalists are Thoreau and Emerson.

TRANSDUCER. A power-transforming device which enables energy in any form (electrical, acoustical, mechanical) to flow from one transmission system to another. The energy flowing to and from a T. may be of the same or of different forms, e.g. an electrical motor receives electrical energy and delivers it to a mechanical system; a gramophone pick-up crystal receives mechanical energy from the needle

THOREAU (thō'rō), Henry David (1817–62). American author and naturalist. B. at Concord, Mass., he is best known for his *Walden, or Life in the Woods* (1854). Some 30 vols. of later works are based on his daily journals of walks and nature observations.

THORIUM. Dark grey, naturally radioactive metal, widely distributed throughout the world in minerals, particularly monazite beach sands: symbol Th, at. wt. 232.05, at. no. 90. Discovered by Berzelius (1828), it has a half-life 1.39×10^{10} years, and its greatest potential use is breeding from it uranium-233, an excellent fuel for power reactors.

THORNDIKE, Dame Sybil (1882–). British actress. She made her early reputation as a splendid *St. Joan* (1924) and has subsequently played in Shakespeare, Ibsen, Eliot, and several of N. C. Hunter's plays, e.g. *A Day by the Sea*. She was created D.B.E. in 1931. Often appearing with her was her husband Sir Lewis Casson, and her brother Russell T. (1885–) is also an actor and author of novels featuring 18th cent. parson crook 'Dr. Syn'. The T. Theatre, Leatherhead (1969), is named after her, and the theatre workshop after her husband.

THORNECROFT, Peter, baron (1909–). British Cons. politician. Pres. of the Board of Trade (1951–7), Chancellor of the Exchequer (1957–8), Min. of Aviation (1960–2), and Min. of Defence (1962–4). He was created a life peer 1967.

THORNHILL, Sir James (1676–1734). English historical painter. He decorated the dome of St. Paul's, and executed paintings for Hampton Court and Greenwich Hospital. Hogarth was his pupil and son-in-law.

THORWALDSEN (tōr'-), Bertel (1770–1844). Danish sculptor. B. at sea, he studied in Rome where he became friendly with Canova. His output was enormous, and he excelled in classical and mythological subjects, e.g. 'The Triumph of Alexander'.

THOTH (tōt). The Egyptian god of wisdom and learning. He was represented as a scribe with the head of an ibis, the bird sacred to him.

THOTHMES (tōtmes). Name of 4 Egyptian kings of the 18th dynasty. **THOTHMES I** (reigned 1540–1501 B.C.) founded the Egyptian empire in Syria. His grandson, **THOTHMES III**, reigned c. 1500–1446, extended the empire to the Euphrates, and conquered Nubia.

THRACE. Region in S.E. Europe, on the N. shore of the Aegean where the anc. Greeks estab. a number of colonies. It was ruled in turn by Persia, Macedon, Rome, and Byzantium. The Turks held it from the 15th cent. until 1878 when Bulgaria secured the N., Greece the S. After the F.W.W. T. was divided between Greece, of which it forms a prov. (3,315 sq. m.; pop., 1961, 356,708), and Turkey (9,065 sq. m.).

THREE RIVERS. See *TROIS RIVIÈRES*.

THRIFT. Genus of plants (*Statice*) in the family Plumbaginaceae. Sea T. (*S. armeria*) occurs on sea-shores and cliffs in Europe. The leaves are small and linear. The pink flowers rise on straight stems.

THROAT. The structures in front of the neck, incl. the wind pipe (trachea), the gullet (oesophagus), the blood vessels passing to the head from the heart,

the thyroid gland, and the tissues at the back of the mouth.

THROMBOSIS. Development during life of a blood-clot within a vessel or the heart, causing restriction of blood flow.

THRUSH. Family of birds (Turdidae). The song T. (*Turdus musicus*) is about 8 in. long, brown above, and with a paler throat and breast speckled with dark

brown: it is one of Britain's finest songbirds. Slightly larger is the missel T. (*T. viscivorus*), nicknamed the storm cock because it often sings before and during wild, wet weather. N. American species incl. the hermit T. (*Hylocichla guttata*), a beautiful songster, and the wood T. (*T. mustelina*).

THUCYDIDES (thūsid'idéz) (c. 460–400 B.C.). Athenian historian. He held a command in the Peloponnesian War in 424, but met so little success that he was banished until 404. In his *History of the Peloponnesian War* he attempted a scientific and impartial history of his own time.

THUGS. Hindu sect who sacrificed travellers to Kali, the goddess of destruction, by strangling them. They were suppressed c. 1830.

THULE. Greek and Roman name for the most northerly land known. It was applied to the Shetlands, the Orkneys and Iceland, and by later writers to Scandinavia.

THULIUM. A metallic element, symbol Tm, at. wt. 168.94, at. no. 69. It is one of the rare-earth metals.

THURBER, James Grover (1894–1961). American humorist. B. in Columbus, Ohio, he made his name with short stories in the *New Yorker*, perhaps the most famous of these being 'The Secret Life of Walter Mitty'. His doodle drawings also first appeared in this magazine, and incl. preposterous impressions of dogs whom T. placed above the human species. Blind in one eye from boyhood he was totally blind in the last decade but continued his work.

THURINGIA (tooring'ia). A German Free State, 1919–34, a gau under the Nazis, it was enlarged and made a Land, 1946–52, of E. Germany; then its historic boundaries were obliterated in the new dists. of Erfurt, Gera, and Suhl. It contained the fertile Saale plain and, in the S., the beautiful Thüringer Wald: the cap. was Weimar.

THURLOW, Edward, 1st baron (1731–1806). British lawyer. He entered parliament as a Tory in 1768. As Lord Chancellor 1778–83 and 1783–92 he was notorious for his violent opposition to all reform.

THURSO, Archibald Sinclair, visct. T. (1890–). British Liberal statesman. After some years in the army, he entered parliament in 1922, and, appointed Sec. for Scotland in the Nat. Govt. of 1931, resigned as a Free Trader in 1932. He led the parliamentary Liberal party 1935–45, was Air Min. 1940–5, and in 1952 was created visct. T.

THURSO. Seaport (burgh) in Caithness on T. bay, the Scottish mainland terminus of the steamer service to the Orkneys. (Pop. 1961) 8,038.

THYME (tīm). Genus of plants (*Thymus*) in the Labiatae family. Garden T. (*T. vulgaris*), a native of the Mediterranean, has aromatic leaves used for seasoning, white or reddish flowers, and a slightly woody growth under a foot high.

THYMUS (thi'mus). A ductless gland near the root of the neck. It develops early in embryonic life, continues to grow after birth, but atrophies before adult life. Its function is not known.

THYROID (thi'roid). One of the principal endocrine glands, situated in front of the throat. It secretes thyroxin, a hormone containing iodine. This stimulates growth, metabolism, and other functions of the body. Abnormal action produces Graves' disease, deficient action produces myxoedema and cretinism.

TIARA (ti-ah'ra). The triple crown worn by the Pope. The term was originally applied to a head-dress worn by the ancient Persians.

TIBER. River of Italy on which Rome stands. It rises in the Apennines and flows for 250 m. in a S. direction before reaching the Tyrrhenian Sea by 2 mouths, the chief 17 m. S.E. of Rome.

TIBERIAS. Town in Israel on the W. shore of the Sea of Galilee (sometimes called Lake T.); there are medicinal springs in the vicinity. Herod Antipas founded T. c. 20 B.C. Pop. (1967) 19,000.

SONG THRUSH

and delivers it as electrical energy; and a loudspeaker receives an electrical input and delivers an acoustical output.

TRANSFER ORBIT. The orbit followed by a planetary probe. To send such a vehicle by the shortest route would mean continuous expenditure of fuel, which is clearly impossible; it is therefore necessary for the vehicle to move, for most of the journey, in free fall. A probe aimed at Venus has to be 'slowed down' relative to the Earth, so that it enters an elliptical transfer orbit with its perigee (point of closest approach to the Sun) at the same distance as the orbit of Venus; with Mars, the vehicle has to be 'speeded up' relative to the Earth, so that it reaches its apogee (furthest point from the Sun) at the same distance as the orbit of Mars. The need for moving in a transfer orbit, in free fall, means that journeys to the planets are somewhat protracted, but the only way to overcome this difficulty will be to develop nuclear fuels — which will not be an easy matter.

TRANSFORMER. Piece of apparatus without moving parts in which by electromagnetic induction an alternating or intermittent current of one voltage is transformed to another voltage, without change of frequency. A T. has 2 coils, a primary for the input, and a secondary for the output. The ratio of the primary to the secondary voltages (and currents) is directly (and inversely) proportional to the number of turns in the primary and secondary coils. Ts. are widely used in electrical apparatus of all kinds and in particular in power transmission where high voltages and low currents are utilized.

TRANSISTOR. A semiconductor device with 3 or more electrodes. It can act as an amplifier, oscillator photoelectric cell or switch, and usually operates on a very small amount of power. The T. was invented at Bell Telephone Laboratories in America by John Bardeen and Walter Brattain, developing the work of William Shockley. Present-day Ts. commonly consist of a tiny sandwich of semiconductor material, usually germanium or silicon, specially prepared so that the alternate layers have different electrical properties.

A crystal of pure germanium or silicon would act as an insulator. By introducing impurities in the form of atoms of other materials (e.g. boron, arsenic or indium in minute amounts of the order of 1 part in 100 million) the layers may be made either n-type, having an excess of electrons, or p-type, having a deficiency of electrons. This enables electrons to flow from one layer to another in one direction only.

Ts. have had a tremendous impact on the electronics industry and although only invented in 1948 are now made in thousands of millions each year. They perform many of the same functions as the thermionic valve, but have the advantages of greater reliability, long life, compactness and instantaneous action, no warming-up period being necessary. They are widely used in most electronic equipment, but especially for portable radios and television computers, satellites, space research and in microminutization.

TRANSJORDAN. Name 1923–46 of the Hashimite kingdom of JORDAN.

TRANSKEI (trans'ki). Part of Cape prov., S. Africa, extending N.E. from Great Kei r. to the border of Natal and incl. Tembuland, Pondoland, and Griqualand E. The area is inhabited by Xhosa, most advanced of the Bantu tribes in the rep., and in 1963 became the self-governing terr. of T. within the rep. of S. Africa, with its own elected parl. and separate T. citizenship for all Xhosa (whether living in T. or not). Whites were given no political rights within the terr. in which the main towns are Umtata (cap.), Kokstad, and Port St. Johns. The univ. coll. at Fort Hare is the oldest African univ. in S. Africa. Area 16,544 sq. m.; pop. (1960) 1,407,815 Bantu; 17,514 whites; 13,840 coloured.

TRANSmigration OF SOULS or Metem-

psychosis. The belief that after death the soul may pass into another human being, an animal or a plant, and that it has so passed on innumerable earlier occasions. The belief was held by the ancient Egyptians, by Pythagoras, Plato, and their followers, and by the Cathars and other heretical Christian sects, and is an integral part of the teachings of Hinduism and Buddhism, and of the Theosophists.

TRANSPORT AND GENERAL WORKERS UNION. Trade union founded in 1921 by the amalgamation of a number of dockers' and road transport workers' unions, previously associated in the Transport Workers' Federation. The largest T. union in Britain, its gen. secs. have incl. Bevin, Cousins, and from 1969 Jack Jones (1913–). See illus. p. 1043.

TRANSPORTATION. Punishment which involved the sending of convicted persons to overseas possessions either for life or for shorter periods. It was introduced in England towards the end of the 17th cent. and was abolished in 1864 after many thousands had been transported, especially to Australia.

TRANS-SIBERIAN RAILWAY. Line connecting the cities of European Russia with Omsk, Novosibirsk, Irkutsk, and Khabarovsk, and terminating at Vladivostok on the Pacific. It took 1891–1905 to build; from St. Petersburg (Leningrad) to Vladivostok is c. 5,400 m.

TRANSUBSTANTIATION. The R.C. doctrine that the bread and wine at the Eucharist are transformed into the body and blood of Christ. This doctrine, which evolved during the 9th–13th cents., is rejected by Protestant Churches.

TRANSURANIUM ELEMENTS. Family of synthetic elements following the last naturally occurring element, uranium (at. no. 92). Produced by bombarding uranium or other T.Es. with various atomic particles. See Table p. 1045.

TRANSVAAL. N. prov. of the rep. of South Africa bordering S. Rhodesia on the N. The S. and S.W. are occupied by the high veld, rising to Witwatersrand, then sinking northward to the low veld. The main rivers are the Vaal and Limpopo with their tributaries. The economic life is dominated by the gold fields of the 'Rand'. Near Pretoria are diamond mines, discovered 1886; coal, iron ore, copper, lead, tin, manganese are among other minerals worked. Cattle and sheep are reared; maize, tobacco, and fruit are grown. There are iron and steel works at Pretoria, brick, tile, and pottery factories, etc.

The prov. is governed by an administrator, who is assisted by a provincial council and an executive committee. English and Afrikaans are the official languages. The largest towns are Pretoria (the cap.), Johannesburg, Germiston, Brakpan, Springs, Benoni, Krugersdorp, and Rondepont. There are univs. at Pretoria and Johannesburg (Witwatersrand).

The T. was settled from 1836 by Boers from Cape Colony. After subduing the Zulus they set up a rep. recognized by Britain as independent in 1852. Owing to troubles with the Zulu inhabitants, T. was in 1877 annexed by Britain at the request of some of the settlers; but in 1880 the T. rebelled, inflicting a severe defeat on the Brit. at Majuba Hill (1881), and republican rule was restored, though subject to British suzerainty. After the S.A. War of 1899–1902, T. became a British colony, and in 1910 a prov. of the Union of S.A. Area 110,450 sq. m.; pop. (1960) 6,273,477 (1,468,305 white).

TRANSYLVANIA. Area of Rumania, once a prov., bounded S. by the Transylvanian Alps and E. and N.E. by the Carpathians. The Bihar Mountains rise in the centre of T., the surface of which is hilly except in the extreme W. Agriculture, stock-breeding, and forestry thrive, and wine and brandy are produced. Exploitation of mineral wealth, natural gas, lignite, gold, silver, copper, iron, etc. has been rapid since the S.A.W.

BALBOA, Vasco Nuñez de (c. 1475–1517). Spanish conquistador and discoverer of the Pacific Ocean. He went to the West Indies and in 1510 joined the expedition which conquered the isthmus of Darien. In 1513 he set out across the mountains, and reached the further shore on 29 Sept. He was made Admiral of the Pacific and Gov. of Panama, but was removed by intrigues at the Spanish court, imprisoned and executed.

BALCHIN, Nigel Marlin (1908–). British author. During the S.W.W. he was engaged on scientific work for the army with the rank of brigadier, and estab. his reputation as a novelist with *The Small Back Room* (1943), dealing with the psychology of the 'back room boys' of wartime research.

BALCON, Sir Michael (1896–). British film producer. His films incl.: *The Lavender Hill Mob*, *The Cruel Sea*, and *The Long and the Short and the Tall*.

BALDER (bawl'der). In Norse mythology, the son of Odin and Frigga and husband of Nanna, and the best, wisest, and most loved of all the gods. He was killed, at Loki's instigation, by a twig of mistletoe shot by the blind god Hödur.

BALDNESS. Loss of hair from the scalp. It is common in elderly persons from the natural failure of nourishment in the hair follicles. Total or partial B. may be caused by excessive oily secretion of the skin; skin infections; tumours, and many other diseases. Hair may fall out as a result of fever, operation, shock, nervous disorder, failure of the thyroid gland (myxoedema), and other causes of poor health.

BALDWIN I (1058–1118). Son of the count of Bouillon in the Ardennes, he accompanied his brother Godfrey on the 1st Crusade in 1096 and became King of Jerusalem in 1100. The kingdom he founded endured for nearly a century.

BALDWIN, James (1924–). American author. A Negro, b. in Harlem, N.Y., he has been active in the civil rights movement. He has written plays, e.g. *The Amen Corner* (1955); vols. of essays, e.g. *Notes of a Native Son* (1955) and *The Fire Next Time* (1963); and novels, e.g. *Going to Meet the Man* (1965).

BALDWIN, Stanley, 1st earl B. of Bewdley (1867–1947). Conservative statesman. B. at Bewdley, Worcs, he was the only son of A. Baldwin, M.P., of the iron and steel company known as Baldwin's Ltd. In 1908 he was elected Unionist M.P. for Bewdley, and in 1916 he became parliamentary private secretary to Bonar Law. He was Financial Secretary to the Treasury 1917–21, and then was appointed to the presidency of the Board of Trade. In 1919 he gave to the Treasury £150,000 of War Loan for cancellation, representing about 20 per cent of his fortune. He took a leading part in the disruption of the Lloyd George Coalition, and became Chancellor of the Exchequer in Bonar Law's Cons. admin. As such he negotiated, on the advice of Montagu Norman, the war debts settlement with the U.S.A. On Bonar Law's retirement in 1923, B. became P.M., and later in the year he 'went to the country' in search of a mandate to introduce a measure of Protection, which was necessary to counter the wave of unemployment. The result was adverse, and early in 1924 B. resigned. After the fall of the MacDonald admin. B. became Premier for the 2nd time, holding office until 1929. His premiership was marked by the General Strike of 1926, the Trade Disputes Act of 1927, the grant of widows' and orphans' pensions, and the securing of complete adult suffrage in 1928. In 1931 MacDonald formed in conjunction with B. a Nat. Govt. in which B. was Lord President of the Council. In 1935 B. became P.M. for the 3rd time; he retained the post until 1937, when he made place for Neville Chamberlain, he himself going to the House of Lords as an earl. His handling of the situation that arose from the abdication of Edward VIII was generally applauded, but his attitude towards the dictator powers of Germany and Italy was much criticized.

BÂLE. French form of BASLE.

BALÉARICS. Group of islands off the E. coast of Spain; they were conquered by Aragon in the 14th cent. The largest are Majorca (on which is the cap., Palma), Minorca, Ibiza, Cabrera, and Formentera. Area 1,935 sq. m.; pop. (1960) 443,327.

BALEWA. See TAFAWA-BALEWA.

BALFE (balf), Michael William (1808–70). British composer. B. at Dublin, he was a violinist at Drury Lane, London, when only 16. In 1825 he went to study in Italy, and in 1846 he was appointed conductor at Her Majesty's Theatre. He composed operas of which only *The Bohemian Girl* is now remembered.

BALFOUR, Arthur James, 1st earl of (1848–1930). British Cons. statesman. Son of a Scottish landowner, he was elected a Conservative M.P. in 1874. In Lord Salisbury's ministry he was Sec. for Ireland (1887) and for his ruthless vigour was called 'Bloody B.' by the nationalists. In 1891, and again in 1895, he became 1st Lord of the Treasury and leader of the Commons, and in 1902 he succeeded Salisbury in the premiership. His cabinet was divided over Chamberlain's Tariff Reform proposals, and at the 1905 elections suffered a crushing defeat. B. retired from the party leadership in 1911. In 1915 he joined the Asquith coalition as 1st Lord of the Admiralty, and he was Foreign Sec 1916–19; as such he issued the 'B. Declaration' of 1917 in favour of a national home in Palestine for the Jews and signed the Treaty of Versailles. He was Lord Pres. of the Council 1919–22 and 1925–9, and received the O.M. in 1916 and an earldom in 1922. He was also a distinguished philosopher, and wrote *A Defence of Philosophic Doubt* (1879), *Foundations of Belief* and *Theism and Humanism* (Gifford Lectures, 1914).

BALFOUR DECLARATION (1917). Letter written on 2 Nov. 1917 by A. J. Balfour, then British Foreign Sec., to Lord Rothschild, chairman of the British Zionist Federation, stating that 'His Majesty's Govt. view with favour the establishment in Palestine of a national home for the Jewish people': this eventually led to the foundation of the modern Jewish State of Israel in 1948.

BALI (bah'lē). Mountainous volcanic island of Indonesia, separated from Java by the mile-wide B. Strait. The climate is equable, the soil fertile, and the vegetation luxuriant. Tropical produce grows to perfection. The Balinese are noted for their fine physique, and the women are often remarkably beautiful. They are Hindus in religion, devoted to the drama and music, and their dances are world-famous. They are skilled craftsmen in gold and silver work, wood-carving, and weaving.

A Hindu culture, brought by settlers from India, was estab. in B. by the 7th cent. A.D. From time to time B. was subject to Javanese princes, but its warlike inhabitants were difficult to control, and in the 17th cent. the kings of B. ruled Lombok and a small part of E. Java. B. remained independent until 1856 when the Dutch occupied it.

B. Strait, between B. and Java, was the scene on 19–20 Feb. 1942 of a naval action between Japanese and U.S. and Dutch forces which served to delay slightly the Japanese invasion of Java.

The cap., Den Pasar, has an airfield. Area 2,240 sq. m.; pop. (est.) 1,100,000.

BALIKESIR (bahlikesir). Turkish town, cap. of an isl. of the same name, 80 m. S.W. of Bursa. It trades in silk and opium, and has silver mines near by. Pop. (1965) 69,300.

BALIKPAPAN. Port and petroleum centre of E. Borneo, in Kalimantan, Indonesia. It has an airfield. Pop. (est.) 30,000.

BALKANS (bawl'kantz) (Turkish for mountains). Peninsula in S.E. Europe stretching into the Mediterranean between the Adriatic and Aegean Seas. It is joined to the rest of Europe by a broad isthmus 750 m.

TABLE OF TRANSURANIUM ELEMENTS

At. No.	Name	Symbol	Year discovered	Source of first preparation	Isotope identified	Half Life of first isotope identified
93	NEPTUNIUM	Np	1940	Irradiation of uranium 238 with neutrons	Np ²³⁹	2.35 days
94	PLUTONIUM	Pu	1941	Bombardment of uranium 238 with deuterons	Pu ²³⁸	86.4 years
95	AMERICIUM	Am	1944	Irradiation of plutonium 239 with neutrons	Am ²⁴¹	458 years
96	CURIUM	Cm	1944	Bombardment of plutonium 239 with helium ions	Cm ²⁴²	162.5 days
97	BERKELIUM	Bk	1949	Bombardment of americium 241 with helium ions	Bk ²⁴³	4.5 hours
98	CALIFORNIUM	Cf	1950	Bombardment of curium 242 with helium ions	Cf ²⁴⁶	44 minutes
99	EINSTEINIUM	Es	1952	Irradiation of uranium 238 with neutrons in first thermonuclear explosion	Es ²⁵³	20 days
100	FERMIUM	Fm	1953	Irradiation of uranium 238 with neutrons in first thermonuclear explosion	Fm ²⁵⁵	16 hours
101	MENDELEVIUM	Mv	1955	Bombardment of einsteinium 253 with helium ions	Mv ²⁵⁸	1.5 hours
102	NOBELIUM	No	1958	Bombardment of curium 246 with carbon ions	102 ²⁵⁵	3 seconds
103	LAWRENCIUM	Lw	1961	Bombardment of californium 252 with boron ions	Lw ²⁵⁷	8 seconds

Courtesy of 'Scientific American'

Cluj is the chief town. Area 24,000 sq. m. T., which had been part of Hungary from c. 1000–1526, 1691–1848, 1868–1918, was united with Rumania in 1918 by the vote of its inhabitants. The Vienna Award of 1940, made by Ribbentrop and Ciano, gave most of T. back to Hungary, a gift cancelled in the peace treaty with Hungary, 1947.

TRAPANI (trah'pahneh). Port and naval base in N.W. Sicily, Italy, c. 30 m. N. of Marsala. Settled originally by the Carthaginians, it is the cap. of T. prov. It was badly damaged in the S.W.W. Pop. (1961) 75,537.

TRAPPISTS. R.C. order of monks and nuns, renowned for the strictness of their rule, which incl. the maintenance of silence. It originated in 1664 at La Trappe, in Normandy, as a reformed version of the Cistercian rule, and is now absorbed again in the latter.

TRAVEL SICKNESS. Nausea and vomiting caused by travelling in trains, buses, aeroplanes, cars, and ships. The constant vibrations and movements are thought to stimulate changes in the semicircular canals forming the labyrinth of the middle ear, and failure of the individual to adapt to this stimulation, which may be reinforced by visual stimulation as well as psychological factors, is thought to be the cause of T.S., although the exact mechanisms involved remain obscure. There are many proprietary cures on the market, some of which contain anti-histamine drugs.

TRAVERS, Benjamin (1886–). British dramatist. B. in London, he wrote farces for Tom Walls, Ralph Lynn and Robertson Hare, incl. *A Cuckoo in the Nest* (1925), *Rookery Nook* (1926), and *Thark* (1927), known from the theatre at which they were played as the 'Aldwych' farces.

TREACLE. Brown viscid syrup obtained during sugar refining; the paler 'golden syrup' is obtained at a later stage. See MOLASSES.

TREADMILL. Penal appliance devised in 1818 by Sir William Cubitt (1785–1861), and long disused. It consisted of a large hollow cylinder around which were steps; by treading on these the prisoner caused the cylinder to revolve and thus pump water, grind corn, etc.

TREASON. An act of betrayal, generally used only of acts against the sovereign or the state to which the perpetrator owes allegiance. In this sense T. was defined in England by the Statute of Treasons, 1352, the principal Ts. being (1) compassing the wounding, imprisonment, or death of the sovereign; (2) seducing the king's wife or eldest dau. or the wife of the heir; (3) levying war against the sovereign in his (her) realm; (4) being adherent to the sovereign's enemies within the realm, giving them aid or comfort in the realm or elsewhere. The punishment on conviction of

T. is death. The Treachery Act, 1940, supplemented the law of T. by making it an offence punishable by death for any person, whether owing allegiance to the British crown or not, to assist the naval, military, or air operations of the enemy, or to impede the forces of the Crown: 16 spies (not normally capable of T., though liable to be shot in the field) were convicted under this act, which expired in 1946. During the 20th cent., persons hanged for T. in the U.K. have incl. Casement (1916), John Amery (1945), and William Joyce (1946) who, though he claimed to be a U.S. citizen by birth, carried a British passport valid until 1940 at the time he went to Germany in August 1939.

In the U.S.A., T. is defined in Article III, Section 3, of the Constitution: 'T. against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of 2 witnesses to the same overt act, or on confession in open court. The Congress shall have power to declare the punishment of treason.'

TREASURE TROVE. In England, any gold or silver, plate or bullion found concealed in a house or the ground, the owner being unknown. Normally, treasure originally hidden, and not abandoned, belongs to the Crown, but if the treasure was casually lost or intentionally abandoned, the first finder is entitled to it against all but the true owner. Objects buried with no intention of recovering them, e.g. in a burial mound, do not rank as T.T., and belong to the owner of the ground.

TREASURY. Govt. dept. constituted in 1612 to collect and manage public revenue. The P.M. is generally the First Lord of the T., the Chancellor of the Exchequer is the financial head; with 5 junior lords these form the Lords Commissioners of the T. One of the 2 joint Permanent Secs. to the T. is the official head of the Civil Service.

TREBIZOND. Another form of TRABZON.

TREE, Sir Herbert Beerbohm (1853–1917). British actor-manager. B. in London, the half-brother of Max Beerbohm (q.v.), he managed the Haymarket theatre 1887–96, and Her Majesty's 1897–1917, building the latter entirely from the profits of *Trilby*. He appeared both in Shakespeare and modern roles, often with his wife, Lady T., née Maud Holt.

TREE. Name given to perennial plants characterized by a woody stem and branches, and larger than shrubs. Gymnosperm Ts. are classified in 4 divisions: cycads or sago-palms; the maidenhair tree; gnetums; and conifers. Angiosperm Ts. are divided into monocotyledons, incl. palms, bamboos, etc., and dicotyledons, comprising the largest group.

Trees as symbols of fertility play a large part in primitive religion; thus the carrying of green boughs

the city was a great commercial centre and famous for its purple dye. Besieged by Alexander the Great 333–332 B.C. and captured, it came under Roman rule 64 B.C. and was taken by the Arabs A.D. 638. The Crusaders captured it 1124, and it never recovered from the destruction it suffered when the Arabs recaptured it, 1291.

TYRE. The rubber hoop fitted round the rims of bicycle, motor-car and road vehicle wheels. The first pneumatic rubber T. was patented by R. W. Thompson in 1845, but it was John Boyd Dunlop of Belfast who independently re-invented pneumatic Ts. for use with bicycles 1888–9.

U The 21st letter of the English alphabet, and the 20th in the ancient Roman, in which it was identical with V. Not until the 19th cent. were U and V definitely separated in English dictionaries. It has various sounds, e.g. as in *truth* (ōō), *bull* (oo), *but* (ū), *duke* (yū), short *i* (*busy*), short *e* (*bury*).

UBANGI-SHARI. See CENTRAL AFRICAN REP.

U-BOAT. Name given to the German submarine (*Unterseeboot*) in both world wars, because they were named U followed by a number.

UCCELLO (ooche'lō), Paolo. Name used by Italian artist Paolo di Dono (1397–1475). Apprenticed to Ghiberti, he is celebrated for his decorative use of perspective, and his works incl. the 'Nativity' fresco (Florence) and 3 battle pictures for the Palazzo Medici, one of which is in the National Gallery.

UDAIPUR (oodipoor). Indian city in Rajasthan, once cap. of the former princely state of U., incorporated in Rajasthan 1948. A handsome city with several palaces (2 on islands in a lake), and the Jagannath temple (c. 1640), it was founded 1568. Most of its buildings are cream or white. Pop. (1961) 111,139.

UDALL, Nicholas (1504–56). English schoolmaster and playwright, author of *Ralph Roister Doister* (c. 1553), the first known English comedy.

UDINE (oodē'nā). Italian city, cap. of U. prov., 80 m. N.E. of Venice. U. was the cap. of Friuli in the 13th cent., passed to Venice 1420. It makes textiles, leather goods, paper, sugar. Pop. (1961) 85,205.

UDMURT (oodmoort). A.S.S.R. of the R.S.F.S.R., in the W. Ural foothills. Its products incl. timber, flax, potatoes, peat, quartz; there is some industry, e.g. metallurgy at Izhevsk (the cap.). Area 16,200 sq. m.; pop. (1969 est.) 1,377,000.

UFA (oo'fah). Cap. of Bashkir A.S.S.R., R.S.F.S.R., in the W. Urals on the r. Bielaia, founded by the Russians 1574. It has railway workshops, shipyards, distilleries, sawmills. Pop. (1967) 704,000.

UGANDA. Independent rep. in central Africa, lying between the Sudan Rep. and Tanganyika. It has an average alt. of 4,000 ft. a.s.l., and is drained by the White Nile; parts of Lakes Victoria, Edward, and Albert are within the rep., which incl. also Lakes George and Kioga. Cotton, coffee, sugar, tobacco are among important crops; tin is mined in the W., and there are deposits of iron, copper, manganese and other minerals. The cap. is Kampala, other towns incl. Entebbe, Jinja, and Mbale. The Owen Falls (q.v.) dam serves industrial development which incl. smelting of copper from Kilembe. Area 93,981 sq. m.; pop. (1967) 7,750,000 (c. 9,000 Europeans).

Made a Brit. protectorate 1894, U. became independent 1962, and a rep. within the Commonwealth

TYROL. See TIROL.

TYRONE (tirōn'). Co. of Northern Ireland. Chief rivers are the Derg, Blackwater, and Foyle. Agriculture is the principal industry; linens, woollens, soap, etc., are manufactured. Omagh is the co. town. Area 1,218 sq. m.; pop. (1966) 135,634.

TZU-HSI (tsōo-shē') (1836–1908). Dowager empress of China. Of humble birth, she was sold as a slave to a general who presented her to the emperor Hsien-Feng as a concubine. On his death in 1861 she became regent for her son; he d. in 1875 and she became regent for her nephew Kwang-hsu. She was held responsible for the Boxer rebellion in 1900.

1963. In 1967 Milton Obote (q.v.) estab. a unitary rep. with himself as pres., elected for 5 years as both Head of State and Head of Govt. by the Nat. Assembly (one-third nominated by the pres.): the hereditary kingdoms were subdivided into admin. districts (see BUGANDA).

U'GARIT. Small kingdom (modern Ras Shamra) on the coast of Syria c. 10 m. N. of Latakia, excavated by Claude Schaeffer from 1929. It was a commercial centre, and in the palace numerous documents in cuneiform have been discovered, as well as an early Ugaritic alphabet of 22 letters – the earliest alphabet known – closely related to the Phoenician from which our own ultimately derives. Most of the discoveries are 15–13th cent. B.C., but some c. 7000 B.C.

UHLAND (ōō'lahnt), Johann Ludwig (1787–1862). German poet, author of ballads and lyrics in the Romantic tradition.

UIST (ū'ist). Two small Scottish islands in the Outer Hebrides, Inverness-shire, N. U. with pop. (1961) 1,921 and S. U., pop. (1961) 3,983. A guided missile range was opened on S. U. in 1959; Loch Druidibeg is a nature reserve.

UJJI (oojē'jē). Town in Tanganyika, on Lake Tanganyika, a commercial centre originally an Arab trading post for slaves and ivory. It is linked by rail with Dar-es-Salaam. Pop. (1965) 15,000.

UKRAINE (ūkrān'). A constituent republic of the

UGANDA. Rapidly expanding Mbale, the country's third largest town, acquired a cathedral in 1963. Built of reinforced concrete, it was made twelve-sided to allow as many as possible of the congregation to have a close uninterrupted view of the altar. Courtesy of Edward D. Mills and Partners architects.

round the village, as a fertility rite, and the maypole dance, originally performed round the sacred T., figured in the English May Day festival. Trees or groves were the scene of festivals or the home of oracles, e.g. at the oak of Dodona, in Epirus. The oak was the sacred T. of Jupiter, and was also venerated by the Druids. Many peoples believe that Ts. are inhabited by spirits, who die with them, e.g. the Dryads of the Greeks.

TREE CREEPER. See **CREEPER**.

TREITSCHKE (trīsh'ke), Heinrich von (1834-96). German historian. At first a Liberal, he later adopted a Pan-German standpoint. His best-known work is the *History of Germany in the 19th Cent.*

TREMATODES. See **FLUKK**.

TRENCH, Anthony Chenevix (1919-). British educationist. A distant connection of Richard Chenevix T., he was headmaster of Bradfield Coll. 1955-63 and of Eton Coll. 1964-9, where he banished boxing from the curriculum.

TRENCH, Richard Chenevix (1807-86). Irish Anglican churchman. B. in Dublin, he was dean of Westminster and (1864-84) archbp. of Dublin. A poet and philologist, he planned the Oxford *New English Dictionary*.

TRENCARD, Hugh Montague, 1st visct. (1873-1956). British airman and administrator, nicknamed 'Boom' because of his loud voice. As G.O.C. of the R.F.C. 1915-17 he was responsible for air operations in the F.W.W., and as Chief of Air Staff 1918-29 organized the R.A.F. in preparation for its role in the S.W.W. In 1927 he was created 1st Marshal of the R.A.F. and in 1930 received a viscounty. As Commissioner of the Metropolitan Police, he carried out the 'T. Reforms' incl. the estab. of the Police Coll. at Hendon and the application of more scientific methods in detection. In 1951 he was awarded the O.M.

TRENGGANU. Traditionally seafarers, the Malays are believed to have reached the country by sea, not infiltrating beyond the coastal areas until encouraged by the British to develop the hinterland. Here on the east coast, where the population is chiefly Malay, fishing is still the most important industry, although the catches are often poor.

Courtesy of Malaya House.

TRENGGANU (-gah'noo). State of W. Malaysia, Fed. of Malaysia, on the E. coast. The cap. is Kuala T. Copra, black pepper, tin and wolfram are exported. Area 5,050 sq. m.; pop. (1966) 371,370.

TRENT, Jesse Boot, 1st baron T. (1850-1931).

British industrialist. B. in Nottingham, he worked in his mother's herbalist shop at 13, had a shop of his own by 1877, and in 1883 estab. J. Boot & Co. Ltd. (from 1888 the Boot Pure Drug Co.) probably the earliest modern 'chain store'. In 1881 he gave £500,000 to build Univ. Coll., Nottingham, and his son, John Campbell Boot, 2nd baron (1889-1956), was 1st chancellor of Nottingham Univ. 1948-54.

TRENT, Council of. A council of the R.C. Church held at Trento, N. Italy, Dec. 1545 to Dec. 1563, incl. adjournments. It defined many Catholic doctrines, and reformed abuses within the Church.

TRENT. Third longest river of England. It rises in the S. Pennines and flows first S. and then generally N.E. through the Midlands to enter the Humber. Length 170 m. It is navigable by barges for nearly 100 m.

TRENTINO-ALTO ADIGE (adē'zhā). Autonomous region in N. Italy, once part of the old rep. of Venice, then part of Austria until ceded to Italy under the Treaty of Saint-Germain-en-Laye, 1919. It consists of the provs. of Bolzano and Trento. Bolzano (S. Tirol) remained German-speaking in spite of attempts at forcible Italianization by the fascist govt. and the migration to Germany in 1939 of some 70 per cent of the pop.; Trento has always been Italian-speaking. The peace treaty between Italy and the Allies, 1947, provided that the German-speaking inhabitants of the region should have equal rights, and in 1948 the region was made autonomous. The cap. is Trento. Area 5,256 sq. m.; pop. (1961) 785,491.

TRENTŌ. Cap. of Trentino-Alto Adige autonomous region, Italy, and of T. prov., on the Adige, a city famous in history for the Council of Trent (Ger. form of its name), 1545-1563, which issued decrees, confirmed by Pope Pius IV in 1564, settling many points of R.C. dogma as part of the so-called Counter-Reformation. Pop. (1961) 74,766.

TRENTON. Cap. of New Jersey, U.S.A., on the Delaware, 30 m. N.E. of Philadelphia. Pottery and steel cable are manufactured. Washington defeated the British at T., 1776. Pop. (1960) 114,167.

TRESPASSER. Technically, a trespass is an unlawful interference with the person or property of another, but in general speech a T. is a person who goes on the land of another without lawful authority. A landowner has the right to eject a T. by the use of reasonable force. Alternatively, he may sue him for trespass. If a T. is injured whilst on the land of another, he cannot recover damages from the landowner, unless the landowner has done some positive act of injury to him. In English law, a trespass to land is not a crime.

TREVELYAN (trevil'yan), Sir George Otto (1838-1928). British liberal statesman. A nephew of Lord Macaulay, whose biography he wrote (1876), he was a M.P. 1865-97, and Chief Sec. for Ireland 1882-4, Chancellor of the Duchy of Lancaster 1884-5, and Sec. for Scotland 1892-5. His other books incl. *The Early History of C. J. Fox* (1880) and *The American Revolution* (1909). His eldest son Sir Charles Phillips (1870-1958) was a Liberal M.P. 1899-1918 and (Labour) 1922-31. The 2nd son Robert Calverley (1872-1951) wrote creditable poetry, e.g. *The Bride of Dionysus* (1912), and the 3rd son George Macaulay (1876-1962), Regius prof. of history at Cambridge 1927-40, wrote *England in the Age of Wycliffe*, *England under Queen Anne* (1930-4), and an illuminating *English Social History* (1944); he was awarded the O.M. in 1930.

TREVES. Fr. form of **TRIFR**.

TREVISO (trāvēsō). Town in Veneto region, Italy. 18 m. N. of Venice, cap. of T. prov. It dates from Roman times. The cathedral, founded 1141, was enlarged in the 15th cent. Pop. (1961) 75,217.

TREVITHICK, Richard (1771-1833). British engineer. B. in Cornwall, he constructed in 1801 a road

U.S.S.R., lying in the S.W., reaching from the Black Sea to Poland. The U. is the great cereal-growing area of Russia, and sugar-beet and other crops flourish. The Donetz coalfield is the richest in the Soviet Union; iron ore is also mined, and steel and pig-iron are important products. Chief rivers are the Dnieper, which is harnessed at the Dnieper dam (1932) to supply hydro-electric power, the Donetz and the Bug. Natural gas is exported to Austria. The cap. Kiev is the historic centre of Ukrainian culture. Other cities are Kharkov, Odessa, Dnepropetrovsk, Donetsk, and Nikolayev. Area 222,600 sq. m.; pop. (1968) 46,381,000.

The majority of the people are Ukrainians, or Little Russians; the official language is Ukrainian, a Slavonic dialect. Ukrainian literature goes back to the Middle Ages. The first modern Ukrainian writer was Ivan Kotlyarevsky (1769-1838); the great national writer is Taras Shevchenko (1841-61).

U. was a state already in the 9th cent. Russia absorbed E. U. in 1667, the rest in 1793. U. proclaimed itself a people's rep. in 1917, a soviet rep. in 1919; from 1923 it formed one of the reps. of the U.S.S.R. The Germans overran it in the S.W.W. For additions to U. after the S.W.W., see BESSARABIA, BUKHOVINA, RUTHENIA; see also CRIMTA.

OKULELE (-ā'li). A small guitar used by Hawaiian islanders, and introduced into Britain and America.

ULAN BATOR. Cap. of the Mongolian People's Rep. Linked with Ulan Ude by rail, it is the seat of a univ. (1942); it is also a trading centre and has an airport. Pop. (1962 est.) 196,000.

ULA'NOVA, Galina (1910-). Russian dancer. Both her father and mother danced at the Mariinsky Theatre, and she herself trained at the state school of her native Leningrad. She was 1944-61 prima ballerina of the Bolshoi theatre ballet, and continued as ballet master to the company. Her roles incl. Odette-Odile, Giselle and Juliet. See BALLET.

ULAN UDE. Cap. of Buriat A.S.S.R., R.S.F.S.R., on the r. Ud., and the Trans-Siberian rly. It has industrial plants incl. sawmills and factories making motor-cars and glass. Pop. (1967) 227,000.

ULCER. Sloughing of skin or mucous membrane. It is caused either by infection (e.g. syphilitic ulcer), inadequate blood supply (e.g. varicose ulcer), or irritation (e.g. gastric ulcer).

ULEÅBORG. Swedish name of OULU.

ULM (oolm). German city and fortress in Baden-Württemberg, on the Danube. A free imperial city from the 14th cent. to 1802, it has a fine Gothic cathedral (1377) which escaped damage in the S.W.W. when two-thirds of U. was destroyed. It makes vehicles, agricultural machinery, precision instruments, textiles, etc. Pop. (1966) 92,000.

ULSTER. Northernmost of the Irish provinces, divided into 9 counties, of which 6 (Antrim, Armagh, Down, Fermanagh, Londonderry, and Tyrone) constitute Northern Ireland, while 3 (Cavan, Donegal, and Monaghan) are in the Republic. From Jacobean times it was a centre of English, later Scottish, settlement; it incl. Belfast and the chief industrial centres of the island (linen and synthetic textiles, chemicals, shipbuilding, etc.) and agriculture is highly developed. Total area 8,335 sq. m. Pop. (1966) 1,693,073.

ULTRAMONTANISM ('beyond the mountains', i.e. the Alps). Term applied to the Italian party in the R.C. Church who lay great stress on papal claims.

ULTRASONICS. Ultrasonic rays are physical vibrations in matter occurring at frequencies above 20,000 cycles per second which is the approximate limit of human hearing. Propagation of U. in air or other gas is very poor and nearly all practical applications are in liquids or solids. The earliest practical application was to detect submarines during the F.W.W. but recently the field has greatly expanded.

The lower frequencies of 20,000-80,000 cycles are

mainly used for cleaning in industry and in hospitals. Higher frequencies have been used in the form of pulses to produce echoes as a means of measuring the depth of the sea, to detect flaws in metal and to show displacements of the brain in surgery. Recently it has become possible to make photographic records of cross-sections by U. using the ultrasonic tomograph. First used in the U.S.A., it was invented by British radiologist Douglas Gordon; the part of the patient's

ULTRASONICS. When a number of layers of fabrics are subjected to intense high frequency vibrations they interlock or bond together so intimately that it would be easier to tear the main fabric rather than rip the seam apart. The threadless stitcher illustrated is an ultrasonic bonder mainly designed for use with medium and lightweight man-made fabrics.

Courtesy of Omega Laboratories Ltd.

body to be diagnosed is immersed in a water tank, a probe being passed round in the water and a picture being built up by a camera inside the machine.

High power U. has been used with focussing arrangements to destroy tissue at a depth in the body, and using extremely high frequencies of 1,000 megacycles or more it has been possible to make an ultrasonic microscope.

ULTRA-VIOLET RADIATION. Light rays invisible to the naked eye, of a wavelength less than 3,900 Angström units, the shortest being about 10 Å when the X-ray range begins. They are extremely powerful, producing sunburn and causing the formation of vitamin D; they are strongly germicidal and may be produced artificially by mercury vapour and arc lamps for therapeutic use. U.V.R. may be detected with ordinary photographic plates or films down to 2,000 Å. Below this Schumann plates and special vacuum apparatus must be used. It can also be studied by its fluorescent effect on suitable materials.

ULYSSES. See ODYSSEUS.

UMBA'LLA. Indian city in Punjab, an important military cantonment, and a commercial and trading centre with some manufactures and an airport. Pop. (1961) 105,543.

UMBELLIFERAE. Plant family of dicotyledons containing about 200 genera and 2,700 species, characterized by an inflorescence in which all the foot stalks of a flower cluster radiate from a common point at the top of the stem. They include hemlock, celery, fool's parsley, and carrot.

UMBERTO II (Humbert) (1904-). Last king of Italy. He succeeded on the abdication of his father, Victor Emmanuel III, on 9 May 1946, and abdicated on 13 June and left the country. From 1944 he had been Lieut.-Gen. of the realm. He subsequently settled in Portugal as the Count di Sarre.

UMBRELLA. Portable protection against the rain - when used against the sun usually called a parasol or sunshade. They were used by the Chinese more than

locomotive run by steam, which carried passengers, and in 1804 the first steam-engine to be run on rails.

TREVOR-ROPER, Hugh Redwald (1914–). British historian. Regius prof. of modern history at Oxford from 1957, he has interests in the Tudor/Stuart period, e.g. *Archbishop Laud and The Gentry, 1540–1640*, but he attracted widespread attention by *The Last Days of Hitler* (1947), written after he had been sent to Berlin to probe the facts.

TRIANON (trē'anoñ), Treaty of. The peace treaty between Hungary and the Allies signed at the Trianon Palace, Versailles, in 1920.

TRIBUNE (tri'būn). Roman magistrate of plebeian family, elected annually to defend the interests of the plebeians. When the office was instituted in 494 B.C. there were 2 Ts.; the number was later increased to 10. They could veto the decisions of any other magistrate.

TRICHINA (tri'kina). Parasitic nematode which breeds in rats, pigs, and man. If the larvae enter the intestine they will spread through the bloodstream into the muscles, remaining for long periods, and causing the disease called trichinosis.

TRICHINO'POLY, another form of **TIRUCHIRAPALLI**.

TRIER (trēr). City in Rhineland-Palatinate, W. Germany, on the Moselle near the Luxembourg frontier. It has notable Roman remains. Its cathedral, founded in the 11th cent., was destroyed in the S.W.W. Pop. (1966) 86,000.

TRIESTE (trē-est'; Ital. trē-e'stā). Italian city and free port on the Adriatic, in Friuli-Venezia Giulia region. The Roman Tergeste, T. became Austrian in 1382 and, except for occupation by Napoleon 1809–14, remained so until 1918 when the Allies occupied it and it was transferred to Italy under the treaty of Saint-Germain-en-Laye. Yugoslavia claimed T. and after S.W.W. T., with its surroundings (298 sq. m. in all), was made a demilitarized free zone under a gov. to be appointed by the U.N. which failed to agree on the gov. to be chosen; and in 1954 the U.K., U.S.A., Italy, and Yugoslavia agreed that 81½ sq. m. of the enclave (incl. the port) should go to Italy, the rest to Yugoslavia. Pop. (1961) 273,390.

TRIGONO'METRY. Branch of mathematics which solves problems relating to plane and spherical triangles. Its principles are based on the fixed proportions of angles and sides in a right-angled triangle. It is of importance in surveying. Invented by Hipparchus (q.v.), it was developed by Ptolemy of Alexandria (q.v.) and was known to Hindu and Arab mathematicians.

TRILLING, Lionel (1905–). American literary critic. B. in N.Y. city, he was ed. at Columbia univ., where he became prof. of literature 1965. Appreciative of the sociological background to literature, he helped to make E. M. Forster known in the U.S. by his study in 1944. Other books incl. *The Liberal Imagination* (1950) and *Freud and the Crisis in our Culture* (1955).

TRILOBITE (tri'lobit) Extinct marine arthropod (class Trilobita) of the Palaeozoic period. The Ts. had segmented bodies and ranged from a fraction of an inch to over a foot in length.

TRIMURTI (trimoor'ti). The Hindu triad, representing the Absolute Spirit in its 3 aspects: Brahma, personifying creation; Vishnu, preservation; Siva, destruction.

TRINCŌMALEE'. Seaport on the N.E. coast of Ceylon, with a fine natural harbour, an early Tamil settlement. T. was a British naval base until 1957. Pop. (1963) 33,000.

TRINIDAD AND TOBĀ'GŌ. Independent state within the Brit. Commonwealth comprising Trinidad,

second largest and most southerly of the W. Indian Islands, Tobago, 19 m. N.E. of Trinidad, and some smaller islands. Trinidad lies 7 m. N. of the nearest point of Venezuela and rises to 3,085 ft. in Mt. Aripo. The climate is tropical with cool nights. Agriculture is the main occupation; sugar, cocoa, coffee, citrus fruits are produced. Petroleum and asphalt are the chief mineral products. Discovered by Columbus 1498, colonized by the Spaniards 1532, Trinidad was taken by the Brit. 1797, ceded to them 1802. Area 1,864 sq. m.; pop. (1960) 794,624 (43 per cent of African origin, 36 per cent of E. Indian). Tobago was ceded to Britain in 1814 by the Fr. It produces copra, cocoa, fresh vegetables, poultry and other livestock, etc. Area 116 sq. m.; pop. (1960) 33,333.

The cap. of T. and T. is Port of Spain, Trinidad. T. and T., a member of the Federation of the West Indies, 1956, was given independence when that projected federation came to an end in 1962. It has a gov.-gen. and a parl. with an elected house of representatives and an appointed senate.

TRINITY. In Christian theology, the doctrine that while God is one in nature, He is three distinct persons, the Father, the Son, and the Holy Ghost. It became Catholic doctrine in the Nicene Creed (q.v.).

TRIPOLI. Port of the Lebanon, 40 m. N.N.E. of Beirut, the terminus of an oil pipe-line from Kirkuk. It stands on the site of a Phoenician city. Pop. (1966) 175,000.

TRIPOLI. Chief seaport, airport, and one of the 2 caps. of Libya, also cap. of T. division, on the Mediterranean. There are Roman remains. Developed by the Italians after 1911, T. became their chief N. African port. Pop. (1964) 245,000.

TRIPOLITANIA. Former prov. of Libya, N. Africa, stretching from Cyrenaica in the E. to Tunisia in the W. Tripoli was the cap. Italy captured T. from Turkey in 1912. The Brit. 8th Army made a rapid advance through T. Dec. 1942–Jan. 1943 during the N. African campaign. Area c. 136,000 sq. m. In 1963 T. was subdivided into admin. divisions.

TRIPURA (tre'poo'ra). Union terr. from 1956, Rep. of India, formerly a princely state, between E. Pakistan and Assam. It grows rice, cotton, tea, sugar cane, etc. The cap. is Agartala. Area 4,036 sq. m.; pop. (1961) 1,142,005.

TRISTAN or Tristram. Legendary Celtic hero. His story is laid mainly at the court of King Mark of Cornwall. His love for Iseult of Ireland has inspired many medieval and modern versions, especially Wagner's opera *Tristan and Isolde*.

TRISTEARIN. See **STEARIN**.

TRISTAN DA CUNHA (koon'ya). Group of 4 small islands in the Atlantic, midway between S. Africa and S. America, a dependency (1938) of St. Helena (q.v.). T. da C. proper is a volcano (7,164 ft.), long thought to be extinct, which erupted violently in 1961. Evacuated to Britain, the people returned in 1963. Area 40 sq. m.; pop. (1967) 269. T. da C., then uninhabited, was occupied by the Brit. in 1814.

TRITON. In Greek mythology, a merman, son of Poseidon and Amphitrite.

TRIUMVIRS. Two groups of 3 magistrates governing the Roman republic. The first T. (60 B.C.) were Julius Caesar, Pompey, and Crassus, the 2nd (43 B.C.), Augustus, Antony, and Lepidus.

TRIVANDRUM. Indian city, cap. of Kerala state and of T. dist., 50 m. N.W. of Cape Comorin. Once cap. of the former princely state of Travancore, it has a univ. (1937), an old fort, and a famous shrine. It is noted for ivory and wood carving. Pop. (1961) 302,214.

TROGLODYTES (troglōdits). Greek term for cave-dwellers, designating certain tribes in the ancient world. The best-known were those of S. Egypt and Ethiopia, a primitive pastoral people.

TROGONS. Beautiful tropical birds of the New and Old World in the family Trogonidae. The Central

TRILOBITE

1,000 yrs. B.C. and also by the rulers of ancient Egypt and Assyria, when they were also a symbol of power, as they are still regarded in parts of Africa, etc. Revived in clerical use in 16th cent. Italy, U.s. were first carried as an everyday protection in England by Jonas Hanway (1712–86), and are still part of 'regulation City uniform'. See illus. p. 674.

UMBRIA. A region of Italy in the central Apennines, drained by the Tiber. Perugia and Terni are the chief towns. Area 3,265 sq. m.; pop. (1961) 788,546.

UNAMUNO (oonahmoo'nō), Miguel de (1864–1936). Spanish writer. B. at Bilbao and proud of his Basque origin, he was prof. of Greek at Salamanca from 1892 and rector of the univ. from 1900, but was exiled 1924–30 for criticism of the military directorate of Primo de Rivera. His works incl. a mystic poem on survival of death *El Cristo de Velazquez* (1920: *The Velazquez Christ*); the key philosophical study *Del Sentimiento Trágico de la Vida* (1913: *The Tragic Sense of Life*); an interpretation of Cervantes, travel books, plays, stories and novels (e.g. *Niebla*). He is widely influential in the Spanish-speaking world, but an individualistic style has made translation difficult.

UNCLE SAM. Nickname for the U.S.A. It originated during the war of 1812, probably from the initials U.S. placed on government property.

UNDERGROUND. Name for London's city and suburban rail services, operated from 1933 by the London Passenger Transport Board (re-named L.T. Executive 1948–62, L.T. Board from 1963), which cover a network of over 240 m. – 90 m. of it below ground – more than 2 million passenger journeys being made per week. The world's first U. (1863), 4 m. in length, was the conception of a London solicitor to relieve traffic congestion; the latest extension, the Victoria Line (1963–9), runs to Walthamstow in the N.W. and is being extended S. of the Thames. The major cities of the world have U.s. and each system reflects some characteristics of its people, from the frenetic activity of the N.Y. 'subway' to the ordered calm of the Tokyo U. and monumental Moscow U.

UNDERWOOD, Leon (1890–), British artist and sculptor. B. in London, he has travelled widely to

LEON UNDERWOOD. A skilled craftsman, as well as a forceful artist, he is seen here at work in his studio on the maquette for his bronze 'Ideas', which was commissioned by the L.C.C. for their Hillgrove Estate, near Swiss Cottage. Courtesy of the Kaplan Gallery; Photo by J. S. Lewinski.

Iceland, the U.S., Mexico and W. Africa, devoting several books to the masks, wood carvings and bronzes of the last-named. His rhythmic figures are powerful symbols of human myth.

UNDSET (oond'set), Sigrid (1882–1949). Norwegian

novelist. B. in Denmark, she was a clerk in Oslo 1899–1909, and first won fame with *Jenny* (1912). Her masterpiece is *Kristin Lavransdatter* (1920–2), set in the 14th cent., which is strongly Catholic – she was in 1925 received into the R.C. Church. In 1928 she was awarded a Nobel prize.

UNEMPLOYMENT. Lack of employment on a large scale. A certain proportion of U. is 'frictional', i.e. due to the flow of labour from a depressed to a prosperous industry, but the term as used today relates to U. of a different character, i.e. long-term mass U., such as became a permanent feature of economic life in all industrial countries between the two world wars, e.g. in the U.S.A. there were 3–4 million unemployed even during the 1929 boom. In Britain, for at least 150 years before 1939, the supply of labour always exceeded the demand except in war-time, and economic crises accompanied by mass U. were recurrent from 1785. The percentage of unemployed (in trade unions) averaged 6 during 1883–1913 and 14.2 (of those covered by the old U. Insurance Acts) 1921–38. The S.W.W. and the rebuilding and expansion that followed meant shortage of labour rather than U. in Britain and on the Continent, but how far control of the economy could maintain this position became conjectural in the subsequent years as the figures began to fluctuate; during 1945–60 the average was 1.7 per cent of all workers. In the U.S.A. certain areas, especially those with a large Negro population, still have chronic U. problems, the total ranging from c. 3½ to 5 million. In some countries, e.g. Latin America and parts of Italy, there is chronic 'underemployment' because the territories are under-developed, and in others, e.g. the newly emergent African states and India, there tends to be lack of employment in the higher grades for which students may have been educated, leading in both cases to governmental instability. See **SOCIAL SECURITY**.

UNGARETTI, Giuseppe (1888–). Italian poet. B. in Alexandria, and later living in Paris and São Paulo, he shows in his lyrics a cosmopolitan independence of Italian poetic tradition, and they are noted for their spare simplicity, esp. the poems (permeated by a horror of war), in his best-known collection *Allegria di naufragi* (1919: *L'Allegria*).

UNGULATA. Large order of mammals including all the hoofed forms, ranging from pigs to elephants.

UNIATE (i.e. united Greek or Eastern Orthodox and R.C. Church). Name given to those Christian Churches which accept the full Catholic faith and the supremacy of the Pope, and are in full communion with the R.C. Church, but retain their own liturgy and separate organization.

UNICORN. Fabulous animal referred to by classical writers, said to live in India and to be like a horse but with one straight horn. See **ORYX**.

UNIFORMITY. Name given to 2 acts of parliament. The 1st (1559) imposed the Prayer Book on the whole English kingdom; the 2nd (1662) required the Prayer Book to be used in all churches, and some 2,000 ministers who refused to comply were ejected.

UNION. The Act of Union of 1707 effected the union of England and Scotland, and that of 1801 of England and Ireland. The latter was abrogated when the Irish Free State was constituted in 1922.

UNION FLAG. The British national flag, popularly called the *U. Jack*, although this is accurate only when it is flown on the jackstaff of a warship. See **FLAG**.

UNION MOVEMENT. Political group in Britain. Originating with the New Party founded by Sir Oswald Mosley (q.v.) and a number of Labour M.P.s. in 1931, it later developed into the British Union of Fascists (1932). An attempt by the 'blackshirts' to march through the East End of London in 1936 led to the Public Order Act, forbidding the wearing of such political uniforms. In 1940 the organization was

American Quetzal (*Pharomacrus mocinno*) has golden-green tail plumes 3 ft. in length.

TROIS RIVIÈRES (trwah rêvyâr). City in Quebec, Canada, a lumber port 86 m. N.E. of Montreal with pulp, paper, and cotton mills and iron foundries. Champlain founded it 1634. Pop. (1961) 53,477.

TROLLEYBUS. Type of bus driven by electric power collected from overhead wires, and having the advantage over a tram of rather greater manoeuvrability. However, modern traffic conditions render them still obstructive, and they are decreasingly used.

TROLLOPE, Anthony (1815–82). British novelist. B. in London, he entered the Post Office as a clerk in

1834, invented the pillar box, and rose to a responsible position as surveyor before retiring in 1867. His 1st successful novel was *The Warden* (1855), which began the series set in the imaginary co. of Barsetshire: *Barchester Towers* (1857), *Doctor Thorne*, *Framley Parsonage*, *The Small House at Allington*, and *The Last Chronicle of Barset* (1867) – his masterpiece. Other books incl. *The Three Clerks*, *Orley Farm*, *The Belton Estate*, *The Claverings*, *The Eustace Diamonds*, and

Dr. Wortle's School; and a political group including *Phineas Finn* and *The Prime Minister*. He delineated the English middle classes with mellowed insight in an easy pleasant style. His *Autobiography*, pub. in 1883, shocked the public by its workmanlike attitude to his art. His mother Frances Milton T. (1780–1863) was also a novelist and wrote a caustic account of the *Domestic Manners of the Americans* (1832).

TROMBONE. A brass wind musical instrument, developed from the sackbut. It consists of a tube bent double, varied notes being obtained by an inner sliding tube. The 4 sizes are alto, tenor, bass, and contra-bass.

TROMP, Maarten Harpertzoon (1597–1653). Dutch admiral. B. at Brielle, he twice defeated the Spaniards in 1639. He was defeated by Blake in May 1652, but in Nov. triumphed over Blake in the Strait of Dover. In Feb.–June 1653 he was defeated by Blake, Monk, and Deane, and was killed off the Dutch coast. His son, Cornelius T. (1629–91), also an admiral, won fame in 1673 for his battle against the English and French fleets.

TROMSØ. Fishing port in N.W. Norway, situated on T. island off the mainland. The battleship *Tirpitz* was sunk by British bombers in 1944 when at anchor in T. fjord. There is a univ. (1968). Pop. (1961) 12,363.

TRONDHEIM (tron'dhlm). Fishing port with fish canneries; textile, margarine, soap factories, etc., at the mouth of the Nid, on T. fjord. It was cap. of Norway in the 10–11th cent. and has a univ. (1968). Pop. (1963) 57,453.

TROPICS. The Ts. of Cancer and Capricorn (parallels of latitude 23° 28' N. and S. of the equator) prescribe the northernmost and southernmost limits of the area of the earth's surface in which the sun can be directly overhead.

TROPINE (trôpfn). (C₁₁H₁₅ON). A white crystalline solid formed by the hydrolysis of alkaloid atropine.

TROPISMS. Automatic movements of plants in reaction to certain influences. Two common T. are the growth toward water (hydrotropism) and toward light (heliotropism).

TROPOSPHERE (trôp'ôsfer). The lower part of the earth's atmosphere extending about 6½ m. upwards from the earth's surface, in which temperature decreases with height except in local layers of temperature inversion. The *tropopause* is the upper boundary of the

TRONDHEIM. The cathedral, where Norwegian kings are crowned, was begun in the 11th century. Often burned, it has always been restored, and is the country's finest church. Courtesy of the Norwegian National Tourist Office

T. above which the temperature is constant or even increases slightly with respect to height.

TROSSACHS. Woodland glen between Lochs Katrine and Achray in Perthshire, Scotland, 2 m. long, a favourite tourist spot. See illus. p. 530.

TROTSKY, Leon Davidovitch. Assumed name of Russian revolutionary Lev D. Bronstein (1879–1940). B. nr. Elizavetgrad, of Jewish parentage, he was twice exiled to Siberia for Marxist activities, and with Lenin organized the revolution of Nov. 1917, and conducted the peace negotiations with Germany. As Commissar for War he was responsible for the raising of the Red Army. T. differed with the Communist Party on policy, and was expelled from the Council of People's Commissars in 1925, and from the party in 1927. Exiled in 1929, he settled in Mexico, where he was assassinated by a disgruntled follower. He wrote many works criticising the Soviet régime, notably his *History of the Russian Revolution*.

TROUBADOURS (troo'badoorz). Class of poets of Provence and S. France, who fl. in the 11th–13th cents., and included both nobles and inferior minstrels. The Ts. originated a type of lyric poetry, devoted mainly to themes of exalted love and the idealization of women, and to the glorifying of the deeds of their patrons. Contemporary with the Ts. were the *Trouvères*, the epic poets of N. France.

TROUT. Fish closely related to the salmon. The common T. (*Salmo fario*) is widely distributed in Europe, occurring in British fresh and coastal waters. Sea T. are generally silvery and river T. olive-brown, both having spotted fins and sides. In the U.S.A. the name T. is given to various species, notably to the rainbow T. (*Salmo gairdneri* *irideus*) which has been naturalized in many other countries.

COMMON TROUT

TROUVILLE (troovêl)-SUR-MER. Summer resort and fishing port in Calvados dept., France, on the estuary of the Seine. Pop. (1962) 6,822.

TROY or Ilium. Ancient city of Asia Minor, in the district called the Troad. Homer's *Iliad* tells of the siege and destruction of T. by the Greeks. After a 10 years' investment it fell to the Greeks through the stratagem of the wooden horse, c. 1184 B.C. Excavations by H. Schliemann revealed 9 different cities

declared illegal and its leaders interned, but at the end of the S.W.W. it was revived as the U.M., its anti-Jewish and anti-colour doctrines leading to disorder at its meetings.

UNION OF SOVIET SOCIALIST REPUBLICS (U.S.S.R.). See SOVIET UNION; RUSSIA.

UNITARIANS. A Christian denomination which rejects the orthodox doctrine of the Trinity, asserts the Fatherhood of God and the Brotherhood of Man, and gives a pre-eminent position to Jesus Christ as a religious teacher, while denying his Deity. Us. also reject the doctrines of original sin, the atonement, and eternal punishment, and they have no creeds. The various congregations are linked in the General Assembly of Unitarian and Free Christian Churches.

UNITED ARAB REPUBLIC. Union formed 1958, broken 1961, between Egypt and Syria. Egypt continued to use the name after the breach.

UNITED KINGDOM. Name for England and Scotland together from the accession of James VI of Scotland as James I of England, 1603, confirmed by the Act of Union, 1707, and extended to incl. Ireland, 1801, the full title being U.K. of England, Scotland, and Ireland; from 1927 the form U.K. of England, Scotland and N. Ireland was used.

UNITED KINGDOM ATOMIC ENERGY AUTHORITY. Estab. by the U.K.A.E. Act of 1954, it controls atomic energy research and development, the Min. for Science being responsible for general policy and for funds provided for the authority. It has a five-fold organization; 1, *Research Group* at Harwell (q.v.); 2, *Weapons Group* at Aldermaston (q.v.); 3, *Reactor Group* responsible for the Dounreay and Windscale nuclear power reactors and the Winfrith (Dorset) A.E. Establishment; 4, *Production Group*, responsible for managing uranium and plutonium factories at Springfields (Lancs), Windscale, and Capenhurst (Cheshire), and for the Chapelcross and Calder Hall nuclear reactors; and 5, *Engineering Group*, responsible for the design and construction of U.K.A.E. plants, etc. — H.Q. for the 3 last-named are at Risley, Lancs.

UNITED NATIONS. An association of states pledged to maintain international peace and security, and to promote international co-operation. Its charter, which was drawn up by the San Francisco Conference in 1945,

is based on proposals drafted at the Dumbarton Oaks Conference. It succeeded the League of Nations (q.v.).

The 6 principal organs of the U.N. are (1) the *General Assembly* of representatives of all member states, which meets regularly once a year, and may discuss any matter within the scope of the charter, but may not make recommendations on anything already being dealt with by the Security

UNITED NATIONS. The permanent headquarters of the U.N. in New York occupies an 18-acre site on Manhattan Island between First Avenue and the East River. To the right is the 39-storey Secretariat, with the General Assembly beyond, and the Library in the foreground.

Courtesy of the United Nations.

Council. Decisions on important questions are made by a two-third majority of members voting, and on other questions by a simple majority, each member having one vote. (2) the *Security Council* consisting of 5 permanent members (U.K., U.S.A., U.S.S.R., France and Nationalist China), and 6 others elected for 2 years by the General Assembly. Its decisions must be supported by at least 7 of its members, incl. all permanent members, who thus exercise the right of veto. Taking cognizance of disputes, it may undertake investigations into the circumstances and make recommendations to the parties concerned, and may call on all members to take economic or military measures to enforce its decisions. (3) the *Economic and Social Council*, consisting of representatives of 18 member states, elected for 3 years by the General Assembly, which initiates studies of international economic, social, cultural, educational, health and related matters, and may make recommendations to the General Assembly. It operates largely through specialized commissions of international experts on economics, transport and communications, human rights, status of women, etc. It also co-ordinates the activities of such specialized intergovernmental agencies as the U.N. Educational, Scientific and Cultural Organization (UNESCO 1946) to combat illiteracy, raise living standards through education, etc.; International Labour Organization (q.v.); Food and Agriculture Organization (FAO 1945), to help the nations improve food production and distribution, raise nutritional standards, etc.; International Atomic Energy Agency (IAEA 1957) to develop the peaceful uses of atomic energy; World Health Organization (WHO 1946), to prevent the spread of, and eliminate, such diseases as malaria and tuberculosis; International Monetary Fund and International Bank for Reconstruction and Development, which promote international economic co-operation, etc. (4) the *Trusteeship Council*, consisting of members administering Trust Territories (q.v.), other permanent members of the Security Council, plus sufficient other elected members to balance the administering powers. (5) the *International Court of Justice* (q.v.) at The Hague which is U.N.'s principal judicial organ; the 15 judges are elected by the General Assembly and the Security Council, and U.N. members are pledged by the charter to comply with the decisions of the court in cases to which they are a party. (6) the *Secretariat*, the administrative body, consisting of the Secretary General, appointed by the General Assembly on the recommendation of the Security Council for 5 years, and an international staff appointed by him. The permanent H.Q. of the U.N. are on the East Side of Manhattan, New York City.

Members contribute according to their resources, an apportionment being made by the General Assembly, with the addition of voluntary contributions from some govts. — to the funds of the U.N. which finance the programme of assistance carried out by the U.N., intergovernmental agencies, the U.N. Children's Fund (UNICEF), the U.N. refugee organizations, and the U.N. Special Fund for undeveloped countries.

The preponderance of influence in the U.N., originally with the Allied States of the S.W.W., is now more widely spread. Although part of the value of the U.N. lies in recognition of member states as sovereign and equal, the rapid increase in membership of minor — in some cases minute — states was causing concern by 1969 (126 members) as lessening the weight of voting decisions. The U.N. also suffers from the lack of adequate and independent funds and forces, and the intrusion of the Cold War which divides members into adherents of the E. or W. and the uncommitted.

UNITED PROVINCES OF AGRA AND OUDH. Prov. of British India which formed the major part of the state of UTTAR PRADESH

buried one beneath the other, of which the 7th, a post-Mycenaean fortress, was probably the Homeric T.

TROYES (trwah). French city, cap. of Aube dept., on the Seine, wealthiest city of the anc. prov. of Champagne. The treaty of T. (1420) granted the French crown to Henry V of England. Pop. (1962) 68,898.

TRUCIAL STATES. Seven small sheikdoms (Fujairah, Ras al Khaimah, Umm al Qaiwain, Ajman, Sharjah and Kalba, Dubai, and Abu Dhabi) on the former 'pirate' coast of the Persian Gulf N. of Muscat and Oman. They derive the name T.S. from the agreements made in 1820 and later renewed with Britain to ensure a condition of truce in the area, and suppression of piracy and of the slave trade. Oil discoveries in the 1960s gave them unforeseen importance, notably Abu Dhabi (q.v.) ruled by Sheikh Zaid: area 26,000 sq. m.; pop. (1969) 50,000 and Dubai ruled by Sheikh Rashid: area 1,500 sq. m.; pop. (1969) 70,000—both incl. large foreign populations. The twin towns of Dubai-Deira form the largest commercial centre of the area, and nearby Port Rashid (1967-73) will on completion be the region's chief port: there is also an internat. airport. Total area of T.S. 32,000 sq. m.: pop. (1968) 180,200. See ARAB EMIRATES, Fed. of.

TRUDEAU (troodoh'), Pierre Elliott (1919-). Canadian Liberal statesman. Called to the Quebec Bar in 1943, he became Min. of Justice and Attorney-General in 1967, and in 1968 succeeded Pearson as P.M. In the General Election of 1968 he was returned with an overall majority. He strongly opposes Quebec separatism, and favours negotiations with Red China and the U.S.S.R.

TRUFFLE. Subterranean fungus, highly valued in cookery and confectionery. The finest (*Tuber melanosporum*) comes from Périgord, generally growing under oak trees: it is rounded, blackish brown and covered with warts externally, and with blackish flesh. Pigs like Ts. and are used to locate them, as are dogs.

TRUJILLO. City and port, founded 1535, in Peru, 320 m. N.W. of Lima. Exports incl. sugar and copper. Pop. (1965) 123,500.

TRUJILLO MOLINA (trōohē'yō mōlē'nah), Rafael Leonidas (1891-1961). Dominican dictator. Pres. of the rep. 1930-8 and 1942-52, he was also generalissimo of the armed forces from 1933, and retained control behind the scenes even after handing over the presidency to his brother in 1952. Although under his regime the island was transformed to a modern state by the erection of schools and hospitals and by public works programmes, his suppression of political opponents led to his assassination.

TRUMAN, Harry S. (Shippe) (1884-). 33rd President of U.S.A. B. in Lamar, Missouri, he practised law, rose to rank of major in the F.W.W. and entered the senate as a Democrat in 1935. In Jan. 1945 he became Vice-President, and on Roosevelt's death in April succeeded to the presidency. In 1948 he was elected for a second term, but in April 1952 declined to stand again. During his term of office he took the responsibility for dropping the atom bombs on Japan at the close of the S.W.W., when he attempted to stem the rise of Communism by the extension of economic and military aid to friendly countries, and by armed intervention in S. Korea, on behalf of U.N.

TRUMPET. Brass wind musical instrument; a doubled tube with valves.

TRUMPETER. A genus of crane-like birds. *Psophia crepitans* is found in British Guiana.

TRURO. English city (bor). in Cornwall, at the head of Fal estuary. Its cathedral was built 1880-1910. Pop. (1961) 13,328.

TRUST. (1) Legal term for an arrangement by which A is empowered to administer property belonging to B for the benefit of C. A and B may be the same person; B and C may not be. (2) In business, the link-

ing of several companies either by transferring shares of the separate cos. to trustees or by the creation of a holding co. whose shares are exchanged for those of the separate cos. Either method prevents the competition that would exist if the cos. involved had remained independent, and in the U.S.A. both were made illegal by the Sherman Anti-T. Act, 1890, enforced with vigour for the first time by 'T. buster' Pres. Theodore Roosevelt. A notable application of the act was the dissolution into its component cos. of the Standard Oil Co. of N.J. by the Supreme Court, 1911. (3) A unit T. holds and manages a number of marketable securities; by buying a 'unit' in such a trust, the purchaser has a proportionate interest in each of the securities so that his risk is spread. (4) An investment T. is not in modern times a T., but a public co. which invests in marketable securities money subscribed by its shareholders who receive dividends from the income earned by the T. (5) A body formed with some special, usually charitable, object; e.g. the National T. (q.v.); the Carnegie U.K. T. (1913), whose chief object is the provision of free libraries. Similar bodies in the U.S.A. are the Rockefeller (1913) and Ford (1936) Foundations.

The PUBLIC TRUSTEE (1908, under an act of 1906) is an English official empowered to act as executor and trustee, either alone or with others, of the estate of anyone who appoints him.

TRUST TERRITORY. Non-self-governing territory, either held under mandate (q.v.); or detached from an enemy state after the S.W.W.; or voluntarily placed under the U.N. trusteeship system by the state responsible for its administration, on terms agreed between the latter and the U.N. The T.Ts. are progressively prepared for independence, and supervision by the U.N. involves the sending of regular missions to, and the hearing of oral petitions from them. T.Ts. not yet self-governing incl. the Pacific Islands T.T.

TSANA. Another form of TANA.

TSANGPU. Name 1913-46 of WUCHOW.

TSAR. Title of the Russian emperors. It derives from the Lat. *Caesar*.

TSARITSYN. Old name of VOLGOGRAD.

TSCHAIKOVSKY. See TCHAIKOVSKY.

TSETSE. Fly of the genus *Glossina*, related to the house fly, species of which transmit the disease nagana to cattle and sleeping sickness to man.

TSETSE FLY

TSINAN. Anc. Chinese walled city on the Hwang Ho, cap. of Shantung prov., a commercial and food processing centre with a textile industry. Pop (1953) 680,000.

TSINGTAO (-tow'). Good Chinese port on Kiaochow Bay in Shantung prov. with cotton and flour mills, engineering and locomotive works, etc. T., chief town in Kiaochow terr. ceded to Germany in 1898, was captured in 1914 by Brit. and Japanese forces and restored to China. Pop. (1957) 1,121,000.

TSUSHIMA (tsōo'shimah). Island of Japan, S.E. of Korea. It is mountainous and consists of 2 halves, united at low tide. In the T. Strait the Russian fleet was destroyed by the Japanese in 1905. Area 271 sq. m.

TUAMOTU (tōō'ahmō'tōō) ISLANDS. Group of c. 80 atolls stretching 1,300 m. in the central Pacific, part of French Polynesia. Discovered 1606 by Span. explorers, they were annexed by France in 1881. They produce pearls and copra. Area 411 sq. m.; pop. (1962) 7,000.

TUBERCULOSIS (T.B.). Disease caused by different species of tubercle bacillus affecting birds, cattle and man. Bovine T., carried in milk, affects bones, joints and glands, chiefly of young people, and has

UNITED STATES OF AMERICA (U.S.A.).

Federal republic in North America, extending from the Atlantic to the Pacific and from Canada to Mexico, plus the outlying states of Alaska and Hawaii.

Physical. The U.S.A. proper, occupying the central part of the N. American land mass, is about 2,700 m. long from E. to W., and has a greatest width from N. to S. of about 1,600 m. The surface consists of vast central plains, bounded by great mountain ranges, the Rockies in the W. and the Appalachians in the E. To the E. of the Appalachians are the Atlantic coast lowlands. W. of the Appalachians is the 'Central Valley', extending from the Great Lakes to the Gulf of Mexico and taking up about half the entire area of the country; here are the Prairies and the Great Plains, constituting one of the most important agricultural areas on the globe. The only considerable exception to its level uniformity is the Ozark mts. in Arkansas and Oklahoma. W. of the plains rises the great system of mountains, to the E. the Rockies, to the W. the Sierra Nevada and the Cascade mts. and Coast ranges, with a great plateau, much of it desert, in between. The highest point in the U.S.A. (and in N. America) is Mt. McKinley (20,270 ft.) in Alaska; the lowest, Death Valley (280 ft. below sea-level) in Calif. Mt. Whitney, Calif., reaches 14,495 ft.; Mt. Elbert, Col., highest point in the Rockies, 14,420 ft. In the W. is a narrow, fertile strip bordering the Pacific. The main river system is the Missouri-Mississippi basin, flowing through the central plains; the chief rivers flowing into the Pacific are the Columbia (which rises in Canada) in the N. and the Colorado in the S. The many rivers of the Atlantic slope are comparatively short, though of great importance. In the N. are the Great Lakes, of which Michigan is wholly in the U.S.A., the others being partly in Canada; there are many smaller lakes.

CLIMATE. In the centre and the mountains of the Cordillera (Rockies, Sierra Nevada, etc.) the climate is one of extreme cold and heat. The Pacific coastal area has more uniform climate than the Atlantic seaboard, where the winters are severe. California is renowned for its geniality. Tropical conditions prevail in the S. states. In the E. rainfall is abundant, and conditions for urban and agricultural life are excellent. The Plains are liable to drought, and areas in the mtns. and plateaux are almost rainless.

REGIONS. There are traditionally some ten great regions. (1) New England, the historic core of the Union. Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, and Connecticut cover most of the area of original settlement, and are today one of the chief centres of population and industry. (2) New York, the 'Empire State', has nearly 10 per cent of the pop. and about a quarter of the country's wealth. (3) The Middle Atlantic States consist of Pennsylvania, New Jersey, and Delaware, and include the vast coal, iron and steel area of Pittsburgh as well as much farm land. (4) The Middle West is the industrial centre, and the most typically American; it includes Ohio, Indiana, Illinois, Michigan, and Wisconsin; agriculture is important, but more so are the industries based on the iron-ore of Michigan. (5) The Prairie States (Minnesota, Iowa, N. Dakota, S. Dakota, Nebraska, and Kansas) are one huge granary, producing spring wheat in the N. and winter wheat or maize farther south. (6) The Mountain States (Montana, Wyoming, Colorado, New Mexico, Utah, Arizona, Nevada, and Idaho) comprise the pastureland to the E. of the Rockies, the Rockies with sheep and cattle ranches and mineral mines, and the desert region on the plateaux. (7) The Pacific States, California, famed for fruit and films, Oregon, Washington, Alaska and Hawaii. (8) The South consists of Virginia, N. Carolina, S. Carolina, Georgia, Alabama, Mississippi, Louisiana, and Florida. Tobacco, rice, and cotton are the chief crops. (9) The S.W. contains Texas and

Oklahoma, home of the cowboy, but nowadays more remarkable for its vast output of petroleum. (10) The Border States (i.e. states separating different economic areas): Maryland, West Virginia, Arkansas, Kentucky, Tennessee, Missouri. Modifying these divisions are new industries divorced from local resources, new mineral discoveries, the rapid industrialisation of the South, and the pop. attraction of sunshine, California in the 1950s and Florida in the 1960s.

Government. The U.S.A. comprises 50 states, and the District of Columbia. Each state is self-governing in local matters, but confides to the central government at Washington the control of foreign affairs and the army and navy. Police, education, public health, etc. remain within the scope of the individual states, but since the Roosevelt 'New Deal' in the 1930s the federal govt. has concerned itself with social provisions of one kind and another. The cap. is Washington, D.C., which belongs to no state, being administered directly by the Federal govt. Executive power is vested in the President, elected by popular vote every 4 years, and by the 22nd amendment (1951) eligible to stand for 2 terms only; he chooses the members of the Cabinet, who may not be (as in Britain) members of the legislature. Legislative power is vested in Congress, composed of 2 houses: the Senate, with 2 members from each state, elected to serve 6 years, one-third re-elected every 2 years; and the House of Representatives of 435 members, distributed according to pop. among the states, and elected for 2 years. For U.S.A. territories, see Table page 1060.

POPULATION. The original settlers in New England and Virginia were mainly of British stock, but immigration over the past 150 years has made the U.S.A. the world's melting-pot of races. In 1960 the Negroes (descendants of Africans imported as slaves) numbered 18,876,831; the (Red) Indian pop. 523,000. The largest religious denomination is the Roman Catholic,

largely been eradicated in highly developed countries by efficient control of dairying and pasteurization. Human T., an airborne infection, attacks mainly the lungs; also intestines, skin, brain, etc., of persons of any age. Highly successful treatment is available by a combination of the drugs *Isoniazid* (INH), *Streptomycin* and *para amino sulphonic acid* (PAS), and lengthy bed rest is seldom necessary.

Diagnostic methods incl. regular chest X-ray; and the tuberculin test, in which an extract of a tubercle bacillus is implanted under the skin, causing a reaction in men or animals suffering from T.

TÜBINGEN. Town in Baden-Württemberg, W. Germany, on the Neckar 22 m. S. of Stuttgart. It has factories making paper, textiles, surgical instruments, etc. T. dates from the 11th cent. and has a univ. (1477). It was cap. of the French zone of occupation after the S.W.W. Pop. (1967) 50,000.

TUBMAN, William V. S. (1895–). Liberian statesman. A descendant of American slaves, he was called to the Bar in 1917, and was a senator 1923–31 and 1934–7 and Associate Justice of the Supreme Court 1937–44. From his election as pres. in 1944, he concentrated on uniting the varied races. His assassination has often been plotted, but he was re-elected 1951, 1955, 1959, 1963, 1967. See illus. p. 402.

TUCUMAN (tookooman'). Cap. of T. prov., Argentina, on the Salí, in the foothills of the Andes.

TUBERCULOSIS. Complete eradication is now possible and this Vietnamese child in a refugee camp near Saigon is being treated under his government's overall BCG vaccination programme. The harmless bacillus used was produced by Calmette and Guérin in 1906, hence the initials used to describe it. Courtesy of W.H.O.

It has sugar mills, distilleries, etc. Founded 1565, T. was the site in 1816 of the signing of the Argentine declaration of independence from Spain. Pop. (1960) 287,000.

TUDOR. English dynasty descended from the Welshman Owen T., the 2nd husband of Catherine of France, the widow of Henry V. Their son Edmund m. Margaret Beaufort, the great-granddaughter of John of Gaunt, and was the father of Henry VII, who ascended the throne in 1485. See table p. 392.

TULA (tōō'lah). Cap. of T. region, R.S.F.S.R., 100 m. S. of Moscow. It has a govt. ordnance factory founded 1712 by Peter the Great. Pop. (1967) 371,000.

TULIP. Genus of plants (*Tulipa*) in the family liliaceae. The garden T. (*T. Gesneriana*) probably originated in the Near East, and, quickly adopted in Europe during the 16th cent., became a craze in the 17th cent. Holland (cf. Dumas *The Black Tulip*) when extravagant prices were paid for rarely coloured bulbs. It is today commercially cultivated on a large scale in the Netherlands and E. Anglia. The T. tree (*Liriodendron tulipifera*) is a member of the magnolia family, with 5-lobed flowers.

TULL, J. B. (1796–1871). British agriculturalist. Farming in his native Berkshire, he developed c. 1701 a drill enabling seeds to be sown mechanically, and so spaced that cultivation between was possible in the growth period. He pub. *Horse-hoeing Husbandry* (1731).

TULSA. Town in Oklahoma, U.S.A., founded 1880, which grew rapidly after the discovery of petroleum in the vicinity in 1901. T. is a major centre of petroleum refining and the hub of a great complex of oil pipe-lines. Pop. (1960) 261,685.

TUNBRIDGE WELLS, Royal. English spa (bor.) in Kent, with chalybeate spring discovered in 1606. Pop. (1961) 39,855.

TUNDRA (toon'dra). A region of high latitude almost devoid of trees. The term, formerly applied to part of N. Russia, is now used for all such regions.

TUNGSTEN. See WOLFRAM.

tunnels, access to the latter being gained by 4 man-made islands (right). Built in 35–40 ft. of water, these are each 1 m. long and rise 25 ft. above the surface.

Courtesy of the Project Information Office, Chesapeake Bay Bridge & Tunnel District.

TUNNEL. Most famous of trench-type are the two-mile long tunnels of the 17.6 m. bridge-tunnel crossing the mouth of the Chesapeake Bay, Virginia, and linking Wise Point and Chesapeake Beach (see profile), opened 1964. They are built of 300 ft. long prefabricated sections of water-tight, double-walled steel casing launched like ships (left); these are sunk into an open trench and when they have been joined by divers and the end plates removed are given a thick protective covering of sand. The 3 sections of roadway trestle (12.2 m.) supported by pre-stressed concrete piles link the

followed by Baptists and Methodists. There were 5½ million professing Jews in 1960.

History. Spaniards made (in Florida), in 1565, the first white settlements in what became the U.S.A. The first English settlement was at Jamestown, Virginia, in 1607. In 1620 the 'Pilgrim Fathers' landed at Plymouth, and eventually founded Massachusetts. English R.C.s. founded Maryland in 1634, English Quakers founded Pennsylvania in 1682. A Dutch settlement (1611) on Manhattan Is., named New Amsterdam 1626, was re-named New York after it was taken by the English in 1664. Throughout most of the 18th cent. the English colonies were threatened by French expansion from the Great Lakes in Canada to Louisiana, but the threat from the French ended with the Seven Years War (1756-63). In 1775 the 13 colonies (N.H., Mass., R.I., Conn., N.Y., N.J., Pa., Del., Va., N.C., S.C., Md., and Ga.) rose against the home govt., declaring themselves in 1776 to be 'free and independent states'. Led by George Washington, they defeated George III's armies in the War of American Independence (called by U.S. citizens the War of the Revolution). By the Treaty of Paris, 1783, Britain recognized the independence of the 13 colonies. A constitution drawn up in 1787 came into force in 1789 and, with amendments, remains in force. Washington was chosen first pres. In 1803 Louisiana (q.v.) was bought from Napoleon and in 1819 Florida from Spain. In 1812-14 a war was fought with England because of commercial disputes arising out of the conflict with Napoleon in Europe, and the British captured and burnt Washington. Later expansion westward carried the terrs. of the U.S.A. to the Pacific and the war with Mexico, 1846-8, secured from that country the vast lands eventually organized as (U.S.) California, Utah, New Mexico, and Texas. Alaska was purchased from Russia in 1867. See also HAWAII.

In 1861-5 was fought the Civil War, or the War between the States, between 11 of the Southern States (S.C., Miss., Fla., Ala., Ga., La., Tex., joined later by Va., Ark., Tenn., and N.C.), the Confederate States,

UNITED STATES. In 1585 Raleigh (q.v.) sent out 109 colonists from Plymouth to America under the command of his cousin, Sir Richard Grenville. Round the strongpoint now known as 'Fort Raleigh' (seen restored above) the first English settlement was established, at the north end of Roanoke Island, North Carolina, but in 1586 Drake took the dissatisfied survivors back to England.

Courtesy of U.S. National Park Service.

which wished to maintain their 'states' rights', in particular the peculiar institution of Negro slavery, and claimed the right to secede from the Union; and the Northern or Federal States which fought to maintain the Union. The Confederate States chose Jefferson Davis as President; the leader of the North was President Lincoln. For 4 years the conflict went on. At first the Confederates were successful under Lee at the battles

* Non-white 20,491,443.

† Does not include the part of the Great Lakes in U.S.A. (60,760 sq. m.), but does include other inland water.

TUNICATA. A class of marine animals, of a low order of vertebrates, who exist on the sea-bed or rocks. *Ascidia mentuala*, or sea-squirt, is grey-green.

TUNIS. Cap. of Tunisia, on T. bay, linked by a 7-m. canal (1893) with La Goulette on the Mediterranean. An old Arab city, T. was occupied by the Fr. in 1881 and developed by them. In Axis occupation 1942-3. it was captured without serious damage by the Allies. Carthage (q.v.), 9 m. N.E., has become a residential suburb of T. Pop. (1966) 642,384.

TUNISIA. Independent rep. in N. Africa, situated between Algeria to the W., Libya to the S.E., and the Mediterranean to the E. and N. The N. is traversed by mountain ranges and incl. fertile areas near the coast, while to the S. of the Shott el Jerid salt lakes most of the land is desert. T. was once heavily forested, and a re-afforestation programme is sponsored by the U.N. Wheat, barley, oats, and esparto grass are cultivated, and wine and olive oil are produced. Dates, almonds, oranges, and lemons are of importance. Sheep, goats, cattle, donkeys, and camels thrive. Mineral wealth incl. phosphates, iron, and lead. Woollen goods, carpets, pottery, and copper ware are manufactured. Tunis is the cap., other centres incl. Sfax, Bizerta, Sousse, Kairouan and Gabès. Area 48,000 sq. m.; pop. (1966) 4,457,862.

TUNKERS or Dunkers. Baptist sect, officially the Church of the Brethren. Formed in Germany in 1708 by Alexander Mack, it moved to Pennsylvania in 1719. Ts. practise adult baptism by total triple immersion.

TUNNEL. Tunnelling is an increasingly important branch of civil engineering in mining, transport, etc. In the 19th cent. there were 2 major advances: the use of compressed air within the T. to balance the external pressure of water and of the T. shield to support the face and assist excavation. In recent years there have been notable developments in linings, e.g. concrete segments and steel liner plates, and in the use of rotary diggers and cutters, and of explosives. Famous Ts. incl.: Chesapeake Bay Bridge-Tunnel (1963), at 17½ m. the longest in the world (See illus. p. 1050); the Simplon (1922: 12.3 m.) and Mont Blanc (1962: 7 m.) under the Alps; and the Seikan (1975: 22½ m.) which will link Honshu and Hokkaido and be the world's longest.

TUNNY. Fish of the mackerel family (*Thunnus thynnus*), also known as tuna, which may reach 14 ft. and weigh c. 1800 lb. It has been fished since ancient times in the Mediterranean as food, and in the 20th cent. fishing for T. with rod and line from a motor-boat has become fashionable on the Pacific coast of N. America and elsewhere.

TURBINE. A rotary steam engine in which the kinetic energy of steam or water is converted into work. Essentially it consists of a shaft, wheel, or rotor, carrying a number of vanes or blades; against the latter are directed jets of steam which cause the shaft to rotate at a high speed. Ts. are classified as impulse or reaction. The former, e.g. the de Laval T. patented in 1882, works purely by impulse; steam is expanded in a nozzle or nozzles from the initial steam pressure to a certain back-pressure, thereby converting its heat and pressure energy into kinetic energy of flow. Some part of this kinetic energy is then absorbed by the moving blades attached to the wheel or rotor, which is mounted on a shaft supported within a casing. In reaction Ts. there is a combination of impulse and reaction effects. Fixed and moving blades are attached alternately to the casing and the rotors, and the steam suffers a gradual fall in pressure as it flows through the blade channels, when the corresponding heat drop

results in an increase in its velocity. The steam engine of Hero of Alexandria (130 B.C.) was the prototype of the reaction T. Modern development is largely due to Sir C. Parsons (q.v.). Ts. are used in steamships, electricity generation, etc.

Later is the *gas-turbine* in which a compressed mixture of air and gas, or vaporized fuel, is ignited and, in expanding through the T., generates mechanical power; the compression is effected by a turbo-blower on the same shaft. Developed for aircraft, these Ts. have a future in power stations, and for land and water locomotion.

TURBOT. Flat-fish (*Rhombus maximus*) found in the Mediterranean and especially in the North Sea. Some 2 ft. long and weighing more than 30 lb., it is an epicure's dish.

TURECK, Rosalyn (1914-). American concert pianist. B. in Chicago, she was ed. at the Juilliard School of Music, N.Y., and specializes in Bach, whose music she has revitalized for the ordinary concert-goer.

TURENNE, Henri de la Tour d'Auvergne, vicomte de (1611-75). French marshal, one of the ablest of Louis XIV's generals.

TURGÉNEV (torgān'yef), Ivan Sergeievich (1818-83). Russian author. B. in Orel prov., son of an army officer, he studied at Moscow, St. Petersburg, and Berlin, and worked for 2 yrs. in the Ministry of the Interior before finally devoting himself to literature. Among his works are the play *A Month in the Country* (1849); the series *A Sportsman's Sketches* collected 1852 which helped to bring about the abolition of serfdom; and the novels *A Nest of Gentlefolk* (1858), *Fathers and Sons* (1862), and *Virgin Soil* (1877). His poetic realism has a pessimism which did not accord with the optimism of the coming revolutionary era and he left the country in 1856, returning only for visits. His characterization, especially of women, is excellent.

TURIN. A photograph of the Holy Shroud.
Photo: G. Enrie, Turin.

TURGOT (tūrgō), Anne Robert Jacques (1727-81). French statesman. B. in Paris, he was appointed Comptroller-General of Finance in 1774, but his drastic economies led to his dismissal in 1776.

TURIN. Chief city of Piedmont, Italy, on the Po, in a fertile plain at the foot of the Alps. It has a univ. (1404) and a cathedral (15th cent.) It was cap. of the kingdom of Sardinia from 1720, of Italy 1861-4. Motor-cars, silk and other textiles, iron and steel goods, are manufactured. Pop. (1961) 1,019,230.

The *Holy Shroud of T.* is an ancient piece of linen, long revered as the 'clean linen' in which Christ's body was wrapped. Brown and reddish stains suggest the imprint of a crucified body, and photographs (1898-1931) show the perfect form of a man with the traditional face of Christ. Tests suggest chemical action might produce such an image in the circumstances of the crucifixion.

TURKESTAN. Geographical name for a large area in central Asia divided between the U.S.S.R. (Kazakh, Kirghiz, Tadzhik, Turkmen, and Uzbek S.S.Rs.), Afghanistan (anc. Bactria), and China (part of Sinkiang-Uighur).

TURKEY. Genus of birds (*Meleagris*) in the pheasant family. The domesticated T. (*M. gallopavo*) derives from the American wild species, introduced to Europe in the 16th cent., and the name may have been

of Bull Run (1861 and 1862), but Lee suffered a repulse at Gettysburg in 1863; Grant overran the Mississippi states and Sherman marched through Georgia to the sea. On 9 April 1865, Lee surrendered to Grant at Appomattox Court House, and a month later the war was over. Casualties on both sides incl. c. 600,000 dead. Slavery was ended, but the war, and in particular its aftermath when the S. was occupied by the N. as if it had been a foreign conquered country, left behind bitterness that had not entirely evaporated a hundred years later.

The war had immensely stimulated the industrial development of the N. and had led to the construction of roads and railways. With its end, a great outburst of economic activity began. The country's vast natural resources were exploited. Thousands more miles of railway were laid. The prairies were peopled. Americans referred with pride to 'God's own country', and extolled the virtues of private enterprise. Occasional depressions broke the tide of prosperity, but progress was vast and rapid until 1929 when the greatest of slumps engulfed America. When F. D. Roosevelt became President in 1933 he embarked on a 'New Deal' which broke with American tradition.

The U.S.A. had come into the F.W.W. in 1917, and a majority of the Senate voted for the Treaty of Versailles (which incl. Pres. Wilson's League of Nations), but not the two-thirds majority required by the Constitution for the making of a treaty, and a period of isolationism followed. Peace was made with the Central Powers by separate treaties in 1921. Brought into the S.W.W. by the Japanese attack on Pearl Harbor in 1941, the U.S.A. played a major part in the winning of that war, and in the peace-making (see MARSHALL, G. C.). Direct military action on behalf of the U.N. was taken in Korea (q.v.), but resources were strained by Vietnam (q.v.) and continued overseas aid. Kennedy and Johnson had moved to alleviate poverty at home and the Negro problem, and with Nixon came greater stress on military withdrawal and elimination of internal disruption.

Art. The first American-born artist was the portraitist Robert Feke (c. 1705-50), but best-known of early masters is Benjamin West - working mainly in England - who encouraged the portraitist John Singleton Copley, and whose pupils incl. Gilbert Stuart, Thomas Sully, and Charles Willson Peale. To the 19th cent. belong the dramatic landscapes of Washington Allston, the nature pictures of Audubon, the seascapes of Winslow Homer, the realism of Thomas Eakins, and the romantic landscapes of the Hudson River school, e.g. English-born Thomas Cole (1801-48) and later George Inness (1825-94). Appreciated abroad were the markedly individual gifts of Whistler, Mary Cassatt and John Singer Sargent towards the end of the cent., and the mysticism of the recluse Albert Pinkham Ryder (1847-1917). Notable in the early 20th cent. was the Ashcan school, so nicknamed because of its concern with slum squalor e.g. George B. Luks (1867-1933) which influenced the work of George W. Bellows (1882-1925) and Rockwell Kent. A pioneer of European movements such as Expressionism was Max Weber (1881-) and more recent artists who blend such influences in their work incl. John Marin; Grant Wood (1892-1942), whose realistic American Gothic was the sensation of the 1930s; the Mexican Diego Rivera, who worked

THOMAS JEFFERSON.
Author of the Declaration
of Independence.

in the States; Lyonel Feininger; the apostle of Action painting, Jackson Pollock; and the politically concerned Ben Shahn. In sculpture the best-known names incl. Hiram Powers (1805-73), Horatio Greenough (1805-52), Thomas Crawford (1814-57), Augustus St. Gaudens, Lorado Taft (1860-1936), George Grey Barnard (1863-1938), Gutzon Borglum, Carl Milles, Lipchitz, Archipenko, and Calder, inventor of mobiles.

Architecture. Early influences derived from England, e.g. early buildings at Harvard and William and Mary resemble Oxford and Cambridge; the Georgian-type houses of Virginia and Pennsylvania; and the churches in the style of Wren. The purely classic phase was introduced by Thomas Jefferson towards the end of the 18th cent., e.g. the Federal Capitol at Washington by William Thornton (1761-1828). After the Civil War came a generation of French-trained architects, e.g. H. H. Richardson, chief exponent of a modified Romanesque. A revival of 'Queen Anne' style followed, and then towards the end of the 19th cent. a 2nd classical revival, e.g. Columbia Univ., N.Y. and Pennsylvania Terminal Station. Most characteristic of the U.S. is the skyscraper (the word was 1st used in 1891) which owed its origin to the development of a method of building in which walls are carried on a framework of steel combined with the high cost of land in city centres. The most individual of modern U.S. architects was Frank Lloyd Wright, but impressive work has also been produced by Richard Buckminster Fuller, Gropius and Van der Rohe, successive directors of the Bauhaus, the Saarinsens (father and son), and Richard Neutra. See illus. pp. 57, 908, 1058, 1073.

Literature. American literature of the colonial period (1607-1765) includes travel books and religious verse, but was mainly theological: Roger Williams, Cotton Mather, and Jonathan Edwards were typical Puritan writers. Franklin's *Autobiography* is the first work of more than historical interest. The revolutionary period (1765-1800) produced much political writing, e.g. by Paine, Jefferson, and Hamilton, and one noteworthy poet, Philip Freneau. In the early 19th cent. the influence of the English Romantics became evident, notably in Washington Irving's tales and Fenimore Cooper's novels of Redskin life.

During 1830-60 intellectual life centred on New England, which produced the essayists Emerson,

UNITED STATES ART. 'November 22nd' by Edward Globbi was inspired by the assassination of President Kennedy.

adopted from its cry. It is the traditional bird eaten at American Thanksgiving and in Britain at Christmas, but since the S.W.W. has been intensively bred, in the same way as chicken, as an all-year-round table bird. See illus. p. 82.

TURKEY. Republic of Europe and Asia, occupying Asia Minor and Turkish Thrace in Europe. European T. is separated from Asia Minor by the Bosphorus, the Sea of Marmara, and the Dardanelles. The interior of Asia Minor is an extensive plateau. The Taurus and Anti-Taurus mts. lie in the S., rising to over 12,000 ft., the Egri Dag range to the E., and the mts. of Pontus to the N. along the Black Sea. The main rivers are in Europe the Maritsa and in Asia the Euphrates and Tigris, Kizil, Irmak Buyuk and Menderes (Maeandres). There are numerous lakes. Ankara, in the central plateau, is the cap.; Istanbul (Constantinople) in Europe, the largest city.

Most of T. is fertile, and cereals, cotton, tobacco, sugar and many kinds of fruit are grown. Tobacco and dried fruits are exported. Sheep, goats, cattle, donkeys, and horses thrive. Coal, lignite, chrome, and copper are mined; iron and steel, textiles, paper, glass, sugar, and cement are among manufactures.

GOVERNMENT. The 1961 constitution laid down the election of the pres. for 7 years by the Grand National Assembly and the Senate (both popularly elected) in joint session. Area 296,108 sq. m. (9,065 sq. m. in Europe); pop. (1969) 34,400,000 (c. 24 million in Europe); 98 per cent of the pop. is Moslem.

History. The Turks originated in Mongolia, whence in the 6th cent. they spread into Turkestan. During the 7th cent. they adopted Islam. The Seljuk Turks in 1055 secured political control of the caliphate, and estab. an empire in Asia Minor. The Ottoman Turks, driven from Central Asia by the Mongols, entered the service of the Seljuks, and Osman I. in 1299 founded a kingdom of his own. Having overrun Asia Minor, the Ottomans began their European conquests by seizing Gallipoli in 1354, captured Constantinople in 1453, and by 1480 were masters of the Balkans. By 1550 they had conquered Egypt, Syria, Arabia, Mesopotamia, Tripoli, and most of Hungary; thereafter the empire ceased to expand, although Cyprus was taken in 1571 and Crete in 1669.

The Christian counter-offensive opened in 1683 with the defeat of the Turks before Vienna; in 1699 the Turks lost Hungary, and in 1774 Russia ousted T. from Moldavia, Wallachia, and the Crimea. In the Balkans there was an unsuccessful revolt in Serbia in 1804, but in 1821-9 Greece threw off Turkish rule. Russia's attempts to exploit this situation were resisted by Britain and France, which in the Crimean War (1854-6) fought on T.'s side. The Bulgarian rising of 1876 led to a new war between T. and Russia, and by the Treaty of Berlin (1878) T. lost Bulgaria, Bosnia, and Herzegovina. A militant nationalist group, the Young Turks, secured the grant of a constitution in 1908; Italy took advantage of the ensuing crisis to seize Tripoli in 1911-12, while the Balkan states in 1912-13 expelled the Turks from Albania and Macedonia. T. entered the F.W.W. on the German side in 1914, only to lose Syria, Arabia, Mesopotamia, and its nominal suzerainty in Egypt.

The Greek occupation of Smyrna (Izmir) in 1919 provoked a patriotic reaction; Mustapha Kemal (Ataturk) estab. a provisional govt. at Angora (Ankara) in 1920, expelled the Greeks, and in 1923 a national assembly proclaimed T. a rep., with Kemal as first pres. The new republic carried out a sweeping policy of westernization: Islam ceased to be the state

TURKEY

religion, polygamy was abolished, and a new legal code was introduced. Kemal's People's Party ruled until 1950, the Democratic Party till the military episode of 1960-1 (see MENDERES), then coalitions till the Justice Party (a continuation of the Democratic) returned to power 1965. Neutral, but friendly to the Allies, in the S.W.W., T. developed links with Russia as well as the West in the 1960s.

Archaeological sites incl. Troy (Hissarlik) and Catal Hüyük, fortified city of c. 6,000 B.C. discovered with painted temples and objets d'art in 1961.

TURKISH. A member of the Altaic family of languages, agglutinative in character. Originally it was written in Arabic script, but in 1928 the Latin alphabet became compulsory. For cents. T. literature was based on Turkish models, but under Suleiman the Great began the Golden Age of which the poet Fuzuli (d. 1563) is the great exemplar, and which continued in the following cent. with the great poet satirist Nef'i of Erzerum (d. 1635) and others. During the 19th cent. westernization overtook T.L., e.g. the following of French models by Ibrahim Shinas Effendi (1826-71), poet and prose writer. Joined with him as a founder of the New School was Mehmed Namik Kemal (1840-80), poet and author of the revolutionary play *Vatan* (*The Fatherland*), which caused his exile by the sultan. Unlike these in turning rather to Persian and Arabic than native sources for his vocabulary was the poet Tevfik Fikret (1867-1915). Among more recent names are those of the poet Mehmed Akif (1873-1936), author of the words of the Turkish national anthem; and the poet and novelist Yashar Kemal.

TURKMEN S.S.R. Republic of the U.S.S.R. formed (1924) from part of Russian Turkestan; admitted to the Union in 1925. It lies E. of the Caspian Sea. Its Turkmen inhabitants, the majority nomadic before the F.W.W., have been settled under Soviet rule; many are Moslems. The Kara Kum desert covers a great part of the rep., but artificial irrigation is increasing the area under cultivation. Cotton, wool, Astrakhan fur, etc., are produced, and carpets made. The cap. is Ashkhabad. Area 187,000 sq. m.; pop. (1967) 1,971,000.

TURKS AND CAICOS ISLANDS. Group of small W. Indian islands forming a Brit. colony; they lie c. 450 m. N.E. of Jamaica, of which they were a dependency 1873-1962. Their administrator is assisted by a legislative assembly (the majority elected) and an executive council. They produce salt, sisal, and crawfish. Grand Turk, largest of the group, is the seat of govt. Area 166 sq. m.; pop. (1966) 6,000.

TURKU. Built on an island at the mouth of the River Aura, the castle has guarded this waterway to the town since 1280, though it did not take until the 16th century the form to which it was carefully restored in 1961.

Courtesy of the Finnish Tourist Information Centre.

TURK-SIB RAILWAY. Branch of the Trans-Siberian railway (q.v.) linking Novosibirsk in Siberia with Tashkent (Uzbek S.S.R., part of Russian Turkestan). It was opened in 1930.

TURKU (toor'koo). Finnish port on the r. Aurajoki, near its mouth. It has a castle, cathedral, and 2 univs. (Swedish, 1919, and Finnish, 1922). Pop. (1967) 145,689.

TURMERIC. The tuberous rhizomes of *Curcuma longa*, a perennial plant cultivated in India. It is used in curries and as a dyestuff.

TURNER. Dame Eva (1899-). British soprano. B. in Lancs, she was prima donna of the Carl Rosa Opera Co. 1916-24, and has appeared throughout the

Thoreau, and Holmes; the poets Bryant, Longfellow, Lowell, and Whittier; the historians Parkman, Prescott, and Motley; and the novelist Hawthorne. Outside the New England circle stood Poe, Melville, and Whitman.

The disillusionment of the post-Civil War period (1865–1900) found expression in the realistic or psychological novel. Ambrose Bierce and Stephen Crane wrote realistic war stories; Mark Twain and Bret Harte dealt with western life; and the growth of industrialism led to the rise of the sociological novel, notably in the work of W. D. Howells, while Henry James, and his disciple Edith Wharton, developed the novel of psychological analysis. A major poet of this period was Emily Dickinson.

WALT WHITMAN
Courtesy of
Walt Whitman House.

Since 1900 the main trend in the novel has been realistic, and American writers have exerted a growing influence in Europe, e.g. Jack London, Upton Sinclair, and Theodore Dreiser, and after the F.W.W. by Sherwood Anderson, Sinclair Lewis, and Ernest Hemingway; the southern writers Erskine Caldwell and William Faulkner; and the proletarian James T. Farrell, John Dos Passos, and John Steinbeck. Aside from the main tradition is the romantic or subjective fiction of Thornton Wilder, J. B. Cabell, and Henry Miller. Among the more important writers emerging since the S.W.W. are Truman Capote, J. D. Salinger, John Updike, Norman Mailer, Nelson Algren, Saul Bellow, Bernard Malamud and Jack Kerouac, apostle of the Beat generation. The short story has attracted many of the major novelists from James onward, and was popularized as a form by O. Henry: writers specializing in it incl. Ring Lardner, Katharine Anne Porter, William Saroyan, and James Thurber.

In drama the U.S.A. produced a powerful group of dramatists between the wars, incl. Eugene O'Neill, Maxwell Anderson, Elmer Rice and Clifford Odets; and the work of Wilder led towards the post-war work of Tennessee Williams and Arthur Miller, and the younger generation of which Edward Albee is representative. Traditional poets incl. E. A. Robinson, R. Frost, Elinor Wylie, E. St. Vincent Millay, with more experimental work being done by E. L. Masters, Carl Sandburg, Ezra Pound, T. S. Eliot and Amy Lowell, and attempts at the great American epic in Hart Crane's *The Bridge* and S. V. Benet's *John Brown's Body*. Among the most striking of later writers are Conrad Aiken, Archibald MacLeish, Karl Shapiro, Robinson Jeffers, Wallace Stevens, Marianne Moore, Robert Lowell, and Theodore Roethke (1908–63). In the field of literary criticism Irving Babbitt, George Santayana, H. L. Mencken and Edmund Wilson did useful work; more recent names incl. Cleanth Brooks and Lionel Trilling.

UNIVERSE. The overall celestial system, containing thousands of millions of star-systems or *galaxies*. Each galaxy is composed of thousands of millions of

stars, together with interstellar material. It may be assumed that our own Galaxy is typical, and that our Sun is an average star. It has been found that galaxies tend to congregate in groups, and that each group is receding from each other group, so that the whole universe is expanding. The distances involved are, of course, very great, and modern techniques can probe out to approximately 5,000 million light-years.

The origin of the universe is still a matter for debate. On the various 'evolutionary' theories, all matter was created at one moment, in the remote past: the universe is evolving, and will eventually die. According to the 'steady-state' theory, supported by H. Bondi and others, the universe has always existed, and will exist for ever; as old galaxies die, new ones are formed out of matter which is being steadily created out of nothingness. In 1966 R. H. Dicke of Princeton Univ. envisaged a 'pulsating' U., without beginning or end, but alternately contracting and expanding.

UNIVERSITY. A community or corporation of men and women devoted to higher learning. The first European university was Salerno (9th cent.), followed by Bologna, Paris, Oxford, and Cambridge in the 12th cent. St. Andrews, the first Scottish U., was founded in 1411, and Trinity Coll., Dublin, in 1591. London U. dates from 1836, Manchester from 1851, the U. of Wales from 1893. The oldest U.s. in U.S.A. are: Harvard (1636), William and Mary (1693), Yale (1701), and Princeton (1746). Recent innovations incl. U.s. serving international areas, e.g. the Middle East Technical U. (1961) at Ankara, supported by the U.N., and the British Open U. (1969) combining correspondence packages, radio, television and brief residence periods for young and old excl. from conventional U.s. by pressure on resources.

UNKNOWN WARRIOR. Name given to a fallen soldier who was taken as representative of all those killed in the F.W.W., and was given a national funeral. The British U.W. or Soldier was buried in Westminster Abbey in 1920. France, Belgium, U.S.A., and other countries each have their U.W.s.

UNRUH, Fritz von (1885–). German dramatist, novelist, and poet. Resigning his commission in the Prussian Guards in 1912, he wrote anti-militaristic plays. *Opfergang* (1916: *The Way of Sacrifice*) describes the battle of Verdun. A leading Expressionist, he lived in France and the U.S.A. 1933–52; later books incl. *Der nie verlor* (1945: *The End is Not Yet*).

UNTOUCHABLES. See CASTE.

UPANISHADS. The most spiritual division of the Vedic texts which form the scriptures of Hinduism. They number nearly 200.

UPAS TREE. A tree (*Antiaris toxicaria*) of the fig family, whose gum is very poisonous and was used by the E. Indian natives to tip their arrows.

UPDIKE, John (1932–). American author. Ed. at Harvard and the Ruskin School of Drawing and Fine Art at Oxford, he was on the *New Yorker* staff 1955–7, and besides the novels (*Rabbit Run*, 1961, *Couples*, 1968, etc.) and short stories (*The Same Door*, 1962 and *Pigeon Feathers*, 1963) which have estab. his reputation for polished overtones, has written poetry, e.g. *Telephone Poles* (1964).

UPPER VOLTA. See VOLTAIC REPUBLIC.

UPPSALA (up'sah'la). Swedish city, 40 m. W.N.W. of Stockholm, with a univ. (1477) and a 13th cent. cathedral long used in the crowning of kings of

JOHN UPDIKE

Martin. Photo: N.P.G.

world in *Turandot*, *Aida*, etc. She was created D.B.E. in 1962.

TURNER, Joseph Mallord William (1775–1851). British landscape artist. B. in London, son of a barber, he studied at the Academy School, was elected R.A. in 1802, and in 1809 became prof. of perspective at the Academy. He travelled widely on the Continent, the effect of his time in Italy can be seen in 'Crossing the Brook' (Nat. Gallery), and beautiful Venetian scenes, but in later life he developed an increasing freedom in capturing effects of weather and light in sea and sky with breathtaking grandeur e.g. 'Rain, Steam and Speed', 'Snow Storm'. Always solitary—he

never m. — he was not greatly appreciated in his lifetime, though championed by Ruskin, but greatly influenced the development of English art and the work of the Impressionists. He worked with equal effect in oil and water colour, and bequeathed many of his pictures to the nation.

TURNER, Merlyn (1915–). British social worker, founder of the first 'Norman House' for homeless, discharged prisoners in London in 1955, described in *Safe Lodging* (1961). A number of other such houses were estab. in various parts of Britain with the help of the Margery Fry Memorial Fund (1959).

TURNIP. Biennial plant (*Brassica rapa*) cultivated in temperate climates for its edible white or yellow-fleshed 'root' and the young leaves, which are used as a green vegetable: closely allied is the swede-T. or rutabaga (*Brassica napobrassica*), of greater food value, firmer-fleshed and longer-keeping. Both types are valuable both for human food and livestock fodder.

TURNPIKE. See HIGHWAY.

TURPENTINE. A solution of resins obtained by distillation from the sap of conifers. Its chief uses are as a diluent of paint and in varnish.

TURPIN, Dick (1706–39). English highwayman. B. at Hempstead, Essex, the son of an innkeeper, he turned to highway robbery, mugging, and was hanged at Tyburn. He is said to have ridden from London to York on a single horse, described by W. H. Ainsworth in *Rookwood*, is probably based on one of c. 190 m. from Gad's Hill to York completed in 15 hr. in 1676 by the highwayman John Nevison (1639–84).

TURKISH. (tur'kwoiz). A precious stone: hydrous phosphate of aluminium and copper, bluish green in colour, found in Persia, Turkestan, Mexico, etc.

TURTLE. Name for marine and freshwater species of tortoise (q.v.). The legs are modified to oar-like flippers for swimming, and the 'shell' is a more streamlined heart shape than that of the tortoise. Many are carnivorous: the eggs are laid in the sand of the sea shore. Well-known species are the green T. (*Chelonia mydas*), source of T. soup; the hawksbill (*Eretmochelys imbricata*), source of 'tortoise-shell'; the loggerhead (*Caretta caretta*); the snapper (*Chelydra serpentina*)

HAWKSBILL TURTLE

which lives up to its name; and the giant leathery T. (*Sphargis coriacea*) which reaches 6–8 ft. and weighs half a ton.

TU'SCANY. An Italian region, a former grand duchy, in the N.W. of the peninsula. It corresponds in large part to anc. Etruria. The Apennines reach into it; the Arno is the chief river. Tuscan was adopted as standard, literary Italian. Towns incl. Florence, Pisa, Leghorn, and Siena. Area 8,877 sq. m.; pop. (1961) 3,267,374.

TUSSAUD, Madame (1760–1850). French wax-modeller. B. Anne Marie Grosholtz in Berne, she

MARIE TUSSAUD. By her son. Photo: N.P.G.

went in 1766 to Paris to live with her famous wax-modeller uncle, Phillipe Curtius, whom she soon outshone, and during the French Revolution they were forced to take death masks of many victims and leaders (some still exist in the modern Chamber of Horrors). In 1794 she m. François Tussaud, but they separated, and in 1802 she estab. her exhibition in the Strand, London. It was transferred to Baker St. in 1833 and to Marylebone Rd. in 1884 (destroyed by fire 1925, but reopened 1928).

TUTANKHAMEN (tootankah'men) (reigned 1360–1350 B.C.). King of Egypt. A member of the royal house of the 18th dynasty, and a son of Ikhnaton or of Amenhotep III, he may have succeeded to the throne when 11 yrs. old and was aged approx. 20 at his death. Little is known of his reign, but in 1922 his tomb was discovered by Lord Carnarvon and Howard Carter in the Valley of the Kings at Luxor. Although robbers had entered it shortly after the funeral, it had been then resealed by his officials and escaped further rifling—the only ancient royal tomb to have done so. The richness of the find, incl. the solid gold coffin, captured the imagination of the world.

TUTUŌ'LA, Amos (1920–). Nigerian novelist. Writing in English, he works through the traditional background stories of his people in *The Palm-Wine Drunkard* (1952), *The Brave Huntress* (1958), and *The Feather Woman of The Jungle* (1962), and uses an individual African idiom.

TUVA (tōō'va). A.S.S.R. of the R.S.F.S.R. It lies N.W. of Mongolia (Mongolian People's Rep.) of which it was part until 1911. It was declared a Russian protectorate 1914. After the 1917 revolution it was the independent Tannu-Tuva rep. 1920 until incorporated in the R.S.F.S.R. as an autonomous region in 1944. It was made the T. A.S.S.R. in 1961. There is good pasture; gold and asbestos are worked, and there are hydro-electric installations. The cap. is Kyzyl. Area 65,800 sq. m.; pop. (1967) 217,000.

TVER. Old name of KALININ.

TWIN, Mark, Pseudonym (a call used for depth sounding by Mississippi pilots) of the American writer Samuel Langhorne Clemens (1835–1910). B. at Florida, Missouri, he was a printer, Mississippi pilot, and goldminer before turning to writing. After a tour

TUTANKHAMEN. Life-size bust of stucco and painted wood from the tomb. Cairo Museum.

Sweden; Linnaeus, who lived at U., is commemorated in the cathedral. U. is the seat of the Lutheran primate of Sweden. Pop. (1966) 94,587.

UR. Ancient city of Mesopotamia, the Ur of the Chaldees of the Bible; c. 140 m. S.E. of Babylon and 6 m. from the Euphrates. Excavations by Sir Leonard Woolley show that it was inhabited 3,500 B.C. Chief ruin is a zigurat or temple tower.

URAE'MIA. Condition due to the retention in the blood of substances usually eliminated by the kidneys.

URALS. Mountain system running from the Arctic to the Caspian Sea and separating Europe from Asia. The highest peak is Naradnaya (6,182 ft.). The middle Urals is one of the most important industrial regions of the U.S.S.R., owing to its vast mineral wealth. Perm, Chelyabinsk, Sverdlovsk, Magnitogorsk and Zlatoust are important industrial centres.

URANIUM. Lustrous white metal, malleable and ductile, tarnishing in air: symbol U, at. wt. 238.07, at. no. 92. It was discovered by Klaproth in 1789 in pitchblende and first prepared by Peligot in 1842. The chief ore is uranite (pitchblende U_3O_8), and recent technological advances have made possible its extraction from low-grade ores. Small amounts of its compounds are used in the ceramics industry to give yellow glazes, and as a mordant in dyeing.

U. isotopes have been of vital importance in the production of atomic energy. Although U-238 is most abundant (99 per cent), U-235 is the only naturally occurring readily fissionable isotope (1 part in 140) and U-233 is a fissionable material that can be produced by the neutron irradiation of thorium-232.

URANIUM. Before leaving the mill each drum of uranium concentrate, known as 'yellow cake' because of its bright colour, is sampled and analysed to provide the user with a precise record of the oxide content. Wearing a protective mask and gloves, this worker at Rio Algom's Nordic mill in Ontario, prepares a sample.

Courtesy of the Rio Algom Mines Ltd.

URANUS. In Gk. mythology, the sky-god, responsible for rain and warming sun. He was the husband of Ge and father of Cronus and the Titans.

URANUS. The seventh planet of the Solar System. It is 1,783,000,000 miles from the Sun, and has a revolution period of 84 years. Though it is a giant, with a diameter of 29,300 miles, it is barely visible to the naked eye, and was not known in ancient times; it was discovered by W. Herschel in 1781. In constitution it seems to be similar to the larger giants, Jupiter and Saturn. It has 5 satellites, named Miranda, Ariel, Umbriel, Titania and Oberon.

URBAN II. Pope 1088-99; he launched the 1st Crusade at Clermont in 1095.

URDU (oor'doo). Indian language, a variety of Hindustani that has borrowed largely from Persian and Arabic and is spoken mostly by Moslems.

UREA. A crystalline substance found in urine and the other body fluids. It is the chief material by means of which the body excretes waste nitrogen. Produced synthetically, it forms a valuable nitrogenous fertilizer, and is used in the production of drugs, explosives, etc.

UREY (u'rē), Harold Clayton (1893-). American chemist. In 1932 he isolated heavy water and discovered deuterium (q.v.), receiving a Nobel prize in 1934; and was director of the War Research Atomic Bomb Project, Columbia, 1940-5. In 1958 he became prof. of chemistry-at-large, Univ. of California, and his books incl. studies of nuclear and atomic structure, and the origin of the planets.

URFÉ (ürf'ä), Honoré d' (1568-1625). French writer. B. at Marseilles, he is remembered for his romantic novel *Astrée* (1610), with incidents based on the life of Henry IV, which set a vogue. He was killed by a fall from his horse on military service against Spain.

URGA. Another name for ULAN BATOR.

URIAL (oor'rial). The wild sheep (*Ovis vignei*), about 3 ft. high, of the Himalayan countries.

URIAL

URIC ACID. A substance formed from the breakdown of food and body protein. It is a normal constituent of urine, but if formed in excess and not excreted it is deposited in sharp crystals in the joints and other tissues, causing symptoms of gout; or it may form stones in the kidneys or bladder (calculi).

URIM and THUMMIM. Two mysterious objects in the breastplate of the High Priest of the ancient Hebrews, whereby they exercised divination.

URINE. An amber-coloured fluid made by the kidneys from the blood. It contains excess water, salts, protein, waste products, a pigment and some acid. The kidneys pass it through 2 fine tubes (ureters) to the bladder, which may act as a reservoir for up to 20 oz. at a time. It then passes into the urethra, which opens to the outside by a sphincter (constricting) muscle under voluntary control.

URSA MAJOR and MINOR. The Great and the Little Bear; 2 constellations of the N. hemisphere. The former consists of 7 bright stars, and a line joining the 2 outermost (the pointers), if produced, passes close to the Pole Star (q.v.) which is in U. Minor.

URSULA, St. A British virgin saint and martyr supposed to have been martyred with her maidens by the Huns in the Rhineland, in 238 or about 451.

URSULINES. A R.C. religious order founded at Brescia, by St. Angela Merici in 1537, and renowned for its educational work among girls.

URUGUAY (oorugwi). Smallest of the South American republics, lying between Brazil and the estuary of the River Plate, and separated from Argentina by the r. Uruguay. The chief river is the Negro. Hilly in the N., U. is mainly an extension of the Pampas, and cattle-breeding and sheep-farming are the chief occupations, wool, leather, and meat (incl. canned meat) being the chief exports. The cap. is Montevideo; other towns are Salto, Paysandu, and Rivera. U. is divided admin. into 19 depts. Area 72,180 sq. m.; pop. (1967) 2,783,000.

Spanish is the official language, and Roman Catholicism the prevailing religion. Under the constitution of 1967 a presidential regime was reintroduced, executive power being placed in the hands of a pres. and vice-pres. elected for 5 yrs.; congress comprises an elected senate of 30, plus the vice-pres., and a house of deputies. In recent years U. has suffered chronic inflation and social unrest.

of Europe he wrote *The Innocents Abroad* (1869), establishing his reputation as a humorist. He subsequently wrote *The Adventures of Tom Sawyer* (1876), *The Adventures of Huckleberry Finn* (1885), and *A Connecticut Yankee at King Arthur's Court* (1889).

TWEED. A river in the S. of Scotland rising in Peebleshire and entering the North Sea at Berwick, in Northumberland. Length 97 m.

TWEED. Cloth made of woollen yarn, usually of several shades, but in its original form without regular pattern and woven on a hand-loom in the remoter parts of Ireland, Wales and Scotland, the most famous being Harris T.; it is highly durable and largely weather-proof. In modern times it is often machine woven, patterned, and processed. See illus. p. 513.

TWEEDDALE. Another name for PEERLESSHIRE.

TWEEDSMUIR. Lord. See BUCHAN, JOHN.

TWELFTH DAY. In the Christian calendar the feast of the Epiphany kept on the 12th day after Christmas, 6 Jan. In olden times many convivial ceremonies were connected with Twelfth Night.

TWICKENHAM. District in the Greater London bor. of Richmond-upon-Thames. Famous residents have incl. Alexander Pope, J. M. W. Turner, Horace Walpole at Strawberry Hill, and Clarendon at York House. T. incl. Hampton Court and a famous ground of the Rugby Union.

TWILIGHT SLEEP. A method of anaesthesia used in childbirth, involving the hypodermic injection of analgesics and narcotics.

TWINS. Two individuals produced at one birth. Strictly speaking, two animals developed and born at the same time are T. only if they are the products of the division of a single fertilized ovum or egg cell. Human T. resulting from the simultaneous development of two fertilized eggs are not true T. The latter are always of the same sex.

TYBURN (ti'-). An English stream running underground from Hampstead to the Thames at Westminster; T. gallows stood near the present junction of Oxford St. and Edgware Rd., from the 12th cent. until 1783.

TYLER, John (1790-1862). 10th Pres. of the U.S.A. B. in Virginia, he was elected Vice-Pres. in 1840 and became Pres. in 1841. In 1845 Texas was annexed. In the Civil War he adhered to the Confederates.

TYLER, Wat (d. 1381). English leader of the peasants in the revolt of 1381. B. in Kent or Essex, he served in the French wars. After taking Canterbury he led the peasants to Blackheath and occupied London. At Mile End Richard II met the rebels and promised to redress their grievances. At a further conference at Smithfield, Tyler was murdered by the Lord Mayor, Sir William Walworth.

TYNDALE (tin'dal), William (c. 1492-1536). English translator of the Bible. B. probably in Glos, he studied at Oxford and Cambridge and was ordained. In 1525 he began to print his English N.T. at Cologne and had to flee to Worms, where the work was completed. In 1530 was pub. his Pentateuch at Antwerp. The first vol. of Holy Scripture printed in England was his revised N.T. in 1536. He was seized at Antwerp, and imprisoned at Vilvorde, where he was tried as a heretic, and strangled and burnt.

TYNE (tin). River, navigable to Newcastle, which flows 30 m. across E. Northumberland to the North Sea. The T. (1967) road tunnel is at Jarrow.

TYNEMOUTH (tin'muth). English port (co. bor.) and pleasure resort in Northumberland on the N. bank of the Tyne. Pop. (1961) 70,112.

TYNWALD (tin'wold). The parliament of the Isle of Man, consisting of the governor, a legislative council and the House of Keys.

TYPE. Piece of metal cast in rectangular shape for printing (q.v.) by the letterpress process. The sign to be printed, e.g. a letter or punctuation mark, is cast in relief on the face of the T., which in Britain is .918 in.

high overall. The width of the T. across the letter varies according to the design of the letter: the depth of the T. up and down the letter varies according to the size of the alphabet used, and is measured in points (almost exactly 72 to the inch); this encyclopaedia is set in 7-point. One particular style of alphabet, together with its appropriate marks of punctuation etc., is a fount; a set of alphabets of the same style, in sizes varying from say 6-point to 72-point, is a series of founts. The style of alphabet is the type-face; this type-face is Times roman, *this is Times italic* and *this is Times bold roman*. The T. of books is mechanically composed or set (arranged in order) and cast at the same time, and is later melted for re-use.

When a page has been set and cast, a cardboard or plastic mould can be taken from the printing-surface, and a stereotype or duplicate plate of the whole page cast from the mould in type-metal. An electrically conductive mould of the T. can have a copper coating deposited on it by electrolysis; this shell when removed from the mould is an electrolyte. Stereotypes and electrotypes are used in place of the original T. for letterpress printing. For other printing processes, metal T. is unnecessary, as photographic images of the characters can be set by photo-composition.

TYPEWRITER. A hand-operated machine for producing characters similar to those of printing. The

TYPEWRITER. In the I.B.M. 72 (left), produced in 1962, typebars are replaced by a travelling spherical plastic typehead the size of a golf ball (right), which has the 88 characters of the standard keyboard in relief on its surface, and glides along a cylindrical metal rod. Typeheads are instantly interchangeable to enable the operator to switch from one style of type to another, or to a different series of characters, e.g. Greek or Russian. Speeds of 186 words per minute can be reached. Courtesy of Rowse Muir Publications Ltd.

1st practicable T. was built at Milwaukee, Wisconsin, by C. L. Sholes, C. Glidden and S. W. Soule in 1867, and by 1874 E. Remington and Sons, the gun makers whose name was soon given to the Ts., produced under contract the 1st machines for sale. Later developments incl. tabulators from c. 1898, portable machines c. 1912, gradual introduction of electrical operation (allowing increased speed, since the keys are touched not depressed), proportional spacing in 1940, and rotating typehead with stationary platen in 1962.

TYPHOID FEVER (ti'foid). An infectious disease contracted by swallowing the specific bacillus. This may be present in the urine or faeces of a patient or a carrier, or may be conveyed by flies. Ulcers form in the small intestine and may bleed internally or perforate with great danger to life.

TYPHOON (ti'soon). A violent revolving storm that occurs, chiefly in autumn, along the eastern seaboard of Asia between the Philippines and Japan.

TYPHUS (ti'fus). An infectious disease, often fatal, caused by a microbe carried in the excreta of lice. It enters the body usually by abrasions in the feet, and is epidemic among overcrowded human beings.

TYR (tir). The Scandinavian god of battles. The Anglo-Saxons called him Týw, hence 'Tuesday'.

TYRE (tir). English name of a town in Lebanon (Arabic Sûr), c. 50 m. S. of Beirut, formerly a port until its harbour silted up. Pop. (est.) 12,000. T. stands on the site of anc. Ty, a seaport of Phoenicia. Built partly on the mainland and partly on 2 small islands.

The oldest town in U. is Colonia, founded by the Portuguese in 1680; the Spanish founded Montevideo in 1726, captured Colonia 1777 and secured authority over the area now forming U. In 1814 Spanish rule was thrown off under the leadership of José Artigas who ruled as a dictator until driven out by Brazil in 1820. From 1825–8 Argentina and Brazil fought to secure the area, declared independent 1828; but it was 1853 before its independence was recognized by its neighbours.

URUMCHI (oorumchē). Cap. of Sinkiang-Uighur autonomous region, China. At the N. foot of the Tien-Shan, it is close to a coalfield and makes cotton textiles, cement, chemicals, iron and steel goods, etc. Pop. (1967) 180,000.

URUNDI. See **BURUNDI**.

USHANT. French island 11 m. W. of Brittany off which Howe defeated the French, 1794 ('the glorious First of June').

USKÜB. Turkish name of **SKOPJE**.

USKÜDAR. Suburb of Istanbul, Turkey, formerly a separate town which became well known under the form Scutari as the site of the hospital set up by Florence Nightingale in the Crimean War.

USHER, James (1581–1656). Irish churchman. B. in Dublin, he became archbp. of Armagh in 1625, but after 1641 was forced by the Irish rebellion to live in England. He devised the system of chronology still printed in some Bibles.

U.S.S.R. Abbreviation for the Union of Soviet Socialist Republics. See **SOVIET UNION**.

USSURI RIVER. Tributary of the Amur, rising N. of Vladivostok, which joins it S. of Khabarovsk, and forms part of the border between the Chinese prov. of Heilungkiang and the U.S.S.R. There were military clashes 1968–9 over the sovereignty of Damansky Is. (Chenpao) in mid-river.

USTINOV (oost'inof), **Peter** (1921–). British actor-dramatist. B. in London, he has ventured into almost every aspect of film and theatre life. His plays incl. *House of Regrets* (1942) and *The Love of Four Colonels* (1951), in which latter he appeared, and he was author, director, producer and principal actor in the film *Private Angelo* (1949). In 1963 he became joint director of the Nottingham Playhouse.

UST-KAMENOGORSK. Chief centre of the atomic industry in the U.S.S.R. in the Altai Mtns. Pop. (1967) 207,000.

UTAGAWA, Kuniyoshi (1798–1861). Japanese artist of the Ukiyoye or Popular school of painting and print designing. He produced some 8–10,000 prints concerning figures of history and legend, and was in trouble for lampooning the govt. His studies of cats are excellent.

UTAH (u'taw). A Rocky Mountain state of U.S.A. In the W. is the Great Basin which incl. the Great Salt Lake and the Great American Desert. E. of the Wasatch range lies the plateau at c. 10,000 ft., deeply dissected by the Colorado river system. Only about 2.5 per cent of the land is under crops (wheat, oats, alfalfa, sugar beet, etc.), and most of that is made productive by artificial irrigation; cattle and sheep are raised, wool being important. Minerals incl. gold, silver, uranium, coal, and salt; steel is among manufactures. Salt Lake City is the cap., Ogden the only other large town. Area 84,916 sq. m.; pop. (1960) 890,627.

U. is part of the area ceded by Mexico in 1848; it was colonized and developed by the Mormons (Latter-day Saints) who first entered Salt Lake valley in 1847, and remain the largest religious body in the state. Organized as a terr. 1850, it was not admitted to the Union as a state until 1896 because of the long refusal of the Mormons to give up plural marriage.

UTAMARO, Kitagawa (1753–1806). Japanese artist, famed for his designs of colour-prints.

UTICA. City in N. York state, U.S.A., cap. of

Oneida co. on Mohawk r. Incorporated as a village 1798, a city 1836, U. makes textiles, firearms, etc. The pop. (100,410 in 1960) incl. a large Welsh group who hold an annual eisteddfod.

UTILITARIANISM. See **BENTHAM, J.**

UTŌPIA (Gk., nowhere). Name given by Sir Thomas More to the imaginary commonwealth described in his *Utopia* (1516), and hence applied to similar dream-countries of other writers, e.g. Plato's *Republic*, Bacon's *Atlantis*, and Campanella's *City of the Sun*. See also **WELLS, H. G.**

UTRECHT (ū'trekt). Capital of U. province, Netherlands, on the Kromme Rijn (crooked Rhine) 22 m. S.E. of Amsterdam. Dating from Roman times, U. is the seat of a univ. (1636) and of a R.C. and an Old Catholic archbishopric. The 14th cent. cathedral tower has stood isolated since the nave was blown down in 1674. Textiles, carpets, motor-cars, chemicals, pottery are among U.'s products. Pop. (1967) 274,485. The Peace of U. in 1713 concluded the War of the Spanish Succession.

UTRILLO (ootrē'l'yō), **Maurice** (1883–1955). French artist. Son of a trapeze-performer who became

UTRILLO. A corner of Montmartre takes on new magic. Courtesy of the Trustees of the Tate Gallery.

an artist's model after she suffered a fall, and later an artist herself, he was born following an assault on her by a drunken man, and was himself a drug addict and dipsomaniac from an early age. He is most celebrated for his townscapes of his native Paris, especially Montmartre, often painted from postcard photographs, but intensely and individually realized, e.g. 'Au Lapin Agile', 'Moulin de la Galette', and 'Notre-Dame de Paris'.

UTTAR PRADESH. State of the Republic of India formed in 1950 from the United Prov. of Agra and Oudh and neighbouring small princely states. It lies in central N. India and comprises the upper plain of the Ganges. Agriculture, helped in the W. by artificial irrigation, is the main occupation. Lucknow is the capital, Kanpur the largest city, followed by Agra, Varanasi, Allahabad, Bareilly, and Meerut. Area 113,654 sq. m.; pop. (1961) 73,746,401.

UZBEK S.S.R. Constituent republics of the U.S.S.R. in central Asia, lying between Kazakh S.S.R. to the N. and Turkmen S.S.R. to the S. Much of it is desert, but artificial irrigation is highly developed and more than 60 per cent of the Soviet Union's cotton is grown in U., as well as much rice and lucerne. A pipeline carries natural gas from U. to Chelyabinsk in the Urals. Tashkent is the cap.; it also incl. Bukhara, Samarkand, Khiva, and Kokand. About 60 per cent of the inhabitants are Uzbeks, a Turkic people; many are Sunni Mohammedans. Area 157,400 sq. m.; pop. (1967) 10,890,000.

wide between Rijeka on the W. and the mouth of the Danube on the Black Sea to the E. The plains of the Save-Danube basin in the N. are cut off from the influence of the sea by the complex of mountains (the Balkan Mountains) and valleys which forms the main bulk of the peninsula. The much dissected coastline of Greece allows the marine influence to penetrate far inland in the S. There are few navigable rivers.

The people are of great ethnic diversity, the remains of wave after wave of invasion, and speak a variety of languages. Most of them belong to the Greek Orthodox Church; a few are R.C., and in Turkey-in-Europe and in Bulgaria are a number professing Islam. Included in the B. are Greece, Albania, Bulgaria, Turkey-in-Europe, most of Yugoslavia, and part of Rumania (see these countries).

BALKAN WARS (1912-13). Two wars which resulted in the expulsion of Turkey from all but 9,068 sq. m. of Europe. The 1st, in 1912, of Bulgaria, Serbia, Greece, and Montenegro against Turkey, forced the Turks to ask for an armistice, but the peace negotiations, in London, broke down when the Turks, while agreeing to surrender all Turkey-in-Europe W. of Adrianople (Edirne), refused to give up that city. In Feb. 1913 hostilities were resumed, Adrianople fell on 26 March and on 30 May by the Treaty of London Turkey retained in Europe only a small piece of eastern Thrace and the Gallipoli peninsula.

In the 2nd Balkan War, June-July 1913 – among the victors – Bulgaria attacked Greece and Serbia which were joined by Rumania. Bulgaria was defeated, and Turkey secured from that country the cession of Adrianople.

BALKA'SH. Lake in the Kazakh S.S.R. (U.S.S.R.). It is 375 m. long, receives several rivers, but has no outlet. It is very shallow and is frozen throughout the winter. Area, about 6,680 sq. m. On its N. shore is the town of B., founded in 1928, pop. (est.) 75,000, engaged in refining copper mined near by.

BALL, John (d. 1381). English agitator, a priest and prominent leader of the Peasants' Revolt of 1381. At Blackheath he preached from the text 'When Adam dived and Eve span, Who was then the gentleman?' When the revolt collapsed he was taken prisoner and executed.

BALLAD (bal'ad). Type of popular poetry. Derived from Late Lat. *ballare*, 'to dance', the B. was primarily intended for singing at the communal ring-dance, the refrains representing the chorus.

Of simple metrical form and dealing with some strongly emotional event, the B. is half-way between the lyric and the epic. The majority of Bs. date from the 15th cent. but were not collected until modern times, the most famous collections being Bishop Percy's *Reliques of Ancient Poetry* (1765), Scott's *Minstrelsy of the Scottish Border* (1802-3), and Prof. F. J. Child's *English and Scottish Popular Ballads* (1857-9). Opinion is divided as to whether the authorship of the Bs. may be attributed to individual poets or to the community. Later Bs. tend to centre round a popular folk-hero, as in the case of the *Gest of Robin Hood* and in the American cycles concerning Jesse James and Yankee Doodle. Other later forms are the 'broadsheets' with a satirical or political motive, and the testamentary 'hanging' Bs. of the condemned criminal. Poets of the Romantic movement both in England and in Germany were largely influenced by the B. revival, e.g., the *Lyrical Ballads* (1798) of Wordsworth and Coleridge. Other writers of modern Bs. include Keats, Southey, Rossetti, S. Dobell, Tennyson, Morris, and Kipling.

BALLADE (balahd'). Poetic form developed in France in the later Middle Ages from the popular ballad, and generally consisting of 1 or more groups of 3 stanzas of 7 or 8 lines each, followed by a shorter stanza or envoy. The last line of the 1st stanza is

repeated as a refrain in each succeeding verse including the envoy. The B. was revived in the 19th cent. by Banville, A. Lang, E. Gosse, and Henley. Also a music form of story-like type, notably used by Chopin.

BALLANCE, John (1839-93). N.Z. statesman. B. in Ulster, he migrated to N.Z., founded and ed. the *Wanganui Herald*, held many cabinet posts, and was P.M. 1891-3.

BALLANTYNE (bal'antin), Robert Michael (1825-94). British writer of stories for boys. B. in Edinburgh, a nephew of Scott's publishers, James and John B., he went to Canada as a boy and spent 6 years as a trapper in lonely outposts for the Hudson's Bay company. He produced over 100 spirited tales, incl. *The Young Fur Traders*, *Coral Island*, and *Martin Rattler*.

BALLARAT. Largest inland town in Australia, in Victoria, 66 m. W.N.W. of Melbourne, an industrial and railway centre. The discovery of gold here led to the founding of the town in 1851, and gold long remained its chief product. Pop. (1961) 54,913.

BALLET (bal'ä). A theatrical representation combining music and movement in a complex form of dancing. Some such form of entertainment existed in ancient Greece, but the germ of B. as it is known today was brought to France by Catherine de Medici, in the form of a spectacle combining singing, dancing, and declamation.

The first important dramatic B. was mounted in 1581 by Baltasar de Beaujoyeux, and was performed by male courtiers, ladies of the Court forming the *corps de ballet*. In 1661 Louis XIV founded *L'Académie Nationale de Musique et de la Danse*, from which all subsequent B. activities throughout the world can be traced. Long flowing court dress was worn by the dancers. In the 1720s Marie-Anne Camargo, the first ballerina, shortened her skirt to reveal her feet, thus allowing greater movement *à terre* and the development of dancing *en l'air*. In the early 19th cent. a Paris costumier, Maillot, invented tights, thus completing muscular freedom. The first of the great B. masters was J. G. Noverre (1727-1810). Great contemporary dancers were Vestris, Heinel, Dauberval, and Gardel. Carlo Blasis (1803-78) is regarded as the father of classical B.

ROMANTIC BALLET. The great Romantic era of Taglioni, Elssler, Grisi, Grahn, and Cerrito began about 1830, but survives today only in *Giselle* (1841) and *La Sylphide* (1832). The calf-length classical white dress was introduced together with dancing *en pointe*. The technique of the female dancer developed, but the men were reduced to partners.

Russian B. was introduced to the West by Diaghilev (q.v.) who set out for Paris in 1909 at about the same time that Isadora Duncan, a rigid opponent of classical B., was touring the Continent. Associated with

BALLET. Ulanova in *Giselle*, one of her greatest roles, supported by Fadeychev and the Bolshoi company, as they appeared at Covent Garden, taking London by storm in 1936. Photo: Houston Rogers.

BALLET. A remarkable partnership: Margot Fonteyn and Rudolf Nureyev create the leading roles in *Marguerite and Armand*, based by Frederick Ashton on the novel by Dumas, *La Dame aux Camélias*. Photo: Houston Rogers.

him were Michel Fokine, Nijinsky, Pavlova, Massine, Balanchine, Lifar, and Bs. presented by his co. before its break-up on his death in 1929 incl. *Les Sylphides*, *Schéhérazade*, *Petrouchka* and *Blue Train*.

In the U.S. Balanchine estab. in 1933 the School of American B. and the de Basil Ballets Russes de Monte Carlo and Massine's Ballet Russe de Monte Carlo also carried on the Diaghilev tradition: since 1948 the N.Y. City Ballet with Maria Tallchief, Nora Kaye, and choreographer Jerome Robbins, under the guiding influence of Balanchine, has developed a genuine American classic style. See also GRAHAM, Martha.

In Britain Marie Rambert initiated in 1926 the Ballet Club which developed into the Ballet Rambert, and in 1930 Arnold Haskell and Ninette de Valois formed the Camargo Society, but the modern national co. the Royal Ballet (so named 1957) grew from foundations laid by Ninette de Valois in 1928. British dancers, incl. Margot Fonteyn, Beryl Grey, Alicia Markova, Anton Dolin, Michael Somes, Elaine Fildfield and Antoinette Sibley.

In Russia B. continues to flourish, the 2 chief cos. being the Kirov and Bolshoi. Best known ballerinas are Ulanova and Plisetskaya (qq.v.), and among the men Rudolf Nureyev, now dancing in the West.

The best-known systems of dance notation are *Labanotation*, developed by Hungarian Rudolf Laban (d. 1958), and the much simpler *Benesh System*, using symbols on a horizontal stave, developed by husband and wife Joan and Rudolf Benesh.

BALLISTICS. The study of the motion of projectiles. Internal B. deals with the motion of a projectile inside a gun; exterior B. with the trajectory of the projectile through the air; and terminal B. with the motion and effect at the target end. The Bs. of a gun are affected from day to day by the temperature of the charge, barometric pressure, and the wind. Range tables contain information enabling the gunner to allow for these variations.

BALLOON. A bag of impermeable fabric, which rises from the ground when filled with a gas lighter than air. The first successful balloon experiment was made by the Montgolfier brothers in 1783 at Annonay near Lyons. The first human ascents were made in Montgolfier Bs. by Pilâtre de Rozier at Paris later in the same year. These Bs. were filled with heated air,

but hydrogen was soon substituted. The French Revolution led to the first use of the B. in war for observation purposes.

Bs. were used in the Italian war of 1859 and the American Civil War, while during the siege of Paris in 1870 they proved of value for conveying passengers out of the city. A B. corps was added to the British Army in 1890, and served in the S. African War.

The scientific possibilities of the B. were early recognized. Ascents made by H. T. Coxwell and J. Glaisher in 1862-6 provided valuable observations on the constitution of the atmosphere, and attempts were made at aerial photography. In 1901 an altitude of 34,500 ft. was reached. In 1892 the use of unmanned Bs. carrying automatic recording instruments was introduced. In 1932 Prof. Piccard in a B. equipped with an airtight spherical gondola reached 53,000 ft.; in 1935 the American army balloonists Anderson and Stevens reached 72,395 ft. and carried out investigations into cosmic rays. An unsuccessful attempt was made in 1897 by S. A. Andrée to reach the North Pole by B. Before the S.W.W. B. races were held annually for the Gordon-Bennett Cup. In both World Wars, Bs. linked by cables - a B. barrage - were used to protect London from dive bombing. Bs. are still often used in research: see illus., p. 74.

BALMO'RAL CASTLE. Royal residence in Scotland on the Dee, 6½ m. N.E. of Braemar, Aberdeenshire. The castle, built of granite in the Scottish baronial style, is dominated by a square tower and circular turret rising 100 ft. It was rebuilt 1853-5 by Prince Albert, who bought the estate in 1852.

BALSAM. Name given in medicine to many resins and oils obtained from various plants, in particular the B. of Tolu obtained from the tree *Myroxylon toluifera*, and B. of Peru from the trunk of *M. pereirae*. Bs. have a pleasant fragrance and some have pain-relieving properties.

The name B. is also given to plants of the genus *Impatiens*, which are generally herbaceous annuals with white or red flowers.

BALTIC. Large shallow arm of the North Sea, extending N.E. from the narrow Skagerrak and Kattegat, between Sweden and Denmark, to the Gulf of Bothnia between Sweden and Finland. Its coastline is 5,000 m. long, and the sea, including the Gulfs of Riga, Finland, and Bothnia, has an area of 163,600 sq. m. Its shore-line is shared by Denmark, Germany, Poland, U.S.S.R., Finland, and Sweden. Many large rivers flow into it, including the Oder, Vistula, Niemen, W. Dvina, Narva, and Neva. Tides are hardly perceptible, and weather is often stormy and navigation dangerous. Most ports are closed by ice from Nov.

BALLOON. A contemporary print illustrates the ascent from Dover on Jan. 7, 1785 of J. P. Blanchard and J. Jeffries in their hydrogen-filled balloon. Landing near Calais, they achieved the first aerial crossing of the English Channel.

Courtesy of the Science Museum, South Kensington

V Twenty-second letter of the alphabet. It was not differentiated from U until about the 16th cent. In sound it is the voiced dentilabial spirant. In the Roman notation V equals 5.

VAAL (vahl). S. African river, the chief tributary of the Orange. It rises in the Drakensberg and for much of its course of c. 750 m. it separates Transvaal from Orange Free State. Harnessed to produce electric power, it joins with the coalfields alongside to make the valley the equivalent of the Ruhr.

VACCINATION. The insertion beneath the skin of a small quantity of lymph from a calf immune to cowpox, with a view to producing a general reaction by which the subject develops immunity to smallpox. The practice dates from an experiment by Edward Jenner (q.v.) in 1796. V. of children was compulsory in Britain 1853–1948, unless parents made a declaration of objection.

VACUUM (vak'u-um). Strictly speaking, a region completely empty of matter; in physics the term means any enclosure in which the gas pressure is considerably less than the atmospheric. The V. CLEANER was invented by the Scotsman Hubert Cecil Booth (1871–1955) who was prompted by seeing an American dust-blowing machine in 1901 to reverse the process and invent a device for the extraction of dust from carpets and upholstery by suction: his first machine was on wheels and operated from the street, tubes being taken into the house. V. FLASKS, originally known as Dewar vessels after Sir James Dewar, their inventor, are glass vessels with double walls, the space between which is a V.

VADUZ (vah'doots'). Capital of the European principality of Liechtenstein; pop. (1968) 4,000.

VAHINGER (fī'inger), Hans (1852–1933). German philosopher, author of the *Philosophy of As If* (1911). He maintained that the human mind can never attain to certainty on ultimate issues, and that all knowledge must inevitably consist only of fictions and hypotheses.

VAISHNAVAS. A Hindu sect, chiefly in Bengal, founded by Chaitanya (q.v.) in the 16th cent.

VALDIVIA (vahl'dē-vē-ah). Chilean port, industrial town, and resort, cap. of V. prov. It has shipyards, tanneries, breweries, soap factories, etc. It was founded 1552 by Spanish conquistador Pedro de V. (c. 1500–54), conqueror of Chile. Pop. (1966) 73,000.

VALENCE (vahlōns'). French town and river port on the Rhône, cap. of Drôme dept. It is of pre-Roman origin, and has a Romanesque cathedral consecrated 1095. Pop. (1962) 55,023.

VALENCIA (valen'sya). (1) Third city of Spain, cap. of V. prov., near the mouth of the Guadalaviar. It is the seat of an archbishopric and a univ. (1411). Pop. (1965) 584,670. (2) Cap. of Carabobo state, Venezuela, standing 1,568 ft. a.s.l. Founded 1555, V. is a tourist and trading centre and makes textiles, leather, sugar, etc. Pop. (1964) 204,270.

VALENCIENNES (vahlōnsyen'). French town in Nord dept. on the Escaut (Schelde) in the centre of a rich coalfield. It has many industries, and was formerly famous for its lace. It became French in 1678. Pop. (1962) 46,643.

VALENCY. In chemistry, a measure of the atom-binding capacity of the atoms in an element; or the number of atoms of hydrogen or of any other standard univalent element capable of uniting with one atom of the element. The elements are described as uni-, di-, tri-, and tetra-valent when they unite with 1, 2, 3, and 4 univalent atoms respectively.

VALENTINE (d. 270). Christian saint and martyr, supposed to have perished at Rome. The custom of sending 'valentines' on 14 Feb., his festival, seems unconnected with the saint, deriving from the Roman Lupercalia, a festival celebrated in mid-Feb.

VALENTINO (valent'no), Rudolf (1895–1926). Italian film actor in U.S.A., who was famed for his

VALERIAN

VALÉRY (vahl'rē), Paul (1871–1945). French poet. B. at Cette, he became a member of the circle of symbolists of which Mallarmé was the centre, but for many years abandoned poetry and turned to mathematics and philosophy. In 1917 he pub. the poem *La Jeune Parque*, followed by *Charmes*, *Le Cimetière Marin*, etc., and by critical studies and philosophical dialogues. V.'s poetry became of the greatest importance for its intellectual content.

VALHALLA. In Scandinavian mythology, the 'Hall of the Slain' in Odin's palace, to which were conducted the souls of those who fell in battle. At doomsday (Ragnarök) they will fight with Odin against the giants.

VALKYRIES (val'kirēz). In northern mythology, divine maidens who transport to Odin the souls of heroes who have died in battle.

VALLADOLID (vahl'ahdōlid'). Spanish city, cap. of V. prov. It has a cathedral (1595) and univ. (1346). It was cap. of Castile and Leon in the 14th–15th cents., then of Spain until 1560. Ferdinand and Isabella were married at V. (1469); Columbus died there. V. is a centre of agricultural trade. Pop. (1965) 181,765.

VALLE D'AOSTA (vahl'e dah-os'tah). Autonomous region in N.W. Italy; most of its inhabitants are French-speaking. Area 1,260 sq. m.; pop. (1961) 99,754.

VALLE-INCLÁN (vahl'yā ēnklañh'), Ramón del (1866–1936). Spanish writer. A brilliant stylist, he is remembered for his poetic prose *Sonatas* (1902–5), telling the story of the amorous marquis of Bradomín and *Tirano Banderas* (1926), a novel set in S. America.

VALLETTA. Cap. of Malta and port of call for Far Eastern liners. The former palace (16th cent.) of the Grand Master of the Knights Hospitallers is the

VALLETTA. The Grand Harbour.

Courtesy of B.E.A.

are ejected molten rock, lava, ashes, gases, etc. Usually it is cone-shaped with a pit-like opening at the top called the crater. Some Vs., e.g. Stromboli and Vesuvius, eject the material with explosive violence; others are a quiet type in which the lava rises up into the crater and flows over the brim. Many Vs. are submarine. The principal volcanic regions of the world are in the Pacific from Cape Horn to Alaska; the central Andean mts.; the North Island of New Zealand; Hawaii; Japan and Antarctica.

VOLE. Sub-family of mice (*Microtinae*), widely distributed over Europe, Asia, and N. America. They are brownish or greyish above, the underside is white. The chief British types are the water V. (*Microtus amphibius*); the short-tailed field mouse (*M. agrestis*); and the bank V. (*M. glareolus*).

VOLGA (vol'gah). Longest river of Europe: 2,290 m. (2,200 m. navigable). It drains most of middle and E. European Russia, rising in the Valdai plateau and flowing into the Caspian through c. 200 mouths 55 m. below Astrakhan.

VOLGOGRAD. Town in the R.S.F.S.R., on the r. Volga. Metal goods and machinery are manufactured, and there are saw mills, petroleum refineries, etc. Pop. (1967) 720,000. V. was called Stalingrad 1925-61; its successful defence, 1942-3, against the Germans was a turning point of the S.W.W.

VOLLEYBALL. Team game invented in the U.S.A. in 1895, played on a court 60 ft. long by 30 ft. wide, divided into two by an 8 ft. high net. The 6 players of each team rotate in position through the 6 sub-sections 15 ft. by 10 ft. into which each half of the court is divided. The ball, slightly smaller than a basketball, is hit with palm or fist, the aim being to ground it in the opponents' court.

VOLT. The practical unit of electromotive force (e.m.f.) and potential difference (p.d.). It is defined as the e.m.f. or p.d. which, when steadily applied to a conductor of resistance one ohm, produces a current of one ampere.

VOLTA, Alessandro (1745-1827). Italian physicist and pioneer of electrical science. B. at Como, he was a professor there and at Pavia. He invented the voltaic pile, the electrophorus and an electroscope. The volt (q.v.) is named after him.

BANK VOLE

VOLTA. The site chosen for the implementation of the Volta River Project is Akosombo, 58 m. from Accra. The diver shown here is helping to lay the foundations of the dam.

Courtesy of Ghana Information Services.

VO'LTÁ. The principal river of Ghana, with a length of c. 1,000 m., and 2 main upper branches, the Black and White V. Under the V. River Project, first envisaged 1924, it will be dammed to provide power for general purposes and for the manufacture of aluminium from the country's bauxite deposits.

VOLTÁIC REPUBLIC. Inland state of W. Africa, lying N. of Ghana. Cattle and sheep are reared, ground-nuts and cotton grown. Some mineral deposits (gold, manganese, copper, etc.) have been found. V.R., formerly called Upper Volta, was annexed by France in 1896. Given independence in 1958, it chose in 1960 to become a rep. outside the Fr. Community. Cap. Ouagadougou. Area 106,000 sq. m.; pop. (1967) 5,000,000.

VOLTAIRE (voltär'). Pseudonym of Fr. writer François-Marie Arouet (1694-1778). B. at Paris, son of a notary, he adopted his pseudonym, probably an anagram of Arouet l(e) j(eune), in 1718. He had already started writing poetry at his Jesuit seminary in Paris, and having left school in 1711 was twice imprisoned in the Bastille and thrice exiled from the capital between 1716 and 1726 for libellous political verse: *Oedipe* his first essay in tragedy was staged in 1718. While in England 1726-9 he dedicated an epic poem on Henry IV, *La Henriade*, to Queen Caroline, and on returning to France pub. the successful *Histoire de Charles XII* (1731), and produced the play *Zaire* (1732). His *Lettres philosophiques sur les Anglais* 1733, a panegyric of English ways, thought and political practice, led to his taking refuge with his mistress, the marquise de Chatelet (d. 1749) at Cirey in Champagne—where he wrote his best play *Méropé*, 1743, and much of *Le Siècle de Louis XIV*. In 1751-3 he was at the court of Frederick the Great, who had long admired him, but the association ended in deep enmity, and from 1754 he estab. himself near Geneva—after 1758 at Ferney, 4 m. away over the French border, hence the nickname 'patriarch of Ferney'. Among his other works are *La Pucelle*, a verse libel of Joan of Arc; the satirical tale *Zadig*; *Candide* (1759), a parody on Leibniz's 'best of all possible worlds'; and the tragedy *Irène* (1778), for which his visit to Paris to attend its production was a popular but exhausting triumph which accelerated his death there. In religion a Deist, V. devoted himself to crushing the spirit of intolerance: see CALAS. His remains were transferred in 1791 to the Panthéon in Paris.

VON BRAUN (brown), Wernher (1912-). German scientist. Technical director of the liquid-fuel-rocket and guided-missile centre at Peenemünde 1937-45, he developed the V-2 rocket used against England. After the S.W.W. he went to America to work on guided missiles and in 1960 became director of the George C. Marshall Space Flight Center in Alabama for the National Aeronautics and Space Administration, working on the Apollo project. See MOON.

VOODOO. Among the Negroes of the West Indies, Haiti in particular, a cult of serpent worship, phallicism, magical practices, etc.

VÖRÖ'NEZH. Cap. of V. region of the R.S.F.S.R., and administrative centre of the Black Earth area. It stands on the V., near where it joins the Don and has many industries, and a univ. founded at Dorpat (Tartu) in 1803 moved to V. during the F.W.W. There has been a town on the site since the 11th cent. Pop. (1967) 592,000.

VOROSHILOV, Klementy Efremovich (1881-1969) Marshal of the Soviet Union. He joined the Bolsheviks in 1903, and was many times arrested, exiled, but escaped. Commander N.W. front in 1941, he failed to deal with the German blitzkrieg. In 1953-60 he was pres. of the Presidium of the U.S.S.R.

VOROSHILOVGRAD. See LUGANSK.

VORSTER (förs't-), Balthazar Johannes (1915-). South African statesman. B. in Jamestown, Cape Prov., he was interned during the S.W.W. as a member

governor's residence. V., founded 1566, suffered severe damage from air bombardment during the S.W.W. Pop. (1967) 15,362.

VALLEY FORGE. Site some 20 m. N.W. of Philadelphia, U.S.A., where Washington's army spent the winter of 1777-8 in terrible hardship during the American War of Independence.

VALLEY OF TEN THOUSAND SMOKES. Valley in Alaska, U.S.A., where in 1912 the eruption of Mt. Katmai, one of the largest volcanic explosions ever known, took place, though without loss of life since the area was uninhabited. It was dedicated in 1918 as the Katmai Nat. Monument; the many fissures on the valley floor still emit steam jets.

VALMY (vahlmē). French village in the Marne dept. where the army of the French Revolution under Dumouriez defeated the Prussians in 1792. Pop. (1962) 354.

VALOIS (vahlwah'). French family, originally counts of V. in the Oise dept., members of which occupied the French throne, 1328-1589.

VALONA. Italian form of VLONE.

VALPARAISO (vahlpahri'zō). Second city of Chile, capital of V. prov., on the Pacific. It has many factories, and is the busiest commercial port on the W. coast of S. America. Founded in 1536, it was occupied by Drake 1578, by Hawkins 1595, pillaged by the Dutch 1600, bombarded by Spain 1866; it has also suffered much from earthquakes. Pop. (1966) 261,684.

VAMPIRE. In the demonology of the Slavonic peoples, a ghost or spirit who emerges from the grave at night and sucks the blood of sleeping men. The name was transferred to the V. bats of S. and Central America which suck the blood of sleeping cattle or human beings: the most common species is the Central American *Desmodus rufus*, about 3 in. long. The effect of their attacks has been much exaggerated.

VAN (vahn). Turkish city on Lake V., cap. of V. il. On a site that has been inhabited for more than 3,000 years, it was the scene of Armenian massacres 1895-6. It makes cotton textiles. Pop. (est.) 15,000.

VANADIM (Scandinavian goddess Vanadis). Silver-white hard metal, discovered by Del Rio in 1801, and isolated by Roscoe in 1869: symbol V, at wt. 50-95, at. no. 23. It occurs in the rare minerals vanadinite and patronite, and its chief use is in alloying steel to which it imparts toughness, elasticity and tensile strength. V. compounds (vanadates) are used in the preparation of aniline black for colouring glass.

VAN ALLEN, James Alfred (1914-). American physicist, a pioneer in high-altitude research with rockets, and prof. of physics at the State Univ. of Iowa since 1951. In 1958, following examination of data obtained by 2 *Explorer* earth satellites, he discovered the V.A. belts (of particles from the sun trapped by the earth's field). These were 2 zones of intense radiation; one of altitude between 1,400-3,400 m., and the other between 8,000-12,000 m. In 1962 an American high altitude nuclear test resulted in the creation of a temporary artificial 'little' V.A. belt of trapped electrons, prejudicial to astrophysical and geophysical research and space flight.

VANBRUGH (van'bra), Dame Irene (1872-1949). British actress, née Barnes, whose roles incl. Gwendolen in *The Importance of Being Earnest* and Mary Lasenby in *The Admirable Crichton*. She m. in 1901 Dion Boucicault, Irish playwright and actor, and was created D.B.E. in 1941. She is commemorated by the *V. Theatre* at R.A.D.A. Her sister Violet V. (1867-1942) was also an accomplished actress.

VANBRUGH, Sir John (1664-1726). English dramatist and architect. B. in London, he designed Blenheim Palace and the 1st Haymarket Theatre, London. Of his many comedies the most notable are *The Relapse* (1696) and *The Provok'd Wife* (1697).

VAN BU'EN, Martin (1782-1862). 8th President

of the U.S.A. Secretary of State (1829-31) and then Minister to England, he was elected President on the Democratic ticket in 1835 and held office until 1840.

VANCOUVER (vankoo'ver), George (c. 1758-98). British navigator. Entering the navy at 13, he accompanied Cook on his 2nd and 3rd voyages of discovery, and 1791-4 voyaged about the Pacific. He circumnavigated V. Island, which is named after him.

VANCOUVER. Canadian is. off the Pacific coast, part of Brit. Columbia, the cap. of which, Victoria, is sit. on V. Coal is mined and timber is produced; fishing is important. V. was first visited by Capt. Cook, 1778, and was surveyed, 1792, by Capt. George Vancouver, after whom it is named. Area 12,408 sq. m.

VANCOUVER. Third city of Canada and its chief Pacific seaport, on the mainland of Brit. Columbia, Pacific terminus of the Canadian Pacific rly.; it has an airport and is the seat of a univ. Industries incl. refining of petroleum brought by pipeline (1953) from Alberta, engineering, shipbuilding, aircraft, lumbering, fishing, textiles, pulp and paper. V. was founded 1825 by the Hudson's Bay Co. Pop. (1966) 410,375; Greater V. 892,286.

VANDALS. A Teutonic people akin to the Goths, who early in the 5th cent. A.D. moved from N. Germany to invade the Roman provinces in Gaul and Spain. Many settled in Andalusia (*Vandalitia*), and others moved on to N. Africa in 429. In the next cent. they acknowledged Roman overlordship.

VANDERBILT, Cornelius (1794-1877). American millionaire. B. at Staten Island, N.Y., he made his fortune in steamships and railways. His eldest son William Henry V. (1821-85) and grandson Cornelius V. (1843-99) expanded the family's businesses.

VAN DER POST, Laurens Jan (1906-). S. African writer. His books are concerned with the duality of man's existence, which is symbolized in Africa by the tension between black and white, Boer and Briton, city and veld, as in *Flamingo Feather* (1955), in which the hero is a Boer whose best friend is a Briton. Later books incl. studies of Russia (1967) and Japan (1968).

VAN DER WAALS (van dur wah'ls), Johannes Diderik (1837-1923). Dutch physicist. He made considerable contributions to physical properties of matter, especially intermolecular attractions, and the relation between the pressure and volume of a gas in the transition between liquid and gas phases. He received a Nobel prize in 1910. His *equation of state* ($P + \frac{a}{V^2}$) ($v - b$) = RT, (where p = pressure, v = volume, T = absolute temperature, R = gas constant; a and b are corrections for the particular gas), gives a close approximation to the behaviour of ordinary gases.

VAN DE VELDE. Family of artists. Both William V. the elder (1611-93) and his son William V. the younger (1633-1707) painted sea battles for Charles II and James II. Another son Adriaen V. (1636-72) executed landscapes, and figures in works by Ruysdael, and others.

VAN DIEMEN. See DIEMEN.

VAN DONGEN (don'gen), Kees (1877-1968). Dutch artist. Living in Paris from the age of 20, he was linked with German avant-garde Expressionism, as well as being a fashionable portrait painter of women.

VAN DRUTEN, John William (1901-57). British playwright. B. in London, he qualified as a solicitor before beginning to write, his greatest success being *Young Woodley* (1928), treating the once-daring theme of love between a pupil and a schoolmaster's wife.

VAN DYCK (dik), Sir Anthony (1599-1641). Flemish painter. B. at Antwerp, he was for 4 years an assistant to Rubens. He visited England 1620-1, and was painter to James I. He then worked for a time in Italy, but in 1628 returned to Antwerp where he painted many religious works and portraits. In 1632 he was invited to England by Charles I, became court painter, and was knighted.

of the militant Afrikaner nationalist organization Ossewabrandwag. A Nationalist M.P. from 1953, he was Min. of Justice 1961–6 (being responsible for indefinite detention of political offenders, etc.), when he succeeded as P.M. on the assassination of Verwoerd.

VORTICISM. A movement (1913–22) in English painting, with aims similar to those of Futurism (q.v.). Its exponents, of whom Wyndham Lewis was the leader, believed that painting should reflect the complexity of the modern industrial world.

VOSGES (vōzh). Mt. range in E. France, rising in the Ballon de Guebwiller to 4,667 ft. and forming the W. edge of the Rhine rift valley. It gives its name to a Fr. dept.

VOTE. Expression of opinion by ballot. show of hands, etc. All British subjects over 18 (21 until 1969), except peers, lunatics, and felons, are entitled to vote, a register being prepared annually, and since 1872 voting has been by secret ballot. In parliamentary elections the ballot boxes are opened by the returning officer, who counts the Vs. in the presence of the candidates or their agents. Under the Corrupt and Illegal Practices Act (1883) any candidate attempting to influence voters by gifts, loans or promises, or by intimidation, is liable to fine or imprisonment. Since 1945 the franchise in local govt. has in effect been assimilated to the parliamentary.

In the U.S.A. citizens over 21 are voters (the age limit being 18 in Georgia and Kentucky, 19 in Alaska, and 20 in Hawaii), but there may be conditions as to previous residence (varying according to state), and until declared illegal in 1965, literacy tests or payment of a poll tax were often used to decrease the Negro vote in the South. In local govt. similar rules apply.

Voting in newly emergent states, as in Africa, often raises problems of literacy or differing local languages and instead of the names of candidates being written on the ballot paper, the colourful pictorial emblems of their party may be used. Absence of accurate registers might also encourage plural voting, so that the voter (having once voted) may be marked on the hand with temporarily 'indelible ink'.

VOTIAK (votyakh'). Name 1920–32 of an autonomous region of the R.S.F.S.R. which became UDMURT A.S.S.R.

VRIES (vrēs), Hugo de (1848–1935). Dutch botanist, a pioneer in the study of plant evolution.

VUILLARD (vüëyahr'), Edouard (1886–1940). French artist. B. at Cuiseaux, he lived most of his life in Montmartre, and excels in portraits and homely interior scenes in which his mother – manager of a dressmaker's shop – often features.

VULCAN. See HEPHAESTUS.

VULGATE. The Latin translation of the Bible made mainly by St. Jerome in the 4th cent., and so called because of its vulgar (general) use in the R.C. Church.

VULTURE. Group of birds of prey. The head and neck are bare, the plumage shaggy, and the beak and claws are hooked. True Vs. occur only in the Old World; the American forms include the condor (q.v.), turkey buzzard, and black buzzard or carrion crow.

VYBORG (vë'borg). Port and naval base in the R.S.F.S.R., on the Gulf of Finland, 70 m. N.W. of Leningrad. Founded by the Swedes 1293, annexed by Russia 1721, it was Finnish until ceded to the U.S.S.R. in 1940. Pop. (est.) 60,000.

VYSHINSKY, Andrei (1883–1954). Soviet statesman. B. at Odessa, he joined the Mensheviks in 1902, fought in the Civil Wars, and became a Bolshevik in 1920. As Commissar for Justice he acted as prosecutor at the treason trials of 1936–8. He was For. Min. 1949–53 (deputy 1940–9 and from 1953), and having often represented the U.S.S.R. at the U.N., was appointed permanent Soviet representative by Malenkov in 1953.

VULTURE

VUILLARD. 'Mlle Natan-son in the Artist's Studio' painted c. 1918.

Photo: Leeds Art Gallery and Temple Newsam House.

W The 23rd letter of the English alphabet, representing a semi-vowel, viz. a *u* in consonantic function. It is called double *u* because it was written *uu* or *vv* which in ligature resulted in *w*. It is not pronounced before *r* (*write*, *wren*) and in cases such as *two* and *sword*.

WADI HALFA (wah'dē hal'fa). Frontier town in Sudan Rep., on the Nile, the N. terminus of the Sudan railway. Pop. c. 14,000.

WAGGA WAGGA (wo'ga wo'ga). Town in N.S. Wales, Australia, on the Murrumbidgee, 70 m. N.N.E. of Albury, centre of an agricultural area. Pop. (1966) 22,092.

WAGNER (vahg'ner), Richard (1813–83). German composer. B. at Leipzig, he became director of the Magdeburg theatre, where he produced, unsuccessfully, his first opera, *Das Liebesverbot*. He lived in Paris, 1839–42. His opera *Rienzi* was produced at

Dresden in 1842, followed by *The Flying Dutchman* in 1843. As conductor at the Dresden opera house he composed *Tannhäuser* and *Lohengrin*. In 1849 he fled to Paris to escape arrest for taking part in the 1848 revolutionary riots. Liszt befriended him, and produced *Lohengrin* at Weimar in 1850. W. was later allowed to return to Germany, and in 1864 won the favour of Ludwig II of Bavaria. In 1866–72 W. lived in Switzerland near Lucerne. His *Tristan und Isolde* was produced at Munich in 1865, and W. founded the festival theatre at Bayreuth, where in 1876 *The Ring of the Nibelung* was given its first performance. His last work, *Parsifal*, was produced in 1882. W. d. at Venice.

W. revolutionized the 19th cent. conception of opera, envisaging it as a wholly new art-form, in which musical, poetic, and scenic elements should be unified; and by such devices as the use of *leitmotif* he gave to opera thematic unity and coherence.

The Bayreuth tradition was carried on by W.'s wife

VANE, Sir Henry (1613–62). English statesman. In 1640 elected a member of the Long Parliament, he was prominent in the impeachment of Laud, and 1643–53 was in effect the civilian head of the Parliamentary government. At the Restoration he was executed as a chief of the Republican Party.

VAN EYCK. See **EYCK**.

VAN GOGH. See **GOGH**.

VANILLA. Genus of orchids, several of which bear pods which when dried are the source of *V. flavouring*, used in confectionery, etc. The finest *V.* comes from *V. planifolia*, a native of Mexico, now cultivated elsewhere.

VANINI (vahnē'nē), Lucilio (1585–1619). Italian pantheistic thinker. B. near Naples, he took orders in the R.C. Church, but developed freethinking views. He was burnt at the stake as an atheist at Toulouse.

VANNES (vahn). French town and small port in Brittany, cap. of Morbihan dept. It is of pre-Roman origin and has remarkable megalithic monuments in the vicinity. Pop. (1962) 34,107.

VANSITTART, Robert Gilbert, 1st baron (1881–1957). British diplomat. Entering the diplomatic service in 1902, he was Permanent Under Sec. of State for Foreign Affairs 1930–8 and Chief Diplomatic Adviser to the For. Sec. 1938–41. He was noted for his anti-German polemic. He was created baron 1941.

VAN T'HOFF, Jacobus Henricus (1852–1911). Dutch physical chemist. He explained the 'asymmetric' carbon atom occurring in optically active compounds, and his greatest work—the concept of chemical affinity as the maximum work obtainable which results from a reaction—was shown with measurements of osmotic and gas pressures, and reversible electric batteries. He was the 1st recipient of the Nobel prize in 1901.

VAR (vahr). River in S. France, rising in the Maritime Alps and flowing generally S.S.E. for 84 m. into the Mediterranean near Nice. It gives its name to a dept.

VARANESI. Indian city on the Ganges r. in Uttar Pradesh, more familiar in the W. under the form Benares. It is a city holy to Hindus with a 3 m. water frontage of stairways (ghats), leading up from the river to innumerable streets, temples, and the 1,500 golden shrines. The ritual of purification is daily practised by thousands of devout Hindus, who bathe from the ghats in the sacred river. At the burning ghats, the ashes, following cremation, are scattered on the river, a ritual supposed to ensure a favourable reincarnation. Pop. (1961) 573,558.

VARGAS (vahr'gahs), Getulio (1883–1954). Brazilian lawyer and statesman. He led the revolution of 1930, and was president 1930–45 and from 1951 till his suicide following a political crisis.

VARIABLE STAR. A star whose brightness changes, either regularly or irregularly, over a short period. Apart from the eclipsing Ss., where the light-change is due to the periodical eclipse of the S. by a binary companion, variables do actually change in luminosity and in radius. Particularly interesting are the *Cepheids*, whose periods are perfectly regular, and range from a few hours up to a few weeks. There are also the less precise 'long-period variables, such as Mira Ceti (period about 331 days) and the irregular variables such as Betelgeux in Orion.

VARICOSE VEINS. Veins that have become dilated or stretched, especially those on the inner side of the leg, knee, and thigh. The complaint is usually caused by prolonged standing.

VARLEY, John (1778–1842). British water-colourist, known for his Thames-side scenes, and, from the time of his first visit to N. Wales in 1799, for mountain landscapes.

VARNA. Bulgarian fortress, and seaport, on an inlet of the Black Sea. Pop. (1965) 180,000.

VARNISH. Name given to resins or resinous gums

VATICAN. Almost all this tiny walled state is shown here. At its heart is St. Peter's, approached through the Piazza San Pietro with its magnificent quadruple colonnade designed by Bernini. Built 1506–1626 on the supposed site of the tomb of the apostle, it is the largest church in Christendom. Immediately behind it are the Vatican Gardens, and to the right is the Vatican palace which includes the Pope's private apartments, the Vatican museums and the Sistine Chapel with its Michelangelo frescoes. Photo: Courtesy of Italian State Tourist Office.

dissolved in linseed oil, turpentine, etc., that are used in house decoration, furniture making, automobile and carriage work, etc.

VASARI (vahsah'rē), Giorgio (1511–74). Italian painter and architect, remembered for his *Lives of the Painters, Sculptors, and Architects* (1550).

VASCO DA GAMA. See **GAMA**.

VATICAN CITY STATE. The independent sovereign state, created by the Lateran Treaty, 1929, of which the Pope is the head. The Holy See covers the V. palace (the Pope's official residence) and the basilica and square of St. Peter's in the heart of Rome, several other basilicas in and near Rome, and the Pope's summer residence at Castel Gandolfo. The Sovereign Pontiff appoints a layman as governor. Area 109 acres; pop. c. 1,000.

VAUBAN (vōboñ), Sébastien le Prestre de (1633–1707). French marshal and military engineer. In Louis XIV's wars he conducted many sieges, and rebuilt many of the fortresses on France's E. frontier.

VAUCLUSE (vöklüz). Mt. range in S.E. France, c. 25 m. long, part of the Provence Alps, to the E. of Avignon, rising to 4,075 ft. It gives its name to a dept.

VAUD (voh). Canton of S.W. Switzerland adjoining Lake Geneva. Lausanne is the cap., and it incl. Montreux, Vevey and other tourist resorts. Area 1,240 sq. m.; pop. (1960) 377,585.

VAUGHAN (vawn), Henry (1622–95). Welsh poet, called the Silurist, because he was a native of the land of the ancient Silures. B. in Brecknockshire, he was a physician, and pub. several vols. of religious verse and prose devotions. A disciple of Donne, V. is ranked as a metaphysical poet, and his mystical outlook on nature influenced Wordsworth and others.

VAUGHAN WILLIAMS, Ralph (1872–1958). British composer. B. at Down Ampney, Glos, he studied at Cambridge and the R.C.M., and also learnt from Max Bruch in Berlin and Ravel in Paris. Early works incl. the choral and orchestral settings of Whitman 'Towards the Unknown Region' (1907) and 'A Sea Symphony' (1910); and 'A London Symphony' (1914). After the F.W.W. came the 'Pastoral' symphony; the Mass in G minor for unaccompanied choir; the ballad opera *Hugh the Drover* (1924) and several symphonies. In 1951 his operatic morality *The Pilgrim's Progress* which incl. the earlier cantata 'The Shepherds of the Delectable Mountains' was performed for the Festival of Britain. Later works incl. 'Sinfonia Antartica', developed from his film

Cosima (1837–1930), Liszt's daughter, whom he had m. in 1870 after her first husband, Hans von Bülow, had divorced her; by her son Siegfried W. (1869–1930), himself a composer of operas such as *Der Bärenhäuter*, *Der Kobold*, etc.; and by Siegfried's wife Winifred (1897–), who was fined in 1947 for actively supporting the Nazi régime. R.W.'s daughter Eva m. H. S. Chamberlain (q.v.). In 1950 the festival was taken over by Wieland (1917–66) and Wolfgang W. (1919–), the sons of Siegfried and Winifred.

WAGNER-JAUREGG (-yow'rek), **Julius** (1857–1940). Austrian neurologist. He received a Nobel prize in 1927 for his work on the use of induced fevers in treating mental illness, e.g. malaria in cases of general paralysis of the insane.

WAGRAM (vagh'rahm). Austrian village, 10 m. N.N.E. of Vienna, the scene in July 1809 of Napoleon's victory over the Austrians under Archduke Charles. Pop. c. 4,000.

WAGTAIL. Genus of birds (*Motacilla*). Found mostly in N. Europe and Asia, they are small, with a slender bill and long tail. Three species breed in the British Isles: the pied W. (*M. lugubris*), the grey W. (*M. melanope*), and the blue-headed W.

PIED WAGTAIL

WAHHABIS (wah-hah'-bēz). Mohammedan sect

founded by Mohammed ibn Abdul Wahab (1691–1787), whose doctrines call for a strict observance of the precepts of the Koran. They predominate in Saudi Arabia today.

WAIN, **John Barrington** (1925–). British author. Ed. at St. John's Coll., Oxford, he lectured in English literature at the Univ. of Reading 1947–55. His books incl. the novels *Hurry on Down* (1953), and *The Smaller Sky* (1967); vols. of poetry and criticism and the autobiography *Sprightly Running* (1962).

WAKAMATSU. See **KITAKYUSHU**.

WAKEFIELD, **Edward Gibbon** (1796–1862). British colonial statesman. B. in London, he was imprisoned for abducting an heiress 1826–9, and became manager of the S. Australian Association which founded a colony in 1836. He was an agent for the New Zealand Land Co. 1839–46, and emigrated there in 1853. His son, **Edward Jerningham W.** (1820–79), wrote *Adventure in New Zealand* (1845).

WAKEFIELD. English industrial city (co. bor.), cap. of the W. Riding of Yorks., 6 m. S. of Leeds. The Lancastrians defeated the Yorkists here in 1460. Worsteds, chemicals, machine tools, etc., are made, and there are collieries. Pop. (1961) 61,591.

WAKE ISLAND. A small Pacific island between the Philippines and Hawaii. Annexed by the U.S.A. in 1898, it was uninhabited until in 1935 it was made an air staging point, with a garrison; it was occupied by the Japanese 1941–5. Area 3 sq. m.; pop. (1960) 1,097.

WALACHIA. See **WALLACHIA**.

WALCHEREN (wahl'kheren). Island of Zeeland, Netherlands, in the estuary of the Scheldt. The surface is flat and for the most part below sea-level. Dairy farming forms the main activity. The chief towns are Flushing and Middelburg, the cap. Its motto is *Luctor et emergo* (I struggle and emerge). A Brit. force seized W. in 1809; after 7,000 of the garrison of 15,000 had died of malaria, the remainder were withdrawn. It was flooded by deliberate breaching of the dykes to drive out the Germans 1944–5, and in 1953 by abnormally high tides. Area 80 sq. m.

WALDENSES. Christian Church, founded c. 1170 by Peter Waldo, a merchant of Lyons. They lived in

voluntary poverty, refused to take oaths or take part in war, and later rejected the doctrines of transubstantiation, purgatory, and the invocation of saints. Although subjected to persecution until the 17th cent., they spread in France, Germany, and Italy, and still survive in Piedmont.

WALES. Principality of Great Britain, lying between England to the E., the Bristol Channel to the S., and the Irish Channel to the W. and N. Off the N.W. of the mainland lies Anglesey.

PHYSICAL FEATURES. With the exception of the island of Anglesey, and of areas near the coast and in the valleys of the larger rivers, the surface is mountainous. The main massif of the Cambrian mountains runs from N. to S. and includes Snowdon (3,560 ft.), the highest point in England and Wales, Cader Idris, Plinlimon, the Black Mountains, and the Brecon Beacons. Among the rivers are the Dee, Conway, Dovey, Ystwyth, Teifi, Towy, Loughor, Neath, and Taff. The Usk, Wye, and Severn rise in Wales. The Alwen, Vyrnwy and Trawsfynydd Reservoirs are in N. Wales, and the Birmingham Corporation Reservoirs are in Radnor. See map p. 387.

WALES. Caerphilly Castle, in Glamorgan, built late in the reign of Henry III, is the earliest and finest example in Britain of the concentric type which exploits a flat situation by use of successive lines of defence.

Photo: British Travel and Holidays Association.

ECONOMIC. Agriculture is important in N. Wales, but the S. is one of the greatest industrial areas of Great Britain. Throughout W. sheep are grazed, and on the more level ground cattle are bred, and oats, barley, wheat, and roots cultivated. Coal is mined in the valleys of the S.E. and, on a smaller scale, near Wrexham in the N.E. Slate is quarried in the N., where lead is also mined. Abundant supplies of coal encouraged the growth of the iron and steel, tin-plate, and copper-smelting industries; export of coal, reviving in the 1960s, built up the ports of Cardiff, Penarth, Barry and Port Talbot. Nickel and oil are refined. Shipbuilding and engineering are also carried on. Hydroelectric power has been harnessed, and is used for the manufacture of aluminium. In the N. and S.W. there is a flourishing tourist traffic. The largest towns are Cardiff (the capital), Swansea, Rhondda and Merthyr Tydfil. Rhyl, Colwyn Bay, and Llandudno are seaside resorts. From Holyhead (Anglesey) and Fishguard (Pembrokeshire) steamship services ply to Ireland.

POLITICAL STRUCTURE. Administratively W. is joined with England, though certain legislation is applicable only to the principality, which is divided into 12 counties, to which is added Monmouthshire, included geographically in England.

POPULATION. The Welsh are a Celtic people. The majority belong to various Nonconformist denominations, e.g. the Calvinistic Methodists or Presbyterian Church of Wales, Methodists, Baptists, Independents, and Congregationalists. There are cathedrals at

score — one of several — for *Scott of the Antarctic* and a Ninth Symphony. His genius was very English, owing much to folk song, and music of the Tudor period and Purcell; he received the O.M. in 1935.

VECTOR. Any physical quantity that has both magnitude and direction, such as the velocity or acceleration of a body, as distinct from a scalar quantity which has magnitude and no direction, such as speed, density, or mass. The direction of a V. is often indicated by an arrow on a line of length equal to its magnitude and in technical writing it is denoted by heavy (Clarendon) type.

VEDA (vā'da) (Sanskrit, divine knowledge). The most sacred of the Hindu scriptures, hymns written in an old form of Sanskrit; the oldest may date from 1500 or 2000 B.C. The 4 main collections are: the Rigveda (hymns and praises); Yajurveda (prayers and sacrificial formulae); Sāmaveda (tunes and chants); and Atharvaveda, or V. of the Atharvans, the officiating priests at the sacrifices.

VEGA (vā'gah), Garcilaso de la (c. 1540–c. 1616). Spanish writer. Son of a Spanish conquistador and an Inca princess, he wrote an account of the conquest of Florida and *Commentarios* on the history of Peru.

VEGA CARPIO (kahr'pē-ō), Lope Felix de (1562–1635). Spanish poet and dramatist. B. at Madrid, he served with the Armada in 1588, and in 1613 took orders. He wrote epics, pastorals, odes, sonnets, and novels, and over 1,500 plays.

VEGETARIANISM. The practice of restricting diet to foods of vegetable origin, for humanitarian or health reasons. The stricter vegetarians abstain from all food which comes from animals, incl. eggs, milk, butter, and cheese.

VEINS. Thin-walled muscular tubes which carry blood from all parts of the body to the heart. They contain valves which prevent the blood from running back when moving against gravity. With the exception of the Vs. leading from the lungs to the heart, they always carry blood which has lost oxygen and is therefore dark.

VELAZQUEZ (velath'keth or velas'kwiz), Don Diego de Silva y (1599–1660). Spanish painter. B. in Seville, he became in 1623 court painter to Philip IV, whom he painted repeatedly, and in 1652 was appointed court-marshal. He owed much to Titian, Rubens, and Tintoretto. See illus. p. 712.

VELVET. A plain silk fabric with a short thick pile, largely used for rich draperies, hangings, etc. Utrecht and Genoa are famed centres of manufacture.

VENDEE (voñdā'). R. of W. France which rises near the village of La Châtaigneraie and flows 45 m. to join the Sèvre Niortaise 7 m. E. of the Bay of Biscay. It gives its name to a dept. where a peasant rising against the revolutionary govt. (the War of the Vendée) began in 1793 and spread to other parts of France, lasting until 1795.

VENDETTA. Name given to a survival of the blood feud that existed until recently in Corsica and parts of Sardinia and Sicily.

VENDÔME (voñdôm'), Louis Joseph, duc de (1654–1712). Marshal of France. In the war of the Spanish Succession he was defeated by Marlborough at Oudenarde in 1708, but was successful later in Spain.

VENEREAL DISEASE. See SYPHILIS; GONORRHOEA.

VENETIA (venē'shia). Roman name of that part of N.E. Italy which later became the rep. of Venice and covers approx. the 'three Venices' — in Ital. Venezia-Tridentina (Trentino-Alto-Adige, q.v.); Veneto (called Venezia Euganea 1919–47) which incl. the delta of the Po, a fertile territory at the foot of the mountains, and portions of the Dolomites, Carnic and Julian alps. Its cities incl. Venice, Padua, Verona, and Vicenza. Area 7,095 sq. m.; pop. (1961) 3,833,837; and Venezia Giulia (see FRIULI-VENEZIA GIULIA).

VENEZIA. Ital. form of VENICE.

VENEZUELA (venizwā'la). Federal rep. of S. America on the Caribbean coast, between Brazil and

Colombia, occupying the whole of the lower basin of the Orinoco and the coastal plain bordering the gulf of Maracaibo. Coffee, cocoa, cotton, sugar cane, etc., are produced, and sheep, cattle, etc., are raised; in the forest region rubber and timber are obtained. V. is rich in minerals, incl. iron-ore and petroleum. 70 per cent of the people are Mestizos. Caracas is the cap., other important cities are Maracaibo, Barquisimeto, Valencia, Maracay, San Cristobal and Ciudad Bolivar.

Government is by a president and a congress of 2 chambers. The country is divided into a federal district, 20 states, and 2 territories. Spanish is the official language, and the prevailing religion R.C. Left-wing extremist activity is supported by Castro from Cuba. Area 352,150 sq. m.; pop. (1967) 9,189,000.

Columbus visited V. in 1498; it was the Spanish captaincy-general of Caracas 1550–1822 when, led by Simon Bolivar (q.v.), it rebelled and, as part of Colombia, was freed from Spain. V. became an independent rep. in 1830.

VENICE (ven'is). Italian city, seaport, and naval base. It stands on a group of low-lying islands at the head of the Adriatic, built for the most part on piles,

VENICE. One of Venice's more than 400 bridges, the Bridge of Sighs, built by Contino in the 16th cent., joins the ducal palace to the state prison.

Photo: A. W. Kerr.

and is connected with the mainland by a rail and road viaduct. The Grand Canal divides V. into 2; the 'streets' are canals, and motor boats and gondolas are the means of conveyance. It is possible to walk all over the city whose quietness is one of its great charms. In the Piazza of St. Mark are situated the campanile, the Doge's palace, and the cathedral of St. Mark,

dating from the 4th cent. There are Byzantine palaces, Gothic churches, and gems of Renaissance architecture. The Lido, c. 2 m. S.E. of V., is a popular bathing resort. Among V.'s oldest industries are the making of glass and fine textiles. The gradual flooding of the city is being caused by the slow sinking of the plain and the consequent rising sea-level. In addition, overbuilding and ill-considered filling-in of canals in the 19th cent. has led to an urgent need for a town-planning scheme. Pop. (1961) 336,184.

V. was founded by refugees from mainland cities sacked by the Huns in the 5th cent. For many cents. V. was an independent rep., stretching at one time to the Alps (see VENETIA) and governed by an aristocratic oligarchy and dependent upon Mediterranean commerce for its prosperity. At the head of the rep. was the Council of Ten and the Senate, which appointed the Doge. The rep. was overthrown by Napoleon in 1797. In 1815 V. became Austrian, and in 1866 part of the kingdom of Italy.

VENIZELOS (venizā'los), Eleutherios (1864–1936). Greek statesman. B. in Crete, he entered politics, becoming Premier of Greece in 1911. He resigned in 1915 when King Constantine refused to join the Allies in the F.W.W., but became Premier under Alexander in 1917, and brought Greece into the war.

PRINCE OF WALES.
H.R.H. Prince Charles
robed for his investiture.

Photo: Camera Press.

St. David's, Bangor, St. Asaph, Llandaff, and Brecon. The Anglican Church in Wales has been disestablished since 1914. The University of W., founded in 1893, comprises the colleges of Aberystwyth, Bangor, Cardiff, and Swansea. At Aberystwyth there is also a national library, and at Cardiff a national museum. The general system of education is similar to that of England, but Welsh is used as an additional medium. Welsh is spoken most widely in the N. Excl. Mon. Area 8,030 sq. m.; pop. (est. 1967) 2,709,930. See WELSH LANGUAGE AND LITERATURE.

History. Welsh history, as distinct from English, begins with the Anglo-Saxon conquest of the 5th-7th cents. The Anglo-Saxon victories at Deorham (577) and Chester (613) cut off W. from the other areas still held by the Britons, while in the 8th cent. the Mercian frontier was pushed forward to Offa's Dyke. During the 9th-11th cents. the Vikings raided the coasts. At this time W. was divided into small states organized on a tribal basis, although princes such as Rhodri (844-78), Howell the Good (c. 904-49) and Griffith ap Llewelyn (1039-63) temporarily united the country. The Norman marcher barons gradually conquered much of the S., but in the N. Llewelyn I (1194-1240) and Llewelyn II (1246-82) maintained a stout resistance, until the conquest of W. was completed by Edward I in 1283. A last rising was led by Owen Glendower in 1400-13.

Henry VIII in 1536 incorporated W. politically into England, and gave it parliamentary representation. Although the Reformation and Puritanism aroused little response, and in the 17th cent. W. was mainly Royalist and Jacobite, since the Evangelical Revival of the 18th cent. nonconformity has become a powerful factor in Welsh life. During the 18th cent. a strong coal and iron industry developed in the S.; in the 19th cent. the miners and ironworkers were militant supporters of Chartism, and W. has long been a stronghold of trade unionism and Socialism. Between the world wars W. suffered greatly from industrial depression; unemployment reached 21 per cent in 1937,

and a considerable exodus of population took place. It recovered during and after the S.W.W., but agitation for 'home rule' grew and the Welsh Nationalist Party (Plaid Cymru) returned its first member to Westminster 1966.

WALES, Prince of. Title granted to Prince Edward, afterwards Edward II, in 1301, since when it has normally be conferred on the sovereign's eldest son. Prince Charles (q.v.) was invested as 21st P. of W. at Caernarvon in 1969 by Elizabeth II.

WALEY, Arthur (1889-1966). British orientalist. He served in the Department of Prints and Drawings, British Museum, and trans. both from the Japanese and Chinese, being particularly famous for his renderings of Chinese verse in rhymeless *vers libre*.

WALKER, Patrick (Chrestien) Gordon (1902-). British Labour statesman. Entering Parliament as M.P. for Smethwick in 1945, he was P.P.S. to Herbert Morrison in 1946, and Sec. of State for Commonwealth Relations 1950-1. In 1964 he lost his seat at Smethwick, where immigration became an issue. Defeated also at Leyton, he resigned as Foreign Sec. (Oct. 1964-Jan. 1965), but regained this seat 1966. He was Min. for Education and Science 1967-8.

ROCK WALLABY

WALLABY. Member of the kangaroo family (q.v.). The group includes the true Ws. or 'brush' kangaroos of the scrub jungle, and the rock Ws.

WALLACE, Alfred Russel (1823-1913). British naturalist. B. in Usk, he travelled on the Amazon, and in 1858 a joint paper on the theory of evolution by W. and Darwin was read to the Linnean Society. Awarded the O.M. 1910.

WALLACE, Edgar (1875-1932). British author. B. at Greenwich, he was the illegitimate son of an actress who placed him with a Billingsgate fish porter. After a varied series of jobs, incl. newsboy, and a spell in the army, he was a war correspondent 1899-1902, and in 1905 pub. his 1st full-length novel *The Four Just Men*. Later books, written on copious supplies of weak tea, incl. the African stories *Sanders of the River* (1911); crime thrillers, e.g. *A King by Night* (1926) and a series built round the elderly detective Mr. J. G. Reeder; and books with a race-course setting, e.g. *The Flying Fifty-Five*. He was also a brilliantly successful writer of melodramas, e.g. *The Ringer* (1926), *The Squeaker* (1928), and *On the Spot* (1931), inspired by the career of Al Capone.

WALLACE, Henry Agard (1888-1965). American statesman. B. in Iowa, he was Secretary of Agriculture 1933-40. In Roosevelt's 3rd term, W. was vice-pres., and was Progressive pres. candidate 1948.

WALLACE, Lewis (1827-1905). U.S. general and novelist. He served in the Mexican and Civil Wars, and subsequently became governor of New Mexico and minister to Turkey. He wrote the historical novels *The Fair God* (1873) and *Ben-Hur* (1880).

WALLACE, Sir Richard (1818-90). British art connoisseur. He inherited a valuable art collection from his father, the marquess of Hertford. His widow bequeathed it to the nation and it is on view at Hertford House, London, which was acquired by the govt. The Wallace Collection, as it is called, contains many works by the 18th cent. French masters. See illus. pp. 198, 205, 679.

WALLACE, Sir William (c. 1272-1305). Scottish patriot. B. near Paisley, he led a revolt against English rule in 1297, won a victory at Stirling, and assumed the title of governor of Scotland. He was

COUNTIES OF WALES

	Area in sq. m.	Pop. (1961 census)	County Town
Anglesey	276	51,700	Beaumaris
Brecknockshire	733	55,544	Brecon
Caernarvonshire	569	121,194	Caernarvon

	8,030	2,640,632	(Welsh Hwlfordd)

Defeated in 1920, he was again Prime Minister in 1924, 1928–32, and 1933. He was exiled in 1935.

VENT, Îles du. Fr. name for the SOCIETY IS.
VENTRIS, Michael George Francis (1922–56). British architect and archaeologist, remembered for his decipherment of Minoan Linear B., the language of the tablets found at Knossos and Pylos. He showed that it was a very early form of Greek and so led the way to a revision of existing views on early Greek history. He was killed in a road accident.

VENTSPILS. Port of Latvian S.S.R., U.S.S.R., on the Baltic, a lumbering centre. It was founded 1314, annexed by Russia 1795. Pop. (est.) 20,000.

VENUS. The 2nd planet in order of distance from the Sun. It has a mean distance from the Sun of 67,000,000 miles, and a revolution period of 224½ days; it may approach the Earth to within 24,000,000 miles, and is then nearer than any important celestial body apart from the Moon. Its diameter is 7,700 miles, and its mass 0.83 of that of the Earth. Probe *Venus III* (U.S.S.R.) crash-landed 1966, the first man-made object to land on another planet; and *Venus IV* (U.S.S.R.) during a soft landing 1967, sent back information that V. has no magnetic field; the cloudy atmosphere which permanently hides the surface is 15 times as dense as that of Earth and is mainly carbon dioxide, so that no animal life as we know it could exist; the surface temperature is between 40° and 280°C. *Mariner 5* (U.S.A.) 1967 indicated that V. is surrounded by brilliantly coloured clouds of mercury compounds, and *Venus V* and *VI* (U.S.S.R.) 1969 landed on the 'night' side.

VENUS. Roman goddess of beauty, growth, and love, identified with the Greek Aphrodite.

VENUS' FLY TRAP. See INSECTIVOROUS PLANTS.

VERACRUZ (ve'rakrooz). City and seaport of Mexico, on the Gulf of Mexico. Cortez founded Villa Nueva de la Vera Cruz (Span., New Town of the True Cross) nearby in 1519; it was transferred to its present site 1599. Pop. (1967) 185,900.

VERBENA. Genus of plants of the Verbenaceae family, having tubular flowers arranged in close spikes. Colours range from white to rose, violet, and purple. There are about 100 species, mostly in the American tropics. The garden V. (*Lippia citriodora*) belongs to the same family.

VERCORS (värkör). Pseudonym adopted by French writer and artist Jean Bruller (1902–) while a member of the French resistance during the S.W.W. Under the occupation he estab. in 1941 a clandestine publishing house, Les Editions de Minuit, from which appeared his novel *Le Silence de la mer* (1942), emblematic of the resistance and smuggled to England and the U.S. Later books incl. the stories *Freedom in December* (1961) and the novel *Sylvia* (1962).

VERDI (vär'de), Giuseppe (Fortunino Francesco) (1813–1901). Italian composer. B. near Busseto, the son of a village innkeeper, he wrote his first symphony at 15 and then studied in Milan. His first opera *Oberto* was given at La Scala in 1839, and was followed by *Ernani* (Venice, 1844). After visiting London and Paris he returned to Italy and wrote *Rigoletto* (1851), *Il Trovatore* (1853), *La Traviata* (1853), *Don Carlos* (1867), *Aida* (1871), *Otello* (1877), *Falstaff* (1893), and other operas, as well as religious music, e.g. the *Requiem*.

VERDIGRIS. A basic copper acetate, used as a wood preservative, in anti-fouling compositions, and

formerly in green paint. It is an irritant poison.

VERDUN (veidun'). Fortress town of N.E. France on the Meuse. During the F.W.W. it became the symbol of French resistance, withstanding a terrific German onslaught in 1916. Pop. (1962) 25,238.

VERHAEREN (verhah'ren), Émile (1855–1916). Belgian poet. B. near Antwerp, he was a leader in the Belgian literary revival of the 1880s.

VERLAINE (verlän'), Paul (1844–96). French poet. B. at Metz, he became an insurance clerk in Paris. His first vol. of poems, *Poèmes saturniens*, appeared in 1866, followed by *La bonne chanson* (1870) and *Sagesse* (1881). Other works are *Romances sans paroles* (1874), *Amour* (1888), and *Bonheur* (1891). From 1871 he wandered about France, Belgium, and England with Rimbaud until an attempt to shoot his fellow-traveller brought V. 2 years' imprisonment.

VERMEER (vermār'), Jan (1632–75). Dutch artist. B. at Delft, he spent most of his life and d. there. His paintings are distinguished by their harmonious colouring and technical excellence. 'Lady at the Virginals' is in the National Gallery. See MEEGEREN, HANS VAN.

VERMONT. A N. Atlantic state of U.S.A., traversed by the Green Mts. (from which it derives its name). Lake Champlain lies on the W. Dairy products are important; china clay, asbestos, and granite, marble and slate are worked; and business machines, furniture and paper made. V. entered the Union in 1791. Montpelier is the cap. Area 9,609 sq. m.; pop. (1960) 389,881.

VERMOUTH (ver'muth). A white wine flavoured by the maceration of bitter herbs and fortified by alcohol. It is prepared in France and Italy.

VERNE (värn), Jules (1828–1905). French author. B. at Nantes, he went to Paris and estab. a reputation as a writer of travellers' tales which show scientific prevision: *Five Weeks in a Balloon* (1862), *Journey to the Centre of the Earth*, *Twenty Thousand Leagues under the Sea*, *Around the World in Eighty Days* (1872), etc.

VERNEY, Sir Edmund (1590–1642). English courtier, knight-marshal to Charles I from 1626. He sat as an M.P. in both the Short and Long parliaments, and though sympathizing with the Parliamentary position remained true to his allegiance; he d. at his post as royal standard bearer at Edgehill. His son Ralph (1613–96) adhered to the opposing party, and his industry was responsible for the preservation at Claydon, the family home in Bucks, of the Verney Papers, a valuable record of this and later periods.

VERNIER. A device for taking readings on a graduated scale to a fraction of division: a short divided scale which slides along the main scale and carries the index or pointer. It was invented by Pierre V. (c. 1580–1637), who lived at Ornans in Burgundy.

VERNON, Edward (1684–1757). English admiral, captured Portobello in 1739, with a loss of only 7 men.

VERONA. Cap. of V. prov., Veneto, Italy, on the Adige. It has a 12th cent. cathedral and fine Roman remains. It is an agricultural market town with printing and paper works and makes plastics, furniture, macaroni, etc. A school of painting flourished at V. in the 15th and 16th cents. Pop. (1961) 221,138.

VERONESE (värönä'ze), Paolo (1528–88). Italian painter. B. in Verona, he delighted in painting gorgeous banquets, pageantry, and material splendour. His 'Family of Darius at the feet of Alexander' is in the National Gallery, London. He d. at Venice. See illus. p. 1070.

VERONICA. Christian saint, a woman of Jerusalem who lent her veil or kerchief to Jesus to wipe the sweat from his brow on the road to Calvary; whereupon the image of the Lord's face was printed upon it. What is alleged to be the actual veil is preserved in St. Peter's, Rome.

VERROCCHIO (värök'kē-ō), Andrea del (1435–88). Italian artist, whose real name was Cioni. His only

VERCORS

Photo: Ergy Londau.

defeated by Edward I at Falkirk in 1298, and in 1305 was captured and executed.

WALLACHIA (wolăk'iah). Former prov. of Rumania, in the S. of that country. An agricultural area of c. 30,000 sq. m., it was an independent principality in the Middle Ages, paying tribute to the Turks from 1343, under Turkish rule 1387 until united with Moldavia in 1861 to form Rumania.

WALLASEY. English seaside resort (co. bor.) in Cheshire at the mouth of the Mersey opposite Liverpool. Pop. (1961) 103,213.

WALLENSTEIN (vahl'lenstin), Albrecht von (1583–1634). German general. B. in Bohemia, he commanded the Imperial armies with great success in the 30 Years War, but was dismissed in 1630 by the emperor, who feared his ambition. He was recalled in 1631 to face Gustavus Adolphus, and plotted for a principality of his own. In 1634 he was assassinated by his officers.

WALLER, Edmund (1606–87). English poet. He sat in the Long Parliament, and later eulogized both Cromwell and Charles II. He is remembered mainly for such lyrics as 'Go, lovely rose'.

WALLFLOWER. Perennial plant (*Cheiranthus cheiri*) in the family Cruciferae, cultivated for its fragrant red, yellow, or brown flowers.

WALLIS, Sir Barnes Neville (1887–). British aeronautical engineer. He designed the airship R 100, the bombs used against the Möhne and Eder dams in 1943, assisted development of the Anglo-French Concorde supersonic airliner, and was the inventor of the swing-wing aircraft. He was knighted 1968.

WALLOONS. A Romanized Celtic people of S.E. Belgium, numbering c. 3 million and speaking a French dialect. Against W. predominance the Flemish movement arose in the 19th cent.

WALSEND. English industrial town (bor.) in Northumberland, on the Tyne at the E. end of Hadrian's Wall. Shipbuilding, engineering, and coal mining are the chief occupations. Pop. (1961) 49,785.

WALL STREET. Thoroughfare in New York, so called from a stockade erected 1653. The stock exchange is on it, and it has come to be used as a synonym for stock dealing in the U.S.A.

WALNUT. Tree (*Juglans regia*) probably originating in S.E. Europe, which may have been introduced to England by Roman times and to N. America by the early colonists. It may reach 100 ft., and produces a full crop of nuts about a dozen years from planting: the timber is a favourite in furniture making.

WALPOLE, Horace, 4th earl of Orford (1717–97). English author. The son of Sir Robert Walpole, he sat in parliament as a Whig 1741–67, and succeeded to the peerage in 1791. He converted his house at Strawberry Hill into a Gothic castle, and by his novel, *The Castle of Otranto* (1765), set a fashion for 'tales of terror'. His letters are of interest.

WALPOLE, Sir Hugh (1884–1941). British novelist. B. in New Zealand, he was brought to England when 5, and in the F.W.W. served with the Red Cross in Russia, an experience reflected in *The Dark Forest* (1916). Best-known of his books are *The Cathedral* (1922) and *The Old Ladies* (1924), both set in the imaginary cathedral city of Polchester, and marked by a creation of atmosphere and hint of sadism peculiar to him. Less happy is the historical epic series the *Herries Chronicle* (1930–3) set in the Lake District.

WALPOLE, Sir Robert, 1st earl of Orford (1676–1745). British Whig Prime Minister. B. at Houghton, Norfolk, he entered parliament in 1701, and became Secretary at War 1708–10, Treasurer of the Navy 1710, and First Lord of the Treasury and Chancellor of the Exchequer 1715–17 and 1721–42. He is reckoned as the 1st P.M. His rule has become proverbial for corruption. He encouraged trade by pursuing a pacific foreign policy, but in 1739 he was forced into war with Spain. On his resignation in 1742 he received an earldom. See illus. p. 391.

WALPURGIS (val-), St. (d. 779). English nun who preached Christianity in Germany. W. Night, the night before 1 May, her feast day, was associated with witches' sabbaths, and particularly with that held on the Brocken in the Harz mts.

WALRUS. Carnivorous marine mammal (*Odobenus rosmarus*) of the Arctic. It reaches a dozen feet in length, has webbed flippers, a bristly moustache, and large tusks from which ivory carvings are made.

WALRUS

WALSALL (wawl'sel). English industrial town (co. bor.) in Staffs, 8 m. N.W. of Birmingham. Leather goods, castings and tubes, and electrical equipment

are produced. It already had a mayor in the 15th cent. Pop. (1961) 117,836.

WALSINGHAM, Sir Francis (c. 1530–90). English politician. As Sec. of State from 1573, he advocated a strong anti-Spanish policy, and ran the govt.'s spy system.

WALTER, Hubert (d. 1205). Archbishop of Canterbury 1193–1205. As justiciar 1193–8 he ruled England during Richard I's absence and introduced the offices of coroner and justice of the peace.

WALTER, John (1739–1812). British newspaper editor, founder of *The Times*. Outstanding contributors to the development of the paper were his son JOHN W. II (1776–1847) and grandson JOHN W. III (1818–94). His great-great-grandson JOHN W. (1873–1963) was chairman of the directors of the paper 1916–21.

WALTER, Lucy (c. 1630–58). Englishwoman, mistress of Charles II, whom she met while a Royalist refugee at The Hague in 1648. Her son was the duke of Monmouth.

WALTHER VON DER VOGELWEIDE (vahl'ter fon der fōg'elvide) (c. 1170–c. 1230). German poet, greatest of the Minnesingers. Of noble birth, he lived in his youth at the Austrian ducal court in Vienna, adopting a wandering life after the death of his patron in 1198. His lyrics deal esp. with love, but also with religion and politics.

WALTON, Izaak (1593–1683). English author. B. at Stafford, he settled in London as an ironmonger, and wrote short biographies of Donne, Hooker, George Herbert, etc., and the classic *Complete Angler* (1653).

WALTON, Sir William Turner (1902–). British composer. B. in Oldham, he was ed. at the Cathedral Choir School and Christ Church, Oxford. Among his works are *Façaade* (1923) to words by Edith Sitwell, later produced as a ballet; a viola concerto; the oratorio *Belshazzar's Feast*; 2 symphonies (1935 and 1960); a violin concerto (1939); a sonata for violin and pianoforte (1949) and variations on a theme by Hindemith (1963). He also composed film music for *Henry V*, *Hamlet* and *Richard III*. O.M. 1967.

WALVIS BAY. Chief port of S.W. Africa, a detached part of Cape Prov. from 1878, but admin. with S.W. Africa from 1922. Area 434 sq. m.; pop. (1961) 16,490 (5,067 white).

WAND, John William Charles (1885–). British Anglican churchman. Chaplain to the Forces 1915–19, he was bp. of Bath and Wells 1943–5, and bp. of London 1945–55. He has pub. *What St. Paul said* (1952), etc.

WANDERING JEW. A Jew who, according to legend, insulted Christ on His way to Calvary, and was condemned to wander about the world until His second coming. Sometimes he is called Ahasuerus.

WANGANUI (wong-ganoo'-i). City, port and airport in North Island, New Zealand, on the W. river. It makes textiles and clothing. Pop. (1967) 36,200.

WANTAGE. English market town (U.D.) in Berks,

VERONESE. Probably a *modello* for a late altar-piece, 'The Baptism of Christ' has its closest parallels in the Redentore at Venice which was completed by Veronese's heirs.

Courtauld Institute Galleries, London.

surviving painting is the 'Baptism of Christ' at Florence; his sculptures incl. the equestrian statue of Colleoni at Venice.

VERSAILLES (vārs'). French town, cap. of the Les Yvelines dept., 12 m. S.W. of Paris. Its great palace was built mainly by Louis XIV; here the German Empire was proclaimed in 1871 and the Peace Conference was held after the F.W.W. The Grand and Petit Trianon are smaller palaces. Pop. (1962) 95,149.

The **TREATY OF V.** was signed on 28 June 1919, between the Allies and Associated Powers (the U.S.A. being an Associated Power) on the one hand and Germany on the other. In the forefront of the treaty were the clauses to establish the League of Nations. Germany surrendered Alsace-Lorraine (q.v.) to France, large areas to Poland, and smaller areas to Czechoslovakia, Lithuania, Belgium, and Denmark. The Rhineland was demilitarized, and restrictions were put on German armaments. Germany accepted responsibility for war damage, and provision was made for the payment of reparations. The U.S.A. never ratified the treaty, but made a separate peace with Germany and Austria, 1921.

VERSE. The arrangement of words in a rhythmical pattern. Besides metre (q.v.) an important element in verse is provided by *rhyme* which arises from identity in sound of the endings of certain words. Rhyme first made its appearance in western Europe in late Latin poetry, and from thence passed into use in the modern European languages. The binding together of lines into groups by means of a unified rhyme-scheme leads to the creation of the *stanza*.

Classical Greek verse depended upon quantity, a long syllable (indicated thus —) being regarded as occupying twice the time taken up by a short syllable (˘). Long and short syllables were combined in *feet*, such as:

- (1) Dactyl: — ˘ ˘; (2) Spondee: — —;
- (3) Anapaest: ˘ ˘ —; (4) Iamb: ˘ —;
- 5) Trochee: — ˘.

Blank verse consists of unrhymed five-stress lines. It was introduced by Surrey, and later became, as perfected by Marlowe, Shakespeare, and Milton, the standard metre for English dramatic and epic poetry.

The *Spenserian Stanza*, rhyming ababbcbcc — the last line being of 12 syllables, was used by Spenser in *The Faerie Queen*. The *Shakespearean Sonnet* consisted of 4 quatrains and a couplet, thus: abab, cdcd, efef, gg. It was first devised by Surrey. The *Pindaric Ode* was modelled on the ancient Greek form with its structure of *strophe*, *antistrophe*, and *epode*. Gray's 'The Bard' and 'The Progress of Poesy' are the best-known examples. *Free Verse* is applied to any verse the rhythmical basis of which is not obvious. See also **BALLAD**; **ODE**; **POETRY**, **SONNET**, etc.

VERTEBRATA. A main sub-division of the animal kingdom, incl. all the backboneed animals — mammals (incl. man), birds, reptiles, amphibians, fish.

VERULAMIUM. Roman-British town whose remains have been excavated close to St. Albans. Boadicea burnt it in A.D. 61, but it was rebuilt.

VERWOERD (fervoort), Hendrik Frensch (1901–66). S. African statesman. B. in Amsterdam, the son of missionary parents, he was ed. at the univs. of Leipzig, Hamburg and Berlin. He held chairs of applied psychology and sociology at Stellenbosch (1927–37), before devoting himself to building up the Nationalist paper *Die Transvaler* (1938–48). Elected to the Senate in 1948, he was Min. of Native Affairs 1950–8, and although he did much to improve African housing in the cities, he was chief promoter of apartheid legislation. As P.M. in 1958 he pledged himself to estab. a rep., achieving this in 1961, see **BRITISH COMMONWEALTH**. He was assassinated in the House of Assembly by a parliamentary messenger Dimitri Tsafendas, a Portuguese b. in Mozambique.

VESPA'SIAN (Titus Flavius Vespasianus) (A.D. 9–79). Roman emperor. Son of a moneylender, he had a distinguished military career and was proclaimed emperor by his soldiers in A.D. 69 when he was campaigning in Palestine. He reorganized the eastern provinces, and was a capable administrator.

VESPERS. The 7th of the 8 canonical hours in the Catholic Church. The *Sicilian V.* is the name given to a massacre of the French rulers in Sicily in 1282.

VESPUCCI (vespoo'chē), Amerigo (1454–1512). Florentine navigator, who in 1497 sailed for the New World, and claimed to have reached the mainland of N. America a few days before John Cabot. America is named after A.V.

VESTA. Roman hearth goddess, identified with the Greek Hestia. In Rome her shrine stood in the Forum where was the sacred hearth, whose fire was never allowed to go out. The tenders of the flame were the 6 Vestal Virgins.

VESUVIUS. Active volcano in Italy, about 10 m. E.S.E. of Naples, and c. 3,890 ft. high. It caused the destruction of Pompeii in A.D. 79, and has often erupted.

VETCH or Tare. A leguminous annual plant (*Vicia sativa*) with trailing or climbing stems and reddish-purple flowers. Winter V. produces spring fodder, and spring V. is cut for hay.

VETERINARY SCIENCE. The science that treats the diseases of domestic animals; more generally it covers their anatomy, breeding, and relations to man. The Royal College of V. Surgeons (1844) maintains a statutory register of qualified practitioners and the American V. Medical Assocn. was estab. in 1883. World V. congresses were held in 1863 and 1963.

VETO. Name given to the right of a sovereign, branch of the legislature, or other political power, to prevent the enactment or the operation of a law. In Britain the House of Lords has a suspensory V. over all legislation with the exception of finance measures; in theory the sovereign may V. any Act, but

WAPITI

Small, insectivorous birds, generally with plain plumage, they are found mostly in the E. hemisphere. Species found in Britain incl. the white-throat, black-cap, garden W. (genus *Sylvia*); the chiff-chaff, wood and willow wrens (*Phylloscopus*); the reed and sedge Ws. (*Acrocephalus*); and the goldcrest (*Regulus*). The American Ws. are brighter and more closely allied to the Tanagers.

WAR CRIMES. The United Nations War Crimes Commission was set up in 1943 to investigate German atrocities against Allied nationals, and at the Foreign Ministers' conference in Moscow it was agreed that criminals should be tried at the place of their crimes. For the trial of major criminals see NUREMBERG TRIALS. Major Japanese criminals were tried before the International Military Tribunal in Tokyo, and others by the legal section of the Allied supreme command.

WARD, Artemus. Pseudonym of American humorist Charles Farrar Browne (1834-67). B. at Waterford (Maine), he achieved great popularity with comic writings such as *Artemus Ward: His Book*, *Artemus Ward: His Book of Goats*, etc.

WARD, Barbara (1914-). British economist. She became in 1968 Schweitzer prof. of internat. economic development at Columbia. She m. in 1950 (Sir) Robert Jackson. Her books incl. *Policy for the West* (1951) and *The Rich Nations and the Poor Nations* (1962).

WARD, Mrs. Humphrey (1851-1920). British novelist, née Arnold, who became well known under her married name for serious didactic books, e.g. *Robert Elsmere* (1888), a study of religious doubt. She was a niece of M. Arnold (q.v.) and an opponent of women's emancipation.

WARD, Sir Leslie (1851-1922). British caricaturist, famous under the pseudonym 'Spy' for his caricatures in *Vanity Fair*.

WARE. English market town (U.D.) in Herts, on the Lea, 20 m. N. of London, best known for the 'Great Bed of W.' (mentioned by Shakespeare and preserved in the V. and A. Museum) and for the ride of John Gilpin there and back from Islington, related by William Cowper. Surgical goods, drugs, plastics, etc., are manufactured. Pop. (1961) 9,980.

WARLOCK, Peter. Pseudonym of British composer Philip Heseltine (1894-1930). B. at London, he composed about 100 exquisite songs, a few orchestral pieces, and 'The Curlew' for tenor and chamber orchestra, and under his own name wrote books on musical subjects and ed. old English music.

in the Vale of the White Horse, c. 15 m. S.W. of Oxford, the birthplace of King Alfred. Pop. (1961) 5,940.

WAPITI. Species of deer (*Cervus canadensis*), native to N. America. It is reddish-brown in colour and may stand over 5 ft. in height.

WARATAH. Australian genus of trees and shrubs of the Proteaceae family, *Telopea speciosissima* bears large heads of crimson flowers in crimson bracts.

WARBLER. Family of song birds, Sylviidae.

WARATAH

WARM SPRINGS. U.S. health resort in Georgia, c. 40 m. N.N.E. of Columbus. F. D. Roosevelt, a victim of poliomyelitis, went to W.S. to recover in 1921, revisited it a number of times, and died there.

WARNER, Rex (1905-). British author. Ed. at Wadham Coll., Oxford, where he took a 1st in classics, he then taught in Egypt and in England, and became Univ. Prof. at the Univ. of Connecticut 1964. Making his début with *Poems* (1937), he continued with 4 fantasies inspired by Kafka: *The Wild Goose Chase*, *The Professor*, *The Aerodrome* and *Why Was I Killed?* (1937-43). Then came a series of fine translations - Euripides, Aeschylus, Xenophon, Plutarch and St. Augustine - and a varied original output incl. the biographical *John Milton* (1949); the classical studies *Greeks and Trojans* (1951) and *The Greek Philosophers* (1958); and superb novels *The Young Caesar* and *Imperial Caesar* (1958-60) and *Pericles the Athenian* (1963).

WAR OFFICE. Govt. dept. formerly controlling British military affairs. The Board of Ordnance, which existed in the 14th cent., was absorbed into the War Dept. after the Crimean War and the whole named the W.O. In 1964 its essential core became a subordinate branch of the newly estab. Min. of Defence.

WARRANT OFFICER. Rank between commissioned and non-commissioned officers in the British Army, and the highest non-commissioned rank in ground trades of the R.A.F. and the R.A.F. regiment.

WARREN, Earl (1891-). American lawyer. Attorney-Gen. of California 1939-43 and gov. of the state 1949-53, he was Chief Justice of the Supreme Court 1953-69. Under him a body of liberal legal rulings, notably in civil rights, was handed down.

WARRINGTON. English industrial town (co. bor.) in Lancs, on the Mersey, 14 m. E. of Liverpool. Industries incl. soap, tanning, engineering, metal working. Pop. (1961) 75,533.

WARSAW. Cap. of Poland on the Vistula, 325 m. E. of Berlin. It is terraced above the river. The anc. city was virtually destroyed during the S.W.W., but with the help of old paintings, etc., was reconstructed on the same lines. W. dates from the 13th cent.; it replaced Cracow as cap. in 1595. It has suffered a number of sieges; in the S.W.W. it fell to the Germans 27 Sept. 1939; there was an heroic but abortive rising of its citizens against the German occupiers on 1 Aug. 1944. W. was not liberated until 17 Jan. 1945. Pop. (1966) 1,261,000. The *Warsaw Treaty* (1955) signed by U.S.S.R., Albania (excl. 1962), Bulgaria, Czechoslovakia, E. Germany, Hungary, Poland and Rumania, estab. a 20-yr. alliance on the lines of NATO.

WARSAW. The Church of the Congregation of the Blessed Sacrament was originally built by King John III Sobieski to commemorate his victory over the Turks at Vienna in 1683. After their destruction in the S.W.W. both the church and the buildings on market place in which it stands were reconstructed in the old style. Courtesy of the Polish Travel Office, 'Orbis'.

the right has not been exercised since the 18th cent. The V. is used in the Security Council of the U.N.

VIAN, Sir Philip (1894–1968). Brit. Admiral of the Fleet. In 1940 he was the hero of the *Altmark* (q.v.) incident, and in 1941 commanded the destroyers which chased the *Bismarck*.

VIANNEY, Jean. See *CURÉ D'ARS*.

VIBORG (vē'-). (1) Town in Jutland, Denmark, on V. lake, with breweries, textile and tobacco factories, etc. Pop. (est.) 25,000. (2) Swedish form of *VYBORG*.

VIBURNUM. Genus of shrubs of the honeysuckle family. *V. lantana* is the wayfaring tree and *V. opulus* the cranberry tree.

VICAR. In the C. of E. a parish priest. See *RECTOR*.

VICENTE (visen'tā), Gil (c. 1465–1536?). Portuguese poet and dramatist. He was a goldsmith and from 1502 wrote plays for the Port. court. They range from religious dramas to romantic comedies.

VICENZA (vēchen'tzah). Italian city and episcopal see in Veneto, cap. of V. prov. It has a 13th cent. cathedral and makes textiles and musical instruments. It was the Roman *Vicetia*. Pop. (1961) 97,617.

VICHY (vē'shē). Health resort with thermal springs already known to the Romans, in Allier dept., France. In 1940–4 it was the seat of Marshal Pétain's govt. — whence the phrase Vichy France, i.e. that part of France not occupied by German troops until Nov. 1942. Pop. (1962) 31,322.

VICO (vē'kō), Giovanni Battista (1668–1744). Italian philosopher. B. at Naples, he became prof. of rhetoric there in 1697 and in 1735 historiographer royal. His *Scienza Nuova* (1725) originated the philosophy of history.

VICTOR EMMANUEL II (1820–78). First king of united Italy. B. in Turin, he became king of Sardinia on the abdication of his father Charles Albert, following defeat in war with the Austrians in 1849. In 1855 he allied Sardinia with France and Britain in the Crimean War. In 1859 in alliance with the French he defeated the Austrians and annexed Lombardy. By 1860 most of Italy had come under his rule, and in 1861 he was proclaimed king of Italy. In 1870 he made Rome his capital.

VICTOR EMMANUEL III (1869–1947). King of Italy. B. at Naples, he became king in 1900 on the assassination of his father, King Humbert I. He acquiesced in the Fascist régime, but co-operated with the Allies from 1943, and in 1946 abdicated.

VICTORIA

(1819 – 1901)– Queen of the U.K. and Empress of India. Only child of Edward, duke of Kent, 4th son of George III, she was b. 24 May 1819 at Kensington Palace, and became queen in 1837 on the death of her uncle William IV. In 1840 she m. Prince Albert of Saxe-Coburg and Gotha, and had 4 sons and 5 daus., viz. Victoria Royal (1840–1901), wife of Frederick III, German

emperor; Edward VII; Alice, Grand-duchess of Hesse; Alfred, Duke of Edinburgh and Saxe-Coburg-Gotha; Helena, Princess Christian; Louise, Duchess of Argyll; Arthur, Duke of Connaught; Leopold, Duke of Albany; and Beatrice, Princess Henry of Battenberg. The Prince Consort d. in 1861, and for many years the Queen was in retirement – a fact which led to the growth of republican sentiment. Of all her Prime Ministers, Disraeli (Lord Beaconsfield) proved himself the most agreeable, and in 1876 he proclaimed her Empress of India. From 1848 she regularly visited the Scottish highlands, where she had her seat at Balmoral, built to Prince Albert's designs; another favourite home was Osborne House in the Isle of Wight. By 1887 the year of her jubilee, she had regained the public's affection, and something more than affection was shown at the diamond jubilee in 1897. A detailed picture of her life is given in her *Letters* and in her *Journal of Our Life in the Highlands*, etc. She d. at Osborne, 22 Jan. 1901, and was buried at Windsor. See illus. p. 815.

VICTORIA. A state of the Australian Commonwealth, in the S.E. of the continent. It is traversed from E. to W. by a chain of mountains, part of the Great Dividing Range; for the rest the surface is fertile lowland. Sheep grazing and agriculture are principal occupations; large areas are under orchards, vegetables and vineyards. Minerals incl. coal and gold, and oil and natural gas in the Bass Strait. Manufactures are mainly those connected with agriculture and forestry. The pop. is mainly concentrated in Melbourne (the cap.), Ballarat, Bendigo, and Geelong. Area 87,884 sq. m.; pop. (1967) 3,271,993.

V. was discovered by Capt. Cook in 1770 and was settled in the 1830s. In 1851 it was made a separate colony, after being part of N.S.W., and was named after Queen Victoria. In 1901 it became one of the states of the Commonwealth of Australia. The state legislature consists of a Governor, a Legislative Council, and a Legislative Assembly.

VICTORIA. Cap. of British Columbia, Canada, on Vancouver Is. It is a great port, an industrial centre, and a railway junction with factories making furniture, clothing, chemicals, etc., and shipyards. V. was founded as Fort V. in 1843 by the Hudson's Bay Co. and has a univ. (1963). Pop. (1966) 57,453.

VICTORIA. Cap. of Hong Kong (q.v.), commonly itself called Hong Kong.

VICTORIA, Lake. Africa's largest lake, on the equator at an altitude of 3,726 ft.; area, over 26,800 sq. m.; 255 m. long. Most important of its affluents is the Kagera, the Nile's remotest headstream; the Nile issues from it. The lake was discovered by Speke in 1858, who named it after Queen Victoria. It is partly in Uganda, in Kenya, and in Tanganyika. See *OWEN FALLS*.

VICTORIA CROSS. British decoration for conspicuous bravery instituted by Queen Victoria in 1856. It is bronze, 1½ in. in diameter, and has a crimson ribbon. Until the supply was exhausted in 1942 all V.C.s. were struck from the metal of cannon captured from the Russians at Sevastopol: they are now made from gunmetal supplied by the Royal Mint. Those eligible incl. members of the army, navy, and air force; members of the nursing services; and civilians under the direction of the 3 fighting services.

VICTORIA FALLS. Falls on the r. Zambesi on the border of N. and S. Rhodesia, S. Africa. The river is some 1,860 yds. wide, and drops over a chasm some 400 ft. deep to flow through a 100 ft. wide gorge. The Falls were discovered by Livingstone in 1855, and named after Queen Victoria.

VICTORIAN ORDER. Royal. A British order of chivalry instituted in 1896 by Queen Victoria as a reward for personal services to the sovereign. It comprises Knight or Dame Grand Cross (G.C.V.O.), Knight Commander (K.C.V.O.), Dame Commander

QUEEN VICTORIA. As she nurses the future Edward VIII, Edward VII (then Prince of Wales) and George V (then Duke of York) stand behind her.

Photo: Radio Times Hulton Picture Library.

WARSHIP. The cruiser H.M.S. Lion, seen leaving Malta, is 555 ft. long, with a beam measurement of 64 ft., and is crewed by some 720 officers and men. Her 6 inch and 3 inch guns have radar-controlled turrets and an extremely high rate of fire. Crown Copyright.

WARSHIP. A fighting ship armed and manned for war. Between the world wars the battleship (q.v.) was regarded as supreme, but became increasingly vulnerable to air attack and by 1958 the last of America's battleships, the U.S.S. *Wisconsin*, had joined the 'mothball fleet'.

The aircraft carrier (q.v.) has assumed the role of flagship, because of the superior striking power and range of its aircraft, but in the R.N. is itself being phased out by 1972. To replace it in giving naval squadrons air support economical 'mini-carriers' using vertical take-off Harrier aircraft were under consideration 1969: the Soviet *Moskva* helicopter assault carrier is on allied lines. Heaviest W. afloat, although retaining high mobility, is the U.S.S. *Enterprise* (1961) at 75,000 tons, first of its class to be nuclear-powered and with a flight-deck over 1,000 ft. long, maximum width 252 ft., and a capacity of c. 100 aircraft. The maximum speed is 35 knots: range 140,000 m.

Next in size (8–10,000 tons) is the *cruiser*, self-contained, self-sufficient and able to sail half across the world without refuelling. Sufficiently protected not to reduce their (33 knots) speed too greatly, they carry a substantial armament, and are intended to patrol the ocean highways for the defence of sea-borne trade, to search out and destroy enemy surface raiders, act as scouts for the battle fleet at sea, and maintain communication between the fleet and its base or destination. Guided-missile ships are increasingly used and are rapidly replacing conventional cruisers. During and after the S.W.W. the smaller (c. 2,000–5,000 tons) *destroyer* (intended for the destruction of torpedo-boats and submarines) and *frigate* (q.v.) have tended to merge to one group of very fast (c. 36 knots), well-armed but unarmoured escort vessels, the majority equipped for anti-aircraft and anti-submarine work.

The *submarine* (q.v.) may well be the major W. of the future, cf. its numerical preponderance in the fleet of the U.S.S.R. Conventionally powered vessels have greatly increased underwater speed and range by the 'snort' air intake, or by use of hydrogen peroxide to burn the fuel, and the world's 1st nuclear-powered sub. U.S.S. *Nautilus* (1955) has a range of 40,000 m., sufficient to encircle the globe without surfacing. In addition to torpedoes, nuclear-powered submarines are armed with 'Polaris' atomic missiles which may be fired below surface and have a range of c. 3,000 m.

WART HOG. Two species of African wild swine (*Phacochoerus aethiopicus* and *P. africanus*) which have enormous heads with a bristly mane, fleshy pads beneath the eyes, and 4 large tusks.

WARTON, Joseph (1722–1800). English poet, headmaster of Winchester 1766–93, whose verse and

Essay on the Writings and Genius of Pope (1756–82) marked an 'anti-classical' reaction. His brother, Thomas W. (1728–90), was prof. of poetry at Oxford 1757–67 and pub. the 1st *History of English Poetry* (1774–81).

WARTS. Verrucae; unsightly protuberances commonly caused by local overgrowth of skin. Ordinary warts on the hands may be removed by caustics. Another type, found on the feet, is infectious.

WARWICK, Richard Neville, earl of, called the King-maker (1428–71). English statesman. During the Wars of the Roses he fought at first on the Yorkist side, and was largely responsible for placing Edward IV on the throne. Having quarrelled with him, he restored Henry VI in 1470, but was defeated and killed by Edward at Barnet.

WARWICK. Co. town (bor.) of Warwickshire, England, on the Avon, 20 m. S.E. of Birmingham. The 14th cent. castle has a collection of paintings: the Univ. of W. was estab. 1965. Pop. (1961) 16,032.

WARWICKSHIRE. Midland county of England,

WARWICKSHIRE. On the Avon above Stratford, Charlecote Park provides a beautiful setting for a fine herd of deer. Tradition has it that Shakespeare left for London as a result of a poaching incident on the estate and satirized its owner, Sir Thomas Lucy, as Justice Shallow. Courtesy of the National Trust.

whose main rivers are the Avon and Tame. In the north lies the Forest of Arden. The county is much cultivated and possesses rich coalfields. Its industrial towns incl. Birmingham and Coventry. Warwick is the co. town; other centres are Stratford-on-Avon and Leamington Spa. 983 sq. m.; pop. (1967) 2,110,360.

WASH. The. Rectangular bay of the North Sea in England between Norfolk and Lincoln. The coast is marshy. King John lost his baggage and treasure in the W., 1216.

WASHINGTON, Booker Taliaferro (c. 1859–1915). American Negro educationist, who founded in 1881 Tuskegee Institute, a Negro co-educational college in Alabama. He wrote *Up from Slavery* (1901).

WASHINGTON, George (1732–99). 1st President of the U.S.A. B. in Virginia, he distinguished himself

as a soldier in campaigns against the French and Indians 1753–7, and was elected to the Virginia House of Burgesses. As a strong opponent of the British govt.'s policy, he sat in the Continental Congresses of 1774 and 1775, and on the outbreak of war was chosen C-in-C. For the course of the war see AMERICAN INDEPENDENCE, WAR OF. After the war he retired to his estate, Mount Vernon, but in 1787 he re-entered politics as president of the Constitutional Convention. He was elected President of the U.S.A. in 1789, and re-elected in 1793, but refused to serve a

GEORGE WASHINGTON. A commanding portrait by Gilbert Stuart of the 6 ft. 3 in. president. Courtesy of the New York Historical Society, N.Y. City.

(D.C.V.O.), Commander (C.V.O.), Member (M.V.O.). 'VICTORY.' British battleship, 2,164 tons, launched in 1765, and now in dry dock in Portsmouth harbour. She was the flagship of Nelson at Trafalgar.

VICUNA (vikoon'ya). A small ruminant (*Lama vicugna*) which lives in herds on the Andean plateaux. Its soft brown wool is used in textile manufacture.

VIDOCQ (vēdok'), François Eugène (1775–1857). French detective. B. at Arras, he was a criminal, but in 1809 enlisted as a spy in the Paris police. He rose to be chief of the detective dept.

VIENNA. Capital of the Austrian republic, on the Danube at the foot of the Wiener Wald. It consists of an old city, nearly circular, whose former fortifications were replaced (1860) by the Ringstrasse. The cathedral of St. Stephen dates from the 13th cent. The Hofburg, the former imperial palace, contains the national library. Among the notable buildings are the houses of parliament (1883), the royal palace of Schönbrunn (started 1696); the Rathaus (1873–83); the univ., founded 1365; the Burgtheater, many museums, etc. V. was until 1918 the cap. of the Austro-Hungarian Empire and the commercial centre of eastern Europe. It became the Habsburg capital in 1278. In 1934 it was the scene of a Socialist and of a Fascist rising. V. suffered much destruction during fighting in the S.W.W., after which it was divided into

VIENNA. Across the Helden Platz, looking from the roof of the Neue Hofburg, and beyond the trees of the Ring, are the Parliament Building (1883) and (to the right) the towering pinnacles of the City Hall (1873).

Courtesy of Austrian State Tourist Department.

U.S., Brit., Fr., and Russian zones of occupation 1945–55. Pop. (1962 est.) 1,627,600.

The CONGRESS OF V. 1814–15 effected the settlement of Europe after the Napoleonic Wars.

VIENNE (vē-en'). French river which rises in Corrèze and flows 223 m. N. and N.W. to the Loire above Saumur. The town of V. in Isère dept. has engineering and textile industries. Pop. (1962) 28,162.

VIETNAM (vē-et'-). Country of S.E. Asia, comprising the former French colonies of Tonkin, Annam, and Cochinchina which were occupied by the Japanese 1941–5, and accorded independence by France 1950. Fighting between Communist forces under Ho Chi-minh and French units followed until in 1954, following a conference in Geneva, V. was divided along the 17th parallel of lat. into N.V. (Communist), cap. Hanoi, area 63,000 sq. m., pop. (1967) 17,800,000; and S.V. (democratic), cap. Saigon, area 66,281 sq. m., pop. (1967) 15,300,000. In S.V. the rule of Ngo Dinh Diem (q.v.) was followed from 1963 by a series of crisis cabinets and in 1967 a new constitution was adopted with a popularly elected pres. (Nguyen Van Thieu), senate and house of reps. The guerrilla National Liberation Front (estab. by the

Communists 1960, hence known as Viet Cong) gained strength: leaders incl. Vietminh veterans who went to N.V. in 1954, later returning, and the rank and file were variously described as ordinary S. Vietnamese or predominantly N. Vietnamese infiltrators. Increasing military aid to the guerrillas by China via N.V. and to the S.V. govt. by the U.S.A. led to dangerous international tension from 1964: see TONKIN GULF. Pres. Johnson offered to negotiate 1968, and Nixon followed up the offer.

VIGNY (vēnyē'), Alfred de (1797–1863). French poet. B. at Loches, he joined the army at 16 and had 12 years' service. His first vol. of poems appeared in

VIKINGS. Normally sailing under one large square sail, for easy manoeuvrability, particularly in battle, the Vikings relied on the high prow and stern, shown in the Oseberg ship seen here, pointed fore and aft, and on rowing power – usually about 10 oarsmen a side.

Photo: Universitets Oldsaksamling, Oslo.

1822, his prose romance *Cinq-Mars* in 1826, and his drama *Chatterton* in 1835. The title of the latter illustrates his interest in England, where he lived some years, and in 1828 he m. an Englishwoman. Some of his best poems are in *Les Destinées* (1864).

VIGO (vē'gō). Spanish seaport and naval station on V. bay in Galicia with petroleum refineries, tanneries, paper mills, distilleries, etc. Pop. (1961) 165,000.

VIIPURI. Finnish name of VYBORG.

VIKINGS. Name given to the Scandinavian 'seawarriors' who in the 8th–10th cents. raided and settled the coasts of G. Britain and W. Europe, later extending their attacks to include Spain and Italy, going as far south as Constantinople and N. Africa and as far east as Russia. See NORSEMEN.

VILLA-LOBOS (vē'lah lō'bōs), Heitor (1881–1959). Brazilian composer. By travelling widely in his native country he became familiar with its folk music, and developed a nationalistic style, particularly using orchestras of hundreds and choirs of thousands. Artur Rubenstein discovered him 1918.

VILLARS (vēlahr'), Claude Louis Hector de, duc de (1653–1734). Marshal of France, who was defeated by Marlborough at Malplaquet in 1709.

VILLEHARDOUIN (vēlahrdoo-ah'), Geoffroy de (c. 1160–c. 1213). The first historian to write in the French language. He was b. near Troyes and wrote a chronicle of the 4th crusade.

VILLEINAGE. The system of serfdom that prevailed in Europe in the Middle Ages. At the time of the Domesday Book, the villeins were the most numerous element in the English population, providing the labour force for the manors. By the 15th cent. V. had been supplanted by a system of free tenure and labour, but it continued in France until 1789.

VILLIERS DE L'ISLE ADAM (vēyā' de lēl

3rd term, setting a precedent that was followed until 1940. Although he attempted to draw his ministers from all factions, his aristocratic outlook alienated Jefferson, with whose resignation in 1793 the 2-party system originated. In his farewell address (1796) W. maintained that the U.S.A. should avoid European quarrels and entangling alliances. He d. and was buried at Mount Vernon, Virginia.

WASHINGTON. Pacific state of the U.S.A., watered by the Columbia and its tributaries. Except for the S.W. and for the Great Plain of the Columbia r. to the E., nearly all W. is mountainous. The Cascade Range runs parallel to the coast, and between Puget Sound and the Pacific are the Olympic Mts. The chief agricultural products are apples and other fruit, wheat, oats, etc. Cattle and sheep are bred. Industries incl. aircraft, ships, road transport vehicles; lumber and paper from extensive forests; processed food, chemicals, cement, and exploitation of zinc, uranium, lead, gold and silver. The cap. is Olympia; the largest towns are Seattle, Spokane, and Tacoma. W., which incl. Mt. Rainier and Olympia National Parks, was admitted to the Union in 1889. Area 68,192 sq. m.; pop. (1960) 2,853,214.

WASHINGTON. Cap. of the U.S.A., on the Potomac, coterminous with the Dist. of Columbia. The city is laid out according to a uniform plan made by Pierre L'Enfant, a French engineer officer—the 1st modern cap. city to be designed as such. Its many fine buildings incl. the Capitol, Lincoln Memorial, Washington Monument, White House, Supreme Court, Library of Congress, Department of Commerce, Pentagon (housing the War Department), Corcoran and National Galleries, and Folger Shakespeare Library. W. was founded in 1790, and has been the federal cap. since 1800. In 1814 it was burnt by the British. Most of the permanent population consists of govt. employees. Pop. (1960) 763,956.

WASP. Name of certain stinging insects in the order Hymenoptera. Of the 290 British species, only a few are true Ws. (*Vespidæ*); the rest are digger Ws. There are 7 British species of social Ws. in the genus *Vespa*, some nesting below ground, others in trees or bushes, and the largest being the hornet: all the others are solitary. Among social Ws. the queens devote themselves to egg-laying, the fertilized eggs producing female workers; the males arise from unfertilized eggs and have no sting. The larvae are fed on insects, but the mature insects feed mainly on fruit

WASPS. 1, Red-banded sand wasp; 2, common wasp; 3, greater hornet.

and sugar. In winter the fecundated queens hibernate, but the other Ws. die.

WASSERMANN (vahs'sermahn), August von (1866–1925). German prof. of medicine. B. at Bamberg, he became head of the department of experimental therapy and serum research at the Robert Koch Institute in Berlin in 1906 and, in 1913, director of the Kaiser Wilhelm Institute there. In 1907 he discovered a sero-diagnosis of syphilis (W. reaction).

WATCH. See Clocks.

WATER (H_2O). A liquid, without colour, taste, or odour; an oxide of hydrogen. W. begins to freeze solid at $0^\circ C$ and $32^\circ F$, and to boil at $100^\circ C$ and $212^\circ F$. Liquid, it is virtually incompressible; frozen, it expands by $1/11$ th of its volume. 1 cu. cm. weighs 1 gramme at $4^\circ C$, forming the unit of specific gravity. It has the highest known specific heat, and acts as an efficient solvent, particularly when hot. It

WATER. Reservoirs in the West, although often beautiful because of their surroundings, tend to be strictly functional in design. In the East, as here at Penang, a different tradition prevails. Photo: Deane.

takes the form of sea, rain, and vapour, and tempers and distributes the sun's heat, and supports all forms of land and marine life. W. covers 70 per cent of the earth's surface. Water supply in sparsely populated regions comes usually from natural springs, supplemented by pumps and wells. Urban sources are deep artesian wells, rivers and reservoirs, usually formed from enlarged lakes or dammed and flooded valleys, from which W. is conveyed by pipes, conduits and aqueducts (q.v.) to filter beds. By seeping through layers of shingle, gravel and sand, harmful organisms are removed, and the W. is then distributed (sometimes with such additions as chlorine or fluorine, qq.v.) by pumping or gravitation through mains and pipes. In towns, besides industrial demands, domestic and municipal (road-washing, sewage, etc.) needs account for c. 30 gals per head each day, and supplies are a pressing problem in dry, fast-developing areas such as California.

WATER-BUGS. Several families of aquatic hemipterous insects. They incl. the Hydrometridæ (pond-skaters) and Notonectidæ, of which the waterboatman is the chief member.

WATERBURY. City of Connecticut, U.S.A., on the Naugatuck, dating from 1674. Clocks, watches, and brass and copper ware are manufactured. Pop. (1960) 107,130.

WATER-COLOUR PAINTING. Method of painting with pigments mixed with water. Known in China as early as the 3rd cent., the art as practised today developed in England, where it was the ideal medium for the expression of shifting vagaries of weather, in the 18th cent. Artists excelling in W.C.P. incl. Sandby, Cozens, Cotman, de Wirt, Turner, Constable, Cox, Varley, Sargent, Marin, Steer, Cezanne, Signac, Dufy, Nolde, Klee, Paul and John Nash. The Royal Soc. of Painters in Water Colours was founded 1804.

WATERCRESS. Perennial aquatic plant (*Nasturtium officinale*), found in Europe and Asia, and cultivated as a salad crop.

WATERFLEA. Aquatic crustaceans in the order Cladocera. The commonest species is *Daphnia pulex*.

WATERFORD. (1) Co. town (co. bor.) and port of W. county, Rep. of Ireland, on the Suir. Pop. (1966) 29,842. (2) County of Munster, Rep. of Ireland watered by the Suir and Blackwater. The Comeragh and Monavallagh ranges rise in the N. and centre.

ahdoñ'), Philippe Auguste Mathias, comte de (1838–89). French poet, the inaugurator of the Symbolist movement. He wrote the drama *Axel*; *Isis*, a romance of the supernatural; verse, and short stories.

VILLON (vÿoñ'), François (1431–85). French poet. B. at Paris of apparently humble parentage, he dropped his own surname (Montcorbier or de Logos) to assume that of a canon – a relative who sent him to study at the Sorbonne, where he graduated in 1449 and took his M.A. in 1452. In 1455 he stabbed a priest in a street fight and had to flee the city. About this time he was a member of the Brotherhood of the Coquille, using their argot in some half dozen of his ballades. Pardoned the next year he returned to Paris – the *Petit Testament* belonging to this time – but was soon in flight again after robbing the Collège of Navarre, and was briefly at rest at the court of the duke of Orléans until sentenced to death for an unknown offence from which he was saved by the amnesty of a public holiday. Theft and public brawling continued to occupy his time, in addition to the production of the *Grand Testament* (1461), but in 1463 a sentence of death in Paris, which he managed to have commuted to 10 yr. banishment, is the last that is really known of him. His satiric humour, matchless pathos, and fertile lyric power make him a world poet.

VILNIUS. Cap. of Lithuanian S.S.R. An important fortress already in the 12th cent., cap. of Lithuania from 1323, Polish 1447–1795 (when Russia annexed it) and a centre of Polish and Jewish culture, it was claimed by both Poland and Lithuania after the F.W.W. V. was given to Poland 1921, occupied by Russia 1939, and immediately transferred to Lithuania. Pop. (1967) 317,000. The Russian form Vilna is often used.

VIMY. Small French town in Pas-de-Calais dept. Pop. (1962) 3,009. V. Ridge nearby, a spur of the ridge of Notre Dame de Lorette, 5 m. N. by E. of Arras, was taken by Canadian troops during the battle of Arras, April 1917: 11,285 Canadians were lost.

VINCENT DE PAUL (1576–1660). French R.C. saint. B. in Gascony, he was ordained in 1600, was captured by Barbary pirates and was a slave in Tunis until 1607. He founded the Lazarists (q.v.) and a sisterhood of charity. He was canonized in 1737.

VINE. A climbing plant (*Vitis vinifera*) of the family Vitaceae, a native of Asia Minor, cultivated from antiquity for its fruit, which is eaten or made into wine (q.v.) or other fermented drinks; dried fruits of certain varieties are raisins and currants.

VINEGAR. A weak solution of acetic acid containing salts and colouring matter. White V. is obtained from inferior wines, malt V. from beer.

VINLAND. Norse name for the Hudson Straits/Gulf of St. Lawrence area of N. America, which Lief Ericsson (q.v.) believed an 'island-continent'.

VIOL. Family of bowed musical instruments, resembling the violin, but with a flatter back.

VIOLET (*Viola*). Large genus of plants which includes the sweet V. (*V. odorata*), dog V. (*V. canina*), wild pansy (*V. tricolor*), and the viola (*V. cornuta*).

VIOLIN. A stringed musical instrument played with a bow. It superseded the viol from the 17th cent.; famous early makers were the Amati family in Cremona, Stradivari, and G. A. Guarneri. It consists of a resonant body comprising belly and back, a neck with fingerboard attached and 4 catgut strings carried

from a tailpiece over a bridge to tuning-pegs on the neck. The Viola is slightly larger and thicker than the violin; like the violin it is tuned in 5ths, but is a 5th below. The Violoncello is much larger than either of the above and is held between the player's knees. The Double Bass is the largest of the family.

VIPER. Family of poisonous snakes. The true Vs. (*Viperinae*), abundant in Africa and S.W. Asia, incl.

COMMON VIPER

VIRCHOW (vēr'khō), Rudolf (1821–1902). German pathologist. B. in Pomerania, he was a prof. at Berlin and from 1880 leader of the opposition to Bismarck in the Reichstag. His *Cellular Pathology* (1858) opened a new chapter in pathology.

VIRGIL (Publius Vergilius Maro) (70–19 B.C.). Roman poet. B. near Mantua, he belonged to the yeoman class whose life he eulogized in his poems. His *Eclogues*, 10 pastoral poems, appeared in 37 B.C. The *Georgics* or 'Art of Husbandry' followed in 30 B.C. and confirmed his position as the chief poet of the age. The last years of his life were spent in composing the *Aeneid*, an epic poem in 12 books intended to glorify the Julian dynasty whose head was Augustus, V.'s imperial patron. Horace was his friend. His superbly musical and moving gift of language ensured his acceptance as the voice of imperial Rome for succeeding cents., and by the 3rd cent. his works were used for divination – the *Sortes Virgilianae*. The apparent forecast of the birth of Christ in the 4th eclogue led to his acceptance as an 'honorary' Christian by the medieval Church and hence as approved reading, and in popular legend he became a powerful magician.

VIRGINIA. One of the 13 original states of the U.S.A., in the S. Atlantic group. It comprises a coastal plain, the Piedmont plateau, and the Allegheny Mts. Chief rivers are the Potomac, Rappahannock, York,

VIRGINIA. Washington's home at Mount Vernon, where he lived from 1759 until his death, is now a national shrine. Courtesy of United States Information Service

and James. The chief crops are sweet potatoes, corn, tobacco, apples, peaches and peanuts. Coal is mined, and growing industries incl. furniture, paper, chemicals, processed food, textiles and cigarettes. There are also shipyards and a fishing industry. The cap. is Richmond; other towns are Norfolk, Roanoke, Portsmouth, and Newport News. Area 40,815 sq. m.; pop. (1960) 3,966,949.

V. was named in honour of Elizabeth I; it was settled in 1607. the first permanent English settlement

VIOLIN and CELLO

WATERFORD. Nearly 100 ft. high, the 12th century round tower of ruined St. Declan's church on Ram Head at Ardmore is an almost perfect specimen among these detached campaniles which served as watchtowers and keeps in the times of the Norse raiders. For security's sake the entrance door was placed 13 ft. from the ground.

Courtesy of the Irish Tourist Board.

Cattle raising, brewing and distilling are the chief occupations. Area 710 sq. m.; pop. (1966) 73,080.

WATER LILY. Aquatic plants in the family Nymphaeaceae. The fleshy roots are embedded in the mud and the large round leaves float on the water. The beautiful flowers may be white, pink, yellow or blue: the white *Nymphaea alba* and yellow *Nuphar luteum* are common in Great Britain, and the *Victoria regia*, with leaves about 6 ft. in diameter, occurs in the Amazon. See LORUS.

WATERLOO. Village 8 m. S. of Brussels. Nearby, on 18 June 1815, Wellington defeated Napoleon. Wellington had 68,000 men, of whom 24,000 were British, the remainder being German, Dutch, and Belgian, and Napoleon 72,000. During the last stage of the battle Wellington was supported by the Prussians under Blücher.

WATERLOO CUP. The most important greyhound race in England, known as 'the courser's Derby', and named after the Waterloo Hotel, Liverpool, whose proprietor originated the race in 1836. It is held annually, usually in Feb.

WATER POWER. See HYDRO-ELECTRIC POWER.

WATFORD. English market town (bor.) in Herts, on the Colne and the Grand Union Canal. Printing, brewing, malting, corn milling and iron founding are important industries. The church of St. Mary dates from 1230. Pop. (1961) 75,630.

WATSON, John Broadus. See BEHAVIOURISM.

WATSON-WATT, Sir Robert (Alexander) (1892–). British physicist. During a long career in govt. service (1915–52), he proposed in 1935 a method of radiolocation of aircraft—later developed into radar—a key contribution to the S.W.W. He was deputy chairman of the Radio Board of the War Cabinet 1943–6, and subsequently was a scientific consultant in the U.S.A. and U.K. He was knighted in 1942.

WATT, James (1736–1819). Scottish engineer. B. at Greenock, he became mathematical instrument maker to Glasgow univ. in 1757. While repairing a model of Newcomen's steam engine in 1764, he devised an exterior condenser to eliminate the loss of power involved in the engine. Patented in 1769, the invention was applied to engines which W. and Boulton manufactured near Birmingham.

WATT. Electrical unit of power. In the c.g.s.

system, it is work done at the rate of 1 joule or 10^7 erg per second, or the amount of energy expended per second by a current of 1 ampere under a p.d. of 1 volt. The power in Ws. is found by multiplying the current in amperes by the p.d. in volts.

WATTEAU (vahtō'), Antoine (1684–1721). French painter. B. in Valenciennes, he went to Paris in 1702, and under the influence of the Flemish genre painters painted scenes of tavern and of military life. He later became famous as a painter of the *fête galante*. He was admitted to the French Academy in 1717 and visited London in 1719.

WATTLE. Name given in Australia, where the fluffy golden flowers are the national emblem, to certain species of *Acacia* (q.v.). Wonderfully adapted to drought conditions, the specially tough leaves further avoid loss of water through transpiration by turning their edges only to the direct rays of the sun. The Ws. are used for tannin and fencing.

WATTS, George Frederick (1817–1904). British artist. B. in London, he studied in the R.A. Schools. In 1864 he m. Ellen Terry: later the marriage was dissolved. In 1867 he was elected R.A. He painted allegorical, biblical, and classical subjects, and portraits, many of which are in the National Portrait Gallery, and others in the Watts art gallery at Compton, nr. Guildford. As a sculptor he executed 'Physical Energy' for Rhodes' grave in S. Africa, and a replica in Kensington Gardens.

WATTS, Isaac (1674–1748). British Nonconformist churchman and hymn-writer. He wrote 'O God, our help in ages past', and other hymns.

WATTS-DUNTON, Walter Theodore (1832–1914). British writer, author of *Aylwin* (1898) a novel of gypsy life, poems and critical work. He was a close friend of Swinburne, who shared his house at Putney for many years, Rossetti and Borrow, cf. *Old Familiar Faces* (1915).

WAUGH, Evelyn Arthur St. John (1903–66). British novelist. Ed. at Oxford, he later became an R.C. and pub. studies of Edmund Campion and Ronald Knox. During the S.W.W. he served with distinction. His novels incl. satirical studies such as *Decline and Fall* (1928), *Vile Bodies*, *Put Out More Flags*, and *The Loved One* (1948); also *Brideshead Revisited* (1945), a serious work. His brother, Alec W. (1898–), was ed. at Sherborne and Sandhurst. He served in the army 1917–18 and also 1939–45. Among his works are *The Loom of Youth* (1917), *No Truce with Time*, and *Island in the Sun* (1956). Auberon W. (1940–), son of Evelyn, is a Tory and R.C., and has written witty novels incl. *Consider the Lilies* (1968).

WAVELL, Archibald, 1st earl (1883–1950). British field marshal. He served in the F.W.W. and was appointed C.-in-C. Middle East in July 1939. He conducted the N. African war against Italy 1940–1, and achieved notable successes there as well as in Ethiopia. W. was transferred to C.-in-C. India in July 1941, and succeeded Lord Linlithgow as viceroy (1943–7), being created visct. in 1943.

WAVERLEY, John Anderson, 1st visct. W. (1882–1958). British administrator. B. in Edinburgh, he had a distinguished Civil Service career, was Gov. of Bengal 1932–7, and in 1938 was elected 'National' M.P. for the Scottish Univs. A few months later, as Lord Privy Seal, he organized Civil Defence and in 1939 became Home Sec. and Min. for Home Security (the nationally distributed home outdoor—Anderson—air-raid shelters were named after him). He became Lord Pres. of the Council in 1940 and was Chancellor of the Exchequer 1943–5. He was knighted in 1919 and created a visct. in 1952.

WAXWING. Family of birds (*Ampelidae*) found in the northern hemisphere. The Bohemian W. (*Ampelis garrulus*) is greyish-brown above with a reddish-chestnut crest, black streak at the eye, and variegated wings with 'wax tips'. See illus. p. 1084.

in N. America. It took a leading part in the revolutionary struggle against England, and was a Confederate state in the American Civil War.

VIRGIN ISLANDS. Group of c. 50 islands in the West Indies, of which St. Thomas, St. Croix, and St. John were bought by U.S.A. from Denmark in 1917. The cap. is Charlotte Amalie on St. Thomas. Area 133 sq. m.; pop. (1960) 32,099. The other V.Is. are a Brit. colony, cap. Road Town on Tortola. Under the 1967 constitution govt. is exercised through the Chief Minister, advised by an Executive Council, and there is a Legislative Council with elected majority. Area 59 sq. m.; pop. (1967) 8,895.

VIR'US, or Filter-passing Viruses. Organisms so small that they pass through the bacterial filter. They were first discovered in 1898. Diseases carried by them are foot-and-mouth, rabies, yellow-fever, canine distemper, smallpox, typhus, mumps, &c.

VISBY. Swedish town, capital of Gotland (q.v.), and in the Middle Ages a Hansa town. It lies 115 m. S. of Stockholm. Pop. (est.) 16,000.

VISCONTI, Luchino (1906–). Italian film and theatrical director. B. in Milan, of an aristocratic family, his 1st film *Obsessione* (1942), the 1st Italian 'neo-realist' film, was followed by *La Terra Trema* (1948), a documentary about Sicilian fishermen, *Senso* (1954), and *Rocco and his Brothers* (1961); their powerful social comment has led to violent controversy with the Italian govt. and the R.C. Church. Other films incl. *The Leopard* (1963). He is also famous for his theatrical and opera productions at Milan.

VISCOSITY. The internal friction or resistance to relative motion of the parts of a fluid. Fluids like pitch, treacle and heavy oils are highly viscous, but a perfect fluid would be non-viscous.

VISCOUNT. In the peerage of the United Kingdom, the 4th degree of nobility, between earl and baron.

VISHNU (vish'noo). Second of the 3 gods constituting the Hindu triad. He is the Preserver, and is believed to have assumed human form on a number of occasions; 10 of such avatars or incarnations are described, the most famous being as Rama and as Krishna. His worshippers are the Vaishnavas (q.v.).

VISIGOTHS. See **GOTHS**.

VISTŪLA. Polish river which rises in the Carpathians and runs S.E., across Poland to the Baltic at Gdansk. Length 678 m.

VITAMINS. Organic substances normally present in small and variable amounts in different foods and of which the absence or partial deficiency in the diet leads to various characteristic diseases and disturbances. Although in 1662 Admiral Hawkins was aware of the value of 'sower oranges and lemons' against scurvy, it was not fully estab. until about 1915 that several deficiency diseases were preventable and curable by extracts from certain foods. By then it was known that two groups of factors were involved, one being water-soluble and present, for example, in yeast, rice-polishings and wheat-germ, and the other fat-soluble and present in egg-yolk, butter, fish-liver oils and so on. The water-soluble substance, known to be effective against beri-beri, was named vitamin B. (The name 'vitamine' later changed to 'vitamin' was chosen to indicate it was an amine and essential to life.) The fat-soluble vitamin complex was at first called vitamin A. With improving analytical techniques these have been subsequently separated into their various components, and others have been discovered. Not all are amines, but the term V. remains.

Of some 20 known Vs., the majority are found in different related forms, and are prepared industrially either by extraction from natural sources, or artificially by chemical synthesis. As their structures have been identified, most of them are now known by their chemical names; thus vitamin C (anti-scurvy) is ascorbic acid, vitamin B₁ (anti beri-beri) is thiamine, vitamin D₂ (anti-rickets) is calciferol, and so on.

Vitamin B₁₂, (cobalamine), active against pernicious anaemia, and vitamin K (phylloquinone), effective in a particular haemorrhagic disease, are further examples.

VITEBSK (vĕtebsk'). Town, dating from the 10th cent., in White Russian S.S.R., on the Dvina. It manufactures glass, boots and shoes, etc. It has been Lithuanian, Russian, and Polish. Pop. (1967) 194,000.

VITÓRIA. City in N. Spain, cap. of Alava prov. Here in 1813 Wellington defeated the French. Pop. (1965) 105,358.

VITRIOL. Oil of V. is sulphuric acid; blue, green, and white Vs. are copper, ferrous, and zinc sulphate respectively.

VITTÓRIO VENETO (ven'etō). Italian town in Veneto which gives its name to the final victory of the Italians and British over the Austrians in Oct. 1918. It makes motor-cycles, agricultural machinery, furniture, paper, textiles, etc. Pop. (est.) 14,000.

VITUS. Christian saint, supposed to have been a Sicilian who was martyred at Rome early in the 4th cent. His aid is invoked in Catholic lands against the nervous complaint called St. Vitus' Dance (q.v.).

VIVISECTION. See **ANTI-VIVISECTION**.

VIZCAYA. Basque form of **BISCAY**.

VLA'DIMIR (c. 956–1015). Russian saint. As grand-duke of Kiev, he was converted to Christianity in 988, m. a Christian princess, and Christianized his subjects.

VLADIVO'STOK. City and port of the R.S.F.S.R. in the Far East, on Amur Bay; it is the most important naval and commercial centre on the Russian Pacific coast, and is kept open by icebreakers throughout the year. Pop. (1967) 379,000.

VLAMINCK (vlamink'), Maurice de (1878–1958). French artist. B. in Paris, he was persuaded to take up painting as a career by Derain, and became famous for his landscapes, often scenes in snow. He also wrote poetry, novels and essays.

VLISINGEN. Dutch form of **FLUSHING**.

VLONĒ (vlon'a). Albanian town and port, site of the declaration of independence by Albania in 1912. It had been Turkish since 1464. Pop. (1960) 45,350.

VODKA. The Russian national drink; a strong colourless liquor distilled from rye, potatoes, maize, and barley.

VOICE. Sound produced by the passage of air between the vocal cords, 2 folds of mucous membrane stretched across the larynx. The sound is much amplified by the hollow sinuses of the face, and is articulated by the muscles of the tongue and cheek. The use of the V. is controlled by the brain, and it will be lost or impaired if the speech centres are damaged.

VOLCĀNO. A vent in the earth's crust from which

VOLCANO. White Island in the Bay of Plenty, off North Island, New Zealand. The crater formation, fringe vegetation and thermal activities are clearly seen.

Courtesy of the High Commissioner for New Zealand.

WAXWING. The cedar waxwing (*A. cedrorum*) is purplish-cinnamon above, with grey wings tipped with the red horny appendages which give its name. It feeds on berries, particularly those of the red cedar. Photo: G. Ronald Austing.

WAZIRISTAN. Tribal territory of W. Pakistan, on the border with Afghanistan. The inhabitants, Waziris and Mahsuds, are warlike, and are a source of trouble to Pakistan, as formerly to British India. Area 5,700 sq. m.

WA'ZYK (vazik), Adam (1905–). Polish writer. B. in Warsaw, he made his name with *Poem for Adults* (1955), a protest against the régime which preceded the fall of the Stalinists in 1956. In 1957 he resigned with others from the party, disappointed in Gomulka's illiberalism. He is also a novelist and playwright.

WEALD (wæld). District of S.E. England between the N. and S. Downs, comprising parts of Kent, Sussex, and Surrey. Its name is from an Anglo-Saxon word meaning wooded tract, but most of the trees which once covered the W. were cut down as fuel for the olden Sussex ironworks. It is occupied by grazing land, hop gardens, and orchards.

WEASEL. Carnivorous mammal in the family Mustelidae, feeding mainly on mice, voles and rats.

The common W. (*Mustela nivalis*) of Europe and Asia has an elongated body, short legs and tail. The fur is red-brown above and white beneath, but in winter in cold climates is wholly white, acting as camouflage against snow. There are several American species.

WEATHER. See METEOROLOGY.

WEATHERHEAD, Leslie D. (1893–). British Methodist minister. Minister of the City Temple, London, 1936–60, he is noted for his interest in psychology as a practical help to living and the interpretation of religion. His books incl. *A Plain Man Looks at the Cross* and *The Resurrection of Christ in the Light of Modern Science and Psychological Research*.

WEAVING. The production of fabric by means of a loom. It is a craft of world-wide distribution since ancient times, and the products of Egypt and Assyria can compare with modern output. The basic process is the interlacing at right angles of longitudinal threads (the warp) and crosswise threads (the weft), the latter being carried across from one side of the loom to the other by the shuttle. Hand-loomes may be horizontal or vertical—the latter being the type which has developed industrially in the West—and are still used, e.g. in the manufacture of tweeds in the British Isles. Of great importance in the hand-loom era was the Jacquard machine, the last in a series of inventions

for producing complicated designs, which was perfected in the early 19th cent. The power-loom (1786) was essentially the invention of the English clergyman, Edmund Cartwright. There have been many subsequent improvements, but one of the hindrances to yet further increased speed has been the time taken by the passage of the shuttle: in the 1960s there were experiments in Japan with the propulsion of the weft by water-jet.

WEBB, Sir Aston (1849–1930). British architect, designer of the new front of Buckingham Palace; Admiralty Arch; the chief section of the Victoria and Albert Mus.; and Britannia Royal Naval College. He was pres. of the R.A. 1919–25.

WEBB, Mary (1882–1927). British novelist. B. in Shropshire, she wrote of country life and characters, e.g. *Precious Bane*, which became known through a recommendation by Earl (Stanley) Baldwin.

WEBB, Matthew (1848–83). English swimmer. B. in Shropshire, he was the first to swim the English Channel, in 21½ hours, in 1875. He was drowned in trying to negotiate the Niagara rapids.

WEBB, Sidney. See PASSFIELD, LORD.

WEBER (veh'ber), Carl Maria von (1786–1826). German composer. B. in Eutin, he became kapellmeister at Breslau (1804–6), Prague (1813–16), and Dresden, (1816). The originator of the romantic opera, he composed *Abu Hassan* (1811), *Der Freischütz* (1820), *Euryanthe* (1823), as well as instrumental and piano-forte works. He d. during a visit to London where he produced his opera *Oberon*, written for the Covent Garden theatre.

WEBSTER, Daniel (1782–1852). American statesman and orator. B. in New Hampshire, he sat in the House of Representatives from 1813, and in the Senate from 1827, at first as a Federalist and later as a Whig. He became Sec. of State 1841–3 and 1850–2, and negotiated the Ashburton Treaty (1842) which fixed the Maine-Canada boundary.

WEBSTER, John (c. 1580–c. 1625). English dramatist. He wrote *The White Devil* and *The Duchess of Malfi*, usually considered the greatest English tragedies outside Shakespeare, and the tragicomedy *The Devil's Law Case*.

WEBSTER, Noah (1758–1843). American lexicographer, b. in Connecticut. His *American Dictionary of the English Language* (1828) standardized American deviations from English spelling.

WEBSTER, Thomas (1800–86). British artist. With J. C. Horsley (q.v.) a leader of the Victorian domestic school of painting, specializing in such subjects as 'The Dame's School' and 'Village Gossips'.

WEDDELL, James (1787–1834). British Antarctic explorer. In 1823 he reached 75° S. lat. and 35° W. long. The W. Sea is named after him.

WEDEKIND (veh'dekint), Frank (1864–1918). German dramatist. B. at Hanover, he became in succession journalist, advertising agent, book-keeper to a circus, and actor and producer. He achieved fame with *Frühlings Erwachen*, *Der Marquis von Keith*, *Die Büchse der Pandora*, etc. Many of his writings gave offence on account of alleged pornographic tendencies.

WEDGWOOD, Dame Cicely Veronica (1910–). British historian. Dau. of Sir Ralph W. (1874–1956), the railway administrator, she is an authority on the 17th cent. and has pub. fine studies of *Srafford* (1935), *Cromwell* (1939), *William the Silent* (1944), *Richelieu and the French Monarchy* (1949), *Montrose* (1952), *The King's Peace* (1955), and *The King's War* (1958). Created D.B.E. 1968, she was awarded the O.M. 1969.

WEDGWOOD, Josiah (1730–95). British potter. B. at Burslem, Staffs, where he estab. his factory (Etruria) in 1759, he is most celebrated for his jasper ware, a type of unglazed porcelain with the general properties of basalt, capable of being coloured throughout (blue, green or black), with the design in bas-relief in white. From 1775 he employed Flaxman

till May. The Kiel canal links the B. and the North Sea, and the Göta canal connects the two seas by way of the S. Swedish lakes.

BALTIC, Battle of the (1801). Name given to the naval battle fought off Copenhagen on 2 April 1801, in which a British fleet under Sir Hyde Parker, with Nelson as second-in-command, annihilated the Danish navy.

BALTIC PORT. English name of **PAIDISKI**, translation of its German name **Baltisch Port**.

BALTIC STATES. Collective name sometimes used for Estonia, Latvia, and Lithuania (qq.v.).

BALTIMORE. City and port of U.S.A. and largest city in Maryland State, on the W. shore of Chesapeake Bay, at the mouth of the Patapsco, 38 m. N.E. of Washington. Named after the founder of Maryland, Lord Baltimore (1606-75), the city of B. dates from 1729 and was incorporated in 1797. It is an important commercial, industrial, and educational centre. A road tunnel under B. harbour (opened 1957) relieved a bottle-neck between Washington and N.Y. Pop. (1967) 913,000.

BALUCHISTAN (baloochistahn'). A large, sparsely inhabited, mountainous area of Asia, part of W. Pakistan. It is contiguous on the W. with Persia and Afghanistan. Before 1947 it consisted of (i) British Baluchistan, ceded to Britain 1876, 1879, 1891 (9,084 sq. m.); (ii) British leased and tribal territories (45,372 sq. m.); (iii) the states of Kalat (cap. Quetta), Makran, Las Bela, and Kharan (79,546 sq. m.). British controlled B. was included in Pakistan in 1947, the states joined that country in 1948. B. was in 1955 formed into two divisions of W. Pakistan, Quetta (area 53,115 sq. m.; pop. 1961, 633,118) and Kalat (area 72,944 sq. m.; pop. 1961, 530,893). The majority of the people are Moslems and many are nomads; the desert country and poor rainfall limit possibilities for agriculture. Coal and chromite are worked, and natural gas is being piped from Sui in the N.

BALZAC (bahlzakh'), Honoré de (1799-1850). French novelist. B. at Tours, the son of the director of the city hospital whose real name was Balssa, he studied law and worked as a notary's clerk in Paris, but turned to literature. His 1st attempts included tragedies such as *Cromwell* and novels pub. pseudonymously with no great success. A venture in printing and publishing (1825-8) involved him in a lifelong web of debt, but in 1829 he achieved his 1st success with *Les Chouans* and *Physiologie du mariage*. This was the beginning of the long series of novels the *Comédie humaine*, which according to the complete plan of 1842 was to consist of 143 vols. depicting 19th cent. French life in every conceivable aspect, but of which only some 80 were completed. They incl. studies of human folly and vice such as the miser in *Eugénie Grandet* (1833), the monomaniac of *La recherche de l'absolu* (1834), the weak loving father of *Père Goriot* (1834), the jealous *Cousine Bette* (1846), and the acquisitive *Cousin Pons* (1847); and analyses of professions or ranks such as the commercial traveller of *L'illustre Gaudissart* (1833), the doctor of *Le médecin de la campagne* (1833), the great business man of *La maison de Nucingen* (1838), and the cleric of *Le curé de village* (1839). Apart from the novels stand the collection of Rabelaisian *Contes drôlatiques* (1833).

In 1833, before the death of his patroness, Mme de Berny, who figures in *Le lys dans la vallée* (1836), B. met the Polish countess Evelina Hanska; he m. her 4 months before his death in Paris. He was buried in Père Lachaise cemetery.

BALZAC, Jean-Louis Guez de (1594-1654). French writer. B. near Angoulême, he was one of the first members of the *Académie Française*; his *Lettres* (1624) had a great influence on French prose.

BALZAN, Eugenio (1874-1953). Italian philanthropist, managing editor of *Corriere della Sera*, Milan, for 30 years. His fortune was used by his dau.,

at his request, to estab. the *Eugenio B. Foundation* in 1962. Prizes are awarded annually either individually in (1) literature, art, philosophy; (2) peace, the humanities; (3) natural science; or one single prize. Single prizes went to the Nobel Foundation (1962) and to Pope John (1963).

BAMBERG. German city on the Regnitz. 33 m. N. of Nuremberg, Bavaria. The cathedral, built by Henry II in 1004, contains sculptures of the 13th cent., and the castle is renowned. Pop. (1960) 73,547.

BAMBOO. Group of plants (*Bambuseae*), belonging to the family of the grasses (*Gramineae*), found in tropical and sub-tropical countries, and remarkable for the relatively gigantic size which they attain. The stems are hollow and jointed, and can be put to a number of uses. The young shoots are eaten in China; paper is made from the stem.

BANANA (banah'na). Tropical plant (*Musa sapientum* of the family *Musaceae*) producing a fruit which has been used for human food since before written history. It originated in the moist tropical

BANANA. Known from ancient times in Asia, the banana is now cultivated extensively in other parts of the world and Queensland's fertile soil is ideal. Plants die once they have fruited and are left to rot, after being cut down, so that they enrich the soil. Courtesy of Agent-General for Queensland.

regions of southern Asia, was carried to Africa by Arab traders, established in the Canary Is. by the Portuguese about 1482, and from there was introduced to the New World. It was scarcely known in Britain prior to 1890, and the first direct shipment of a full cargo of Bs. from Jamaica reached Bristol in 1901.

The B. plant reaches 15 to 30 ft. in height; it is not a tree, because there is no wood in it. Each plant bears a single bunch of Bs., made up of 6 to 9 'hands' or clusters, each containing from 12 to 18 Bs. or 'fingers'. For export, the fruit is cut green and transported in special refrigerated ships: some is sun-dried. The greatest B. farms in the world are in Jamaica.

BANARAS. Another transliteration of **VARANASI**.

BANBURY. Town (bor.) of Oxon, England, on the Cherwell, 20 m. N. of Oxford. It is famous for its cake and ale, and also for the B. cross of the nursery rhyme, which was removed in 1602, but replaced by a new one in 1858. Pop. (1961) 20,996.

BANCA. Alternative form of **BANKA**.

BANCROFT, George (1800-91). American diplomat and historian. A Democrat, he was sec. of the navy 1845, when he estab. Annapolis as the U.S. Naval Academy, and as acting sec. of war (May 1846) was instrumental in bringing about the occupation of California, and gave the order to Zachary Taylor to cross the Texas border which started war with Mexico. He wrote a *History of the United States* (1834-76).

BANCROFT, Sir Squire (1841–1926). British actor-manager. With his wife Marie Wilton (1840–1921) he produced at the Prince of Wales's Theatre the series of plays by T. W. Robertson (q.v.), symptomatic of the transition in England to modern drama. He was knighted in 1897.

BAND. Section of the full orchestra, e.g. the string band, the woodwind, the brass and the percussion. For outdoor performances Military Bs., comprising both woodwind and brass instruments, developed in the 18th cent., and from 1857 training has been given at Kneller Hall. *Brass Bs.* grew to great popularity in England during the 19th cent., especially in the factory and colliery districts of the north. The National Brass B. contests were instituted at the Crystal Palace in 1900, and are held annually in London: famous names are those of Foden's, the Black Dyke, and the Fairey Aviation Bs. Composers of Brass B. music include Bantock, Bliss, Holst, Elgar, and Vaughan Williams.

BANDA, Hastings Kamuzu (1905–). Malawi statesman. B. in Nyasaland, at 12 he worked as an interpreter in the Rand goldmines, S. Africa, going in 1923 to the U.S. to take a degree in philosophy at Chicago and medicine at Nashville. He went to Edinburgh in 1941, taking an L.R.C.P. there, and practised in the N. of England and London for several years. During this time in London he played a leading part in founding the Nyasaland African National Congress, which he led from Ghana in 1955, returning to Nyasaland in 1958. When the state of emergency was declared there in 1959 he was arrested and the Congress declared illegal. Released in 1960, he became leader of the recently formed Malawi African Congress, taking part in the London talks on Nyasaland's new constitution, and became P.M. in 1963 and pres. of the Rep. of Malawi in 1966.

BANDAR ABBAS. Persian port on the Ormuz strait, Persian Gulf; formerly called Gombroon, it was renamed and made prosperous by Shah Abbas I (1587–1629). Its summer pop. is c. 10,000; winter, c. 15,000.

BANDARANAIKE (bondrahni'ahkah), Solomon West Ridgeway Dias (1899–1959). Ceylonese statesman. Ed. at Oxford, he was called to the English Bar, and in 1925 returned to practise law in Ceylon. An ardent nationalist he founded in 1951 the Sri Lanka Freedom Party and in 1956 became P.M., pledged to a socialist programme and a neutral foreign policy. He failed to satisfy extremists and was assassinated by a Buddhist monk. In 1940 he had m. Sirimavo Ratwatte (1916–) and on his death she entered politics, campaigning for the continuation of her husband's policies. In 1960–5 she was P.M., the 1st woman in the world to hold such office.

BANDAR SHAH. Persian port on the Caspian Sea, 200 m. N.E. of Tehran, and northern terminus of the Trans-Iranian railway. It was a lease-lend supply port for the Russian armies 1941–5.

BANDICOOT. Small marsupial mammal of the Peramelidae family, inhabiting Australia, Tasmania, and New Guinea. There are several species, approximately the size of a rabbit and mainly insectivorous. They live in burrows.

BAND OF HOPE. Juvenile temperance movement (United Kingdom Band of Hope Union), founded in Leeds in 1847 by Mrs. Ann Jane Carlile, an Irish temperance reformer, in collaboration with Jabez Tunncliffe, a Baptist minister. It is run on undenominational religious lines.

BANDUNG. City of Indonesia, a commercial centre and cap. of W. Java prov. It has technical and

medical institutions, an airfield, and a powerful radio station. Pop. (est.) 1,046,189.

BANFF. Royal burgh and holiday resort of Scotland, co. town of Banffshire, at the mouth of the Deveron. Pop. (1961) 3,329.

BANFF. Health and pleasure resort in Alberta, Canada, on the Bow. It is the railway and road centre for the Rocky Mountains national park. Lake Louise is near by. Pop. c. 2,500.

BANFFSHIRE. Maritime county of N.E. Scotland stretching from the Cairngorms to Moray Firth. Agriculture, cattle-rearing, fishing, and whisky distilling are the chief occupations. Rivers incl. the Deveron, Spey, and Avon. The co. town is Banff, and other towns are Keith, Macduff, and Buckie. Pop. (1961) 46,400.

BANG (bahng), Herman Joachim (1857–1912). Danish novelist. B. in Zealand, he became a journalist, and pub. in 1880 his first novel *Haabløse Slægter*, which was followed by many others. He was a master of the impressionistic manner, a pessimist and sceptic.

BANG, Nina Henriette Wendeline (1866–1928). Danish politician, b. at Copenhagen. A Social Democrat member of the Danish Upper House from 1918, she became the first woman cabinet minister in the world when made Minister of Education in 1924.

BANGALORE (bangaloor'). Cap. of the Indian state of Mysore, formerly the largest British cantonment in S. India. It is an important airport, railway junction, and industrial town. Pop. (1961) 907,627.

BANGKO'K. Cap. and chief port of Thailand (Siam) on the Menam, 25 m. from the Gulf of Siam. It has a royal palace, 5 univs., many industries, and an important airport. It was estab.

MRS. BANDARANAIKE

as the cap. by Phra Chao Tak in 1769, after the Burmese had burned down the former cap. Avuthia c. 40 m. to the N. also on the r. Menam Chao Phya. The temple, Wat Phra Keo, within the palace walls, contains an image in jasper of Buddha; also famous is Wat Arun with a 243 ft. high tower. Pop. (1956) 1,328,228.

BANGOR. Cathedral city, seaport, and bor. of Caernarvonshire, N. Wales, seat of the Univ. College of N. Wales. There is an export trade in slate. The cathedral, begun in 1496, was restored 1866–80. Pop. (1961) 13,977.

BANGOR. Seaside resort (bor.) on Belfast lough, co. Down, N. Ireland. 12 m. N.E. of Belfast. Pop. (1961) 23,860.

BANIM, John (1798–1842). Irish novelist, poet, and dramatist. B. in Kilkenny, the son of a farmer, he collaborated with his brother Michael (1796–1874) in tales of Irish life in imitation of Scott.

BANJERMASIN (bahnyermah'sin). Town and port of Indonesia, in Kilmantan, Borneo. It exports petroleum, rubber, etc. Pop. (1960) 130,000.

BANJO. Musical instrument usually with 4 or more strings. The notes are stopped by the left hand while the strings are plucked by the thumb or fingers of the right, or with a plectrum. It was taken to U.S.A. by Negro slaves and Negro minstrels introduced it into England about 1846.

BANKA. Island of the Rep. of Indonesia off the E. coast of Sumatra. It is one of the world's largest tin producers. Pangkal Pinang is the chief town, and Mintok the cap. and chief port. Area 4,610 sq. m. Pop. (est.) 205,000.

as a designer, but many fine portrait medallions were the work of his chief modeller William Hackwood. Very famous is his copy of the Portland Vase. Modern W. ware is an important British export. See also *illus. p. 125*.

WEDNESBURY (wenz-). English industrial town in Staffs, from 1965 divided between the co. bors. of Walsall and W. Bromwich, built on the site of a temple to Woden. Steel tubes and castings, etc., are produced. Pop. (1961) 34,511.

WEEVER. Genus of fish (*Trachinus*) found off European coasts, the greater W. (*T. draco*) and lesser W. (*T. vipera*) off Britain. They bury themselves in sand, and bathers may be wounded by treading on their poison-charged dorsal spines.

WEEVIL. Division of beetles (Rhynchophora) in the order Coleoptera. The head has a prolonged rostrum, which in the female is used to bore a hole in which to place the eggs. The larvae are white; the adult beetles of *Phyllobius* and *Polydrusus*, the common British genera, are bright green. They feed on vegetable matter. In America the granary W. (*Calandra granaria*) attacks grain, the cotton-boll W. (*Anthonomus grandis*) damages cotton crops.

WEGENER (væg-), Alfred (1880–1930). German polar explorer and geophysicist. He made 3 expeditions to Greenland and d. on a fourth, but is chiefly remembered for 'W.'s Hypothesis', expounded in *Origin of Continents and Oceans* (1915). See **CONTINENT**.

WEIGHTLESSNESS. The condition whereby there is no gravitational force acting on a body, either because gravitational force is cancelled out by equal and opposite acceleration, or the body is so far outside a planet's gravitational field that it exerts no force upon it.

WEIGHTS AND MEASURES. See *p. 1118*.

WEIHAI (wā'hi). Port in Shantung, China; also a commercial centre. It produces textiles, rubber articles, matches, soap, vegetable oils. It was leased to Britain 1898–1930, during which time it was a naval and coaling station. It was occupied by the Japanese 1938–45. Weihaiwei, its name until 1949, means awe-inspiring seafort. Pop. (1957) 222,000.

WEIL (vil), Simone (1909–43). French author. Of well-to-do Jewish Parisian family, she was for a time a schoolmistress, then plunged into working-class life, tried to help the Republicans in Spain and during the S.W.W. worked briefly for de Gaulle in London. She d. in an English sanatorium. Apart from essays, her works (advocating political quietism) were posthumously pub. incl. *The Need for Roots* (1952), *Waiting on God* (1951) and her notebooks in 1956.

WEILL (vil), Kurt (1900–50). American composer. B. in Germany, he wrote chamber and orchestral music, but is best known for the operas in which he collaborated with Brecht (q.v.), e.g. *The Threepenny Opera* (1928) (an adaptation of John Gay's *The Beggar's Opera*), with its song 'Mack the Knife', and *The Rise and Fall of the City of Mahagonny* (1930), which attacks social corruption and caused a riot at its première in Leipzig. He tried to evolve a new form of musical theatre, using subjects with a contemporary relevance and the simplest possible musical means. With the rise of the Nazis he left Germany for the U.S., where he wrote a number of successful scores for Broadway. Other important works incl. the opera *Die Burgschaft* (1931). He was m. to the singer Lotte Lenya (q.v.).

WEIMAR (vi'mahr). Town of Erfurt district, E. Germany, on the Ilm 13 m. E. of Erfurt. Before 1918 it was cap. of the grand-duchy of Saxe-Weimar, and was subsequently cap. of Thuringia. In the late 18th and early 19th cents. it was a great cultural centre and the residence of Goethe, Schiller, and Herder. Pop. (1965) 67,000.

WEIMAR REPUBLIC. Name for the republican

régime in Germany 1918–33. which was destroyed by Hitler and his followers. It took its name from the city where in Feb. 1919 a constituent assembly met to draw up a democratic constitution.

WEINBERGER (vin'berger), Jaromir (1896–1967). Czech composer. B. at Prague he taught composition in New York and Europe. His *Schwanda the Bagpiper* is the most successful of several operas.

WEIZMANN (vits'-). Chaim (1874–1952). Zionist leader – he was Pres. of Israel 1948–52 – and chemist. B. in Russia, he became a naturalized British subject, and as director of the Admiralty laboratories 1916–19 discovered a process for the manufacture of acetone. He conducted the negotiations leading up to the Balfour Declaration.

WELDING. The making of a union between pieces of metal or non-metal, at faces rendered plastic or liquid by heat or by pressure or both. Forge W., employed by blacksmiths since early times, was the only method available until near the end of the 19th

WELDING. Using a welding torch to prepare a casting in the workshops of 'Demba' at Mackenzie, 65 miles south of Georgetown in British Guiana.

Courtesy of the Demerara Bauxite Company Ltd.

cent. The principal modern processes are gas and electric-arc W., in which the heat from a gas flame or an arc melts the faces to be joined and additional 'filler metal' is usually added; and resistance W. in which the weld is formed by a combination of resistance heating from an electric current, and pressure. Recent developments incl. electric-slag and electron-beam W. processes.

WELENSKY, Sir Roy (1907–). Rhodesian statesman. B. in Salisbury, S. Rhodesia, he became a noted trade union worker among the railwaymen, and was heavyweight boxing champion of the Rhodesias. He succeeded Malvern as P.M. (1956–63).

WELHAVEN (vel'hahven), Johan Sebastian Cammermeyer (1807–73). Norwegian poet. B. at Bergen, he was prof. of philosophy at Christiania 1839–68. A supporter of the Dano-Norwegian culture, he is one of the greatest Norwegian masters of poetic form. His works incl. the satiric *Norges Daemring* (1834), songs based on folklore, etc.

WELLAND SHIP CANAL. Waterway, 25 m. long, cut through the Niagara peninsula to join Lakes Erie and Ontario, completed 1932. It is in Canadian territory. It replaced an earlier canal opened in 1832.

WELLES, Orson (1915–). American actor, producer and director. In 1933. he collaborated in founding the Mercury Theatre, N.Y., where his productions incl. a modern dress version of *Julius Caesar*. In 1938 his realistic broadcast presentation of H. G. Wells' *The War of the Worlds* caused panic among listeners. In 1940 he wrote, produced, directed and starred in *Citizen Kane*, his 1st film, and other

Orange. The son of the count of Nassau, he inherited the principality of Orange in 1544. He was brought up as a Catholic, and was appointed governor of Holland by Philip II of Spain in 1559. He opposed Philip's tyranny and intolerance, and in 1572 joined the revolt of Holland and Zeeland against Spanish rule; he accepted Protestantism in 1573, and from that time was accepted as the Dutch national leader. His policy of uniting the Protestant and Catholic provinces by religious toleration failed; the S. provinces submitted to Spain, while the N. formed a federation in 1579, and repudiated Spanish suzerainty in 1581. W. was assassinated at Delft by a Spanish agent. Though talkative, he knew how to hold his tongue on matters of importance — hence his nickname.

WILLIAM OF MALMESBURY (c. 1080–c. 1143). English historian. A monk of Malmesbury Abbey, Wilts, he compiled the *Gesta regum* and *Historia novella*, together formed a history of England to 1142.

WILLIAM OF WYKEHAM (c. 1323–1404). English churchman. B. at Wickham, Hants, he entered the royal service c. 1347. He was bp. of Winchester from 1367, Lord Chancellor 1367–72 and 1389–91. He founded New Coll., Oxford, in 1379, and Winchester Coll. in 1378.

WILLIAMS, Emyln (1905–). Welsh actor, playwright, and producer. B. in Mostyn, Flintshire, he made his stage début in 1927, and has since appeared in many plays, including his own *Night Must Fall*, and *The Corn is Green*, and gave a remarkable solo performance as Dickens in readings from the novelist (1951–2) and similarly as Dylan Thomas (1955 and 1957–8). He pub. his autobiography *George* — his own unused first Christian name — in 1961.

WILLIAMS, Sir George. See **YOUNG MEN'S CHRISTIAN ASSOCIATION**.

WILLIAMS, Roger (c. 1604–84). English colonizer. B. in London, he emigrated to Massachusetts, but was banished in 1635 for advocating religious toleration. He founded the colony of Rhode Island, on a basis of democracy and complete religious freedom, in 1636.

WILLIAMS, Tennessee. Pseudonym of American playwright Thomas Lanier W. (1911–). B. in Missouri, his work is heavy with the frustrations of life in the Deep South, espec. among his women characters, e.g. *The Glass Menagerie* (1945), *A Streetcar named Desire* (1947), *Cat on a Hot Tin Roof* (1955) and *The Night of the Iguana* (1961). He has also written a number of screen plays, e.g. *The Rose Tattoo*, and the novel *The Roman Spring of Mrs. Stone*.

WILLIAMS, William Carlos (1883–1963). Am. poet. B. in Rutherford, New Jersey, he used spare images and language, and advanced forms of verse in intellectual patterns. His earlier and later poems were collected 1950–1, and in the latter year he also pub. his *Autobiography*.

WILLIAMSBURG. City of Va., U.S.A., on a peninsula between York and James rivers, 45 m. E.S.E. of Richmond. It is the seat of William and Mary College (1693). Dating from 1632, W. was the cap. of the colony of Va. 1699–1779. Beginning 1927, it has been restored, chiefly at the expense of John D. Rockefeller Jr., to its 18th cent. appearance, incl. the costume worn by its inhabitants, and is a great show place. Pop. (1960) 6,832.

WILLIAMSON, Henry (1895–). British author, known for such stories of animal life as *Tarka the Otter* (1927).

WILLINGDON, Freeman Freeman-Thomas, 1st marquess of (1866–1941). British Liberal statesman. He entered parliament in 1900, and was raised to the peerage in 1910. He was Governor of Bombay 1913–18 and of Madras 1918–24; Governor-General of Canada 1926–30 and Viceroy of India 1931–6.

WILLIS, Ted, baron (1914–). British playwright. B. in London, he became known for his television

scripts for the police series *Dixon of Dock Green* (1953–63) and plays of working-class life such as *Woman in a Dressing Gown*, which won the Berlin Award as a film (1958). Active in socialist fields, he was in 1963 created a life peer.

WILL-O'-THE-WISP or **Ignis Fatuus**. Hovering light seen above marshy ground, possibly due to the spontaneous ignition of methane (q.v.).

WILLOW. Genus (*Salix*) of trees and shrubs in the family Salicaceae, which flourish in damp places. The leaves are lance-shaped, and the flowers appear as catkins. Among species found in Britain are the crack W. (*S. fragilis*), the white W. (*S. alba*), the goat W. (*S. caprea*), the weeping W. (*S. babylonica*; a native of China), and the common osier (*S. viminalis*). Cricket bats are made from the white W. (var. *caerulea*).

WILLOW-HERB. Genus of plants (*Epilobium*). The best-known is rose-bay W. or fireweed W. (*E. angustifolium*), common in woods and waste places. It grows to a considerable height, with long terminal racemes of red or purplish flowers.

WILLOW WREN. Small bird (*Phylloscopus colchilus*) of the Warbler group.

WILMINGTON. City and port of Delaware, U.S.A., on r. Delaware. Principal industries incl. ship-building, and the manufacture of chemicals, leather, iron and steel goods, textiles. The Swedes built Fort Christina on the site (1638); it passed to the Dutch (1655), the English (1664). Services are still held in the church of Holy Trinity (1698). W. is the H.Q. of Du Pont enterprises, which started with the foundation of a powder mill (1802) by E. J. du Pont de Nemours. Pop. (1960) 95,827.

WILSON, Angus (1913–). British author. Attached to the Foreign Office during the S.W.W., he was deputy to the superintendent of the B.M. Reading Room 1949–55, and became professor at East Anglia Univ. in 1966. His acidly humorous books incl. *Hemlock and After* (1952), *Anglo-Saxon Attitudes* (1956) and *The Old Men at the Zoo* (1961).

WILSON, Charles Thomson Rees (1869–1959). British physicist. Jacksonian prof. of natural philosophy at Cambridge 1925–34, he was in 1911 the inventor of the W. cloud chamber which enabled the path of an atom to be visibly tracked. In 1927 he shared with A. H. Compton a Nobel prize. See **CLOUD CHAMBER**.

WILSON, Colin (1931–). British author. Leaving school in his native Leicester at 16, he worked as a labourer, in a plastics factory, etc., and then caused a sensation with *The Outsider* (1956). Later he made a reputation with thrillers, e.g. *Necessary Doubt* (1964).

WILSON, Edmund (1895–). American author. B. in New Jersey, he is known for his critical works *Axel's Castle*, *The Wound and the Bow* and *Classics and Commercialism* (1951).

WILSON, Sir Henry Hughes (1864–1922). British soldier. He served in Burma S. Africa, and the F.W.W., became C.I.G.S. in 1918 and was created field marshal. He was murdered in London by Irish terrorists.

WILSON, Henry Maitland, 1st baron (1881–1964). British field marshal. He served in the S. African and F.W.W., and in 1939 became G.O.C. in C. Egypt. In 1941 he took command of the 9th Army in the Near East, became C.-in-C., Middle East in 1943, and in 1944 was Supreme Allied Commander in the Mediterranean theatre. In 1945–7 he was head of the British Joint Staff Mission in Washington. He was created a baron in 1946.

WILSON, (James) Harold (1916–). British Labour statesman. B. in Huddersfield, son of a works chemist, he lectured in economics at Oxford in 1937, became a Fellow of Univ. College in 1938, and was elected M.P. in 1945. He succeeded Sir Stafford Cripps as Pres. of the Board of Trade, but in protest against cuts in social-service spending he resigned in 1951.

film roles incl. the character of Harry Lime in *The Third Man* (1950); his film of Kafka's book *The Trial* appeared in 1963.

WELLESLEY, Richard Colley, marquess (1760–1842). British statesman. The brother of the duke of Wellington, he was Gov.-Gen. of India 1798–1805, and by his victories over the Mahrattas greatly extended the territory under British rule. He was For. Sec. 1809–12, and Lord Lieutenant of Ireland 1821–8 and 1833–4.

WELLESZ (vel'ess), Egon (1885–). Austrian composer and musicologist. As prof. of music at Vienna from 1913, he specialized in the history of Byzantine, Renaissance and modern music, and on leaving Austria settled in Oxford, where he was reader in Byzantine music 1948–56. His compositions incl. operas such as *Alkestis*; symphonies, notably the 5th (1956), ballet music, and a series of string quartets; and his writings incl. a biography of Schoenberg, and several studies of Byzantine music.

WELLINGTON, Arthur Wellesley, 1st duke of (1769–1852). British soldier and Tory statesman. B. either in Meath or Dublin, Ireland, he was ed. at Eton, and in 1787 entered the army. Going to India in 1796, he was a major-general by 1802, and achieved victories over the Mahrattas at Assaye and Argaum in 1803. These victories and his negotiation of the peace of 1803 earned him a knighthood, and he returned to England in 1805, but it was as Lt.-general and commander of the forces in the Iberian Peninsula (see **PENINSULAR WAR**) that he estab. his reputation. He defeated the French at Vimeiro, but was superseded and recalled, although he again received the command in 1809. He was made visct. W. in 1809, earl and marquess of W. in 1812, and having expelled the French from Spain in 1814 was made duke of W. He was appointed ambassador to Paris (1814–15), took part in the Congress of Vienna, and, following Napoleon's escape from Elba, defeated him at Quatre-Bras and at Waterloo (1815). This last victory made him the most influential man in Europe; he again took part in the Vienna Congress, where he opposed the dismemberment of France, and supported the restoration of the Bourbons. He commanded the army of occupation until 1818. As Tory P.M. 1828–30 he was not a success: he was forced against his will to concede Catholic emancipation, while his opposition to parliamentary reform made him extremely unpopular for a time. He was For. Sec. 1834–5, and was a member of the cabinet 1841–6. He held the office of C.-in-C. of the forces at various times from 1827, and held it for life from 1842. See **APSLEY HOUSE**.

WELLINGTON. Capital of New Zealand, in N. Island, on Cook Strait. It was founded in 1840 by Col. Gibbon Wakefield, as the first settlement of the New Zealand Co., and rises on hills in a fertile volcanic region. The residence of the Governor-General and the seat of govt. since 1865, it possesses the Houses of Parliament, Victoria univ., the national museum, and – as the seat of an Anglican bp. and an R.C. archbp. – 2 cathedrals. There is an excellent harbour, an airport, and good railway communications. Among its manufactures are woollen goods, soap, shoes, meat, and bricks. Pop. Greater W. (1967) 170,500.

WELLS, Herbert George (1866–1946). British author. B. at Bromley, Kent, son of a professional cricketer, he took his degree at the Royal College of Science, S. Kensington, taught for some years, and then made his name in science fiction with *The Time Machine* (1895), *The Invisible Man* (1897), *The War of the Worlds* (1898), etc. Next he turned to psychological and sociological novels, lively and human – *Kipps* (1905), *Tono-Bungay* (1909), *Ann Veronica* (1909) – in which sexual relationships were frankly treated and which aroused much protest – *The History of Mr. Polly* (1910), and *Mr. Brilling sees it Through* (1916).

Of his many other books, *The Outline of History* (1920) and *The Shape of Things to Come* (1933), from which a number of his prophecies were fulfilled, are notable. He exerted a vitalizing, releasing effect on his contemporaries, providing them with a new ideology.

WELLS. English city (bor.) in Somerset, 19 m. S. of Bristol. The 12th–13th cent. cathedral was built

WELLS. The cathedral, seen across the moat of the bishop's palace, is one of the loveliest in England. It was begun in the 12th century and the 160 ft. high central tower was completed early in the 14th, but the two western towers have remained incomplete.

near the site of a Saxon church. W. was made the seat of a bishopric c. 900, changed to Bath and Wells in 1244. Pop. (1961) 6,691.

WELSH. A member of the Brythonic group of the Celtic (q.v.) family of languages, known from c. 800. In 1961 about 26,223 people in Wales and Monmouthshire spoke W. only; another 656,000 W. and Eng.

The chief remains of early W. literature are contained in the Four Ancient Books of Wales – the Black Book of Carmarthen, the Book of Taliessin, the Book of Aneirin, and the Red Book of Hergest – anthologies of prose and verse of the 6th–14th cents. Characteristic of W. poetry is the bardic system of ensuring the continuance of traditional conventions: most celebrated of the 12th cent. bards was Cynddelw. The English conquest of 1282 involved the fall of the princes who supported them, but after a period of decline a new school arose in S. Wales with a new freedom in form and sentiment, the most famous poet being the 14th cent. Davydd ap Gwilym, and in the next cent. the classical metrist Davydd ab Edmwnd. With the Reformation biblical translations were undertaken, and Morgan Llwyd and Ellis Wynn o Lasynys wrote religious prose. Popular metres resembling those of England developed, e.g. the poems of Huw Morys. In the 18th cent. the classical poetic forms revived with Gronwy Owen, and the Eisteddfod movement began: popular measures were used by the hymn-writer William Williams. The 19th cent. saw few notable figures save the novelist Daniel Owen, but the foundation of a Welsh univ. and the work there of Sir John Morris Jones produced a 20th cent. revival with the poets T. Gwynn Jones, S. Roberts, W. J. Gruffydd, etc.

WELSH CORGI. Breed of dog, with a fox-like head, and pricked ears. The coat is dense and any colour except pure white. There are 2 types, the Pembroke and the heavier Cardiganshire.

WELWYN GARDEN CITY. English town (U.D.) in Herts, 20 m. N. of London, founded in 1919–20 by Ebenezer Howard. The principal industries are chemicals, electrical engineering, metal goods, clothing, and food preparation. Pop. (1961) 34,944.

HAROLD WILSON

In 1960 he had a crushing defeat when he challenged Gaitskell's party leadership, but on the latter's death succeeded him. Victorious in the general election of 1964 (increased majority 1966), he encountered opposition to his 'productivity, prices and incomes policy' within his party, but by 1969-70 had consolidated his position.

WILSON, John Leonard (1897-). British Anglican churchman. In 1953 he became bp. of Birmingham, and pres. of the Modern Churchmen's Union.

WILSON, Thomas Woodrow (1856-1924). 28th President of the U.S.A. B. at Staunton, Virginia, he became president of Princeton univ. in 1902. In 1910 he was elected Democratic governor of New Jersey, and in 1912 and again in 1916 he was elected President of the U.S.A. He initiated measures against the Trusts and secured valuable social legislation. He strove to keep the U.S.A. neutral during the F.W.W. but the German U-boat campaign forced him to declare war in 1917. In Jan. 1918 he issued his 'Fourteen Points' as a basis for a just peace settlement. At the peace conference in Paris he was successful in securing the inclusion of the League of Nations in the Treaty of Versailles. But on his return to America the treaty, though accepted by a majority of the Senate, failed to secure the two-thirds majority necessary, under the Constitution, for ratification.

WILTON. English market town (bor.) in Wilts, 2½ m. W. of Salisbury. W. House, the seat of the earl of Pembroke, was built from designs by Holbein and Inigo Jones, and is associated with Sir Philip Sidney and Shakespeare. W. has been famous for its carpets from the 16th cent. Pop. (1961) 3,404.

WILTSHIRE. S.W. co. of England, N. of Hants and Dorset. In the S. is Salisbury Plain; to the N.E. are Marlborough Downs and Savernake Forest. The principal rivers are the Kennet, Bristol Avon, and

bor. of Merton, H.Q. of the All-England Lawn Tennis Club where world-famous international matches have been held since 1877.

WINCHELL, Walter (1897-). American journalist. B. in N.Y. City, he was a columnist on the *New York Mirror* 1929-69, his bitingly satiric writings being syndicated throughout the U.S.A.

WINCHESTER. English cathedral city (bor.) in Hants on the Itchen, 12 m. N. of Southampton. It was fortified by the Romans, and became the capital of Wessex. Its cathedral (Gothic and Norman) contains the remains of Saxon kings: built on marshland it was in danger of collapse in 1905 but was saved largely by the efforts of the diver William Walker (d. 1918) who is commemorated by a bronze statue, erected 1964. Little of the Norman castle remains, but in the hall King Arthur's Round Table (so-called) is shown. W. College (1394) developed from a 7th cent. grammar school. Pop. (1961) 28,643. See illus. p. 486.

WINCKELMANN (vin'kelmahn), Johann Joachim (1717-68). German critic and archaeologist. His *History of the Art of Antiquity* (1764) estab. a new standard of aesthetic appreciation of classical art.

WINDAU. Ger. name of VENTSPILS.

WINDERMERE. Largest lake in England, in Westmorland, 10½ m. long, 1 m. wide, a tourist and fishing attraction. The town of W. (U.D.), formerly called Birtwaite, is on the E. shore. Pop. (1961) 6,556.

WINDHOEK (-hook). Capital of S.W. Africa, 180 m. E. of Walvis Bay, centre of a dairying region with cold-storage plants and an airport; there are hot springs nearby. Pop. (1960) 36,049 (19,382 white).

WINDMILL. A mill with sails or vanes which by the action of wind upon them drive machinery for grinding corn, pumping water, etc. Ws. were used in the E. in ancient times, and in Europe they were first used in Germany and the Netherlands in the 12th cent. The main types of W. are the 'post' mill, which is turned round a post when the direction of the wind changes, and the 'tower' mill which has a revolving construction at the top. In the U.S.A. a light type of W. with steel sails supported on a long steel girder shaft was introduced for use on farms.

WINDS. Name given to lateral movements of the earth's atmosphere. Along the equator there is a belt of low pressure, the Doldrums, and towards this belt the Trade Winds blow from the Horse Latitudes—high-pressure areas about 30° N. and 30° S. of the equator. In the northern hemisphere the Trade Winds blow from the N.E., and in the southern from the S.E. Also from the Horse Latitudes blow the westerlies towards the poles—N. of the equator these are S.W. winds, and S. of the equator they blow from the N.W. This theoretical arrangement is affected by the distribution of land and water. There are many local Ws., while on the margin of equatorial calms there may be developed the violent storms known as tornadoes, typhoons, etc. The force of wind is expressed by the Beaufort Scale (q.v.).

WINDSOR, Duke of. See EDWARD VIII.

WINDSOR, House of. Official name of the British royal family, adopted in place of 'the house of Saxe-Coburg-Gotha' in 1917. In 1960 Elizabeth II decided that certain of her descendants i.e. those not entitled to the prefix H.R.H., would in future use the surname Mountbatten-Windsor. See Table, p. 1006.

WINDSOR. City and lake port in Ontario, Canada, on the Detroit r., opposite Detroit, U.S.A. It is a great rail and agricultural centre and makes motor-car engines, iron and steel goods, bricks, etc. Pop. (1966) 192,544.

WINDSOR, New. English town (royal bor.) in Berks, on the Thames. It is dominated by W. Castle (q.v.), and has a 17th cent. guildhall of Wren's design. The Treaty of W., 1373, estab. a permanent alliance between England and Portugal. Pop. (1961) 27,126.

WILTSHIRE. Longleat, seat of the marquess of Bath, was built 1566-80 on the site of an ancient priory. Its library contains the earliest Shakespeare folios, its pictures include works by Titian and Raphael, and its Great Hall looks just as it did when Queen Elizabeth was entertained at the house in 1574.

Courtesy of the marquess of Bath.

Salisbury Avon. The chief crop is wheat, and much of the county is under pasture. Salisbury is the co. town; other centres are Trowbridge (admin. centre), Swindon, Devizes, and Westbury. Stonehenge and Avebury are famous prehistoric monuments. Area 1,344 sq. m.; pop. (1967) 479,080.

WIMBLEDON. District of the Greater London

WEMBLEY. District of the Greater London bor. of Brent. W. Stadium, opened in 1924, has been the scene of the British Empire Exhibition, the annual F.A. cup final, and in 1948 of the Olympic Games.

WENCESLAS (wen'seslas), St. (d. c. 929). Duke of Bohemia, who attempted to spread Christianity among his people, and was murdered by his brother. He is the patron saint of Czechoslovakia, and the 'good king W.' of the carol.

WENCHOW. Port and industrial town in Chekiang, China, at the mouth of the Wu-kiang. It was opened to foreign trade in 1877 and became prosperous, but has declined in importance. Pop. (1957) 201,600.

WENTWORTH, William Charles (1793–1872). Australian lawyer and statesman. B. in New South Wales, he led a movement which secured partial self-govt. in 1842, and responsible govt. in 1856. He founded Sydney univ. in 1852, and worked for the estab. of Australian federation.

WERFEL (ver'-), Franz (1890–1945). Austrian poet, dramatist, and novelist. B. in Prague, he lived in Germany, Austria, and France, and in 1940 escaped from a French concentration camp to the U.S.A., where he d. His works incl. the poems *Der Weltfreund*, *Wir sind*, *Der Gerichtstag*, etc.; the plays *Juarez* and *Maximilian*, *Paulus unter den Juden*, and *Das Reich Gottes in Böhmen*; and the novels *Verdi* and *The Song of Bernadette*.

WERGELAND (vår'gelahnd), Henrik (1808–45). Norwegian lyric poet. B. at Christiansand, he was the greatest leader of the Norwegian revival.

WERTH, Alexander (1901–69). British journalist. B. in St. Petersburg, he was ed. at Glasgow univ., and became foreign correspondent in Paris and Moscow for the *Guardian*, *Sunday Times*, etc., excelling in pungent comment also in his books, e.g. *America in Doubt* (1959) and *The Khrushchev Phase* (1961).

WE'SKER, Arnold (1932–). British playwright. Brought up in Hackney, London, he made his name with the trilogy *Chicken Soup with Barley*, *Roots* and *I'm Talking about Jerusalem* (1959–60), which has an earthy socialist realism derived from his own breadth of human experience as carpenter's mate, farm hand, pastry cook, etc. A later success, *Chips with Everything* (1962), is directed against a prevalent soggy lack of standards. In 1961 he became director of Centre 42.

WESLEY, John (1703–91). British founder of Methodism (q.v.). B. at Epworth, Lincs, where his father was the rector, he went to Christ Church, Oxford, and was ordained in the C. of E. in 1728. Returning to the college in 1729 as a tutor, he was one of the original band of Methodists. In 1735 he went to Georgia as a missionary. On his return he experienced 'conversion' at a service at the Moravian church in Aldersgate Street, London, on 24 May 1738, and from being a rigid High Churchman developed into an ardent Evangelical. When the pulpits of the Established Church were closed to him and his followers, he took the Gospel to the masses. For 50 years he rode about the country on horseback, preaching daily, largely in the open air, and often several times a day. He is said to have travelled 250,000 m. and preached 40,000 sermons. His literary output was great, and his sermons became the doctrinal standard of the Wesleyan Methodist Church. His *Journal* gives an intimate picture of the man and his work. His brother Charles W. (1707–88) was one of the original Methodists at Oxford and became a principal preacher and theologian of the Wesleyan Methodists. He wrote some 6,500 hymns, incl. 'Jesus, lover of my soul'. Charles's son, Samuel W. (1766–1837), was a celebrated organist, and composer of oratorios, church and chamber music.

WESSEX. The kingdom of the West Saxons, said to have been founded by Cerdic c. 500, which comprised Hants, Dorset, Wilts. Berks. Som., and

Devon. Egbert in 829 estab. West Saxon supremacy over all England. Thomas Hardy popularized the use of the term W. for the S.W. counties.

WEST, Benjamin (1738–1820). American artist. B. in Pennsylvania, he settled in London in 1763, and became pres. of the R.A. in 1792. He painted historical pictures, incl. 'The Death of Wolfe', and many early American artists studied with him: see UNITED STATES: ART.

WEST, Mae (1892–). American actress. She made her début in 1897, was popular in vaudeville, and appeared in plays, such as *Diamond Lil*, and films.

WEST, Dame Rebecca. Pseudonym of British author Cicily Isabel Fairfield (1892–). A perceptive writer on political matters, she has pub. the Yugoslav study *Black Lamb and Grey Falcon* (1942), *The Meaning of Treason* (1949), *The Vassall Affair* (1963), etc. She was created D.B.E. in 1959.

WEST BROMWICH. English industrial town (co. bor.) in Staffs, 6 m. N.W. of Birmingham. Industries incl. springs, tubes, foundries, and rolling mills. Pop. (1961) 95,909.

WESTERMARCK, Edward Alexander (1862–1939). Finnish anthropologist, noted for his studies *The History of Marriage* (1891) and *The Origin and Development of the Moral Ideas* (1906–8).

WESTERN AUSTRALIA. The largest state of the Australian Commonwealth, covering all of the continent W. of long. 129° E. Towns incl. Perth, the cap., and Fremantle, the chief port, on the W. coast, Bunbury, Kalgoorlie, Geraldton, and Albany. The chief rivers are the Fitzroy, Fortescue, Gascoyne, Murchison, and Swan. Most of the interior is desert. In 1826 a convicts' settlement was estab. at King George Sound, and in 1829 the Swan River Settlement was estab. Development came with gold strikes at Kimberley 1885 and Kalgoorlie 1893: and the state has many other minerals – iron, copper, nickel, silver, coal and oil (Barrow Island) – particularly rich discoveries being made in the 1960s. Wheat and other cereals, fruit, tobacco, and wool are produced. Large areas are irrigated for dairying and stockraising in the N. and along the S.W. coast. Responsible govt. was achieved in 1890, and in 1901 W.A. was one of the states federated in the Commonwealth of Australia. The govt. is vested in the Gov., the Legislative Council, and the Legislative Assembly. Area 975,920 sq. m.; pop. (1966) 848,100.

WESTERN ISLES. Another name for the HEBRIDES.

WEST HARTLEPOOL. See HARTLEPOOL.

WEST INDIES. An archipelago lying between the

WEST INDIES. The Caribbean is a world of its own and to meet its special conditions a cross-bred herd of Indian Brahman and Aberdeen Angus cattle have been built up on Jamaica for beef production by Alcan. Courtesy of Alcan Jamaica Ltd.

WINDSOR CASTLE. The British royal residence in the municipal borough of Windsor, Berks. It was founded by William the Conqueror on the site of an even earlier stronghold. In the Lower Ward are St. George's Chapel, a fine example of Perpendicular architecture and the chapel of the Order of the Garter; and the Albert Memorial Chapel, below which are buried George III, George IV, William IV, George V and George VI. Beyond the Round Tower or Keep is the Upper Ward containing the state apartments and the Queen's private apartments. In the Home Park adjoining the castle is Frogmore House and the Royal Mausoleum where Queen Victoria and the Prince Consort rest. Windsor Great Park, with its artificial lake, Virginia Water, lies to the south.

WINDWARD ISLANDS. Group of British islands in the W. Indies. All 4 colonies, Grenada, St. Vincent, St. Lucia and Dominica (q.v.), with the Grenadines, divided between Grenada and St. Vincent, were to have become Associated States in 1967, but internal political disagreement prevented the change of status in St. Vincent until 1969. Total area 811 sq. m.; pop. (1966) 364,000.

Other islands called W.I. are the N. group of the Cape Verde Is.; St. Martin (St. Marten), St. Eustatius, and Saba in the Lesser Antilles; Tahiti, Moorea, and Makatea in French Polynesia. The name indicates that they are in the path of the prevailing wind.

WINE. The fermented juice of ripe grapes. The yeast *Saccharomyces ellipsoideus*, which normally lives on the skin of the grape, turns the sugar into ethyl alcohol. For a dry W., fermentation is allowed to go on until the sugar is all or nearly all converted; for a sweet or medium W. the change is arrested at the appropriate time by drawing off the liquor from the grape pulp (*marc*). The quality of W. depends on the type of grape used, the soil, and the climate. The traditional treading of the grapes has been almost entirely replaced by pressing machines. See illus. p. 441.

Red W. is produced from the whole grape, white W. from the juice only. Natural sparkling (actually bubbling) Ws. have been bottled while still fermenting; sparkling champagne is artificially carbonated (natural champagne, rarely met with outside France, is still). Many palatable Ws. do not travel well, and can be found only in the place of origin. France is outstanding as a producer of W.: the finest and the widest variety come from there. Other countries producing excellent Ws. incl. Germany, Hungary, Yugoslavia, Italy, Switzerland, South Africa (where the vine was introduced by Huguenot settlers in 1688), and the U.S.A., where 90% of production is in California.

W. of a kind can be made from a great many fruits, vegetables, and flowers, and in country districts elderflower, elderberry, parsnip, dandelion, rhubarb, gooseberry, etc., Ws. are regularly made.

WINGATE, Orde Charles (1903-44). British soldier. In 1936 he estab. a reputation for his unorthodox tactics against the ex-Mufti of Jerusalem in Palestine and in the S.W.W. served under Wavell in the Middle East, and later led the 'Chindits' (q.v.) in guerrilla operations against the Japanese in Burma. He was killed in an aeroplane accident in Burma.

A village on Mt. Carmel in Israel, inaugurated 1953, was called W. after him.

WINNIPEG. Cap. of Manitoba prov., Canada, at the confluence of the Assiniboine and Red rivers. 45 m. S. of Lake W., 60 m. N. of the U.S. border. It is an important railway and financial centre. W. is a great grain market with flour mills, saw mills, foundries, meat-packing works; factories making boxes, bricks, confectionery etc.; printing and bookbinding works. It began as a fur-trading post (1763), and fur auctions are still held. Pop. (1966) 257,000.

Lake W. area 9,400 sq. m., a popular holiday resort.

WINTERGREEN. Genus of plants (*Pyrola*) in the heath family. *P. minor*, with rounded white flowers,

is a woodland plant. From the leaves of the N. American *Gaultheria procumbens* is extracted oil of W. used in treating rheumatism.

WINTERHALTER (vin'terhahltter), Franz Xavier (1806-73). German artist. B. in the Black Forest, he studied at Munich Academy, and was court painter to the Grand Duke Leopold at Karlsruhe. He painted portraits of Queen Victoria, Napoleon III, etc.

WINTERTHUR (vin'tertoor). Swiss town and spa in the canton of Zürich, 13 m. N.E. of Zürich, manufacturing rly. engines and textiles. Pop. (1961) 84,300.

WIREWORM. See CLICK-BEETLE.

WISBECH (wis'bēch). English market town and port (bor.) on the Nene, in the Isle of Ely, centre of a bulb-growing area, with fruit- and vegetable-canning factories, printing works, etc. William the Conqueror built a castle at W., which dates from the 7th cent. Pop. (1961) 17,512.

WISCONSIN. N. Central state of the U.S.A., a high plain sloping from the Great Lakes in the E. to the Mississippi. There are dense forests, esp. in the N.; and in the S. there is prairie land. W. is the premier dairying state of the U.S.A., and much of the grain produced is fed to livestock; wheat growing and milling are also important. Manufactures, based on local supplies of coal, iron, zinc and lead, incl. agricultural machinery, pumps, metal furniture, precision instruments, plumbing equipment. The chief cities are Madison, the capital, and Milwaukee. Area 56,154 sq. m.; pop. (1960) 3,951,777.

WISE, Thomas James (1859-1937). British bibliographer. He collected the Ashley Library of first editions, chiefly English poets and dramatists 1890-1930, acquired by the B.M. at his death, but is chiefly remembered for his forgeries of supposed privately printed first editions of Browning, Tennyson, Swinburne, etc. His activities were revealed by J. Carter and G. Pollard in 1934 and in 1956 it was found that he had perfected his own copies of 17th cent. plays by abstracting leaves from B.M. copies.

WISEMAN, Nicholas Patrick Stephen (1802-65). British cardinal. B. in Seville, he was rector of the English college at Rome, and became the first abp. of Westminster in 1850.

WYSHART, George (c. 1513-46). Scottish Protestant reformer, burned for heresy at St. Andrews. He was closely associated with Knox.

WISTARIA. A climbing shrub (*Wistaria chinensis*) in the family Leguminosae, native to China. It has racemes of pale mauve flowers, and pinnate leaves.

WISTER, Owen (1860-1938). American novelist. B. in Philadelphia, a grandson of Fanny Kemble, he was famous for stories of cowboys in the American west, e.g. *The Virginian* (1902).

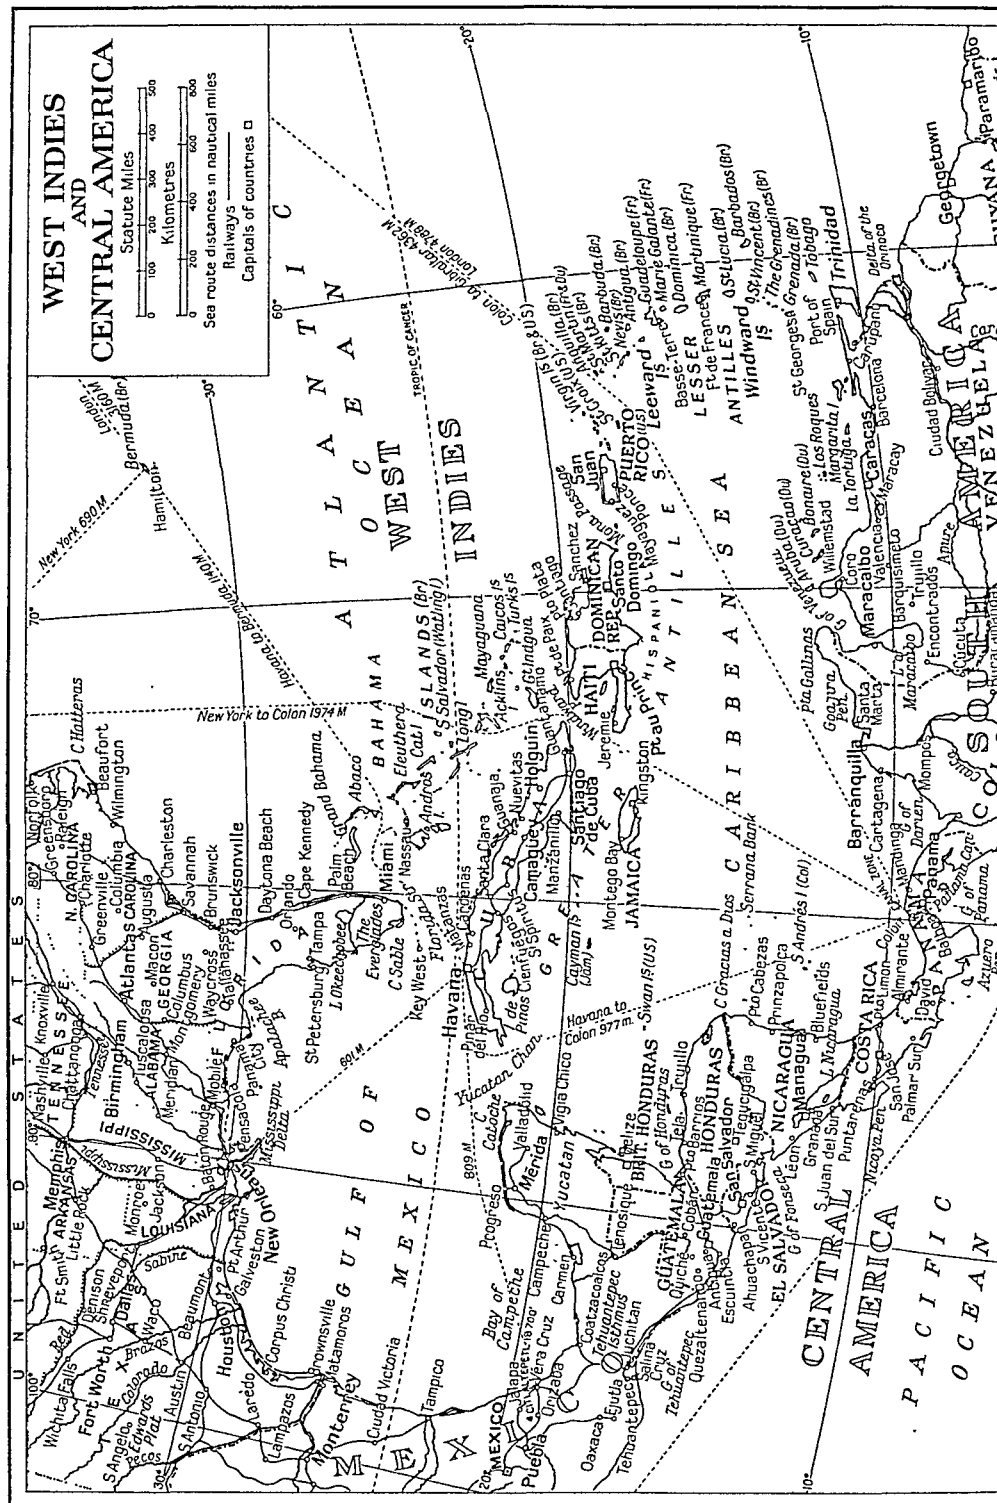

WITAN or Witenagemot. The council of the Anglo-Saxon kings, which was composed of officers of the household, the greater landowners, the bishops, and the abbots of important monasteries. See illus. p. 390.

WITCHCRAFT. The supposed power of working magic with the aid of the devil. Witches were persecuted all over W. Europe during the 15th-17th cents., among the best-known cases being those of Joan of Arc and Gilles de Rais. 'White' witches who use 'supernatural' powers for good purposes, e.g. in charming warts, may still be found in England, and after the S.W.W. there was a revival of interest in W. or 'black magic'.

WITCH HAZEL. Flowering shrub (*Hamamelis virginiana*). An astringent extract prepared from the bark and leaves is used in medicine.

WISTARIA

WITNESS. One who supplies the testimony in courts of law, on which cases are decided. The rules as to what evidence is admissible are complex, but direct oral testimony of relevant facts, given by Ws. who were present, is required whenever possible.

WITNEY. English market town (U.D.) in Oxfordshire, on the Windrush. Blankets and other woollen goods are manufactured. Pop. (1961) 9,217.

WITT, John de (1625–72). Dutch statesman. B. at Dort, he became Grand Pensionary of Holland, and virtual Prime Minister, in 1653. By his skilful diplomacy he conducted the English Wars of 1652–4 and 1665–7 to an honourable conclusion, and in 1668 formed the Triple Alliance with England and Sweden against Louis XIV. His brother Cornelius de W. (1623–72) distinguished himself as a naval commander in the English Wars. After the Orangist reaction of 1672 Cornelius was imprisoned; John resigned, and while he was visiting his brother both were murdered by the mob.

WITTELSBACH (vit'telsbakh). Bavarian dynasty, who ruled Bavaria as dukes from 1180, electors from 1623, and kings 1806–1918. Prince Rupprecht (1869–1955), son of King Ludwig III and descended from Elizabeth, dau. of James I of England, was technically a claimant to the British throne and the claim descends to his son Prince Albrecht (1905–).

WITTENBERG. Town of Halle district, E. Germany, 40 m. N.E. of Halle, on the Elbe, associated with Martin Luther. There is a Luther museum in the Augustinian monastery. Luther preached in the Stadtkirche (in which he is buried), nailed his 95 theses to the door of the Schlosskirche in 1517, and was prof. of philosophy in the univ. of W. (1502) transferred to Halle in 1815. The painters Lucas Cranach (father and son) lived at W. Pop. (1966) 46,000.

WITTGENSTEIN (vit'genshtin), Ludwig (1889–1951). German philosopher. Arriving from Berlin at Cambridge in 1912, he pub. in 1922 – aided by Bertrand Russell – his influential *Tractatus Logico-Philosophicus*; and in 1953 *Philosophical Investigations*.

WOAD. Species of plant (*Isatis tinctoria*) in the family Cruciferae. It has arrow-shaped leaves and clusters of yellow flowers. A blue dye, made from the fermented leaves, was used by the ancient Britons to stain their bodies when going into battle.

WODEHOUSE (wood'-), Pelham Grenville (1881–). British humorist, who became a U.S. citizen in 1955. He is author of a long series of novels, featuring Bertie Wooster and his impeccable manservant Jeeves, who live in a world of scatty aristocrats and fossilized, upper-class slang.

WODEN. See ODIN.

WOFFINGTON, Margaret (c. 1714–60). Irish actress, better known as Peg W. She played in Dublin as a child and made her début at Covent Garden in 1740. She often played male roles.

WOLF (völf), Friedrich August (1759–1824). German classical scholar, prof. at Halle (1783–1807), who in his *Prolegomena ad Homerum* (1797) put forth the theory that the *Odyssey* and *Iliad* are based on original lays which were later joined.

WOLF, Hugo (1860–1903). Austrian composer. B. at Windischgraz, in Styria, he studied at Vienna conservatoire, became a critic on a Viennese paper, and d. in a Vienna lunatic asylum. His songs belong to the greatest achievements of the Ger. *Lieder* tradition. He also composed the opera *Der Corregidor* and orchestral works, such as 'Italian Serenade'.

WOLF. Wild member of the dog family. The common W. of Europe and Asia (*Canis lupus*) has thick greyish fur. The larger timber W. (*C. nubilus*), and the small coyote (q.v.) occur in N. America. Ws. inhabit both open and wooded country, and commonly hunt in packs.

WOLFE, Charles (1791–1823). Irish curate, author of one great poem, 'The Burial of Sir John Moore'.

WOLFE, James (1727–59). British soldier. B. at Westerham, Kent, he entered the army in 1741 and served at the battles of Dettingen, Falkirk, Culloden, and Laffeldt. In 1758 he served under Amherst in Canada, and played a conspicuous part in the siege of Louisburg. In 1759 he was promoted major-general, and commanded the victorious expedition against Quebec, in which he lost his life.

WOLFE, Thomas (1900–38). American novelist. B. in N. Carolina, he was ed. at the univ. and at Harvard, and travelled to Europe. He believed that good writing was the work of the unconscious, and poured out an enormous quantity of wordage which was cut and shaped by his publisher/editor Maxwell Perkins. His 4 books are *Look Homeward, Angel* (1929), *Of Time and the River* (1935) and the posthumous *The Web and the Rock* (1939) and *You Can't go Home Again* (1940).

WOLFENDEN, Sir John (1906–). British educationist. Headmaster of Shrewsbury 1944–50, he is noted for his balanced chairmanship of the committee on homosexual offences and prostitution 1954–7, family service units 1957–63, etc., and in 1969 became director and principal librarian, British Museum. He was knighted in 1956.

WOLF-FERRARI (völf-ferah'rë), Ermanno (1876–1948). Italian-German composer, b. at Venice, whose operas incl. *Il segreto di Susanna*, *I gioielli della Madonna*, and many others.

WOLFIT, Sir Donald (1902–68). British actor-manager. B. at Newark-on-Trent, he formed his own Shakesperian company in 1937, and excelled in the larger-than-life roles of Shylock, Lear, Volpone, etc.

WOLFRAM. Grey, hard metal, ductile and malleable, formerly (until 1949) officially known as tungsten: symbol W, at. wt. 183.86, at. no. 74. Recognized and named by Scheele in 1781, and discovered by the d'Elhujar brothers in 1783, it occurs as wolframite (FeWO₃), scheelite (CaWO₃) and huberite (MnWO₃). Non-magnetic, it is insoluble except in a mixture of nitric and hydrofluoric acids, and has the highest melting point (3370°C) of any metal. W. is used in alloy steels for armour plate, projectiles, high-speed cutting tools, etc., for lamp filaments and thermionic valves. Its salts are used in the paint and tanning industries.

WOLFSBURG. Town 16 m. N.E. of Brunswick in W. Germany, chosen 1938 as the Volkswagen (Hitler's 'People's Car') factory site. Pop. c. 25,000.

WOLFSON, Sir Isaac (1897–). British merchant. Chairman of Great Universal Stores Ltd. from 1946, he estab. the W. Foundation 1955 to advance health, education and youth activities, and endowed 1966 (jointly with Ford Foundation) W. College, Oxford, concentrating on science and technology.

WOLLONGONG (wool'lengong). Town and seaport of N.S.W., Australia, 40 m. S. of Sydney. Coal is mined nearby, and there are iron and steel works. Pop. Greater W. (1966) 178,100.

WOLLSTONECRAFT, Mary. See under GODWIN, WILLIAM.

WOLSELEY (wool'zli), Garnet Joseph, 1st visct. (1833–1913). British field marshal. He entered the army in 1852, and for his victory at the battle of Tel-el-Kebir, 1882, was raised to the peerage. After leading the Gordon relief expedition of 1884–5 he was created a visct. He was C.-in-C. 1895–1900.

WOLSEY, Thomas (c. 1475–1530). English cardinal

coasts of Florida and Venezuela, and dividing the Atlantic Ocean from the Gulf of Mexico and the Caribbean Sea. They consist of the British W.I.; Curaçao, belonging to the Netherlands; Guadeloupe and Martinique, belonging to France; Puerto Rico, belonging to the U.S.A.; the Virgin Islands, belonging to the U.S.A. and Britain; and the independent Cuba, Dominican Republic, and Haiti (qq.v.).

The Federation of the WEST INDIES, comprising Antigua, Barbados, Dominica, Grenada, Jamaica, Montserrat, St. Kitts with Nevis and Anguilla, St. Lucia, St. Vincent, and Trinidad and Tobago (qq.v.), came into existence in 1958. This federation, of which the federal parliament was at Port-of-Spain, Trinidad, came to an end in 1962 when first Jamaica and then Trinidad and Tobago withdrew. Attempts at a new federation were abandoned in 1965, and individual solutions sought. The difficulties of the smaller dependencies in assuming the burden of full independence were met by the creation of the new non-colonial status of Associated State (q.v.), assumed in 1967 by Antigua, Dominica, Grenada, St. Christopher-Nevis-Anguilla and St. Lucia. There is a built-in option for independence on a two-thirds vote of the local legislature plus a referendum, and association with another Caribbean country within the Commonwealth may be voted without a referendum.

WEST LOTHIAN. Central county of Scotland, bordering the S. shore of the Firth of Forth. The Almond is the chief river, with its tributary the Avon. Agriculture and dairy farming are carried on. Coal is mined and iron worked. Linlithgow is the co. town; other towns are Bathgate and Bo'ness. Area 120 sq. m.; pop. (1961) 92,764.

WESTMACOTT, Sir Richard (1775–1856). British sculptor. He studied under Canova in Rome, was elected R.A. in 1811, and became a prof. at the Academy. He executed monuments in Westminster Abbey and in St. Paul's, and the 'Achilles' in Hyde Park, etc.

WESTMEATH. Inland co. of Leinster, Republic of Ireland. It is drained by the Shannon, Inny, and Brosna, and noted for the Loughs Ree, Sheelin, Ennell, etc. Agriculture and dairy farming are the main occupations; there are limestone quarries; some textiles are manufactured. Mullingar is the co. town. Area 681 sq. m.; pop. (1966) 52,900.

WESTMINSTER. City, most famous of the Greater London boroughs, on the N. bank of the Thames between Kensington and the City of London. It contains the London palaces of the sovereign (Buckingham and St. James's), Houses of Parliament, Westminster Abbey (*see below*), Whitehall with its many govt. offices, and the Cenotaph; Westminster (R.C.) Cathedral, the Methodist Central Hall, Victoria and Charing Cross stations, the National Gallery, and Trafalgar Square; Westminster, Charing Cross, and St. George's hospitals; theatres and clubs, and many other important buildings. It also incl. Hyde, Green, and St. James's Parks and part of Kensington Gardens. From 1965 W. has had a Lord Mayor. Pop. (1967) 258,930.

WESTMINSTER BRIDGE, crossing the Thames from the Houses of Parliament to St. Thomas's hospital, was rebuilt 1856–62. **WESTMINSTER HALL** is a relic of the old palace of the English kings; it was originally built by William II in 1097; its magnificent oak roof was erected by Richard II, 1394–9. The hall was the seat of the English law courts until 1882. **WESTMINSTER CATHEDRAL,** the seat of the R.C. archbishopric of W., was begun in 1895 and consecrated in 1910; it is in the Byzantine style. **WESTMINSTER SCHOOL,** one of the great English public schools, was originally a school attached to the abbey, whence its name of St. Peter's College. Elizabeth I refounded it in 1560. **WESTMINSTER HOSPITAL** (1719) was opened on its present site in 1939.

WESTMINSTER ABBEY. Built on a marshy site that was once Thorney Island, W.A. was traditionally founded by Sebert, king of the East Saxons, early in the 7th cent.; its official title is the Collegiate Church of St. Peter. The Norman church and monastery were consecrated under Edward the Confessor in 1065, but rebuilding was begun by Henry III in 1245 and was finished in 1528 shortly before the monastery was dissolved. Later additions to what is a fine example of pointed Gothic incl. Henry VII's chapel and the west towers, completed in 1740 to a design by Nicholas Hawksmoor. All the English sovereigns (save Edward V) have been crowned in the abbey since William I, and many of them, incl. Edward the Confessor, Henry III, Edward I, Henry VII, Elizabeth I, Charles II, William III, Anne, and George II, are buried there. The Coronation Chair contains the 'stone of destiny' (traditionally Jacob's pillow at Bethel) on which the Scottish kings were crowned; it was brought to London by Edward I. The abbey is crowded with memorials (incl. the Battle of Britain Memorial Chapel dedicated 1947) and tombs of statesmen, writers, and others, incl. the 'Unknown Warrior', who have left their mark on English history.

WESTMORLAND. N.W. county of England, S. of Cumberland with a coastal outlet on Morecambe Bay. It is part of the Fell country and Lake District. The highest peaks are Helvellyn (3,118 ft.) and Bow Fell (2,960 ft.); the lakes incl. Windermere, part of Ullswater, Grasmere, Rydal Water, and Hawes Water. Cattle and sheep are pastured, and there are small manufacturing and mining activities. Appleby, the co. town, and Kendal are the chief towns. W. has been a county since c. 1100. Area 789 sq. m.; pop. (1967) 68,030.

WESTON-SUPER-MARE. English seaside resort (bor.) in Somerset, on the Bristol Channel 21 m. W.S.W. of Bristol, a fishing village until the early 19th cent. Pop. (1961) 43,923.

WESTPHALIA (–fāl'ia). Former prov. of Prussia, from 1946 part of the Land of North Rhine-Westphalia (q.v.). An independent duchy from the Middle Ages, W. was incorporated in Prussia by the Congress of Vienna, 1815, and made a prov. 1816 with Münster as its cap. W. incl. the Ruhr (q.v.), chief industrial area of Germany, and was the scene of violent fighting during the last stages of the S.W.W.

The kingdom of W., 1807–13, created by Napoleon, did not incl. the duchy, but consisted of Prussian lands W. of the Elbe, Hesse, Brunswick, and Hanover.

WEST POINT. Location in N.Y. state, on the Hudson, 50 m. N. of N.Y.C., site of the U.S. Military Academy (commonly referred to as W.P.), estab. in 1802. W.P. has been a military post since 1778. The majority of the cadetships are awarded on the recommendation of a Senator or Representative; candidates must be U.S. citizens 17–22.

WEST VIRGINIA. Mountainous E. state of the U.S.A. The Ohio, Monongahela, and the 2 Kanawhas are the chief rivers, while the Alleghenies run S.W. through the state. This hilly country provides fruit, poultry and dairy products, and is rich in hardwood forests. Resources incl. coal, natural gas and petroleum, which support a chemical industry incl. man-made fibres and plastics, and steel, glass and pottery are manufactured; petroleum refined; and meat packed. Charleston is the cap. W.V. was part of Virginia until 1861 when the western cos. of Va. voted against secession and formed themselves into a separate state, admitted to the Union 1863. Area 24,181 sq. m.; pop. (1960) 1,860,421.

WEXFORD. Seaport and co. town (U.D.) of Wexford, Rep. of Ireland, on the Slaney. Shipbuilding and fishing are carried on. Founded by the Danes in the 9th cent., W. was devastated by Cromwell in 1649. Pop. (1961) 10,002.

and statesman. B. at Ipswich, the son of a butcher, he was ed. at Magdalen College, Oxford, and took holy orders. Under Henry VIII he had rapid advancement, being made bp. of Lincoln and archbp. of York in 1514. Several other sees were conferred on him, and in 1515 he was created a cardinal and became Lord Chancellor of England. During the next 10 years he was one of the most powerful men in Europe. Under him the smaller English monasteries were dissolved, and zeal for the New Learning found expression in Cardinal College (later Christ Church) at Oxford. But his reluctance to further Henry's divorce from Catherine of Aragon led to his downfall in 1529, and in 1530 he was charged with high treason and arrested. He d. at Leicester Abbey.

WOLVERHAMPTON. English industrial town (co. bor.) in Staffs, 13 m. N.W. of Birmingham. Among the numerous manufactures are locks and safes, tyres, commercial vehicles, aircraft, artificial fibres, diesel engines. Nearby are collieries and iron-works. The cruciform church of St. Peter was refounded on the site of an earlier monastery in 994. *Wolverhampton*. Pop. (1961) 150,385.

WOMBAT. Marsupial of the family Vombatidae, e.g. *Vombatus ursinus* of Tasmania and *V. platyrhinus* of S. Australia. They have coarse brownish fur, live in burrows, and are nocturnal and vegetarian.

WOMBAT

WOMEN'S INSTITUTES. Local organizations of women in country districts for the purpose of mutual fellowship and practice of useful crafts. The first was founded in 1897 at Stoney Creek, Ontario, under the presidency of Mrs. Adelaide Hoodless. The movement is non-class, non-sectarian, and non-party political, and was taken to Britain by Mrs. Alfred Watt, the 1st W.I. being opened in Anglesey.

WOMEN'S SERVICES. The organized use on a large scale of the services of women to assist the prosecution of warfare is of comparatively recent development. They may be used to replace men called to serve in the armed forces in their peacetime occupations, e.g. in factories or agriculture, as with the *Women's Land Army* in Britain 1917-20; to act as volunteer part-time auxiliaries for new tasks created by war, e.g. the *Women's Voluntary Services* (W.V.S.), an amalgamation in Britain in 1938 of already existing bodies which cared for evacuees, gave service in hospitals, assisted air-raid victims, etc., and was continued after the S.W.W. (created W. Royal V.S. 1966); or to enlist as auxiliaries to the armed services. Use of women in actual combat is regarded with repugnance by most civilized states, except in such dire emergency as the desperate Russian stand against the German invaders in the S.W.W., but may be accepted as routine in such newly emergent states as Cuba and Israel. In Britain there are separate corps for all 3 services: *Women's Royal Army Corps* (W.R.A.C.) created in 1949 to take over the functions of the Auxiliary Territorial Service, estab. in 1938 but with a F.W.W. equivalent in the *Women's Army Auxiliary Corps* (W.A.A.C.); *Women's Royal Naval Service* (W.R.N.S.) 1917-19 and 1939 onwards; and the *Women's Royal Air Force* (W.R.A.F.) estab. in 1918 but known 1939-48 as the *Women's Auxiliary Air Force* (W.A.A.F.); and also nursing services, i.e. Queen Alexandra's Army Nursing Corps and Naval Nursing Service, and for the R.A.F. Princess Mary's Nursing Service. In the U.S.A. there is a separate *Women's Army Corps* (W.A.C.), estab. in 1948, which developed from the *Women's Army Auxiliary Corps* (W.A.A.C.), in turn originating in F.W.W. organization on the British model; but although there are nurse corps for the 3 services, there are no separate auxiliary

corps for the navy and air force, women being integrated into the general structure.

WOOD, Haydn (1882-1950). British composer. A violinist, he wrote a violin concerto among other works, but is best known for his songs which incl. 'Roses of Picardy'.

WOOD, Mrs. Henry (1814-87). British novelist, née Ellen Price. Dau. of a glove manufacturer, she m. a merchant, but was widowed and settled in London to write. She won early fame with *East Lynne* (1861), later books incl. *The Channings* (1862) and the Johnny Ludlow series of detective stories.

WOOD, Sir Henry (1869-1944). British conductor. B. in London, he studied at the R.A.M., had experience as an organist and operatic conductor, and from 1895 until his death conducted the London Promenade Concerts, now named after him. He greatly promoted a new national interest in music, and encouraged many young British composers. As a composer he is remembered by the 'Fantasia of Sea Songs' which ends each Promenade season.

WOOD, John (c. 1705-54). British architect, known as 'Wood of Bath' because he did his best work for that city. He designed the Royal Crescent.

WOODCOCK, George (1904-). British trade union official. Gen. Sec. of the T.U.C. 1960-69, he then became chairman of the Industrial Relations Commission.

WOOD-CARVING. The art of carving wood figures in relief or in the round, decorative forms, etc. It was practised in the earliest times, and is practised today by civilized and primitive peoples in most parts of the world. Works of the Negroes of West Africa and of the natives of the South Sea Islands are noteworthy. In India, China, and other eastern countries images of deities, etc., have been executed in wood throughout many cents. In Mohammedan countries interior decoration in mosques and other buildings is executed in wood. In Europe, Gothic craftsmen produced much beautiful work such as carved doors, effigies, mouldings, misericords, and reredoses, and many of the great craftsmen of the Renaissance worked in wood, as do many leading modern sculptors.

WOODCUTS and WOOD ENGRAVINGS. In making a woodcut a block of smooth-grained wood is used, the most suitable kinds being lime, cherry, American whitewood, and maple. The block is cut along the grain, and the areas and lines of the design are left in relief. This is probably the oldest printing process, dating from the 15th cent., and it was commonly used by early printers for book illustration.

Wood engravings have not the coarseness of woodcuts; they are usually made in boxwood, though apple and pear are sometimes used. The block is cut across the grain, and it is possible to obtain subtle tonal effects. In the 18th cent. Thomas Bewick developed the medium to perfection. Later wood engravers incl. Eric Gill, Clare Leighton, Rockwell Kent, and Eric Daglish.

WOODFORD, James (1740-1803). British clergyman. He was a fellow and sub-warden of New College, Oxon., and held livings in Somerset and Norfolk. His diary covering 1758-1802 is remarkable for its presentation of rural England.

WOODLOUSE. Name given to certain Isopoda (Crustacea) of the family Oniscidae. Unlike all other Isopoda they live on land and breathe air, but damp is necessary to their existence. The eggs are carried by the female in a pouch beneath the thorax.

WOODPECKER. Birds allied to the wrynecks, with whom they form the family Picidae. They live on insects obtained from crevices in the bark of trees. The British green W. or yaffle (*Picus viridis*) is green with red crown and yellow rump, and about the size of a jay. The greater and lesser spotted Ws. (*Dryobates major* and *D. minor*), also British species, have black,

WEXFORD. Co. of the Rep. of Ireland, in the prov. of Leinster, on the S.E. coast. There are hills in the N.W., and the co. is watered by the Barrow and Slaney. The co. town is Wexford. Fishing and the production of oats, barley, potatoes, etc., sheep, pigs and poultry are the chief industries. Area 908 sq. m.; pop. (1966) 33,437.

WEYDEN (viden), Rogier van der (c. 1399–1464). Flemish painter. B. at Tournai, he settled at Brussels after 1429. His 'Descent from the Cross' is in Madrid.

WEYGAND (vāgōn'), Maxime (1867–1965). French general. Chief of staff to Foch and chief of the Allied general staff in 1918, he successfully defended Warsaw against the Red Army in 1920, and was appointed C.-in-C. in May 1940. He advised surrender to Germany, and was subsequently Defence Min. in Pétain's govt., and High Commissioner of N. Africa 1940–1. He was a prisoner in Germany 1942–5, and after his return to France was arrested, released in 1946, and in 1949 the sentence of national infamy was quashed.

WEYMOUTH (wā'muth) and Melcombe Regis (mel'kum rē'jis). English seaport and resort (bor.) in Dorset, at the mouth of the Wey. W. bay is a fleet anchorage. W., which dates from the 10th cent., was the 1st place in England to suffer from the Black Death, 1348. M.R. was incorporated with W. in 1571. George III made W. popular as a seabathing resort. Pop. (1961) 40,962.

WHALES. Member of a large group of mammals in the order Cetacea (q.v.), adapted for marine life. They swim chiefly by using the fin-tail, the fore-limbs or flippers maintaining balance, and when rising to the surface to breathe eject a column of exhausted air and water from the blowhole, i.e. nostril. The Mysticeti feed on plankton, strained through their whalebone plates, but the Odontoceti use their teeth to capture their prey, though not to eat it, since they swallow it whole. Especially ferocious is the killer W., of which one captured specimen had 32 adult seals

WHALES. 1, Killer whale; 2, bottle-nose; 3, rorqual.

in its stomach. The milk on which the young are suckled resembles condensed milk, having a water content of only 40–50 per cent. The most important whaling product is oil (used principally in making soap and margarine), and catches are restricted by international agreement to conserve supplies: the high intelligence of Ws. means that their slaughter, usually by shell harpoon guns, involves great cruelty. The herd instinct is strongly developed, some species keeping in touch by emitting sounds, and some are migrant from the polar regions to warmer waters in winter. The blue W. is the biggest living animal, averaging 85 ft. in length and weighing 106 tons.

WHARTON, Edith (1862–1937). American author, née Jones. Her work was greatly influenced by her friend Henry James, and her psychological novels incl. *The House of Mirth*, the tragic *Ethan Frome*, *The Custom of the Country*, and *The Age of Innocence*.

WHEAT. Cereal plant derived from the wild *Triticum*, a grass native to the Middle East. It has been cultivated since Neolithic times, and is the chief cereal used in bread making in temperate climates which suit its growth. W. is killed by frost, and damp renders the grain soft: warm dry regions

DENNIS WHEATLEY

produce the most valuable grain. The chief wheat-producing areas of the world are the Ukraine, central and N.W. United States, the Punjab, the prairie provinces of Canada, parts of France and S. Germany, Italy, Argentina, and S.E. Australia. Flour is milled from the endosperm, the coatings of the grain producing bran and pollard. Semolina is also prepared from W.

WHEATEAR. Small migratory bird (*Saxicola oenanthe*) found throughout the Old World and also in parts of N. America. The plumage is light grey above and white below, with a white patch on the back, a black face-patch, and black and white wings and tail.

WHEATLEY, Dennis Yates (1897–). British novelist. B. in London, he served in the F.W.W., and in 1932 sold the family wine business to take up writing. With a gift of narrative that recalls Dumas, he has written a 'saga' of the adventures of Roger Brook, secret agent in the French Revolutionary period; a series dealing with black magic and occultism and another on wartime espionage – *They Used Dark Forces* (1964) combines both these last themes.

WHEATSTONE, Sir Charles (1802–75). British physicist. B. in Gloucester, he was originally a musical-instrument maker, but became in 1834 prof. of experimental philosophy at King's Coll., London. His inventions incl. the concertina, harmonica, and stereoscope, and he took out the first patent for the electric telegraph with W. F. Cooke in 1837. He measured the speed of electric discharge in conductors, and also devised the *W. bridge* (a special electrical network for measuring resistance) from an idea of S. Hunter Christie's.

WHEELER, Sir Charles (1892–). British sculptor. He has executed sculptures for India House, and the Bank of England; and the bust of Jellicoe in Trafalgar Sq. He was P.R.A. 1956–66.

WHEELER, Sir (Robert Eric) Mortimer (1890–). British archaeologist. He was keeper and sec. of the London Museum 1926–44, director-gen. of archaeology in India 1944–8, and prof. of the archaeology of the Roman provs. at the Univ. of London 1948–55; these posts reflect the breadth of his interests and his attractive presentation of his striking work at Maiden Castle and in revealing the Indus Valley civilization, as well as his TV appearances, has made him one of the best-known of modern archaeologists.

WHELDON, Huw (1916–). British television producer. Joining the B.B.C. in 1952, he produced such programmes as *Portraits of Power* and *Monitor*; headed *Music and Documentaries* 1963–5, was programme controller 1965–8, and in 1969 became managing director B.B.C. television.

WHELK. Family of marine gastropods. The common W. (*Buccinum undatum*) is widely distributed round the N. Sea and Atlantic. It is fished for bait and food, and has a thick spiral shell.

WHIG PARTY. The predecessor of the present Liberal Party. The name, first applied to the rebel Covenanters in Scotland, came into use in 1679 for supporters of the Exclusion Bill. The W.P. strongly supported the 1688 revolution, and was in power continuously 1714–60. Led by a group of great landowning families, it drew its support mainly from the business classes and the Nonconformists; it advocated the development of industry and commerce, a vigorous foreign policy, and religious toleration. During the

**GREAT SPOTTED
WOODPECKER**

serious menace when they attack structural timber and furniture. Most common in Britain are the furniture beetle (*Anobium punctatum*), generally attacking older timber and est. to be present in half the country's buildings; the powder-post beetle (*Lyctus* sp.), attacking newer timber; the death-watch beetle (q.v.), whose presence always coincides with fungal decay; and the wood-boring weevils. Special wood preservatives have been developed to combat W., which has markedly increased since the S.W.W. In warmer countries the greatest danger to timber is from termites (q.v.).

WOOKEY HOLE. Natural cave near Wells, Som., England, in which flint implements of Old Stone Age man with bones of extinct animals have been found.

WOOL. The natural fibrous covering of the sheep, and also of the llama, angora goat, etc. The domestic sheep, *Ovis aries*, provides the great bulk of the fibres used in commerce. In Britain there are some 26 breeds, and the wool is classified as lustre (incl. Lincoln, Leicester, S. Devon, Cotswold, Dartmoor), demilustre (Cheviot, Exmoor Horn, and Romney Marsh), down (Dorset, Oxford, Suffolk, Hampshire, Southdown, etc.), and mountain (Blackface, Swaledale, Welsh White, Welsh Black, etc.). Lustre Ws. are used for making worsted dress fabrics, linings, braids, and so on. Demilustre Ws. are rather finer in quality, and are used for suitings, overcoats, and costumes, and worsted serge fabrics. First of English-grown Ws. are the down; they are used for hosiery yarns, and some for woollen cloths. Mountain Ws. are coarse and poor in quality, often comprising wool and hair mixed; they are useful for making carpets, homespun tweeds, and low-quality woollen suitings and hosiery.

Most of the world's finest W. comes from the merino sheep, which is not successfully acclimatized in Britain. In 1797 it was introduced into Australia, which has become the world's largest producer of Merino Ws.: S. Africa and S. America are also large producers. Ws. from cross-bred sheep (usually a cross

red, and white plumage. There are numerous species in N. America.

WOODSTOCK. English town (bor.) in Oxon, 8 m. N.W. of Oxford, dating back to the 11th cent. It has many associations with the sovereigns of England: Henry I built a palace at W.; Fair Rosamund, mistress of Henry II, is supposed to have lived there; the Black Prince was b. there; and Elizabeth I was imprisoned at W. by Mary I in 1554. Pop. (1961) 1,808.

WOODWORM. The common name for the larval stage of certain wood-boring beetles. Dead or injured trees are their natural target, but they become a

WOODWORM. Two burrowing larvae of the common furniture beetle, which attacks soft wood, and reveals its presence by circular flight holes and wood dust or 'frass' on the surface.

Scientific Director,
Rentokil Laboratories.

of one of the lustre class with a merino) are produced in New Zealand. Since the S.W.W. blendings of W. with synthetic fibres have been developed.

WOOLF, Virginia (1882–1941). British author. B. in London, a dau. of Sir Leslie Stephen, she pub. her 1st novel *The Voyage Out* in 1915. In *Mrs. Dalloway* (1925) she perfected her 'stream of consciousness' technique. Among her later books are *To the Lighthouse*, *The Waves*, *The Years*, and the unrevised *Between the Acts* (1941). She also pub. biographies *Flush* and *Roger Fry*; and criticism and essays as *The Common Reader*, *A Room of One's Own*, and *The Moment* (1948). She m. in 1912 Leonard Sidney W. (1880–1969), literary editor of the *Nation* 1923–30, and joint-editor of the *Political Quarterly* 1931–59. They jointly founded the Hogarth Press in 1917. He pub. a remarkable 4-vol. autobiography 1960–7.

WOOLLETT, William (1735–85). British engraver. One of the greatest masters of the art, in 1775 he was appointed engraver to George III.

WOOLLEY, Sir Leonard (1880–1960). British archaeologist. Although he carried out valuable excavation at Carchemish, Tell El-Amarna, and Aichana (Hatay), he is best remembered for his work at Ur where he discovered evidence of what may have been the biblical flood, and remains of the ziggurats which inspired the story of the Tower of Babel, as well as relics of rich social and cultural life.

WOOLMAN, John (1720–72). American Quaker. B. in Northampton, N.J., he was one of the first anti-slavery agitators, and left an important *Journal*.

WOOLSACK. Name given to the seat of the Lord High Chancellor in the House of Lords; it is a large square bag of wool and is a reminder of the principal source of English wealth in the Middle Ages.

WOOLWICH. District, on both sides of the Thames, divided from 1964 between the Greater London bors. of Newham (the part N. of the Thames), and Greenwich. The Royal Military Academy was moved from W. to Sandhurst in 1946. An ordnance depot was set up at W. in 1518, a foundry in 1716, and George III gave it the name Royal Arsenal in 1805: it was closed down 1967.

WOOLWORTH, Frank Winfield (1852–1919). American business man. He opened his 1st successful 'five and ten cent' store at Lancaster, Pa., in 1879, and, together with his brother C. S. Woolworth (1856–1947), built up a chain of similar shops throughout the U.S.A., Canada, Great Britain, Ireland, and the Continent. The headquarters are in the Woolworth Building, a New York skyscraper, built 1912. See HUTTON, BARBARA.

WOOMERA. Small town in S. Australia, 110 m. N.W. of Port Augusta, from which W. draws its water supply; centre of a rocket and atomic-weapon proving range estab. 1946 and covering 3,000 sq. m. to which public access is forbidden. The name (aboriginal) means weapon thrower. There are 3 airfields. Pop. (est.) 3,000.

WOOTTON OF ABINGER, Barbara Frances Wootton, baroness (1897–). British educationist and economist. Prof. of social studies at London 1948–52, she has pub. *Freedom under Planning* (1945), *Social Science and Social Pathology* (1959), etc., and was created a life peer in 1958.

WORCESTER. (1) English episcopal city (co. bor.),

VIRGINIA WOOLF.
Chalk drawing by Francis
Dodd. Photo: N.P.G.

French Revolution the W.P. adopted a policy of parliamentary reform. After the triumph of this policy in 1832 the name 'Liberal' replaced that of Whig. In U.S. history the name W.P. was used during 1836–54 by one of the 2 major parties, which opposed the radical policy of Andrew Jackson and defended commercial interests.

WHIP. In Britain an M.P. employed by his party to secure attendance of members of the party at important debates. The govt. chief W., and the 3 junior Ws., are salaried officials; the Ws. of opposition parties are unpaid. The term, which is derived from the whipper-in of a hunt, is also applied to the summons to attend sent to members.

WHIPPET. Breed of dog resembling a small (15–20 lb.) greyhound. The W. was developed, as a cross between the greyhound and fox terrier, by the colliers of northern England, who race them along a straight track, at the end of which their owners stand calling them.

WHIPNADE. English locality in Beds, 3 m. S. of Dunstable, site of a zoological park covering 500 acres belonging to the London Zoological Society, where wild animals, and birds, are bred and exhibited in their natural state. It was opened to the public in 1931.

WHISKY. An ardent spirit containing a large percentage of alcohol, distilled chiefly from cereals. For many years Scotland has been the centre of the whisky-distilling industry. W. is obtained from malt in Scotland and Ireland, and from Indian corn or rye in the U.S.A. In Ireland and the U.S. it is spelt 'whiskey'.

WHISKY. Scottish crofters of two hundred years ago used copper kettles to distil their whisky. The modern still, with a capacity of 4,000 gallons and taking 6 smiths a month to hammer into shape, is also made of copper since this will not corrode or impart any alien flavour.

Courtesy of Johnnie Walker Scotch Whisky.

WHIST. A card game played by 2 sides of 2 partners each. Each player is dealt 13 cards. The object of the game is to score tricks, a trick being gained by the partners who play the highest card of a suit, or the highest trump card, the trump suit being determined before the start of the game. Each trick over 6 counts one point to the partners, who score 5 points for a game, and 2 games for a rubber.

WHISTLER, James Abbott McNeill (1834–1903). American artist. B. in Mass., he abandoned a military career for painting, and in 1855 went to Paris where he was associated with the Impressionists. He settled in Chelsea, executed etchings of the Thames, and painted 'Old Battersea Bridge', 'The Symphony in

White', and portraits. His 'Nocturnes', 1877, were adversely criticized by Ruskin, and led to the libel trial of 1878 in which W. was awarded a farthing damages. W. retaliated in 1890 with *The Gentle Art of Making Enemies*.

WHISTLER, Rex John (1905–44). British artist, celebrated for fanciful murals, e.g. Tate Gallery Restaurant and Haddon Hall. He was killed in Normandy in the S.W.W. His brother Laurence W. (1912–), a poet and diamond-point engraver on glass, uses the stippling process invented by the Dutch in the 17th

cent., in which the design is composed of small dots hammered into the glass.

WHITBY. English fishing port (U.D.) in the N. Riding of Yorks, at the mouth of the Esk. Ruins remain of the Benedictine abbey (1078) built on the site of an abbey founded by St. Hilda 657, destroyed by the Danes 867. Capt. Cook's ship *Resolution* was built at W., where he had served his apprenticeship. There are large reserves of potash, running out under the sea, in the area. Pop. (1961) 11,662.

WHITBY. Synod of. Ecclesiastical council held in 664, which marks the triumph of the Roman over the Irish form of Christianity in England.

WHITE, Byron Raymond (1917–). American lawyer. A leading footballer he was awarded a Rhodes Scholarship to Oxford in 1939, while studying at the Univ. of Colorado, and later worked his way through Yale law school by playing professional football. He became an associate justice of the Supreme Court in 1962.

WHITE, Elwyn Brooks (1899–). American essayist. B. at Mount Vernon, N.Y., he was ed. at Cornell univ., where his tutor Will Strunk helped to mould his jauntily precise style. Entering journalism as a reporter, he has been greatly influential in American writing as contributing editor to the *New Yorker*: collections of his pieces incl. *The Points of My Compass* (1963), and he collaborated with Thurber in *Is Sex Necessary?* (1929).

WHITE, Gilbert (1720–93). English naturalist. B. at Selborne, Hants, he took orders in 1747, and in 1751 retired to his birthplace. His *Natural History and Antiquities of Selborne* (1789) is a classic, and his home 'The Wakes' was opened as a museum and library in 1955.

WHITE, Patrick (1912–). Australian novelist and playwright. Ed. at Cheltenham College and Cambridge, he pub. his 1st book *Happy Valley*, portraying suffering as a condition of existence, in 1939. Similar allegorical overtones occur in the more mature *The Aunt's Story* (1946), *Voss* (1957) and *Riders in the Chariot* (1961), which also draw strongly on the resources of his native Australia. His most important play is *The Ham Funeral*.

WHITE, T(erence) H(anbury) (1906–64). British writer, best known for his retelling in 4 vols. of the Arthurian legend, beginning with *The Sword in the Stone* (1938), and pub. collectively as *The Once and Future King* (1958).

WHITE, William Hale. See RUTHERFORD, MARK.

WHITEFIELD, George (1714–70). British evangelist. B. at Gloucester, he came under Methodist influence while at Oxford. He took orders in 1738, but was suspended for his unorthodox doctrines and methods. For many years he travelled through Britain and America, and by his preaching contributed greatly to the evangelical revival. W.'s Tabernacle was built for him in Tottenham Court Rd., London (1756: bombed 1945 but rebuilt). He d. while visiting New England.

WHITEFISH. Name applied to freshwater fishes of the salmon family, belonging to the genus *Coregonus*. Abundant in N. American lakes, they also occur in Europe and Asia; 3 species are found in Britain.

WHITEHAVEN. English seaport (bor.) in Cumberland, with large docks. There are coal mines extending beneath the sea which have suffered several bad accidents, e.g. 136 men killed in 1910, 104 in 1947. Pop. (1961) 17,541.

WHITEHEAD, Alfred North (1861–1947). British philosopher and mathematician. He was prof. of applied mathematics at London 1914–24, and 1924–37 prof. of philosophy at Harvard, U.S.A. In his 'theory of organism' he attempted a synthesis of metaphysics and science. Among his works are *Principia Mathematica* (1910–13; with Bertrand Russell), *Concept of*

co. town of Worcs, on the Severn. The bishopric was founded c. 679, the cathedral, much restored, in the 11th cent. The cathedral school dates from 1541 and the Royal W. porcelain works from 1751. W. sauce, gloves, boots and shoes, are manufactured. At W. in 1651 Cromwell defeated Charles II. Pop. (1961) 65,865.

(2) Port and 2nd-largest city of Mass., U.S.A., on the Blackstone river. Dating from 1713, it makes textiles and textile looms, abrasives, carpets, clothing, etc. Pop. (1960) 186,587.

WORCESTERSHIRE. Midland county of England. In the S. are the Cotswold hills and in the S.W. the Malverns. The chief river is the Severn, which, with its tributaries the Teme, Stour, and Avon, forms the vales of W., Teme, and Evesham. The county is famous for its orchards and market gardens, and coal and ironstone are mined. Droitwich is noted for its lime springs and radio station, Kidderminster for carpets, and the towns to the N.E. are incl. in the Black Country. Worcester is the county town. Area 703 sq. m.; pop. (1967) 669,400.

WORDSWORTH, William (1770–1850). British poet. B. at Cockermouth, in Cumberland, he was ed. at Hawkshead School and St. John's Coll., Cantab. Going to France in 1791, he sympathized deeply with the revolutionaries, and fell in love with Marie-Anne Vallon, by whom he had an illegitimate dau. Returning to England just before the Terror he pub. *The Evening Walk* and *Descriptive Sketches* in 1793. In 1797 he settled with his sister Dorothy W. (1771–1855) in Som., in order to be near Coleridge. The 2 friends collaborated in the *Lyrical Ballads* (1798). After visiting Germany 1798–9 he settled at Grasmere in 1799. In 1802 he m. Mary Hutchinson, and in 1805 finished the autobiographical *Prelude*, unpub. till 1850. The *Poems* of 1807 mark the close of his early inspiration. His later vols. incl. *The Excursion* (1814), which together with the *Prelude* was intended to form part of a great poem *The Recluse; The White Doe of Rylstone* (1815), *The River Duddon* (1820), *Ecclesiastical Sketches* (1822), and *Yarrow Revisited* (1835). In 1842 W. received a govt. pension, and in 1843 succeeded Southey as poet laureate.

WORKSOP. English market and industrial town (bor.) in Notts, on the Notts coalfield. Mary Queen of Scots was imprisoned at W. Manor (burned 1761). Pop. (1961) 34,237.

WORLD WARS. See **FIRST** and **SECOND W.W.**

WORM. Term popularly used for various elongated limbless creatures. Zoologically Ws. incl. the flat worms such as flukes and tapeworms (qq.v.); the roundworms or Nematoda, e.g. the potato eelworm and the hookworm, an animal parasite; the marine worms or Nemertea (q.v.); and the segmented Ws. or Annelida (q.v.).

WORMS (vörms). Historical town, Rhineland Palatinate, W. Germany (formerly in Hessen). It is situated on the Rhine, 13 m. N. of Ludwigshafen. There is a Romanesque cathedral which escaped damage in the S.W.W. when the town suffered badly. W. began as a Celtic settlement, was the Barbetomagus of the Romans, Burgundian cap. in the 5th cent., seat of a bishopric from Roman times to 1797. Luther appeared before a Diet held at W. in 1521 and, with his followers, was outlawed by the emperor. Leather,

WORMS. The 12th cent. Romanesque cathedral originally founded in the 8th cent.

Courtesy of the German Tourist Information Bureau.

chemicals, sugar, furniture, etc., are made; and the wines of the dist. are famous. Pop. (1966) 61,000.

WORMWOOD. Name given to aromatic herbs of the genus *Artemisia*, Compositae family. *A. absinthium*, an ingredient of absinth, grows wild in Britain.

WORRELL, Sir Frank (1924–67). W. Indian cricketer. B. in Barbados, he was ed. at the univs. of Jamaica and Manchester, and 1st captained a W. Indian test team in the Australian tour of 1960–1. He was equally good as a bowler and batsman. He was knighted 1964.

WORTHING. English seaside resort (bor.) in Sussex at the foot of the S. Downs. There are traces of prehistoric and Roman occupation in the vicinity. It is famous for tomatoes. Pop. (1961) 80,143.

WOTTON, Sir Henry (1568–1639). English writer. B. in Kent, he was employed on diplomatic missions under James I, and was provost of Eton from 1624. The *Reliquiae Wottonianae* (1651) contains the lyric 'You meaneer beauties of the night'.

WOUVERMAN (wow'vermahn), **Philip** (1619–68). Dutch painter. B. at Haarlem, he painted landscapes and battle pieces. His brothers Pieter (1623–82) and Jan (1629–66) painted similar scenes.

WRANGEL, Ferdinand Petrovich, baron von (1794–1870). Russian vice-admiral and Arctic explorer, after whom W. Island is named.

WRANGEL, Peter Nicholaievich, baron (1878–1928). Russian general. B. at St. Petersburg, he commanded a division of Cossacks in the F.W.W., and in 1920 became C-in-C. of the 'White' army in the Crimea operating against the Bolsheviks. Later he became a mining engineer in Brussels.

WRASSE. Fish of the family Labridae, found in temperate and tropical seas. The most common British species is the ballan W. (*Labrus maculatus*).

WREN (ren), **Sir Christopher** (1632–1723). English architect. B. at East Knoyle, Wilts, he studied mathematics, and in 1660 became a prof. of astronomy at Oxford. His opportunity as an architect came after the Great Fire of London (1666). He prepared a plan for rebuilding the city, but it was not adopted. W.'s greatest achievement was St. Paul's Cathedral, built 1675–1710. The most noteworthy of his City churches are St. Michael's, Cornhill; St. Bride's, Fleet St.; and St. Mary-le-Bow, Cheapside. His other buildings incl. the Royal Exchange, Marlborough House—the W. towers of Westminster Abbey, often attributed to him, were the design of his pupil Hawksmoor—and buildings at Oxford, incl. the Sheldonian Theatre and the Ashmolean Museum. See illus. p. 1102.

WREN, Percival Christopher (1885–1941). British novelist. Out of his experiences in the French and Indian armies he wrote such martial novels as *Beau Geste* (1924), dealing with the Foreign Legion.

WREN. Name given to birds of the Passerine family, in particular *Troglodytes troglodytes*, a small brown bird, about 4 in. long, with a cocked-up tail.

WRESTLING. Sport in which 2 contestants strive to throw one another to the ground. It was very popular among the ancient Egyptians and Greeks, and was first incl. in the Olympiad about 704 B.C. The Romans adopted it from the Greeks, and in the Middle Ages it was a favourite English sport. It is widely practised in the Orient, particularly in Japan.

In Britain there are several styles. In N. England and S. Scotland wrestlers adopt the Cumberland style in which there is no ground play—the wrestler who first touches the ground loses the match. In the West Country (Cornwall and Devon) style, the wrestlers wear a short strong jacket and before one is vanquished 2 shoulders and one hip or 2 hips and one shoulder must touch the ground. 'Catch as catch can', or the Lancashire style, allows ground struggling, and the aim is to force both the opponent's shoulders to the ground. Of recent years 'all-in' W. which

Nature, and *Adventures of Ideas* (1933). W. received the O.M. in 1945.

WHITEHORSE. Cap. of Yukon Territory, Canada, on Lewes r., centre of a mining and fur-trapping region. W. is the terminus of a railway to Skagway, Alaska, U.S.A., and on the N.W. Highway; it also has an airport. It replaced Dawson as cap. in 1953. Pop. (1966) 4,771.

WHITE HORSE, Vale of the. Valley of the Ock, which flows into the Thames at Abingdon, England. It takes its name from the figure of a horse, 374 ft. long, cut in the chalk at Uffington, Berks. Similar figures are found at Bratton, Wilts, and elsewhere in England; some are probably prehistoric, and of totemic origin. See illus. p. 233.

WHITE HOUSE. Official residence of the president of U.S.A., in Washington, D.C. It is a plain edifice of sandstone painted white, built in the Italian renaissance style, 1792-9, to the designs of Hoban, who also restored it after it was fired by the British in 1814. The interior was completely rebuilt 1948-52 and the décor remodelled by Jacqueline Kennedy (q.v.). The name is first recorded in 1811.

WHITEMAN, Paul (1891-1967). American dance-band leader specializing in 'symphonic' jazz. He wrote an autobiography, *Jazz*.

WHITE RUSSIA. S.S.R. of the U.S.S.R. bordering on Poland. It is low-lying, and is drained by the W. Dvina, Dnieper and its tribs., incl. the Pripet and Beresina. The Pripet Marshes lie in the E.; forest covers more than a quarter of its area. The climate is mild and damp. Products incl. potatoes, flax, pigs, cattle, sheep in the agricultural area; chemicals, matches, timber, paper, textiles, lorries, cement, leather are industrial products. Power stations operate on peat from the extensive peat bogs. The rep. suffered severely under German invasion and occupation during the S.W.W. Minsk is the cap.; other large towns are Vitebsk and Gomel. Area 80,500 sq. m.; pop. (1968) 8,820,000.

WHITES. Term applied to the counter-revolutionary party during the French Revolution, when the royalists used the white lily of the French monarchy as their badge, and also during the Russian Civil Wars of 1917-21.

WHITE SEA. Gulf of the Arctic Ocean, on which stands the N. Russian port of Archangel. The N. Dvina and Onega flow into the W.S. which is frozen in the winter. The W.S. is linked by canal with the Baltic, the Black, and the Caspian Seas.

WHITGIFT, John (c. 1530-1604). English Anglican churchman. B. in Lincs, he became bp. of Worcester in 1577, and archbp. of Canterbury in 1583. He founded the W. school and almshouses in Croydon in 1596.

WHITING. Food-fish (*Gadus merlangus*) common in N. European waters. It differs from the haddock by the absence of a barbel on the chin.

WHITMAN, Walt(er) (1819-92). American poet. B. on Long Island, he worked in printing offices, as a schoolteacher, and as a journalist. In 1855 he pub. his most influential vol., later much enlarged, *Leaves of Grass*. He preached an American vision of freedom in union, expressed in verse stripped of the conventional ornaments of rhyme and regular metre. In 1865 he pub. *Drum-Taps*, a vol. inspired by his work as an army nurse during the Civil War. See illus. p. 1062.

WHITSTABLE. English resort (U.D.) in Kent at the mouth of the Swale, 6 m. N.W. of Canterbury. W. oysters are celebrated. Pop. (1961) 19,534.

WHITSUNDAY. Church festival held 7 weeks after Easter, corresponding to the Jewish Pentecost and commemorating the descent of the Holy Spirit on the apostles. The name is probably derived from the white garments worn by candidates for baptism at the festival.

WHITTEN-BROWN, Sir Arthur (1886-1948). British airman. After serving in the F.W.W., he took

part in the first non-stop flight across the Atlantic as navigator to Capt. John Alcock (q.v.) in 1919.

WHITTIER, John Greenleaf (1807-92). American poet. B. in Mass. of a Quaker family, he entered politics and journalism, and became a powerful opponent of slavery, as in the verse *Voices of Freedom* (1846). Among his other works are *Legends of New England in Prose and Verse*, *Songs of Labor* and the New England narrative *Snow-Bound* (1866).

WHITTINGTON, Richard (d. 1423). English merchant. B. in Glos, he made a large fortune as a mercer, and was mayor of London 1397-8, 1406-7, and 1419-20. His cat first appears in a play of 1605.

WHITTLE, Sir Frank (1907-). British engineer. He was on the special-duty list working on jet propulsion 1937-46. In 1941, the Gloster aircraft flew with the Whittle jet engine, and in 1948 his pioneer work in this field was recognized by a govt. award of £100,000.

WHOOPIING COUGH. Pertussis; a specific infectious fever probably due to a bacillus and conveyed by droplets from the nose and throat. It is marked by a peculiar and obstinate cough ending in a long crowing inspiration. The patient should be isolated for 5 weeks, and the cough may persist for months.

WHORTLEBERRY. See **BILBERRY**.

WHYMPER, Edward (1840-1911). British mountaineer. He made the first ascents of many alpine peaks incl. the Matterhorn (1865), and in the Andes scaled Chimborazo and other mountains. He was a capable wood-engraver, and wrote *Scrambles amongst the Alps* (1871), and *Zermatt and the Matterhorn* (1897).

WICHITA (wě'chēta). Largest city of Kansas, U.S.A., on the Arkansas, a milling centre with petroleum refineries, stockyards, foundries, and factories making aircraft, motor-vehicles, etc. W. has a municipal airport. Pop. (1960) 254,698.

WICK. Scottish seaport (royal burgh), co. town of Caithness, founded 1808 by the British Fisheries Association, an important fishing port (formerly chiefly herring) with shipyards, distilleries, etc., and an airport. Pop. (1961) 7,397.

WICKHAM, Sir Henry (1846-1928). British planter, who collected rubber seeds in Brazil, which then had a monopoly in rubber production, and so founded the plantations of Ceylon, Malaya, etc.

WICKLOW. Maritime co. of Leinster, Rep. of Ireland, S. of Dublin. The centre is occupied by W. mountains which reach 3,039 ft. in Lugnaquilla. The Slaney and Liffey are the main rivers. The co. town is the seaport (U.D.) of W.; pop. (1961) 3,117. Cattle are bred and lead and copper mined. Area 782 sq. m.; pop. (1966) 60,428.

WIDECOMBE-IN-THE-MOOR (wid'icūm). English village on Dartmoor, Devon, 5 m. N.W. of Ashburton, made famous by the song 'Widcombe Fair'. Pop. (est.) 700.

WIDGEON. Wild duck (*Anas penelope*). Smaller than the common wild duck, it has a red-brown head with cream crown greyish-pink breast and white beneath. The bill is blue-grey. In winter it frequents British coasts, but breeds farther south.

WID'NES. English industrial town (bor.) in Lancs, on the Mersey, 12 m. S.E. of Liverpool, with soap and chemical manufactures. Pop. (1961) 52,168.

WIECHERT (vë'khert), Ernst (1887-1950). German novelist. B. in East Prussia, he wrote melancholy novels of great beauty of diction, of which *The Baroness* (1934), *The Girl and the Ferryman* (1932) and others were trans. into Eng. *The Forest of the Dead* (1947) is an account of his experiences in Buchenwald concentration camp.

WIELAND (vë'lahnt), Christoph Martin (1733-1813). German poet and novelist. After attempts at religious poetry, he came under the influence of Voltaire and Rousseau, and wrote graceful novels such as *Agathon*, the satirical *Abderiten*, etc., and tales in

SIR CHRISTOPHER WREN. Portrait by Sir Godfrey Kneller, dated 1711, showing the architect with the plans for St. Paul's. A tablet within the north doorway gives his epitaph: *Si monumentum requiris, circumspice - If you seek his monument, look about you.* Photo: N.P.G.

recognizes no fouls has enjoyed a considerable vogue in Britain and U.S.A. In Japanese *sumo*, a bout is won by downing an opponent within the circle in the arena, or throwing him outside.

WREXHAM. Welsh market town (bor.) in Denbighshire, 12 m. S.W. of Chester, the seat of the R.C. bishopric of Menevia (Wales). Elihu Yale, benefactor of Yale univ., d. at W. and is buried in the 15th cent. church of St. Giles. Pop. (1961) 35,427.

WRIGHT, Frank Lloyd (1869-1959). American architect, B. at Richland Center, Wisconsin, the son of a minister and a schoolmistress of Welsh descent, he studied as a civil engineer, but turned to architecture on seeing the newly erected wing of the Wisconsin State Capitol collapse. One of the outstanding architects of the 20th cent., he has influenced design all over the world by his freedom from convention and rule. Among his works are his Wisconsin home Taliesin; and the Guggenheim Museum, N.Y.C. (1959).

WRIGHT, Joseph (1855-1930). British philologist. Prof. of comparative philology at Oxford 1901-25, he saved English local speech from oblivion by his 6-vol. *English Dialect Dictionary* (1896-1905).

WRIGHT, Judith (1915-). Australian poet. B. at Armidale, N.S.W., and m. to the philosopher J. P. McKimney, she has produced vols. of direct verse rooted in the Australian background, e.g. *The Moving Image* (1946) and *The Two Fires* (1955).

WRIGHT, Orville (1871-1948) and **Wilbur** (1867-1912). American flying pioneers. Orville was b. at Dayton, Ohio, and Wilbur in Indiana. Interested in gliding by Lilienthal's experiments in Germany, they made aeronautical researches and experiments while running a bicycle-repair business at Dayton. Eventually they built an aeroplane, driven by a 4-cylinder petrol motor of 12 h.p., which was successfully flown by Orville at Kitty Hawk, N.C., on 17 Dec. 1903 - the first controlled flight made by a heavier-than-air machine. The original machine (now in Washington) was exhibited at the Science Mus., S. Ken. 1928-48, and has been replaced by an exact replica. See illus. p. 431.

WRIGHT, Richard (1908-60). American Negro author. B. at Natchez, Mississippi, he went to New York in 1937 and in 1940 attracted attention with his portrayal of a Negro murderer as a creature of circumstance in *Native Son*. Later books incl. the autobiographical *Black Boy* (1945) and *The Outsider* (1953). Disillusioned with Communism (cf. his contribution to *The God That Failed*), he d. in Paris where he had settled in 1946 in protest against treatment of his race in the U.S.A.

WRIT. In English law, a precept under seal issued in the name of some executive officer of the Crown, e.g. the Lord Chancellor or a judge, and directed to some public officer such as a county sheriff, or to some private person, commanding him to take certain action in relation to a suit. Thus a W. constitutes the first step in legal proceedings, whether civil or criminal.

WRITERS TO THE SIGNET. A Scottish equivalent of English solicitors: a society of law agents whose predecessors were originally clerks in the Sec. of State's office entrusted with the preparation of documents requiring the signet or seal. The preparation of Crown writs, charters, etc., is the exclusive privilege of the society.

WRITING. The first stage in the development of W., leading to the true alphabet (q.v.) is the picture-W. on wood, rock, etc., examples of which date from c. 20,000 B.C. Primitive peoples of America, Africa, Polynesia, and Australia combine conventionalized picture-characters to represent simple ideas; Egyptian hieroglyphics, Babylonian and Assyrian cuneiform and Chinese writing use both these ideographs and phonetic word symbols side by side. Syllabic writing, found in the 2 Japanese developments of Chinese writing, grows up by the continued use of a symbol to represent the sound of a short word. Following the phonetic decay of their language the Egyptians evolved single consonant signs, but continued to combine them with ideographs, etc. A more advanced phonetic form of W. than the alphabet, in which each sign theoretically represents one sound, is shorthand.

WROCLAW (vros'lav). Town in Polish-admin. Germany, at the junction of the Oder and the Ohle, formerly cap. of German Silesia. Better known under its Ger. name Breslau, it grew up round the cathedral (1148), was in succession Polish, cap. of an independent duchy, Bohemian, Hungarian until Frederick the Great captured it (1742), then part of Prussia until Prussia was abolished in 1945. It suffered badly during the S.W.W. but was subsequently restored. It has a univ. (1811), originally a Jesuit college (1702). Pop. (1966) 477,000.

WRYNECK. Small bird (*Lynx torquilla*), a British summer visitant, which has a peculiar habit of twisting its head and neck - whence its name - and a distinctive call. It is generally grey, spotted and barred with brown.

WUCHANG. See under **WUHAN**.

WUCHOW. Chinese port and trade centre, on the Kwei r. in Kwangsi prov., making silk and cotton textiles, sulphuric acid, etc. It is c. 120 m. above Canton and was opened to foreign trade in 1897. It has a univ. Pop. (est.) 300,000.

WUHAN (three cities). Chinese city, cap. of Hupei prov., formed by the amalgamation of the anc. cities of Hankow, Hanyang, and Wuchang. It is at the junction of the Yangtze and the Han rivers and is a great centre and one of the chief industrial areas of China, with iron and steel and armaments works, cotton and silk textile factories, paper mills, etc. The three cities were in Japanese occupation 1938-45. There was a serious anti-Mao revolt in 1967 during the Cultural Revolution. Pop. (1957) 2,146,000.

WUHING (wōō'hing). Chinese city in Chekiang prov., on Tai Lake. It is an important agricultural centre and makes silk textiles. Pop. (est.) 50,000.

verse such as *Oberon*, *Musarion*, and others, W. was prof. at Erfurt 1769-72, and subsequently became tutor at the court of Weimar. He first trans. Shakespeare into German (1762-6).

WIEN. Ger. form of VIENNA.

WIESBADEN (vēs'bahden). Cap. of the Land of Hessen, W. Germany. W. was the cap. of the former duchy of Nassau from the 12th cent. to 1866. Pop. (1967) 258,178.

WIG. Artificial head of hair, worn as an adornment, disguise, or to conceal baldness. Ws. were known in the ancient world, and have been found on Egyptian mummies. The 16th cent. periwig imitated real hair, and developed into the elaborate peruke which became part of dress, and under Queen Anne Ws. covering the back and shoulders became fashionable. Ws. are worn in England and some Commonwealth countries as part of the costume of judges, barristers, and some parliamentary officials, and in the 1960s were fashionable (either in real hair or synthetics) for women.

WIGAN (wi'gan). English market and industrial town (co. bor.) in Lancs, on the Douglas, 12 m. N. of

WIESBADEN. Its hot springs with temperatures up to 150°F were known to the Romans. The modern Kurhaus, built 1904-7, replaced the structure of 1810 and now contains a casino, several restaurants, a concert hall and a nightclub. In the foreground is part of the fountain colonnade.

Courtesy of the German Tourist Information Bureau.

Warrington. Coal is worked, textiles, boots and shoes, bricks, pipes, and many other goods are manufactured. An old town, W. was captured by the Parliamentarians during the Civil War in 1643 and 1651. The W. 'alps', an area of industrial dereliction incl. colliery spoil heaps, is being re-shaped and developed with ski-slopes, boating facilities, etc., and is an outstanding example of reclamation after industrial blight. Pop. (1961) 100,158.

WIGGIN, Kate Douglas (1856-1923). American author. B. in Philadelphia, she was a pioneer in the running of kindergartens in America, and wrote *Rebecca of Sunnybrook Farm* (1903), etc.

WIGHT, Isle of. See ISLE OF WIGHT.

WIGTOWN. County of S.W. Scotland extending to the Rhinns of Galloway double peninsula, in the Irish Sea. The N.E. of the county is moorland. Dairying is the staple occupation. Stranraer is the chief port. W. the co. town. Area 487½ sq. m.; pop. (1961) 29,107.

WILBERFORCE, William (1759-1833). British reformer. B. at Hull, he began his attacks on slavery while at school, and from 1788 devoted himself to its abolition. He entered parliament in 1780, in 1807 his bill for the abolition of the slave-trade was passed,

OSCAR WILDE. 'The name of Dante Gabriel Rossetti is heard for the first time in the Western States of America. Time: 1882. Lecturer: Mr. Oscar Wilde', a cartoon by Sir Max Beerbohm. Courtesy of the Trustees of the Tate Gallery.

and in 1833, largely due to his efforts, slavery was abolished throughout the British Empire. His son Samuel W. (1805-73) was bp. of Oxford 1845-69, and then of Winchester, and was a noted defender of Anglican orthodoxy against the Tractarians.

WILBUR, Richard (1921-). American poet. B. in N.Y., he is a university teacher and his verse has an appropriate polish and substance, e.g. *The Beautiful Changes* (1947) and *Things of This World* (1957).

WILD, Jonathan (c. 1682-1725). English criminal, who organized the thieves of London and ran an office which for a payment returned stolen goods to their owners. He was hanged at Tyburn.

WILDE, Oscar Fingal O'Flahertie Wills (1854-1900). Irish writer. B. in Dublin, he was ed. there and at Magdalen Coll., Oxford, where he was a leader of the aesthetic circle burlesqued in Gilbert's *Patience*. His first *Poems* appeared in 1881, the novel *The Picture of Dorian Gray* in 1891, and the series of brilliantly witty comedies *Lady Windermere's Fan* (1892), *A Woman of No Importance* (1893), *An Ideal Husband* (1895), and *The Importance of Being Earnest*, (1895). After his conviction in 1895 for homosexuality he was imprisoned for 2 years. This experience prompted his *Ballad of Reading Gaol* (1898) and *De Profundis*, written in prison, and pub. in full for the first time in 1949. He latterly lived on the Continent.

WILDEBEEST. Two species of S. African antelope. The blue W. or brindled gnu (*Gorgon taurinus*) is grey or slaty brown; the black W. or white-tailed gnu (*Connochaetes gnu*) is smaller.

WILDER, Billy (1905-

). Austrian-American film director. B. in Vienna, he was a journalist before writing and directing such German films as *People on Sunday*. In Hollywood from 1934, where he collaborated with Charles Brackett on film scripts, e.g. *Ninotchka* (1939), he directed, as well as collaborating on the

BLUE WILDEBEEST

WUPPERTAL (voop'pertahl). Industrial town of N. Rhine-Westphalia, Germany, c. 20 m. E. of Düsseldorf, formed 1929 (named 1931) by uniting Elberfeld (13th cent.) and Barmen (11th cent.). Pop. (1966) 420,500.

WÜRTTEMBERG (vür'temberg). Former kingdom in S.W. Germany, 1805–1918, which joined the Ger. Reich in 1870. Its cap. was Stuttgart. Divided in 1946 between the Lander of W.-Baden and W.-Hohenzollern, from 1952 it was part of the Land of Baden-Württemberg (q.v.).

WÜRZBURG (würts'boorg). Town in Bavaria, W. Germany, on the Main, 55 m. N.W. of Nuremberg. W. became the seat of a bishopric in 741 and has an 11th cent. cathedral, an episcopal palace, a univ. (1402–34, refounded 1582). Furniture, leather goods, etc., are made and there are printing and engineering works, breweries and trade in wine. Pop. (1966) 120,890.

WYATT, Sir Thomas (c. 1503–42). English poet. He was employed on diplomatic missions by Henry VIII, and in 1536 was imprisoned for a time in the Tower, since he was thought to have been the lover of Anne Boleyn. In 1541 W. was again imprisoned on charges of treason. With the earl of Surrey, he pioneered the use of the sonnet in England. His son Sir Thomas W. the Younger (d. 1554) was one of the leaders in the revolt of 1554 intended to prevent the marriage of Queen Mary with Philip of Spain. After attacking the City of London, he was captured and executed.

WYCHERLEY, William (1640–1710). English dramatist. B. near Shrewsbury, he was ed. in France, and his 1st comedy *Love in a Wood* won him court favour in 1671. His modern reputation rests on the licentious *The Country Wife* and *The Plain Dealer* (1674).

WYCLIFFE, John (c. 1320–84). English reformer. B. probably nr. Richmond, Yorks, he went to Oxford and about 1360 was Master of Balliol Coll. From

1374 he was rector of Lutterworth. Allying himself with the party of John of Gaunt, who were opposed to ecclesiastical influence at court, he attacked abuses in the Church and about 1378 moved on to criticize such fundamental doctrines as priestly absolution, confession, and indulgences. He sent out bands of travelling preachers, and set disciples to work on translating the Bible into English. Although denounced as a heretic, he d. peacefully at Lutterworth.

SIR THOMAS WYATT.
son of the poet.
Photo: N.P.G.

WYNNE, David (1926–). British artist. B. in Hants, he was ed. at Stowe School and Trinity Coll., Cambridge. His works incl. portraits of Beecham, Gielgud, Menuhin and The Beatles; the marble 'Breath of Life' and bronze 'Christ and Mary Magdalen'. See illus. p. 485.

WYOMING (wi-ō'ming). One of the Rocky Mountain states of the U.S.A. It is semi-arid, and agriculture is possible only by irrigation and by 'dry-farming'. Mineral wealth is immense; petroleum, tin, natural gas, sodium salts, coal, phosphates, sulphur and uranium. Sheep and beef cattle are raised in large numbers. The state contains the Yellowstone national park, opened in 1872, and the Teton national park; and the tourist industry is next in importance to petroleum. The cap. is Cheyenne (pop. 1960, 43,505). W., admitted to the Union in 1890, gave women the franchise 1869, first representative body to do so. Pop. (1960) 330,066.

WYSS (vis), Johann Rudolf (1781–1830) Swiss author. B. at Berne, where he became prof. He is remembered for his *Swiss Family Robinson* (1813).

X The 24th letter in the English alphabet, having the sound which can be well represented medially by ks, and initially by z. It is derived through the Latin from the alphabet of western Greece, and was the last letter in the earlier Latin alphabet.

XAVIER (zav'i-er), St. Francis (1506–52). Jesuit missionary, known as the 'Apostle of the Indies'. B. at his mother's castle of Xavier in the Basque country of Spain, he became a lecturer at the univ. of Paris, and there was one of the first 7 members of the Order of Jesus (1534). Ordained priest in 1537, he went as a Catholic missionary to the Portuguese colonies in the Indies, arriving at Goa in 1542. In 1549–51 he was in Japan, establishing a Christian mission which lasted for 100 years. Returning to Goa in 1552, he sailed for China, and died of fever near Canton. He was canonized in 1621.

XENON (zen'on) (Gk. *xenon*, stranger). A heavy inert gas of the argon family, discovered in 1898 by Ramsay and Travers in the residue from liquid air: symbol Xe, at. wt. 131.30, at. no. 54. It occurs in the atmosphere to the extent of about one part in 20 million, and is used in incandescent lamps, in electronic flash lamps, and to give a beautiful blue glow in a discharge tube. It is a fission product of uranium nuclear reactors. Radioactive X. has recently been used in a new technique to measure the flow of blood

to the brain during acceleration on a centrifuge in connection with the effects of supersonic speeds on humans.

XENOPHANES (zenof'anēz) (fl. 6th cent. B.C.). Greek poet of Ionia, formerly thought to be the founder of the Eleatic school of philosophy. He was a scathing critic of anthropomorphism.

XENOPHON (zen'ōfōn) (c. 430–c. 354 B.C.). Greek historian, philosopher, and soldier. B. in Athens, in his youth he was a friend and ardent disciple of Socrates. In 401 B.C. he accompanied a body of Greek mercenaries employed by the Persian prince Cyrus in an expedition against Cyrus's brother, the king of Persia. Cyrus was killed in the battle of Cunaxa, and the Greeks were left stranded in the heart of the Persian Empire. X. succeeded to the command, and led them across more than 1,000 m. of enemy-infested country to the Bosphorus. This 'march of the 10,000 Greeks' is the subject of his famous historical work, the *Anabasis*. Subsequently he served in the Spartan Army, and lived on his estate at Scillus in Elis. Among his other works are the *Memorabilia*, *Apology*, and *Symposium*, consisting of recollections of Socrates.

XEROGRAPHY. A dry, non-chemical method of producing images without the use of negatives or sensitized paper. An electrostatically charged photoconductive plate (1 and 2) is exposed in a camera to

script of *Lost Weekend* (1945) and *Sunset Boulevard* (1950), and such sophisticated comedies as *Some Like it Hot* (1959) and *The Apartment* (1960).

WILDER, Thornton Niven (1897–). American playwright and novelist. B. at Madison, Wisconsin, he made his name with the novel *The Bridge of San Luis Rey* (1927), tracing the lives of those involved in a disaster, which had many imitators: best of later books was *The Ides of March* (1942), set in ancient Rome. His plays *Our Town* (1938) and *The Skin of Our Teeth* (1942) were attempts to deepen the content of contemporary drama on lines later taken up by Miller and Williams.

THORNTON WILDER

WILFRID, St. (634–709). B. in Northumbria, he became bp. of York in 665, after defending the Roman cause at the Synod of Whitby.

WILHELMSHAVEN (vil'hehmshahfen). Seaport of Lower Saxony, on Jade Bay. W. Germany's chief naval station, it has many small industries and is a holiday resort. Pop. (1966) 101,370.

WILKES, John (1727–97). British Radical politician. B. in Clerkenwell, he entered parliament as a Whig in 1757. His attacks on Bute in his paper, *The North Briton*, led to his outlawry in 1764; he fled to France, and on his return in 1768 was imprisoned. He was 4 times elected M.P. for Middlesex, but the Commons refused to admit him, and finally declared his opponent elected. This secured him strong working- and middle-class support, and in 1774 he was allowed to take his seat in parliament, where he championed parliamentary reform, religious toleration, and American independence.

WILKIE, Sir David (1785–1841). Scottish genre painter. B. in Fifeshire, he studied at the R.A. schools, and estab. his popularity with 'Village Politicians' in 1806. Other works incl. 'The Blind Fiddler', 'Village Festival', and 'The Parish Beadle'. He was elected R.A. in 1811, and became painter-in-ordinary to the king in 1830.

WILKINS, Sir Hubert (1888–1958). Australian explorer. B. in S. Australia, he studied engineering, learnt to fly in 1910 and visited both polar regions. In 1928 he flew from Barrow (Alaska) to Green Harbour (Spitsbergen), for which he was knighted, and in 1928–9 made an Antarctic flight which proved that Graham Land is an island: Ben Eielson was his pilot on both flights. He also planned to reach the N. pole by submarine.

WILL. An instrument executed by a person (being neither an infant nor lunatic) as a disposition of his property on death. The rules governing the execution of Ws. are mainly contained in the Ws. Act, 1837. A soldier or sailor on active service may make a W. in any clear form, but otherwise the W. must be in writing or print. It must be signed by the testator in the presence of 2 witnesses who also sign, and may not be beneficiaries under the W. Practice in the U.S.A. is based on similar lines.

WILLIAM I, called the Conqueror (c. 1027–87). King of England and duke of Normandy. B. at Falaise, the illegitimate son of duke Robert the Devil, he succeeded his father in the duchy in 1035. Claiming that he had been bequeathed the English throne by his kinsman Edward the Confessor, he invaded England in 1066, defeated and killed Harold at Hastings, and was crowned king. His reign marks the complete establishment of feudalism in England, although W. kept the barons firmly under Crown con-

trol. He d. at Rouen after a fall from his horse, and was buried at Caen. *See* *illus.* p. 512.

WILLIAM II, called Rufus (the Red), (c. 1056–1100). King of England. The 3rd son of William I, he inherited England in 1087, and spent much of his reign attempting to conquer Normandy from his brother Robert. His exactions led to baronial revolts, while his methods of extorting money from the Church brought him into conflict with archbishop Anselm. He was killed while hunting in the New Forest, and was buried in Winchester cathedral.

WILLIAM III, called W. of Orange (1650–1702). King of Gt. Britain and Ireland. B. at The Hague, the son of William II of Orange, and Mary, dau. of Charles I, the French invasion of the Netherlands in 1672 led to his installation as stadholder. His stubborn resistance forced Louis XIV to make peace in 1678, and from that time he devoted himself to building up a European alliance to resist French aggression. In 1677 he m. his cousin Mary, dau. of James, duke of York. Invited by the opposition, he invaded England in 1688, and accepted the crown, as joint sovereign with Mary, in 1689. He accepted a constitutional settlement whereby parliament secured the main control of policy, although he attempted to safeguard his power by playing off the 2 parties against each other. Much of his reign he spent campaigning, first in Ireland, where in 1690 he defeated James II at the Boyne, and later against the French in Flanders.

WILLIAM IV (1765–1837). King of the United Kingdom. B. at Buckingham Palace, the 3rd son of George III, he was cr. duke of Clarence in 1789, and m. Adelaide of Saxe-Meiningen in 1818. He succeeded George IV in 1830, and during the Reform Bill crisis secured its passage by agreeing to create new peers.

WILLIAM I (1797–1888). King of Prussia and German emperor. B. at Berlin, the son of Frederick William III, he served in the Napoleonic campaigns of 1814–15, and helped to crush the 1848 revolution. He succeeded his brother Frederick William IV in 1861. His policy was largely dictated by Bismarck (q.v.), who secured his proclamation as German emperor in 1871.

WILLIAM II (1859–1941). German emperor. The son of Frederick III and of Victoria, dau. of Queen Victoria, he succeeded his father in 1888. He began his reign by forcing Bismarck to resign in 1890, and his blundering interventions in the field of foreign policy were usually disastrous. During the 1914 crisis, he at first approved Austria's ultimatum to Serbia; then, realizing war was imminent, strove to prevent it when it was too late. On the outbreak of revolution in 1918 he fled to Holland, and spent the rest of his life at the castle of Doorn.

WILLIAM. Name of 3 kings of the Netherlands. William I (1772–1844), the son of Prince William V of Orange, lived in exile during the French occupation of 1795–1813, and fought against Napoleon at Jena and Wagram. In 1814 he assumed the title of king; the Austrian Netherlands was added to his kingdom by the Allies in 1815, but secured independence (recognized by the Powers 1839) by the revolution of 1830. W.'s unpopularity led to his abdication in 1840. His son William II (1792–1849) served with the British Army in the Peninsular War and at Waterloo. He succeeded his father in 1840, and by conceding a liberal constitution in 1848 averted revolution. William II's son, William III (1817–90), reigned 1849–90.

WILLIAM, called the Lion (1143–1214). King of Scotland. He became king in 1165. While invading England in 1174 he was captured and forced to do homage for his kingdom to Henry II, but the English claim to suzerainty was abandoned by Richard I in 1189 for a money payment.

WILLIAM. Ger. Crown Prince. *See* **FREDERICK W. WILLIAM**, called the Silent (1533–84). Prince of

Courtesy of Rank Xerox Ltd.

the object to be copied (3), allowing the charge to remain only in the area corresponding to the object (3A). The latent image thus formed on the plate is developed by contact with powder which adheres only to the image (4); this powder image is then usually transferred on to ordinary paper or some other flat surface (5 and 6), and heated quickly to form a permanent print (7). Applications incl. document copying, enlarging from microfilm, preparing printing masters for offset litho and dyeline machines, making X-ray pictures and printing high-speed computer output.

XERXES I (zérk'sez). King of Persia, 485–465 B.C. The son of Darius, he became king on his father's death, and continued with the project of invading Greece. At the head of an army of perhaps 400,000 men, supported by a fleet of 800 ships, X. in 480 B.C. crossed the Hellespont over a bridge of boats. The Greek fleet was beaten at Artemisium, the pass of Thermopylae was stormed, Athens was taken and burnt. But at Salamis the Persian fleet was annihilated by the Greeks under Themistocles and X. returned to Persia, where he was murdered.

XHOSA (kō'sah). See **KAFFIR** and **TRANSKEI**.

XOCHIMILCO (khōchēmēl'kō). Lake about 7 m. S.S.E. of Mexico City, Mexico, famous for its floating gardens.

X-RAYS, or Röntgen rays after their discoverer in 1895, are those radiations in the electromagnetic spectrum which are next to ultra-violet rays in the direction of the shorter wavelengths. They are identical in character with wireless and light waves, but very much shorter. They can penetrate bodies opaque to ordinary light, even a thin sheet of lead or several feet of wood; this property is made use of in radiography, when the bones of the human body are clearly revealed in an X-ray photograph. Even more valuable is their use in radiotherapy; living cells are more resistant to X-rays than malignant ones, so that deep-seated growths may be successfully attacked and often dispersed or destroyed. Generally speaking they are emitted when high-speed electrons

suffer an abrupt loss of energy. Whilst invisible they may be detected by photographic plates, fluorescent screens and by the ionization they produce in gases.

X-ray astronomy has developed since the S.W.W. The Sun and other sources in the universe emit X-rays which are prevented by the atmosphere, which acts as if it were a yard-thick lead shield, from reaching us. The first rocket used to take X-ray photographs was a German V-2, which was captured and used at White Sands, New Mexico, in 1948, but in the 1960s Britain made great advances using the triaxially stabilised Skylark rocket fired in experiments at Woomera.

XYLOPHONE (zi'lōfōn). Musical instrument consisting of a number of wooden bars, arranged in rows over resonators, and struck with hammers.

XOCHIMILCO. Hired pleasure boats beautifully decorated with fresh-cut flowers navigate the canals between the gardens on the lake. Some carry singers and guitarists to provide entertainment for the citizens of Mexico City, for whom it is a favourite leisure haunt.

Courtesy of the Mexican Government Tourist Department.

BANKHEAD, Tallulah (1903-68). American actress. B. in Alabama, dau. of Senator Wm. B. Bankhead, she became a radio, stage, and screen star. Celebrated for her wit, she appeared with success in *Private Lives* and as Sabina in *The Skin of Our Teeth*.

BANKRUPTCY. The process by which the property of a person unable to pay his debts is taken from him and divided rateably among his creditors. Proceedings may be instituted either by the debtor himself (voluntary B.) or by any creditor for £50 (or \$1,000 in the U.S.) or over (involuntary B.).

BANKS, Sir Joseph (1743-1820). British naturalist and explorer. B. in London, he accompanied Capt. Cook round the world, 1768-71, played a leading part in the development of New S. Wales, was a principal founder of the Botanical Gardens at Kew, introduced fresh food and plants into various parts of the world, and was President of the Royal Society from 1778.

BANKING. Banks are essentially intermediary financing institutions which do not own the larger part of the funds they employ, but owe them in turn to others. A country's monetary supplies are commonly controlled by entrusting the issue of notes to a central bank.

Modern B. originated with the Lombards who disappeared from England at the time of the Reformation, their place being taken by the goldsmiths, who received money for safe custody from their clients, and lent it out again to approved borrowers - the 1st cheques being their 'notes' or receipts. Firms so specializing developed into private banks. The *Bank of England* was founded with govt. backing in 1694, but private banks continued to flourish until the Napoleonic wars: joint-stock B. was legalized in 1826 but such banks were not permitted to operate in London, hitherto the Bank of England's preserve, until 1833. The Bank Charter Act of 1844 practically concentrated the note issue in the Bank of England, but joint-stock banks expanded through the cheque system, the present British 'Big Five' - the result of a long process of amalgamation - being Barclays, Lloyds, Midland, National Provincial, and Westminster. All have subsidiaries at home and abroad. Besides a number of other general bankers, there are also some 'merchant bankers' primarily concerned with commerce. In 1946 the Bank of England, till then a private corporation, was nationalized, but this marked no substantial change of function. In Europe there are similar central banks, but in the U.S. it was only in 1914 that a series of independent bank failures led to the estab. of the *Federal Reserve*

BANKING. A manual ledger-keeper formerly took several minutes to post entries which an electronic computer deals with in a few millionths of a second. Carefully designed characters (right) are used to print in special ink across the lower edge of a cheque the serial number of the item, the bank and branch number, the account number and - at a later stage - the amount. These can be detected and interpreted by electronic machines, known as M.I.C.R. (Magnetic Ink Character Recognition): the electronic cheque sorter/reader (left) sorts 700 items per minute into branch and account order and, under control of the central computer, records all the details on magnetic tape. The system originated in the U.S.A. and was first used in Europe by the Westminster Bank.

Courtesy of the Westminster Bank.

System. All national banks (those chartered by the Federal controller of the currency) are compulsory members: for state banks (those chartered by individual B. depts.) membership is optional. Co-operation between the Federal Reserve System and the U.S. treasury is close, especially since the 1933 crisis in B.: there is no one central bank, but the country is divided into 12 districts each with a Federal Reserve Bank.

Banks obtain payment of the cheques and bills of exchange, etc., drawn upon each other, through a *Bankers' Clearing House*. In the U.K. each bank has an account at the Bank of England, and the daily balances of amounts due and receivable are made by transfer through these accounts: the London clearing house was estab. 1770 and there are others in the chief provincial cities. The N.Y. clearing house dates from 1853, and each great city of the U.S. has its own.

The *International Bank for Reconstruction and Development* was estab. in 1945 as a result of the Bretton Woods Conference of 1944 and is popularly known as the 'World Bank': its H.Q. are in Washington. It aids international investment for production purposes, supplementing private investment from its own capital in order to improve the balance of world trade and living standards everywhere. The *Economic Development Institute* (estab. 1956) is an offshoot where economic planning can be studied by representatives of member countries, and there is an *International Centre for Settlement of Investment Disputes* (1966) with the pres. of the World Bank as chairman: both are in Washington. See UNITED NATIONS.

BANK RATE. The advertised minimum rate at which the Bank of England will discount Treasury Bills and approved bills of exchange. It provides an important means of economic control since the rates of other banks for loans, deposits, etc., are normally based on this rate.

BANNISTER, Roger (1929-). British doctor and athlete. On 6 May 1954, at Oxford, he became the 1st man in the history of athletics to run the mile in under 4 min., his time being 3 min. 59.4 sec. In 1963 he became physician to the Nat. Hospital for Nervous Diseases, London.

BANNOCKEURN. Town in Stirlingshire, Scotland, where on 24 June 1314 Robert Bruce completely defeated an army of English invaders under Edward II. It manufactures woollen goods. Pop. c. 5,000.

BANTENG. A species (*Bibos banteng*) of wild ox ranging from Indo-China through Burma to Java

and Borneo. Its colour varies from pale brown to almost black; its height is about 5 ft.

BANTING, Sir Frederick Grant (1891–1941). Canadian scientist, discoverer with Prof. Macleod, Dr. Best, and others, of the insulin treatment for diabetes (1922), for which in 1923 he and Macleod received a Nobel Prize. B. was killed in an aeroplane crash in Newfoundland.

BANTOCK, Sir Granville (1868–1946). British composer. B. in London, he became known as a conductor of musical comedy and modern Eng. music, and was prof. of music at the Univ. of Birmingham 1908–34. He was knighted in 1930. His works incl. the choral symphony *Atlanta in Calydon*, *Hebridean Symphony*, and a setting of *Omar Khayyām*.

BANTU (ban'too). A group of related languages, spoken by predominantly Negroid peoples widely spread over the greater part of Africa S. of the Sahara. The word comes from the Zulu, and illustrates the inflexional use of the prefix which is the main structural peculiarity of B.: *ba-ntu*, people; *mu-ntu*, a man, etc. The origin of the B.-speaking peoples may have been in N. Central Africa. The B.-speaking natives of S. Africa are officially styled *Native*.

BANVILLE (boñvēl'), Théodore Faullain de (1823–91). French poet, dramatist, and novelist. B. at Moulins, he made his name among the French Romantic poets with many vols. of verse such as *Les Cariatides* (1841). Of his plays *Gringoire* (1866) is the best-known.

BANYAN. A tree (*Ficus benghalensis*) of the tribe Moraceae. Its roots grow down from its spreading branches, forming supporting pillars which have the appearance of separate trunks.

BANYAN, held a sacred tree by Hindus.

BAOBAB (bah'obab). Tropical African tree (*Adansonia digitata*) of the family Bombaceae. Its trunk grows 30 ft. thick, and it is one of the largest trees known.

B.A.O.R. Short for British Army of the Rhine, the name adopted in 1945 for the occupation forces in Germany, which had previously been called the British Liberation Army.

BAPTISM (Gk. *baptizo*, I dip, submerge). Immersion in or sprinkling with water, particularly as a religious rite of initiation. In antiquity and among primitive peoples the practice has been widespread; in some of the mystery religions blood took the place of water. B. was universal in the Christian Church from the first days, being administered to adults and by immersion. The B. of infants was not practised until the 2nd cent., but became general in the 6th. B. by sprinkling (christening) when the child is named is now general in the West except for some sects, notably the Baptists (q.v.) where complete immersion of adults is the rule. The Eastern Orthodox Church also practises immersion.

BAPTISTS. A world-wide Christian community,

practising baptism by immersion of believers only on profession of faith. They stand in the Protestant and evangelical tradition, seek their authority in the Bible, emphasize the right of the soul to an immediate relation to God, and conceive the Church as a fellowship of the spiritually regenerate.

BARBARY APE

Bs. originated among the English Separatists who took refuge in Holland in the early 17th cent., the first English B. being Rev. John Smyth, a Cambridge scholar and an ordained minister of the C. of E. The first Baptist Church in America was organized on Rhode Island in 1639 by Roger Williams. In the 19th cent. there was considerable B. development on the continent of Europe. There are virile B. communities in the Commonwealth. Of the world total of c. 23,000,000, some 21,000,000 members are in the U.S. and c. 314,000 in the U.K.

The Baptist Missionary Society, formed in 1792 under the inspiration of William Carey, pioneered in the modern missionary movement. In 1905 the Baptist World Alliance was formed.

BARBÁ'DOS. Most easterly is. of the W. Indies, British since 1627, which became independent within the Commonwealth in 1966. It lies in the Atlantic to the E. of the Windward Is. The volcanic soil is fertile, and produces sugar, cotton, tobacco, indigo, and arrowroot. Bridgetown is the chief port and city. There is a Senate and an elected House of Assembly dating from 1627. Area 166 sq. m.; pop. (1967) 250,000.

BARBARO'SSA. Name given to the German emperor Frederick I (q.v.), and also to two brothers who were Barbary pirates: Horuk was killed by the Spaniards in 1518, Khair-ed-Din took Tunis in 1534, and d. at Constantinople in 1546. The name means 'red beard'.

BARBARY. Traditional name for N. Africa W. of Egypt and N. of the Sahara, named after the Berbers, its principal inhabitants. See **CORSAIRS**.

BARBARY APE. Species (*Macaca sylvana*) of monkey, native to the mountains of Algeria and Morocco; introduced into Gibraltar, it is the only kind of monkey now found wild in Europe. Yellowish brown, the species has no visible trace of a tail. Legend has it that if the colony dies out, Britain will lose Gibraltar.

BARBASTE'LE. Species (*Barbastellus barbastella*) of bat found in Britain and neighbouring parts of Europe. Although it is only the size of a mouse, its wings have a span of some 10 in.

BARBAULD (bah'r'bawld) (née Aikin), Anna Letitia (1743–1825). British author of numerous works in prose and verse, notably *Hymns in Prose for Children*.

BAR'BEL. Genus of freshwater fish (*Barbus*) of the carp family (Cyprinidae), so called because of the soft appendages near the mouth (Lat. *barba*, beard).

BARBE'LLION, W. N. P. Pseudonym of Bruce Frederick Cummings (1889–1919), British biologist and diarist. He held an appointment at the Natural History Museum, London, and was the author of the remarkable *Journal of a Disappointed Man*.

BARBIRO'LLI, Sir John (1899–). British conductor. B. in London, of French and Italian stock, he made a name as a cellist, and founded the B. Chamber Orchestra in 1925. He was permanent conductor to the N.Y. Philharmonic Symphony Orchestra 1937–42, and to the Hallé Orchestra, Manchester, 1943–58, continuing as principal conductor from 1958. He was knighted in 1949. His style has a temperamental brilliance. See illus. p. 105.

BARBIZON (bahrbēzon'). French village on the outskirts of Paris near the forest of Fontainebleau

Y The 25th letter in the English alphabet, derived through the later Latin alphabet from the Greek letter *upsilon*. In modern English it represents the sound of long and short *i*, when used as a vowel, and when used as a consonant in such words as yoke, yacht, etc., is a palatal spirant.

YACHT (yot). A small and light vessel, whether sailing or power-driven, used for pleasure-cruising or for racing. Most prominent of English yacht clubs is the Royal Y. Squadron, estab. at Cowes in 1812, and the Y. Racing Assocn. was founded in 1875 to regulate the sport. See AMERICA'S CUP. The royal yacht *Britannia* (1953) has a displacement of 4,000 tons, and overall length of 413 ft.

YAK. The wild ox (*Bos grunniens*) of Tibet, related to the bison. When wild it is black, but in domestication it is often black and white. It stands nearly 6 ft. at the shoulder, and has characteristic long shaggy hair on the underparts.

YAKUT (yakōot') A.S.S.R. An Asian autonomous rep. of the R.S.F.S.R., in the valley of the Lena r. Much of its surface is barren tundra, and the climate is severe, but there is some agriculture in the S. Gold, silver, diamonds, tin, mica, coal, etc., are mined; fur-bearing animals (sable, silver fox, etc.) are both trapped and bred; reindeer are reared. Roads total c. 6,000 m.; there are internal air services and an external service to Irkutsk. Y. became an autonomous rep. in 1922. The Yakuts, a people of Turkic stock and formerly nomadic, were subdued by Russia in the 17th cent. The cap is Yakutsk (pop. 1967, 95,000) on the Lena. Area 1,197,800 sq. m.; pop. (1967) 646,000.

YALE. Third-oldest (1701) and one of the most important univs. of U.S.A. It is at New Haven, Conn., and was named after Elihu Yale (1648-1721), b. at Boston, Mass., one-time governor of Fort St. George, Madras, who in 1718 sent a cargo of books, pictures, etc., which realized £562 12s. for the benefit of the then college (univ. 1887).

YALTA. Russian holiday resort with a pleasant climate in the Crimea, Ukrainian S.S.R., 32 m. E.S.E. of Sevastopol. Livadia, summer palace built by Nicholas II 1910-11, was the site of the Y. conference, 1945, at which Churchill, Roosevelt, and Stalin completed plans for the defeat of Germany and the foundation of the U.N.

YAM. The thick tuberous roots of plants of the genus *Dioscorea*, which in tropical countries, e.g. the S. Sea islands, are eaten in the place of potatoes.

YANG-KU. Name 1912-47 of TAIYUAN.

YANGTZE-KIANG (yang'tsa kyang). The reatest river of China, rising in Tibet, and flowing into the Yellow Sea. Length c. 3,400 m. A road-rail bridge (22,000 ft. long) was opened at Nanking 1968.

YANKEE. Name often applied by Europeans to the people of the U.S.A. in general, although more properly confined to those of the New England states.

YARD. A measure of length, equal to 3 ft. or 36 in. It is supposed to have been the length of the arm of King Henry I.

YARKAND (yahrkand') (Chinese *Soche*). A walled city of Sinkiang-Uighur in an oasis of the Tarim basin. Irrigation ensures agriculture and pastoral activity. It is a centre of Islamic culture. Pop. c. 80,000.

YARMOUTH, or Great Yarmouth. English fishing port and seaside resort (co. bor.) in Norfolk, at the mouth of the Yare. It has a good harbour, and claims to be the largest herring port in the world. Other industries incl. shipbuilding, marine engineering, and textiles. Pop. (1961) 52,860. Another YARMOUTH, a

small port in the Isle of Wight, is a yachting centre. The French burned it in 1377 and 1544.

YAROSLAVL (yahrōslahvl'). Town in the R.S.F.S.R., cap. of Y. region, on the Volga 155 m. N.E. of Moscow. It takes its name from Yaroslav the White who founded it in 1024, and has a number of old buildings. Y. makes textiles synthetic rubber, paints, motor-lorries, etc. Pop. (1967) 486,000.

YARROW, or Milfoil. A common wayside plant (*Achillea millefolium*) of the Compositae family, found throughout the northern hemisphere usually with flat-topped clusters of white flowers.

YARROW. A Scottish river, 14 m. long, in Selkirkshire, flowing into the Tweed, and famous in poetry.

YAWATA (yahwah'ta). See KITAKYUSHU.

YAWS. A contagious disease common in the West Indies, characterized by red, raspberry-like eruptions upon the face, toes, and other parts of the body. A very similar disease is found in W. Africa.

YAWS. Five-year-old Ede Nwaebgo of Nigeria (left), disfigured by the disease, and (right) after 10 days' penicillin treatment.
Courtesy of W.H.O.

YAZD. Alternative form of YEZD.

YEAR. A unit of time measurement. The calendar Y. consists of 365 days, but leap Y. - a Y. the date of which is divisible by 4 without remainder - consists of 366 days, an extra day being added to Feb. The last of a cent. is not leap Y., however, unless it is divisible by 400. The tropical, solar, or equinoctial Y. is the time taken by the earth to revolve round the sun from equinox to equinox, i.e. 365.2422 mean solar days (365 days, 5 hrs. 48 mins 46 secs.). The sidereal Y. in which the observation is made on a star is 365 days, 6 hrs. 9 mins. 9 secs. An historical Y. begins on 1 Jan. but up to 1752 the civil or legal Y. began on 25 March. The regnal Y. begins on the anniversary of the sovereign's accession; it is used in the dating of Acts of Parliament.

YEAST. A mass of minute circular or oval vegetable cells about 1/3000th in. in diameter, each of which is a complete plant capable under suitable conditions of reproducing new cells by budding. When placed in a sugar solution they multiply and convert the sugar into alcohol and carbon dioxide. Ys. are used in leavening bread, fermenting beer, etc.

YEATS (yāts), William Butler (1865-1939). Irish poet. Of Anglo-Irish stock, he was b. in Dublin, son of a lawyer turned painter. He became the leading figure of the Celtic revival, helping to found the Abbey Theatre, and as a believer in Irish nationalism sitting in the Irish senate 1922-8. His early poetry e.g. *The Wind Among the Reeds* (1899) is romantically and exotically lyrical, and he drew on Irish legend for his poetic plays e.g. *The Countess Kathleen* (1892) and *Diddre* (1907), but broke through to a new sharply resilient style with *Responsibilities* (1914). In his personal life there was also a break: the beautiful Maude Gonne to whom many of his poems had been addressed finally refused to marry him. and in 1917

he m. Georgic Hyde-Lees, whose gifts as a medium reinforced his leanings towards mystic symbolism, cf. the prose *A Vision* (1925 and 1937). His later vols. of verse, of astonishing maturity and lyric inspiration, incl. *The Wild Swans at Coole* (1919), *The Tower* (1927), *The Winding Stair* (1933) and *Last Poems* (1939). His prose works incl. *Autobiographies* (1926), *Dramatis Personae* (1936), *Letters* (1954) and *My Theologies* (1959).

His younger brother, Jack Butler Y. (1871–1957), was a well-known artist, using black-and-white to illustrate his own stories, and oil to depict scenes of Irish life, e.g. 'Back from the Races' in the Tate, and later legendary themes.

YEDO. Name until 1868 of TOKYO.

'YELLOW BOOK.' An illustrated quarterly magazine pub. in London 1894–7, in which appeared literary and artistic contributions from Aubrey Beardsley, Max Beerbohm, Henry James, etc.

YELLOW FEVER. Sometimes called yellow jack. An endemic infective f. of the tropics, particularly prevalent in the Caribbean area, Brazil, and the W. Coast of Africa. One of the symptoms is a yellowish skin. It has been brought under control following the discovery that it is carried by a mosquito. The 1st effective vaccines were produced by Max Theiler of N.Y. (Nobel prize 1951).

YELLOWKNIFE. Cap. of N.W. Territories, Canada from 1967, centre of a gold-mining area discovered in 1934. It is on the N. shore of Great Slave Lake and was founded 1935. It has an airport. Pop. (1966) 3,741.

YELLOW RIVER. See HWANG-HO.

YELLOWSTONE NATIONAL PARK. A national American reserve, estab. 1872 and maintained by the U.S. govt. in N.W. Wyoming, on a broad plateau in the Rocky Mts. It incl. more than 3,000 geysers and hot springs, and very fine scenery. Area 3,458 sq. m.

YEMEN (yem'en). Country in S.W. Arabia, the *Arabia Felix* of the ancients, bounded on the N. by Saudi Arabia and on the S. by the Rep. of Southern Y. It is the most fertile region of Arabia and exports coffee, grain, etc. The king was killed in a revolt 1962 and a rep. estab., but royalists (with Saudi aid) resisted the new govt. (aided by Egypt), and local fighting continued. There are 2 caps., San'a and Taiz; other towns are the ports Mocha and Hodeida.

Area 75,000 sq. m.; pop. c. 4,500,000.

YEMEN, Southern. Independent rep. of S.W. Arabia from 1967; for earlier history see ADEN. Cotton is the chief export crop, and modern irrigation is being adopted. The cap. is Madinet al-Shaab. In 1969 the pres. was overthrown and a 5-man presidential council set up. Area 61,890 sq. m.; pop. (1969) 1,500,000. Also part of Y. are the is. of Perim and Socotra (q.v.) and Kamaran (area 70 sq. m.).

YENISEI (yenēsā'-ē). Great river of Asiatic Russia, rising in Tuva region and flowing across the Siberian plain into the Arctic Ocean. Its length is about 2,360 m.; its chief tributary is the Angara.

YEOMAN (yo'-). In England, between the break-up of the feudal system and the agricultural revolution of the 18th–19th cents., a small landowner who farmed his own fields.

YEOMANRY. Volunteer cavalry organized 1794, and incl. in the Territorial Army (q.v.) 1907.

YEOMEN OF THE GUARD. A military corps which was founded by Henry VII in 1485 and since then has constituted the bodyguard of the English sovereign. Its duties are purely ceremonial, and the uniform and weapons are much as they were in Tudor times. The nickname of 'Beefeaters' is supposed to have originated in 1669 when the grand-duke of Tuscany ascribed their fine appearance to beef.

YEREVAN (yerevahn'). Cap. of Armenian S.S.R., in the valley of the Zanga, a few m. N. of the Turkish border. It makes tractor parts, machine tools,

chemicals, bricks, bicycles, wine, and cans fruit and vegetables. The Armenian state univ. (1921) is at Y. Founded in the 7th cent., Y. was alternately Turkish and Persian from the 15th cent. until ceded to Russia, 1828. Pop. (1962 est.) 583,000.

YERSIN (yārsañ), Alexandre Émile John (1863–1943). Swiss bacteriologist, who discovered the plague bacillus in Hong Kong in 1894 and prepared a serum.

YEVTUSHENKO, Yevgeny (1933–). Russian poet. B. in Siberia, he aroused controversy by his anti-Stalinist 'Stalin's Heirs' (1936), pub. with Khrushchev's support. He pub. his *Autobiography* (1963).

YEW

YEW. An evergreen tree (*Taxus baccata*) belonging to the Taxaceae family. It has densely spreading branches with very dark, linear, leathery leaves. The seeds are set in a fleshy, rose-red cup. Both leaves and seeds are poisonous.

YEZD. Town of central Persia, in a fertile oasis c. 170 m. E.S.E. of Isfahan. It is on an important trade route, and is renowned for its woven silks. Pop. (1956) 63,502.

YEZIDIS (yezē'dēz). A religious sect of Iraq, whose chief centre is near Mosul. Their religion is a mixture of Christianity and Islam; they practise baptism and circumcision, but regard the devil as God's agent and endeavour to keep in his favour.

YEZO (yezō). Another name for HOKKAIDO.

Y-FACTOR. All men inherit from their fathers one Y chromosome (q.v.) which gives them their male characteristics, and some (probably 1 in 300) inherit 2, which gives added height, greater emotional instability, inability to bear frustration, and great aggressiveness. Crimes of violence are frequently committed by such men and possession of the Y-factor, immediately detectable under the microscope, has in France and Australia (1968) been successfully pleaded in mitigation in murder cases.

YIDDISH (Ger. *Jüdisch*, Jewish). The language spoken by Polish and Russian Jews that is based on the German spoken by their ancestors in the Rhineland and has absorbed many Hebrew, Russian, Polish, etc., words. Its literature arose out of the folk songs of eastern Europe and assumed importance in the latter half of the 19th cent., when Russian Jewish writers such as Spektor, Frug, Abramovich, Peretz, and Sholem Alechem wrote in Yiddish.

YŌ'GA (Sanskrit, union). A system of Hindu philosophy, characterized by belief in a personal deity with whom it is possible to attain mystical and ecstatic union by the practice of hypnosis and a complicated and prolonged system of mortification of the senses, e.g. by abstract meditation, induced apathy, rigidity of posture, ascetic practices, concentration of mind on one particular point, etc. Siva is the Great Yogi. The system is attributed to Patanjali, a Hindu seer who is supposed to have flourished about 150 B.C. at Gonda, Oadh.

YOKOHAMA (yōkohah'ma). Japanese seaport on Tokyo Bay, 18 m. S.W. of Tokyo. Commodore Perry (q.v.) landed at Y. in 1854, and in 1859 it was the 1st Japanese port opened to foreign trade, growing rapidly from a small fishing village to the chief centre of trade with Europe and America. Almost destroyed in an earthquake (1923) it was also rebuilt after S.W.W. air raids. Pop. (1965) 1,789,000.

YOKOSUKA. Japanese seaport and naval base (1884) on Tokyo Bay, S. of Yokohama. Pop. (1965) 317,000.

YONGE (yung), Charlotte Mary (1823–1901).

British author of some 120 novels, biographies, and educational works, marked by strong religious views of a High Church character. *The Heir of Redclyffe* (1853) was her 1st highly successful novel.

YONI. See LINGAM.

YONKERS (yung'-). City adjoining New York, U.S.A., on the Hudson. Originally a Dutch settlement dating from c. 1650, it is a busy manufacturing centre, and a residential district. Pop. (1960) 190,634.

YONNE (yon). French river, 180 m. long, rising in the Morvan Mts. and flowing generally N. into the Seine near Montereau. It gives its name to a dept.

YORK. A royal dynasty of England, founded by Richard duke of Y. (1411–60), who during the reign of Henry VI (of the House of Lancaster) claimed the throne as the descendant of Lionel duke of Clarence, 3rd son of Edward III, Henry being descended from the 4th son. The Yorkists and the Lancastrians fought out the issue in the Wars of the Roses. Y. was slain at the battle of Wakefield in 1460, but in the next year his son became king as Edward IV, and was followed by his son Edward V and his brother Richard III. The last-named fell at Bosworth in 1485, and the Lancastrian victor became king as Henry VII. To consolidate his claim, Henry m. the eldest dau. of Edward IV.

YORK, Frederick Augustus, duke of (1763–1827). Second son of George III, he was an unsuccessful commander against the French in the Netherlands 1793–9. From 1798 to 1809 he was British C.-in-C. He founded the Duke of Y.'s School for soldiers' sons at Chelsea; and the Duke of Y.'s column in Waterloo Place, London, commemorates him.

YORK, Archbishop of. Metropolitan of the northern prov., and Primate of England, the abp. of Y. ranks next to the Lord High Chancellor. The Most Rev. Frederick Donald Coggan (1909–), appointed 1961, was 93rd of the line.

YORK, Duke of. A title often borne by the second or later son of an English king, e.g. George, later George V, 2nd son of Edward VII; and Albert Frederick, 2nd son of George V, later King George VI.

YORK. City (co. bor.) of England, cap. of Yorkshire and seat of an archbishopric. It is on the Ouse, 188 m. N.W. of London. It was a British city before

YORKSHIRE. Kilnsey Crag, which dominates the upper valley of the river Wharfe in the West Riding.

Photo: W. R. Mitchell.

it became the Roman Eboracum, military cap. of the Roman garrison. Paulinus, 1st bp. of Y., was consecrated there in 627; the see was raised to an archbishopric 732. From the early Middle Ages it has been the cap. of the N., and is a residential and ecclesiastical centre with many important manufacturing firms. York Minster is built on the site of the wooden church in which Paulinus baptized King Edwin in 627. The present structure was begun c. 1230 and building continued until 1474, when the W. tower was finished. It was seriously damaged by fire in 1829. Its stained glass is famous. Much of the 14th cent. city wall remains, with 4 principal gates or bars. The 15th cent. guildhall (bombed 1942) was reconstructed 1962. The Theatre Royal, site of a theatre since 1765, was renovated 1965. The Univ. of Y. received its charter 1963. Pop. (1961) 104,468.

YORKSHIRE. Largest county of England, in the N.E. of the country, lying between the Tees and the Humber estuary, and fronting the North Sea. The geographical county (cap. York) is divided into Ridings (i.e. thirds), N., E., and W. The surface is upland in the E. (Y. Moors and Y. Wolds), while in the centre is the great plain of York. The Pennine Range in the W. is penetrated by beautiful valleys, or dales, the principal being Teesdale, Wensleydale, Swaledale, Nidderdale, Wharfedale, and Airedale. The chief peaks are Mickel Fell (2,591 ft.), Wharfedale, and Ingleborough. The Aire Gap is a convenient link between Yorks and Lancs. The Cleveland Hills provide large quantities of iron ore as well as building stone, and the potash deposits near Staithes are the richest in Europe. In the West Riding there are valuable coalfields, and here too are Leeds, Bradford, Halifax, and Huddersfield, centres of the textile industry. Sheffield is a centre for iron and steel goods. The East Riding is a great agricultural district.

The Industrial Revolution achieved here some of its greatest transformations, yet in the moors and dales agricultural and pastoral life proceeds very much as it has done for cents. Area 6,254 sq. m.; pop. (1967) 4,916,910.

YOSEMITE (yōse'mitē) **NATIONAL PARK.** Area of 1,175 sq. m. in central E. California, U.S.A., dedicated 1890, in the Sierra Nevada. Mountainous and of great beauty, it incl. Y. and other gorges, Y. Falls, 2,500 ft. high in 3 leaps, and many other waterfalls, and 3 groves of giant sequoias.

YOUGHAL (yawl). Irish seaport and resort (U.D.) on the Blackwater estuary, co. Cork, originally settled by Norsemen; it is a centre of salmon fishing and makes pottery and silks. Pop. (1961) 5,136.

YOUNG, Arthur (1741–1820). British writer on agriculture. His *Travels in France* (1792) gives a vivid picture of the *ancien régime* in decline, and he began

YORK. The walls of the city are mainly 14th century, but parts are Norman, and Bootham Bar, the main gateway to the north, has a Norman arch. In the background is the cathedral of St. Peter, known as York Minster, completed in the 15th century.

Customary Forms of Address

Ambassador. 'To His Excellency' followed by customary title of the individual. *Begin*, 'Sir' or 'My Lord' (according to rank); *end*, 'I have the honour to be, sir (or My Lord), Your Excellency's most humble and obedient servant.'

Archbishop. 'The Most Rev. His Grace the Lord Archbishop of —.' *Begin*, 'My Lord Archbishop', or 'Your Grace'; *end*, 'I remain, My Lord Archbishop, Your Grace's obedient servant.' The wife of an Archbishop is simply 'Mrs. —.'

An R.C. Archbishop is addressed: 'The Most Rev. the Archbishop of —.'

Baron. 'To the Rt. Hon. Lord —.' *Begin*, 'My Lord'; *end*, 'I have the honour to be, My Lord, Your Lordship's obedient servant.' Baroness. 'The Rt. Hon. Lady —.' *Begin*, 'Madam'; *end*, 'I have the honour to be, Madam, Your Ladyship's obedient servant.' Refer to 'Your Ladyship'. Baroness in her own right: as for the wife of a Baron.

Baronet. 'Sir John —, Bt.' *Begin*, 'Sir'; *end*, 'I have the honour to remain, Sir, Your obedient servant.' Baronet's wife. 'Lady —' (omit Christian name). *Begin*, 'Madam'; *end*, 'I have the honour to remain, Madam, Your obedient servant.' Refer to 'Your Ladyship'.

Bishop. 'To the Right Rev. the Lord Bishop of —.' *Begin*, 'My Lord'; *end*, 'I remain, My Lord, Your Lordship's obedient servant.' Refer to 'My Lord', or 'Your Lordship'. The wife of a Bishop is simply 'Mrs. —.'

An R.C. Bishop is addressed: 'The Rt. Rev. the Bishop of —.'

Bishop Suffragan. 'To the Rt. Rev. the Lord Bishop Suffragan of —'; otherwise as for a Bishop.

Cabinet, Members of U.S.: 'To Mr. (or the Hon.) —, Secretary of State.' *Begin*, 'Dear Sir' or 'Dear Mr. Secretary'; *end*, 'Yours faithfully'.

Cardinal. 'To His Eminence Cardinal —.' *Begin*, 'My Lord Cardinal' or 'My Lord'; *end*, 'I have the honour to remain, My Lord, Your Eminence's obedient child.'

Clergy. 'The Rev. (Christian name and surname).'. *Begin*, 'Rev. Sir'; less formally, 'Sir'.

R.C. Clergy. 'To the Rev. Father —.' *Begin*, 'Dear Rev. Father'; *end*, 'I beg to remain, dear Rev. Father, Your devoted and obedient child.'

Countess. 'The Right Hon. the Countess of —.' *Begin*, 'Madam'; refer to as 'Your Ladyship'; *end*, 'I have the honour to be, Madam, Your Ladyship's obedient servant.' Countess in her own right: as for an Earl's wife.

Dame. 'To Dame Jane —,' followed by G.C.V.O., D.C.V.O., G.B.E., D.B.E., as appropriate. *Begin*, 'Madam'; *end*, 'I beg to remain, dear Madam, Your obedient servant.'

N.B. Correctly the wife of a Bt. or a Knight is referred to as 'Dame —' (husband's surname), but this form has fallen into disuse except in legal documents. See under Baronet; Knight.

Daughters of Peers. Daus. of Dukes, Marquesses, and Earls are styled 'Lady Jane —' (family name); daus. of Viscounts and Barons: 'The Hon. Jane —' (family name). On marriage to a man without title, a Knight, or a Bt., Lady Jane retains her style, substituting her husband's for her father's family name; The Hon. Jane becomes The Hon. Mrs. — or The Hon. Lady —, according to whether her husband has no title or is a Knight or Bt. (The title Hon. is never

used in speaking.) On marriage to a peer, the dau. of a peer uses the customary form appropriate to her rank.

Dean (of a cathedral). 'The Very Rev. the Dean of —.' *Begin*, 'Very Rev. Sir'; *end*, 'I have the honour to remain, Reverend Sir, Your obedient servant.'

Doctor. The letters M.D., LL.D., etc., are appended to the ordinary form of address, e.g., 'J. — (initial and surname), Esq., M.D.' Alternatively, 'Dr. J. —,' never 'Dr. J. —, Esq.'

Duke. 'To His Grace the Duke of —.' *Begin*, 'My Lord Duke' or 'Your Grace'; *end*, 'I have the honour to be, My Lord Duke, Your Grace's obedient servant.' Refer to 'Your Grace'. Royal Duke. 'To His Royal Highness the Duke of —.' *Begin*, 'Sir'; *end*, 'I remain, Sir, Your Royal Highness's obedient servant.' See Daughters, Son of Peers.

Earl. 'The Rt. Hon. the Earl of —.' *Begin*, 'My Lord'; refer to 'Your Lordship'; *end*, 'I have the honour to be, my Lord, Your Lordship's obedient servant.' An Earl's wife is a Countess (q.v.). See also Daughters, Sons of Peers.

Governor of a U.S. State. 'To the Hon. —' or 'To Governor —.' *Begin*, 'Sir'; *end*, 'Yours faithfully'.

Judge. 'The Hon. Mr. Justice —'; or 'The Hon. Sir (Christian name and surname).'. *Begin*, 'Sir'. Only when on the bench is he referred to as 'My Lord' and 'His Lordship'. In the U.S.A.: 'The Hon.' followed by the title of office (e.g. Chief Justice of the U.S.A., Associate Justice of the Supreme Court of the U.S.A.). *Begin*, 'Dear Sir', 'Dear Mr. Chief Justice', 'Dear Judge Smith', as appropriate.

Judge of County Court. 'His Honour Judge —.' When on the bench refer to 'Your Honour'.

Justice of Peace. 'To the Rt. Worshipful —, J.P.' Refer to, when on the bench, as 'Your Worship'.

King. 'To the King's Most Excellent Majesty.' *Begin*, 'Sire', or 'May it please Your Majesty'; *end*, 'I have the honour to remain, Your Majesty's most humble and obedient subject'; refer to as 'Your Majesty'.

Knight Bachelor. As for Baronet, but omitting the abbreviation 'Bt.'

Knight of the Bath, of the Garter, etc. As for Knight Bachelor, but adding the letters K.C.B., K.G., etc.

Knight's wife. As for Baronet's wife.

Lord Chancellor. 'To the Rt. Hon. the Lord Chancellor.' Otherwise according to rank in the peerage.

Lord Chief Justice. 'The Rt. Hon. the Lord Chief Justice of England.' Otherwise according to rank in the peerage.

Lord Provost. 'The Rt. Hon. the Lord Provost of (Edinburgh, Glasgow); or 'The Lord Provost of (Aberdeen, Dundee, Elgin and Perth).'. *Begin*, 'My Lord Provost', or 'My Lord'; refer to 'Your Lordship'. His wife is sometimes addressed 'The Lady Provost'.

Marchioness. 'The Most Hon. the Marchioness of —.' *Begin*, 'Madam'; refer to 'Your Ladyship'; *end*, 'I have the honour to be, Madam, Your Ladyship's obedient servant.'

Marquess. 'The Most Hon. the Marquess of —.' *Begin*, 'My Lord Marquess'; refer to 'Your Lordship'; *end*, 'I have the honour to be, My Lord Marquess, Your Lordship's obedient servant.'

Mayor. 'The Worshipful the Mayor of —'; or (if the Mayor of a City) 'The Right Worshipful the Mayor of —.' *Begin*, 'Sir'; refer to 'Your Worship';

in speaking one refers usually to 'Mr. Mayor'; *end*, 'I remain, Sir, Your most obedient servant.'

Member of Parliament. The letters M.P. are added to the ordinary form of address.

Moderator of the Assembly of the Church of Scotland. 'To the Right Rev. the Moderator —.' *Begin*, 'Right Rev. Sir'; *end*, 'I remain, Right Rev. Sir, Your most obedient servant.'

Officers in the Navy, Army, and Air Force. If a title is held this is added after the military rank, e.g., 'Admiral the Rt. Hon. the Viscount —,' or 'Air Marshal Sir —, K.C.B.'

The Pope. 'To His Holiness the Pope.' *Begin*, 'Your Holiness'; *end*, 'I have the honour to remain Your Holiness's most humble child.'

President of the U.S.A. 'To the President, The White House, Washington, D.C., U.S.A.' *Begin*, 'Dear Sir', 'Mr. President', or 'Dear Mr. President'; *end*, 'Yours faithfully'.

Prime Minister. 'The Rt. Hon. —, M.P.' or his personal title if any.

Prince of the British Royal House. 'His Royal Highness Prince (Christian name)'; or if a Duke, 'H.R.H. the Duke of —'. In either case *begin* 'Sir'; refer to 'Your Royal Highness'; *end*, 'I remain, Sir, Your Royal Highness's most humble and obedient servant.'

Princess of the British Royal House. 'To H.R.H. Princess (Christian name)'; or if a Duchess, 'H.R.H. the Duchess of —'. *Begin*, 'Madam'; refer to 'Your Royal Highness'; *end*, 'I have the honour to be, Madam, Your Royal Highness's most humble and obedient servant.'

Queen. 'To the Queen's Most Excellent Majesty.' *Begin*, 'Madam', or 'May it please Your Majesty'; refer to 'Your Majesty'; *end*, 'I remain, Madam, Your Majesty's most humble and obedient subject.'

Representatives of the U.S. Congress. 'To the Hon. —.' *Begin*, 'Dear Mr. Representative'.

Secretary of State. 'His Majesty's Principal Secretary of State for the (War) Department' or 'The Secretary of State for (War)'.

Senators of the U.S. Congress. 'To the Hon. —.' *Begin*, 'Dear Mr. Senator'.

Sons of Peers. The eldest son of a Duke, Marquess, or Earl uses, by courtesy, his father's second title and is addressed as though he actually held the peerage; where there is no second title in the family, he is called Lord — (family name); younger sons of Dukes and Marquesses are styled Lord John — (family name), their wives become Lady John —. Younger sons of Earls and all sons of Viscounts and Barons are styled The Hon. John — (family name), their wives The Hon. Mrs. —. (The title Hon. is never used in speaking.)

Viscount. 'The Rt. Hon. the Viscount —.' *Begin*, 'My Lord'; refer to 'Your Lordship'; *end*, 'I have the honour to be, my Lord, Your Lordship's obedient servant.'

Viscountess. 'The Rt. Hon. the Viscountess —.' *Begin*, 'Madam'; refer to 'Your Ladyship'; *end*, as Countess.

Widow of a Peer. If the mother, step-mother or grandmother of the actual peer, she is formally 'The Dowager Duchess of —,' etc., when the actual peer is married. But it has become much more usual to use the style 'Jane, Duchess of —,' etc. Similar usage applies to the widow of a Baronet.

BRIGHAM YOUNG
Courtesy of the Church of Jesus
Christ of Latter-Day Saints.

the pub. of 45 *Annals of Agriculture* from 1784. In 1793 he was appointed sec. of the Board of Agriculture.

YOUNG, Brigham (1801–77). American religious leader. B. in Vermont, he joined the Mormon Church in 1832, and 3 years later was appointed an apostle. After a successful recruiting mission in Liverpool, he returned to U.S.A., and as successor of Joseph Smith, recently murdered, led the Mormon migration to the Great Salt Lake in Utah (1846), founded Salt Lake City, and ruled the colony well until his death.

YOUNG, Edward (1683–1765). British poet, author of *Night Thoughts on Life, Death, and Immortality*, once universally popular.

YOUNG, Francis Brett (1884–1954). British novelist. B. in Worces, he became a doctor and practised in Brixham, Devon, then lived in Capri before settling in the Midlands. Beginning with a study of Robert Bridges, and *Marching on Tanga* (1918; an account of life with the British forces in E. Africa), he produced a series of detailed novels of middle-class life, incl. *The Young Physician* (1919), *Portrait of Clare* (1927), *A Man about the House* (1942).

YOUNGHUSBAND, Sir Francis (1863–1942). British soldier and explorer. B. in India, he entered the army in 1882 and 20 years later accompanied the mission that opened up Tibet. He wrote travel books and works on comparative religion.

YOUNG MEN'S CHRISTIAN ASSOCIATION (Y.M.C.A.). Founded in London in 1844 by (Sir) George Williams (1821–1905) in the drapery firm in St. Paul's churchyard in which he was a clerk, the Y.M.C.A. is an association of young men, without distinction of race or colour, who seek to improve themselves spiritually, intellectually, and physically.

YOUNGSTOWN. City of Ohio, U.S.A., in a rich mining area, with iron and steel plants. Pop. (1960) 166,689.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION (Y.W.C.A.). Organization for women and girls, formed in 1887 when 2 organizations, both founded in 1855 – the one by Miss Emma Roberts and the other by Lady Kinnaird – combined their work.

YPRES (ēpr), John Denton Pinkstone French, 1st earl of (1852–1925). British field marshal. He entered the army in 1874, and in the South African War of 1899 defeated the Boers at Elandslaagte, relieved Kimberley, and captured Bloemfontein. In 1912 he became Chief of the General Staff, but resigned in 1914. Later in the year he was appointed C.-in-C. of the B.E.F. to France, and held the command until the end of 1915. Lord-Lieut. of Ireland 1918–21, he was created an earl on his resignation.

YPRES. French ēpr; or 'wipers' in British Army pron.; Flem. Ieper. Belgian town in W. Flanders, 25 m. S. of Ostend. Its old cloth hall and the cathedral were among the casualties of the F.W.W. The Menin Gate (1927) is a memorial to British soldiers lost in the great battles fought round the town 1914–18. Pop. (1966) 18,000.

YSSELMEER. Alt. spelling of ISSSELMEER.

YTTERBIUM (itēr-). Chemical element. Symbol Yb; at. wt. 173.04; at. no. 70. It is a rare metal occurring in rare earths that contain yttrium.

YTTTRIUM (it'-). Chemical element. Symbol Y; at. wt. 88.91; at. no. 39. It is the most basic of the rare earth metals.

YUCATAN (yookahtahn). A peninsula in Central

YUCCA

America, most of it in Mexico but extending into British Honduras and Guatemala. Tropical crops are grown. It is inhabited by Indians of Maya stock, and there are remains of the civilization which the Spanish conquerors found in decline. Area c. 70,000 sq. m.

YUCCA (yuk'a). In botany, a genus of the Liliaceae, with some 30 species occurring in Mexico and the S.W. of U.S.A. The leaves are stiff and sword-shaped and the flowers white and campanulate.

YUGOSLAVIA. A federal rep. (see table for units) of S.E. Europe in the Balkan peninsula. It has a much indented Adriatic coastline, and mountainous surface

save in the N. and N.E., where are the fertile lowlands of the middle Danube and its tributaries, Drava, Tagiss (Tisa), Sava, and Morava. The climate is continental. The cap. is Belgrade. Most of the people are members of the Eastern Orthodox Church, though there are many Roman Catholics in the N.W.; 12.5 per cent of the pop. are Mohammedan. The Slovene, Macedonian, and Serbo-Croat languages are officially recognized, the last being in general use. Agriculture supports c. 50 per cent of the pop., wheat and maize being the main crops. Minerals worked incl. coal, copper, lead, iron, aluminium, mercury, petroleum. Iron and steel, cement, fertilizers, and textiles are among industrial products. Horses, cattle, sheep, pigs, and poultry are raised.

CONSTITUTION. The constitution of 1963 gave Y. the name of the Socialist Federal Rep. of Y. The Fed. Assembly is subdivided into 5 chambers – Federal, Economic, Education and Culture, Social Welfare and Health, and Organisational-Political – with an additional chamber of Nationalities within the Federal chamber. The Assembly elects the pres. and fed. executive council.

Area 98,740 sq. m.; pop. (1967) 19,958,000.

HISTORY. Y. came into existence in 1918 as the kingdom of the Serbs, Croats, and Slovenes with the Serbian Peter (I) Karageorgevich as king. Peter I died in 1921 and was succeeded by his son Alexander

YUGOSLAVIA. Rab is built on a steep ridge on the west coast of the island of the same name in the Gulf of Kvarner, northern Yugoslavia. Its houses are closely packed and the bellfries of three of its four churches rise almost side by side along the shore. Courtesy of the Yugoslav National Tourist Office.

* The SI base unit is the square metre, but the are is often used for land measurement.

** The SI base unit is the cubic metre, but for general purposes the litre is an accepted alternative to the cubic decimetre.

FEDERAL REPUBLIC OF YUGOSLAVIA

	Area in sq. m.	Population (1961 census)	Capita
Serbia	34,107	7,642,227	Belgrade
Croatia	21,824	4,159,696	Zagreb
Slovenia	7,817	1,591,523	Ljubljana
Bosnia-Herzegovina	19,736	3,277,948	Sarajevo
Macedonia	9,925	1,406,003	Skopje
Montenegro	5,331	471,894	Titograd
	98,740	18,549,291	

who, faced with difficulties at home and abroad (espec. with Italy), estab. a military dictatorship in 1929. He was assassinated in Marseilles, during an official visit to France, 1934. His young son Peter II (1923–) succeeded and a regency under his uncle Paul was set up until Peter assumed power early in 1941. German invasion followed, and the whole country was overrun; the king took refuge in England, and Y. became an area of grim guerrilla warfare until the Germans were expelled with the help in the last months of Russian forces. The guerrilla leader Josip Broz (Marshal Tito) estab. a Communist govt., and following an election in 1945 a new constitution organizing the country into a republican federation of 6 reps. was proclaimed. Y. subsequently developed her internal and external policies independently of Soviet Communism.

Literature. The Yugoslav or Serbo-Croat language belongs to the southern branch of the Slavonic languages. Y. literature begins in the 9th cent. with

the translation into Slavonic of the church service books. Its great glory is the folk poetry, particularly the song cycles dealing with the battle of Kosovo and the hero Marko Kraljević. After the cents. of national repression a revival came, notably under Dositej Obradović (1739–1811). Poets of the earlier 19th cent. incl. the prince-bishop Petar Njegoš (1813–51), France Prešern (1800–49), and Ivan Mazuranič (1814–90). Later, Russian influence predominated. More modern writers incl. the novelist Ivan Cankar (1876–1918), dramatist Ivo Vojnović (1857–1929), and poet Oton Zupančič (1878–1949).

YUKON (yōō'kon). Terr. of N.W. Canada, named after its chief r. the Y. It incl. the highest point in Canada, Mt. Logan (19,539 ft.), in the Mt. Elias range of the Rockies on the border of Alaska, U.S.A., to the W. Settlement dates from the discovery of gold in the Klondike valley in 1896, and Y. was organized as a political unit in 1898 with Dawson as cap., replaced 1953 by Whitehorse (q.v.). The N.W. Highway and branches and airlines serve the terr. Petroleum and natural gas, gold and silver are worked; also coal. Fur trapping is important. Area 207,076 sq. m.; pop. (1966) 14,382.

YUNGNING. Name 1913–45 of NANNING.

YUNNAN (yūn'ahn'). Prov. of S.W. China adjoining Burma and N. Vietnam. It is mountainous and well forested. Tin, copper, lead, zinc, coal, salt and other minerals are worked; tea, tobacco, rice, wheat are grown. The Salween and Mekong flow through it, and the Yangtze in the N. It is traversed by the Burma Road. The cap. is Kunming, also called Y. Area 162,000 sq. m.; pop. (1957 est.) 19,100,000.

YUZOVKA (yōōz'ofka). See DONETSK.

Z The 26th and last letter in the English and other modern alphabets. It was the 6th in the classical Greek alphabet, but it was found only in the later Roman alphabet.

It is used initially and medially in many words of Greek or Oriental origin, and the modern tendency is to employ it in preference to s in such words as *baptize*, *organize*, derived ultimately from the Greek.

ZAANDAM (zahndahm). Dutch town in N. Holland prov. on the Zaan, 5½ m. N.W. of Amsterdam. Peter the Great stayed at Z. in 1697 to study shipbuilding, then an important industry at Z. It has flour, timber, and paper mills. Pop. (1967) 117,240.

ZABALETA (thubalā'tah), Nicanor (1907–). Spanish harpist, noted for his efforts to enlarge the repertoire of original harp music by commissioning new works from e.g. Milhaud (q.v.) and Joaquín Rodrigo, and by reviving interest in classical harp music, particularly that of the 15th and 16th cents. in Spain and Portugal.

ZABRZE (zah'bzhē). Silesian town in Polish-admin. Germany, formed in 1905 by the amalgamation of several towns. It has collieries, foundries, etc. Pop. (1966) 198,000.

ZADAR (zah'dah). Yugoslav port and holiday resort on the Adriatic Sea. The Roman Jadera, it was alternately held and lost by the Venetian Rep. from the 12th cent. until seized by Austria in 1813 and made cap. of Dalmatia, 1815–1918. It belonged to Italy 1920–47 and was severely damaged in the S.W.W. Pop. (1961) 25,000.

ZADKINE (zad'kēn), Ossip (1890–1967). French cubist sculptor. Russian-born, he became French by service in the Foreign Legion, and spent most of his life in Paris, though often exhibiting in London, where he had also studied. Working in varied materials, he represented the human form in abstract terms, e.g. Laocoon and his variations on an Orpheus theme.

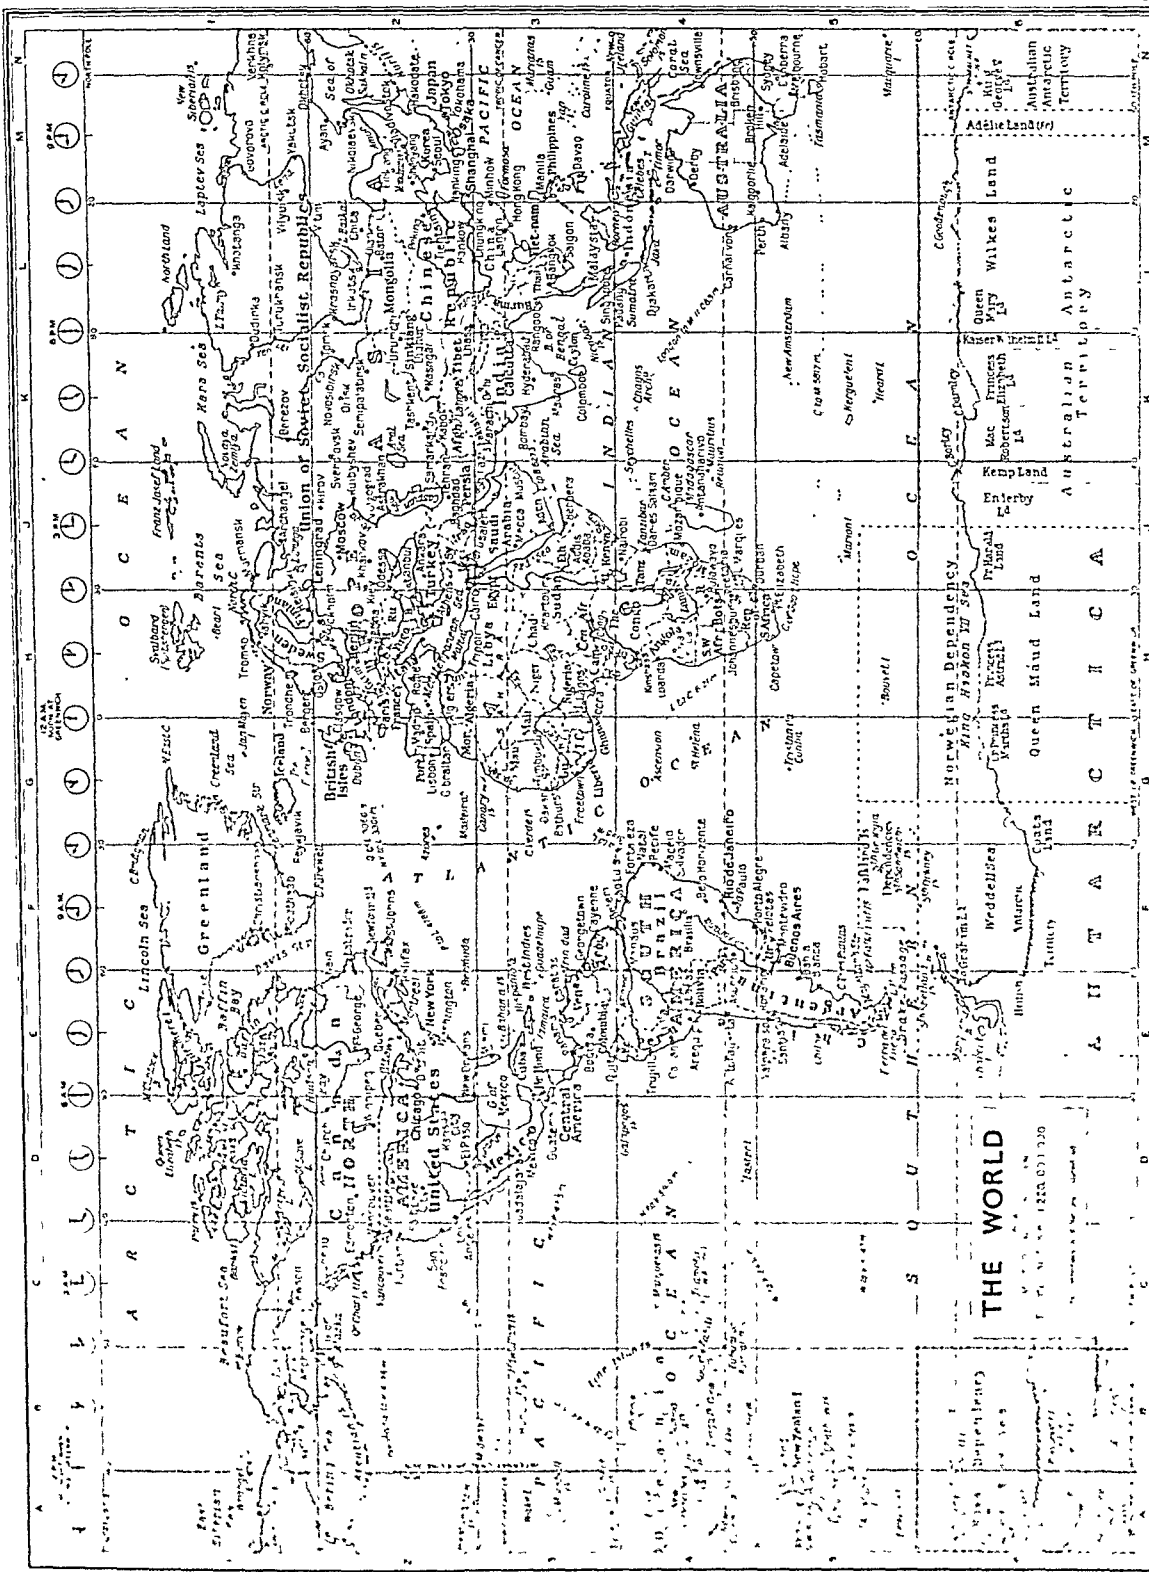

ZAGREB (zah'g'reb). Yugoslav city, cap. of Croatia, on the Sava. It has a Gothic cathedral and a univ., and was a Roman city. Manufactures incl. leather, linen, carpets, rly. wagons. Pop. (1961) 430,802. See illus. p. 1110.

ZAHAROFF, Sir Basil (1849–1936). International financier and armaments 'king'. B. in Anatolia of Greek parents, he was very much a man of mystery. For his aid to the Allies during the F.W.W. he received a British knighthood. He was a munificent patron of univs. in England, France, and Russia.

ZAKYNTHOS (zah'kēnthos). Most southerly of the Ionian Is., Greece. Olives, currants, and the vine are grown; carpets are made. An earthquake in 1953 destroyed its cap., also Z. (pop., 1961, 11,126). Area 157 sq. m.; pop. (1961) 35,451.

ZA'MA. Site of battle fought in 202 B.C. in Numidia (now Algeria) in which the Carthaginians under Hannibal were defeated by the Romans under Scipio, so ending the Second Punic War.

ZAMBEZI. River of Africa, c. 1,600 m. long, with headstreams in Zambia, Angola, and Congo (cap. Leopoldville). It flows generally E. to the Indian Ocean which it enters through a wide delta near Chinde, Mozambique. Though broken by the Victoria

THE WORLD

Scale: 1:100,000,000
Projection: Mercator
Date: 1950

Falls (harnessed for power, 1938) and many rapids, the Z. is important as a highway. See KARIBA.

ZAMBIA. Rep. of S. central Africa, formerly known as Northern Rhodesia (see RHODESIA). It has an altitude of 3,000–5,000 ft., except in river valleys, and incl. Lake Bangweulu and part of Lake Mweru, and the Kariba Dam (q.v.). Maize, ground-nuts, cassava, Kaffir corn and tobacco are produced, and cattle reared. By far the most valuable mineral is the copper from the Copperbelt adjoining Katanga, Congo: others are zinc, lead, and vanadium. Lusaka replaced Livingstone as cap. in 1935; Kitwe, Ndola, Broken Hill and Fort Jameson are other towns. Area c. 288,130 sq. m.; pop. (1966) 3,894,400.

N.R. was visited by the Portuguese in the late 18th cent., and by Livingstone for the first time in 1851. Made a British protectorate in 1924, it was a member of the Federation of Rhodesia and Nyasaland 1953–63, was granted self-govt. in 1963 and in 1964 the name Zambia was adopted. Under Pres. Kenneth Kaunda (q.v.) there has been increased govt. control of the economy, e.g. the taking over by the state of all mineral rights in 1969.

ZAMENHOF (tsah'men-), Lazarus Ludovik (1859–1917). Polish-Jewish oculist of Warsaw, who invented the international language, Esperanto.

ZAMORA Y TORRES. See ALCALA ZAMORA.

ZAGREB. Built on a neighbouring hill to its rival for many centuries, the Kaptol, is the Upper Town. To the right is St. Mark's church, the roof bearing the coats of arms of Croatia, Slavonia and Dalmatia, and of Zagreb. Slightly in front and to the right is the vast parliament building.

Courtesy Yugoslav National Tourist Office.

ZANTE (zahn'te). Ital. form of ZAKYNTHOS.

ZANZIBAR (zanzibahr'). Country in E. Africa, consisting of the island of Z. (50 m. long; area 640 sq. m.), and 25 m. N. the island of Pemba (42 m. long; area 380 sq. m.), and some adjacent islets. The soil is fertile, but the climate is oppressively humid. Cloves are the principal product, followed by copra. The cap. also Z., is on the W. coast of Z. Is. Pop. (1967) 354,360; Pemba 164,243.

Formerly a sultanate, Z. was placed by its ruler under Brit. protection in 1890, and remained a protectorate until accorded independence in 1963. The sultan immediately handed over to Kenya the coastal strip of that country which had been part of Z. for c. 500 years. In 1964 an army revolt drove the sultan into exile and estab. a rep., and shortly afterwards Z. was linked in a rep. with Tanganyika (q.v.).

ZAPOROZHE (zahporozh'ye). City in Ukrainian S.S.R. on the Dnieper, cap. of Z. region, and site of the Dnieper Dam (q.v.). Z. manufactures steel, chemicals, aluminium goods, etc., and is an important

centre for pig-iron and magnesium. The Russians did not defend it in 1941, but re-took it from the Germans in 1943. Pop. (1967) 571,000.

ZARA. Ital. form of ZADAR.

ZARAGOZA. Span. spelling of SARAGOSSA.

ZEALAND. See SEELAND, Denmark; ZEELAND, Netherlands.

ZE'BRA. Name given to striped equine species; the stripes serve as camouflage against the desert and mountainous background. The true or mountain Z. (*Equus zebra*) was once common in Cape Colony and Natal and still survives in parts of S. Africa and Angola. It has short legs and long ears and is silvery-white with black or dark brown markings. Grevy's Z. (*E. grevyi*) is much larger, and has finer and clearer markings; it inhabits Ethiopia and Somaliland; Burchell's Z. (*E. burchelli*), which is intermediate in size, has white ears, a long mane, and full tail; it roams the plains N. of the Orange river.

ZE'BU. Indian ox (*Bos indicus*), light-coloured with a large fatty hump near the shoulders. It is used for draught, and is held to be sacred.

ZEDEKIAH (zedeki'-ah). Last of the kings of the Hebrew kingdom of Judah. Nebuchadrezzar gave him the throne in 597 B.C., but in 586 he was taken away to Babylon as a blinded captive.

ZEEBRUGGE (zäbroog'ge). Small Belgian port on the North Sea. The harbour and 9 m. canal to Bruges were built 1896–1907. In the F.W.W., when it was a German submarine base, it was attacked on 23 April 1918 by a British force under Admiral Keyes (q.v.) and the canal entrance was blocked.

ZEELAND (zē'-). Prov. of the Netherlands, incl. the estuary of the Scheldt and the is. of Walcheren and N. and S. Beveland, adjoining Belgium on the S. Most of its surface is below sea-level. Cap. Middelburg. Area 660 sq. m.; pop. (1966) 295,374.

ZEFFIRELLI, G. Franco (1923–). Italian theatrical director and designer, famous for his beautiful and lavish designs and production of plays, e.g. *Romeo and Juliet* at the Old Vic (1960), of operas, e.g. *Tosca* (1964), and of films, e.g. *The Taming of the Shrew* (1967).

ZEISS (tsis), Carl (1816–88). German optician. He opened his 1st workshop at Jena in 1846 and in 1866 joined forces with Ernst Abbe (1840–1905), producing microscopes, field glasses, etc.

ZENDAVE'STA. The sacred scriptures of the Zoroastrians, represented by the modern Parsees. The Avesta consists of liturgical books for the use of the Parsee priests, and the *Gathas* contain the discourses and revelations of Zoroaster. The Zend portion is the commentary thereon.

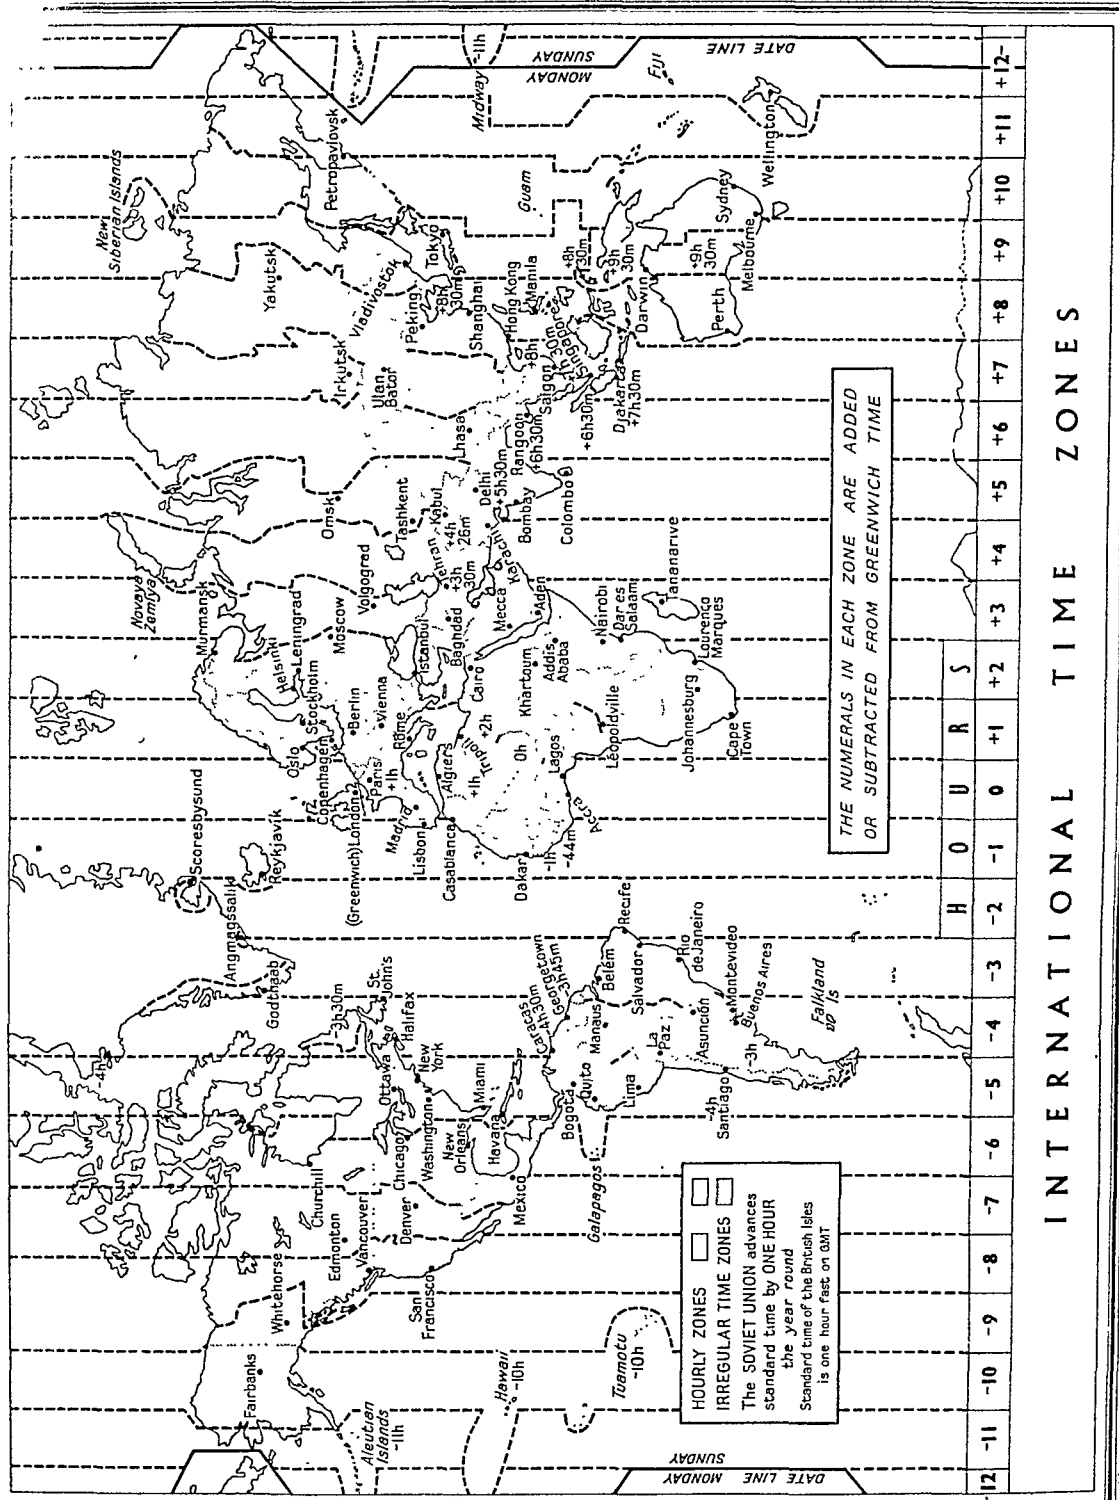

ZENITH. Opposite of nadir; the upper pole of the celestial horizon or the point in the sky immediately above the observer.

ZENO (fl. c. 460 B.C.). Greek philosopher, one of the Eleatic school. He was a disciple of Parmenides and controverted current views on space and time by such paradoxes as that of Achilles and the tortoise.

ZENO (c. 340–265 B.C.). Greek philosopher, b. at Citium in Cyprus and probably a Phoenician, who founded the Stoic school of philosophy at Athens.

ZENOBIA. Queen of Palmyra in the Syrian desert from A.D. 266, when on her husband's death she assumed the crown as regent for her sons, until 272 when she was defeated by the Roman emperor Aurelian and taken as a captive to Rome.

ZEPPELIN (tse'pelén), Ferdinand, count von (1838–1917). German airship pioneer. On his retirement from the army in 1891 he devoted himself to the study

of aeronautics. His 1st airship was built in 1900 after many failures; it remained aloft for 20 minutes and then crashed on landing. But during the F.W.W. Germany employed a number of Zeppelins in bombing London and other parts of England. In the 1960s Japan and the U.S.S.R. experimented with nuclear-powered craft.

ZERMATT (tsermaht'). Swiss tourist and winter-sports centre in the Valais canton at the foot of the Matterhorn. Pop. (1960) 2,700.

ZETLAND. Official form of SHETLAND.

ZEUS (zūs). The supreme god in the Greek pantheon, corresponding to the Roman Jupiter. He was the son of Kronos, and his chief spouse was Hera. As the supreme god he dispensed good and evil and was the father and saviour of all mankind. He is frequently represented holding the thunderbolt and the aegis or shield of fringed goatskin.

ZHDANOV (zhdah'nof). Port of the Ukraine, U.S.S.R., on the Sea of Azov. Formerly Mariupol, it was renamed 1944 in honour of Andrei Zhdanov (1896–1948), statesman and defender of Leningrad, who was born at Mariupol. It has iron and steel industries. Pop. (1967) 373,000.

ZHITO-MIR. Town in Ukrainian S.S.R., cap. of Z. region, on the Teteriv, a trib. of the Dnieper. Dating from the 13th cent., it is a timber and grain centre with furniture factories, etc. Pop. (1967) 133,000.

ZHUKOV (zhōōk'of), Grigory Konstantinovich (1896–). Marshal of the Soviet Union. Early in 1941 he became Chief of Staff, commanded the armies defending Moscow in 1941, directed the counter-offensive at Stalingrad in 1942–3, and organized the relief of Leningrad in 1943. Appointed commander on the Ukrainian front in March 1944, he led the offensive which ended with the fall of Berlin, headed the Allied delegation which received the German surrender, and subsequently commanded the Russian occupation forces inside Germany, 1945–6. He succeeded Bulganin as Min. of Defence (1955–7).

ZIEGLER (zēg'ler), Karl (1898–). German organic chemist. After studying at Marburg univ. he was prof. at Heidelberg and Halle univs., and from 1943 was director of the Max Planck Inst. for Carbon Research at Mulheim. In 1963 he was awarded a Nobel prize for his work on the chemistry and technology of high polymers, e.g. the combination of many molecules of the simple gas ethylene, into the plastic, polythene.

ZIGGURAT. In ancient Babylonia and Assyria, a stepped pyramid of sun-baked brick faced with glazed bricks or tiles on which stood a shrine to a deity. The Tower of Babel may have been a Z.

ZIMBABWE (zēmbabh'wē). Bantu word meaning stone house, used esp. for extensive ruins near Victoria. in Mashonaland, Rhodesia. They incl. a massive fortress, a temple, and 2 conical towers, one 34 ft., the other 6½ ft. high. Discovered 1868 by Adam Renders, they were judged to date from c. A.D. 600 following radio-carbon tests in 1952 on timber taken from the building. Their origin remains uncertain. The Z. bird, derived from soapstone sculptures of fish eagles found in the ruins, is the national emblem of Rhodesia. The name has been adopted by black Rhodesian nationalists and the Z. African Nat. Union (Z.A.N.U.) is led by the Rev. Ndabaningi Sithole, detained from 1964 and sentenced to 6 yrs. imprisonment 1969 for alleged incitement to the attempted murder of Ian Smith and 2 of his ministers.

ZINC. Bluish-white metal, symbol Zn, at. wt. 65.38, at. no. 30. From very early times it has been used as a component of brass but it was not recognized as a separate metal until 1746 by Marggraf, by heating calamine with charcoal. Ores occur in many parts of the world, but the principal source of supply is U.S.A. Its chief modern uses are in the production of galvanized iron and in alloys, especially brass. Its

compounds are used in medicine, and in paints, Z. oxide being an important white pigment.

ZINO'VIEV, Grigory (1883–1936). Russian politician. A prominent Bolshevik, he returned to Russia in 1917 with Lenin and played a leading part in the Revolution. As head of the Communist International (1919) his name was linked with the forged letter inciting Britain's Communists to rise, which helped to topple the Labour govt. in 1924. As one of the 'Old Bolsheviks', he was accused of high treason and shot.

ZI'ON. Name of the Jebusite stronghold in Jerusalem that was captured by King David. On the same hill was built the temple and in due course Z. became a synonym for Jerusalem, and the City of God.

ZIONISM. A Jewish movement aiming at the establishment in Palestine of a Jewish state with its cap. at Jerusalem, the 'city of Zion'. As a modern movement it dates from 1896, when Theodor Herzl pub. his *Jewish State*, outlining a scheme for erecting an autonomous Jewish commonwealth under Turkish suzerainty. The Zionist Organization was estab. at Basle in 1897. During the F.W.W. Weizmann was instrumental in securing the Balfour Declaration (q.v.), and in 1948 the Jews in Palestine proclaimed the state of Israel.

ZIRCONIUM (Arabic *zargun*, gold colour). A rare metal of the titanium family, symbol Zr, at. wt. 91.22, at. no. 40. Discovered in zircon by Klaproth in 1789, and isolated by Berzelius in 1824, it is used in alloys.

ZLATOUST (zlahto-ōōst'). Town in Chelyabinsk region, R.S.F.S.R., in the S. Urals, founded in 1754 as an iron- and copper-working settlement, destroyed 1774 by a peasant rising, but developed as an armaments centre from the time of Napoleon's invasion of Russia. Since the Revolution, Z. has become one of the chief metallurgical centres of the R.S.F.S.R. Pop. (1967) 176,000.

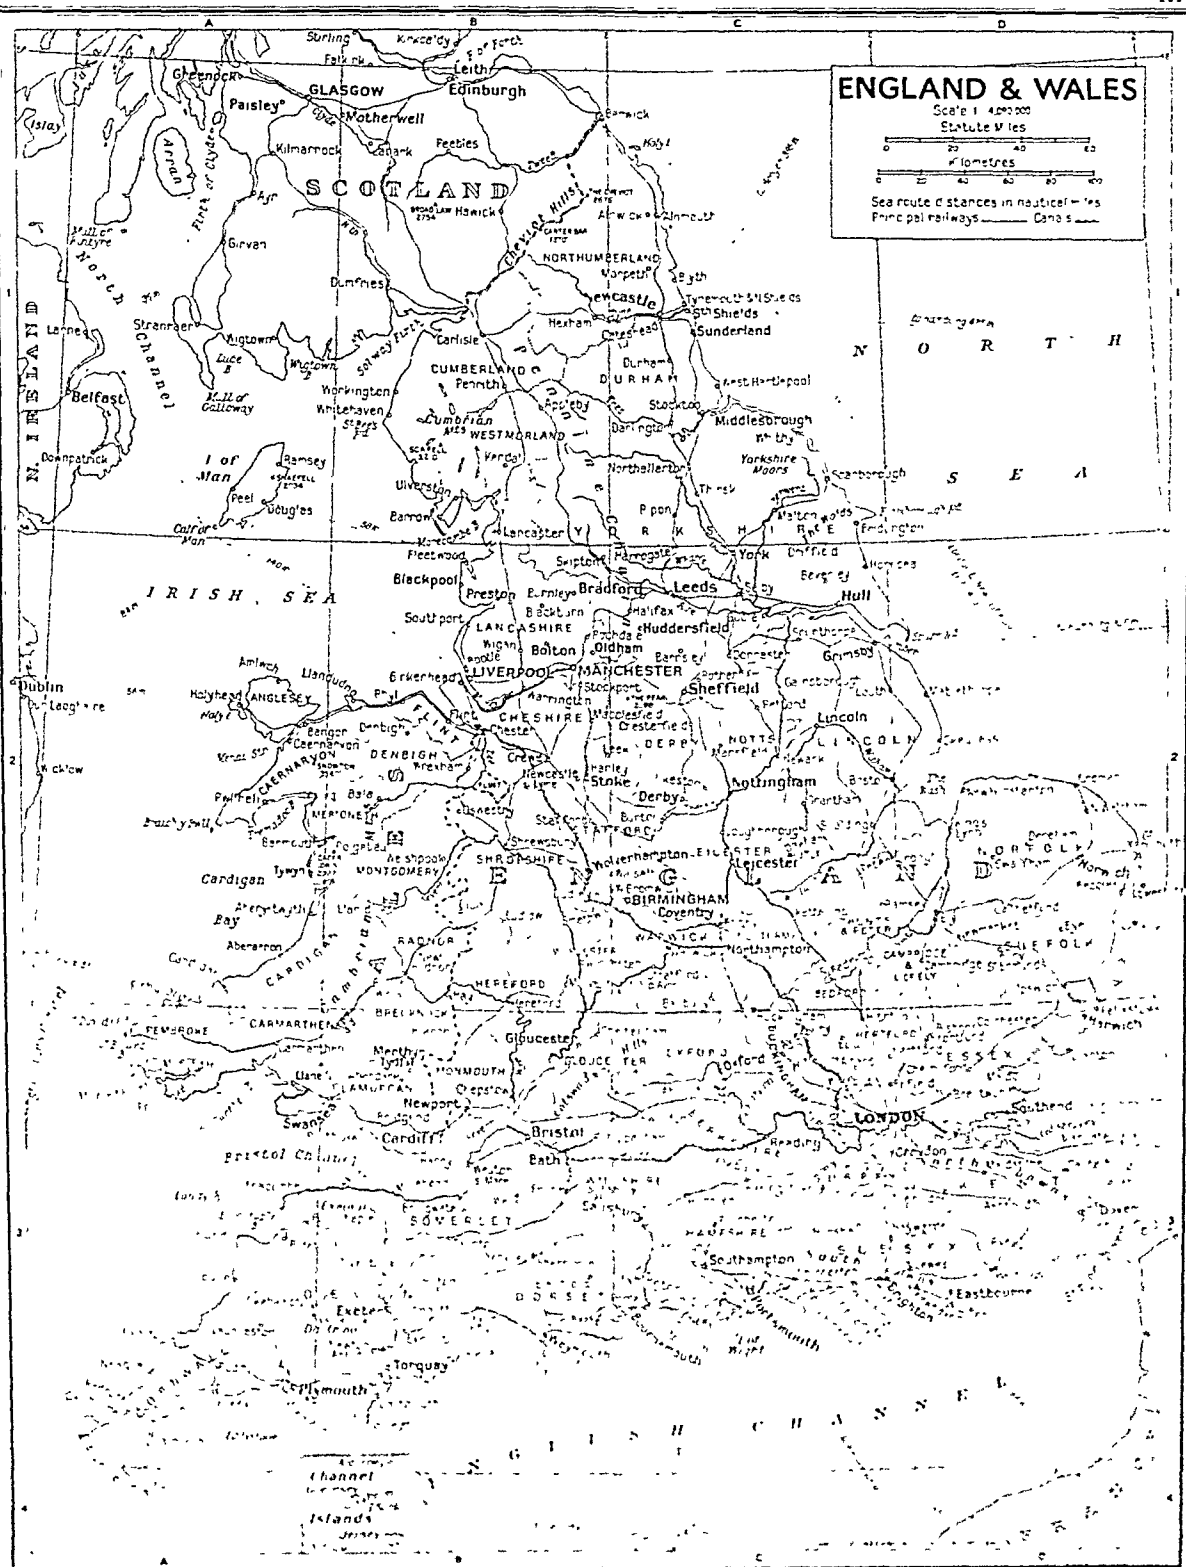

ZO'DIAC. Name given by the ancient Greeks to that zone of the heavens containing the paths of the sun, moon and the 5 planets then known. It was about 16° in width, and the stars contained in it were grouped into 12 constellations to each of which was given a symbol, viz. Aries, ♈; Taurus, ♉; Gemini, ♊; Cancer, ♋; Leo, ♌; Virgo, ♍; Libra, ♎; Scorpio, ♏; Sagittarius, ♐; Capricornus, ♑; Aquarius, ♒; Pisces, ♓.

ZODIACAL LIGHT. A cone-shaped light sometimes seen extending from the sun along the ecliptic, visible after sunset or before sunrise. It is due to thinly spread material in the central plane of the Solar System. From Britain it is never bright, but it may be conspicuous when observed from countries with clearer atmosphere.

ZOFFANY, Johann (1733–1810). German portrait painter. Settling in England in 1758, he became R.A. in 1769, executing many conversation pieces.

ZOG (1895–1961). King of Albania. A member of an important Albanian family, he became P.M. of Albania in 1922, pres. of the rep. in 1925, and king in 1928. He was driven out by the Italians in 1939.

ZOLA, Émile Édouard Charles Antoine (1840–1902). French novelist. B. in Paris, he was a journalist and clerk in Paris until his *Contes à Ninon* (1864) enabled him to devote himself to literature. In 1867 he pub. the masterly study in remorse *Thérèse Raquin*, and in 1871 *La Fortune des Rougon* began the series of some 20 novels portraying the fortunes of a French family under the 2nd Empire, incl. *Le Ventre de Paris* (1874), *La Faute de l'Abbé Mouret* (1875), *L'Assommoir* (1878), *Nana* (1880), *Germinal* (1885), *La Terre* (1888), and *La Débâcle* (1892). Among later novels are the trilogy *Trois Villes* (1894–8), and *Fécondité* (1899). In 1898 he pub. *J'accuse*, indicting the persecutors of Dreyfus.

ZOMBA. Cap. of Malawi, 20 m. E. of Lake Shirwa, until a new cap. is built at Lilongwe: Z. will become a univ. town. Pop. (1966) 19,616.

ZOO. Short for zoological gardens, i.e. places where wild animals are kept in captivity, whether as an interesting spectacle or in pursuit of scientific knowledge. Henry I started a royal menagerie at Woodstock, Oxon, later transferred to the Tower of London, and in 1831 the king presented the collection in the Tower menagerie to the Zoological Society in Regent's Park, London. See HAGENBECK; WHIPSNADE.

ZOOLOGY (zō-ō'lojī) (Gk. *zōon*, animal). That branch of biology that is concerned with the study of animals. The popular name for it is Natural History, but it comprises not only a description of present-day animals, but the evolution of animal forms, anatomy and physiology, embryology and morphology, geographical distribution, and ecology, etc.

ZORN (tsörn), Anders (1860–1920). Swedish impressionist painter of Dalecarlian peasants and nudes.

ZOROASTER (zōrō-as'ter), or more correctly **Zarathustra** (600 or 1000 B.C.?). Persian seer, founder of the religion known after him as Zoroastrianism. He was a Mede or a Persian, and was popularly supposed to be the first of the Magi or Wise Men. In the *Zendavesta* he features as a religious prophet, the author of hymns (the *Gathas*) in honour of Ormuzd the Good God. He is said to have found a powerful patron in a prince of eastern Iran, and to have married into the court circle. His date is uncertain.

ZOROASTRIANISM. The religion founded by Zoroaster (q.v.), represented today by the Parsees. Its theology is dualistic, the Good God Ahura Mazda or Ormuzd being opposed by the Evil God, Angra Mainyu or Ahriman. These are represented in the *Avesta* (see *ZENDAVESTA*) as being perpetually in conflict, but ultimately the victory will be Ormuzd's. A ceremonial was devised for purifying and keeping clean both soul and body. Worship was at altars on which burnt the sacred fire. A priestly caste was instituted. The dead were exposed to vultures.

ZORILLA (thör-rél'yah), José (1817–93). Spanish poet and playwright. B. at Valladolid, he based his plays chiefly on national legends.

ZOSHCHEN'KO, Mikhail Mikhailovich (1895–1958). Russian short-story writer. His best work – richly satirical – was done in the 1920s and early 1930s, e.g. *Respected Citizens* (1926) and *Private Life* (1933). His autobiography in 1943 reflected the pressure exercised by the C.P., and was not allowed to be completed.

ZOUAVES (zoo-ahvz'). Corps of French infantry soldiers, first raised in Algeria in 1831 from the Berber Kabyle tribe of Z. Before long, however, the native element was eliminated, and only a half-Arab dress was retained as a characteristic.

ZUCKERMAN (zook'-), Sir Solly (1904–). British scientist. B. in Cape Town, he originally specialized in anatomy, but after the S.W.W. was concerned with the wider range of policy, espec. defence, as Chief Scientific Adviser to the govt. from 1960. He was awarded the O.M. 1968.

ZUIDER ZEE (zoi'der zä; Dutch, south sea). Former gulf of the N. Sea in the Netherlands, area 2,027 sq. m.: See ISSELMEER.

ZULOAGA (thoo-lo-ah'ga), Ignacio (1870–1945). Spanish painter, b. in Vizcaya; he favoured bullfighters and other Spanish types.

ZULULAND (zoo'loo-). Region in the N.E. of Natal prov., S. Africa. It was annexed by Britain in 1887, and incorporated in Natal in 1897: the major part is a native reserve, sugar, cotton, and coffee plantations occupying the rest. The St. Lucia coalfield is connected by rail with Durban. The chief town is Eshowe (pop. 3,600; white 1,400).

ZULULAND. The huts of a Zulu *kraal* are constructed with the same deft skill needed to fashion basketwork, such as that on the left, and the bead ornamentation these women are proudly displaying. Courtesy of Satour.

The Zulus probably reached the country early in the 17th cent. and under Chaka (1810–28) became a formidable military power. His half-brother Dingaan (q.v.) estab. an even more bloodthirsty régime. Subsequent rulers were Dingaan's half-brother Panda (1840–73), and Panda's son Cetewayo (q.v.) and grandson Dinizulu, who d. in 1913 exiled to the Transvaal. Cyprian Bekuzulu, a grandson of Dinizulu, was recognized in 1951 as Paramount Chief of the Zulus in Natal.

Area 10,425 sq. m.; pop. (est.) 400,000.

ZURBARÁN (thoorbahrahn'), Francisco de (1598–?1669). Spanish painter, sometimes called the Spanish Caravaggio. He painted subjects from Church history, e.g. a series (with Herrera) on the life of St. Bonaventura.

ZÜRICH (tsü'rikh). Swiss city, cap. of Z. canton, most populous and economically important in the country. It stands beside the lake of Z. It has a univ. (refounded 1833) and is the intellectual cap. of German-speaking Switzerland. Industries incl. machinery, electrical goods, cotton spinning, silk, etc. Pop. (1960) 439,600.

ZUTPHEN (züt'fen). Town in Gelderland prov., Netherlands, near which Sir Philip Sidney was fatally wounded. Pop. (1967) 27,017.

ZWEIG (zvīg), Arnold (1887–1968). German novelist, playwright and poet. B. in Silesia, he was Jewish and left Germany on the Nazis coming to power. He is best-remembered for his realistic novel of a Russian peasant in the German army *The Case of Sergeant Grischa* (1927).

ZWEIG (zvīg), Stefan (1881–1942). Austrian writer. A Viennese Jew, he found the world of Nazidom too much and committed suicide with his wife in Rio de Janeiro. He wrote poems and novels, but is best remembered for literary studies, e.g. Balzac, Dickens, Dostoyevsky, Stendhal.

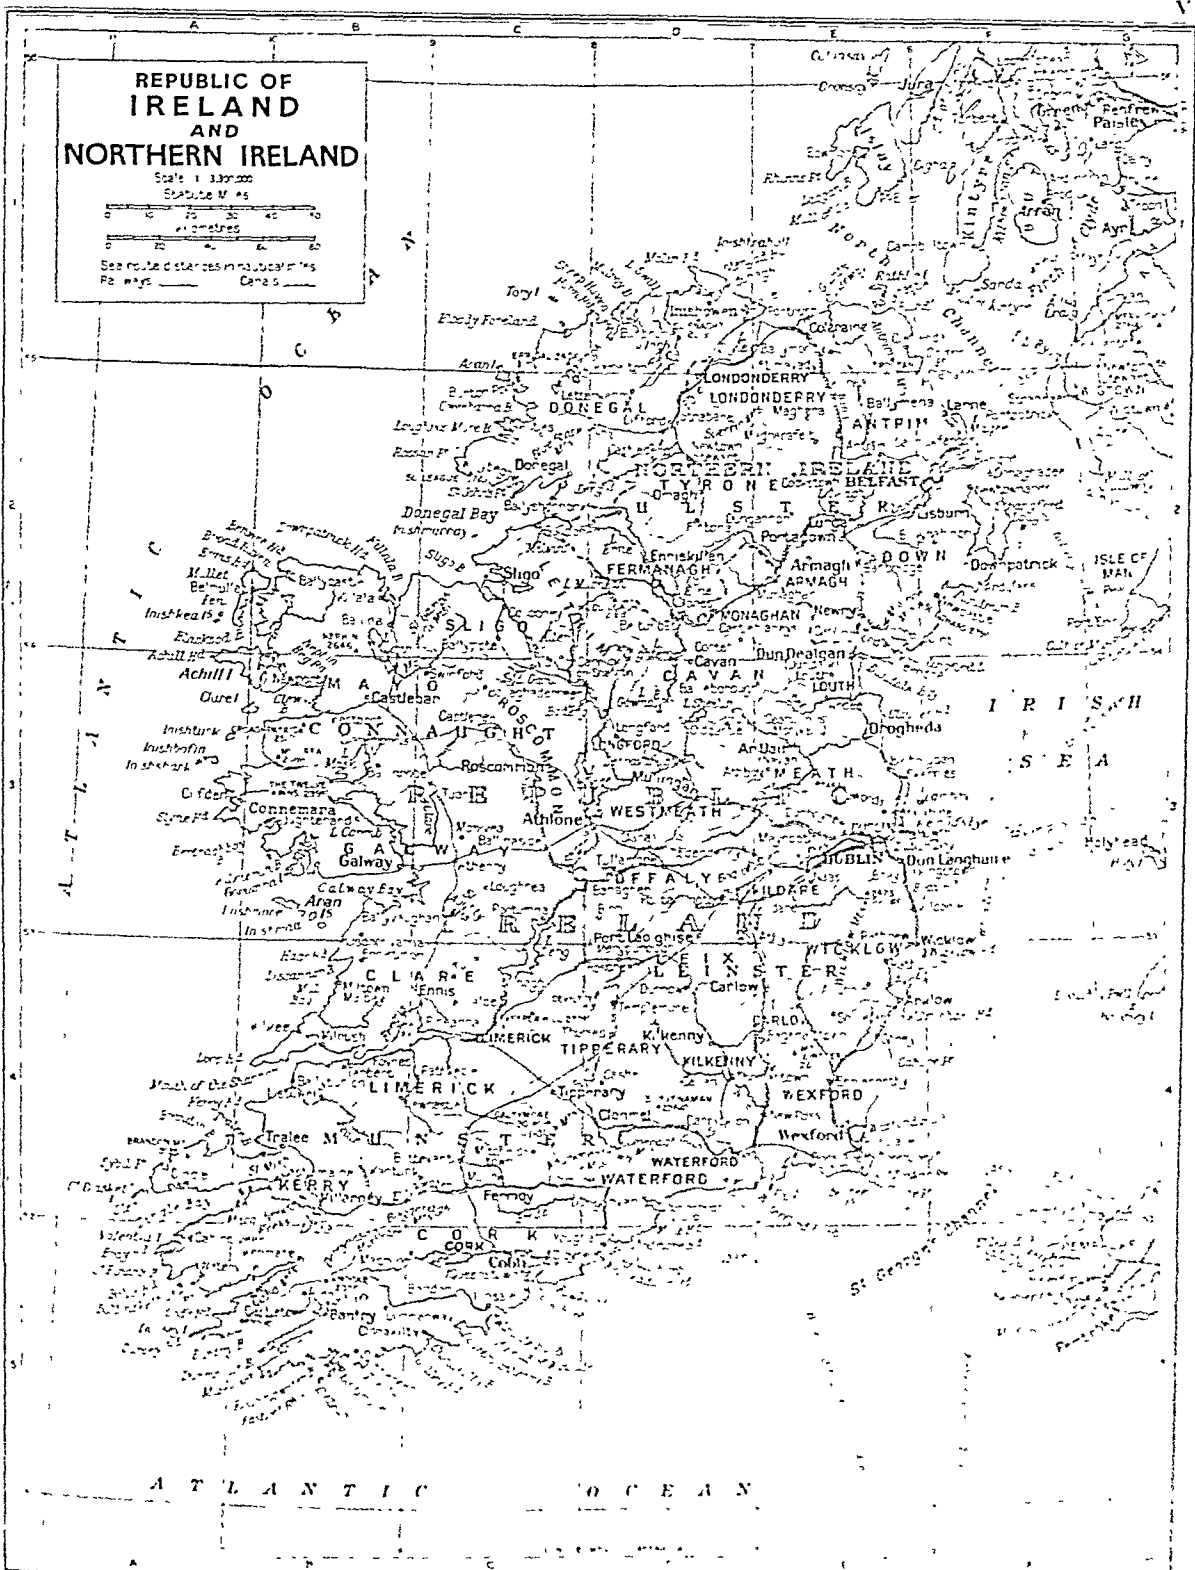

ZWICKAU (tsvik'ow). Town in Karlmarxstadt district, E. Germany, on an important coalfield. Pop. (1966) 128, 184.

ZWINGLI (tsving'lē), Ulrich (1484–1531). Swiss Protestant. B. at St. Gall, he was ordained an R.C. priest in 1506, but by 1519 was a Reformer, and led the movement in Switzerland. In a war against the cantons which had not accepted the Reformation he was killed in a skirmish at Kappel.

ZWOLLE. Cap. of Overijssel prov., Netherlands, a market town with brewing, distilling, butter making and other industries. Pop. (1967) 59,900.

BARBIROLLI. Meticulous in preparation as in performance, Barbirolli works on the score of Vaughan Williams Fifth Symphony in the recording studio. Photo: Godfrey MacDonnic.

famous for its association with the artists of the 'Barbizon School' who included Millet, Rousseau, Corot, Daubigny, and Courbet.

BARBOUR (bar'ber), John (c. 1316-95). Scottish poet. He was archdeacon of Aberdeen after 1357, and held small posts at court. His chronicle-poem *The Brus* is almost the first Scottish poem.

BARBUSSE (bahrbüs'), Henri (1874-1935). French novelist and poet, b. at Asnières. He wrote novels of an extreme realistic type - *L'enfer* (1909), *Nous autres* (1914) - served in the F.W.W., and pub. in 1916 *Le feu* (Under Fire), a grim story of trench-warfare. In his later work he became more and more a radical political propagandist.

BARCELONA (bahrselō'nah). Largest port, chief commercial and industrial centre, and 2nd city of Spain, on the Mediterranean coast, 3 m. N. of the mouth of the Llobregat. It was founded in the 3rd cent. B.C., and its importance grew until in the 14th cent. it had become one of the leading trading cities of the Mediterranean. As the chief centre of anarchism and Catalan nationalism it was prominent in the overthrow of the monarchy in 1931, and was the last city of the republic to surrender to Franco in 1939.

It has a Gothic cathedral. The city centre is the Plaza de Cataluña, the largest square in Spain, into which run the Rambla promenades. A remarkable modern building is the Templo Expiatorio de la Sagrada Familia, designed by Gaudí. The univ. was founded in 1450. The docks can accommodate the largest vessels. Industries include textiles, engineering, chemicals, etc. Pop. (1965) 7,655,603.

BARCLAY, Robert (1648-90). Scottish Quaker. B. in Moray, he joined the Society of Friends in 1667, engaged ably in numerous controversies, and suffered considerable persecution. He is considered the greatest apologist of the Quaker faith for his *Apology for the True Christian Divinity* (1678).

BARÉA, Arturo (1897-1957). Spanish writer, subsequently a British subject. He fought with the Republican forces during the civil war, and in 1937, his health having failed, he settled in Paris. Living in extreme want and misery, he wrote the autobiographical *The Forge* (1941); other works incl. *The Track*, *Lorca*, *The Clash*, and *The Broken Root*.

BARBONE, Praise God (c. 1596-1679). English preacher of the Parliamentary party. A London leather-seller by trade, in 1653 he became a member of the new House of Commons, and in derision the Parliament was nicknamed 'Barbone's Parliament'.

BARILLY (barälē'). City of India in the state of Uttar Pradesh near the Ramganga. It is an important

fly. junction and manufacturing centre. Pop. (1961) 273,204.

BARENTS (bah'rents), Willem (d. 1597). Dutch explorer, who in 1594-7 made 3 expeditions from Holland in search of a N.E. passage. He d. in course of the last. Barents Sea is named after him.

BARÈRE DE VIEUZAC (bah'rär' de vë-özahk'), Bertrand (1755-1841). French revolutionary. He presided over the National Convention when Louis XVI was sentenced to death. For his part in the Terror he was sentenced to deportation in 1795, but escaped. He was employed as a secret agent by Napoleon.

BARHAM, Richard Harris (1788-1845). British writer and antiquary. He took holy orders and became priest-in-ordinary to the Chapel Royal. He is best known for his verse tales pub. in *The Ingoldsby Legends* under his pseudonym Thomas Ingoldsby.

BARI (bah'rē). Italian port and airport on the Adriatic, 69 m. N.W. of Brindisi. It is the commercial centre of Apulia and has a cathedral, a castle, and a univ. founded 1924. Pop. (1961) 311,268.

BARING, Maurice (1874-1945). British writer. 4th son of the 1st Lord Revelstoke, he was in the diplomatic service 1898-1904, and made a reputation by his work as a press correspondent during the Russo-Japanese and 1st Balkan wars. He pub. poetry, novels, plays, studies of Russian and French literature, and the autobiography *The Puppet Show of Memory*.

BARING-GOULD, Sabine (1834-1924). British writer, rector of Lew Trenchard in N. Devon from 1881. He was prolific in novels, books of travel, mythology and folklore, and wrote the words of 'Onward, Christian Soldiers'.

BARIUM. A metallic chemical element, symbol Ba, at. no. 56, at. wt. 137.36. The name comes from the Greek word for 'heavy', since the presence of B. was first discovered in barytes or heavy spar. It is silver-white in colour, oxidizes very easily, and is a little harder than lead. Being heavy, B. sulphate is added to a meal to reveal abnormalities in the digestive tract during radiography. B. is very important since, with strontium, it forms the emissive surface in every small thermionic valve and cathode-ray tube.

BARK, or **Cortex**. The outer rind of the stems of plants, strictly speaking the outer covering of the stems of dicotyledonous plants, especially those of a woody and perennial growth (trees and shrubs). True bark consists of dried-up tissues, and its production is assisted by the formation of a layer of cork outside the growing part of the stem. B. has many economic uses. Some kinds have medicinal qualities, e.g. cinchona (quinine), cascara, and angostura.

BARKER, George (1913-). British poet. His verse has been compared to that of the surrealists, and, though uneven, has great vividness of imagery. His work incl. the long poem *Calamiterror* (1937), *The True Confession of George Barker* (1950), and *Collected Poems*, 1930-50.

BARKER, Sir Herbert Atkinson (1869-1950). British manipulative surgeon. He studied under his cousin, J. Atkinson, whose practice he took over in 1904, and achieved thousands of cures by his unorthodox methods. He was subject to bitter attack from the medical profession until late in his life: he was knighted in 1922, retiring in 1925. A series of films made at St. Thomas's Hospital, London, perpetuates his techniques.

BAR-LE-DUC (bah'r-le-dük'). Capital of Meuse dept., France, on the Ornain, 124 m. E. of Paris; famous for its preserves, wines, etc. Pop. (1962) 20,168.

BARLETTA. Italian port on the Adriatic, 34 m. N.W. of Bari. It has a Romanesque cathedral and a good harbour, and exports wine, oil, and sulphur. Pop. (1960) 69,700.

BARLEY. Genus of cereals (*Hordeum*) belonging to the family Gramineae. The cultivated B. comprises 3 species - six-rowed barley (*H. hexastichon*), four-

rowed barley or Scotch Bigg (*H. vulgare*), and two-rowed barley (*H. distichon*).

B. was one of the earliest cereals to be cultivated, and no other cereal can thrive in so wide a range of climate. Polar barley is sown and reaped well within the Arctic circle in Europe. B. is no longer much used in bread-making, but finds a wide use for pig, horse, and cattle foods. Its main importance, however, is in brewing and distilling.

BARLOW, Sir Thomas (1845–1945). Royal physician to Queen Victoria, Edward VII, and George V. It was for his work in the treatment of child diseases that he became most famous. He was the first to define 'rickets' as infantile scurvy, due to the lack of certain food-elements.

BARMEN. Former German city in the Rhineland, in 1929 joined with Elberfeld to form Wuppertal (q.v.).

BARNABAS. Christian saint and apostle, mentioned in Acts as a 'fellow-labourer' of Paul; he went with Mark on a missionary journey to Cyprus, his birthplace. His feast-day is 11 June.

BARNACLE. Marine crustacean of the order Cirripedia. The larval form is free-swimming, but after a time it settles down, and fixes itself by its head to a stone, floating wood, etc. The animal then becomes a sedentary creature, enclosed in a shell through the opening of which the cirri protrude. By means of these food is swept into the mouth. The true barnacles (*Lepadidae*) are fixed on long fleshy stalks, and include the common goose barnacle (*Lepas anatifera*) which grow on ships.

BARNARD, Christiana. See HEART.

BARNARD CASTLE. Market town (U.D.) on the Tees, here crossed by an old bridge, 17 m. W. of Darlington. The castle is now a ruin. Here is Bowes Museum. Pop. (1961) 4,969.

BARNARD, Thomas John (1845–1905). British philanthropist. B. in Dublin, he became a doctor in the east end of London. In 1867 he opened the first 'home' at Stepney Causeway, still the H.Q., and more than 100 others before he died.

BARNATO (bahnrnah'tō), Barnett Isaacs (1852–97), known as Barney Barnato. Jewish diamond magnate and financier. B. in London, he went to S. Africa as an entertainer and conjurer, entered the diamond trade at Kimberley, changing his real name Isaacs to B., and in 1881 launched a company which was amalgamated with the De Beers Co. in 1888. He committed suicide by jumping overboard when returning from the Cape.

BARNAUL (bahnrnah'ool'). Admin. centre of Altai Territory, R.S.F.S.R. (U.S.S.R.), situated where the r. Barnaulka enters the Ob. Originally a mining town founded 1730, it has cotton mills and food-packing factories. Pop. (1967) 395,000.

BARNES, Ernest William (1874–1953). British modernist churchman. A lecturer in mathematics at Cambridge 1902–15, he was an ardent advocate of the significance in modern religion of scientific thought. In 1924 he became bp. of Birmingham and outraged many by his controversial views, as in *The Rise of Christianity* (1947), expressing doubt as to miracles, the virgin birth, and so on.

BARNES, Thomas (1785–1841). British journalist, editor of *The Times* from 1817, developing it into a most powerful organ of informed opinion.

BARNES, William (1800–86). Dorsetshire poet. B. at Rushay, of farming stock, he became a solicitor's clerk, and then master (1823–62) of a private school at Mere, later at Dorchester. In 1838 he entered at

Cambridge to study theology, and was ordained as vicar of Whitcombe in 1847. From 1862 he was rector of Winterbourne Came, where he d. He issued three collections: *Poems of Rural Life in the Dorset Dialect* (1844 and 1862), *Homely Rhymes* (1859), and *Poems of Rural Life in Common English* (1868). An ardent philologist, he pub. grammars and glossaries of the Dorset dialect.

BARNET. Bor. in the N. of Greater London, England. Pop. (1964) 318,051.

In the Battle of B., on 14 April 1471 the Lancastrians under Warwick the Kingmaker were completely defeated by the Yorkists under Edward IV, Warwick himself being killed.

BARNESLEY. Town (co. bor.) in the W. Riding of Yorkshire, England, 15 m. N. of Sheffield. Situated on one of Britain's richest coalfields, it has iron and steel, glass and paper-making industries. Pop. (1961) 74,650.

BARNSTAPLE (bahnrn'stapl; locally bar'um). Fishing port (bor.) on N. Devon coast, England, at the mouth of the Taw, which is crossed by an ancient 16-arch bridge. Pop. (1961) 15,907.

BARNUM, Phineas Taylor (1810–91). American showman, who after an adventurous career exhibited 'Tom Thumb', toured U.S.A. with Jenny Lind, and in 1871 established the 'Greatest Show on Earth', comprising circus, menagerie, and exhibition of 'freaks', conveyed in 100 railway cars.

BARODA. Town in Gujarat state, Rep. of India, 248 m. N. of Bombay, on the Vishnamitri. It has fine modern buildings and a univ. founded in 1949. It is a railway junction. Pop. (1961) 295,304.

B. was formerly the cap. of B. princely state, one of the most important and enlightened in India. A scattered state, it had an area of 8,236 sq. m. and a pop. of some 3,000,000. Its ruler was called a Gaekwar, from the family name, Gaekwad.

BAROJA (bahrokh'ah), Pio (1872–1956). Spanish novelist of Basque extraction and anarchist sentiments. His books incl. a trilogy dealing with the Madrid underworld, *La lucha por la vida* (1904–5), and *Memorias de un hombre de acción*, extending to a score of vols.

BARO'METER (Gk. *baros*, weight; *metron*, measure). An instrument for measuring the pressure of the atmosphere. The most common form is the *mercury*

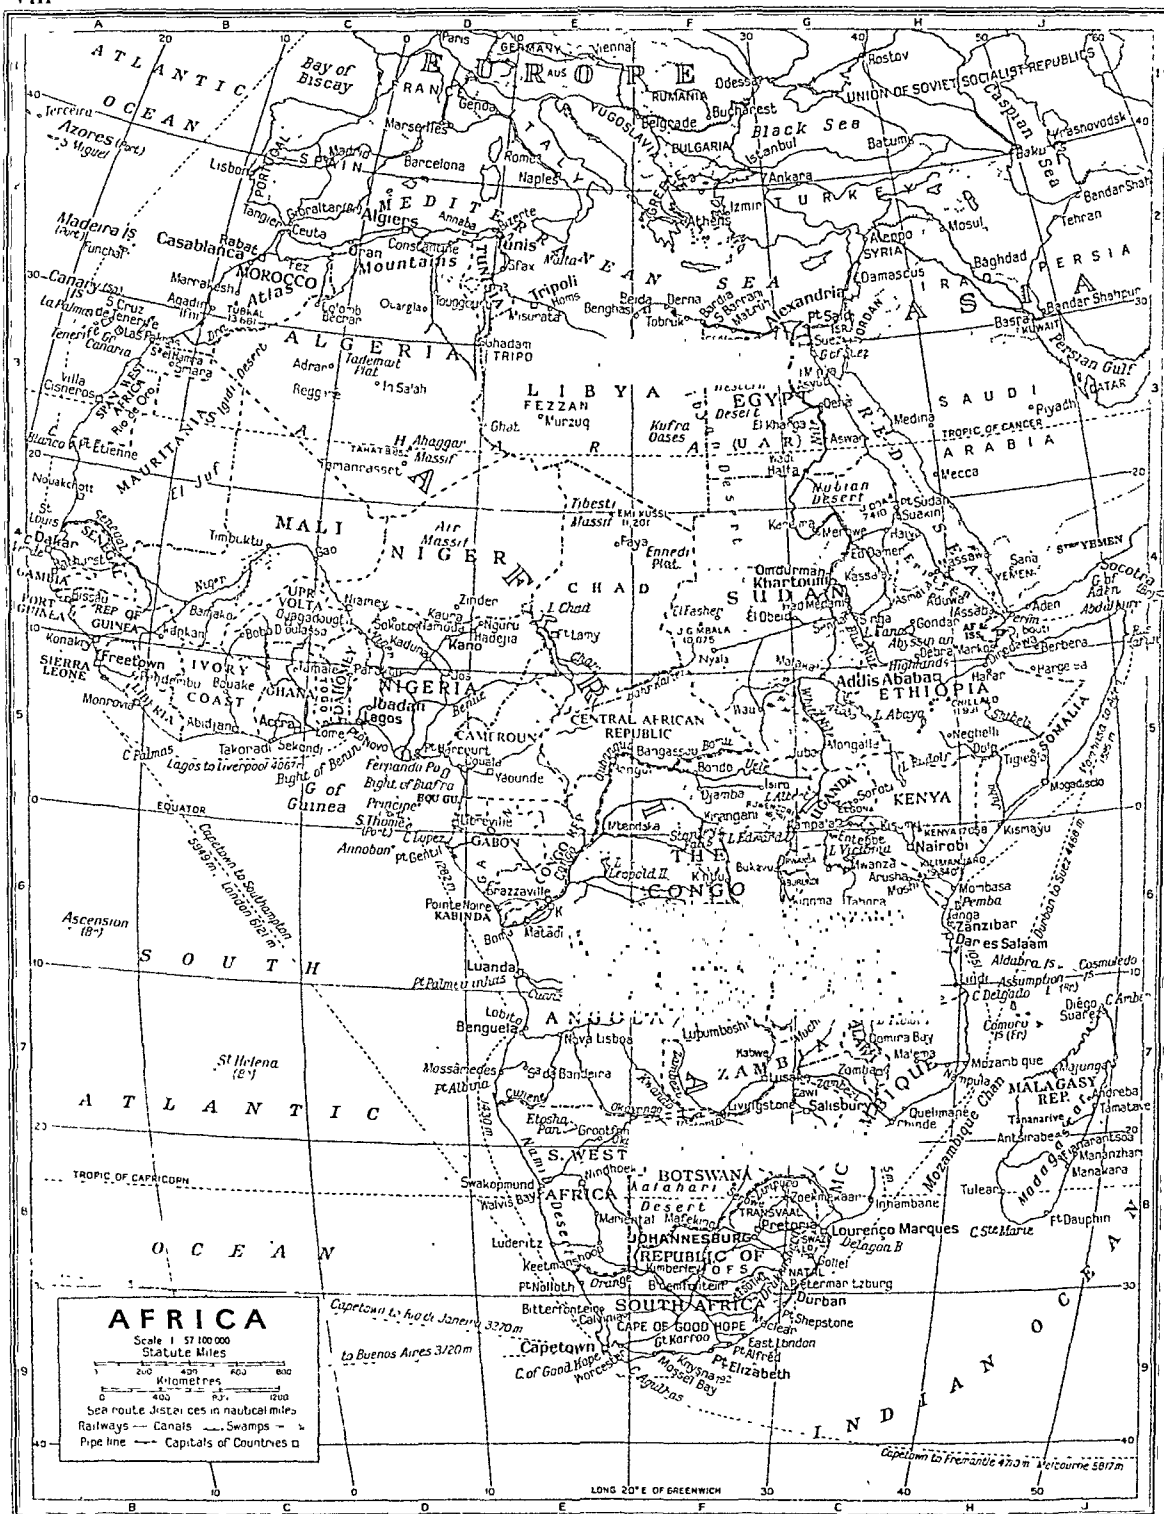

GOOSE BARNACLES

ANEROID BAROMETER

mere mound, but usually it contained a chamber of wood or stone slabs in which were placed the bodies of the deceased. Such are especially common in the southern counties from Sussex to Dorset. They seem to have been communal burial-places of the long-headed Mediterranean race.

Round barrows were the work of the round-headed or 'beaker' folk of the early Bronze Age. The commonest type is the bell B., consisting of a circular mound, enclosed by a ditch and an outside bank of earth. Many dot the Wiltshire downs. In historic times certain of the Saxon and most of the Danish invaders were barrow-builders.

BARROW-IN-FURNESS. Seaport (co. bor.) in Lancs, England, at the S. end of the Furness peninsula. High-quality iron ore, formerly mined locally, founded B.'s fortunes. B. has large docks, shipbuilding yards, iron and steel foundries, heavy engineering works, clothing and textile factories, paper works, paper factories, etc. Vickerstown on Walney Is. is a residential suburb. Pop. (1961) 62,824.

BARRY, Sir Charles (1795–1860). British architect, designer of the Houses of Parliament, Westminster (1840–60); he was knighted in 1852.

BARRY, Comtesse du. See Du Barry.

BARRY, Sir Gerald Reid (1899–1968). Brit. journalist. Editor of the *News Chronicle* 1936–47, he was Director-General of the Festival of Britain 1948–51 (being knighted for his services), and was a co-founder of P.E.P. (q.v.).

BARRY, Port (bor.) in Glamorganshire, Wales, 8 m. S.W. of Cardiff. The 1st docks were built in 1889 for coal export. From fewer than 500 in 1881, the pop. grew to 42,039 in 1961. BARRY Is., 1 m. away, is a bathing resort.

BARRYMORE. American family of actors, the children of British-born Maurice B. and Georgie Drew, both stage personalities. Lionel B. (1878–1954) 1st appeared on the stage with his grandmother, Mrs. John Drew, in 1893. After studying art in Paris, he returned to the stage, and from 1909 made numerous films. Ethel B. (1879–1959) played with Irving in London in 1898 and in 1928 opened the Ethel B. Theatre in N.Y.; she also appeared in many films from 1914. John B. (1882–1942), a vitally flamboyant personality, appeared on stage and screen, often with his brother and sister.

BART (bahr), Jean (1651–1702). Naval hero of France. B. at Dunkirk, the son of a fisherman, he served in the French navy, and harassed the British fleet in many daring exploits.

BARTH (bahrt), Karl (1886–1968). Swiss Protestant theologian. B. at Basle, he held chairs of theology in Germany from 1921, and 1935–62 was prof. at Basle. His *Epistle to the Romans* (1919) and *Church Dogmatics* (13 vols. 1932–67) gained him an international reputation.

BARTHOLDI (bahrtol'de), Auguste (1834–1904). French sculptor. He completed the statue of Liberty overlooking New York harbour in 1884.

BARTHOLIN (bahrtölén), Caspar Thomeson (1655–1738). Danish anatomist who gave his name to the B. glands and the Duct of B. in the human body.

BARTHOLOMÉ (bahrtolomā), Paul Albert (1848–1928). French artist and sculptor, whose *Aux Morts* in the Père Lachaise cemetery, Paris, became world-famous.

BARTHOLOMEW. Christian saint and one of the 12 apostles. Legends relate that after the Crucifixion he took Christianity to India, or that he was a missionary in Asia Minor and Armenia, where he suffered martyrdom by being flayed alive. The Catholic Church commemorates him on 24 Aug.

On St. Bartholomew's day in 1572 occurred the famous MASSACRE OF St. B., when numbers of the French Huguenots were slaughtered by order of the queen-mother, Catherine de' Medici.

BARTHOUS (bahrtoo'), Jean Louis (1862–1934). French statesman. From 1894 he held many Cabinet posts including the premiership in 1913. In 1934, when Foreign Minister, he was assassinated, together with King Alexander of Yugoslavia, in Marseilles.

'BARTHEUS'. Pen-name of the novelist L. A. Ritchie (q.v.).

BARTLETT, John (1820–1905). American publisher and author. B. in Massachusetts, he entered business as publisher and bookseller there, and in 1855 pub. his *Familiar Quotations* and in 1894 his *Shakespeare concordance*; both works have been reprinted many times.

BARTÓK (bor'tók), Béla (1881–1945). Hungarian composer, b. in Transylvania. He was regarded as a child prodigy, studied music at Budapest, and collaborated with Kodály in research into Hungarian folk music, which coloured his later compositions. His large output includes string quartets, violin and piano concertos, orchestral suites, and operas. When Hungary joined Germany in the S.W.W., B. went to America. He d. in New York.

BARTOLOMEO (bahrtölommā'o), Fra (1475–1517). Florentine painter, known also as BACCIO DELLA PORTA. He owed much to Leonardo da Vinci. Albertinelli assisted him in painting the fresco of the 'Last Judgment' in Santa Maria Nuova. Deeply moved by Savonarola's death, he entered a Dominican convent, but he soon turned again to painting. His figure of St. Mark is regarded as his greatest achievement.

BARTOLOZZI (bahrtölöt'se), Francesco (1727–1815). Italian engraver. After working in Rome, he was invited to London in 1764 by George III's librarian, and executed many works for the king.

BARTON, Sir Edmund (1849–1920). Australian statesman. B. at Sydney, N.S.W., he was leader of the Federation movement from 1896, and first P.M. of the Commonwealth of A. (1901–3). On his retirement, 1903, he became a High Court Judge.

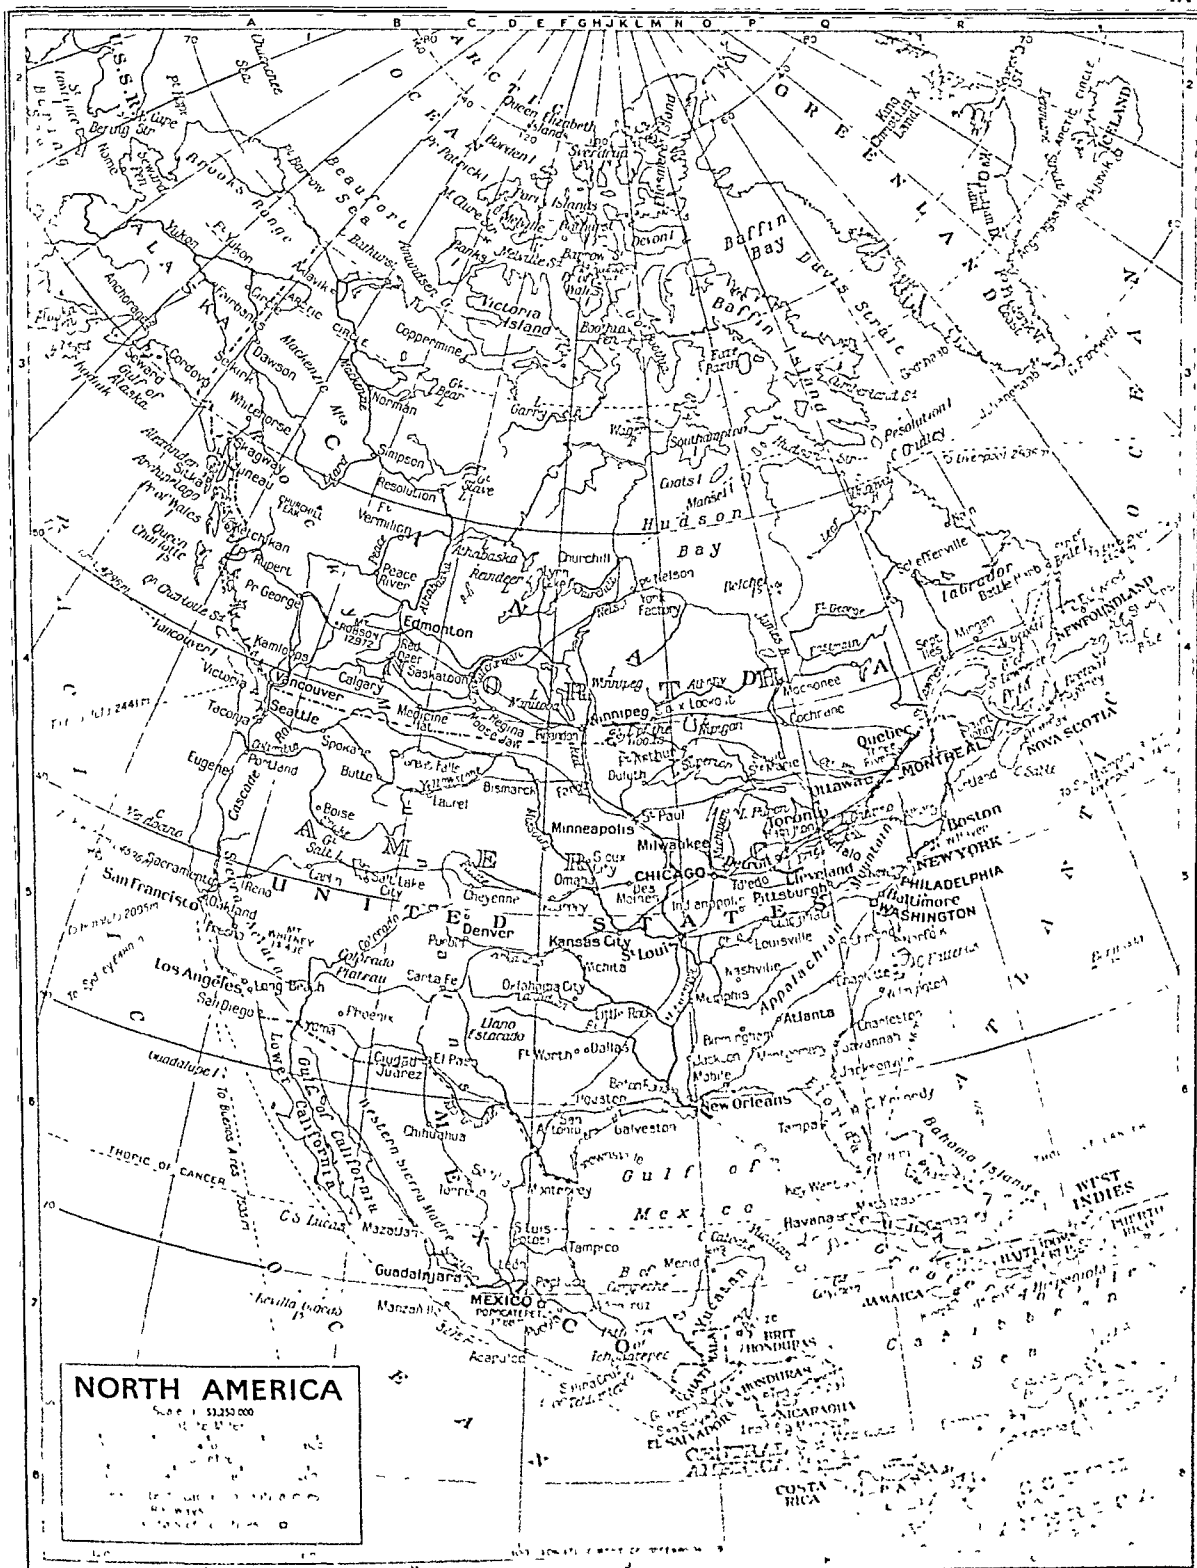

BART'S. Short for St. Bartholomew's Hospital, in Smithfield, one of the great teaching hospitals of London, England. It was founded as part of a priory by Rahere in 1123, and re-founded by Henry VIII at the Reformation.

BARUCH (barook'), Bernard Mannes (1870–1965). American business man and economic adviser. Under Wilson and F. D. Roosevelt he held many economic appointments. In 1946–7 he was U.S.A. representative on the United Nations Atomic Energy Commission, and at its first meeting put forward the U.S. Government's proposals for control of atomic energy. His autobiography, *My Own Story and The Public Years*, was pub. 1957–60.

BASALT. The commonest basic lava. Composed chiefly of labradorite feldspar and ferrous and magnesium silicates. Bs. are usually dark grey, but may be green, brown, or black. The ground mass may be glassy or finely crystalline, sometimes with large crystals embedded. Bs. have been extruded at frequent intervals throughout geological time, and a substratum of B. may underlie the earth's crust. Generally B., when erupted, spreads out in a wide sheet of no great thickness; but successive eruptions in the same area may form sheets of substantial depth, as in the great plateaus of Colorado and the Indian Deccan. In the Tertiary epoch a great B. plateau, remnants of which are seen on the W. coast of Scotland and in N.E. Ireland, stretched from Britain to Iceland and Greenland. As the molten lava shrinks and solidifies it may form hexagonal columns, as in the Giant's Causeway in Antrim.

BASEBALL. The national summer game of the U.S.A., thought by some authorities to have evolved from the English game of rounders, while others claim that it originated in New York, U.S.A. in 1839.

It is played with a bat and ball between 2 teams.

village of B. with its 15th-cent. church. Pop. (1961) 88,459.

BASILICA. Type of Roman public building; a large roofed hall flanked by columns generally having an aisle on each side, used for judicial or other public business. The earliest known B., at Pompeii, dates from the 2nd cent. B.C. The type was adopted by the early Christians for their churches.

BASINGSTOKE. Market town (bor.) of Hants, England, on the Loddon, 45 m. W.S.W. of London. Its first charter was granted in 1227, but there are prehistoric and Roman remains. Basing House, in the vicinity, was renowned for its long defence, 1643-5, against the Parliamentarians. Agricultural implements, motor vehicles, etc., are made. Pop. (1961) 25,940.

BASKERVILLE, John (1706-75). British printer. He began his career as a footman, became a writing-master in Birmingham, and from 1750 onwards experimented in casting types. In 1756 he pub. a 4to edition of Virgil, which was followed by 54 books remarkable for their craftsmanship.

BASKETBALL.

Indoor game very popular in U.S.A. and Canada, invented by Dr. J. A. Naismith, of Springfield, Mass., a Y.M.C.A. instructor, in 1891. It is played by 2 teams of 5, substitutes being allowed during play. The object is to throw the ball, similar to a round football, into a basket suspended against a board, 10 ft. from the ground, at each end of the court. The ball is played by hand only. Most famous of all teams is the Harlem Globetrotters.

BASLE. Conventional English form of the name of the 2nd city of Switzerland (Basel in German, Bâle in French). Situ-

ated on the Rhine, on its right-angled bend at the S. end of the middle Rhine plain, it is one of the greatest route centres of Europe, and also a great banking and commercial centre. The Bank for International Settlements was estab. here in 1930. B. manufactures textiles, particularly silks and ribbons, machinery, chemicals, clocks and watches, foodstuffs, etc.

B. was a strong military station under the Romans. In 1501 it joined the Swiss confederation, and later developed as a centre of the Reformation. The 11th cent. cathedral was rebuilt after an earthquake in 1356. The town hall dates from the 16th cent., and the univ. from the 15th. Pop. (1966) 212,800.

BASQUES (baskz). A people inhabiting the Spanish prov. of Alava, Vizcaya, and Guipúzcoa, and part of the French dept. of Basses-Pyrénées, in the angle of the Bay of Biscay. They may be a remnant of the ancient Iberians, or they may belong to an even earlier stock. They first appeared in history in 778, when they annihilated the rearguard of Charlemagne's army at Roncesvalles, and slew Roland. The B.

BASS. Common bass (top), and stone bass.

provinces gradually came under the crown of Castile. They retained their ancient privileges of self-govt. through their elected *juntas*, which confirmed or rejected the decrees of the Cortes. During the Carlist revolts of 1833-9 and 1873-6 they took the losing side, and their privileges were greatly curtailed. They were restored by the republic of 1931, and this led them to rally to the Republic when the Civil War began. They were crushed by Franco in 1937, their privileges suppressed, and the use of their language forbidden, but in 1968 activities by the terrorist organization ETA (for Euzkadi, the Basque homeland, and Freedom) led to a state of emergency in Guipúzcoa.

Iron ore, most of which is shipped to Britain, is mined in the Basque country; agriculture is technically backward, but its people are fine seamen and fishermen. They have their own customs, dances, ball game (pelota), and national dress. Their language (Eskua, unrelated to French or Spanish) has to some extent been reinstated as a govt. conciliatory measure: its most typical expression is the long romantic verse dramas, *pastorales*, performed at open-air festivals. The Bs. are devout Catholics.

BA'SRA. City of Iraq, and its only port available for ocean steamers, situated near the Shatt-al-Arab, 60 m. from the Persian Gulf. It is an important railway and air centre; shipping trade is largely with India. Petroleum is worked in the vicinity. The irrigated areas round B. produce the world's finest dates. Pop. (1967) 423,000.

BASS (bas). Various species of fish of the order Percomorphi. The species *Morone labrax* belongs to the family of sea-perches (Serranidae), and is found in shoals off the Mediterranean and Atlantic coasts. See GROUPE.

BASSEIN (bahsān'). Port of Burma, on the B. river, 70 m. from the sea. A military and trade centre, it was founded in the 13th cent. and taken by the British in 1852. It has a 'teachers' training college. Pop. (1967) 90,000.

BASSES-ALPES. Dept. of FRANCE.

BA'SSET. A French hound for hunting the hare on foot, introduced into Britain in 1866. It is heavy and short-legged, and remarkable for its great powers of scent and for excelling in hound 'music'.

BA'SSET HORN. Wood-wind instrument, said to have been invented in 1770 by a clarinet-maker of Passau, Bavaria. It consists of a cylindrical tube of wood ending in a metal bell, and is the tenor of the clarinet family.

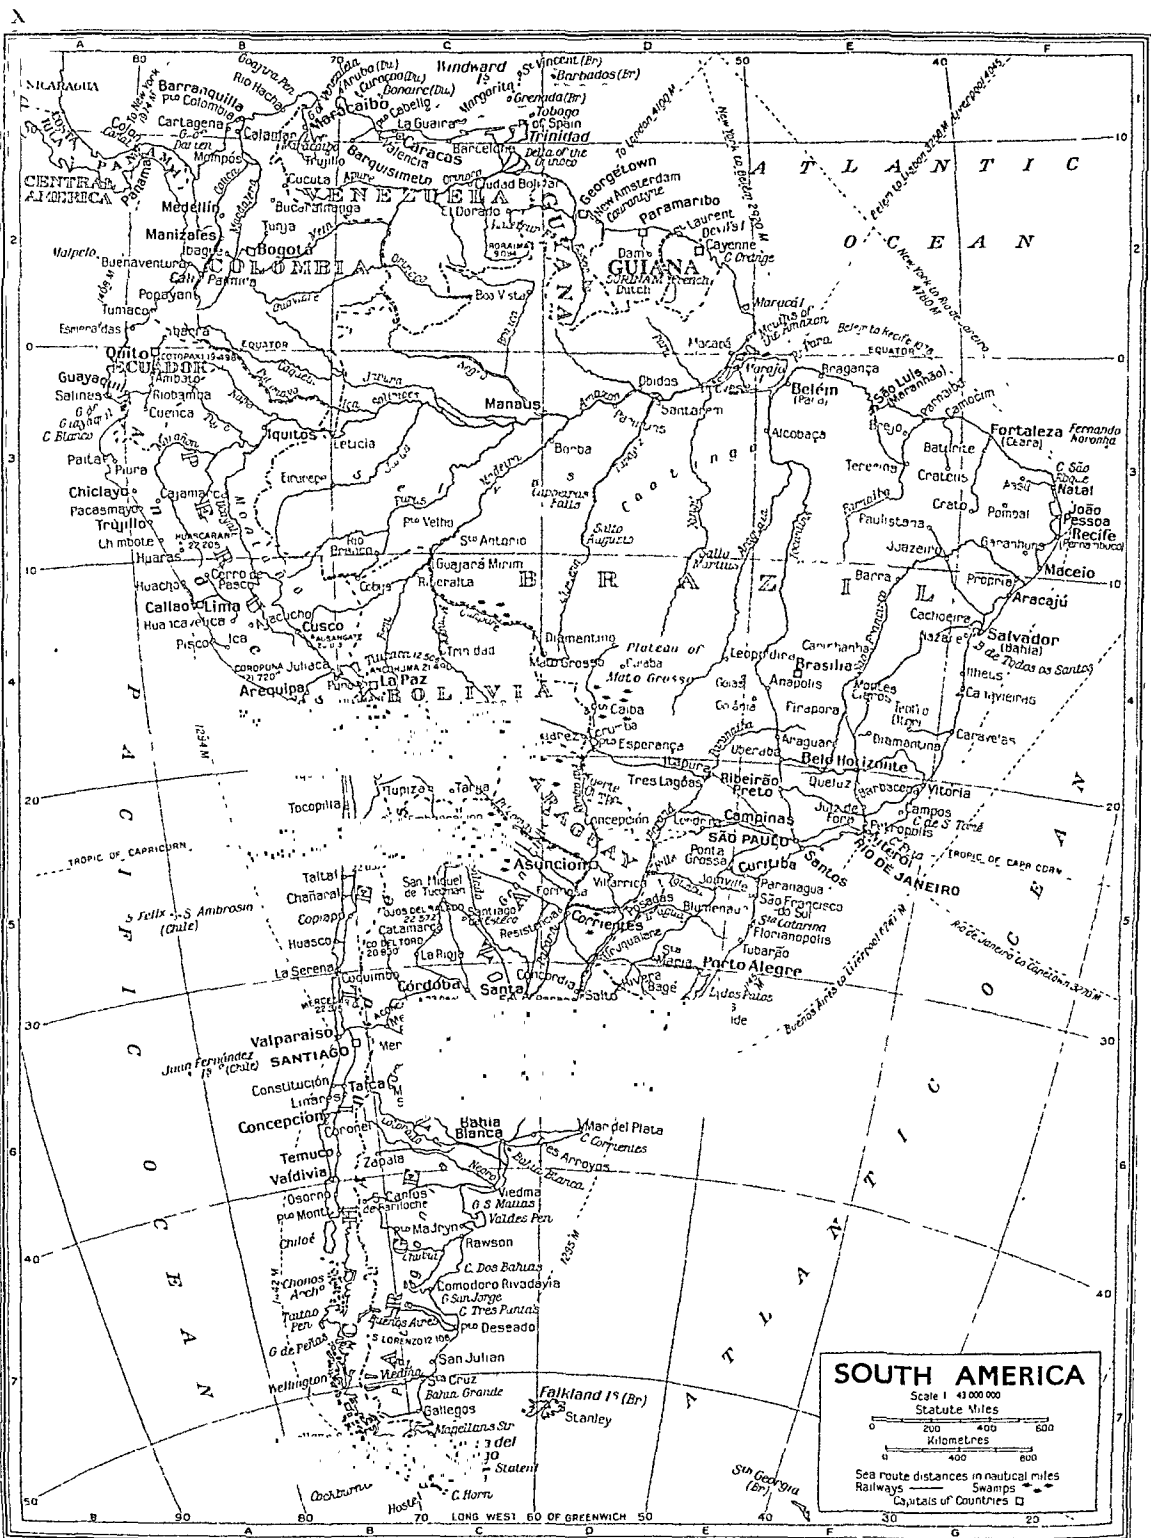

BASSOON. Wood-wind instrument of the oboe family, of which it is the bass. It is descended from the bass pommer which was about 6 ft. in length and perfectly straight, whereas the B. is doubled back on itself. Its tone is rich and deep.

BASS ROCK. Islet in the Firth of Forth, Scotland, about 350 ft. high and 1 m. in circumference. It has a lighthouse, and is inhabited by hosts of sea birds.

BASSE-TERRE (bāhs tār'). Cap. and port of the French overseas dept. of Guadeloupe. Pop. (1967) 13,978.

of Hesse (1823–88) and his morganatic wife, the Polish countess Julia Theresa von Hauke (1825–95), who was created princess of Battenberg, in the Prussian province of Hesse-Nassau, in 1858, he became a naturalized British subject, entered the R.N. in 1868, m. in 1884, Princess Victoria of Hesse, daughter of Queen Victoria's daughter Alice, and was 1st Sea Lord, 1912–14. In 1917 he renounced his German titles, adopted the surname Mountbatten (q.v.) and was created 1st Marquess of Milford Haven (q.v.).

The 2nd son of Prince Alexander, ALEXANDER JOSEPH (1857–93), became Prince Alexander I of Bulgaria. The 3rd son, Prince HENRY MAURICE (1858–96), m. in 1885 Queen Victoria's youngest daughter, Beatrice (d. 1944), became governor of the Isle of Wight and of Carisbrooke, took part in the Ashanti war, and d. at sea: his daughter, Victoria Eugénie Julia Ena, m. Alfonso XIII of Spain.

BATTERSEA. Former bor. of London, merged in the new Inner London bor. of Wandsworth, on the S. bank of the Thames. Battersea Park has a popular funfair, and other features of the district incl. B. power station, the B. Dogs' Home (1860), Clapham Junction Station, and London Heliport, opened in 1959. Pop. (1964) 335,367.

BATTLE. Small town in Sussex, England, the name of which is derived from the battle of Hastings, 1066, which was fought in the neighbourhood. B. Abbey, a girls' school, incorporates part of the abbey built by William the Conqueror. Pop. c. 5,000.

BATTLE CRUISER. A type of warship now obsolete with the displacement and armament of a battleship, and the speed and protection of a cruiser.

BATTLESHIP. Type of warship now obsolete, but formerly predominant over all others in armour and fire-power: it has been superseded by the aircraft carrier. See WARSHIP.

A lineal descendent of the wooden walls of the sailing-ship era, the 1st modern B. was H.M.S. *Dreadnought* (1906) with a displacement of 17,900 tons, an armament of ten 12-in. guns, armour belt of 11 in., and a speed of 21 knots. Last of Britain's B.s. was the *Vanguard* (commissioned 1946), 42,000 tons, with eight 15-in. guns in twin turrets and sixteen 5.25-in. guns: she cost £11,000,000.

BATUMI (bahtōōm'i). Chief town of Adzhara A.S.S.R. Georgia, S.S.R., an important port on the S.E. of the Black Sea. Linked with the oilfields of the Baku area by railway and pipelines, it has large oil-cracking plants. Pop. (1967) 100,000.

BAUDELAIRE (bōdlār'), Charles Pierre (1821–67). French poet. B. at Paris, he was sent to India (1841–

BAUXITE. As well as being used in making aluminium, bauxite is an important raw material for abrasive, refractory and chemical industries. This electrically-powered bucket wheel-excavator for extracting the ore is as high as a six-storey building and moves on double crawler tracks 6 ft. high.

Courtesy of Demerara Bauxite Company Ltd.

–3) by his guardians as a check to his dissipation, but remained so extravagant on his return that his inheritance was placed in the hands of a trustee. He joined the revolutionaries in 1848. His first book of verse, *Les Fleurs du Mal* (1857), caused considerable scandal, and was condemned by the censor as endangering public morals: author and printer were fined, and the most offensive pieces suppressed. In 1949 this sentence was quashed.

B. combined concentrated rhythmic and musical perfection with a morbid romanticism and eroticism which found beauty in decadence and evil. His later works incl. translations of E. A. Poe, whom he greatly admired; *Paradis artificiels*, *opium et haschisch* (1860), based on his own experience; an appreciation of *Richard Wagner et Tannhäuser à Paris* (1861); and *Petits poèmes en prose* (1868). His excesses impaired his health, and he spent the last 2 years of his life in hospitals at Brussels, where financial difficulties had driven him, and at Paris, where he d. B. prepared the way for Rimbaud, Verlaine, and the Symbolists.

BAUDOUIN (bōhdoo-ān')
Belgium. In 1950 his father, Leopold III (q.v.), renounced to him his constitutional powers, and B. was known until his succession in July 1951 as *Le Prince Royal*. In 1960 he m. Fabiola de Mora y Aragón (1928–), member of a Spanish noble family and author of fairy tales for children.

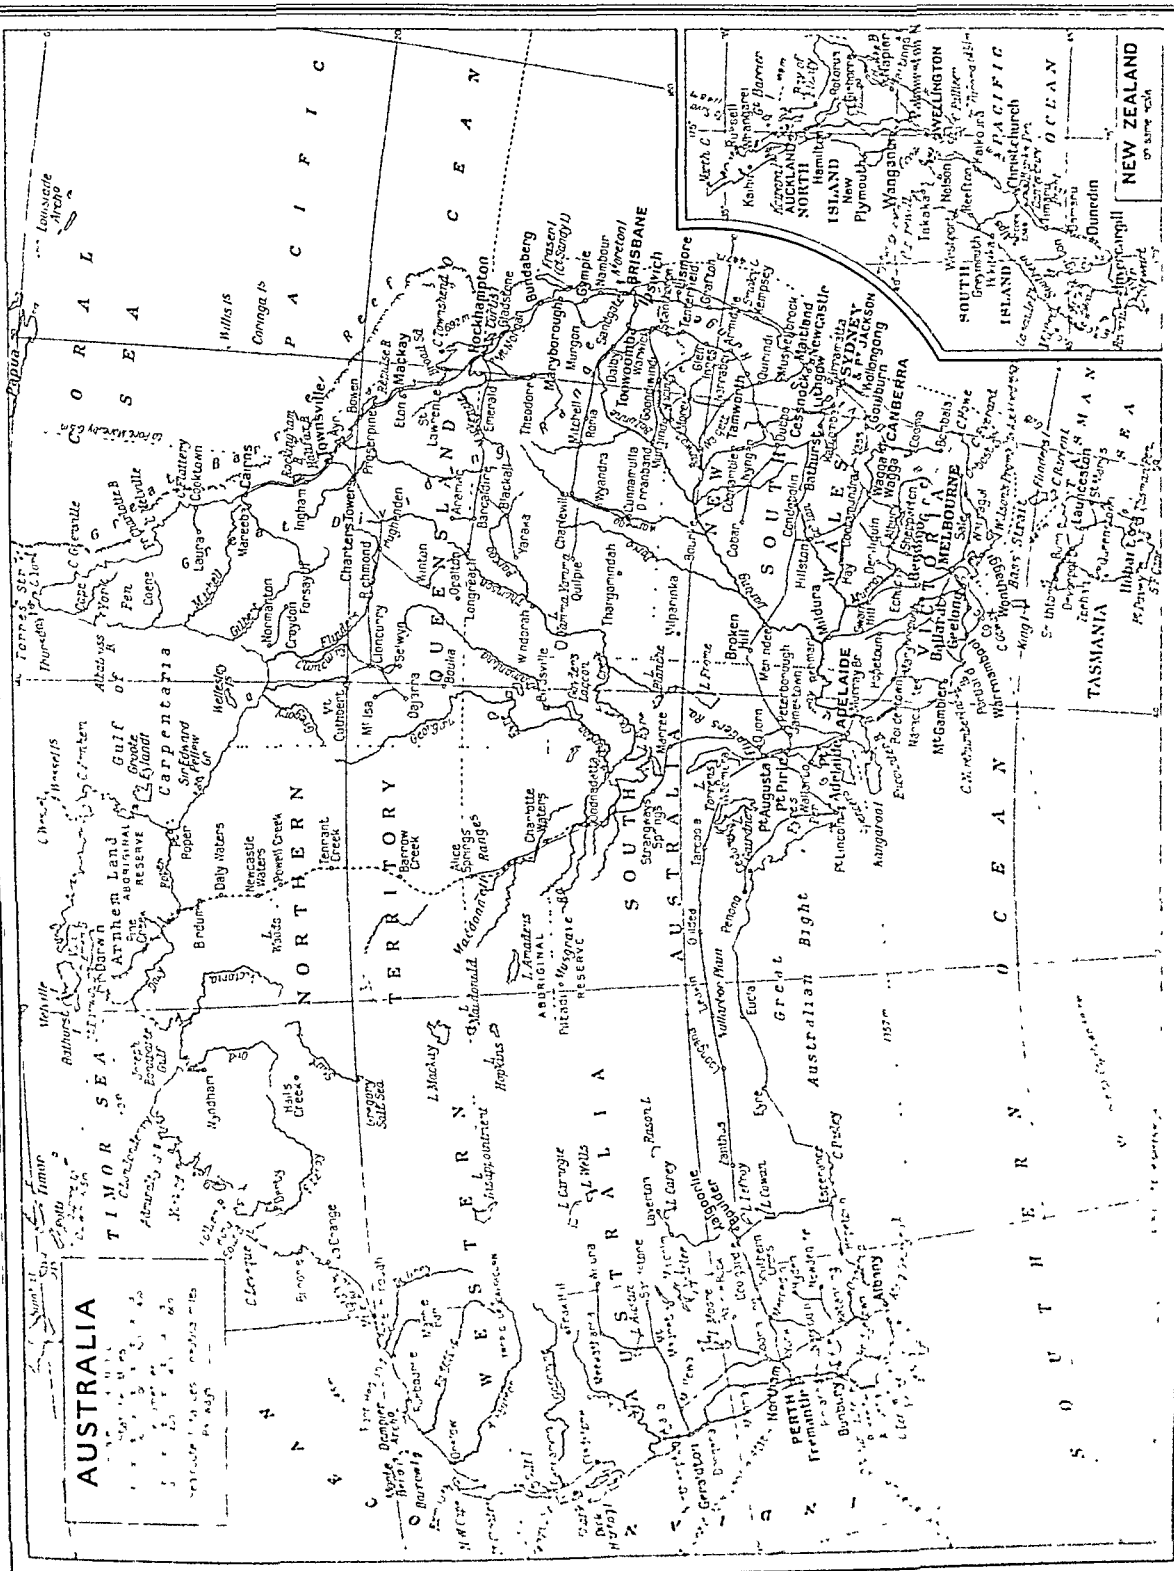

BAUHAUS (bow'how's), Staatliches. The 'State Building House' was founded in 1919 in an attempt to fuse all the arts and crafts in a unified whole, by the architect Walter Gropius (q.v.) at Weimar. Moved to Dessau in 1929, it closed under Nazi pressure in 1933. Klee and Kandinsky (qq.v.) were among its teachers. The Hochschule für Gestaltung at Ulm inherited the B. tradition, but closed in 1968 rather than accept the decision of the Baden-Württemberg State Legislature that it should combine with the local coll. of engineering.

BAUM (bowm), Vicki (1896–1960). American author. B. in Vienna, where she was an actress, she developed a distinctive technique, manipulating numerous characters in authentic settings. The success of *Grand Hotel* (1929) in America, both as book and play, led her to become a U.S. citizen.

BAUR (bowr), Ferdinand Christian (1792–1860). German theologian and Biblical critic, b. near Stuttgart. From 1826 he was professor of theology at Tübingen. Influenced by Schleiermacher and Hegel,

BEACHY HEAD. The cliff top lighthouse of 1831 was easily obscured by low cloud and the Bell Tout lighthouse (1902) which replaced it is off the shore. In 1690 a French fleet, intended to support a Jacobite rising, defeated the English and Dutch in the Battle of Beachy Head but no rebellion followed. Courtesy of the Eastbourne Publicity Department.

1876, and here the Wagner festivals are held, attracting music-lovers from all over the world. Pop. (1954) 60,774.

BAYROUT, BAYRUT. Other forms of BEIRUT.

BAZAINE (bahzān'). Achille François (1811–88). Marshal of France. B. at Versailles, he enlisted as a private soldier in 1831 and had a rapid rise. He commanded the French troops in Mexico in 1862–7, and was made a marshal in 1864. In the Franco-Prussian War B. commanded the 3rd Corps of the Army of the Rhine, allowed himself to be cooped up in the fortress of Metz, and capitulated on 27 Oct. 1870, with nearly 180,000 men. For this in 1873 he was court-martialled and sentenced to death; the sentence was at once commuted to 20 years' imprisonment. In 1874 he escaped to Spain.

BEACHY HEAD. Between Seaford and Eastbourne in Sussex, the eastern termination of the S. Downs, and the loftiest headland (531 ft.) on the S. coast of England. The lighthouse off the shore is 125 ft. high.

BEACONSFIELD (be'konzfeld), Benjamin Disraeli, earl of (1804–81). Conservative statesman and novelist. The son of Isaac D., a distinguished Jewish man of letters, he was baptized a Christian at the age of 13. He was ed. at a private school, and after a period in a solicitor's office wrote the novel *Vivian Grey* (1826) and others, and the brilliant pamphlet *Vindication of the English Constitution* (1835). D. entered parliament in 1837 after 4 unsuccessful attempts, and 2 years later he m. Mrs. Wyndham Lewis, widow of a parliamentary colleague.

Excluded from Peel's government of 1841–6, D. formed his 'Young England' group to keep a critical eye on Peel's conservatism. Its ideas were expounded in the novels *Coningsby* (1844), *Sybil* (1845), and *Tancred* (1847). When Peel decided in 1846 to repeal the Corn Laws, D. opposed the measure in a series of witty and effective speeches; Peel's govt. fell soon after, and D. gradually came to be recognized as the leader of the Conservative Party in the Commons. He gave his own account of these events in his *Life of Lord George Bentinck* (1852).

During the next 20 years the Conservatives formed short-lived minority govts. in 1852, in 1858–9, and in 1866–8, with Lord Derby as P.M. and D. as Chancellor of the Exchequer and leader of the Commons. In 1852 D. first proposed discrimination in income tax between earned and unearned income, but without success. The 1858–9 govt. legalized the admission of Jews to parliament, and transferred the govt. of India from the E. India Co. to the Crown. In 1866 the Conservatives took office after defeating a Liberal Reform

Bill, and then attempted to secure the credit of widening the franchise by the Reform Bill of 1867. On Lord Derby's retirement in 1868 D. became P.M., but a few months later he was defeated at a general election. During the 6 years of opposition which followed he pub. another novel, *Lothair* (1870), and estab. a Conservative Central Office, the prototype of modern party organizations.

In 1874 he took office with a majority of 100. Some useful reform measures were carried, such as the Artisans' Dwelling Act, which empowered local authorities to undertake slum-clearance, but the outstanding feature of the government's policy was its Imperialism. It was Disraeli's personal initiative which purchased from the Khedive of Egypt a controlling interest in the Suez Canal, conferred on the Queen the title of Empress of India, and sent the Prince of Wales on the first royal tour of that country. The Bulgarian revolt of 1876 and the subsequent Russo-Turkish War of 1877–8 provoked the most famous of the political duels between Disraeli and Gladstone. The crisis was concluded by the Congress of Berlin (1878), where B.—he had accepted an earldom 2 years before—was principal British delegate, and whence he brought home 'peace with honour'. The government was defeated in 1880, and a year later B. d. after writing *Endymion*. He was the founder and chief inspiration of the modern Conservative Party.

BEACONSFIELD (be'konzfeld). English town in Bucks 23 m. W.N.W. of London. Edmund Waller and Burke lived in B., and Benjamin Disraeli, whose seat was Hughenden Manor in the neighbourhood, took his title from it. In 1949 the Manor was opened as a Disraelian Museum. Pop. (1961) 10,019.

BEADLE (bēdl), George Wells (1903–). American biologist. B. at Wahoo, Nebraska, he was prof. of biology at the California Inst. of Technology 1946–61, and in 1958 was awarded a share of a Nobel prize for his work with Edward L. Tatum in biochemical genetics. In 1961 he was appointed President of the Univ. of Chicago.

BEAGLE. A miniature fox-hound used for hunting the hare on foot. Of terrier size, the B. can be of any recognized foxhound colour.

BEALE, Dorothea (1831–1906). British pioneer in feminine education. Dau. of a London doctor, she became a teacher at the Queen's Coll. for Ladies, and as headmistress of the Ladies' Coll. at Cheltenham from 1858 was influential in raising the standard of women's education.

BEAN. Name given to the seeds of various leguminous and other plants, which are rich in nitrogenous or proteid matter, and are grown both for human consumption and as food for cattle and horses. The broad bean (*Vicia faba*) has been cultivated in Europe since prehistoric times. The French bean, kidney bean, or haricot (*Phaseolus vulgaris*) is possibly of S. American origin; the runner bean (*P. multiflorus*) is closely allied to it, but differs in its climbing habit. Among Bs. of importance in warmer countries are the Lima bean (*P. lunatus*) of S. America and the soya of China and Japan.

LORD BEACONSFIELD, the youthful dandy.

After Maclellan. Photo: N.P.G. (*Glycine soja*).

(1926-), created Prince Claus of the Netherlands, there was initially some opposition: their eldest child is Prince Alexander (1967-).

BEATTY (bē'ti), David, 1st earl (1871-1936). British admiral. Entering the navy in 1888, he commanded the cruiser squadron 1912-16, and bore the brunt of the Battle of Jutland. In 1916 he succeeded Jellicoe in command of the Grand Fleet, and in 1918 received the surrender of the German Fleet, being subsequently made Admiral of the Fleet and receiving an earldom and the O.M.

BEAUFORT SCALE. System of recording wind velocity, devised in 1806 by Admiral Sir Francis Beaufort (1774-1857), who became hydrographer to the Royal Navy in 1829. It consists of the numbers 0-12, calm being indicated by 0 and the force of a hurricane by 12. It was adopted by the Admiralty in 1838, and in 1874 it received international recognition.

BEAUHARNAIS (bō-ahrnā'), Alexandre (1760-94). French viscount, who served in the American War of Independence, joined the popular party in the early days of the Revolution, but was guillotined for lack of zeal. He m. Joséphine Tascher de la Pagerie, afterwards wife and empress of Napoleon I, and had two children: Hortense (1783-1837), who m. in 1802 Louis Bonaparte, a younger brother of Napoleon, and became the mother of Napoleon III, and Eugène (1781-1824), who was made a prince by Napoleon and viceroy of Italy in 1805. After 1814 he lived in retirement in Bavaria.

BEAULIEU (bew'li). English village and parish in Hants, 6 m. N.E. of Lymington. An abbey founded 1204 is the home of Lord Montagu of Beaulieu. Here is the Montagu Motor Museum. Pop. c. 1300.

BEAUMARCHAIS (bōmahrsā'), Pierre Augustin Caron de (1732-99). French dramatist. B. in Paris, the son of a watchmaker named Caron, he attracted the notice of Louis XV and was given a court appointment. He m. a wealthy widow, assumed the title of de Beaumarchais, won a fortune by speculation, and on his wife's death made another good match. His great comedies *Le barbier de Seville* (1775) and *Le Mariage de Figaro* (1778, but prohibited until 1784 because of revolutionary tendencies) are best known in England by the operatic versions of Rossini and Mozart. Louis XVI entrusted B. with secret missions, and he was responsible for the shipment of arms to the American colonies during the War of Independence, conducting a private traffic with great profit. Accused of treason in 1792, he fled to poverty in Holland and England. In 1796 he returned to Paris where held.

BEAUMONT, Francis (1584-1616). English poet and dramatist. B. at Grace Dieu, Leics, the son of a judge and brother to the poet Sir John B. (1583-1627), he studied law and in 1602 pub. a love-poem *Salmacis and Hermaphroditus*. From c. 1608 he collaborated with John Fletcher, with whom he lived until the latter's marriage in 1613. The best of their joint works are: *Philaster* (c. 1610), *The Maid's Tragedy* (c. 1611), and *A King and No King* (c. 1611). The *Woman Hater* (c. 1606) and *The Knight of the Burning Pestle* (c. 1607) are ascribed to B. alone. B. had greater powers of thought and versification than Fletcher, as well as excelling in plot construction. He was buried in Westminster Abbey.

BEAUNE (bōn). French town in the dept. of Côte d'Or, 23 m. S. by W. of Dijon, a centre of the Burgundy wine trade. Pop. (1962) 15,882.

BEAUTY CULTURE. The art of improving the physical appearance.

The practice of painting the face, of dressing the hair, and of using lotions and perfumes to enhance natural beauty dates back to ancient times. Unguent jars, still fragrant with musk, were found in the 4,000-year old tomb of King Tutankhamen. Cosmetics, oils for the skin, perfumes, and aromatic

BEAUTY CULTURE. Living in the eastern part of Cape Province are the Xhosa, a group of Bantu-speaking tribes. The women paint their faces with ochre, achieving an effect that resembles the mud-pack of the European beauty salon. Courtesy of SATOUR.

baths were known to the Egyptians. Henna, which is still used as a hair dye, was used in the time of Cleopatra to colour the finger and toe nails. The Greeks used perfumes, many of which were imported from Egypt, and also experimented with hair dyes and bleaches. They introduced cosmetics into the Roman Empire, and by the time of Nero it was common for Romans of both sexes to use perfumes, and to indulge in luxurious baths. Kohl was used for painting the eyes, pumice powder for whitening the teeth, and *fucus* as a rouge for the lips and cheeks.

Cosmetics were first used in Britain at the time of the Roman occupation, but they were uncommon until many cents. later. During the 11th and 12th cents. the Crusaders brought all kinds of perfumes and cosmetics from the east. In Elizabethan times powders, rouges, and eye cosmetics were popular; ladies-in-waiting took milk baths; Mary, Queen of Scots, bathed in wine. These practices were suppressed during the Commonwealth, but were revived under Charles II. Small-pox scars and the ravages of other diseases were concealed by means of heavy make-up.

Herbal lotions and packs were later sold to improve the complexion, but it was not until the 20th cent. that make-up became generally accepted by women of all classes. The manufacture of cosmetics has now developed into a major industry, and many women pay regular visits to beauty salons, not only for treatment for their hair (the 1st permanent 'wave', created in 1905 by Charles Nessler, was a painful 9-hr. operation), but for massage, skin conditioning, facial treatment and manicure. Since the S.W.W. toilet preparations for men have become increasingly popular, and modern fashions with their revealing lines and emphasis on active leisure clothes have dictated greater attention to the body as well as the face for both sexes. Salons specializing, not merely in getting rid of excess fat, but in developing perfect proportions and fitness by exercises and other means, have multiplied.

BEAUVAIS (bōvā'). French town, cap. of Oise dept., 42 m. N.N.W. of Paris. The cathedral (1247-1558) is one of the noblest in France, and the town is famous for its carpets, rugs, and hand-made tapestries. Pop. c. 30,000.

BEAUVOIR (bohvwahr'), Simone de (1908-). French writer, who taught philosophy at the Sorbonne 1931-43. Her books incl. a number of novels illustrating philosophical theories, e.g. *All Men are Mortal* (1947); *The Second Sex* (1949), a sensational attack on the man-made world of values women must inhabit;

BEDFORDSHIRE Woburn Abbey near the village of Woburn was built in the 18th century on the site of a Cistercian abbey granted in 1547 to John Russell, later 1st earl of Bedford, so that little of the original structure survives. The surrounding park, as developed by the 13th duke of Bedford, includes a zoo and attracts as many visitors as the house.

Courtesy of the Duke of Bedford.

Bedfordshire, on the Ouse, 23 m. W.S.W. of Cambridge. Primarily an agricultural market town, it also makes agricultural implements and bricks, and has engineering shops. Bunyan began to write *The Pilgrim's Progress* in B. jail; Bunyan Meeting House stands on the site of the barn in which he preached. Bedford School dates from the 12th cent.; endowed in the 16th by Sir William Harpur, it is one of several run by the Harpur Trust. Pop. (1961) 63,317.

BEDFORDSHIRE (Beds). A S. midland county of England, lying mainly in the Ouse basin, and for the most part lowland, devoted to agriculture. Chief towns are Bedford, the co. town; Luton (largest town), Dunstable, and Leighton-Linslade. Area 477 sq. m.; pop. (1967) 598,220.

BEDLAM. Popular name of Bethlehem hospital, the oldest public lunatic asylum in Europe with the exception of that of Granada in Spain. It was originally founded in Bishopsgate, London, as a priory in 1247, was incorporated by Henry VIII in 1547, and was removed to Moorfields in 1675, in 1815 to Lambeth, and in 1930 to West Wickham, near Croydon.

BEDLINGTON. Breed of terrier dog supposed to have been produced by the Northumberland pitmen of about 100 years ago. It has much in common with the Dandie Dinmont, though in conformation like the greyhound. The colours are blue or liver.

BEDSTRAW. Name of a genus of plants (*Galium*) of the madder family (Rubiaceae). The yellow-flowered *G. verum* (Our Lady's B.) is the typical species. *G. mollugo*, with white flowers is also common in England. *G. aparine* is the goose-grass, or cleavers.

BEE. Four-winged stinging insect forming the super-family Apoidea of the order Hymenoptera. More than 12,000 species are known, but fewer than 5 per cent are social in habit.

The eggs of bees are laid in chambers or cells, each nest containing several or, as in the Hive B., many thousands of cells. Nectar and pollen are the staple food. Nectar is regurgitated as honey before being supplied to the larvae.

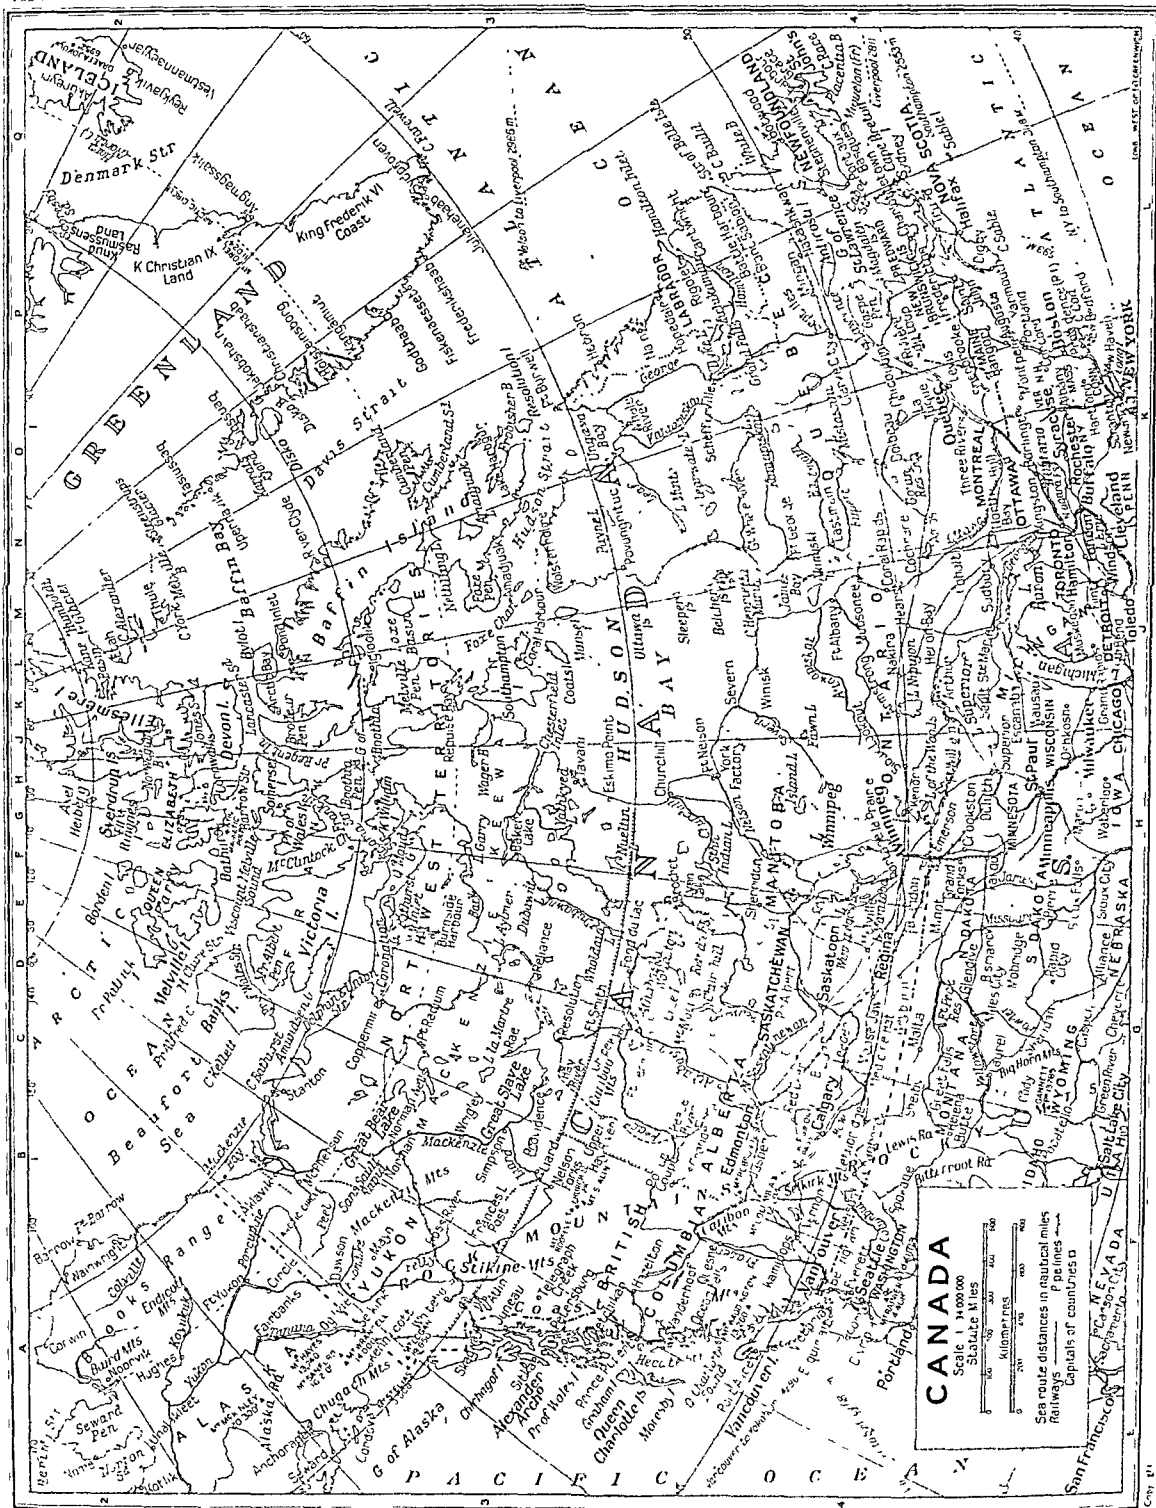

The *solitary bees* comprise ordinary males and females and do not live in communities. Some of the commonest are the species of *Halictus*, *Andrena*, and *Osmia*, important agents in pollinating fruit blossoms in early spring. Many of these bees make tunnels in the ground; others use existing cavities in wood or bramble stems, crevices in masonry, etc. The Mason B. (*Chalicodoma*) of S. Europe makes dome-like nests of soil and pebbles. The Leaf-cutting Bs. (*Megachile*) nest in hollow stems, in posts, or in the ground. There are also Bs. that lay their eggs in nests of other species, and are in fact 'cuckoo' bees, or parasites, whose larvae destroy those of their hosts.

The *social bees* include the Bumble Bs. (q.v.) or

BEE. Far removed from the traditional straw 'skep' is this modern hive (left) In the Israeli Government's Experimentation and Breeding Apiary at Zerinfin which is even handled mechanically. On the right are the worker (top), shown much enlarged, but actually the smallest of the three, drone (lower left) and queen (lower right) of the Hive Bee.

Courtesy of the Government of Israel and the British Bee Research Association.

first his debt to Mozart and Haydn is obvious, though the distinctive features of his own individual style are already apparent. Here belong his early symphonies, chamber music, and piano sonatas. In the 2nd period he developed to the full his dynamic technique and powers of symphonic construction, displayed in e.g. the great *Appassionata* sonata the incidental music of *Egmont*, the opera *Fidelio*, and such symphonies as the *Eroica*, originally intended to be dedicated to Napoleon. The works of this period merge into those of the last, which show a greater complexity and breadth of construction, and an increased use of polyphony. Throughout, the development of B.'s music was essentially classical, but in the realm of the symphony he completely revolutionized the whole treatment of form, until it became dynamic and dramatic. A parallel development is to be discerned in his sonatas. His fine piano concertos, notably the 4th in G major and the 5th (*Emperor*), his string quartets, and a number of songs, should also be mentioned.

BEETLE. The common name of insects forming the order Coleoptera (Gk. *koleos*, a sheath, *pteron*, a wing). The ordinal name is in allusion to the forewings, which are horny or leathery sheaths or *elytra*. When closed the elytra meet in a straight line down the middle of the back and protect the membranous hind-wings folded beneath them. Other characteristics are their biting mouth-parts, antennae with a number of segments, and a large mobile prothorax.

Bs. pass through complete metamorphosis. The larvae are very varied in form, but generally bear legs or rudiments of them. The hind-wings are the functional organs of flight; the elytra take no part in propulsion, they merely act as planes.

Bs. include some of the largest and also some of the most minute of all insects. Thus the Hercules B. (*Dynastes hercules*) measures up to 6 in. long, while some members of the family Trichopterygidae are mere specks. About 250,000 different Bs. are known, forming the largest single order in the animal kingdom.

In habit Bs. are more especially ground insects, but several families are aquatic, and great numbers of species live in close association with plants. Other kinds live in timber and in dried stored products. The carnivorous habit of seeking and devouring living prey occurs in the ground Bs., tiger Bs., ladybirds, and in water Bs. of the family Dytiscidae. The leaf Bs. or Chrysomelidae and the weevils or Curculionidae are plant feeders. Others such as the bark Bs. or Scolytidae feed in their larval stages on the wood or bark of trees. Wireworms, or injurious larvae of click Bs., and chafer larvae are root-feeders, whose activities cause great losses to farmers and others. A great and diverse assembly of Bs., and especially their larvae, feed upon decaying organic matter. Thus the Silphidae include many carrion feeders, e.g. the burying Bs. Hosts of rove Bs. or Staphylinidae frequent refuse of all kinds; and many such as the Scarabaeidae, are dung Bs. The glow-worms and fire-flies are Bs. belonging to the families Cantharidae and Elateridae respectively.

BRENDAN BEHAN. A sketch by Paul Hogarth (q.v.).

Many Bs. are highly injurious, e.g. the asparagus B. and the Colorado potato B., the apple blossom weevil in England, the cotton boll weevil in U.S.A., and the palm-weevil of the tropics. The death-watch and powder-post Bs. bore into furniture and rafters. The grain weevils and meal worms attack stored meal and grain.

BEETON, Mrs. (Isabella Mary Mayson) (1836-65). British expert in housewifery, compiler of *Beeton's Household Management* (1859) known as Mrs.

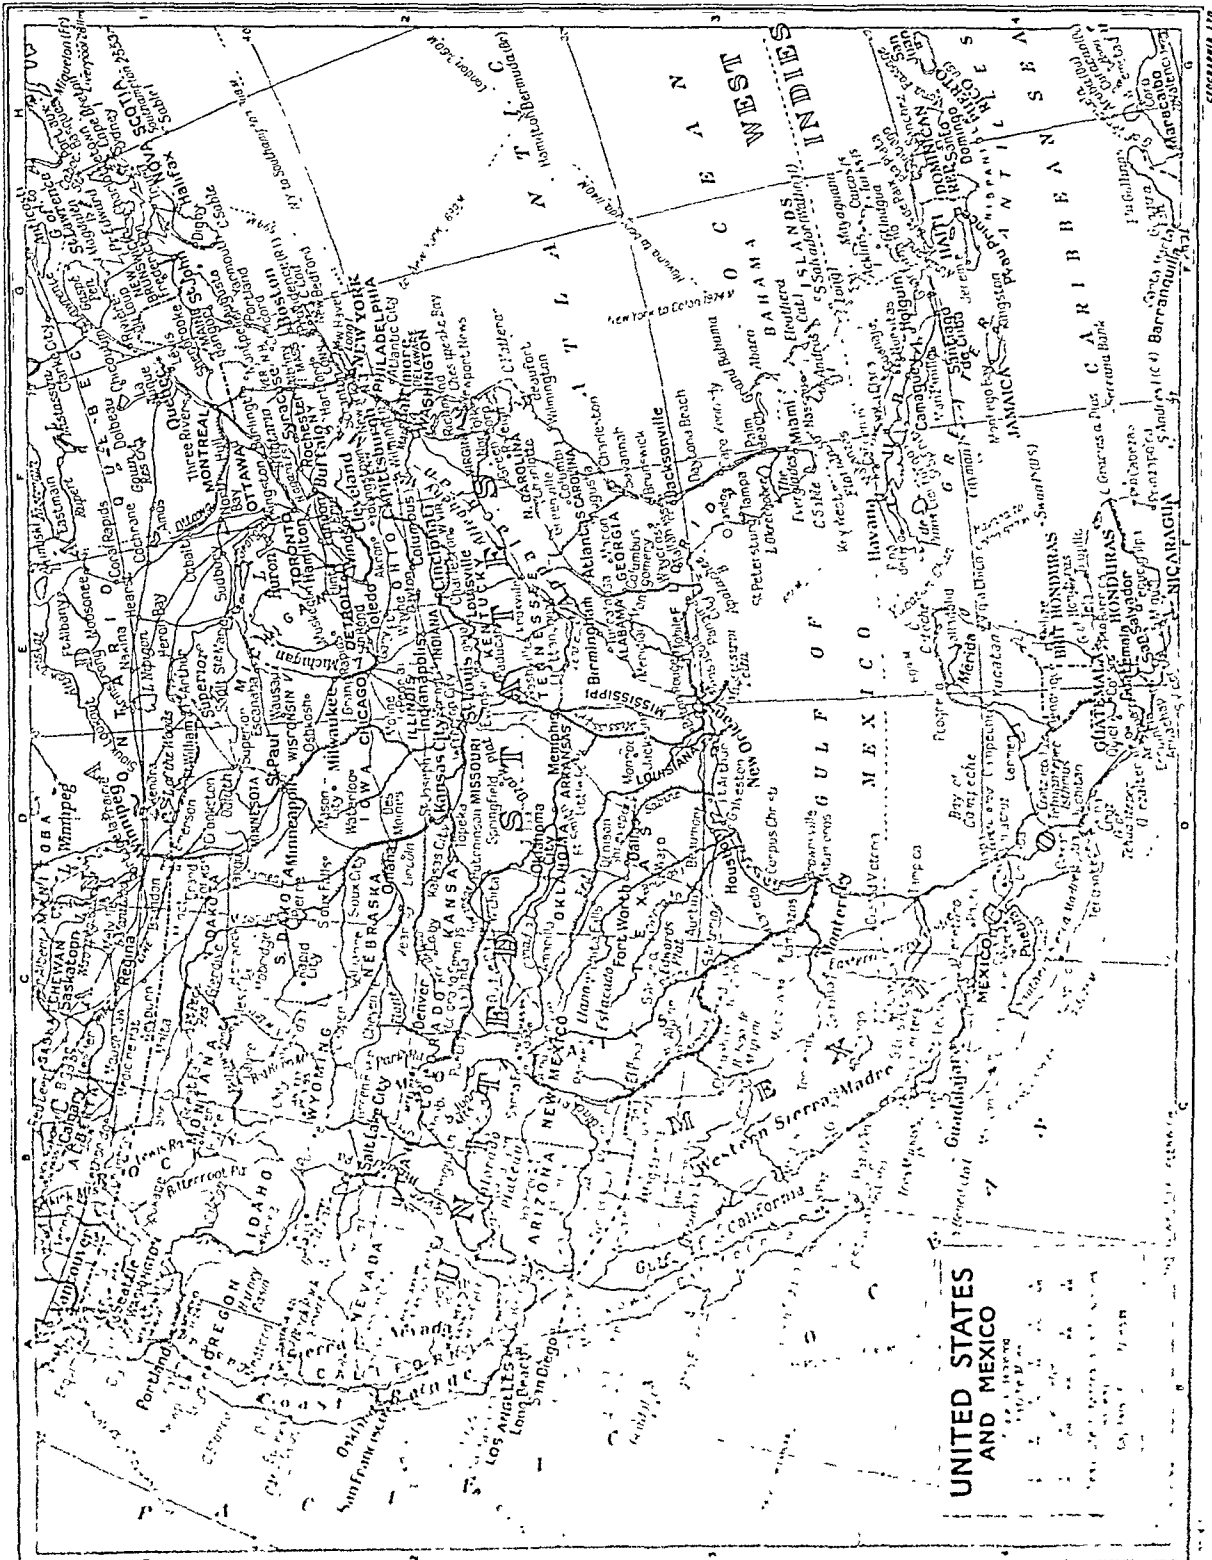

Beeton's cookery book. She was the wife of Samuel Orchard B. (1831-77), a prominent publisher.

BEGONIA. Genus of plants of the family Begoniaceae. There are numerous species, natives of the tropics, esp. S. America and India. They have fleshy succulent leaves, and the flowers are often brightly coloured.

BEHAN (bē'an), Brendan (1923-64). Irish author and playwright. B. in Dublin, he joined the Irish Republican scout organization, *Fianna*, when only 7, becoming an I.R.A. member in 1937. Sentenced to 3 yrs. Borstal training almost immediately on his arrival in England in 1939 (for carrying explosives), he was deported on release to Dublin. Involved in an Easter Day parade incident there which resulted in the shooting of a policeman, he was sentenced in 1942 to 14 yrs. imprisonment, but released in 1946. A house-painter by trade, he started writing in 1951, achieving success with the play *The Quare Fellow* (1956), based on his prison experiences. Other works incl. the autobiographical *Borstal Boy* (1958), the play *The Hostage* (1958), and *Brendan Behan's Island* (1962). A

BEETLES. A selection of British and foreign species, not all drawn to the same scale. 1, *Carabus auratus* (gold beetle). 2, *Silpha quadripunctata* (four-spot carrion beetle). 3, *Anomala frischii*. 4, *Aciillus sulcatus*. 5, *Cetonia aurata* (rose beetle). 6, *Melolontha vulgaris* (common cockchafer). 7, *Sternotomis callioides*. 8, *Ranzania petersiana*. 9, *Lucanus cervus* (stag beetle). 10, *Dynastes tityus* (tityus beetle). 11, *Geloharpya insignis*. 12, *Callistinus lunatus*. 13, *Copris lunaris* (lunar-headed dung beetle). 14, *Geotrupes stercorarius* (dor beetle). 15, *Panagaeus crux-major*. 16, *Carabus nemoralis*. 17, *Clytus arcuatus*. 18, *Endomychus coccineus*. 19, *Dytiscus marginalis*. 20, *Silpha sinuata*. 21, *Necrophorus mortuorum*. 22, *Saperda carcharias*.

BELGIUM. The kitchen of the Maison du Roi, now the city museum, in the Grande Place, Brussels. It is built on the site of the house in which Egmont and Horn (qq.v.) spent their last night before execution.

Courtesy of Belgian National Tourist Office.

raised in the dry sandy places. On the good pasture-land of the Ardennes region cattle are reared. There are extensive deposits of coal, Mons, Charleroi, and Liège being the principal mining towns; Seraing, Verviers, and Namur are industrial centres making chemicals, glass, zinc, machinery, and metal goods. B. has a large textile industry, which developed from the old Flanders textile trade. Ghent, Tournai, Kortrijk, and Verviers are the main centres. Brussels is the cap., Antwerp by far the most important port. On the North Sea are several small ports, e.g. Ostend and Zeebrugge, and holiday resorts, e.g. Blankenberge and Knokke.

ADMINISTRATION. B. is a kingdom with a Senate and Chamber of Representatives, elected on a basis of proportional representation by universal suffrage (women received the vote in 1948).

History. Julius Caesar conquered the lands occupied by the Celtic Belgae, and they were incorporated in the Roman Empire in 15 B.C. The Franks overran the area from the 3rd cent. onwards. The peace and order estab. by Charlemagne fostered the growth of such towns as Ghent, Bruges, and Brussels; following the division of his empire in 843 the area was incl. in Lotharingia. By the 11th cent. 7 feudal states had emerged: the counties of Flanders, Hainault, and Namur, the duchies of Brabant, Limburg, and Luxemburg, and the bishopric of Liège, all nominally subject to the French kings or the German emperor, but in practice independent. From the 12th cent. a flourishing economic life developed; Bruges, Ghent and Ypres became centres of the cloth industry, while the artisans of Dinant and Liège exploited the copper and tin of the Meuse valley. During the 15th cent. the states came one by one under the rule of the dukes of Burgundy, and in 1477, by the marriage

of Mary, heiress of Charles the Bold, duke of Burgundy, to Maximilian, Archduke of Austria, passed into the Habsburg dominions.

Other dynastic marriages brought all the Low Countries under Spain, and in the 16th cent. the religious and secular tyranny of Philip II led to general revolt in the Netherlands; the independence of the N. as the Dutch Republic was recognized in 1648; the S., reconquered by Spain, remained Spanish until the Treaty of Utrecht, 1713, transferred it to Austria. The Austrian Netherlands was in 1797 annexed by revolutionary France and incorporated in France. The Congress of Vienna reunited the N. and S. Netherlands as one kingdom under William, Prince of Orange-Nassau; but historical differences, and the fact that the language of the wealthy and influential in the S. was (as it remains) French, made the union uneasy. A rising in 1830 of the French-speaking part of the people in the S., and continuing disturbances, led in 1839 to the recognition by the Great Powers of the S. Netherlands as the independent and permanently neutral kingdom of Belgium, with Leopold of Saxe-Coburg (widower of Charlotte, dau. of George IV) as king, and a parliamentary constitution. Leopold II (reigned 1865–1909) acquired the Congo, annexed to B. as a colony in 1908, given independence in 1960.

Although Prussia had been a party to the treaty of 1839 recognizing Belgium's permanent neutrality (Bethmann Hollweg's 'scrap of paper'), Germany invaded Belgium in 1914 and occupied a large part of it until 1918. Again in 1940 B. was overrun by the Germans, to whom Leopold III surrendered. But his govt. escaped to London, and inside B. there was a strong resistance movement. After B.'s liberation by the Allies, 1944–5, the king's surrender gave rise to acute controversy, ended only by his abdication in 1951 in favour of his son Baudouin (q.v.). Subsequent important issues have been the independence of the Belgian Congo (see CONGO), and the flaring of Flemish and Walloon nationalism, the govt. falling on the linguistic issue as affecting Louvain Univ. (q.v.) in 1968.

THE ARTS. The declaration following the revolution of 1830–9, that French was the only official language (it remained so until 1898), actually stimulated interest in the Flemish language (in its written form, the same as Dutch). J. F. Willems (1793–1846) brought out a magazine which revived medieval Flemish works; H. Conscience (1812–83) and J. T. van Ryswyck (1811–49) pub. novels in Flemish; K. L. Ledeganck (1805–47), Prudens van Duyse (1804–59), Jan de Beers (1821–88) wrote poetry. Later writers were Albrecht Rodenbach (1856–80), Pol de Mont (1857–1931), Cyriel Buysse (1859–1932). Writers in French

BELGIUM. Contrasting with the ornate medieval beauty of the older Brussels is the simple modernity of Le Mont des Arts, with the Congress Hall in the centre of the picture.

BELLOC, Joseph Hilaire Pierre (1870-1953). Author, the son of a French barrister and an English mother, he became a naturalized British citizen in 1902. In 1911 he founded the *Eye-Witness* in collaboration with C. Chesterton, with whom he also wrote a political work entitled *The Party System*. With G. K. Chesterton he advocated a return to the Distributist theories of the late Middle Ages, in place of modern capitalism or socialism. His literary versatility is shown by his non-sense verse, by his historical studies, incl. *Danton, Robespierre, James II, and a History of England*, by satires such as *Mr. Clutterbuck's Election*, and by *The Path to Rome*, a walker's classic.

CHESTERTON, BELLOC and BARING
H. J. Gunn. Photo: N.P.G.

BELLOT (belō'), Joseph René (1826-53). French Arctic explorer, who discovered Bellot Strait, and lost his life while searching for Franklin.

BELLOW, Saul (1915-). American novelist. Building on the firm base of Jewish tradition, he is intensely concerned with moral issues, and, esp. in later books, gives full rein to rhetoric: *The Victim* (1947), *The Adventures of Augie March* (1953), and *Herzog* (1964); and the play *The Last Analysis* (1965).

BELL-RINGING. Change-ringing is a truly British art and was introduced by Fabian Steadman, a Cambridge printer, in the 17th cent. The method he perfected was named after him and is rung at the present day. Change-ringers are organized into Diocesan and County Guilds, the oldest being the 'Ancient Soc. of College Youths' (estab. 1637), responsible for ringing at St. Paul's Cathedral, Westminster Abbey, and Southwark Cathedral. On the Continent and in America, the most common form of B.R. is by the Carillon, which comprises a set of 12-70 stationary Bs., operated by a clavier. The keys are wooden levers, operated by hands and feet, and are connected by wires to the clappers of the Bs.

BELL ROCK. Another name for INCHCAPE ROCK.

BELLS. Nautical term applied to half-hours of watch. A day is divided into 7 watches, 5 of 4 hours each and 2 of 2 hours. Each half-hour of each watch is indicated by the striking of a bell, 'eight bells' being the end of the watch.

BELSEN. See CONCENTRATION CAMPS.

BELTANE (bel'ten). Celtic name for the 1st day of May, formerly one of the Scottish quarter days. The ancient feasts held on this day were marked by the kindling of B. fires on the hillsides.

BELY, Andrey. Pseudonym of the Russian Symbolist writer Boris Nikolaevich Bugaev (1880-1934). He travelled widely, dabbled in anthroposophy (see Steiner, Rudolf), and sympathized with the ideals of the Revolution. His works incl. vols. of verse, original in content and form: *The Silver Dove* (1910) and *Petersburg* (1912), novels; and vols. of brilliant memoirs incl. *On the Border of Two Centuries* (1929) and *Between Two Revolutions* (1933).

BENARES. Another transliteration of VARANASI. **BENAVENTE Y MARTINEZ** (mahrit'e'neth), Jacinto (1866-1954). Spanish playwright, founder of a modernist drama of ideas. Of some 50 plays, the best-known is *Los intereses creados* (The Bonds of Interest: 1907). He was awarded a Nobel prize in 1922.

BEN BELLA, Mohamed (1916-). Algerian leader. B. at Marnia, Algeria, he served in the French Army, but was increasingly convinced of the necessity of Algerian independence, and helped to found the Organisation Spéciale. Imprisoned in 1950, he escaped in 1952 to Cairo to found the National Liberation Front (F.L.N.). He was re-arrested in 1956, but became P.M. of independent Algeria from 1962 until overthrown by Col. Boumedienne in 1965.

BENBOW (ben'bō), John (1653-1702). English admiral. He ran away to sea as a boy, and from 1689 served in the Royal Navy. He fought at Beachy Head (1690), La Hogue (1692), and d. of wounds received in a great fight with the French off Jamaica.

BENCHLEY, Robert (1889-1945). American humorist. B. at Worcester, Mass., he went to N.Y. in 1916 as a journalist and was drama editor to the *New Yorker* 1929-40. His books incl. *Of All Things* (1921) and *Benchley Beside Himself* (1943) and his film skit *How to Sleep* illustrates his superb ability to extract humour from daily living.

BENDA, Julien (1867-1956). French writer. B. in Paris, of Jewish stock, he ed. the *Cahiers de la Quinzaine* 1910-4, attacked Bergson's philosophy, and in 1927 pub. a manifesto on the necessity of devotion to the absolute truth which he felt his contemporaries had betrayed *La Trahison des clercs* (The Treason of the Intellectuals, 1927). His last book *La Grande Epreuve des démocraties* (1942) was smuggled to N.Y. from Nazi-occupied Paris.

BENDIGO. Name under which the British pugilist Wm. Thompson (1811-89) was known. He won his first prize fight in 1832 and fought his last in 1850. Subsequently he was a popular figure and preacher, and B. in Australia is said to be named after him.

BENDIGO. Gold-mining city and county in Victoria, Australia, on the flank of the Australian Great Divide, about 75 m. N.N.W. of Melbourne. In 1851 alluvial gold was discovered here, and a 'rush' followed. Pop. (1961) 40,309.

BENDS. Caisson disease. Paralytic affliction of divers, arising from too rapid release of nitrogen after solution in the blood under pressure. Immediate treatment is compression and slow decompression in a special chamber.

BENEDICT, Ruth (1887-1948). American anthropologist. B. in N.Y., she taught at Columbia Univ. from 1922, and was a pioneer in the integration of human personality and cultural forms (*Patterns of Culture*, 1934), and the application of anthropological methods to contemporary cultures.

BENEDICT, St. (c. A.D. 480-c. 544). Founder of Christian monasticism in the West, and of the order of the Benedictine monks. B. of wealthy parents at Nursia, he was sent to be ed. in Rome, but fled from that city and spent 3 years in ascetic solitude. He founded 12 monasteries near Subiaco, and later migrated to Cassino, and founded the monastery of Monte Cassino. Here he wrote out his rule for monastic life, and was visited shortly before his death by the Ostrogothic king Totila, whom he won to the Christian faith. In 1964 he was proclaimed patron saint of Europe.

BENEDICT XV (1854-1922). Pope from 1914. During the F.W.W. he endeavoured to remain neutral, and his papacy is noted for the renewal of British official relations with the Vatican, suspended since the 17th cent.

BENEDICTINES. Religious order of monks and nuns in the R.C. Church, founded by St. Benedict at Subiaco, in Italy, in the 6th cent. St. Augustine brought the order to England. At the beginning of the

B., the principle of which was discovered by Torricelli in 1643. This is made by filling with mercury a clean dry glass tube about 36 in. long, closed at one end, and inverting it with the open end dipping into a vessel of mercury. The level of the mercury in the tube falls until it is about 30 in. or 76 cm. above the surface of the mercury in the open vessel, leaving a vacuum at the top of the tube. The pressure of the atmosphere on the mercury in the open vessel is thus balanced by the weight of the mercury column in the tube, the height of which is, therefore, a measure of the atmospheric pressure.

A more compact form is the *aneroid B.*, in which variations in the atmospheric pressure cause changes in the distance between the sides of a shallow cylindrical metal box which is partly exhausted of air. These small movements are magnified by a series of levers, so as to cause the rotation of a pointer pivoted at the centre of a circular calibrated scale.

A rise of 1,000 ft. in altitude measured from sea-level corresponds approximately to a change in pressure of 1 in. of mercury, but the relation between height and pressure depends very largely on atmospheric temperature.

BA'RON. Lowest rank in the peerage (q.v.) of the U.K., above a baronet and below a viscount. The 1st English barony was created in 1387, but Bs. by 'writ existed earlier.

BARONET. Hereditary title signifying a rank below that of a baron and above a knight. It was instituted by James I as a means of raising money.

BARONS' WAR. In English history, the civil war between the barons led by Simon de Montfort and Henry III. The former won the battle of Lewes in 1264, but at Evesham in 1265 the position was reversed, Montfort being slain.

BARO'QUE. Term used to denote a style of architecture, characterized by bizarre or fantastic ornamentation which prevailed on the Continent during the 17th and 18th cents. The term perhaps derives from the Span. *barrueco*, meaning an irregular-shaped pearl. The most famous exponents of B. were Giovanni Bernini and Francesco Borromini.

BARO'TSELAND. A north-west prov. of the Rep. of Zambia. Once a native kingdom, B. came under British protection at the request of Lewanika (c. 1860-1922), its ruler or litunga, in 1890 and on the establishment of Zambia in 1964 the reigning litunga (Sir Mwanawina Lewanika III) and his council were to remain the principal local authority in B. The admin. centre is Mongu; the litunga's cap. is Lealui. The Barotse are of fine physique; cattle are the chief form of wealth. Area 44,920 sq. m.; pop. (1965) 390,600.

BARRA. Most southerly of the larger Outer Hebrides is., in Inverness-shire, Scotland, separated from S. Uist by the Sound of B. The is., about 8 m. by 4 m., is barren; Castlebay harbour is a base for the herring fleet. Area 35 sq. m.; pop. (1961) 1,467.

BARRACUDA (barakoo'dah), *Barracouta*. Large carnivorous pike-like fish (*Sphyrna barracuda*) of the family Sphyrnidae, found in the warmer seas of the world. It is esteemed for food, and its skin is used for polishing wood.

BARRANQUILLA (bahrahnhkē'l'yah). Chief port, airport and city of Colombia, S. America, near the mouth of the Magdalena. Pop. (1964) 498,301.

BARRAS (bahrrahs'), Paul François Jean Nicolas, Count (1755-1829). French revolutionist. B. in Provence, he fought against the English in India, was elected to the National Convention in 1792, and helped to overthrow Robespierre (1794). In 1795 he became a member of the *Directoire*. In 1796 he brought about the marriage of his former mistress, Joséphine de Beauharnais with Napoleon, and assumed dictatorial powers. After Napoleon's *coup d'état* of 19 Nov. 1799, B. fell into disgrace.

BARRAULT (bahroh'), Jean Louis (1910-). French actor-director. He was producer-director to the Comédie-Française 1940-6, and was director of the Théâtre de France (formerly Odeon) from 1959 until dismissed 1968 because of statements made during the occupation of the theatre by student rebels. His films incl.: *La Symphonie fantastique*, *Les Enfants du Paradis* (1944) and *La Ronde* (1950).

BARREL ORGAN. Portable musical instrument consisting of a cylinder containing an arrangement of pins and staples which, on the handle being turned, raise keys which open pipe valves, thus admitting air from the wind chest.

BARRES (bahres'), Maurice (1862-1923). French novelist and political writer. From 1905 he was the spokesman of Alsace-Lorraine, then under the German yoke. His most enduring work is *Le Romain de l'énergie nationale*.

BARRIE, Sir James Matthew (1860-1937). Scottish novelist and playwright. B. in Kirriemuir, Angus, he entered journalism in Nottingham in 1883, and settled in London in 1885. He became known by his studies of Scottish rural life in *Auld Licht Idylls* (1888), and *A Window in Thrums* (1889) which began the vogue of the Kailyard school. His 1st novel, *The Little Minister*, was dramatized in 1897 and, together with *The Professor's Love Story* (1894),

SIR JAMES BARRIE
Photo: George Outram & Co.

estab. his reputation as a playwright. The most important of his later plays are: *Quality Street* (1901), *The Admirable Crichton* (1902), *What Every Woman Knows* (1908), *Dear Brutus* (1917), and *Mary Rose* (1920). The perennial children's play, *Peter Pan* (1904), was drawn from an idea in the *Little White Bird* (1902), and followed by *Peter Pan in Kensington Gardens* (1906) and *Peter and Wendy* (1911). Other works incl. a biography of his mother, *Margaret Ogilvie* (1896), the novels *Sentimental Tommy* (1896) and *Tommy and Grizel* (1900), and his address on 'Courage' (1922), delivered on his installation as Lord Rector of St. Andrews. He was made a bart. in 1913 and received the O.M. in 1922. In our illus. he holds his godson, the Hon. Angus Ogilvy (q.v.).

BARRISTER. A person entitled to plead for others at the bar of a court of law. The bar is a division, indicated by a rail, separating the judges and officers of the court from the Bs. and public. Bs. remain outside the bar until they become Queen's Counsel, when they are called 'within the bar'.

In order to become a B. a man or woman must become a student at one of the Inns of Court, pass certain examinations, and 'keep terms', usually 12 in number, after which he or she may be called to the bar on the payment of certain fees. The Benchers of the Inn exercise disciplinary control over the members of the Inn, and can disbar any member, with an appeal to the judges.

In the higher courts only a B. can be heard on behalf of a litigant. With a few exceptions a B. cannot act for a client unless he is instructed by a solicitor.

BARROW. Isaac (1630-77). English mathematician and churchman. Appointed first Lucasian prof. of mathematics at Cambridge in 1664, he resigned in favour of his pupil, Isaac Newton in 1669.

BARROW. A burial mound, usually composed of earth, but sometimes of stones, examples of which are found in many parts of the world. There are 2 main types, long and round.

The *long barrow* is held to be the earlier, dating from the New Stone Age. Sometimes it may be a

suffered when flying to relieve Irish and German airmen stranded on Greenly island.

BENNETT, Henry Gordon (1887–1962). Australian general. He was G.O.C. of the Australian forces in Malaya, 1941–2. He escaped from Singapore (for which he was criticized at the time, but an official enquiry in 1945 exonerated him), commanded the 3rd Australian Corps, and pub. *Why Singapore Fell* (1945).

BENNETT, James Gordon (1841–1918). American journalist, who succeeded his father as manager of the *New York Herald* and was responsible for sending Stanley in search of Livingstone (1870).

BENNETT, Richard Bedford, 1st viscount (1870–1947). Canadian statesman. In 1905 he was leader of the Conservatives in the 1st legislative assembly of Alberta; and in 1911 entered the Canadian parl. as Cons. M.P. for Calgary. He was Min. of National Service in 1917 and Attorney-Gen. in 1921. In 1927 he became leader of the Cons. party, and was P.M. 1930–5. An ardent supporter of imperial preference, he was chairman of the Imperial Economic Conf. at Ottawa, 1932. Defeated at the general election of 1935, he retired from parl. in 1938, and lived in England. He was created a viscount in 1941.

BENNETT, Sir William Sterndale (1816–75). British composer. His original gifts were stifled as prof. of music at Cambridge from 1856 and principal of the R.A.M. from 1866. His works incl. *The Wood Nymphs* and *The Woman of Samaria*; he was knighted in 1871.

BEN NEVIS (nev'is). Highest mountain (4,406 ft.) in the British Isles, in the Grampians, Inverness.

BENOÎT (benwah'), Pierre (1886–1962). French novelist. His fondness for exotic travel is reflected in his prolific output which incl. *L'Atlantide* (1919) and *Les Plaisirs du voyage*; *Axelle* (1928) is a remarkable story of a French prisoner-of-war in Germany.

BENSON, Edward White (1829–96). British churchman, 1st headmaster of Wellington Coll. 1859–68, and, as Archbishop of Canterbury from 1883, responsible for the 'Lincoln Judgment' on questions of ritual in 1887. His eldest son Arthur Christopher B. (1862–1925) Master of Magdalen Coll. from 1915, collaborated with Lord Esher in editing Queen Victoria's correspondence.

BENSON, Sir Frank (1858–1939). British actor-manager whose repertory company, founded 1884, schooled many leading actors and actresses. He was responsible for the Stratford-on-Avon Shakespeare festivals for many years, and was knighted in 1916 by George V, following his performance in Julius Caesar.

BENTHAM, Jeremy (1748–1832). British philosopher and legal reformer. He rose to fame by the publi-

cation in 1776 of his *Fragments on Government*. He declared that the 'utility' of any law is to be measured by the extent to which it promotes the pleasure, good, and happiness of the people concerned, and the essence of his 'Utilitarian' philosophy is found in the pronouncement in his *Principles of Morals and Legislation* (1789), that the object of all legislation should be 'the greatest happiness of the greatest number'. He made suggestions for the reform of the poor law (1798), which formed the basis of the reforms enacted in 1834, and in his *Catechism of Parliamentary Reform* (1817) he proposed annual elections, the secret ballot, and universal manhood suffrage. He was also a pioneer of prison reform. In economics B. was an apostle of *laissez-faire*, and in his *Defence of Usury* (1787) and *Manual of Political Economy* (1798) he contended that his principle of 'utility' was best served by allowing every man to pursue his own interests unhindered by restrictive legislation. He was made a citizen of the French Republic in 1792.

BENTINCK, Lord George (1802–48). British Cons. politician. From 1846 he was the leader of the Protectionists after Peel, the Cons. leader, had repealed the corn laws. He was a great friend of Disraeli, and was well known on the Turf.

BENTINCK, Lord William Cavendish (1774–1839). Son of the 3rd duke of Portland, in 1827 he became Gov.-Gen. of Bengal and in 1833 the 1st Gov.-Gen. of India.

BENTLEY, Edmund Clerihew (1875–1956). British author of the classic detective story *Trent's Last Case* (1912) and inventor of the 4-line doggerel verse known as the 'clerihew', as used in *Baseless Biography* (1939).

BENTLEY, John Francis (1839–1902). British architect of the R.C. cathedral at Westminster.

BENTLEY, Phyllis (1894–). British novelist. B. in Halifax, she has written novels with a Yorkshire industrial background incl. *Inheritance* (1932), and is an expert on the Brontës, e.g. *The Young Brontës* (1960).

BENTLEY, Richard (1662–1742). British classical scholar, famous for his pioneer work in textual criticism and for his controversy (1697–9) with Charles Boyle, in which he demonstrated the spuriousness of the *Letters of Phalaris*, a collection of 148 letters supposed to have been written by the Sicilian tyrant of that name in the 6th cent. B.C. From 1700 he was master of Trinity Coll., Cambridge.

BENZ (bents), Karl (1844–1929). German automobile engineer. B. in Karlsruhe, in 1878 he built his first model engine, and in 1885 produced his first motor-car, one of the first cars to be driven by an internal combustion engine.

BENZALDEHYDE (C₆H₅CHO), or oil of bitter almonds. A clear colourless liquid with the characteristic odour of almonds. It occurs free in certain leaves, such as the cherry, laurel and peach, and in a combined form in certain nuts and kernels. It can be extracted from such natural sources, but the product of commerce is nearly always synthetic, being made from toluene.

BENZENE (C₆H₆). A clear liquid hydrocarbon of characteristic odour, occurring in coal tar. Although useful as a motor fuel, it is more important as a solvent and a starting substance for the synthesis of many important chemicals.

BENZINE. A distillate of petroleum, used in dry-cleaning and in plastics.

BENZOTIC ACID (C₆H₅COOH). A white crystalline solid, sparingly soluble in water, and used as a permitted food preservative for certain articles. It is obtained chemically by the direct oxidation of benzaldehyde and occurs in certain natural resins, some essential oils, and in the compound state as hippuric acid.

BENZÖIN, or Gum Benjamin. A resin obtained by making incisions in the bark of *Styrax benzoin*, a

BEN NEVIS. Seen from across Loch Eil the heights of Ben Nevis have a sombre beauty. Photo: George Outram & Co. Ltd.

BASEBALL. The 'diamond'

each of 9 players. The field of play is marked with the form of a diamond 90 ft. square. One corner — marked with a five-sided whitened rubber slab — is called home base, the other three corners — 1st, 2nd, 3rd bases — are marked by white canvas bags 15 in. square which must be securely attached to the ground. Continuations of the lines of the diamond are marked from 1st and 3rd bases, and are known as 'foul lines'.

The side taking first innings bat in regular succession. The opposing side taking the field are: the pitcher, near the centre of the diamond; the catcher, behind the home base; 1st baseman, near the 1st base, which is to the right of the catcher; 2nd and 3rd basemen, near the 2nd and 3rd bases; short stop (infielder) about midway between 2nd and 3rd basemen; and outfielders at right, centre and left.

The pitcher may deliver the ball either under or over arm. The batsman tries to make a 'fair hit' which means that the ball must fall within the diamond or beyond, but within the 'foul lines'. If his strike is successful the batter tries to make a 'run' which is a complete circuit of the diamond from home base to 1st, 2nd, 3rd bases in regular order and back to home base. This may be in one dash called a 'home run' or by stopping in the circuit at any other base as a safety point.

He is declared out if, (1) he fails to hit the ball after 3 attempts, (2) he strikes the ball in the air and it is caught by a fielder, (3) he is touched by the ball in the hand of one of his opponents while he is between bases, and (4) a fielder standing on one of the bases catches the ball before he reaches the base. A batter may only run for 'fair hits', but he may be put out on a 'foul hit' if the ball is caught before it reaches the ground. The main duty of the infielders is to put out the batsman by touching him with the ball held in the hand, while he is running between the bases, or reaching a base with the ball before the batsman can get there; either method puts the batsman out. The out-fielders' duty is to catch or stop long hits and return them to 'basemen'.

The 1st batter is followed by the other members of his team in rotation until 3 members of the batting side are put out: the opposing team then take their turn. This continues until 9 equal innings have been

played and the team scoring the most runs wins the game. The game may be controlled by one umpire, but 2 are more usual for important matches.

The ball is formed by yarn wound on a core of cork or rubber and covered with two strips of white horsehide. The weight is between 5 and 5½ oz. and the circumference 9 to 9½ in. The bat is round, not more than 2½ in. in diameter at its thickest part and not more than 42 in. long.

B. was first played in 1839 at Cooperstown, N.Y., the field being laid out by Abner Doubleday, who organized the game. The 100th anniversary of the game was celebrated at Cooperstown in 1939 with the dedication of the Hall of Fame and National Museum of B. The Select Five, the players whose performances were thought to have stamped them as the greatest players of all, were: Ty Cobb (1886–1961), Babe Ruth (q.v.), Christy Mathewson, Honus Wagner, and Walter Johnson, chosen in that order. The Knickerbocker Club, the 1st to be founded, was formed in New York by Alexander J. Cartwright in 1845. The National Association of Baseball Players was formed in 1858 and the 1st professional team was Cincinnati's Red Stockings (1869).

The 1st serious effort to introduce B. to Britain was made in 1917, when a demonstration match was played at Lord's cricket ground. In 1924, England played France at Stamford Bridge. B. Leagues were formed in London and the chief provincial cities, and by 1939 there were 360 teams. During the S.W.W. the presence of great numbers of American soldiers in U.K. led to a considerable increase in the game's popularity.

BASEL. German form of BASLE.

BA'SHKIR. A.S.S.R. of the R.S.F.S.R., on the W. slopes of the S. Ural Mts. Grains and sunflower seeds are grown; metals worked include iron, copper, gold; petroleum is raised; and the forests in the N.E. produce timber. Ufa is the cap. Area 55,400 sq. m.; pop. (1967) 3,757,000.

BASHKIRTSEFF (bahshkër'tsev), Maria Constantinova (1860–84). Russian artist and diarist. After studying singing, she turned to painting while at Paris in 1877, and 3 years later began to exhibit at the Salon. She is chiefly known as a writer of letters and of a diary.

BASIC ENGLISH. Named from the initial letters of British-American-Scientific-International-Commercial, it is a simplified form of English, devised as an international auxiliary language. With a vocabulary of 850 words, including only 18 verbs, it expresses more advanced meanings by a combination of these with the 600 nouns or 20 prepositions and adverbs, e.g. 'buy' becomes 'give money for'.

The originator was C. K. Ogden, who began his researches in 1926, and was joined by I. A. Richards. In 1947 the British govt. purchased the copyright and the B.E. Foundation was estab. to promote its use.

BA'SIL (c. A.D. 330–379). Christian saint, founder of the Basilian monks, and known as THE GREAT. B. at Caesarea, Asia Minor, he studied at Constantinople and Athens, visited the hermit saints of the Egyptian desert, entered a monastery in Asia Minor about 358, and developed a monastic rule based on community life, work, and prayer. These ideas form the basis of monasticism in the Greek Orthodox church, and influenced the foundation of similar monasteries by St. Benedict. Elected Bishop of Caesarea in 370, B. opposed the heresy of Arianism. He wrote many theological works and composed the 'Liturgy of St. Basil', in use in the Orthodox church.

BASIL. A plant (*Ocimum basilicum*) of the family Labiatae. A native of India, it is cultivated in Europe as a potherb and for seasoning.

BASILDON. Town in Essex, England, developed from 1949 under the New Towns Act, 1946, as a residential and industrial centre round the ancient

imperceptibly into the next. His books incl. *Time and Free Will* (1889), *Matter and Memory* (1896), and *Creative Evolution* (1907). In the last-named he expressed his dissatisfaction with the materialist account of evolution popularized by such thinkers as Herbert Spencer, and attempted to prove that all evolution and progress are due to the working of the *élan vital* or life-force.

BERIA, Lavrenti (1899–1953). Soviet politician. B. in Georgia, of peasant parentage, he became head of the Soviet police force and Minister of the Interior. On Stalin's death he, with Malenkov and Molotov, formed a virtual triumvirate, but later he was shot after a secret trial.

BERI-BERI. Endemic polyneuritis, an inflammation of the nerve endings, mostly occurring in the tropics and resulting from deficiency of Vitamin B.

BERIOZŌVA, Svetlana (1932–). British ballerina. B. in Lithuania, she was brought up partly in the U.S. and has danced with the Royal Ballet since 1952. Her style has a lyrical dignity and she excels in *The Lady and the Fool*, *Ondine*, and *Giselle*.

BERKELEY (bark'li), George (1685–1753). Irish bishop and idealist philosopher. He pub. several of his main philosophical works between 1707, when he became a fellow of Trinity Coll., Dublin, and 1712, when he left Dublin for England. In 1713 he was presented at Court by his friend, Swift, and from 1713 till 1720 he travelled on the Continent. In 1721 he returned to Ireland, became successively dean of Dromore and dean of Derry, and in 1723 inherited a considerable property from Miss Vanhomrigh (Swift's 'Vanessa'). His project to found a college in Bermuda did not materialize, and after spending some years at Rhode Is. he returned to England in 1731. In 1734 he became bishop of Cloyne, where he stayed until his retirement in 1752.

It was as a philosopher and as a critic of the empiricism of Locke that B. became famous. He was unable to accept Locke's theory that our ideas are representations of real objects, and he propounded as an alternative his famous theory of 'Subjective Idealism', according to which all objects exist simply in the mind of the beholder, and 'to be' means simply 'to be perceived'. This theory is contained in his *New Theory of Vision* (1709), *Principles of Human Knowledge* (1710), and *Hylas and Philonous* (1713).

BERKELEY (berk'li). On San Francisco Bay in California, U.S.A. it is the seat of the Univ. of California, famous particularly for its atom research. See

BERKELIUM in table of transuranium elements. Pop. (1960) 111,268.

BERKELEY, Lennox (1903–). British composer. He studied with Nadia Boulanger in Paris 1927–33, and excels in composition for the human voice. His works incl. *Three Poems of St. Teresa* for contralto and strings, operas (*Nelson* and *Ruth*), and 2 symphonies.

BERKHAMSTED (burk'amsted). English town (U.D.) in Herts, 28 m. N.W. of London. It has remains of an 11th cent. castle, and a Tudor grammar school. Pop. (1961) 13,048.

BERKSHIRE (bark-). English co. lying S. of the Thames between Wilts and Surrey. Its northern boundary follows the Thames for about 100 m. B. is composed partly of lowland but from W. to E. run the B. downs, and in the extreme S. is Inkpen Beacon, 954 ft., one of the highest points of the chalk downs of England. In the N. the river Ock, a tributary of the Thames, flows through the Vale of the White Horse

BERLIN. The Congress Hall in West Berlin was a gift of the U.S. government in 1957. Originally built for the Interbau Exhibition in which architects of some 100 nations took part, it is the scene of many International conventions.

Courtesy of the German Tourist Information Bureau.

with its figure of a horse, 374 ft. long, cut from the chalk of the hillside. British and Roman remains are numerous. The co. is agricultural. The famous B. pigs are reared particularly near Faringdon. Windsor Forest in the E. and the pine woods of Bagshot Heath in the S.E. cover a considerable area. Reading, the co. town, is the only large industrial centre; smaller towns incl. Abingdon, Maidenhead, and Windsor on the Thames; and Newbury on the Kennet. Area 725 sq. m.; pop. (1967) 598,220.

BERLE (bur'l), Adolf Augustus (1895–). American lawyer and diplomat. In 1927 he became prof. of law at Columbia Univ., and under Roosevelt was Sec. of State (1938–44). He was chairman of Kennedy's Task Force in Latin America in 1961 and in the same year became consultant to the Sec. of State.

BERLIN, Irving (1888–). Pseudonym of Israel Baline, American composer. B. in Russia, he settled in the U.S. in 1893. His international song hits incl. *Alexander's Ragtime Band*, *Always*, *What'll I do?*, *Everybody's Doing It*. Among his stage musicals are *Annie Get Your Gun* and *Call Me Madam*.

BERLIN. City of Germany, on the Spree, cap. of united Germany from 1871 to 1945. First mentioned c. 1230, the city grew out of a fishing village, joined the Hanseatic League in the 15th cent., became the permanent seat of the Hohenzollerns, and was cap. of the Brandenburg electorate 1486–1701, of the kingdom of Prussia 1701–1871. From the middle of the 18th cent. it grew rapidly, developing into an important commercial and cultural centre.

BERLIN. Symbol of a divided Germany, the Berlin Wall dates from the sealing off of the border between East and West Berlin on 13th August, 1961. The pavement only of the Bethanien-Damm in the Kreuzberg district is still open to West Berliners; on the right is the wall of Bethany Hospital and in the background – also on the Western side – is St. Thomas's Church. Courtesy of the German Embassy.

BASSETERRE. Cap. and port of St. Kitts in the Leeward Is. Pop. (1960) 15,897.

BASTIA (bahsté'ah). Largest town, and commercial centre of Corsica, France. Pop. (1962) 50,881.

BASTILLE (bastéi'). Name given to the castle of St. Antoine, part of the fortifications of Paris, which was used for centuries as a State prison; it was singled out for the initial attack by the revolutionary mob, which set in train the French Revolution, on 14 July 1789. Only 7 prisoners were found in the B. when it was stormed; the governor and most of the garrison were killed; the B. was razed to the ground.

BASUTOLAND (bahsoo'toland). See **LESOTHO**.

BAT (Chiroptera). An order of mammals distinguished by having the fore-limbs converted into wings capable of sustained and rapid flight. These wings consist of a thin hairless membrane stretched between the limbs and the body and between 4 of the fingers of the hand, which are greatly lengthened for that purpose, and cleft to the wrist. The thumb is free and is furnished with a sharp claw to help in climbing. The hind feet have 5 toes provided with sharp hooked claws, which suspend the animal head downwards when resting.

LONG-EARED BAT

Bats are nocturnal, and those native to temperate countries hibernate in winter. They form the most widely distributed order of mammals, their power of flight taking them all over the world where there are trees, and to oceanic islands which other mammals cannot reach. Bs., like whales and dolphins, use a type of echo-location system.

There are 2 main groups: the large fruit-eaters (*Megachiroptera*), also called Flying Foxes, of Africa, S. Asia and Australia, and the smaller insect-eaters (*Microchiroptera*), of which there are some 600 species, found in all temperate and tropical regions.

BATAAN. Peninsula on Luzon, Philippine Rep., W. of Manila Bay, which was gallantly but in vain defended against the Japanese by American and Filipino troops from 1 Jan. to 9 April 1942.

BATAVIA. Dutch name for **DJAKARTA**.

BATES. Mrs. Daisy (1861–1951). Friend of the aborigines of Australia. B. Daisy O'Dwyer-Hunt at Tipperary, Ireland, she visited Australia in 1884, and from 1899 spent her life amongst the Aborigines. She wrote *Passing of the Aborigines* (1939), and compiled a native dictionary.

BATES. Herbert Ernest (1905–). British author. After brief experience in provincial journalism and as a clerk, he pub. his 1st novel *The Two Sisters* in 1925; numerous successors incl. *The Purple Plain* (1947) and *The Darling Buds of May* (1958). He also excels in the short story and during the S.W.W. pub. under the pen-name 'Flying Officer X' several vols. dealing with the lives of R.A.F. personnel.

BATH. Largest town (city and co. bor.) in Somerset, England, on the right bank of the Avon, 10 m. S.E. of Bristol. A health resort, it claims the only natural hot springs (120° F.) in Britain, used both for bathing and drinking. The Romans built round the spa the city of Aquae Sulis; the ruins of the great temple and rectangular bathing pool are the finest Roman remains in Britain. During the Middle Ages it became an important walled city; the springs were Crown property, but were administered by the Church. Of medieval B. little remains but the Abbey, a fine perpendicular structure with fan tracery. Early in the 18th cent. B. was transformed by the organizing ability of Beau Nash, the business acumen of Ralph Allen, and the architectural genius of the two John

BATH. Built to the design of John Wood, junior, the Assembly Rooms were restored in 1963 under the guidance of Oliver Messel (q.v.) to their original form, before the many minor alterations made to the interior in the 19th and 20th centuries. One of the three main rooms is the ballroom seen above, lit by the magnificent original chandeliers salvaged from the ruins. Courtesy of the Bath City Council

Woods. Guests of high rank thronged the city. The Assembly Rooms (opened in 1771) were the finest suite of 18th cent. entertainment rooms in England until destroyed by German air attack in 1942; reconstructed, they were re-opened 1963. The Grand Pump Room was rebuilt in 1796. Pulteney Bridge is flanked by shops and houses. The Univ. of Bath was estab. 1965.

In B. today spa treatment is still of first importance. Engineering, corset-making, and cabinet making are industries. In nearby districts, oolitic building stones are quarried. In Victoria Park there is a botanic garden. Pop. (1961) 80,856.

BATH. Knights of the. British order of knighthood, believed to have been founded in the reign of Henry IV (1399–1413). It was formally instituted in 1815, and since 1847 it has incl. civilians. There are 3 grades: Knights of the Grand Cross (G.C.B.), Knights Commanders (K.C.B.), and Knights Companions (C.B.).

BATHURST (bath'urst). Cap. (created a city in 1965) of Gambia, W. Africa, on the is. of St. Mary, at the mouth of the Gambia, it has an airport. Pop. (1958) 31,000.

Another B. is a town of N.S.W., Australia, on the Macquarie. It is the centre of a mining region, and manufactures railway equipment, boots and shoes, soap, etc. Pop. (1959) 17,060.

BATHYSCAPHE and **BATHYSPHERE.** Types of diving apparatus used to investigate animal life and conditions at great depths in the ocean. For the bathyscaphe see **PICCARD**, and for the spherical bathysphere **BEEBE**, **CHARLES WILLIAM**.

BATIK. Javanese technique of applying coloured designs to fabric. The portions which it is desired to protect from the action of a given dye are covered with wax. This is practised throughout Indonesia, and was introduced into Europe by the Dutch.

BATLEY. Old town (bor.) in W. Riding, Yorks., England, 6 m. S.S.W. of Leeds. It is the centre of the heavy woollen and shoddy industries. Pop. (1961) 39,390.

BATTEN. Jean (1909–). N.Z. aviator. B. in New Zealand, she joined the London Aeroplane Club, and obtained her pilot's licence in 1930. She flew solo from England to Australia in 1934 and back in 1935 – the 1st woman to make the return journey, and estab. several world records.

BATTENBERG. Prince Louis Alexander (1854–1921). Admiral of the Fleet. Son of Prince Alexander

BERNAL, John Desmond (1901–). British scientist. Having studied and taught at Cambridge, he became prof. of physics (1938) crystallography (1963) at Birkbeck Coll., London. He has carried out research on the structure of both simple and complex substances and, starting with carbon, metals and water, has gone on to vitamins, hormones, proteins.

BERNE. Founded by Duke Berchtold in 1191 as a military stronghold, Berne is built on a narrow rocky peninsula 120 ft. above the river Aar. Not a single foot of ground is unused, and only a few narrow lanes break between the closely ranged houses. Courtesy of the Swiss National Tourist Office.

viruses, and, recently, studies of structure of liquids. His books incl. *The Social Function of Science* (1939), *The Freedom of Necessity* (1949), and *World Without War* (1958).

BERNANOS, Georges (1888–1948). French author. B. in Paris, he achieved fame in 1926 with *Sous Le Soleil de Satan* (The Star of Satan). His strongly Catholic viewpoint emerged equally in his *Journal d'un Curé de Campagne* (1936: The Diary of a Country Priest). After Munich he went into voluntary exile in Brazil, and in the S.W.W. strongly supported de Gaulle, writing his *Lettre aux Anglais* in support of the Allied cause in 1942.

BERNARD, Claude (1813–78). French physiologist. He made many valuable physiological discoveries particularly in connection with the liver, the blood, and the nervous system, and wrote a *Physiologie expérimentale* (1865), which is a standard work.

BERNARD, Tristan (1866–1948). French dramatist and novelist. His comedy, *Le fardeau de la liberté* (1897), was the 1st of a series of successful dramas, including light pieces such as *Le danseur inconnu* (1907), the larger satire of *Monsieur Codomat* (1907), and the brilliant *Triplepatte*.

His son, Jean-Jacques B. (1888–), showed in the cynical humour of his early plays the influence of his father. In 1921 he established his reputation with *Le feu reprend mal*, dealing with the return of a soldier from prison-camp; later plays include *L'âme en peine* (1926), and *Le jardinier d'Espagne* (1939). He has also pub. novels, essays, and *Le camp de la mort lente*, 1941–2.

BERNARD OF CLAIRVAUX (1090–1153). French saint and theologian. He entered the monastery of Cîteaux in 1113, and 2 years later founded and became first abbot of the monastery of Clairvaux, in Champagne. He did much to reinvigorate the Cistercian Order, and many new houses sprang up in France and beyond. In 1146 he preached the 2nd crusade, and induced Louis VII of France and Conrad III of Germany to take the cross. B.'s numerous Latin writings have been often printed and translated, and include letters, sermons, theological treatises, and hymns. He was canonized in 1174.

BERNARD OF MENTHON (923–1008). Christian saint. B. in Savoy, he became archdeacon of Aosta and founded in 962 the St. B. hospices on the passes of the Pennine Alps, which bear his name. The St. Bernard dogs kept by Augustinian monks in the hospice of the Great St. B. have saved many travellers from death from exposure or starvation.

BERNE (bärn). Cap. of the Swiss Confederation, and of B. canton, lying 43 m. S.S.W. of Basle, on the Aar. Its principal features include a minster (begun in 1421), the Town Hall (1406), the Univ. (founded 1834). It makes textiles, chocolate and other foods, and light metal goods; it is the seat of the Universal Postal Union.

The city was founded in 1191, and made a free imperial city by Frederick II in 1218. It joined the Swiss Confederation in 1353, soon taking the lead, and in the 16th cent. championed the Reformed religion. The seal of B. shows a bear; the bear-pit in the city has been one of its sights since the 16th cent. Pop. (1966) 166,000.

BERNERS, Gerald Hugh Tyrwhitt-Wilson, 14th baron B. (1883–1950). British composer. In addition to music for the opera *Le Carrosse du Saint-Sacrement*, ballets such as *The Triumph of Neptune* and *Cupid and Psyche*, he wrote books, incl. *A Distant Prospect*, and was also an artist.

BERNHARD (1911–). Prince of the Netherlands. Formerly Prince B. of Lippe-Biesterfeld, he m. Princess Juliana (q.v.) in 1937. When the Germans attacked Holland in 1940, B. led the defence of the royal palace at The Hague. He escaped to England in 1940, and next year became liaison officer for the Netherlands and British forces, playing a part in the organization of the Dutch underground. Interested in the arts and sciences, he also promoted the expansion of his country's trade which followed the S.W.W.

BERNHARDT, Sarah. Stage name of the French actress Rosine Bernard (1845–1923). B. in Paris of Jewish parentage, she studied at the Paris Conservatoire, made her début with the Comédie Française in 1862 and came to be recognized as the greatest actress of her day. Her great roles incl. the heroine of Racine's *Phèdre*, Dona Sol in Hugo's *Hernani*, Hamlet (1899) and the duc de Reichstadt in Rostand's *L'Aiglon* (1900). In 1882 she m. a member of her own company, Jacques Damala (or Daria), but they separated the next year. Although she lost her right leg as the result of an accident in 1915, B. continued to act. Her autobiography *Ma Double Vie* appeared in 1907.

BERNINI (bernē'nē), Giovanni Lorenzo (1598–1680). Italian architect, sculptor, and painter; one of the great masters of the baroque style. His most famous piece of sculpture is his 'Apollo and Daphne', while his architectural masterpiece is the colonnade surrounding the piazza outside St. Peter's in Rome.

BERNOULLI (bernoolyē'). Swiss family of mathematicians. Jacques B. (1654–1705) is remembered for his work relating to 'curves', and for his discovery of *Bernoullian numbers*, a complex series of fractions of considerable value in higher mathematics and the theory of numbers. Jean B. (1667–1748), his brother, discovered the exponential calculus. Jean's son, Daniel B. (1700–82), was professor of mathematics at St. Petersburg, and later held chairs at Basle. When only 24 he invented a clepsidra for recording time at sea, and he made discoveries relating to the inclination of the planets, the tides, etc.

BERNSTEIN, Henri (1876–1953). French dramatist. Earlier plays such as *The Secret* (1913) were marked by much violence, though the later, e.g. *The Promise* (1934), emphasize the psychological. On the fall of France he temporarily emigrated to the U.S.

BERNSTEIN, Leonard (1918–). American composer, conductor and pianist. B. at Lawrence, Mass., he was ed. at Harvard Univ. and the Curtis Inst. of Music. In 1958 he became Music Director of the

B. developed a system of theology from which the supernatural element had been completely expunged, and detected in the N.T. writings a long and bitter conflict between Petrinism (Jewish) and Paulinism (Gentile), in the early Christian Church. B. advanced his views in works which carried the fame of the 'Tübingen School' into every quarter.

BAUXITE (boks'it). The most widely known ore of aluminium, providing the major part of the world's supplies of that metal; it is named from the district of Les Baux, near Arles, in the S. of France, where it was first discovered. Bauxite ($\text{Al}_2\text{O}_3 \cdot 2\text{H}_2\text{O}$) contains aluminium oxide, generally contaminated with compounds of iron, which give it a red colour.

BAVARIA (Ger. Bayern). The largest of the *Länder* of W. Germany with its cap. at Munich. Area 27,230 sq. m.; pop (est. 1966) 10,216,800. The greater part of B. is in the Danube basin; it is predominantly an agricultural country, although there are many towns with important industries. The main uranium deposits of W. Germany are in the Fichtelgebirge in the N.E. About 70 per cent of the people are Roman Catholics. The original Bavarians were Teutonic invaders from Bohemia who occupied the country at the end of the 5th cent. A.D. They were later ruled by dukes who recognized the supremacy of the Emperor. The House of Wittelsbach ruled parts or all of B. from 1181 to 1918; Napoleon made the ruler a king in 1806. In 1871 B. became a state of the German Empire. The last king, Ludwig III (1845-1921), abdicated in 1918, and B. declared itself a rep.

BAX, Sir Arnold Edward Trevor (1883-1953). British composer. B. in London, he studied at the R.A.M., was knighted in 1937 and became Master of the King's Musick in 1943. Composed in almost every branch except opera, his works show a strong Celtic, especially Irish, influence, and were often based on Celtic legends. They incl. *The Garden of Fand* (a symphonic poem), *Tintagel* (an orchestral tone poem), and 'Coronation March', his last, played in Westminster Abbey for the Coronation of Queen Elizabeth II. His brother Clifford B. (1886-1962) was a writer and dramatist.

BAXTER, George (1804-67). British inventor in 1834 of a special process for printing in oil colours, which he applied successfully in book illustrations.

BAXTER, Richard (1615-91). English churchman. B. in Salop, he took orders in the C. of E. in 1638, became minister at Kidderminster, and during the Civil War he was a chaplain in the parliamentary army.

Ill-health caused his retirement to Rouse-Lench, Worcs, where he composed that Puritan classic *The Saints' Everlasting Rest* (1650). After the Restoration he lived in London and was a royal chaplain. In 1662 the Act of Uniformity drove him out of the Church. In 1685 he was tried before Judge Jeffreys for alleged sedition, and imprisoned for nearly 18 months.

BAY. Name applied to various species of laurel (*Laurus*) and some other plants. The victor's laurel of the ancients was the sweet bay (*L. nobilis*), a native of S. Europe. Its aromatic evergreen leaves are used in cookery, for flavouring.

BAYAR, Celâl (1884-). Turkish statesman. A follower of Atatürk, he was P.M. 1937-9, and in 1946 founded the Democratic Party. He succeeded İnönü as pres. in 1950 and was re-elected in 1958, but in 1960 was arrested following the military coup which overthrew the Menderes govt. and imprisoned on a charge of treason. In 1963 his release led to riots and he was re-imprisoned until 1964.

BAYARD (bā'ahrd), Pierre du Terrail (Chevalier) (1473-1524). French soldier. B. in Dauphiné, he served under Charles VIII, Louis XII, and Francis I, and was killed in action at the crossing of the Sesia in Italy. His heroic exploits in battle and in tournaments, his chivalry and magnanimity, won him the name of 'knight without fear and reproach'.

BAYERN. German form of BAVARIA.

BAYEUX (bahyō'). French town in Calvados dept., on the Aure, 18 m. N.W. of Caen. The fine cathedral is mainly 13th cent. Gothic. In the museum is the B. Tapestry (see below). B. was the first town in W. Europe to be liberated by the Allies, 7 June 1944. Pop. (1962) 10,641.

BAYEUX 'TAPESTRY'. A linen sampler, made about A.D. 1080, which gives a vivid pictorial record of the invasion of England by William the Conqueror in 1066. It is 231 ft. long and 20 in. wide, embroidered with woollen threads in blue, green, red, and yellow, and contains 72 separate scenes with descriptive wording in Latin. See illus. **HAROLD II**.

BAYLE (bāl), Pierre (1647-1706). French critic and controversial writer. Son of a Calvinist pastor, he held chairs of philosophy at Sedan and Rotterdam. Suspected of rationalist views, he was suspended in 1693. Three years later appeared his *Dictionnaire historique et critique*, which had a wide influence, particularly on the French Encyclopaedists.

BAYLEBRIDGE, William (1883-1942). Australian poet and author. His study of the F.W.W. from the Australian viewpoint, *Anzac Muster* (1922), is a notable prose work.

BAYLIS, Lilian Mary (1874-1937). British theatrical manager. A niece of Emma Cons, who in 1880 took over the Royal Victoria Hall (Old Vic), in Waterloo Road, London, she was well known as a child violinist and afterwards as a concert entertainer. Under her management (from 1898) the Old Vic theatre became a home of Shakespearian drama, and Sadler's Wells theatre, rebuilt in 1926, a home of opera and ballet. She was made a C.H. in 1929.

BAYONNE (bahyon'). Fortified French town in Basses-Pyrénées dept., 3 m. from the mouth of the Adour, near the Span. frontier. It is a centre of Basque life. Iron and steel works, linen, leather, and other factories lie just outside the town. The bayonet was invented here. Pop. (1962) 41,149.

BAYOU (bi'-oo). Corruption of Fr. *bayou* 'gut': in southern U.S.A. an oxbow lake or marshy offshoot of a river. Bs. may be formed, as in the lower Mississippi, by a river flowing in exaggeratedly wide curves in flat country, and then cutting a straight course across them in time of flood, so leaving 'loops' of dead water behind.

BAYREUTH (bi'roit). German town in Bavaria, 42 m. N.E. of Nuremberg, famous for its Wagnerian associations. The Wagner Theatre was opened in

BAVARIA. Standing in the Alpine foothills, almost 3,000 ft. above sea level, Neuschwanstein Castle was created for Ludwig II by Dollmann, Riedel, and Hofman to rival the 11th cent. Wartburg, whose design it closely follows. It reproduces faithfully the fairytale beauty of a typical German medieval castle. Courtesy of the German Tourist Information Bureau.

BETHLEHEM. The grotto beneath the Church of the Nativity is one of the most sacred places in Christendom. The star under the altar is said to mark the actual spot of the Nativity.

National Congress. In 1926-7 she visited England and America with J. Krishnamurti, a young protégé in whom she recognized the new Messiah. She wrote many books on theosophical subjects and an autobiography (1893).

BESANT, Sir Walter (1836-1901). British author. He collaborated with James Rice in novels such as *The Golden Butterfly* (1876), and produced an attack on the social evils of the E. End, *All Sorts and Conditions of Men* (1882), and an unfinished *Survey of London* (1902-12). He was a founder of the Soc. of Authors.

BESIER, Rudolf (1878-1942). British playwright, author of the perennially popular *Barretts of Wimpole Street* (1930).

BESSARABIA. Territory of E. Europe. Annexed by Russia in 1812, after the 1917 revolution B. broke away and its union with Rumania was agreed to by the Allies in a treaty signed in Paris in 1920. Russia never recognized this cession, and in 1940 reoccupied B. Rumania ceded the area to the U.S.S.R. by the peace treaty of 1947, and it was incorporated partly in Moldavia, partly in Ukraine, S.S.R.s. Area and pop. in 1939, 17,100 sq. m. and 3,200,000. Kishinev is the chief town.

BESSEL, Friedrich Wilhelm (1784-1846). German astronomer. Director of the newly-estab. observatory at Königsberg from 1813, he pub. in 1818 a catalogue of more than 3,000 stars and by his systematic research founded modern precision astronomy.

BESSEMER, Sir Henry (1813-98). British civil engineer and inventor of the *Bessemer Process* (1856) for converting molten pig-iron into steel.

BEST, Charles Herbert (1899-). Canadian physiologist, who was one of the team of Canadian scientists under the leadership of Sir Frederick Banting, whose researches resulted in 1922 in the discovery of insulin as a cure for diabetes. A Banting-Best Dept. of Medical Research was founded in Toronto, and in 1941 B. became its director.

BETA PARTICLES. Electrons emitted from nuclei

of radioactive substances undergoing spontaneous disintegration. Streams of B.P. are called beta rays.

BETEL-NUT. Fruit of the areca palm (*Areca catechu*), used as a masticatory by peoples of the East: chewing it results in blackened teeth and the mouth is stained deep red.

BETHE (bät'e), Hans Albrecht (1906-). German-American physicist. A refugee from Hitler in 1933, he taught first in Britain, then in the U.S.A. where he became prof. of theoretical physics at Cornell in 1937. He worked on the first atom bomb, and was in 1967 awarded a Nobel prize, especially for his discoveries concerning energy production in stars.

BETHLEHEM. Small town of ancient Palestine 6 m. S. of Jerusalem, the reputed birthplace of Jesus Christ, and of King David. It contains the Church of the Nativity, used by Latins, Greeks, and Armenians, beneath the choir of which is the Grotto of the Nativity, much visited as a place of pilgrimage. In the N.W. stands a square-domed building said to mark the site of Rachel's tomb. In 1099 the Crusaders captured B., and Baldwin I was crowned king of Jerusalem there. On its site, in Jordan, is the modern town of Beit-Lahm. Pop. (est.) 10,000.

BETHLEHEM. City of Penn., U.S.A., on the Lehigh r., 50 m. N.W. of Philadelphia. It is the site of a chief plant of the B. Steel Corporation, one of the largest steel companies in the world. Pop. (1960) 75,408.

BETHMANN HOLLWEG (beht'mahn-holveg), Theobald von (1856-1921). German statesman who succeeded Prince Bülow as Imperial Chancellor in 1909. At the outbreak of the F.W.W. he defended Germany's invasion of Belgium and Luxemburg. He was dismissed in 1917.

BETHNAL GREEN. See LONDON.

BETHUNE (bätün'). Town in Pas-de-Calais dept. France, 20 m. N.N.W. of Arras, on the richest coal-field in France. Pop. (1962) 24,655.

BETJEMAN, John (1906-). English poet and essayist, originator of a peculiarly English light verse, nostalgic and delighting in Victorian bric-à-brac, Neo-Gothic architecture, and so on. His *Collected Poems* appeared in 1958 and a verse autobiography *Summoned by Bells* in 1960.

BETONY. Plant (*Stachys betonica*) of the family Labiatae, a hedgerow weed in Britain. It has a hairy stem and leaves and dull purple flowers, and was formerly supposed to have curative properties.

BETTERTON, Thomas (c. 1635-1710). British actor. A member of the Duke of York's company

BETJEMAN. A moment's pause in the shade on a walk down a typical English lane. Closing the vista is one of the village churches that are among the poet's 'loves'.

Photo: Cecil Beaton.

BEAR. Large or medium sized, heavily-built mammal, forming the family Ursidae of the order Carnivora, distinguished by their protrusible lips, very short tail, and broad plantigrade feet armed with long, non-retractile claws; the teeth too are characteristic. Bs. are chiefly vegetarian in diet, breed once a year, and usually have 2 cubs in the litter.

The brown and grizzly bears (*Ursus arctos*) extend from Europe through Central Asia into N. America, and are represented by many local races. The colour varies from blackish or reddish brown to grey. The best-known races of the Old World, the typical brown B. of Europe (*U.a. arctos*), the paler Syrian B. (*U.a. syriacus*), the Kashmir Red B. (*U.a. isabellinus*), and the Tibetan Blue B. (*U.a. pruinosus*) are about 3 ft. at the shoulder, but in Alaska the brown Bs. are bigger, 4 ft. or over at the shoulder.

BEAR. Left to right: black, grizzly and polar.

These Bs. are very alike in habits. They hibernate where it is very cold in winter, and eat vegetable food, insects, fish, and small mammals, but sometimes raid farm property, and carry off cattle, pigs, or other livestock. Consequently, and also because of the value of their skins, they have become greatly reduced in numbers. They rarely attack man, except when cornered.

The grizzly B. (*U.a. horribilis*) of N. America is closely related to the brown bear, which it resembles in size, appearance, and habits. There are several races, chiefly inhabiting the Rocky Mountains; but it has been exterminated in many districts. Stories of its ferocity have probably been exaggerated. The N. American black B. (*Euarctos americanus*) stands only about 2½ ft. high. Other species are the Himalayan Black B. (*Selenarctos tibetanus*), the Malayan B. (*Helarctos malayanus*), the sloth B. (*Melursus ursinus*) of Hindustan and Ceylon, and smallest of all, the spectacled B. (*Tremarctos ornatus*) of S. America.

Lastly there is the polar or white B. (*Thalarctos maritimus*) distinguished by its white coat, inability to climb, and hairy soles of the feet—characters that are adaptations to arctic life. Its prey comprises fish, seals, and stranded whales. It will also eat seaweed and, in the summer, lichen and grass. This is one of the largest Bs., a good sized male being 4 ft. high and up to 9 ft. in length.

A still larger B. was the extinct cave B. (*U. spelaeus*) of prehistoric Europe.

BEAR BAITING. Brutal sport once popular in Europe; the bear was chained to a stake and baited by dogs. It was abolished in Britain in 1835.

BEAR, Great and Little. Two constellations, in Lat. called *Ursa major* and *minor* (q.v.).

BEARD. Charles Austin (1874-1948). American historian, author of *The Economic Interpretation of the Constitution*, *The Rise of American Civilization*, etc. Staunchly isolationist, he opposed Roosevelt and the entry of the U.S. into the S.W.W.

BEARDSLEY. Aubrey Vincent (1872-98). British black-and-white artist. A musical phenomenon as a boy, he began to study art at the age of 19 and developed an unconventional style which evoked much criticism. In 1894 he became prominent as illustrator

to the *Yellow Book*. He became a R.C. in 1897, and d. at Mentone of consumption.

BEARS AND BULLS. See STOCK EXCHANGE.

BEAS (bē'as). One of the 5 rivers which give its name to Punjab, B. is an upper tributary of the Sutlej. The ancient Hyphasis, it marked the limit of the invasion of India by Alexander the Great.

BEASLEY (bēz'li), John Albert (1895-1949). Australian Labour leader. Strongly anti-Communist, he was Min. of Supply and Shipping 1941-5 and played a great part in Australia's war effort. He was High Commissioner in London from 1946.

BEATIFICATION. See CANONIZATION.

BEATING THE BOUNDS. Ancient custom in the English countryside. On Holy Thursday the parish clergyman, with village officials and a number of boys, perambulate the bounds of the parish the boys beating the corners, etc. with peeled willow-wands. In olden days the boys themselves were beaten.

BEATITUDES (bē-at'itūdz; Latin *beatitudo*, blessedness, or happiness). The sayings of Jesus reported in Matt. v, 1-12; Lk. vi, 20-38, depicting the spiritual qualities which are to characterize members of the Kingdom of God.

BEATON (bē'ton), Cecil Walter Hardy (1904-). British photographer and designer. B. in London. he was educ. at Harrow and Cambridge and has produced notable portrait studies; settings for plays and films, e.g. the London and N.Y. production of *Mr Fair Lady*; and scenery and costumes for ballets. Among his books is *Cecil Beaton's Diaries 1922-39* (1961).

BEATON (bē'ton or bā'ton), David (1494-1546). Scottish cardinal and statesman. A chief min. of James V, he was made primate of Scotland in 1539. Under Mary Queen of Scots he opposed the alliance with England, persecuted the Reformers, and was assassinated by a band of fanatics at St. Andrews.

BEATRIX (bē'atrics) (1938-). Crown Princess of the Netherlands. The eldest dau. of Queen Juliana (q.v.), she achieved great popularity, but when in 1966 she m. W. German diplomat Claus von Amsberg

BEATON. In the winter garden of his Wiltshire home, Cecil Beaton relaxes in a setting as delicately exotic as any of his stage designs. His pug dog Sami is equally content.

Courtesy of Cecil Beaton.

airport of Gujarat, India, in the Kathiawar peninsula on the Gulf of Cambay. It makes and exports textiles, and was cap. of the former Rajput princely state of B. Pop. (1961) 177,488.

BHOPAL. Cap. of Madhya Pradesh, India. It stands on the N. slopes of the Vindhya Hills, has an airport, and is developing rapidly as an industrial centre making textiles, chemicals, jewellery, etc. It was cap. of the former princely state of B. Pop. (1961) 225,460.

BHUBANESWAR (boobahnesh'wah). Cap. of Orissa, Rep. of India. A place of pilgrimage and centre of Siva worship, it has temples of the 6th–12th cents., and was cap. of the Kesaris (Lion) Dynasty of Orissa 474–950. Utkal Univ. (1843) was removed from Cuttack to B. in 1962. Pop. (1961) 38,374.

BHUMIBOL ADULYADEJ (pōō'mipol addō-leah'desh) (1927–). King of Thailand. Ed. in Bangkok and Switzerland, he succeeded on the assassination of his brother in 1946, formally taking the throne in 1950.

BHUTAN (bhootahn'). Independent state in the S. slopes of the Himalayas, between Tibet and Assam. It is very mountainous. The climate is varied, depending on the altitude. The dominant people are of Tibetan origin, and speak a Tibetan dialect. In religion they are nominally Buddhists. Maize and rice are grown in the valleys of tributaries of the Brahmaputra. Tasichozong and Punakha are 2 of the chief fortresses of the country. Treaties of 1865 and 1910 with the British govt. were replaced in 1949 by one with India, under which B. receives a subsidy and is guided in external relations by the Indian govt. The cap. is Thimphu. Area c. 16,800 sq. m.; pop. c. 700,000.

BIAFRA (bē-af'rah). Rep. of. State proclaimed in 1967 when the predominantly Ibo Eastern Region of Nigeria seceded under Lt.-Col. Odumegwu Ojukwu, an Oxford-educated Ibo. On the proclamation of B. civil war ensued with the rest of the Federation, but in a bitterly fought campaign Federal forces had confined the Biafrans to a shrinking area of the interior by 1968.

BIA'LIK, Hayyim Nachman (1873–1934). Hebrew poet, greatly responsible for the modern renaissance of the Hebrew language. B. in S. Russia, he wrote Zionist poems in Hebrew and, leaving Russia in 1921, estab. a publishing firm in Tel Aviv.

BIALYSTOK (byah'lüstok). City of Poland, cap. of B. region, 105 m. N.E. of Warsaw. Dating from 1310, it makes woollen textiles, chemicals, tools, etc. Pop. (1966) 142,000.

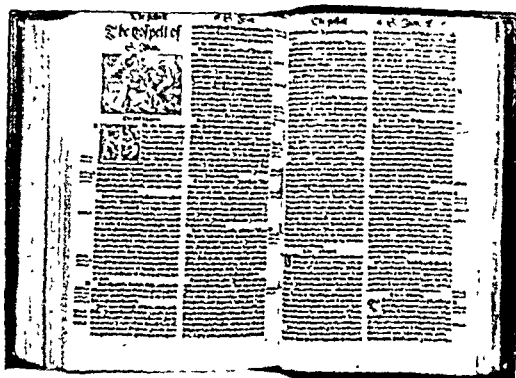

BIARRITZ (bē-ahrêts'). French seaside resort and spa on the Bay of Biscay, in Basses-Pyrénées dept., 5 m. S.W. of Bayonne. Pop. (1962) 25,514.

BIBE'SCO, Princess. See ASQUITH.

BIBLE (bibl; Gk. *ta biblia*, the books). Collection of books comprising the authoritative documents of the Jewish and Christian religions, and divided into the Old Testament or 'Covenant', the Apocrypha, and the New Testament.

The O.T. contains those books recognized by the Jews and classified by them as: the Law (the Pentateuch or books of Moses; recognized soon after the return from captivity); the Prophets (Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel and the 12 minor prophets, Hosea to Malachi, recognized by the 3rd cent. B.C.); and the Hagiographa or Sacred Writings (including the remaining books; finally recognized c. A.D. 90–100).

The Apocrypha consist for the most part of the books of the Gk. Septuagint which were not included in the final Hebrew canon. Included in the Vulgate, and so recognized by Catholics as authoritative, they were excluded by Luther, and segregated by the English translators from Coverdale onwards. Many editions of the A.V. omit them. Texts of other apocryphal works, e.g. *The War between the Children of Light and*

BIBLE. Although Henry VIII had already broken with the Pope, Coverdale's Bible of 1535, illustrated here, was published on the Continent – probably being printed in Zurich.

Photo: The British and Foreign Bible Society.

the Children of Darkness, were found among the Dead Sea Scrolls (q.v.).

The N.T., containing those books recognized by the Church in the 4th cent. as canonical, is also divided into three parts: history, Matthew to Acts; epistles, Romans to Jude; and prophecy, Revelation.

A copy of the 'lost' Gospel of St. Thomas, also known as the *logia* or sayings of Jesus, was discovered by peasants in an earthenware jar in 1945 at Nag Hammadi, nr. Luxor. A 3rd or 4th cent. translation in Coptic of a Gk. original dating from about A.D. 135, it is variously regarded as authentic, or as more probably a later elaboration.

Text. The Hebrew text of the O.T. is that of the Massorettes, Jewish scholars who finally estab. it between about A.D. 500 and 900. The oldest dated MS. is A.D. 916, but there is evidence that a practically identical Hebrew text existed many cents. earlier, e.g. the Dead Sea Scrolls (of disputed date, but certainly hundreds of years earlier than any other bible MSS.) found in the caves of the Wadi Qumran from 1947 onwards. Of other versions of the O.T. the Gk. Septuagint is the chief. The MS. material for the Gk.

BOOKS OF THE BIBLE

Old Testament

Genesis	Nehemiah	Hosea
Exodus	Esther	Joel
Leviticus	Job	Amos
Numbers	Psalms	Obadiah
Deuteronomy	Proverbs	Jonah
Joshua	Ecclesiastes	Micah
Judges	Song of Solomon	Nahum
Ruth	Isaiah	Habakkuk
I & II Samuel	Jeremiah	Zephaniah
I & II Kings	Lamentations	Haggai
I & II Chronicles	Ezekiel	Zechariah
Ezra	Daniel	Malachi

Apocrypha

I & II Esdras	Song of the Three Children
Tobit	Story of Susanna
Judith	Bel and the Dragon
Rest of Esther	Prayer of Manasses
Wisdom	I & II Maccabees
Ecclesiasticus (of Jeremiah)	
Baruch, with the Epistle	

New Testament

Matthew	Galatians	Philemon
Mark	Ephesians	Hebrew
Luke	Philippians	James
John	Colossians	I & II Peter
Acts of the Apostles	I & II Thessalonians	I, II & III John
Romans	I & II Timothy	Jude
I & II Corinthians	Titus	Revelation

Les Mandarins (1954), a novel of post-war Parisian intellectualism with characters resembling Camus, Koestler and Sartre. Essential to an understanding of her work are the 2 autobiographical vols. *Memoirs of a Dutiful Daughter* and *The Prime of Life*.

BEAVER (bē'ver). Sole representative of the family Castoridae of the order Rodentia; found in Europe, Central Asia, and North America, and distinguished mainly by its broad, flat, scaly tail and webbed hind feet—adaptations to aquatic life.

The European B. (*Castor fiber*) survives in Central Asia and, under strict protection, in small numbers in the Elbe and Rhine, and in Norway and elsewhere in Europe. The American B. (*Castor canadensis*) is widely distributed in N. America. Both species have

a coat of thick brown fur impervious to water, grow to 3½ ft., including the tail, attain a weight of 50 lb., and live from 12 to 15 years. There are usually 4 young born in the spring in a 'lodge' of logs and mud.

The B. is a valuable fur-bearing animal, and also yields castoreum, secreted by glands at the base of the tail, which is used for perfumes.

BEAVERBROOK, William Maxwell Aitken, 1st baron B. (1879–1964). Canadian newspaper proprietor. B. at Maple, Ontario, he made his fortune by a merger of the principal Canadian cement firms in 1910, when he settled in England and became a Conservative M.P. A close association with Bonar Law and other Conservative leaders gave him a strong influence in the F.W.W., and he received a peerage in 1917 and became Min. of Information in 1918. From 1919 he was in full control of the policy of the *Daily Express*, soon after founding the *Sunday Express* and buying the *Evening Standard*. In 1929–31 he launched a campaign for Empire Free Trade and against Baldwin's leadership of the Conservative Party, while during the 1930s he advocated a policy of 'splendid isolation' in Europe. In the S.W.W. he was Min. of Aircraft Production 1940–1, Min. of Supply 1941–2 and Lord Privy Seal 1943–5. The B. press campaigned vigorously against British entry into the Common Market in 1962–3. Among his books are *Men and Power* (1956) and *The Decline and Fall of Lloyd George* (1963). He made munificent gifts to New Brunswick Univ., and in 1954 estab. in London an educational trust, the B. Foundation, to which he turned over his newspaper holdings. He was succeeded by his son Sir Max Aitken (1910–), who renounced the peerage.

BEBEL (beh'bel), Ferdinand August (1840–1913). German Social Democratic leader. B. at Cologne-Deutz, the son of a N.C.O., he collaborated with Liebknecht, and was elected to the Reichstag. He condemned Bismarck's *kulturkampf*, spoke for the Paris Communards in 1872, and was imprisoned. Under Bismarck Socialism was proscribed, but after his fall, B. made the party a powerful organization.

BEBINGTON. English town (bor.) on the left bank of the Mersey estuary, Cheshire, just S. of Birkenhead. It incl. Port Sunlight, and manufactures soap, candles, margarine, oils, etc. Pop. (1961) 52,202.

BECCARIA (bekahrē'ah), Cesare, marquis of (1738–94). Italian philanthropical writer. B. in Milan, he pub. in 1764 a treatise on *Crimes and Punishments*. His arguments against torture and capital punishment, and in favour of education as a means of preventing crime, had their effect upon penal codes, and his phrase 'the greatest happiness of the greatest number', shortly became the watchword of Bentham, Romilly, and the English Utilitarians.

BECHSTEIN (bekh-stēn), Karl (1826–1900). German pianoforte-maker, founder of the Berlin firm which bears his name in 1856.

BECHUANALAND. See BOTSWANA.

BECKET, Thomas (1118–70). English churchman. The son of a rich Norman merchant, he passed from the service of Theobald, Archbishop of Canterbury, to that of Henry II, who created him Chancellor of England in 1155. When he became Archbishop of Canterbury in 1162 he devoted all his energy to resisting royal encroachments on the privileges of the clergy, and as a result Henry's friendship turned to bitter hatred. His opposition to Henry's attempt by the Constitutions of Clarendon (1164) to bring the clergy under the jurisdiction of the royal courts provoked open hostility between them, and B. fled to France. He returned in 1170 when a reconciliation was patched up; but the quarrel soon broke out again, and 4 knights, encouraged by a hasty outburst of the king's, murdered B. in Canterbury Cathedral. He was canonized in 1172, and his shrine remained a popular object of pilgrimage until the Reformation.

BECKETT, Samuel (1906–). Irish dramatist, who settled in Paris as a disciple of Joyce, and published a number of novels and some verse. He made a world reputation with his play *Waiting for Godot* (1952), in which two tramps wait endlessly for 'Godot' and debate equally endlessly. Later plays incl. *Fin de Partie* (End Game; 1957).

BECKFORD, William (1760–1844). British writer and eccentric. B. at Fonthill, Wilts, he inherited an immense fortune, became a M.P. in 1784, but shortly afterwards was obliged to leave England owing to scandals in his private life. *Vathek*, a fantastic Arabian Nights' tale, was pub. in Paris in 1787. In 1796 B. returned to England, rebuilt Fonthill Abbey, and filled it with fantastic curiosities. This he sold in 1822, and retired to Bath.

BECKMANN, Max (1884–1950). German artist. B. in Leipzig, he was driven from Germany in 1933 by political persecution and d. in N.Y. His experiences during the F.W.W. induced a bitterly realistic spirit, which gave way in later work to a hauntingly dream-like quality. He is an outstanding artist of the later phase of Expressionism.

BEQUEREL (bekrel'), Antoine Henri (1852–1908). French physicist, renowned for his discovery in 1896 of the *Bequerel rays*, the first indications of radio-activity: these were later re-named gamma rays. He shared with the Curies the Nobel Prize for physics in 1903.

BEDDOES, Thomas Lovell (1803–49). British poet and dramatist. A romantic, working under the influence of the Elizabethan dramatists, he started his most famous play, the incoherent *Death's Jest Book*, in 1825, but it was not pub. until 1850, much revised. From Oxford he had gone on to medical studies in Germany, and practised as a physician in Zurich until driven out by political events in 1839. After several suicide attempts, he succeeded in poisoning himself with curare. His lyrics and various dramatic fragments are now highly regarded by connoisseurs.

BEDE (bēd) (c. 673–735). English theologian and historian, known as the Venerable Bede. B. at Monkwearmouth, Durham, he entered the local monastery at the age of 7, later transferring to Jarrow, where he became a priest c. 703. He devoted his life to writing and teaching, the most famous of his pupils being Egbert, archbishop of York. He wrote many scientific, theological and historical works, the most celebrated being his *Historia Ecclesiastica Gentis Anglorum*, finished in 731. He d. and was buried at Jarrow, but his remains were removed to Durham in the 11th cent.

BEDFORD, John Robert Russell, 13th duke of (1917–). British nobleman. He succeeded his father, a noted naturalist, in the title in 1940. Under his aegis the family seat at Woburn in Bedfordshire has been restored to its former glory and both the house and grounds are visited by thousands annually.

BEDFORD. English town (bor.), co. town of

flukes are of 3 principal kinds: *Bilharzia haematobia*, which causes leakage of blood into the urine; *B. mansoni*, which causes dysentery; and *B. japonica*, which causes cirrhosis of the liver and dropsical swelling of the abdomen (ascites).

BILLIARDS. Indoor game of skill played with cues and composition balls on a heavy rectangular table covered by green cloth.

There are pockets at each corner and in the middle of each long side of the table, and the surface is marked out with a baulk line, a semicircle known as the 'D', and 4 spots. Three balls are used, a red and two white, and one of the latter has a spot for easy identification. Points are scored by the cannon, i.e. by the cue (player's) ball hitting the other 2 balls successively, or by winning and losing hazards, the former being made by striking the cue ball against one of the object balls, and sending it into a pocket, and the latter by pocketing the cue ball after hitting one of the object balls. Points are awarded for cannons and for going in off, or pocketing, the white and red balls. The amateur game is usually played for 100 up. The player continues until the end of his break, i.e. until he fails to score, when his opponent takes over.

The origin of the game is obscure, but it has been played in England and France for many centuries. The earliest known rules were printed in 1650.

BILLINGHAM. District of Teesside C. B. in Yorks. N. Riding, $3\frac{1}{2}$ m. N.W. of Middlesbrough. In 1920 it was a small town; development in the 1920s of large works producing fertilizers led to its growth. Pop. (1961) 32,130.

BILLINGS. Josh. Pseudonym of Henry Wheeler Shaw (1818–85). American humorous writer. His popular *Josh Billings, His Sayings* (1865) depended largely for its humour on mis-spelling, puns, and malapropisms.

BILLINGSGATE. Originally one of the gates of the city of London giving on to the Thames just below London Bridge. Near by there is a fish-market dating from the 9th cent. The language of the porters was frequently commented upon by 17th cent. writers, until the word has come to mean foul language.

BILLION. In British usage, a million million (1,000,000,000,000); but in U.S.A. and France, a thousand million (1,000,000,000), which in Britain is a milliard.

BILLITON. Another form of BELTUNG.

BILL OF EXCHANGE. A form of commercial credit instrument, defined in Britain by the Bills of Exchange Act, 1882, as an unconditional order in writing addressed by one person to another, signed by the person giving it, requiring the person to whom it is addressed to pay on demand or at a fixed or determinable future time a certain sum in money to or to the order of a specified person, or to bearer. A *cheque* is a B. of E. drawn on a bank payable on demand. U.S. practice is governed by the Uniform Negotiable Instruments Law, drafted on the same lines as the British, and accepted by all states by 1927.

BILL OF RIGHTS (1689). The Act embodying the Declaration of Rights drawn up by the House of Commons and presented to William of Orange and his wife before they ascended the throne as William III and Queen Mary in place of James II. It declares the following illegal: the suspension of laws by royal authority without consent of Parliament; the power to dispense with laws; the establishment of special courts of law; levying money by royal prerogative without the consent of Parliament; the raising or keeping of a standing army in time of peace within the kingdom without such consent. The right to petition the King, the freedom of parliamentary elections, freedom of speech in parliamentary debates, and the necessity for frequent parliaments, are also asserted.

BILLROTH (bil'rōt), Theodor (1829–94). Viennese surgeon. B. in the island of Rügen, he became professor in Zürich (1859) and Vienna (1867) universities. He was an outstanding figure among the surgeons of his time, and an authority on military surgery.

BILSTON. Ancient English town in Staffs, 10 m. N.W. of Birmingham, making japanned and enamelled ware, glass, etc.; once a centre of heavy industry. Pop. (1961) 33,077.

BIMETALLIC STRIP. Strip made from 2 metals each having a different coefficient of thermal expansion which therefore deflects when subjected to a change in temperature. Used widely for temperature measurement and control.

BIMETALLISM. That monetary system in which gold and silver both circulate together at a ratio fixed by the State, are coined by the Mint on equal terms, and are legal tender to any amount. Advocates of B. have argued that the 'compensatory action of the double standard' makes for a currency more stable than one based only on gold, since the changes in the value of the two metals taken together may be expected to be less than the changes in one of them.

BINARIES. Name given to stars that can be seen close together, with optical aid, and gravitationally connected. B. move together through the heavens like other stars, having their own proper motion; but in addition, they move round their common centre of gravity, performing a revolution in a period that may vary from a few days to hundreds of years.

BINARY NUMBER SYSTEM. A system in which numbers are represented by combinations of successive powers of 2, i.e. 1, 2, 4, 8, 16, etc. (cf. decimal system where successive powers of 10 are used). Some examples of binary numbers are:

Decimal notation	Binary notation
5	$101 = 1 \times 2^2 + 0 \times 2^1 + 1 \times 2^0$
14	$1110 = 1 \times 2^3 + 1 \times 2^2 + 1 \times 2^1 + 0 \times 2^0$
43	$101011 = 1 \times 2^5 + 0 \times 2^4 + 1 \times 2^3 + 0 \times 2^2 + 1 \times 2^1 + 1 \times 2^0$

This system is widely used in electronic digital computers.

BINARY STAR. A star made up of 2 separate components, moving round their common centre of gravity. In some Bs. (e.g. Gamma Virginis) the components are virtually equal, and widely separated; with others (e.g. Sirius) one component is very much brighter than the companion. The theory that a B. results from the fission of a formerly single star has now been generally rejected. Famous Bs. incl. Mizar, in the Great Bear; Castor, in the Twins; and the brilliant southern star Alpha Centauri. With some Bs. there are more than 2 components, and Castor, for instance, is a complex multiple system.

BINDING (bin'ding), Rudolf Georg (1867–1938). German poet and novelist. B. at Basle, he pub. several vols. of verse, and finely-constructed short novels. After 1933 he supported the Nazi regime.

BINET (bēnēh'), Alfred (1857–1911). French psychologist. He was director of the laboratory of psychology and physiology at the Sorbonne from 1892, and in 1904 became a member of a commission on education of backward children. Together with Simon he pub. in 1905 the Binet-Simon tests of intelligence, designed to distinguish between children who were backward through mental deficiency and those backward through laziness or ill-health.

BING, Rudolf (1902–). Austrian impresario. B. in Vienna, he fled to England in 1933, and in 1946 founded the Edinburgh Music Festival. In 1950 he became manager of the Metropolitan Opera, N.Y.

BINGO. Game played with cards divided into numbered squares. Each player has 1 or more cards and when the 'caller' draws numbered discs from a bag, numbered balls from an automatic machine, etc., he marks off such numbers as appear on his cards. On

Bombidae; the Hive B. and related kinds (*Apis*) and the so-called Stingless Bs. (*Melipona* and *Trigona*) of the tropics. Like other social insects they live in communities, and the life of the female parent is prolonged so that she is able to co-operate with her offspring to the benefit of the colony.

The *Hive B.* (*Apis mellifera*) has perennial colonies, and a flourishing hive will number 50,000 to 80,000 bees. The vast majority are workers (infertile females); the drones (males) are considerably larger and stouter with large eyes, while the queen can be recognized by her longer abdomen, which reaches beyond the closed wings. The comb is made of wax (secreted by glands between the segments of the abdomen in the worker) and composed of a large number of typically hexagonal cells, arranged in two series, and placed back to back. A large number of these are used for rearing the brood, others are for storing honey and pollen. The queen lays an egg in each brood cell and the incubation period is about 3 days; the complete development of the queen takes 16 days, a worker 3 weeks, and a drone 24 days. Fertilized eggs develop into workers, or queens, and the unfertilized eggs produce drones. The larvae are fed at first on 'royal jelly', a glandular product of the workers. Those destined to grow into queens receive this diet until full grown. New colonies are estab. by swarming, and this event follows the emergence of a daughter queen. The swarm consists of the original queen accompanied by a host of workers, the new queen remaining in the hive. She takes her marriage flight at any early opportunity and is followed by a retinue of eager drones. Mating occurs in mid air, after which the young and now fertilized queen returns to the hive.

BEEBE (bē'bē), Charles William (1877-1962). American naturalist and explorer, leader of many scientific expeditions in tropics, the first to descend in a bathysphere (q.v.) to observe life in ocean depths.

BEECH. Genus of trees (*Fagus*), of which the common B. (*F. sylvatica*) grows as a forest tree throughout Europe. Its wood rots easily, but is used for making small objects for household use. The nuts or mast are a food for pigs.

BEECHAM, Sir Thomas (1879-1961). English conductor. Grandson of Thomas B. (1820-1907), founder of the pharmaceutical firm, and son of Sir Joseph B., bt. (1848-1916), b. at St. Helens, Lancs. As conductor to the B. Orchestra (formed 1908) and the B. Opera Co. (formed 1915; later the British National Opera Co.), he introduced new life into the world of British music, and in 1911 brought the Russian ballet to England. At his death he was still conductor of the Royal Philharmonic Orchestra, which he had founded in 1947. Renowned as an interpreter of Mozart and Verdi, he estab. the musical reputation of Delius, of whom he pub. a biography in 1959, by his ceaseless advocacy. He was k. in 1916, succeeded his father as 2nd bt. in the same year, and in 1944 pub. the autobiographical *A Mingled Chime*.

BEECH. The tree with leaves and mast.

**SIR
THOMAS BEECHAM**

His mischievous wit, fiery temper, and personal magnetism rendered him an unforgettable figure.

BEECHER, Lyman (1775-1863). American Presbyterian divine, one of the most influential pulpit orators of his time. He was the father of Harriet Beecher Stowe (q.v.), and of Henry Ward B. (1813-87), Congregational minister, pastor of Plymouth church, Brooklyn, N.Y., from 1847, a leader in the movement for the abolition of slavery, and an eloquent preacher.

BEECHING, Richard, baron (1913-). British scientist and administrator. A director of I.C.I. 1957-61 and 1965-8, he was chairman of Brit. Railways Board 1963-5, when the *B. Report* (1963) *planning concentration on inter-city passenger traffic* and a freight system was controversial.

BEERBOHM, Sir Max (1872-1956). English writer, the half-brother of the actor-manager Sir Herbert Beerbohm Tree (1853-1917). B. in London, he contributed to *The Yellow Book*, publishing the essays later ironically as *The Works of Max Beerbohm* (1896), and succeeded Shaw as dramatic critic to the *Saturday Review*. A superb stylist, B. produced one novel *Zuleika Dobson* (1911), parodies—*A Christmas Garland* (1912), and vols. of exquisite caricatures, e.g. *The Poet's Corner* and *Rossetti and his Circle*. From 1910 he lived in Rapallo, Italy, and was knighted in 1939. See illus. **WILDE**, Oscar.

BEERSHE'BA. Market town and road centre in Israel, cap. of the Negev, 45 m. S.W. of Jerusalem. A settlement from the Stone Age, in the 1950s B. developed industrially. Pop. (1967) 67,500.

BEE. Genus of plants (*Beta*) of the order Chenopodiaceae. *B. vulgaris* grows wild on seashores in many parts of the Old World; several varieties are cultivated for their fleshy taproot, such as the red beet and the mangold-wurzel, or for their leaves, such as the white or spinach-beet. The sugar-beet (q.v.) is the variety with the greatest commercial importance.

BEETHOVEN (beht'höven), Ludwig van (1770-1827). German composer. B. at Bonn, 16 Dec. 1770, he was the son of a singer at the court of the archbishop-elect of Cologne, in whose household his mother also had a place. He was taught by his father, later by the court organist, and before he was 12 B. was made deputy organist and was already a busy composer. In 1787 he visited Vienna and had lessons from Mozart, and in 1792 the elector sent him to Vienna again to study under Haydn. There he became well known as a pianist and teacher, and benefited from the patronage of aristocratic enthusiasts—this in spite of his uncouth manners, unattractive appearance, eccentric habits, and ungovernable temper. By 1802 he was already troubled by deafness which steadily increased until it became total. It induced in him a feeling of terrible isolation, of spiritual loneliness and despair. A 'testament' written to his brothers in 1802 bears witness to the depth of his affliction. Family troubles increased his difficulties, especially the shiftless conduct of a nephew whose guardian he was. But, in spite of everything, he continued to compose even though now quite incapable of hearing his own works played. His music won European fame, and it was highly appreciated in England; the Royal Philharmonic Society commissioned several works, including the 9th Symphony, and sent him £100 during his last illness. See illus. under **MUSIC**.

B.'s work may be divided into three periods. In the

BIOCHEMISTRY, DARWIN, PASTEUR, MICROSCOPE, etc.

BIONOMICS. Branch of biology which deals with the laws of life, as they affect organisms in relation to their environment and to each other. The study of heredity and of variation and the part these play in evolution are among the lines of research included.

BIOPSY. Removal of tissue from a living body for the purpose of diagnostic examination.

BIOSPHERE. Region of earth, air and water occupied by living organisms. Man-made modifications have unpredictable consequences, e.g. imbalance of carbon dioxide and oxygen in the atmosphere. Transatlantic jets burn 30 tons of oxygen per flight and produce carbon dioxide, and natural plant sources of oxygen are being reduced by expanding cities, etc.

BIRCH, John M. (1918-45). American Baptist missionary. B. in Georgia, he served in China, and during the S.W.W. was commissioned in the U.S.A.A.F. to carry out intelligence work behind the lines there. He was killed by Chinese Communists 10 days after the war ended. The ultra-nationalist *J. B. Society* (1958) was founded and named after him by retired sweet manufacturer Robert Welch of Boston, Mass.

BIRCH. Tree of the genus *Betula*, including about 25 species, found in the cool temperate parts of the northern hemisphere, of which the white or silver, *Betula alba*, is the best-known. It is of great importance to man, as its timber is quickgrowing and very durable. The bark is used for tanning and dyeing leather, and an oil is obtained from it.

BIRCH. Silver birch, with male (below) and female catkins.

BIRD OF PARADISE. Family of birds (*Paradisaeidae*) native of New Guinea and the neighbouring islands. The males are noted for the extreme beauty of their plumage; the females are inconspicuously coloured.

BIRDS. Warm-blooded, vertebrate animals clothed in feathers, and with their fore-limbs transformed into wings. They are oviparous, and feathers and scales originate as epidermal appendages. Except in brain development they are structurally as highly organized as mammals. Their behaviour is largely instinctive. Yet their body temperature is so much higher than that of mammals that they exhibit the emotional side of life in a far greater degree. Physically and mentally they have become highly specialized.

Primarily birds are divided into the *Archaeornithes* (also called *Saururae*): extinct forms with well-marked reptilian affinities, represented by a single genus, *Archaeopteryx* (q.v.) and the *Neornithes* or modern birds, which includes two distinct types. (a) The *Ratitae* are flightless and their breastbone resembles a flat bottomless raft (Lat. *ratit*); they comprise only 5 extant forms, viz. the ostrich, rheas, kiwi, emu, and cassowary. (b) The *Carinatae* comprise

CLASSIFICATION OF BIRDS

Passeriformes. Crows, jays, choughs, starlings, birds-of-paradise, orioles, finches, larks, pipits, wagtails, creepers, nuthatches, titmice, goldcrests, shrikes, waxwings, flycatchers, warblers, thrushes, wheatears, wrens, dippers, swallows, lyre-birds.

Apodiformes. Swifts, humming-birds.

Caprimulgiformes. Nightjars.

Trogoniformes. Trogons.

Coliiformes. Mouse-birds.

Coraciiformes. Hornbills, hoopoes, kingfishers, rollers, bee-eaters, etc.

Piciformes. Woodpeckers, barbets, toucans, etc.

Cuculiformes. Cuckoos, plantain-eaters.

Psittaciformes. Parrots and cockatoos.

Strigiformes. Owls.

Falconiformes. Vultures, eagles, hawks, falcons.

Ciconiiformes. Herons, storks, ibises, spoonbills, flamingoes.

Anseriformes. Swans, geese, ducks, mergansers, American screamers.

Pelecaniformes. Cormorants, darters, gannets, pelicans, frigate-birds, tropic-birds.

Procellariiformes. Petrels, shearwaters, albatrosses.

Sphenisciformes. Penguins.

Podicipediformes. Grebes.

Gaviiformes. Divers.

Columbiformes. Pigeons, dodo, sand-grouse.

Charadriiformes. Snipe, curlews, godwits, phalaropes, sandpipers, avocets, plovers, pratincoles, coursers, jacksnipes, gulls, terns, auks, bustards, cranes, trumpeters, etc.

Gruiformes. Rails, crakes, moorhens, coots, etc.

Turniciformes. Hemipodes.

Galliformes. Grouse, pheasants, partridges, domestic fowl, turkeys, peacocks, curassows, etc.

Tinamiformes. Tinamous.

the vast majority of living and extinct birds, in which the breastbone is provided with a keel (Lat. *carina*) which amplifies the surface for attachments of the immensely developed muscles of flight. A widely accepted classification of Bs. is given in the Table.

In addition to their use in flight, feathers also give protection and regulate body temperature (ranging from 40° to 43°C.). The vocal apparatus is highly specialized, with no 'obstructions' to prevent free passage of the voiced current of air through the open mouth and, though the lungs are relatively small and inelastic, the air supply is reinforced through numerous air sacs, direct prolongations of the lungs. Besides song (used in courtship but continued while the female broods), there are call and alarm notes. Display of plumes and other ornamentations by the male before the female plays the major part in courtship.

Bs. benefit man by eating insect pests (it has been computed that the blue titmouse consumes c. 64 million insects per annum), eliminating rodent pests in the case of birds of prey, and acting as scavengers. Their senses of smell and touch are little developed, but their hearing, despite no external ears, is excellent and even more so their sight - B. migrants are thought to be largely guided by landmarks. The average lifespan is 2 to 6 years. See also ORNITHOLOGY.

BIRKBECK, George (1776-1841). British educationist. He helped to found the London Mechanics' Institution (1823)—a coll. of London Univ. from 1920 as *B. College*.

BIRKENHEAD, Frederick Edwin Smith, 1st earl of (1872-1930). British Cons. statesman. B. at Birkenhead and ed. at Oxford, he was called to the bar in 1899. He was

BIRD OF PARADISE

raconteur of genius, B. had the gift of language, and great warmth of personality.

BEHAVIOURISM. A school of psychology originating in America early in the 20th cent. The Behaviourists set out to study human personality objectively by observation of the actual behaviour of men and women; and they make no use of terms such as 'mental', 'consciousness', 'emotion', and 'instinct', which they consider misleading. B. thus stands in strong contrast both to the older introspective psychology and also to the psychoanalysts who emphasize the concepts of mental conflict and unconscious desires. The leading exponent of the B. school was the American professor J. B. Watson, whose *Psychology as the Behaviourist Views It* (1913) gave the first general statement of its principles. Behaviourists maintain that all human activity can ultimately be explained in terms of conditioned reactions or 'reflexes' and habits formed in consequence.

BEHRING, Emil von (1854–1917). German bacteriologist, the founder of the science of immunology.

BEHRING (or Bering), Vitus Jonassen (1680–1741). Danish navigator. In 1728 he sailed from Kamchatka northward along the Siberian coast to 67°N., and proved that Asia and America are not connected, giving his name to B. Straits. In 1741 he sighted Alaska.

BEILBY, Sir George Thomas (1850–1924). Scottish chemist who originated the therm system of charging for gas.

BEIRA (bā'rah). Port at the mouth of the r. Pungwe, Mozambique, chief outlet for Malawi, Rhodesia, and Zambia, with which it is linked by rail. Pop. (1950) 41,876. Developed by a British co., it was taken over by the Portuguese in 1949.

BEIRUT (bārūt'). Cap. and chief sea and airport of Lebanon, 60 m. N.W. of Damascus. It is an important educational centre in the Levant, with 3 univs. (French, U.S., and Lebanese State). Pop. (est.) 500,000.

BEITH (bēth), John Hay. See HAY, IAN.

BEIT-LAHM. Transliteration of Arabic form of Bethlehem.

BELASCO, David (1859–1931). American playwright whose plays incl. *Madame Butterfly* (1900), and *The Girl of the Golden West* (1905), both of which served Puccini as libretti for operas.

BELÉM. Brazilian port, naval base, and air centre, cap. of Pará state. It was founded c. 1615 as Santa Maria de Belém do Grão Pará, often abbreviated to Pará. Pop. (1960) 402,170.

BELFAST (belfahst'). Cap. of N. Ireland. It stands where the Lagan enters B. Lough, 12 m. from the open sea. The principal buildings incl. the City Hall (1906); St. Anne's Protestant Cathedral (begun in 1899); Queen's University; B. museum and art gallery;

BEIRUT. One of the most cosmopolitan of cities, Beirut is beloved of the mystery novelist, and real-life incident sometimes follows the same pattern, as in the Philby case. In Maarad Street busy shops and offices rise side by side with the minarets of mosques. Courtesy of the Embassy of Lebanon

BELFAST. Queen's University gives an impression of mellowness and antiquity, but was actually founded as a college of the Royal University of Ireland in 1845, attaining university status in 1909. Courtesy of the Northern Ireland Tourist Board

B. castle, a modern building on Cave Hill, presented by the Earl of Shaftesbury in 1934; the new Parliament House of N. Ireland at Stormont, 5 m. S. of B. (1928–32); the Grand Opera House; and Ulster Hall. B. is the most important industrial centre and port of all Ireland. Its chief industries are shipbuilding and the manufacture of aircraft, linen, and tobacco; there are distilleries. The earliest town grew up around a castle built in 1177 by John de Courcy. It was granted a charter in 1613, made a bor. in 1840, and a city in 1888; its chief magistrate became Lord Mayor in 1892. Pop. (1961) 415,039.

BELFORT (belfor'). French town, cap. of the territory of B., commanding the important route-way between the Vosges and the Jura mountains. Pop. (1962) 51,280.

BELGAUM (belgawm'). Chief town of B. dist., in Mysore state, India. Pop. (1961) 127,885. Part of B. district (Marathi-speaking) incl. the town of B. is claimed by Maharashtra: a commission appointed to settle the dispute ruled against Maharashtra 1967.

BELGIAN CONGO. See Congo, Republic of.

BELGIUM. European state bordering the North Sea, lying between the Netherlands on the N. and France on the S., with Germany and the duchy of Luxembourg on the E. It is mainly low-lying, though in the S.E. the Ardennes rise in the Botrange to 2,283 ft. Parts of the plain are naturally fertile, others are dry and sandy, but by reclamation, fertilization, and irrigation have been made productive. The coast is backed by sand dunes, and sand also occurs on the Campine Heaths in the N. The plain is watered by the Scheldt and its many tributaries, and by the Sambre and Meuse. The Ardennes have a heavy rainfall and are forested.

POPULATION. In 1960 the pop. of B. was estimated at 9,178,154. Less than one-tenth of the total is employed in agriculture, more than one-quarter in mining and industry. The majority are Roman Catholics. There are univs. at Louvain, Brussels, Ghent, and Liège. French and Flemish are both official languages, but from 1963 the language of admin. and instruction has been decided according to a linguistic frontier. Flemish in Flanders and French in Wallonia, with the Brussels zone (prov. of Brabant) multi-lingual. Area 11,775 sq. m.

ECONOMICS. The fertile parts of the Belgian plain produce large crops of sugar beet, cereals, esp. wheat, root and forage crops, and flax, while excellent dairy cattle and pigs are reared. Orchards and market gardens abound, the countryside being divided into small hedged fields. Rice, oats, and root crops are

upheld the principle of Divine Right. His experiences as Prussian envoy to the Federal Diet (1851-9) inspired his ambition to establish Prussia's hegemony inside Germany, and to eliminate the influence of Austria. After serving as ambassador to St. Petersburg and Paris, he was appointed For. Min. in 1862. He secured Austria's support in his war of 1863-4 with Denmark, but in 1866 he went to war with Austria and her allies. Prussia's victory brought about Austria's secession from the German Bund, and the unification of the N. German states in the N. German Confederation under B.'s chancellorship (1867). Napoleon III's alarm at this development enabled B. to manoeuvre him in 1870 into the Franco-Prussian War. The proclamation of the German Empire in 1871 and the annexation of Alsace-Lorraine crowned his work. As Imperial Chancellor he sought to secure the peace settlement by forming the Triple Alliance with Austria and Italy (1882). At home he became involved in conflicts with the R.C. Church, and with the Socialist movement, in both of which he was defeated. William II dismissed him in 1890.

BISMUTH. A reddish white metal. It occurs in nature in the native condition (i.e. as the free metal), although ores (i.e. compounds of B.) are also known. It is used chiefly as a medicine and cosmetic. Being heavy, B. subnitrate is used as a shadowing agent in radiography of the digestive tract. B. is also strongly diamagnetic, the electrical resistance varying with magnetic field.

BY'SON. Genus of wild cattle, represented by 2 species, one European (*Bison bonasus*) and one N. American (*Bison bison*). They are mainly brown, and have short horns and a mane on the head and neck.

The *European B.*, or *Wisent*, is the larger, standing 6 ft. high and weighing nearly a ton. It is almost extinct, being now represented by a few protected herds. The *American B.*, or buffalo, has a more extensive mane and more sloping hind quarters than the *European B.*, but its height seldom exceeds 5½ ft. It formerly roamed the prairies in vast herds, but was nearly exterminated by the Indians and European settlers. The few remaining are now protected in Canada and the Yellowstone Park, U.S.A. It will cross with cattle, the resultant hybrid, known as 'cattalo', being fertile.

BITLIS. Town in Asiatic Turkey, cap. of B. il, 25 m. S.W. of Lake Van. It was the scene of a massacre of Armenians in 1895. Pop. (1965) il, 140,847.

BITOLJ (bitöl). Town in S. Yugoslavia, 20 m. N. of the Greek frontier, noted for home-made mats and ropes. The Serbians captured it from the Turks in the Balkan War of 1912. Pop. (1961) 49,101.

BITTERN. Genus of birds (*Botaurus*) of the heron family (Ardeidae). The typical European species (*B. stellaris*) was formerly abundant in marshy country

in Britain and is now found, owing to protection, in the fens and elsewhere. It is a shy, solitary bird, smaller and more stoutly built than the heron, and its yellowish-brown plumage, streaked with black, renders it very inconspicuous. The male has a curious 'booming' cry. The smaller American species (*B. lentiginosus*) and the Little B. (*Ixobrychus minutus*) occasionally visit the British Isles.

BITTERSWEET. Name of a plant, the woody nightshade. See NIGHTSHADE.

BITU'MEN. An impure mixture of hydrocarbons, including such deposits as petroleum, asphalt, and natural gas, although sometimes the term is restricted to a soft kind of pitch resembling asphalt. Solid B. may have arisen as a residue left behind by the evaporation of petroleum. If evaporation took place from a pool or lake of petroleum the residue may form a pitch or asphalt lake like the famous asphalt lake of Trinidad. B. was used by the ancients as a mortar, and by the Egyptians for embalming.

BIZE'RTA. Mediterranean port in Tunisia, 37 m. N.W. of Tunis, most northerly town in Africa. It was founded by the Phoenicians. The French occupied it in 1881. Pop. (1966) 95,023.

BIZET (bêzeh'), Georges (1838-75), French composer. B. near Paris, he studied at the Paris Conservatoire and won the Grand Prix de Rome in 1857. On his return from Italy he became known as a pianist, and began to compose operas, among them *Les Pêcheurs de perles* (1863), *La jolie fille de Perth* (1867), and *Djamileh* (1872), which are still occasionally performed. He also wrote an overture to Sardou's play *Patrie*, and incidental music to Daudet's *L'Arlésienne*. The latter forms the material of two well-known orchestral suites. His operatic masterpiece *Carmen*, on a libretto founded on Prosper Mérimée's story, was produced a few months before his death in 1875.

BJÖRNEBORG. Swedish name of PORI.

BJÖRNSEN (byern'sen), Björnstjerne (1832-1910). Norwegian author. He became a journalist in Oslo, and made his name by the peasant-tale *Synnöve Solbakken* (1857) and the historical dramatic trilogy *Sigurd Slembe* (1862). B. directed the Bergen (1857-9) and Oslo (1865-7) playhouses, and advanced to realism in *The Newly Married Couple* (1865) and *A Bankruptcy* (1875). Later plays are *Leonarda* (1879) and *A Gauntlet* (1883), treating of sexual morality; the political *Paul Lange* and *Tora Parsberg* (1898), and *Beyond Human Power* (1883). He also wrote *Poems and Songs* (1870), and the novels *Flags are Flying in Town and Port* (1884), and *In God's Way* (1889). In 1903 he received a Nobel Prize.

BLACK, Davidson (1884-1934). Canadian anatomist. In 1927, when professor of anatomy at the Union Medical Coll., Peking, he unearthed the remains of Peking Man (q.v.), a very primitive type.

BLACK, JOSEPH (1728-99). Scottish physicist and chemist. B. at Bordeaux, of Scottish descent, he qualified as a doctor in Edinburgh. In chemistry he prepared the way for Cavendish, Priestley, and Lavoisier—and in physics, by his work on 'latent heat', he laid the foundation of the work of his pupil, James Watt.

BLACK-AND-TANS. Nickname of a specially raised force of military police employed by the British in 1920-1 to combat the Sinn Feiners in Ireland; the name was derived from the colours of the uniforms.

BLACKBERRY. Fruit of the bramble (*Rubus fruticosus*), a prickly shrub, closely allied to the raspberry. It is native to the northern parts of the Old World, is exceedingly abundant in Britain, and produces pink or white blossoms and edible black, compound fruit. Several varieties have been regarded as distinct species, e.g. the dewberry.

BLACKBIRD. British resident bird (*Turdus merula*) belonging to the thrush family (Turdidae). The male has coal-black plumage, set off by the yellow bill and eyelids; the hen is somewhat larger, her plumage is dark brown, and she has a dark beak. The eggs are pale sea-blue, freckled with reddish-brown, and there are 4 or 5 in a clutch. The B.'s song is rich and flute-like.

BLACKBUCK. An antelope (*Antilope cervicapra*) found in C. and N.W. India. It is related to the gazelles, from which it differs in having the horns spirally twisted. The males are black above and white

BELGRADE. Tree-lined Teraziji Street has a number of modern hotels, including the Moscow on the left and the Belgrade to the right.
Courtesy of Yugoslav National Tourist Office.

have included Georges Eekhoud (1854–1927), who wrote of *Flemish peasant life*; Émile Verhaeren and Maurice Maeterlinck (qq.v.).

The noted composer César Franck (1822–90) was of Belgian birth; Eugène Ysayë (1858–1931) was a famous violinist. Belgian painting has its roots in the Flemish Art (q.v.) of medieval and later times; best known modern painter is James Ensor (q.v.).

BELGRADE. Cap. of Yugoslavia and of Serbia, one of the federal reps. of Yugoslavia. At the junction of the Save with the Danube, the city is an important inland port and exchange centre. It was formerly defended by walls, and an old citadel still stands on a 200 ft. cliff. Except for brief intervals, it was in Turkish hands from 1501 to 1867; in 1878 it became the cap. of newly independent Serbia. Pop. (1961) 598,346.

BELISARIUS (c. 505–65). General under the emperor Justinian (q.v.).

BELITUNG. Island of Indonesia famous for its tin, discovered in 1759 and developed by the Dutch. The cap is Tanjongpandan. Area 1,850 sq. m.

BELIZE (beléz). Cap. and chief port of British Honduras, on the Caribbean Sea at the mouth of the B. river. In 1961 B. was wrecked by a hurricane and a new cap. 50 m. inland was begun in 1967. Pop. (1966) 38,482.

BELL. Alexander Graham (1847–1922). British inventor. B. in Edinburgh, he was ed. at the Univ. of Edinburgh and London, and in 1870 went 1st to Canada and then to the U.S. where he opened a school for teachers of the deaf in Boston in 1872, and in 1873 became prof. of vocal physiology at the univ. there. In 1876 he patented his invention of the telephone, and later experimented with a type of phonograph and in aeronautics.

BELL. Sir Charles (1774–1842). British surgeon. His greatest discovery, made in 1807, was of the sensory and motor nerves of the brain.

BELL. Gertrude Margaret Lowthian (1868–1926). British traveller, who from 1899 spent most of her time in the Near East. In 1913 she set out from Damascus to the interior of Arabia, and was the 1st European woman to arrive at Hall since Lady Anne Blunt in 1879. She worked in the British intelligence service during the F.W.W. For some years she exercised dominating influence as Oriental Secretary of the High Commissioner of Iraq, and to her Feisal largely owed his throne. Her *Letters* are famous.

BELL. Henry (1767–1830). Scottish steamship pioneer, who designed the *Comet*, a 40-foot steamship launched on the Clyde in 1812; it had a 3 h.p. engine and a speed of 7 m. an hour.

BELL. Instrument of hollowed metal struck to pro-

duce a musical sound. The oldest inscribed B. is that cast in 698 by Hirokuni Tsukishinenomura for the Myoshinji Temple, Kyoto. The earliest-dated English B. (1296) is at Cloughton, Lancs. The largest B. in the world is the Tsar Kolokol (King of bells) in the Kremlin, Moscow; cast in 1734 for Nicholas II, it weighs 220 tons and stands on the ground where it fell when being hung. Famous English Bs. are Great Paul in the clock tower of St. Paul's, the largest in England; Big Ben (q.v.); Great Peter at York and Great Tom at Oxford. The Peace B. at the U.N. headquarters in N.Y. was cast in Japan in 1952 from coins given by 64 countries, incl. a medal offered by the Pope.

BELLADONNA. Deadly nightshade (*Atropa belladonna*). The leaves, which contain the alkaloids hyoscyamine, atropine, hyoscyne, and belladonnine, are dried and powdered. The plant and all its preparations are highly poisonous.

BELLARMINE (bel'armin), Roberto Francesco Romolo (1542–1621). Italian theologian, cardinal, and controversialist. He taught at the Jesuit College in Rome, and became archbishop of Capua in 1602.

Disputationes de controversiis fidei christianae (1581–93) is his chief work. He was canonized in 1930.

Drinking jugs known as Bs., because bearing a caricature likeness of the cardinal, were originally designed by the Protestant party in the Netherlands.

BELLAY (belā), Joachim du (1522?–60). French poet and prose-writer, who pub. the great manifesto of the new school of French poetry, the Pléiade: *Défense et illustration de la langue française* (1549).

BELLFLOWER. A genus of plants (*Campanula*) incl. the harebell and the Canterbury Bell.

BELLINI (bel'ēnē). A family of Venetian artists. Jacopo B. (c. 1400–70) was founder of the Venetian School. Only 5 of his paintings – a 'Crucifixion' and 4 'Madonnas' – have survived. There are, however, 2 books containing his drawings – one in the British Museum, the other in the Louvre. His elder son, Gentile B. (c. 1429–1507), was a painter of great achievement and versatility. In 1474 he was commissioned to assist in the decoration of the Great Hall of Council in the Ducal Palace, and later he worked in the court of Mohammed II at Constantinople. A portrait of the Sultan is in the National Gallery,

BELL. A grand carillon of 53 bells for the National Episcopal Cathedral in Washington is seen here in the workshop of the founders at Loughborough, England, ready for testing. The largest has a diameter of 8 ft. 8 in. and weighs 11 tons and the smallest has a diameter of 7½ in. and weighs 15 lb.; the total weight is c. 60 tons. Each bell not only has all its harmonics in tune, but is in accurate tune with all the others in the carillon.

Courtesy of John Taylor & Company.

London. His other important works incl. paintings of processional groups in the Academy at Venice, the 'Adoration of the Magi' in the National Gallery, London, and 'St. Mark Preaching at Alexandria' (1505), in the Brera, Milan. His younger brother, Giovanni B. (c. 1430–1516), studied under his father. His early works show the influence of the Paduan School, particularly of his brother-in-law, Mantegna. He was one of the 1st painters to work in oil, and executed altarpieces. See **ITALIAN ART**.

BELLINI. Vincenzo (1801–35). Italian composer, of the operas *La Sonnambula*, *Norma*, etc.

BELLINZONA. Cap. of Ticino canton, Switzerland, on the Ticino, 10 m. from Lake Maggiore. It is the road and rail junction for the St. Gotthard pass. Pop. (1960) 13,435.

blood corpuscles, which stain the urine a reddish brown. It is widespread on the E. and W. coasts of Africa, and in other malarial districts.

BLACKWELL, Elizabeth (1821–1910). First British woman doctor, and first woman to gain medical degree anywhere. Taken to the U.S.A. at 11, she became a teacher and qualified as a doctor there in 1849, being admitted to the English medical register in 1859.

BLACK WIDOW. Popular name of a poisonous species of N. American spider (*Lathrodectus mactans*). It is not so deadly as fiction suggests.

BLACKWOOD, Algernon (1869–1951). British author. B. in Kent, he started writing in 1906 after experience as a farmer in Canada, and as a journalist with the N.Y. *Sun* and *Times*. His best books are *John Silence* (1908) and *Tales of the Uncanny and Supernatural*.

BLACKWOOD, William (1776–1834). Scottish founder-editor of *Blackwood's (Edinburgh) Magazine* (1817) and publisher. His son John Blackwood (1818–79) eventually succeeded him in both capacities, and was the 1st to encourage George Eliot (q.v.).

BLADDER. Hollow organ in which urine is accumulated. Situated in the pelvis, it is a round bag of muscle lined with mucous membrane. Urine enters the B. through 2 ureters, one leading from each kidney, and leaves it through the urethra; on emptying, the B. collapses in folds.

BLADDERWORT (-wort). Genus of carnivorous aquatic plants (*Utricularia*) of the family Lentibulariaceae, which feeds on small crustacea.

BLAGONRAVOV (blahgonrah'vof), Anatoly Arkadievich (1894–). Russian specialist in rocketry and instrumentation. B. at Ankov, he pub. in 1931 *Bases for Planning Automatic Weapons*, was awarded a Stalin prize in 1941 for his work on Soviet artillery and became head of the Soviet Academy of Artillery Science. He is believed to have directed the earth satellite programme leading to the launching of Sputnik I and II.

BLAKE, Robert (1599–1657). British admiral. He represented his native Bridgwater in the Short Parliament of 1640, and distinguished himself with the Parliamentary forces in defending Bristol (1643) and Taunton (1644–5). Appointed 'general-at-sea' (1649), he destroyed Prince Rupert's fleet off Cartagena in the next year. In 1652 he won several engagements against the Dutch before being defeated by Tromp off Dungeness, and revenged himself in 1653 by defeating the Dutchman off Portsmouth and the N. Foreland. In 1654 he bombarded Tunis, the stronghold of the Barbary corsairs, and in 1657 captured the Spanish treasure-fleet in Santa Cruz.

BLAKE, William (1757–1827). British poet and artist. B. in Soho, he was apprenticed to an engraver 1771–8, and studied at the Academy under Reynolds. The comparative simplicity of *Songs of Innocence*

(1789) and *Songs of Experience* (1794) was lost in the 'prophetic' books portraying through mythological figures the conflict of restrictive morality and anarchical liberty, e.g. *Book of Thel* (1789), *Marriage of Heaven and Hell* (1793), and *Song of Los* (1795), for all of which he engraved illustrations. He kept a print-shop in London (1784–7), and received commissions from booksellers and others, but after the failure of his exhibition in 1809, retired (1810–17), until

BLARNEY. When Dermot McCarthy refused to relinquish his castle to Elizabeth I, using one ingenious excuse after another, she angrily exclaimed 'More Blarney talk!' – and so the legend was born. The stone, itself unknown until the 18th century, is high in the battlements and to reach it the visitor must hang head downward. Courtesy of the Irish Tourist Board.

his final recognition in his last years. Later works include *Milton* (1803–8), the symbolic *Jerusalem* (1804–20), and the fragmentary *Everlasting Gospel*. His most celebrated illustrations are those to Young's *Night Thoughts*, Blair's *Grave*, the *Book of Job*, and Dante. Our illus. is a plaster cast of a life mask of 1823 made by J. S. Deville.

BLAMEY, Sir Thomas A. (1884–1951). Australian field-marshal. He was chief of the staff of the Australian Corps in 1918, and during the S.W.W. led the Australian Imperial Forces in the Middle East, becoming commander of the Allied Land Forces in the S.W. Pacific (1942–5).

BLANC (bloñ), Louis (1811–82). French socialist. In 1839 he founded the *Revue du progrès*, in which he pub. his *Organisation du travail*, advocating the establishment of co-operative workshops and other socialistic schemes. He was a member of the provisional government of 1848, and from its fall lived in England until 1871.

BLANCHARD (blonshahr'), Jean Pierre (1753–1809). French balloonist, who came to England to make the first balloon flight across the Channel with Dr. John Jeffries in 1785. He also made the first balloon flight in the U.S.A. in 1793. See **BALLOON**.

BLANE, Sir Gilbert (1749–1834). Scottish physician. He accompanied Admiral Rodney in the West Indies expedition of 1779, and by his advocacy of lime-juice as part of the men's diet was responsible for the elimination of scurvy.

BLANK VERSE. The unrhymed iambic pentameter or 10 syllable line of 5 stresses. Originated by the Italian Trissino, c. 1515, it was introduced to England by the Earl of Surrey, c. 1540, and developed by Marlowe. B. was used with increasing freedom by Shakespeare, Fletcher, Webster, and Middleton. It was remodelled by Milton, who was imitated in the 18th cent. by Thomson, Young, and Cowper, and revived in the early 19th cent. by Wordsworth, Shelley, and Keats, and later by Tennyson, Browning, and Swinburne. Modern exponents include Hardy, T. S. Eliot, and R. Frost.

BLANQUI (bloñkē'), Louis Auguste (1805–81). French revolutionary politician who spent 37 years in prison. He invented the theory of the 'dictatorship of the proletariat', taken over by Marx.

BLANTYRE. Parish in Scotland on the Lanarkshire coalfield. Here David Livingstone was born. Pop. c. 18,000.

14th cent. it was at the height of its prosperity, and medieval civilization was largely its creation. At the Reformation there were nearly 300 B. monasteries and nunneries in England, all of which were suppressed. The English novice house survived in France, and in the 19th cent. monks expelled from France removed to England and built abbeys at Downside, Ampleforth, and Woolhampton. The monks from Pierrequi-vive, who went over in 1882, rebuilt Buckfast Abbey in Devon on the ruins of a Cistercian monastery. Celebrated Benedictine monasteries in the U.S. are at Latrobe, Pennsylvania, and St. Meinrad, Indiana.

BENELUX. Name for the Belgium, Netherlands, LUXemburg customs union, agreed to by the exiled governments of those countries in 1944, and ratified by them after the war. Owing to post-war economic difficulties, it did not come into full effect until 1960.

BENES (ben'esh), Eduard (1884-1948). Czech statesman. A devoted pupil and friend of Thomas Masaryk, he followed him into exile in 1915, became sec. of the Czechoslovak national council in Paris, and in 1918 Min. of Foreign Affairs in the Czechoslovak govt. recognized by the Allies. He returned with Masaryk to Prague, and was For. Sec., playing a leading part in the Little Entente and League of Nations affairs until 1935, when he was elected Pres. of the rep. on Masaryk's retirement. After the Munich Conference he was compelled to resign through German pressure and left the country. He became leader of the Czechoslovak freedom movement in 1939 and set up a provisional Czechoslovak govt. in London. In 1945 he returned to Czechoslovakia, but ill-health and dislike of Communist measures led to his resignation on 7 June 1948.

BENET (benā'), Stephen Vincent (1898-1943). American writer, whose best-known work is *John Brown's Body* (1928), a poem dealing with the American Civil War.

BENEVENTO. Town in Campania, Italy, cap. of B. prov., 35 m. N.E. of Naples, with many ancient remains. Its 12th cent. cathedral was almost completely destroyed in the fighting in 1943. Pop. (1961) 54,744.

BENGAL (bengawl'). Former presidency and later prov. of British India at the head of the Bay of B., in the N.E. of the Indian peninsula. In 1947 the prov. was divided, W. Bengal going to India, E. Bengal to Pakistan.

In the north B. touched the Himalayas, but for the most part it consists of a vast alluvial plain which owes its existence to the silt brought down by the Ganges and Brahmaputra. The annual rainfall is 100 in. or more. The main crops are rice, jute in the plain, tea in the hills; jute manufacture is the most important industry. In W. Bengal there are iron smelting and steel rolling mills; but the great majority of the people all over B. is employed on the land.

EAST BENGAL. This, with the Sylhet division formerly in Assam, constitutes the prov. of E. Pakistan. See PAKISTAN.

WEST BENGAL. State of the Republic of India, area 33,829 sq. m. pop. (1961) 34,926,279. Adjoining its cap., Calcutta, is Howrah, chief jute manufacturing centre of India.

BENGHAZI (bengah'zē). Mediterranean seaport in N. Africa, joint cap. with Tripoli of Libya. It changed hands between Axis and British forces a number of times during the S.W.W. Pop. (est.) 80,000.

BENGUELA (beng'alā). Town on the coast of Angola, W. Africa, 20 m. S.W. of Lobito Bay. It has an airport and is the W. terminus of B. railway which links it with the central African lines. Pop. (1951) 14,693.

BEN GURION, David (1886-). Israeli statesman. B. in Plońsk, Poland, he settled in Palestine in 1906, but was exiled by the Turks as a Zionist in 1915. In America he became an organizer of the Jewish Legion in which he served under Allenby. He was chairman of

the Jewish Agency for Palestine 1935-48, and in 1948 proclaimed the independence of Israel. Leader of the Mapai (Labour) party, he was P.M. and Min. of Defence 1949-53 and 1955-63. He led a breakaway Labour Party (Rafi) 1965-7.

BENIN (benēn'). Town and airport of Nigeria, cap. of the Mid-Western state. Once centre of the kingdom of the Beni, noted for its well-organized but cruel govt. (human sacrifice by crucifixion was common), it was a slave-trading port, and made handsome brassware and ivory carvings. Pop. (est.) 54,000.

BENJAMIN. O.T. character, youngest son of Jacob and Rachel, and founder of the tribe of Israel which bore his name.

BENJAMIN, Arthur (1893-1960). Australian pianist and composer. B. at Brisbane, he taught composition at the R.C.M. from 1926, where Britten was one of his pupils. His works incl. *Jamaican Rumba* inspired by a visit to the W. Indies in 1937; operas such as *A Tale of Two Cities* (1953); and a harmonica concerto for Larry Adler.

BENJAMIN OF TUDELA (toodhā'lah) (d. 1173). Jewish rabbi and traveller. B. in Navarre, Spain, he was the author of a famous *Itinerary*, the first work to give an account of the Far East.

BENN, Anthony Wedgwood (1925-). British Labour politician. Elder surviving son of 1st visct. Stansgate, a Labour peer, he succeeded his father in 1960, but never used the title or took his seat in the Lords. He attempted renunciation in 1955 and 1960, and in 1963 was the first person to disclaim his title under the Peerage Act, when he re-entered the Commons. He was P.M.G. 1964-6, when he succeeded Cousins as Min. of Technology.

BENN, Gottfried (1886-1956). German expressionist poet. A doctor, he pub. his first poems *Morgue* in 1912, served in the F.W.W. and subsequently was attracted to the Nazi Party by their kindred belief to his own in the primitive. After the S.W.W. he returned to the forefront of German literature with *Statische Gedichte* (1948), an autobiography *Doppelbeben* (1950) and other works.

BENNETT, Donald (1910-). Australian air vice-marshal, known as Pathfinder Bennett. B. in Australia, he joined the R.A.A.F. in 1930 and in 1938 broke the world's long-distance seaplane record with a flight from Dundee to S. Africa. During the S.W.W. he helped develop Bomber Command's Pathfinder Force and the Atlantic Ferry organization.

BENNETT, (Enoch) Arnold (1867-1931). British novelist. B. at Hanley, Staffs, son of a solicitor in whose office he started work, he settled in London in

ARNOLD BENNETT
Courtesy of Wedgwood.

1893 as a journalist, becoming editor of *Woman* in 1896. His 1st successful novel was *The Grand Babylon Hotel* (1902), but his best books are those set among the 5 towns of the Potteries he knew so well, e.g. *Anna of the Five Towns* (1904), *Sacred and Profane Love* (1905), *The Old Wives' Tale* (1908) - his masterpiece, dealing with the lives of 2 sisters - and the trilogy *Clayhanger*, *Hilda Lessways* and *These Twain* (1910-15). Of his ventures into drama the more successful were *What the Public Wants* (1909) and *Milencourt* (1912; with E. Knoblock); a notable late novel is *Riceyman Steps* (1923). Our illus. shows the plaque in Wedgwood black basalt erected in 1962 in the main square of Burslem, heart of the 'Five Towns'.

BENNETT, Floyd (1890-1925). American aviator who accompanied Admiral Byrd on his flight to the N. Pole in 1926. He d. at Quebec from exposure

brain wounds, etc. The main causes of gradual B. are trachoma, onchocerciasis, smallpox, glaucoma and cataract.

The first institution for the blind was estab. in the 4th cent. A.D., by St. Basil at Caesarea in Cappadocia. In 1260 the king St. Louis founded an asylum for the blind in Paris, which still exists. Education of the blind was begun by Valentin Haüy, who pub. a book with raised lettering (1784), and founded a school. There are now approx. 10,000,000 blind people in the world incl. 650,000 children, and measures to help them and avoid the incidence of preventable B. are co-ordinated by the World Council for the Welfare of the Blind. The most highly developed system of blind welfare exists in Britain which has in the Royal National Institute for the Blind (founded by Dr. T. R. Armitage in 1868) the largest organization of its kind in the world; other large organizations are St. Dunstan's (founded by Sir Arthur Pearson in 1915) for the blinded of both World Wars; the National Library (estab. 1882) and the Guide Dogs for the Blind Assocn.

BLINDWORM or Slow Worm. Harmless species of lizard (*Anguis fragilis*), common in Europe and Britain. Superficially resembling a snake, it is distinguished by its small mouth and movable eyelids.

BLISS, Sir Arthur (1891–). British composer. B. in London, and ed. at Rugby and Pembroke College, Cambridge, he became Master of the Queen's Music in 1953. His music has a masculine individuality, and his works include *Colour Symphony* (1922), an experimental relation of tone and visual impressions; the ballets *Miracle in the Gorbals* (1944) and *Adam Zero* (1946); the opera *The Olympians* (1949); and dramatic film music, e.g. *Things to Come*.

BLISTER BEETLE. See CANTHARIDES.

BLITZKRIEG (Ger., lightning war). Name applied to a swift, shattering campaign, such as those of 1939–41, which resulted in the fall of Poland, France, Yugoslavia, and Greece, and the advance to Moscow.

BLITZSTEIN (blit'stĭn), Marc (1905–64). American composer. B. in Philadelphia, he appeared as a child prodigy pianist at the age of six. He served with the U.S. Army 8th Air Force 1942–5, for whom he wrote *The Airborne*, a choral symphony. His operas incl. *The Cradle Will Rock* (1937) and *Reuben Reuben* (1953).

BLOCH (blok), Ernest (1880–1959). American composer. B. in Geneva, of Jewish parentage, he went to the U.S. in 1916 and became founder-director of the Cleveland Institute of Music (1920–5). He later taught at the San Francisco Conservatoire and the Univ. of Berkeley. His works incl. the lyrical drama *Macbeth* (1910), 5 string quartets, and *Rhapsodie Hebraïque* (1951), and he often used themes based on Hebrew liturgical music and folk-song.

BLOCH, Felix (1905–). American physicist. B. in Zürich, he has been prof. of physics at Stanford Univ., U.S., from 1936, receiving a Nobel Prize jointly with E. M. Purcell in 1952, for his work on nuclear-magnetic precision measuring. In 1954–5 he was director-general of the Nuclear Research Centre at Geneva.

BLOCKADE. Obstruction of part of the coast of a belligerent by the ships of its opponent, so as to prevent any ships or aircraft having access to it. Before the F.W.W. such Bs. were maintained by vessels near the coast, but the development of mines and submarines made this impossible and a 'long distance' B. by cruiser 'cordon' was introduced to prevent access to Germany. In the S.W.W. the *Navicert System*

made goods or ships which might ultimately reach the enemy, whether by neutral or enemy ports, liable to seizure unless possessing the necessary certificate.

BLOEMFONTEIN (bloom'fontān). Cap. of the Orange Free State, and judicial cap. of the Union of S. Africa. It lies on a plateau at 4,568 ft. above sea-level, 200 m. N.W. of Durban. Founded in 1846, B. was taken by Lord Roberts in 1900 during the Boer War of 1899–1902. Here is the appellate division of the supreme court of the Union of S. Africa; and the

BLOEMFONTEIN. The Town Hall.
Courtesy of South Africa House.

Univ. of the Orange Free State. General Hertzog airport, opened 1958, with a runway 8,400 ft. long, lies 6 m. E.N.E. Last home of the Republican Volksraad, the Town Hall on Pres. Brand Street is used for the Provincial Assembly. Pop. (1960) 145,273 (63,046 white).

BLOIS (blwah). Chief town of Loir-et-Cher dept., France, on the Loire, 35 m. S.W. of Orléans. It has a castle dating from the 13th cent. and makes shoes, porcelain, furniture, etc. Pop. (1962) 36,426.

BLOK, Alexander Alexandrovich (1880–1921). Russian poet. He was influenced by Soloviev, and having pub. the mystic *Verses about the Beautiful Lady* (1904), became the foremost Russian symbolist. Later works are the lyrical plays *Puppet Show* (1907) and *The Rose and the Cross* (1913), and the revolutionary poems *The Twelve* and *The Scythians* (1918).

BLONDIN (blon'dān'), Charles. Name assumed by the French tight-rope-walker, Jean François Gravelet (1824–97). He became world-famous when he crossed Niagara Falls on a rope at a height of 160 ft. in 1859, repeating the feat several times – blindfolded, wheeling a barrow, etc. He later performed in England.

BLOOD. Red liquid circulating in the arteries, veins, and capillaries of the higher animals, and the corresponding fluid in those lesser animals which possess a circulatory system. In man c. a 20th part of the body weight, the temperature of B. in health is c. 37°C (98.4°F). It consists of a colourless, transparent liquid called plasma, containing microscopic cells of 3 varieties: (1) Red cells, which form nearly one half of the volume of the B. A cu. mm. of B. contains c. 5,000,000. Their colour, actually a pale yellow, is caused by haemoglobin, which takes oxygen from the air in the lungs, and yields it to the body tissues. (2) White cells of different kinds. A cu. mm. of B. contains only c. 7,500, but some of them have the power to eat up invading bacteria and so protect the body from disease (phagocytes); others repair injured tissues. (3) Cells called blood platelets, which are manufactured in the bone marrow, and assist in the clotting of B.

Invading disease germs cause the B. to generate 'antibodies', which resist them and give the person immunity to the disease for a time. B. cells constantly wear out and die, and are replaced from the bone marrow.

BLOOD, Col. Thomas (c. 1618–80). Irish adventurer, whose most daring exploit was an attempt to steal the Crown Jewels from the Tower (1671).

BLOOD GROUPS. In 1900 Karl Landsteiner discovered that when the serum of one person's blood was mixed with the red cells of another, agglutination of the red cells would follow. He, therefore, divided human beings into 3 different B.G.s., and 2 years later a 4th was discovered. The serum of group A agglutinates the cells of group B, and vice versa; the cells

tree native to the E. Indies. It has a fragrant smell, and is used in the preparation of cosmetics, perfumes, and incense.

BEN ZVI (zvë), Izhak (1884–1963). Israeli statesman. B. at Poltava, he was active in the Zionist movement in the Ukraine. In 1907, he went to Palestine and was deported together with Ben Gurion in 1915 and, like him, served in the Jewish Legion under General Allenby. In 1952 he succeeded Ben Gurion as pres. of Israel and was re-elected in 1957 and 1962.

BEOGRAD. Another form of BELGRADE.

BEOWULF (bā'ōwulf). Old English poem (composed c. 700), the only complete surviving example of Germanic folk-epic. It is extant in a single MS. copied c. 1000 in the Cottonian collection of the British Museum. The hero B. delivers the Danish king Hrothgar from the water-demon Grendel, and his monstrous mother, and, returning home, succeeds his cousin Heardred as king of the Geats. After 50 years' prosperity, he is killed in slaying a dragon.

BERANGER (behronzhēh'), Pierre Jean de (1780–1857). French poet, famous for his light satirical *chansons*, treating of love, wine, popular philosophy, and politics. Fined and imprisoned for his republican and Bonapartist views in 1821 and 1825, he was elected to the Constituent Assembly in 1848, but resigned after a few days. *Derniers chansons* and *Ma biographie* appeared in 1857.

BERBERA (ber'barah). Seaport of Somalia, N.E. Africa, with the only sheltered harbour on the S. side of the Gulf of Aden. British 1884–1960, it exports sheep, cattle products, ghee, frankincense, and myrrh. Pop. summer, 15,000; winter, 30,000.

BERBERS. A people of N. Africa, who since prehistoric times have inhabited Barbary, the Mediterranean coastlands from Egypt to the Atlantic. Their language is Berber, and about one-third of the Algerians and nearly two-thirds of the Moroccans speak it. B. customs are best preserved in the mountain communities, e.g. the Kabyles of Algeria, and the Rif of the Atlas ranges in Morocco.

BERCHTESGADEN (berkh'tesgah'den). Village in S.E. Bavaria, N. of the Königssee. It has rock-salt mines. Hitler's country residence, the Berghof, stood near by at the base of Obersalzberg, his private retreat at its top. B. was several times bombed by the Allies during the S.W.W., and was captured by U.S. troops on 4 May 1945. Pop. (1960) 5,000.

BERDIANSK. Older name of OSIPENKO.

BERDICHEV. Town of the Ukrainian S.S.R., U.S.S.R., 30 m. S.W. of Zhitomir, scene of bitter German-Russian battles in 1943–4. The town is a railway junction and commercial centre. Pop. (est.) 75,000.

BERDYAEV (berdyah'yef), Nikolai Alexandrovich (1874–1948). Russian philosopher. B. in Kiev, he often challenged official viewpoints and although appointed prof. of philosophy in 1919 at the univ. of Moscow, his defence of religion caused his exile in 1922. He based his ideas on Russian Orthodox Christian thought, and a conception of the operation of the spirit of God in history was their focal point. His books incl. *The Meaning of History* (1923) and *The Destiny of Man* (1935).

BERESFORD, John Davys (1873–1947). British novelist. Having practised as an architect for some years, he turned to literature in 1906 and achieved a remarkable success with the trilogy *Jacob Stahl*, *A Candidate for Truth* and *Gothings* (1911–13), in which the hero was an architect. Among his other works are: *The Hampshire Wonder* (1911), the story of a precocious boy who absorbed the contents of an encyclopaedia at one reading, and a number of books dealing with abnormal psychology, e.g. *If This Were True* (1944).

BERESFORD, William Carr, 1st visct. (1768–1854). British general, one of the most famous British

commanders in the Peninsular War. He reorganized the Portuguese army in 1809, and was in command at the battle of Albuera (1811).

BERET (ber'i). Round, flat cap or bonnet, originally worn by the Basques. During the S.W.W. maroon coloured Bs. were worn by the airborne troops (hence their name 'Red Devils'), black by the tank corps, green by the commando units, and blue by the R.A.F. Regiment.

BEREZNIKI. Town in the R.S.F.S.R., on the left bank of the Kama r., 90 m. N.N.E. of Perm. Formed in 1932 by the amalgamation of several older towns, it has giant chemical works based mainly on local salt and potash deposits. Pop. (1967) 134,000.

BERG, Alban (1885–1935). Austrian composer. B. at Vienna, he studied under Schönberg, and was associated with him as one of the leaders of the atonal school of composition. His most successful work was the opera *Wozzeck*, a grim story of working-class life, first produced in 1925.

BERGAMA. See PERGAMUM.

BERGAMO. City and episcopal see of Lombardy, cap. of B., prov. Italy, 27 m. N.E. of Milan. There is a textile industry, specializing in silks. Originating with paintings donated by Count Giacomo Carrara in 1796, the Accademia Carrara now contains one of the finest collections in N. Italy. Pop. (1961) 113,512.

BERGAMOT. Tree of the genus citrus (*C. bergamia*); from the rind of its fruit a fragrant orange-scented essence used as a perfume is obtained. The sole source of supply is southern Calabria, but the name comes from the town of Bergamo, in Lombardy.

BERGEN. Second largest city in Norway, on a deep sound sheltered by islands, about 100 m. N. of Stavanger. It is the westernmost port of Norway, with an airport, and has a great tourist traffic. There are shipbuilding yards and engineering works; fishing is important. Pop. (1967) 117,465.

BERGEN-OP-ZOOM (bergh'en-op-zōm'). Town in N. Brabant province, Netherlands, at the junction of the E. Scheldt and the Zoom, 32 m. E. of Flushing. There are anchovy and oyster fisheries, and large pottery works. Pop. (1967) 38,155.

BERGIUS (ber'gē-oos), Friedrich (1884–1949). German research chemist, who received the Nobel Prize for chemistry in 1931. He invented processes for converting coal into oil, and wood into sugar.

BERGMAN (bär'yman), Ingmar (1918–). Swedish theatre and film producer. B. at Uppsala, he was educated at Stockholm univ., and subsequently directed at the theatres of Helsingborg, Gothenburg and Malmö. From 1963 to 1966 he was Head of the Royal Dramatic Theatre, Stockholm. His films have an international reputation and incl. *Summer Interlude* (1950), *The Seventh Seal* (1956), and *Through a Glass Darkly* (1962).

BERGMAN (bergman), Ingrid (1917–). Swedish actress. B. in Stockholm, where she was trained at the school of the Royal Dramatic Theatre she is best known for her films, such as *Intermezzo* (1939), *Joan of Arc* (1948), *Anastasia* (1957), and *Goodbye Again* (1961). She m. in 1937 Dr. Peter Lindström, leaving him for the film producer Roberto Rossellini whom she m. in 1950, and in 1958 m. a Swedish impresario Lars Schmidt.

BERGSON (bergson), Henri (1859–1941). French philosopher. B. in Paris of Anglo-Jewish parentage, he became a naturalized French citizen. He was prof. of philosophy at the Collège de France (1900–21), and in 1928 was awarded the Nobel Prize for literature. Under the Pétain post. in the S.W.W. he refused exemption from certain anti-Jewish regulations, being unwilling to accept any privileged treatment.

For B. time, change, and development were the essence of reality and he considered that time was not a succession of distinct and separate instants, but a continuous process in which one period emerged

BLUEBIRD. A male alighting at its nest-hole, usually in a hollow tree, with food—often insects caught in the air, worms, larvae, fruit or seeds. Photo: G. Ronald Austing.

BLUECOAT BOYS. See **CHRIST'S HOSPITAL**.

BLUE GRASS. Dense, spreading grass which grows in clumps. The blue-tinged *Poa compressa* provides fine pasture for horses, and Kentucky, where it is abundant, is known as the B.G. state. Another species is totally green.

BLUE RIBAND. Term denoting the highest distinction in any particular sphere, derived from the B.R. of the Order of the Garter. The B.R. of the Turf is the Derby. The B.R. of the Atlantic is held by the vessel making the fastest crossing in both E. and W. directions: the *Queen Mary* 1938–52, and the *United States* from 1952. In 1935 an actual international trophy was presented by Harold K. Hales (1868–1942), but this was refused by the Cunard-White Star Co. and remained in abeyance until accepted by the *United States Lines* in 1952. It is awarded by an international committee.

BLUES. Type of popular jazz or rag-time music that consists of 3 lines of verse, the 2nd of which is a repetition, usually with variations, on the first, giving the singer time to improvise the last line. B. originated among the American Negroes, and the words are melancholy. Composers of B. include J. A. Carpenter, G. Gershwin, Milhaud, D. Ellington and W. C. Handy. Blues are primarily secular, e.g. the classic renderings of Bessie Smith (1894–1937), the religious equivalent being 'gospel' (Mahalia Jackson, q.v.), but a blending was achieved by blind, Georgia-born Ray Charles after the S.W.W., and from this in the 1960s developed 'soul', the raw, emotionalised joy and pain of daily living, as in the songs of Aretha Franklin (1942–).

BLUE STOCKING. Disparaging term for a learned woman. It originated c. 1750 in London with the literary gatherings of Mrs. Montagu, which were attended by Benjamin Stillingfleet, who wore unfashionable blue worsted stockings. Most famous of later B.Ss. is Hannah More.

BLUM, Léon (1872–1950). French Jewish statesman. He was converted to Socialism by the Dreyfus affair (1899), and in 1936 he became first Socialist Prime Minister of France. Again Premier for a few weeks in 1938, he was imprisoned in 1942 for his supposed responsibility for the fall of France, but released by the Allies in 1945. He was again Premier for a few weeks in 1946.

BLUNDEN, Edmund (1896–). English poet. B. in Kent, he served in France and Belgium in the F.W.W., and published the prose *Undertones of War* (1928). Ed. at Oxford, he returned there as fellow and tutor 1931–43, was professor of English at the Univ. of Hong Kong 1953–64, and prof. of poetry at Oxford 1966–68. His poetry is that of a countryman, shows

the influence of Clare, and besides 2 collected volumes incl. *A Hong Kong House* (1962).

BLUNT, Wilfred Scawen (1840–1922). British poet and traveller. In 1869 he m. Lady Anne Noel, Byron's granddaughter, with whom he travelled in Arabia, Syria, Persia, and Mesopotamia. Becoming a supporter of Arab aspirations, he sympathized with the Egyptian national movement in 1881–2, visited India twice, and tried to enter Parliament as an advocate of Irish Home Rule. He wrote many anti-imperialist books, and his poems (collected 1914) and prose diaries (1919–20) show vigorous individuality.

BLYTH. English seaport (bor.) in Northumberland, with coalmines and a shipping trade in coal. It is 12 m. N.E. of Newcastle upon Tyne. Pop. (1961) 35,933.

BOA. Name given to a family (Boidae) of non-poisonous snakes, natives of both hemispheres, and loosely to other large snakes which kill their prey by constriction, such as the python. Most common is the boa constrictor, which is found in tropical S. and C. America, reaches a length of 10 or 12 ft., and feeds on small animals and birds.

BOADICEA. See **BOUDICCA**.

BOAR, Wild. Name given to several members of the pig family. Best known are the Crested W.B. of India (*Sus cristatus*), and the European W.B. (*Sus scrofa*), from which the domesticated breeds derive. The darkish brown or grey coat is made up of coarse bristles overlying underwool. The W.B. is sturdily built, being c. 4½ ft. long and 3 ft. high, and possesses formidable tusks. Usually neither species is aggressive, roots and berries forming their chief diet.

BOATBILL. Bird (*Cancroma cochlearia*) of the heron family (Ardeidae), native to tropical America. It resembles the night heron, but is placed in a separate genus because of its broad, flattened bill.

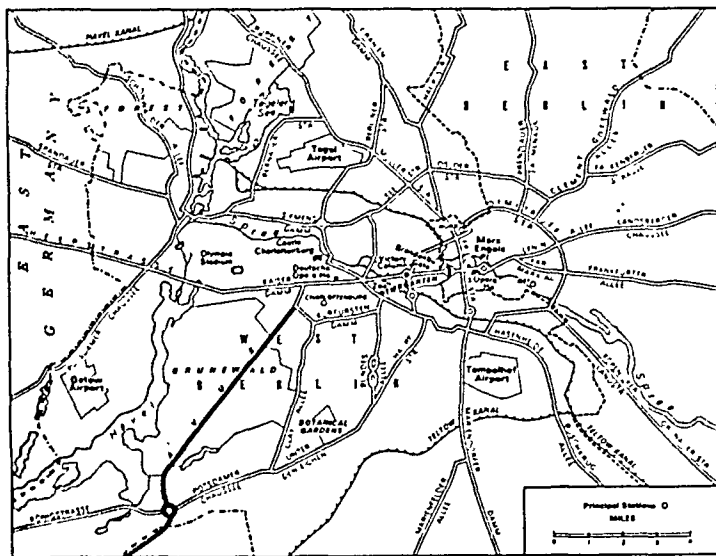

BOA CONSTRICTOR

BOAT RACE. Rowing race between Oxford and Cambridge Univ. crews. First held in 1829 at Henley, it has normally been held since 1845 during the Easter vacation on the Thames from Putney to Mortlake, on a course of just under 4½ m. Up to 1968 there were 114 races: Cambridge won 62, Oxford 51, and 1 was a dead heat.

BOBRUISK. Town in White Russia S.S.R., U.S.S.R.; on the Beresina, it is an important railway junction and a timber centre. Pop. (1967) 117,000.

BOCCACCIO (bok-kah'chò), Giovanni (1313–75). Italian poet. The son of a Florentine merchant, he came to Naples in 1328, where he abandoned trade for literature, and fell in love with the unfaithful 'Fiammetta', who inspired his early work. Before returning to Florence in 1341 he had written *Filostrato* and *Teseide* (used by Chaucer in his *Troilus and Criseyde* and *Knight's Tale*), etc. His great work is the *Decameron*, containing 100 stories told by 10 young people seeking refuge in the country from the plague: narrative skill and characterization compensate for their licentiousness, and Shakespeare, Chaucer, Dryden, and Keats were later indebted to them. B. was a friend of Petrarch, and sponsored Leon Pilatus' translation of Homer.

BOCCHERINI (bòkàr'e'nè), Luigi (1743–1805). Italian composer. Having studied in Rome, he was a great success in Paris in 1768, and held posts as court composer in Prussia and Spain. An outstanding 'cello player, he composed some 350 instrumental works, an opera, oratorios, etc.

BERLIN

Before the S.W.W. the life of B. centred in the inner city with the mile-long thoroughfare of Unter den Linden, running from the Brandenburg Gate to the Old Royal Palace, and near it the palaces of William I and Frederick III, the cathedral, the national gallery, opera house, and the univ. (founded 1810). On the N. side of the Unter den Linden stood the Royal Library, the Univ. Library, and the Academy of Sciences. Unter den Linden is crossed by the 2 m. long Friedrichstrasse, the principal shopping centre. Within the city is the Tempelhof airfield.

Throughout the S.W.W. B. was repeatedly bombed by British, U.S., and Russian planes. Many buildings of historical interest, all the ministries, many embassies, etc., were seriously damaged or destroyed by bombing from the air and in its devastating conquest by the Russian army 23 April–2 May 1945.

After the war, B. was divided into 4 sectors—British, U.S., French, and Russian—and until 1948 was under quadripartite govt. by the Allies; in that year the Russians withdrew from the combined board and created a separate municipal govt. in their sector. The other 3 sectors (W. B.) were made a Land of the Federal Rep. in May 1949, and in Oct. 1949 E. B. was proclaimed cap. of E. Germany. Pop. (1966) W. B., 2,185,400; E. B., 1,080,726.

BERLIN, Congress of, Congress of the European Powers held at Berlin in 1878 under the presidency of Bismarck, to determine the boundaries of the Balkan states after the Russo-Turkish war. Beaconsfield attended as Britain's chief envoy, and declared on his return to England that he had brought back peace with honour.

BERLIOZ (berli-ôz'), Hector (1803–69). French composer. He studied music at the Paris Conservatoire. His cantata, *La Mort de Sardanapale*, gained the *prix de Rome* in 1830, and he spent 2 years in Italy. In 1833 he m. Henrietta Smithson, an Irish actress playing Shakespearian parts in Paris, but there was a separation in 1840. After some years of poverty and public neglect, B. was invited by Schumann to Germany in 1842, and there conducted his own works with triumphant success. Subsequently he made successful visits to Austria, Russia, and England. In 1854 he m. Marie Recchio, a singer.

B. was the founder of modern orchestration. He wrote symphonic works such as *Symphonie fantastique* and *Romeo et Juliette*, built upon a literary or dramatic programme. His dramatic cantatas include *La damnée*.

tion de Faust and *L'enfance du Christ*, and his sacred music, a *Te Deum* and a *Requiem* in memory of the French soldiers killed in Algeria. He wrote 3 operas, *Béatrice et Bénédict*, *Benvenuto Cellini*, and *Les Troyens à Carthage*.

BERMU'DA. British colony consisting of more than 300 small islands and islets, of which only about 20 are inhabited, in the W. Atlantic, 580 m. E. of N. Carolina. The islands are composed of coral sand, and the entire chain, 22 m. long, is connected by bridges and causeways. Only a fraction of the area is cultivable, and B.'s largest industry is tourism. B.'s chief export is lily bulbs and blooms, the U.S. being the main importer. Hamilton is the chief town.

B. is named after Juan Bermudez, a Spaniard who visited the islands in 1515, and was settled by British colonists early in the 17th cent. During the S.W.W. sites were leased to the U.S.A. as naval and air bases. The colony is governed by a gov. with executive and legislative councils, and a house of assembly elected by universal suffrage. Area 21 sq. m. Civilian pop. (1966) 49,092.

BERNADETTE (bernahdet') (1844–79). French saint. B. at Lourdes in the French Pyrenees. In Feb. 1858 she had a vision of the Virgin Mary in the grotto of Massabielle, which was later opened to the public by command of Napoleon III. Many sick who were dipped in the water of a spring there were said to be cured. A church built on the rock above the grotto became a shrine of international celebrity. At the age of 20 B. became a nun at Nevers, and nursed the wounded in the Franco-Prussian War. She d. of tuberculosis.

BERNADOTTE, Count Folke (1895–1948). Nephew of the King of Sweden and president of the Swedish Red Cross. In 1945 he conveyed Himmler's offer of capitulation to the British and U.S. govts., and in 1948 was U.N. mediator in Palestine. He was assassinated by Stern Gang terrorists.

BERNADOTTE (bernahdot'), Jean-Baptiste Jules (1764–1844). Marshal in Napoleon's army who in 1818 became Charles XIV of Sweden. Hence, B. is the family name of the present royal house of Sweden.

BERNADETTE. The grotto where Bernadette found her visions. Candles burn beneath a statue of the Virgin and high on the rock to the left are the crutches left as a votive offering by those who have been cured.

temperature of the liquid no further, but converts it to vapour. The B.P. of water under normal pressure is 100°C. or 212°F. The lower the pressure the lower the B.P. and vice versa.

BOIS-LE-DUC (bwah-le-dük). French form of *'s Hertogenbosch*.

BOITO (bō-ē-tō), Arrigo (1842–1918). Italian poet and composer. He wrote the operas *Mefistofele* (1868) and *Nerone*, and the libretti for his friend Verdi's *Otello* and *Falstaff*.

BOKHARA. Another form of **BUKHARA**.

BOLDREWOOD (bōl'der-), Rolf (1826–1915). Pseudonym of the Australian writer Thomas Alexander Browne. B. in London, he was taken to Australia in 1830, where he became a pioneer squatter, etc., and until 1895 was police magistrate in the goldfields. His novels of adventure include *Robbery under Arms* (1888), and *Miner's Right* (1890).

BOLETUS. Genus of European fungi, resembling mushrooms, and belonging to the Basidiomycetes. *B. edulis* is edible, but some species are poisonous.

BOLEYN (bool'in), Anne (c. 1507–36). Second queen of Henry VIII. The daughter of Sir Thomas B., she was m. to the king in 1533, and in the same year became the mother of the future Queen Elizabeth. Accused of adultery and incest, she was beheaded.

BOLINGBROKE, Henry St. John, visct. (1678–1751). British statesman and philosopher. He entered parliament as a Tory in 1701, became Sec. of War (1704–8), and For. Sec. in Harley's ministry in 1710.

He was raised to the peerage in 1712, and in 1713 negotiated the Peace of Utrecht. He planned the restoration of the 'Old Pretender', and secured Harley's dismissal in 1714, but his plans were ruined by Anne's death only 5 days later and George I's peaceful succession, and he fled to France in 1715. Allowed to return in 1723, he worked for Walpole's downfall, but after 1739 lost all influence. His political writings, which influenced Disraeli, include *The Patriot King* and *Letters on the Study and Use of History*.

BOLÍVAR (bōlē'vahr), Simón (1783–1830). S. American soldier-statesman, known as the Liberator. B. in Venezuela, he joined the patriots working for Venezuelan independence, and was sent to Britain in 1810 as the representative of their govt. Forced to flee to Colombia in 1812, he joined the revolutionists there, and invaded Venezuela in 1813. A bloody civil war followed and in 1814 B. had to withdraw to Colombia, and eventually to the W. Indies, whence he raided the Spanish-American coasts. In 1817 he returned to Venezuela to set up a provisional govt., crossed into Colombia (1819), where he defeated the Spaniards, and returning to Angostura proclaimed the rep. of Colombia, comprising Venezuela, New Granada, and Quito (Ecuador), with himself as president. The independence of Venezuela was finally secured in 1821, and in 1822 B. liberated Ecuador. B. was invited to lead the Peruvian struggle in 1823; and final victory having been won by Sucre at Ayacucho in 1824, he turned his attention to framing a constitution. In 1825 the independence of Upper Peru was proclaimed, which adopted the name Bolivia in B.'s honour.

BOLIVIA. Land-locked rep. of S. America. The main chains of the Andes run through the W. part, enclosing a great tableland at an elevation of 12,000 ft.

in which lie Lake Titicaca (only part of which is in Bolivia) and Lake Poopo. This region, on account of its height, is cold; it is inhabited chiefly by Sierra Indians engaged in agriculture and mining. The temperate region is formed by valleys between 4,500 and 7,500 ft., where wheat and maize are grown. Towards the E. are hot plains, densely wooded and sparsely populated, but being increasingly developed for rice, sugar, and cotton. The chief rivers are head-streams of the Amazon.

The basis of B.'s economy since colonial times has been the mining industry; silver was formerly the principal product, but today tin occupies first place. In the S., at Sanandita and Camiri, petroleum is worked. The chief railway connects La Paz with Antofagasta, on the Pacific coast of Chile. About 1,000 m. of the Pan-American Highway are in B. Air transport is costly but useful in reaching remote parts.

La Paz, the seat of govt., is situated more than 12,000 ft. above sea-level; the official cap. is Sucre; other towns are Cochabamba, Oruro, Potosi, and Santa Cruz. The pop. is principally R.C., but the Church was disestablished 1961. The official language is Spanish; the Indians speak Quichua or other Indian languages.

History. Before the Spanish Conquest in the 16th cent., B. formed part of the Inca empire. Independence was achieved in 1825, and the country was named in honour of Simón Bolívar, whose lieutenant, Sucre, was the first President. Originally possessing a narrow Pacific coast line, B. lost this in 1883 after its defeat by Chile. B.'s political history is troubled: from 1880 Simon Patino, the 'mining king', was for many years dominant in the state; and there was a disastrous war in the Chaco between B. and Paraguay (1932–5), the boundary line being fixed by arbitration only in 1938. Under President German Busch (1937–9) the oil industry was nationalized, and under Villaroel (1943 to 1946, when he was lynched) important social and economic reforms were initiated. A constitution adopted in 1947 provided for a directly elected President, National Congress and Chamber of Deputies; the literacy test for the suffrage (open to men and women) was abolished in 1952. Area 424,000 sq. m.; pop. (1964) 4,334,121.

BOLLANDISTS. Body of Belgian Jesuits who edit the *Acta Sanctorum*, the standard collection of saints'

ANNE BOLEYN

Artist unknown, Photo: N.P.G.

BOLIVIA. Across Lake Titicaca the clear air enables mountains fifty miles away to be seen in detail. On the shore, alongside already completed craft, tortora reeds are piled ready for making into balsa rafts. Constructed in three days, they will last as many years, and are used by the Indians chiefly for punting in the shallow waters of the lake, though sometimes as sailboats.

Photo: Bell, Howarth Ltd.

BERNSTEIN. Noted for his versatility and ability to appeal to the popular as well as the 'classical' audience, Bernstein is a brilliant executant. He is also well known for his children's concerts. Photo: Godfrey MacDonnic.

N.Y. Philharmonic Orchestra, and has conducted other major orchestras throughout the world. His works incl. symphonies—*Jeremiah* (1942), *The Age of Anxiety* (1949); song cycles—*I Hate Music* (1943), *La Bonne Cuisine* (1949); and scores for musicals—*Wonderful Town* (1953) and *West Side Story* (1957).

BERRY. Family name of Viscount Camrose and Viscount Kemsley. See **KEMSLEY**, Lord.

BERSAGLIERI (bersahlyā'rē), (Ital., sharp-shooters). A corps d'élite in the Italian army, first raised in Sardinia in 1836.

BERSEKER. In Scandinavian myth the Bs. were warriors subject in battle to fits of insensate fury, during which they were immune to sword and flame—hence to 'go berserk'.

BERTHELOT (bertlō'), Marcellin Pierre Eugène (1827-1907). French chemist and politician. He became Min. of Public Instruction in 1886, and Foreign Min. in 1895. He investigated organic compounds and heat and wrote *Mécanique chimique*, etc.

BERTHIER (bertiā'), Alexandre (1753-1815). Marshal of France, he fought under Lafayette in America, and became one of Napoleon's most trusted generals. He came to terms with Louis XVIII after Napoleon's fall and retired to Bamberg, where he committed suicide or was assassinated.

BERTHOLD (bert'hold), (c. 1220-72). German Franciscan, whose missionary work led him through all upper and central Germany. His sermons contain important information about medieval life.

BERTHOLLET (bertolā'), Claude Louis (1748-1822). French chemist. With Lavoisier and others he undertook the revision of chemical nomenclature, and was the first to suggest chlorine gas as a bleaching agent. His chief work was *Essai de statique chimique*.

BERTILLON (bertē'yōn'), Alphonse (1853-1914). French criminologist, who became head of the Identification Dept. of the Préfecture of Police in Paris. He invented a system of identification of criminals by careful measurement of certain parts of the body which do not change after full growth.

BERTRAND (bertroñ'), Henri Gratien, count (1773-1844). French soldier, one of Napoleon's marshals. He went with Napoleon to Elba in 1814, served with him in the Waterloo campaign, and accompanied him to St. Helena. In 1840 he brought Napoleon's remains to Paris.

BERTRAND DE BORN (c. 1140-c. 1215). Provençal troubadour. He was viscount of Hautefort in Perigord, accompanied Richard Cœur de Lion to the Holy Land, and d. a monk.

BERWICK (ber'ik), James Fitzjames, duke of (1670-1734). French marshal. Natural son of the duke of York (afterwards James II of England) and Arabella Churchill, sister of the great duke of Marlborough, he was made duke of B. in 1687. After the revolution of 1688 he served under his father in Ireland, joined the French army, fought against William III and Marlborough, and in 1707 defeated the English at Almansa in Spain. He was killed at the siege of Philippsburg.

BERWICKSHIRE (ber'ik). Co. of S.E. Scotland, between the Lammermuir hills and the river Tweed, forming the boundary with England. It has a rocky and inhospitable coast, and includes the 3 districts of the Merse in the S., one of the richest plains in Scotland; Lammermuir, chiefly pastoral, to the N.W., with the hills of the same name, averaging 1,000 ft. in height; and Lauderdale, in the S.W. Its streams are tributaries of the Tweed. Two-thirds of the county is under cultivation, and fishing is an important industry.

The county town is Duns. Area 457 sq. m.; pop. (1961) 22,441.

BERWICK-UPON-TWEED (be'rik). Seaport and fishing town (bor.) of England, at the mouth of the Tweed, Northumberland, 3 m. S.E. of the Scottish border. Held alternately by the English and Scots for centuries, B. was in 1551 made a neutral town; it was attached to Northumberland in 1885. The Old Bridge (1611-34) over the Tweed, with 15 arches, remains, but was superseded in 1928 by the Royal Tweed Bridge in reinforced ferro-concrete which carries the Great North Road. The Royal Border railway bridge, constructed by Robert Stephenson, was opened in 1850. The town has iron foundries and shipbuilding yards, salmon and other fisheries. Pop. (1961) 12,166.

BERYL (ber'il). Species of precious stone; silicate of beryllium and aluminium. B. usually occurs as green hexagonal crystals sometimes of large size, found chiefly in granites and pegmatites; the dark green crystals are termed emeralds and the light blue-green aquamarines.

BERYLLIUM (Glucinum). Light silvery hard metallic element, at. wt. 9.013, at. no. 4, symbol Be, sp. gr. 1.84. Its chief uses are as a source of neutrons when bombarded; windows of X-ray tubes, being highly transparent; toughening copper for high-grade gear-wheels and spark-free tools; and as a neutron reflector, moderator, and uranium sheathing in nuclear reactors.

BERZELIUS, Jöns Jakob (1779-1848). Swedish chemist. In 1818 he was appointed secretary of the Stockholm Academy of Sciences. His special study was the determination of atomic and molecular weights, and his tables, pub. in 1818 and 1826, comprised more than 2,000 chemical substances. He invented the system of chemical symbols now in use, and discovered several elements.

BES. Egyptian god of recreation, music, and dancing, sometimes also associated with childbirth. He was usually represented as a grotesque dwarf wearing a crown of feathers.

BESANCON (bezoñsoñ'). Cap. of Doubs dept., France, 38 m. S.W. of Belfort, on the Doubs. The fortress, on a rock 387 ft. above the town, was fortified by Vauban. The Roman remains include an amphitheatre, aqueduct, and triumphal arch of Marcus Aurelius. B. has also an 11th and 12th cent. cathedral. Watchmaking is the principal industry. B. is a great route centre. Pop. (1962) 101,729.

BESANT (bez'ant), Annie (1847-1933). British theosophist. B. in London, née Wood, she m. in 1867 the Rev. Frank B., who obtained a separation in 1873. She became closely associated with Charles Bradlaugh (q.v.) and with the Fabian Society. About 1889 she came under the influence of Mme Blavatsky, and henceforth was an enthusiastic theosophist. She went to India, founded the central Hindu college at Benares, and in 1917 was president of the Hindu

A non-proliferation treaty was signed in 1968 by U.K., U.S.A., U.S.S.R. and 56 other countries, not incl. France and China.

BOMBAY. Former presidency, later prov., of British India. It lay along the W. coast of the peninsula between Kutch and Mysore, and when incorporated in the Dominion of India in 1947 was interspersed by a number of semi-independent princely states which had been absorbed into the prov. by 1950. The Kathiawar peninsula was excluded from the state of Bombay constituted within the Rep. of India in 1950; as reconstituted in 1956, Bombay state re-absorbed Kathiawar and had added to it some lands in the E., but lost the area S. roughly of a line from Kolhapur to Sholapur cities to the state of Mysore. In 1960 this state of B. was divided, on a linguistic basis, into the 2 new states of Gujarat and Maharashtra (qq.v.). The city of B. was cap. of the presidency, the prov. and the states of B.

BOMBAY. Cap. and chief port of Maharashtra state, Rep. of India. B. occupies the former B. Island, joined by reclamation to Salsette Island to the N., with suburbs spreading northwards on Salsette. The great harbour lies on the E. of the city, facing the mainland, here some 7 m. away. Prominent features are the waterfront Gateway built to commemorate the landing of George V in 1911, the Univ. (founded 1857), Victoria railway terminus, and the General Post Office.

B. handles much of India's trade, and is the centre of the cotton and textile industries: other activities include dyeing, tanning, metal-working, banking, shipping, and engineering.

B. was founded in the 13th cent., came under Mogul rule, was occupied by Portugal in 1530, and passed to Britain in 1662 as part of Catherine of Braganza's wedding dowry. Pop. of Greater B. (1961) 4,146,491; area 91 sq. m.

BOMBOIS (bombwah'), Camille (1883-). French painter. Son of a barge-owner, he worked as a farm

BOMBAY. The Flora Fountain strikes a welcome note of coolness in this typical fine wide thoroughfare. Occasionally loads are still carried peasant-style on the head, but most of the hurrying white-clad figures are modern-style office workers. Courtesy of High Commissioner for India.

labourer, and then joined a circus as a wrestler, later working as a navvy. He is self-taught and his circus scenes and landscapes have a naïvely attractive strength.

BONA. Another form of BONE.

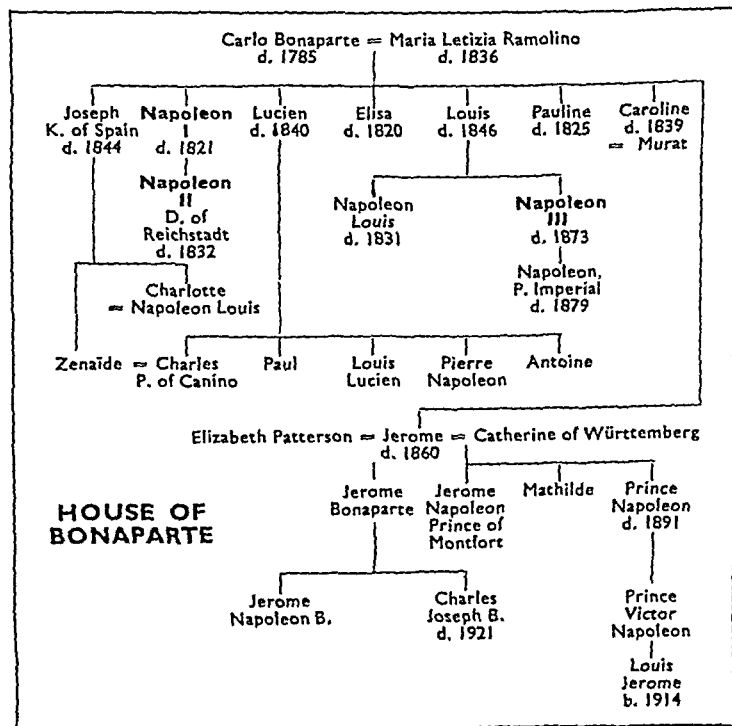

BONA FIDE (Lat. in good faith). Legal phrase signifying that a contract is undertaken without intentional misrepresentation.

BO'NAPARTE. Corsican family, originally of Italian origin, from whom Napoleon I (q.v.) was descended. Napoleon's father Carlo B. (1746-85), was a lawyer of Ajaccio, Corsica, and had a large family by his wife Letizia Ramolino (1750-1836), who joined Napoleon in Paris in 1799, and lived with him in Elba. Among their other children were Joseph B. (1768-1844), whom Napoleon made king of Naples in 1806, and of Spain (1808-13), and who fled to the U.S.A. on

Napoleon's final surrender; Lucien B. (1775-1840), whose masterly handling of the Council of Five Hundred on 10 Nov. 1799 helped to secure Napoleon's success; Louis B. (1778-1846), whom Napoleon made governor of Paris in 1805 and king of Holland 1806-10; his son Charles Louis Napoleon became emperor of the French as Napoleon III (q.v.); Caroline B. (1782-1839), who m. Joachim Murat (q.v.) in 1800; and Jerome B. (1784-1860), who became king of Westphalia in 1807, and under Napoleon III was made marshal of France and president of the Senate. A grandson of Jerome by his first wife, Elizabeth Patterson of Baltimore, was Charles Joseph B. (1851-1921), Attorney-General of U.S.A. in the Roosevelt cabinet 1906-9. Jerome's son by his 2nd wife, Catherine of Württemberg, Napoleon Joseph Charles (1822-91), known as 'Plon-Plon', held office under Napoleon III, and his grandson Louis Jerome (b. 1914) is the present Bonaparte 'pretender'.

BO'NAR, Horatius (1808-89). Scottish divine (Free Church), and author of many hymns, including 'I heard the voice of Jesus say'.

BONAVENTURA (bōnāhven-166'rah), St. (John of Fidenza) (1221-74). Italian R.C. theologian,

after the Restoration, he attracted the attention of Charles II, and was particularly famous in such parts as Hamlet and Othello.

BETTI, Ugo (1892–1953). Italian poet and dramatist. In daily life a magistrate, his clear-eyed view of things as they are is shot through with poetry. His best-known plays are *The Queen and the Rebels* (1949) and *The Burnt Flower-Bed* (1951).

BETTING. The staking of money, etc., on the result of some future event, generally of a sporting character, e.g. horse-racing, dog-racing, etc. In Britain only credit B. and B. on the course (whether by ready money or on the Tote, q.v., on approved courses on specified days) were formerly legal, but the B. and Gaming Act of 1960 legalized off-course cash B. and the establishment of B. offices licensed by local authorities, and in 1966 a B. duty (by 1968 5% of stake money) was imposed. Football 'pools' pay a 25% duty on the stake money, and by the Pool B. Act (1954) a company or person promoting such a business must register with the local authority to whom annual accounts are submitted. The amount of the money prizes is determined by the number of successful forecasts of the results of matches received by the promoter except in fixed odds B.

BETWS-Y-COED (betoos'-a-koid). Welsh village and tourist centre (U.D.) on the r. Conway, Caernarvonshire, in Snowdonia National Park. Pop. (1961) 778.

BETTY, William Henry West (1791–1874). British boy actor, called the 'Young Roscius', after the greatest comic actor of ancient Rome. First appearing in Belfast aged 11, he was enthusiastically received for 6 yrs, especially in Shakespeare. As an adult actor he was not remarkable.

BeV. Symbol for one billion electron volts or 10^9 electron volts.

BEVAN, Aneurin (1897–1960). British Labour politician. B. at Tredegar, Mon., the son of a miner, he entered the pit at 13, later becoming a miner's agent. In 1929 he became M.P. for Ebbw Vale, holding the seat for the rest of his life, and with the establishment of the weekly *Tribune* became prominent in Labour journalism. As Min. of Health 1945–51, he started post-war rehousing and inaugurated the Health Service, and was Min. of Labour Jan.–April 1951, resigning because his opinions increasingly diverged from official Labour policy. As leader of the 'Bevanites' he conducted lively skirmishes, but in Nov. 1956 became 'Shadow' Foreign Sec., having reached a working arrangement with Gaitskill. He was a superb orator. See LEE, JENNE.

BEVATRON. Massive apparatus for accelerating protons and other atomic particles. It is situated at the Radiation Laboratory of the Univ. of California, Berkeley, and was designed to produce 6BeV protons.

BEVERIDGE, William Henry, 1st baron (1879–1963). British administrator and economist. His active interest in social reform began with his sub-wardenship of Toynbee Hall in 1903. In 1908 he joined the Civil Service and acted as Lloyd George's lieutenant in the social legislation of the Liberal govt. before the F.W.W. He was at the Board of Trade until 1916, for most of the time as Director of the newly-established Labour Exchanges. Leaving the Civil Service in 1919, he was director of the London School of Economics until 1937 when he was Master of University Coll., Oxford (until 1944). He was chairman of the Committee on Social Insurance and Allied Services (1941), and practically all his recommendations for a unified and greatly improved system of Social Security were at once accepted in principle by the Churchill Govt. and embodied in later legislation. In 1944 he was elected Liberal M.P. for Berwick-upon-Tweed, but lost his seat in the general election of 1945. He had been knighted in 1919, and was created baron in

1946. His most influential book was *Full Employment in a Free Society* (1944).

BEVERLEY. Co. town (bor.) of E. Riding of Yorkshire, England, 8 m. N.N.W. of Hull. The minster was built in the 13th–15th cents. B. is an agricultural centre, and makes wire rope, motor accessories, agricultural implements, etc. Pop. (1961) 16,024.

BEVERLY HILLS. Residential city adjoining Los Angeles, California, U.S.A., mainly inhabited by film actors. Pop. (1960) 30,817.

BEVIN, Ernest (1881–1951). Labour statesman and Trade Unionist. B. at Winsford, Som., the son of a farm labourer, he worked on a farm as a boy, and was ed. chiefly at evening classes in Bristol. At 29 he became a trade union official, and was largely responsible for the creation of the Transport and General Workers' Union. In 1920, at an official enquiry into dock labour, he won the title of 'Dockers' K.C.'. From 1921 until 1940 he was gen. sec. of the T.G.W.U. In 1940 he was returned as Labour M.P. for Wandsworth, having been already appointed by Churchill Min. of Labour and National Service, and a member of the War Cabinet. He organized the system of choosing boys ('B. boys') of all classes by ballot to work in the mines. He was For. Sec. in the Labour Govt. of 1945, resigning owing to ill-health in 1951, when he became Lord Privy Seal.

BEWICK (bū'ik), Thomas (1753–1828). British artist. B. nr. Newcastle upon Tyne, where at 14 he was apprenticed to an engraver, his wood engravings of animal life are masterly, e.g. *British Birds* (1797–1804).

BEXHILL. English seaside resort (bor.) 5 m. W.S.W. of Hastings, Sussex. Here is the De la Warr Pavilion, built 1937. Pop. (1961) 28,926.

BEYROUT. Alternative form of BEIRUT.

BEZA (properly De Bèze), Théodore (1519–1605). French reformer. He settled at Geneva, where he attached himself to Calvin, and succeeded him in 1564 as head of the reformed church at Geneva, which post he resigned in 1600. He wrote in defence of the burning of Servetus (1554), translated the N.T. into Latin, and presented in 1581 a 5th cent. Graeco-Latin MS. of the Gospels and the Acts, the *Codex Bezae*, to Cambridge univ.

BÉZIERS (behziä'). Town in Hérault dept., S. France, on the Canal du Midi. It was a Roman station. Pop. (1962) 75,655.

BÉZIQUE (behsëk'; Fr. *bésigue*). Card game, supposed to have originated in Spain, and introduced into England in 1861. About 1869 it became very popular in the London clubs. *Rubicon B.* has a code of laws promulgated by the Portland Club in 1887.

BIHAGALPUR. Town in Bihar state, India, 120 m. E.S.E. of Patna. It has Jain temples, and makes silks. Pop. (1961) 143,994.

BIHAGAVAD-GITA (-gē'tah) (The Song of the Blessed). Religious and philosophical Sanskrit poem forming an episode in the 6th book of the Mahabharata, one of the 2 great Hindu epics. It is the supreme religious work of Hinduism.

BIHAMO (bhahmō'). Town in Burma, 30 m. S.W. of the nearest point of the Chinese frontier, 300 m. N.E. of Mandalay. It stands at the head of navigation of the Irrawaddy r. Pop. c. 10,000.

BIHARAT. Hindi name of INDIA.

BIHATGA'ON. Town in Nepal, 7 m. S.E. of Katmandu. It dates from the 9th cent., is a religious centre, and possesses a palace with golden doors. Pop. c. 85,000.

BHABE (bahvā), Acharya Vinoba (1895–). Indian leader. A disciple of Gandhi, he founded in 1931 the Bhoo-dan 'land gift' movement, in which wealthy people give land for the use of the poorer classes: 5 million acres have so far been given.

BHAYNAGAR. Seaport, railway terminus, and

Theban, and Salte, and the oldest copies belong to the 3rd millennium B.C.

BOOMERANG. Hand-thrown, curved, wooden missile used chiefly by Australian aborigines, usually 2-3 ft. long, and weighing about $\frac{1}{2}$ lb. One type returns after striking its objective, and a good thrower may achieve a 145 ft. return throw.

BOOLE, George (1815-64). British mathematician. Self-educated, he in 1847 pub. *The Mathematical Analysis of Logic* which estab. the basis of modern mathematical logic and was prof. at Queen's College, Cork, from 1849.

BOOT, Jesse. See TRENT.

BOOTH, Charles (1840-1916). British sociologist and shipowner. He conducted a remarkable investigation into the manner of living of the London poor, recorded in *Life and Labour of the People of London* (1891-1903). B. was also a pioneer in the old-age pensions movement.

BOOTH, John Wilkes (1839-65). American actor, who fired the shot which mortally wounded President Lincoln at Ford's Theatre, Washington, on April 14, 1865. B. escaped with a broken leg, and was shot dead in a barn in Virginia on his refusal to surrender.

BOOTH, William (1829-1912). 'General' of the Salvation Army. B. at Nottingham, the son of a builder, he experienced religious conversion at the age of 15. For some time he did open-air preaching for the local Methodists, and for some years was a full-time minister of the Methodist New Connexion, but in 1861 he became an itinerant evangelist. In 1865 he founded in Whitechapel the Christian Mission which in 1878 became the Salvation Army. In *Darkest England, and the Way Out* (1890) contained proposals for the physical and spiritual redemption of the great mass of 'down-and-outs'. His wife Catherine (1829-90) née Mumford, whom he m. in 1855, became a public preacher in c. 1860, initiating the ministry of women.

Their eldest son, **William Bramwell B.** (1856-1929) became chief of staff of the S.A. in 1880 and was General from 1912 until his deposition (1929). **Evangeline B.** (1865-1950), 7th child of General William B., was a prominent S.A. officer, and 1934-9 was General. She became a U.S. citizen.

BOOTHBY, Robert John Graham, baron (1900-). Scottish politician. Ed. at Eton and Magdalen Coll., Oxon, he became a Unionist M.P. in 1924 and was P.P.S. to Churchill 1926-9. An ardent advocate of Britain's entry into Europe, he was British delegate to the Consultative Assembly of the Council of Europe 1949-57. In 1953 he was created K.B.E. and a life peer in 1958. A rebel of radical tendencies, a superb speaker and a powerful personality in British politics, he has embodied his views in the autobiographical *I Fight to Live* (1947) and *My Yesterday, Your Tomorrow* (1962).

BOOTHE, Clare (1903-). American writer. B. in N.Y., she entered journalism, was managing editor of *Vanity Fair* (1933-4), and made a sensational success with her plays, espec. the mordant *The Women* (1936) and *Margin for Error* (1939); and the book *Europe in the Spring* (1940). A Republican, she was a member of Congress 1943-7, ambassador to Italy 1953-7, and ambassador designate to Brazil in 1959, when she resigned because of a political dispute over her appointment. She married 1935 Henry Robinson Luce (d. 1967), head of Time-Life Inc. until 1964.

LORD BOOTHBY

BOOTLE, English town (co. bor.) in Lancs, adjoining Liverpool, on the estuary of the Mersey. It has extensive docks, shipyards, foundries and factories, and was heavily bombed from the air by the Germans in 1941. It became a co. bor. in 1889. Pop. (1961) 82,829.

BOOTLEGGING. In the early days of U.S.A. the sale of intoxicating liquor to the Red Indians was prohibited but unscrupulous traders conveyed to them bottles of liquor hidden in the legs of their jack-boots. Thus originated the term B. which came into universal vogue during the period 1920-33 of nation-wide prohibition in the U.S.A.

BORAGE (bur'ij). A plant (*Borago officinalis*) cultivated in Britain and occasionally found wild. It has small blue flowers and rough hairy leaves.

BORAH, William Edgar (1865-1940). American Republican politician. B. in Illinois, he was a senator for Idaho from 1906. He is remembered as an arch-isolationist, one of those chiefly responsible for America's repudiation of the League of Nations.

BORAS (-os). Market town in Sweden, 45 m. E. of Gothenburg. Iron ore is mined, and artificial silk and textiles are manufactured. Pop. (1966) 69,443.

BORAX. Hydrated sodium borate, found as soft whitish crystals or incrustations on the shores of hot springs and lakes associated with recent volcanoes. Formerly much of the world's B. came from a salt lake in Tibet, but now it is largely derived from the mineral colemanite. B. is employed in glazing pottery and enamel ware, in calico printing, etc.

BORDEAUX. French city, seaport, and cap. of Gironde dept., on the Garonne, 60 m. from the sea. Situated in the fertile plain of Médoc, famous for its vineyards, B. is the port for S.W. France and the centre of the wine trade of the area. It has shipbuilding yards and food factories; a cathedral of the 12th-14th cents.; and a univ. founded in 1441. B. was under the English crown for 3 cents. until 1453. In 1914 and again in 1940 the French govt. was moved there in the face of German invasion. The Germans made it a submarine base, and it suffered heavy Allied air raids in 1944. Pop. (1962) 254,122.

BORDEN, Sir Robert Laird (1854-1937). Canadian Conservative statesman. B. at Grand Pré, he became one of Canada's leading barristers. From 1896 onwards he sat in the Canadian House of Commons; was leader of his party from 1901, and P.M. from 1911 until 1920.

BORE. A tidal wave which rushes up certain rivers with great violence, forming a wall of water stretching across the stream, sometimes with disastrous results to river craft. It occurs chiefly at spring tide in rivers with a funnel-shaped estuary quickly narrowing upstream so that the wave is steadily concentrated and attains a considerable height, e.g. the Severn B. and the very much larger Bs. on the Amazon and Yangtze-Kiang.

BORG OLIVIER (bawzh olivér), George (1911-). Maltese statesman. In 1950 he succeeded Dr. Mizzi as leader of the Nationalist party, and was P.M. 1950-5 and from 1962. He sought closer links with the Common Market and asked in 1962 for Malta's independence within the Commonwealth.

BORGES (bor'khes), Jorge Luis (1899-). Argentinian poet and author. Grandson of an Englishwoman, and the son of a lawyer, he was encouraged by his father to write, and headed a youthful anti-traditionalist (Ultra-iste) movement. Under Peron he was deprived of his post as librarian, but in 1961 became Director of the National Library, Buenos Aires, where he is also prof. of English literature at the univ. His reputation rests chiefly on his short stories, *Ficciones* (1962) being the 1st vol. to appear in translation. He is almost blind.

BORGIA (bor'jah). Cesare (1476-1507). Italian cardinal and ruler. Illegitimate son of Rodrigo B.,

text of the N.T. now consists of (1) papyri (2nd and 3rd cents.); (2) MSS. in capital or uncial writing, including the Codex Vaticanus and Codex Sinaiticus of the 4th cent.; (3) MSS. in minuscule writing (9th to 15th cent.). In addition there is the evidence of early translations, notably Jerome's Latin Vulgate (384-91).

English Translations. The 1st complete B. was produced by John Wycliffe (1380-2), from the Latin Vulgate. In 1525 Tyndale printed a version of the N.T., and in 1535 his disciple Coverdale pub. the first complete printed translation on the Continent (in England 1537). A revised version by Coverdale (the Great Bible), commissioned by Thomas Cromwell, was ordered to be placed in all churches in 1539. The Geneva Bible (complete 1560), prepared by the Protestant Marian exiles, was the first to adopt verse divisions and was not superseded until the A.V. of 1611 (subsequently revised: N.T. 1881, O.T. 1885, Apocrypha 1895).

For R.C. readers the Douai B. (N.T. 1582 and O.T. 1609-10) and the version by Mgr. Ronald A. Knox (N.T. 1945, O.T. 1949; also from the Vulgate) are approved, and the Jerusalem B. (from the original languages) planned to appear in 1966. Later Protestant versions are that of James Moffatt (1935), the American Rev. Standard Version (1946-57; modified for R.Cs. 1966), *Phillip's N.T. in Modern English* (1958), and the New English B. (N.T. 1961, O.T. 1964).

BIBLE SOCIETIES. Societies founded for the promotion of the translation and distribution of the Scriptures. The largest is the British and Foreign B.S., founded in 1804.

BIBLICAL CRITICISM. The subject is generally treated under 3 main headings: (1) *lower or textual C.*, which is directed to the recovery of the original text; (2) *higher or documentary C.*, which is concerned with questions of authorship, date, and literary sources; and (3) *historical C.*, which seeks to ascertain the actual historic content of the Bible, aided by archaeological discoveries and the ancient history of neighbouring peoples.

BICARBONATE OF SODA (NaHCO₃). A white crystalline compound more properly called sodium bicarbonate. It neutralizes acids and is used in medicine as an antacid. It is also used in baking powders and in effervescent drinks.

BICHAT (bêshah'), Marie François Xavier (1771-1802). French anatomist and physiologist. In 1800 he became physician at the Hospital at Lyons, and he is regarded as the chief founder of general anatomy.

BICYCLE. See CYCLING.

BIDAULT (bêdoh'), Georges (1899-). French statesman. Before the S.W.W. he made a reputation as a journalist, fought in the 1940 campaign and also in the resistance movement. As a leader of M.R.P., he held office as P.M. and For. Min. in a number of unstable administrations of 1944-54. As head of the *Organisation de l'Armée Secrète* from 1962, in succession to Salan, he left the country, but was allowed to return in 1968.

BIDFORD (bid'ford). English port (bor.) on the N. Devon coast, 8 m. S.W. of Barnstaple, on the estuary of the Torridge. B. had a large ocean-going trade in the Middle Ages, and is still used by ships of 500 tons; it makes boots, furniture, clothing, etc. Pop. (1961) 10,265.

BIL. German form of BILNEN.

BILFELD (bê'lefeld). Manufacturing town in N. Rhine-Westphalia, Germany, 34 m. E. of Münster, at the foot of the Teutoburger Wald. Pop. (1966) 170,624.

BILORUSSIA. See WHITE RUSSIA.

BILOSTOK. Russian form of BIALYSTOK.

BILNEN (byen'). Swiss town and lake in Berne canton, in the Jura mountains, 17 m. N.W. of Berne. The town stands at the N. end of Lake Bi., and is the centre of a watch-making industry. Pop. (1950) 10,900.

BIERCE (bîrs), Ambrose (Gwinnett) (1842-1916?). American author. B. in Ohio, he served with the Union army in the Civil War, and spent most of his life as a journalist in San Francisco. He established his reputation as a master of supernatural and psychological horror by his *Tales of Soldiers and Civilians* (1891), and *Can Such Things Be?* (1893). In 1913 he disappeared on a secret mission to Mexico.

BI'GAMY. The offence of marrying another person when one's husband or wife is still alive, and the marriage has neither been dissolved nor annulled. It is a good defence to a charge of B. to prove that the husband or wife of the person charged with the crime has been continually absent for the previous 7 years and has not been known to be alive within that time by the accused, or to prove that the accused genuinely believed on reasonable grounds that his or her husband or wife was dead, even though 7 years have not elapsed. Although a person proving any of these defences is not guilty of B., the second marriage will still be invalid. The maximum penalty for B. is 7 years' imprisonment. The position in the U.S. is similar.

BIG BEN. Bell in the clock tower of the Houses of Parliament, cast at the Whitechapel Bell Foundry in 1858, and popularly known as 'B.B.' after Sir Benjamin Hall, First Commissioner of Works at the time. It weighs 13½ tons.

BIGHORN. The Rocky Mountain sheep (*Ovis cervina*); a large sheep, with massive horns, which inhabits the Rockies from Mexico to Alaska.

BIHA'R. State of India, stretching across the Ganges valley from Nepal to Orissa. For the most part it is a flat and fertile plain, and densely populated. Rice, maize, wheat, jute, tobacco, etc., are grown, and some artificial irrigation has been developed. Coal is mined, and B. is India's richest iron-producing area, with iron and steel plants at Jamshedpur. Patna is the cap. Area 67,000 sq. m.; pop. (1961) 46,457,042.

BIJAPUR (bêjahpoor'). Ancient Indian city in Mysore state. Once the cap. of the Muslim kingdom of B., it has imposing buildings. Pop. (1961) 78,854.

BIKANER (bikanér'). City in Rajasthan, India, 170 m. N. of Jaipur. Once the cap. of the Rajput state of B., it has Jain monasteries and defensive walls. It makes leather goods, soap, electrical appliances, etc. Pop. (1961) 150,494.

BIKINI (bêkē'ni). Island and atoll in the Marshall Islands, Pacific. In the atoll in 1946 atomic bomb tests were carried out by the U.S.A. See BOMBS.

BILBAO (bilbah'ô). Cap. of Biscay prov. and an important port of N. Spain, 44 m. W. of Santander, on the r. Nervión. There are rich iron deposits near, and much iron ore is exported to S. Wales. B. also exports wine, lead, olive oil; and has large iron and steel works, chemical, cement and food factories. Pop. (1965) 359,407.

BILBERRY (Whortleberry, or Blaeberry). Plant (*Vaccinium myrtillus*) of the family Ericaceae closely resembling the cranberry, but distinguished by its bluish berries.

BILDERDIJK (bil'derdijk), Willem (1756-1831). Dutch poet. B. at Amsterdam, he became an advocate at The Hague, but was exiled in 1795 after the French invasion. Recalled in 1806, he became King's Librarian and President of the Royal Institute. His works include religious and love lyrics of great beauty, the didactic *Dissertation of the Learned* (1777), and the unfinished epic *De Ontlemping der Eerste Wereld* (1820).

BILE. A brownish fluid secreted by the liver, also called gall. B. is contained in a small pear-shaped bag on the under-surface of the liver called the gall-bladder, and plays an important part in the digestive processes of the intestines.

BILHARZIASIS. A group of diseases caused by small parasitic worms or flukes which may invade the body in tropical and sub-tropical countries. These

BORROW, George Henry (1803–81). British author and traveller. B. at E. Dereham, Norfolk, he was articled to a Norwich solicitor, but having studied many languages, including Romany, came to London in 1824 as a translator before taking to the life of a wanderer in 1827. He travelled on foot through England, France, Germany, Russia, Spain, and the East, and acted as agent for the British and Foreign Bible Society for several years. On his marriage in 1840, he settled to writing at Oulton Broad, Norfolk, and produced *Zincali* (1840), an account of the Spanish gypsies, and *The Bible in Spain* (1843). In 1844 he toured the Balkans, and then pub. *Lavengro* (1851), and its sequel, *The Romany Rye* (1857), mingling autobiographical and fictitious material. A later work, *Wild Wales* (1862), was the result of a visit to that country. His knowledge of languages and gypsy lore was wide though unscientific, and he was unrivalled in the creation of the atmosphere of the open road.

BORROWDALE. Famous beauty-spot in the Lake District of England, 5 m. S. of Keswick, Cumberland, stretching from Derwentwater to Scafell Pike.

BORSTAL. A reformatory system estab. in Britain under the Prevention of Crimes Act, 1908, for the purpose of retrieving young persons of both sexes who have started on a career of crime, and first put into practice in 1902 at Borstal prison near Rochester in Kent. B. Institutions vary in type and are classified as 'open' (e.g. North Sea Camp, Lincs. and Hollesley Bay Colony, Suffolk) and 'closed' (e.g. Borstal, Kent, and Feltham, Middlesex). From 1963 the minimum age of entry has been 15.

BO'ZOI (Russ. for 'swift'). Russian species of greyhound, first seen in England in 1842, and widely known since 1890. Height for dogs 29 in. upwards at shoulder; long-haired; colour, white with black and tan markings.

BOSANQUET (bō'zanket), Bernard (1848–1923). Philosopher; prof. of moral philosophy at St. Andrews 1903–8. In 1911 and 1912 he delivered his Gifford lectures on *Individuality and Value* at Edinburgh. He wrote on logic and metaphysics, aesthetics, Plato's philosophy, and *Philosophical Theory of the State* (1899).

BOSCAWEN (boskō'en, -kaw'en), Edward (1711–61). English admiral who saw much service against the French in the mid-18th cent. wars. To his men he was known as 'Old Dreadnought'.

BOSCH (bos), Jerom (c. 1460–1516). Dutch painter named from his birthplace, 's Hertogenbosch. His works, of a bizarre and grotesque style, were greatly admired by Philip II of Spain. His Christian name Jerom is often given its Latinized form Hieronymus.

BOSE, Sir Jagadis Chunder (1858–1937). Indian physicist. B. nr. Dacca, he was prof. of physical science at Calcutta 1885–1915, and studied plant-life, especially the growth and minute movements of plants, and their reaction to electrical stimuli. He was knighted in 1917.

BOSE, Satyendranath (1894–). Indian physicist, formerly prof. of physics at the Univ. of Calcutta. With Einstein, he formulated the B.-Einstein law of quantum mechanics.

BOSMAN, Herman Charles (1905–51). S. African writer. Sentenced to death as a youth for shooting his stepbrother, he was reprieved and while serving 4 years' hard labour began to write. *Mafeking Road* (1947) is his best vol. of stories, and concerns an Afrikaner community of the backveld.

BOSNIA-HERCEGOVINA (-hertsegō'vëna). Federal rep. of Yugoslavia, formed of the 2 provs. of B. and H. Sarajevo is the cap. Wild and mountainous with fertile valleys and forest lands in the E., it produces fruits, tobacco, wheat and other grains, pigs, cattle and sheep. Minerals incl. coal, iron, quicksilver; and there are steelworks and other

industrial plants. A number of the inhabitants are Moslems. Area 19,745 sq. m.; pop. (1961) 3,274,886.

Both B. and H. formed part of Roman Illyria; in the 7th cent. they were conquered by the Slavs. B. was an independent kingdom for a short time in the 14th cent. Part of the Turkish empire from 1463, B. and H., still nominally Turkish, were placed under Austrian administration in 1878. Austria annexed the area in 1908, and in 1918 it was made part of the new kingdom of the Serbs, Croats, and Slovenes (renamed Yugoslavia 1931).

BOSPORUS. Strait c. 17 m. long joining the Black Sea with the Sea of Marmara, and forming part of the water division between Europe and Asia. Istanbul stands on its W. side. In 1957 Turkey planned a bridge over the B.

BOSPORUS. Looking down on the strait over Istanbul's 5th cent. fortifications, from the Western (European) shore of the city to the Eastern (Asiatic) side. North of the city the Bosphorus forms the 4 m. long, natural harbour of the Golden Horn.

Courtesy of the Turkish Embassy.

BOSSUET (bosü-eh'), Jacques Bénigne (1627–1704). French R.C. divine, pulpit orator, and theologian. B. at Dijon, he became a canon at Metz, moved to Paris in 1659, and was appointed to the Chapel Royal in 1662. Here he won fame by his *Oraisons funèbres*, delivered at the funerals of certain great personages. Then he became tutor to the young Dauphin. Appointed bishop of Meaux in 1681, B. became involved in the Gallican controversy between Louis XIV and the pope and did his best to effect a compromise. His *Exposition de la foi catholique* (1670) and *Histoire des variations des églises protestantes* (1688) are brilliant essays.

BOSTON. Cap. of Massachusetts, U.S.A., at the mouth of the r. Charles where it enters Mass. Bay. B. is a cultural centre, and has been the home of many literary and political figures. The inhabitants, for the main part descendants of the original New England settlers, were long regarded as the aristocrats of the U.S.A., but Irish, Italian, Polish and Czech immigrants have modified the former Puritan basis of the population. There are many fine buildings and historical landmarks, including B. univ., the public library, and the Statehouse on Beacon Hill, overlooking the city. The Boston Symphony Orchestra is world-famous. The Charles is spanned by many bridges, including Harvard, leading to the famous univ.

The industries incl. book publishing and printing, rubber manufacture, shoemaking, confectionery, and machinery.

The site was settled in 1630, and was named after B. in England. The attempt of the British govt. to levy a tax on tea led to the 'Boston Tea Party', 1773, when citizens disguised as Red Indians boarded ships carrying tea and threw it into the harbour. Bunker Hill, which gives its name to the 1st battle of the

achieving a full line (horizontal and sometimes also diagonal), the player shouts 'Full House' or 'House', and may win a prize. Long known as a children's game (lotto), and played in the forces as 'housey-housey', it became a gambling craze in the 1960s in Britain, especially among housewives.

BINO'CULAR. An optical instrument for the viewing of an object with both eyes, e.g. field-glasses and opera-glasses. The first B. telescope was constructed by a Dutchman, J. Lippershey, in 1608, but interest then lapsed until 1823, when the Dutch binocular telescope was re-invented by a Viennese optician, J. Voigtlaender. Later development was largely due to E. Abbé, of Jena, who at the end of the last cent. designed prism Bs. that foreshadowed the instruments of today, in which not only magnification but stereoscopic effect is obtained.

BINO'MIAL. In algebra, an expression consisting of 2 terms, as $a + b$, $a - b$. The BINOMIAL THEOREM discovered by Newton and first pub. in 1676, is a formula whereby any power of a B. quantity may be found without performing the progressive multiplications.

BINTURONG. Small mammal (*Arctictis binturong*) with a shaggy coat, short muzzle, and tufted ears. The length of the head and body is about 2½ ft. and the long prehensile tail measures some 2 ft. The B. is black to greyish black, and is a native of S.E. Asia, ranging from Assam to the Philippines. It sleeps in trees during the day and feeds at night on fruit, eggs, and small animals.

BINYON, Laurence (1869–1943). British poet. B. at Lancaster, son of a clergyman, he became keeper of Prints and Drawings at the British Museum (1932–3), and pub. studies of English and Eastern art. His verse vols. incl. *Lyric Poems* (1894) and *London Visions*, but he is best remembered for his fine ode *For the Fallen* (1914).

BIO-BIO (bē'o-bē'o) (Araucanian 'much water'). Longest river of Chile, c. 230 m. from its source in the Andes to its 2 m. wide mouth on the Pacific. Once forming the boundary of Araucanian territory, it is navigable by flat-bottomed craft for about 100 m. and is crossed at Concepción, 6 m. E. of its mouth, by a bridge built by British engineers in 1890.

BIOCHEMISTRY. Science concerned with the chemistry of living material and processes, subdivided into the study of fats, proteins, carbohydrates, enzymes, etc. Two principal aspects of this subject are the static, dealing with chemical composition and structure; and the dynamic, dealing with the processes by which food is built up into living matter and then broken down to waste products.

BIOGENESIS (-jen'esis). Biological term coined in 1870 by T. H. Huxley to express the hypothesis that living matter always arises by the agency of pre-existing living matter. The opposite idea, that of spontaneous generation or abiogenesis, i.e. that living things may arise out of non-living matter, was generally held until comparatively recently, but evidence is inconclusive.

BIO'GRAPHY. The history of a person's life not written by himself. Among ancient biographers are Xenophon, Plutarch, Tacitus, Suetonius, and the authors of the Gospels. Medieval B. was devoted to religious edification and produced chronicles of saints and martyrs; among the Bs. of laymen are Einhard's *Charlemagne* and Asser's *Alfred*.

In England B. really begins with the early Tudor period and such works as Roper's *Sir Thomas More*. More frequent in the 17th cent., B. was established as an art by Johnson's *Lives of the Poets* and Boswell's *Johnson*. The 19th cent. is remarkable for such fine biographers as Southey, Lockhart, Moore, Mrs. Gaskell, J. Forster, G. H. Lewes, Morley, and Carlyle, but the general tendency was to irrelevant detail and the suppression of the more 'human' facts.

Lytton Strachey's *Eminent Victorians* opened the modern era of frankness, and the new development of the biographical novel was instituted by Maurois with his studies of Byron and Shelley. Orthodox 20th cent. writers include Churchill, John Buchan, David Cecil, Harold Nicolson, Aldous Huxley, Edith Sitwell, Una Pope-Hennessy, Carl Sandburg, Emil Ludwig, and Romain Rolland.

The earliest biographical dictionary in the modern sense was that of Pierre Bayle (1696), followed during the 19th cent. by the development of national Bs. on the Continent, and the foundation of the English Dictionary of National B. in 1882 and the Dictionary of American B. in 1928.

BIOLOGICAL SHIELD. Shield round a reactor to protect personnel from the effects of radiation.

BIOLOGY (bi-o'loji). The science of life. The word was first used by the German physician Treviranus in 1802, and was popularized by Lamarck. Strictly speaking, B. includes all the life sciences, e.g. anatomy and physiology, bacteriology, zoology and botany, ecology, genetics, biochemistry and biophysics, animal behaviour, embryology, and plant breeding.

Medical men, such as Hippocrates in the 5th cent. B.C., made the 1st accurate observations, describing medicinally useful plants and their properties, and Aristotle, in the 4th cent. laid the foundations of a philosophical approach. Attempts at a scientific physiology were bound to fail in the absence of scientific instruments, a tradition of experiment, and a body of organized knowledge with its own terminology. Galen, in the 1st cent. A.D., epitomized what was known of anatomy, but from A.D. 200 to 1200 no scientific advances were made, and only with the Renaissance did free enquiry again come into its own. The 16th cent. saw the production of encyclopaedias of natural history, such as that of Gesner (1516–65), and the beginnings of modern anatomy, notably at Padua under Vesalius (1514–64), who was succeeded by Fabricius. William Harvey, a student of the latter, laid the foundation of modern physiology by his work on the circulation of the blood. This was the first time that any basic function of the body had been scientifically explained, or that quantitative considerations were properly applied in B.

In the 17th cent. came the rise of scientific societies, such as Britain's Royal Society, and of scientific journals and museums. The use of alcohol for preserving specimens was a great step forward, but the outlook in B. was transformed by the introduction of the microscope (Malpighi, Grew, Swammerdam, and Leeuwenhoek were pioneers). Meanwhile, in addition to the complex world revealed by the microscope, explorers had been discovering myriads of new plants and animals and by the early 18th cent. it had become urgent to find a means of classification, and Linnaeus introduced a binomial system. Under this, the name was reduced to 2 Latin or Latinized words—the 1st for the genus, or group of similar species, the 2nd for the individual species: later a 3rd or sub-specific name was added to distinguish differing geographical sub-groups.

In modern B. evolution (q.v.) is the guiding principle and this cent. has seen an all-out attack on the central problem—the mechanism of cellular inheritance. The genetic apparatus in the nucleus of a cell determines the character of the other materials there, and so rules its entire activity. The relationship between the genetic material or DNA (deoxyribonucleic acid) and the vital protein materials was long thought to be governed by a 'genetic code' and in 1961 a team of scientists at the Cavendish Laboratory, Cambridge (incl. F. H. C. Crick and S. Brenner), succeeded in breaking it. These advances in cell study (cytology), have been greatly assisted by the development of the electron microscope, which uses a beam of electrons instead of a light beam. See also ANATOMY,

against Kruger. On the outbreak of the Boer War he commanded the Boers besieging Ladysmith, and in 1900 succeeded Joubert in command of the Transvaal forces. For 18 months he engaged in guerrilla warfare, but eventually welcomed the conclusion of peace. In 1907 B. became Premier of the Transvaal and in 1910 of the first Union govt. On the outbreak of war in 1914 he rallied S. Africa to the Commonwealth, suppressed the Boer revolt under de Wet and conquered German S.W. Africa. At Versailles in 1919 he represented S. Africa.

BOTHWELL, James Hepburn, 4th earl of (c. 1536–78). Scottish nobleman, who is alleged to have arranged the explosion which killed Darnley, husband of Mary Queen of Scots, in 1567. Tried and acquitted a few weeks later, he abducted Mary, and (having divorced his wife) married her on 15 May. A revolt ensued, and B. was forced to flee to Norway and thence to Sweden. In 1570 Mary obtained a divorce on the ground that she had been ravished by B. before marriage. Later, B. was confined in a castle in Zealand, where he d. insane.

BO- (abbr. of *Bodhi* 'wisdom' or 'enlightenment') **TREE**. Name given by Indian and Ceylonese Buddhists to the peepul or sacred wild fig (*Ficus religiosa*) under which Buddha (q.v.) was 'enlightened'. The B. planted c. 300 B.C. at Anuradhapura (q.v.) is still worshipped by pilgrims.

BOTSWANA. Country—formerly Bechuanaland—in S. Africa, lying between the Molopo on the S. and the Zambezi on the N., and S.W. Africa and the Transvaal on the W. and E. respectively. It came within the British sphere of influence in 1885, became a prot. in 1895, self-governing 1965, and in 1966 a rep. within the Commonwealth, as Botswana, with Sir Seretse Khama (q.v.) as pres. There is also a Nat. Assembly and advisory House of Chiefs. The cap. is Gaborone, pop. (1964) 18,000; the chief tribe is the Bamangwato, whose cap. is Serowe, pop. (1964) 34, 182. Cattle are reared and livestock and products exported; field crops are undependable owing to irregular rainfall; industrial diamonds, copper and nickel were discovered 1968. Education is chiefly in missionary hands and most of the people profess Christianity. Area 275, 000 sq.m.; pop. (1964) 543,105, incl. 3,921 Europeans.

BOTTICELLI (bottéchéllé), Sandro (1444–1510). Florentine artist, real name Filipepi, but his elder brother's nickname B. 'little barrel' was passed on to him. He studied under Filippo Lippi, and was patronized by the Medici family. His *Primavera* (about 1477) treats a theme from classical mythology

in a style which is both graceful and realistic. In 1481–2 he assisted with the decoration of the Sistine chapel in Rome. About 1494 he produced his illustrations of Dante. After the execution in 1498 of Savonarola, B. broke with the Medici, and his 'Calumny of Apelles' (1498) is said to express his detestation of those who calumniated Savonarola. His pictures became more sombre and religious, though his 'Madonna of the Magnificat' shows all the grace and colour of which B. was capable.

BOTTLE-NOSE WHALE (*Hyperoodon rostratus*). Species of whale inhabiting the N. Atlantic. It has a swollen head with short jaws that project like a beak in a manner somewhat resembling the shoulder and neck of a bottle. It is from 20 to 30 ft. long, and feeds on cuttle-fish. It is hunted mainly for its oil.

BO'TULISM. A frequently fatal type of food poisoning due to *Clostridium botulinum*, which excretes one of the most powerful toxins known.

BOUCHER (boosheh'), François (1703–70). French painter. B. in Paris, he became director of the Gobelins tapestry works in 1755, and 10 years later court painter. He is famous for his paintings of maidens, shepherds, cupids, etc. See illus. p. 862.

BOUCHER DE CRÉVECOEUR DE PERTHES (boosheh' de krävker' de pärt), Jacques (1788–1868). French geologist, whose discovery of Palaeolithic hand-axes in 1837 led him to promote the recognition of man's history as ante-dating the popularly accepted limit of 4000 B.C.: he was attacked by traditionalists.

BOUDICCA (boodik'a) (d. A.D. 62). Queen of the Iceni, often referred to by the Lat. form Boadicea (bô-adisêäh). Her husband, king Prasutagus, had been a tributary of the Romans, but on his death (A.D. 61), the territory of the Iceni was violently annexed, and B. was scourged and her daughters outraged. B. raised the whole of S.E. England in revolt, and before the main Roman armies could return from campaigning in Wales she burnt London and Colchester. Later the British were annihilated somewhere between London and Chester, and B. poisoned herself.

BOUDIN (boodin'), Eugene (1824–98). French painter, a fore-runner of Impressionism noted for his seascapes.

BOUGAINVILLE (boogainvél'), Louis Antoine de (1729–1811). French navigator. After service with the French in Canada during the Seven Years War he sailed round the world, 1766–9. Several islands are named after him, and also the climbing plant *Bougainvillea*, a genus of the family Nyctaginaceae, native of

BOTTICELLI. Brilliant colour, rich moulding of the figure and exquisitely precise detail mark the work of Botticelli, whose art was ill-appreciated until the later 19th cent. by the art critics. Particularly attractive is the delicately pensive expression of Venus as she watches over the sleeping Mars.
Photo: National Gallery.

elected Cons. M.P. for a Liverpool seat in 1906, and fiercely resisted Lloyd George's budget of 1909 and the Parliament Act of 1910–11. When Home Rule for Ireland became a burning topic of debate, 'F.E.' joined with Sir Edward Carson in organizing armed resistance in Ulster, his activities earning him the sobriquet of 'Galloper Smith'. In 1915 he became Solicitor-General, and later in the same year Attorney-General. He was Lord Chancellor 1919–22, and Sec. for India 1924–8, and received an earldom in 1922.

BIRKENHEAD. English seaport and industrial town (co. bor.) in Cheshire, on the Mersey estuary opposite Liverpool, and 4 m. from the sea. The first settlement grew up round a Benedictine priory; as late as 1818 B. was a village. In 1824 William Laird estab. a small shipbuilding yard there, and in 1829 the first iron vessel in England was laid down at B. Wallasey dock, first of a series covering 800 acres, was opened in 1847, the docks are under the control of the Mersey Docks and Harbour Board. William Laird's yard was succeeded by the huge yards of Cammell Laird Ltd. B. was made a co. bor. in 1888.

Communications with Liverpool are by rail (via the Mersey Tunnel, 1886), by passenger ferries, and by Queensway, a four-road tunnel $2\frac{1}{2}$ m. long, opened in 1934. In 1860 B. had the first street tramways in Europe. Pop. (1961) 141,683.

BIRKETT, Norman, 1st baron (1883–1962). British barrister and judge. He appeared with Sir Edward Marshall Hall (q.v.) in many cases, became a judge of the High Court and was knighted in 1941, and in 1950–7 was a Lord Justice of Appeal. He was the last of the great pleaders who dominated the legal scene early this century.

BIRMINGHAM, George A. Pseudonym of Irish novelist James Owen Hannay (1865–1950). Son of a Belfast vicar, he was himself canon of St. Patrick's Cathedral, Dublin, 1912–21, and successively rector of Wells from 1924 and of Holy Trinity, Kensington, from 1934. His novels incl. *Spanish Gold* (1908) and *Laura's Bishop* (1949), and his play *General John Regan* (1913) was very successful: under his own name he wrote religious works.

BIRMINGHAM. Second largest city (co. bor.) in the U.K., 100 m. N.W. of London, and falling mainly in Warwickshire, though several of its suburbs are in Worcs and Staffs. It is among the largest manufacturing centres in the world, the principal industry being metal-working. Articles produced incl. pins, needles, wire, nails, screws, small arms, buttons, ironmongery and hardware, machinery, bicycles, cars, and railway engines and carriages. There are also chemical, rayon, rubber, plastic, glass, jewellery, and food industries. B. is a canal and railway centre and has an airport at Elmdon to the S.W.

B. has 2 univs., the Univ. of B. (1900) and the Univ. of Aston in B. (1966), a School of Music, and a repertory theatre founded by Sir Barry Jackson (q.v.). Few of the city's main buildings are of great age: the Anglican cathedral of St. Philip (1711–19); the R.C. cathedral of St. Chad (1839–41) and St. Martin's parish church (13th cent.). The re-developed site of the Bull Ring was opened as one of Europe's finest shopping centres 1964.

Settlement here dates from Roman times, and the name B. is of Saxon origin. It became a metal-working centre in the 16th cent. B. was made a co. bor. in 1888, a city in 1889. Area 80 sq. m.; pop (1961) 1,105,651.

BIRMINGHAM. Largest city in Alabama, U.S.A., a port and an airport. Founded in 1871, it is an important iron- and coalfields, and manufactures iron and steel goods, textiles, chemicals, building materials, etc. Pop. (1960) 340,887.

BIROBIJAN (-jahn). Town in Kharabovsk Terr., R.S.F.S.R., on the Bira r., 100 m. W. of

Kharabovsk, cap. of the Jewish Autonomous Region 1928–51 (sometimes also called B.) of the R.S.F.S.R. It has sawmills and clothing factories. Pop. (1967) 46,000.

BIRTH CONTROL. See FAMILY PLANNING.

BISCAY, Bay of. Atlantic bay stretching between Point du Raz, France; Cape Ortegal, N. Spain; and Biarritz, S. France. It is roughly triangular in shape, the sides being about 400 m. long. At times the Bay is very rough, and it has exceptionally high tides.

BISCUIT. A crisp, flat cake, consisting of flour, sugar, and fat. Other ingredients are used to give variety of flavour – e.g. eggs, milk, coconut, almonds, and spices. Bs. contain only a low percentage of moisture. They are, therefore, a concentrated food, and their food value, c. 2,000 calories per pound, is high.

BISHOP (Gk. *episkopos*, an overseer). A clergyman consecrated for the spiritual government or direction of a diocese or see; as such a B. ranks below an archbishop and above priests and deacons.

In N.T. times there was no clear distinction between Bs. and elders, but with the growth in influence and numbers of the Church, the B. became an increasingly important figure. Originally Bs. were chosen by the people, but in time the power of election passed to the other bishops of the province, and next to the cathedral chapter, subject to the veto of the metropolitan, and later of the Pope. Today in some R.C. countries the political authority has secured the right of appointment to bishoprics, but in other countries the Pope nominates the Bs.

Since 1534 the appointment of Bs. of the C. of E. has been vested in the Crown. Theoretically the cathedral chapter make the nomination, but in practice the selection is made by the Prime Minister, usually on the advice of the archbishops. There are 29 dioceses in the province of Canterbury and 14 in the province of York, and there are many suffragan Bs., i.e. Bs. in charge of parts of dioceses. There are 6 Bs. of the Church in Wales, and many Bs. in the Anglican Church in the Commonwealth.

In the Eastern Orthodox Church a B. is always chosen from the monastic orders, since he must be unmarried. There are also Bs. in certain of the Lutheran churches, the Moravians, and in the Methodist Episcopal Church in the U.S.A.

BISHOP, Sir Henry Rowley (1786–1855). British opera composer, now remembered mainly for his song *Home, Sweet Home*.

BISHOP, William Avery (1894–1956). Canadian air ace. B. at Owen Sound, Ontario, he won the V.C. in 1917, was promoted Air Marshal in 1939 and as Director of the R.C.A.F. in the S.W.W. played an important part in the Empire training scheme.

BISHOP AUCKLAND. English market and colliery town (U.D.) in Durham, 8 m. S.S.W. of Durham. The palace is the seat of the bishops of Durham. Pop. (1961) 35,276.

BISHOP'S STORTFORD (stor'ford). English market town (U.D.) in Herts., 30 m. N.N.E. of London, on the Stort. It is an educational centre. Cecil Rhodes was b. here. Pop. (1961) 18,308.

BISKRA (bēs'krah). Oasis, town, resort, and military station in a valley of the Aures mountains, Algeria bordering the Sahara. Pop. c. 40,000.

BISLEY. English village in Surrey, 3 m. W.N.W. of Woking. The National Rifle Association moved its ranges here from Wimbledon in 1890. Many military and civil shooting events are held here regularly; and rifle club members can receive instruction.

BI'SMARCK, Otto Eduard Leopold, Prince von (1815–98). German statesman. The son of a Brandenburg landowner, he studied law and was employed for a time in the civil service. He entered the Prussian Landtag in 1847, and during the revolution of 1848–9

Spain, Naples, and ruled several Italian duchies; the name comes from Bourbon l'Archambault, chief town of the feudal lordship of Bourbonnais in central France. Antoine de B. became king of Navarre by marriage in 1554, and his son became king of France in 1589 as Henry IV. The last of the French line was Louis-Philippe, who abdicated in 1848. The present B. Pretender to the French throne is Henry, Count of Paris.

The Spanish Bs. are descended from Philippe, duke of Anjou, younger son of Louis Dauphin of France (d. 1711); he became Philip V of Spain in 1700. The last Spanish king, Alfonso XIII, lost his throne in 1931, and the present B. Spanish Pretender is his son, Prince Juan.

BOURBON. Name 1649–1815 of RÉUNION.

BOURBON, Charles, duke of (1490–1527). He was made Constable of France for his courage at the battle of Marignano, 1515. Later he served the emperor Charles V, and helped to drive the French from Italy. In 1526 he was made duke of Milan, and in 1527 allowed his troops to sack Rome. He was killed by a shot Cellini claimed to have fired.

BOURDALOUE (boordahloo'), Louis (1632–1704). French Jesuit, divine and pulpit orator. B. at Bourges, he preached in Paris from 1669, and his sermons were extremely popular.

BOURGEOIS (boorzwhah'), Léon Victor Auguste (1851–1925). French statesman. Entering politics as a Radical, he defeated Gen. Boulanger in 1888, in 1895 was Prime Minister, and later served in many cabinets. He was one of the pioneer advocates of the League of Nations. In 1920 he received the Nobel peace prize.

BOURGEOISIE (boorzwhahzē'). The middle classes. The Fr. word originally meant the freemen of a borough. Hence it came to mean the whole class between the workers and peasants, and the nobility. B. has also acquired a contemptuous sense, as implying commonplace, philistine respectability. By socialists it is applied to the whole propertied class, as distinct from the proletariat.

BOURGES (boorz). Historic French city, cap. of Cher dept., 125 m. S. of Paris. It has a Gothic cathedral and great art collections. B. is the seat of an archbishopric and an important literary and commercial centre. Pop. (1962) 63,479.

BOURGET (boorzheh'), Paul (1852–1935). French writer. B. at Amiens, he pub. some verse and then estab. his name as a critic with *Essais de psychologie contemporaine* (1883). His 1st novel, written in England, *L'Irréparable* (1884), dealt pessimistically with the psychological problems of the upper middle classes, as did its successors, incl. *Le Disciple* (1889) and the war novel *Le Démon du midi* (1914).

BOURGET (boorzheh'), Le. Civil and military aerodrome, 7 m. N.E. of Paris, estab. in 1914, the terminus of the London-Paris air service. Pop. (1962) 10,236.

BOURGUIBA (boor'gēbah), Habib ben Ali (1903–). Tunisian leader. Ed. at the Univ. of Paris, he became a journalist and was frequently imprisoned by the French for his nationalist aims as leader of the Néo-Destour party. He became P.M. in 1956, and Pres. and P.M. of the Tunisian Rep. in 1957.

BOURNEMOUTH. Popular English seaside resort (co. Dor.) on Hampshire coast, in the valley of the r. Bourne. Chines interrupt the line of cliffs. The town is famous for the high standard of its music, and for a good Art Gallery, in which are paintings by Turner, Corot, etc. Pop. (1961) 153,965.

BOURNVILLE. A suburb of Birmingham, England, consisting of a housing estate (c. 1,000 acres in extent with some 3,000 houses) owned and managed by the Bournville Village Trust, founded by George Cadbury in 1900.

BOUTS, Dierick (c. 1400–75). Dutch painter. B. at

Haarlem, he settled before 1448 at Louvain, where he executed his finest works such as the 'Last Supper' and the 'Martyrdom of St. Erasmus'.

BOVET (bōveh'), Daniel (1907–). Swiss-born physiologist, who became an Italian citizen in 1947. He pioneered research in the antihistamine drugs used to combat allergies, and in 1957 was awarded the Nobel prize for medicine, following his development of a synthetic form of curare (q.v.). In 1947–64 he worked at the Istituto Superiore di Sanità, Rome, becoming prof. of pharmacology Univ. of Sassari 1964.

BOW BELLS. The bells of St. Mary-le-Bow church, Cheapside, London; a person born within their sound is considered to be a true Cockney. The church was nearly destroyed by bombs in 1941. The bells, recast from the old metal, were restored in 1961.

BOWDLER (bowd'ler), Thomas (1754–1825). British editor whose prudishly expurgated versions of Shakespeare and other authors gave rise to the verb 'bowdlerize'.

BOWEN (bō'en), Elizabeth (1899–). British novelist. B. in Dublin, she followed her 1st vol. of short stories *Encounters* (1923), with *Look at all those Roses* (1941), *Demon Lover* (1945) and others. Her novels incl. *Friends and Relations* (1931), *The Death of the Heart* (1938), *The Heat of the Day* (1949), and *The Little Girls* (1964). *Bowen's Court* (1942) is the story of her home in co. Cork.

BOWEN, Marjorie. See LONG, M. G.

BOWER-BIRD. Family of Australian birds (Ptilonorhynchidae), nearly allied to the birds of paradise; the males construct decorated bowers or playgrounds of sticks, grasses, etc., in which they pay court to the females.

BOWLES, Chester (1901–). American administrator. B. at Springfield, Mass., he was ed. at Yale, and entered advertising and market research. He held varied govt. posts 1943–6, was ambassador to India 1951–3 and from 1963, and was influential, as chairman of the Democratic Platform Committee, in drafting Kennedy's campaign programme. He was Under-Sec. of State Jan.-Nov. 1961, adviser to the Pres. on African, Asian and Latin American Affairs 1961–3 and ambassador to India from 1963.

BOWLES, William Lisle (1762–1850). British poet. He pub. *Fourteen Sonnets* (1789), which influenced Wordsworth, Southey, and Coleridge.

BOWLS. Outdoor game played in England at least since the 13th cent. It is played on flat or crown greens with biased bowls of lignum vitae (4½–5½ in. in diameter), and the object of the game is to draw each bowl as near as possible to the small white jack.

BOURNEMOUTH. Golden sands along the bay, and double tides, make Bournemouth an ideal resort for the swimmer. Zig-zag paths give easy access to the beach. Courtesy of John Etches of Bournemouth.

beneath, whereas the females and young are fawn-coloured above. It is about $2\frac{1}{2}$ ft. in height.

BLACKBURN. English town (co. bor.) in Lancs, 20 m. N.W. of Manchester. It became famous in the 17th cent. for its weaving of cotton checks, later superseded by a cotton-and-linen fabric called Blackburn greys. Pre-eminently a cotton-weaving town, B. also makes machinery, especially for its own industries, and mines coal. The diocese of B. dates from 1926. The town was made a bor. in 1851, a co. bor. in 1888. Pop. (1961) 106,114.

BLACKCAP. See WARBLER.

BLACKCOCK. British resident game bird (*Lyrurus tetrix*), belonging to the grouse family (Tetraonidae). It is almost as big as a pheasant. The male is blue-black and has a lyre-shaped tail. The female or greyhen is closely barred with brown and black, with a short forked tail. Blackgame have longer wings than other game birds, and fly sometimes for 30 m. at a stretch. The nest is on the ground under herbage. Blackgame are numerous in Scotland.

BLACK COUNTRY. Part of the English Midlands, lying about and to the N. of Birmingham, including S. Staffs and part of Worcs and Warwicks. It is a region of factories, ironworks, and coalmines, claypits, railways, and canals. It got its name from the smoke belching out of the vast number of chimneys.

BLACK DEATH. Modern name (first used in England in the early 19th cent.) for the great epidemic of bubonic plague, which spread from China to devastate Europe in the 14th cent. It completely demoralized society, and it is estimated that one-third to one-half of the population of England succumbed in 1348-9. The disease remained endemic in London for the next 3 cents., the last great outbreak being that of 1665, when c. 100,000 of the 400,000 inhabitants d. See PLAGUE.

BLACK EARTH. Name applied to the exceedingly fertile soil which covers a belt of land in Europe and Asia, extending from Bohemia through Hungary, Rumania, S. Russia, and Siberia, as far as Manchuria. It is a kind of loess (q.v.), and was laid down when the great Eurasian inland ice sheet melted at the close of the last ice age.

BLACKETT, Patrick Maynard Stuart (1897-). British physicist. He worked with Rutherford at the Cavendish Laboratory 1923-33, and was successively prof. of physics at Manchester from 1937 and the Imperial College of Science, London, 1953-65. He was awarded a Nobel Prize in 1948 for work in cosmic radiation and his perfection of the Wilson 'cloud-chamber'. He was Pres. R.S. from 1965, and was awarded the O.M. in 1967.

BLACKFISH. Sea-fish (*Centrolophus niger*), of the family Stromateidae, native to European seas. Wholly black, it is esteemed as food.

BLACK FOREST. Wooded mountainous region 100 m. long in S.W. Germany, bounded on the W. and S. by the Rhine, which separates it from the Vosges, and covering an area of about 1,800 sq. m., which falls in Land Baden-Württemberg.

BLACKHEATH. English common which gives its name to a residential suburb of London partly in Greenwich, partly in Lewisham. Wat Tyler encamped on B. in 1381.

BLACK HOLE OF CALCUTTA. Dungeon at Fort William, Calcutta, W. Bengal, 18 ft. by 14 ft. 10 ins., into which on the night of 20 June 1756 were

BLACKBUCK

thrust, by order of Suraj-ud-Dowlah, nawab of Bengal, 146 British prisoners taken when he sacked the factory there of the East India Co. Only 23 survived the night. Doubt has been cast on the story; but even Indian historians have come to accept that it has a foundation in fact.

BLACKMAIL (Fr. *maille*, 'rent' paid in labour or base coin). Popular term for the criminal offence of demanding anything of value with menaces of violence and other injury, or of exposure of some misconduct on the part of the victim (whether actually committed by him or not).

BLACK MARKET. Illegal trade in food or other rationed goods, such as petrol and clothing, during the S.W.W. and after.

BLACKMORE, Richard Doddridge (1825-1900). British novelist, author of *Lorna Doone* (1869), a romance of Exmoor in the late 17th cent., and of *Maid of Sker* (1872) and *Springhaven* (1887).

BLACK MOUNTAINS. Group of hills in Breconshire, Wales, overlooking the Wye valley in the N. Waun Fâch is 2,660 ft. high. In 1966 a network of beautiful passages and caves was discovered beneath them.

BLACKPOOL. Famous English seaside resort (co. bor.) in Lancs, 28 m. N. of Liverpool. It possesses many amusement facilities, incl. promenades 7 m. long, fun fairs, and a tower 500 ft. high. It was made a bor. in 1876, a co. bor. in 1904. Pop. (1961) 152,133.

BLACK PRINCE. Name given to Edward (q.v.), Prince of Wales, eldest son of Edward III of England.

BLACK SEA. Inland sea in S.E. Europe, 164,000 sq. m. in area. It is linked to the N.E. with the Sea of Azov, and to the S.W. with the Sea of Marmara, and through the Dardanelles with the Mediterranean.

BLACKSNAKE. Non-poisonous snake (*Zamenis constrictor*), very common in the U.S.A. But in Australia the B. is *Pseudechis porphyriacus*, a highly poisonous species of the family Elapidae, allied to the cobra.

BLACKSTONE, Sir William (1723-80). British jurist, remembered for his *Commentaries on the Laws of England* (1765-9). Called to the Bar in 1746, he became professor of law at Oxford (1758), and a Justice of the Court of Common Pleas (1770).

BLACKTHORN, or Sloe. Tree (*Prunus spinosa*) of the family Rosaceae, closely allied to the plum, and producing a cloud of white blossom on black, leafless boughs in early spring.

BLACKWATER FEVER. Form of subtertian malaria, characterized by the breakdown of the red

BLACK FOREST. In the south of the Black Forest, at Aeule, overlooking the Schluchsee, this farmhouse in traditional style and the delightful costume of its inhabitants are typical of this extremely beautiful part of Germany.

Courtesy of the German Tourist Information Bureau

and ventrally, and are fixed to stones, corals, etc., by means of a stalk. The shell has something of the appearance of an ancient lamp. Some of the earliest fossils known belong to the B.

BRACKEN. Species of fern (*Pteris aquilina*), abundant in most parts of Europe. It has a perennial root-stock, which throws up large fronds.

BRACON, Henry de (d. 1268). English judge, writer on English law, and chancellor of Exeter cathedral from 1264. He compiled an account of the laws and customs of the English, the first of its kind.

BRADBURY, Ray (1920-). American writer. B. at Waukegan, Illinois, he advanced from pulp magazine stories to science fiction on a serious level, with its basis in developments of existing inventions and mental attitudes: *The Martian Chronicles* (1950) and *Something Wicked This Way Comes* (1962).

BRADDON, Mary Elizabeth (1837-1915). English novelist, author of the sensationally successful murder story *Lady Audley's Secret* (1862). She m. publisher John Maxwell in 1874, and her son William Babington Maxwell (1876-1938) was also a popular novelist.

BRADFORD. English manufacturing and commercial city (co. bor.) of the W. Riding of Yorkshire, on the Brad 9 m. W. of Leeds. Since its first markets were granted in the 13th cent., B. has risen to be the world's leading wool-dealing centre and weaver of woollen fabrics. The first spinning factory was opened in 1798, and in 1825 came the power loom. There are many other industries. The cathedral is 15th cent.; the bishopric was created in 1919. The Exchange (1867) is the wool marketing centre. The Cartwright Memorial Hall (1904) contains the art gallery and museum. B. was made a co. borough in 1888, a city in 1897. The univ. (1965) originated in the technical coll. founded 1882. Pop. (1961) 295,768.

BRADFORD-ON-AVON. English town (U.D.) in Wilts, 6 m. S.E. of Bath. The Town Bridge has a chapel; the church of St. Lawrence is Saxon. Pop. (1961) 5,767.

BRADLAUGH (-law), Charles (1833-91). British freethinker and radical politician. He served in the army, was a lawyer's clerk, became well known on the platform and in journalism under the name of Iconoclast, and from 1860 ran the *National Reformer*. In 1880 he was elected Liberal M.P. for Northampton, but was not allowed to take his seat until 1886 as, being an atheist, he had expressed his unbelief in the efficacy of the oath and claimed to affirm instead.

BRADLEY, Francis Herbert (1846-1924). British philosopher. B. in Brecknock, he became a fellow of Merton Coll., Oxon, in 1870. In *Ethical Studies* (1876) and *Principles of Logic* (1883) he attacked the utilitarianism of J. S. Mill, and in *Appearance and Reality* (1893) and *Truth and Reality* (1914) he outlined his Neo-Hegelian doctrine of the universe as a single ultimate reality. His brother, Andrew Cecil B. (1851-1935), became professor of poetry at Oxford (1901-6). His *Shakespearean Tragedy* (1904) is a fine example of the philosophical and psychological approach to the dramatist.

BRADLEY, Henry (1845-1923). British philologist and lexicographer, b. at Manchester. He began work on the *Oxford English Dictionary* in 1883, became joint-editor in 1889, and in 1915 succeeded Sir James Murray as senior-editor. He wrote *The Making of English*.

BRADLEY, Omar Nelson (1893-). American general. In 1943 he commanded the 2nd U.S. Corps in Tunisia and Sicily, and in 1944 led the U.S. troops in the invasion of France. He was Chief of Staff U.S. Army 1948-9 and chairman of the Joint Chiefs of Staff 1949-53. He was appointed General of the Army in 1950.

BRADMAN, Sir Donald George (1908-). Australian cricketer, and formerly a stockbroker at Adelaide. B. in N.S.W. he played for Australia

1928-48 and was captain 1936-48. He has the highest aggregate score and greatest number of centuries in England v. Australia Test Matches.

BRAEMAR (brām-ahr'). District and village in Upper Deeside, Aberdeenshire, Scotland. Highland games are held here in August.

BRAGA (brah'gah). Portuguese city in Minho prov., 30 m. N.N.E. of Oporto. It is the seat of an archbishopric, the archbishop being primate of the Iberian peninsula. Pop. (1960) 40,977.

BRAGANÇA (brahgahn'sah). City in the N.E. corner of Portugal, the seat of a bishopric. It gave its name to the royal house of Portugal, whose members reigned 1640-1853; another branch were emperors of Brazil 1822-89. Pop. c. 7,500.

BRAEG, Sir William Henry (1862-1942). British physicist. B. in Cumberland, he was prof. of physics at Adelaide 1886-1908, Leeds 1909-15 and the Univ. of London from 1915. He was made K.B.E. in 1920, and received the O.M. in 1931. Apart from his numerous technical papers, he wrote many popular books incl. *The World of Sound* (1920) and *Concerning the Nature of Things* (1925). In 1915 he shared with his son Sir (William) Lawrence B. (1890-) a Nobel prize for physics for their research work on X-rays and crystal structure. B. in Adelaide, S. Australia, Sir Lawrence was Cavendish prof. of experimental physics at Cambridge 1938-53, and became Fullerton prof. of chemistry at the Royal Institution in 1953 and scientific director from 1954. He pub. many technical papers and books incl. *Atomic Structure of Minerals* (1937).

BRAHE (brah'e), Tycho (1546-1601). Danish astronomer. In 1576 Frederick II of Denmark gave him the island of Hven in the Sound, together with a pension. Here he erected the observatory of Uraniborg. In 1597 he quarrelled with the authorities, and eventually settled near Prague where Kepler became his assistant.

BRAHMA. In Hinduism, the Supreme Being, or Universal Soul, the Absolute, self-existing and eternal. When referred to in the masculine he is the creator who forms with Vishnu and Siva the 'Trimurti'.

BRAHMANISM. The earliest stage in the development of Hinduism (q.v.). Its sacred scriptures are the Vedas with their accompanying literature of comment and explanation known as Brahmanas, Aranyakas, and Upanishads.

BRAHMAPUTRA (-poot'ra). River in Asia which rises in the Himalayan glaciers as Tsang Po and runs for 900 m. through Tibet, to the mountain mass of Namcha Barwa. Turning S., as the Dihang, it enters India near Jido, and flows into the Assam valley near Sadiya. Now known as the B., it flows generally westward until shortly after reaching E. Pakistan it turns S. and divides into the B. proper, without much water, and the main stream, the Jamuna, which joins the Padma arm of the Ganges at Goalunda. The r. (1,800 m. long) is navigable for 800 m. from the sea.

BRAHMA SAMAJ. Indian monotheistic religious movement, founded in 1830 in Calcutta by Ram Mohun Roy who attempted to recover the primitive simple worship of the Vedas and purify Hinduism. Under Debendra Nath Tagore and Keshub Chunder Sen the movement made considerable progress, and has continued to do so.

BRAHMS, Johannes (1833-97). German composer. B. at Hamburg, he attracted the attention of the great violinist Joachim in 1853 and was introduced by him to Liszt and Schumann. The latter in particular encouraged him. From 1872 B. made his home in Vienna. Though his music has many romantic qualities, it represents in essence a continuation of the classical tradition from the point to which Beethoven had brought it. As a composer of symphonic music and of songs, he is ranked with the greatest. Among his choral works the German

BLANTYRE. City in Central Africa, the principal commercial centre of Malawi, in the Shire highlands. It has an airport and was named after Livingstone's birthplace. With Limbe it forms a municipality. Pop. (1966) 109,795.

BLARNEY. Small town with tweed mills in Co. Cork, Rep. of Ireland, 7 m. N.W. of Cork. High up in the wall of the 15th cent. castle is the *B. Stone*, reputed to give those kissing it wonderfully persuasive speech. Pop. c. 1000.

BLASIS (blahsē), Carlo (1803–78). Italian *maitre de ballet* of French extraction. He had a successful career as a dancer in Paris and in Milan, where he established a famous dancing school (1837).

BLASPHEMY (Gk. *blasphemia*, evil speaking). Written or spoken insult directed against God, Christianity, or the Church, religious beliefs or sacred things, with deliberate intent to outrage belief. B. is still an offence in English law.

BLAST FURNACE. Furnace in which the temperature is raised by the injection of an air blast. It is employed in the extraction of metals from their ores, particularly pig-iron from iron ore. The principle has been known for thousands of years, but the modern B.F. is a heavy engineering development combining a number of special techniques.

BLATCHFORD, Robert (1851–1943). British journalist. He founded and edited the popular Socialist weekly *Clarion* (1891–1910), and his articles in the *Daily Mail* prior to the F.W.W., in which he pointed out the German menace, caused him to be denounced as a warmonger.

BLAVATSKY, Helena Petrovna (1831–91). Russian theosophist. *Née* Hahn, she m. as a girl Nicephore B., a councillor of state, but separated from him after a few months and travelled widely. While in Tibet (1856), she was supposed to have been initiated into theosophy. In 1873 she experimented in spiritualist phenomena in N.Y., where she founded the Theosophical Society (1875), and in 1877 pub. her controversial *Isis Unveiled*. In 1879 she went to India, where in Adyar she reorganized the Theosophical Society.

BLAYDON. English coal mining and industrial town (U.D.) in Durham, on the Tyne 4 m. W. of Newcastle. Pop. (1961) 30,615.

BLEACHING. Decolorization of coloured materials. B. processes have been known from antiquity, especially those acting through sunlight. Both natural and modern chemical colouring matters usually possess highly complex molecules, the colour property often being due only to a part of the molecule. B. chemicals usually attack only that small part, giving another substance similar in chemical structure but colourless. The 2 main types of B. agent are the oxidizing (which add oxygen and remove hydrogen, and include the ultra-violet rays in sunshine, hydrogen peroxide, and chlorine), and the reducing which add hydrogen or remove oxygen, e.g. sulphur dioxide.

BLEAK. Species of freshwater fish (*Alburnus lucidus*), of the carp family (Cyprinidae), found in the rivers of northern and central Europe.

BLEEDING. Loss of blood (haemorrhage) due to injury or disease. Sudden and copious B. may cause death in a few minutes, and even slight B. may endanger life if unchecked for a considerable time. External B. is treated by closing the blood vessels leading to the wound by means of a tourniquet in the case of a limb, or by pads if on the body; internal B. demands hospital treatment. General symptoms of B. are as in shock.

BLLENHEIM. German village in Bavaria on the left bank of the Danube, near which Marlborough defeated the French and Bavarians on 13 Aug. 1704. For *B. palace*, named after the battle, see **MARLBOROUGH**, duke of, and **VANBRUGH**, Sir John.

BLHENNY. Family of fishes of world-wide distri-

BUTTERFLY BLENNY

bution (Bleniidae), distinguished by spiny fins and smooth body, belonging to the order Percomorphi. The Smooth B. or Shanny (*Blenius pholis*) is the most familiar in Britain.

BLÉRIOT, Louis (1872–1936). French aviator. He constructed a monoplane, and in it made the first flight across the English Channel, 25 July 1909.

BLESBOK (*Damaliscus albifrons*). Species of brownish antelope, c. 3 ft. high, related to the hartebeest (q.v.). Only a few protected herds survive N. of the Orange River in S. Africa.

BLESSINGTON, Marguerite, countess of (1789–1849). Irish writer. She m. as her 2nd husband the earl of B. in 1818, but in later years damaged her reputation by her association with Count D'Orsay. A queen of literary society, she pub. *Conversations with Lord Byron* (1834), travel sketches, and novels. Her husband d. 1829 and, bankrupt by 1849, she fled London for Paris in D'Orsay's wake, and there d.

BLIGH, William (1754–1817). British admiral. He accompanied Capt. Cook in his 2nd voyage (1772–4), and in 1787 commanded H.M.S. *Bounty* on an expedition to the Pacific. On the return voyage the crew mutinied (1789), and cast B. adrift with 18 men in a boat. The mutineers settled in Tahiti and on Pitcairn Is., whilst B. brought his boat 3,618 m. to Timor Is., near Java. Appointed Governor of N.S.W. in 1805, his discipline again provoked a mutiny (1808), but on returning to England he was made an admiral in 1811.

BLIGHT. A number of diseases of cultivated plants, mainly caused by parasitic plants (e.g. fungi of the family Erysiphaceae, which produce a whitish appearance on leaf and stem surfaces), or insects (e.g. Aphidae or green fly).

BLIGHTY (Hindustani, *bilāyati*, foreign). Popular name during the F.W.W. among British troops for 'home' or England.

BLIMP. In the F.W.W., British lighter-than-air aircraft were divided into A—rigid, and B—limp (i.e. without rigid internal framework). The barrage balloon is called a B. Low, the cartoonist, adopted the name for his famous character.

BLINDHEIM. Older form of **BLLENHEIM**.

BLINDNESS. Absence of sight. Sudden B. is usually due to a general condition, such as hysteria (functional B.), sudden and severe internal bleeding,

BLINDNESS. India, with more than 2,000,000 blind people, has to adopt special methods to deal with the problem. The excellent Sitapur Eye Hospital in Uttar Pradesh, under the direction of Dr. H. L. Patney, is set up for 'assembly line' operations for cataract, glaucoma, squint, corneal grafts and so on.

WHO photo by T. S. Satyan.

Paris in 1904. Important in his work are the abstractions of animal and bird form, such as his bronze 'Bird in Space' (1919). In 1927 this was assessed by the American Customs as a piece of metal not a work of art and therefore dutiable; the claim caused controversy and was over-ruled in 1928. Rodin had an important influence on his work.

BRANDENBURG. Former Prussian and German prov. The area, then inhabited by Slavonic tribes, was conquered in the 12th cent. by Albert the Bear. Frederick of Hohenzollern became margrave in 1415, and an elector of the Holy Roman Empire; the Elector Frederick III achieved the crown of Prussia in 1701. Potsdam was the cap. When Germany was united in 1871, Brandenburg became one of its provs. That part of it E. of the Oder came under Polish administration, in accordance with the Potsdam agreement, in 1945; the remainder became a Land of (E.) Germany, abolished in 1952 when its boundaries were obliterated in the newly created administrative districts of Neubrandenburg, Potsdam, Frankfurt-an-der-Oder, and Kottbus.

BRANDENBURG. Town in (E.) Germany, on the r. Havel, 36 m. W. of Berlin. Seat of a bishopric 949–1544, it makes textiles, motor cars, aircraft, etc. It gave its name to the former prov. of B. Pop. (est.) 65,000.

BRANDES, Georg Morris Cohen (1842–1927). Danish critic. He was belatedly appointed prof. of aesthetics in his native Copenhagen in 1902, but had previously played a major part in the Scandinavian literary awakening, and encouraged Lagerlöf, Björnson, Ibsen and others.

BRANDT, Marlon (1924–). American actor. B. at Omaha, Nebraska, he studied at the Dramatic Workshop of the New School for Social Research, N.Y., and with Elia Kazan and Stella Adler. Best-known of the exponents of Method acting, his successes incl. *A Streetcar Named Desire* (both as film and play) and the films *The Wild One* and *The Fugitive Kind*.

BRANDT, Willy (1913–). German politician. He emigrated to Norway in 1933 as an anti-Nazi and anti-Communist, and was active in the resistance movement, resuming German citizenship 1947. Mayor of W. Berlin from 1957, he became chairman of the Social Democratic Party 1964, and in 1966 Vice-Chancellor and Min. of Foreign Affairs under Kiesinger.

BRANDY. A potable spirit obtained by the distillation of the fermented juice of grapes or other fruits. The best and only genuine B. comes from true wine-producing countries. The finished product contains from 40 to 70 per cent ethyl alcohol by volume.

BRANGWYN, Sir Frank (1867–1956). British artist. Of Welsh extraction, he was b. at Bruges, where his father was working as an ecclesiastical architect. His talent coming to the notice of William Morris, he worked for him as a textile designer, then travelled widely, developing a sense of colour and power of large-scale decorative concepts unusual in British artists and greatly appreciated on the Continent. In 1925 he completed 5 of a series of panels for the Royal Gallery of the House of Lords, but these were rejected after much controversy and now hang in the B. Hall, Swansea. In 1932 he was commissioned to work on panels for Radio City, N.Y. His gifts were varied and he produced furniture, pottery, carpets, schemes for interior decoration and architectural designs, as well as the more expected book illustrations, lithographs and etchings. There is a B. Museum (1936) at Bruges, and at Orange, Vaucluse (1947). He was knighted in 1941.

BRANTING, Karl Hjalmar (1860–1925). Swedish Socialist statesman. In 1897 he was the 1st Social Democrat to be elected to the Swedish Second Chamber. In 1920 he formed Sweden's 1st Social Democratic Ministry, and was again Prime Minister

in 1921 and 1924–5. In 1921 he was awarded the Nobel prize for peace.

BRANTÔME (brontôm'), Pierre de Bourdeille, Seigneur de (c. 1540–1614). French historian, who accompanied Mary Stuart to Scotland, served in Malta, Italy, Africa, and Hungary, and in the Huguenot wars. His *Mémoires* give a vivid picture of his time.

BRAQUE (brahk), Georges (1882–1963). French artist. B. at Argenteuil, he was associated with Picasso in introducing the Cubist movement in 1908. *Eliminating curved lines, he reduced the human figure, landscapes and everyday objects to geometrical shapes.* About 1912 he was also the main initiator of *papiers collés* in which oddments of paper, wood, etc., are glued to a canvas and incorporated in the picture. His later works are less deliberately geometrical, and are sometimes realistic. He also produced engravings and sculpture, and in 1953 finished 3 ceiling paintings for the Louvre.

BRASILIA. Cap. of Brazil (construction begun 1957, inaugurated 1960), in the state of Goiás, 600 m. N.W. of Rio de Janeiro and 3,000 ft. above sea-level. Juscelino Kubitschek de Oliveira, Brazilian President 1955–60, pushed through the idea, dating from 1823, of a completely new city bringing life to the interior. It was designed by Lucio Costa in the shape of a bent bow and arrow, and Oscar Niemeyer was chief architect. Pop. (1960) 141,172; it is planned to be c. 500,000.

BRASOV (brahshôv'). Rumanian town at the foot of the Transylvanian Alps, an important route centre, producing machine tools, industrial equipment, cement, and woollens, etc. It was called Urusul Stalin (Stalintown) 1948–56. Pop. (1966) 163,348.

BRASS. An alloy of copper and zinc, with not more than 5 or 6 per cent of other metals. The zinc content ranges from 20 to 45 per cent, and the colour of B. varies accordingly from coppery to whitish yellow. Bs. are characterized by the ease with which they may be worked into shape. They are strong and ductile, and resist many forms of corrosion. Usually they are classed into those that can be worked cold (up to 25 per cent zinc) and those which are better worked hot (about 40 per cent zinc).

BRASSICA. Genus of plants of the family Cruciferae. The best-known species is the common cabbage (*B. oleracea*) with its varieties broccoli, cauliflower, kale, brussels sprouts, etc.

BRATBY, John (1928–). British artist, popularly regarded as the leader of the 'kitchen-sink' school because of a preoccupation in early work with working-class domestic interiors. He has also pub.

BRASILIA. Among the many fine buildings of Brazil's new capital is the President's Palace, built 1960 to a design by Oscar Niemeyer. Courtesy of the Brazilian Information Service.

of group O will not agglutinate in contact with any serum; those of group AB will be agglutinated by serum from an A or B person. B.G.s. are of great importance in B. transfusion and may be of use in cases of disputed paternity. Sometimes another agglutinin is present in the B., the Rhesus factor. A woman who is Rh negative (lacking it), who becomes pregnant with a child who is Rh positive (possessing it), may in certain circumstances have developed antibodies which will pass into the blood stream of her child and kill it by destroying the red cells.

BLOODHOUND.

Ancient breed of dog. Black and tan in colour, it has long, pendulous ears, and distinctive wrinkles on the head. Its phenomenal powers of scent have been employed in tracking and criminal work from very early times.

BLOOD POISONING, or Toxaemia. Circulation of a dangerous quantity of poisonous substances in the blood. Such substances may be derived from outside, e.g. carbon monoxide and alcohol, but they are often due to toxins or poisons manufactured by invading microbes, e.g. the poisoning of a system from an abscess in the root of a tooth. When invading microbes penetrate the blood in large numbers and multiply the condition is known as septicaemia.

BLOOD PRESSURE, or tension, is due to the muscular action of the left side of the heart, which forces the blood out of the left ventricle into the arterial system, acting against the elastic muscular coats of the arteries, which tend to contract and to resist the passage of blood. B.P. is also modified by the degree of fluidity of the blood. It varies considerably, gives a valuable indication of the condition of a patient's health, and is measured in terms of the height in millimetres of the column of mercury which the blood will support. Persistent high B.P. shows disease of the arteries. A very high B.P., especially when the arteries are hard, brings with it a danger of apoplectic stroke, the bursting of an artery in the brain. A persistently low B.P. may be induced by certain diseases, general ill-health, etc.

BLOOD TESTS. Tests made to provide information of use to the doctor, and also to detect foreign substances such as poisons or alcohol in the blood. B.T.s. in commonest use are cell counts, determination of the time taken to coagulate, and the chemical measurement of the constituents of blood.

BLOOD TRANSFUSION. Injection of blood into the circulation in the treatment of conditions resulting from loss or impairment of blood, such as haemophilia, shock due to injury, poisoning by carbon monoxide, etc. The first human-to-human B.T. was made in 1818. Practically all B.T.s. are now made, not as formerly directly from donor to patient, but with stored blood (treated with sodium citrate to prevent clotting). Unless used within 3 or 4 weeks, the stored blood has its red cells removed, and the remaining liquid is reduced to powder. This dried plasma is kept for emergency use. During the S.W.W. Birmingham Univ. developed a blood plasma substitute, prepared by the large-scale fermentation of sugar.

BLOOM, Claire (1931-). British actress. B. in London, she made her reputation in Shakespearean roles such as Ophelia and Juliet. Her films incl. *Richard III* and *The Brothers Karamazov*. In 1959 she married the actor Rod Steiger.

BLOOM, Ursula. Maiden name of the authoress Mrs. Gower Robinson. Dau. of a country cleric, she took to writing in 1918 on the death of her 1st husband

2 years after their marriage. Besides more than 300 romances, she has produced several attractive vols. of reminiscences beginning with *Victorian Vinagrette* (1956), and a life of her father *Parson Extraordinary*.

BLOOMER, Amelia Jenks (1818-94). American dress reformer and supporter of temperance and women's rights. She advocated, c. 1849, the wearing of a short skirt with loose trousers gathered at the ankles, hence the name 'bloomers'.

BLOOMSBURY. Parish in W.C. London, England, between Gower Street and High Holborn. It contains London Univ. H.Q., the British Museum, and the Royal Academy of Dramatic Art. Following the F.W.W. B. was the home of a number of writers, artists, etc., and is popularly connected with a type of intellectual.

BLOW, John (1648-1708). English composer. He was organist at Westminster Abbey, wrote anthems and other church music, and a masque, *Venus and Adonis*.

BLOY (blwah), Léon-Marie (1846-1917). French author. He became a clerk in Paris in 1863. Converted to mystic Catholicism c. 1870, he achieved a considerable reputation by his literary lampoons, etc., by 1890. Indifferent to politics and philosophy, and believing in the imminence of the Kingdom of Heaven, he taught the need for sharing in Christ's suffering. He wrote biographies, the novels *La Femme pauvre* and *Le Désespéré* and revealing Journals.

BLÜCHER (blükh'er), Gebhard Leberecht von (1742-1819). Prussian general field marshal, popular as 'Marshal Forward'. He took an active part in the patriotic movement, and in the War of Liberation defeated the French as C.-in-C. at Leipzig (1813), crossed the Rhine to Paris (1814), and was made prince of Wahlstadt (Silesia). In 1815 he was defeated by Napoleon at Ligny, but shared with Wellington the triumph of Waterloo.

BLUE. A sporting honour at Oxford and Cambridge, awarded to students representing their univ. in some game or form of athletics. It consists of a strip of light or dark B. ribbon, and is said to have originated with the 2nd Oxford and Cambridge boat-race in 1836.

BLUEBEARD. 'Hero' of a popular tale, best known from Charles Perrault's version (c. 1697). He murdered 6 wives in turn, who disobeyed his command not to enter a locked room, but was himself slain before he could kill the 7th. In Brittany B. has been identified with Gilles de Rais.

BLUEBELL. Name given in Scotland to the harebell (*Campanula rotundifolia*), and in England to the wild hyacinth (*Endymion nutans*), belonging to the family Liliaceae.

BLUEBIRD. An American bird (*Sialia sialis*) affectionately regarded as the herald of spring. Slightly larger than a robin, it has a similar reddish breast, the upper plumage being sky-blue. The song is sweet. See illus. p. 146.

BLUEBOTTLE. Species of fly (*Musca vanitaria*) of the order Diptera, allied to the house fly, but distinguished by its blue abdomen and loud hum.

Larva and pupa of the blue-bottle fly.

It closely resembles other species, e.g. the larger blow-fly (*Sarcophaga carnaria*), which has a brownish-grey abdomen. All lay their eggs in animal flesh, either in carcasses or wounds of the living beast.

BLUEBUCK (*Cephalophus monticola*), S. African antelope, only 13 in. high, and blue-grey in colour. It is related to the duikers, and is common in Natal.

invaded by Napoleon, Queen Maria (d. 1816) and her court went to Rio in 1808. Her son, John VI, returned to Lisbon following a rising in Portugal in 1816, leaving behind as regent his son Pedro who in 1822 declared B. independent with himself as emperor. King John, by a treaty of 1825, was made emperor of B., but abdicated immediately in favour of Pedro. War with Buenos Aires from 1825 to 1828 deprived B. of the Banda Oriental prov. (Uruguay from 1828). From 1864 to 1870 B. and the Argentine were at war with Paraguay, which suffered a crushing defeat. The Republic of B. was proclaimed in Nov. 1889 as a result of the abolition of slavery by Pedro II, 1888. B. has a less turbulent later history than other S. American repts., but after the military revolution of 1964 a less democratic regime evolved.

BRAZZAVILLE (braht'sahvël). Cap. of the Congo Republic (in the French Community), an active river port with an airport. Founded by the Italian Count Pierre Savorgnan de Brazza (1852-1905), employed in African expeditions by the French govt., it stands on the right bank of Stanley Pool, opposite Léopoldville, and is linked by railway with Pointe-Noire, at the mouth of the Congo, 240 m. to the W.S.W. It has foundries and railway repair shops, builds ships, and makes shoes, soap, furniture, bricks, etc. The Pasteur Institute here dates from 1908, the cathedral from 1892. B. was the African H.Q. of the Free (later Fighting) French during the S.W.W. Pop. (1965) 156,000.

BREAD. The product obtained by moistening flour, kneading the resulting dough, and baking. Unleavened B. contains no raising agent; leavened B. - the normal product - is usually raised with yeast.

B. consists essentially of flour, yeast, salt and water, with fat, milk powder, eggs and other ingredients added in some cases. Wheat flour is usually used, but rye flour may be used instead, or in addition, in some countries. White B. is made from flour from which all the outer skins (or bran) have been extracted during milling, but brown and wholemeal incl. part or all of the bran respectively.

BREAD FRUIT. Fruit of a tree (*Artocarpus altilis*) of the fig and mulberry family (Moraceae). When toasted, it is said to taste like bread, and is an important article of food among the people of the South Sea Islands to which it is native.

BREAKING AND ENTERING. See BURGLARY.

BREAKSPEAR, Nicholas. The only Englishman to become Pope. See ADRIAN IV.

BREAM. Name given to 2 quite distinct groups of fishes - the freshwater B. belonging to the carp family (Cyprinidae) and the sea B. (Sparidae) - and various others, which have in common their more or less compressed form. The former Bs. are esteemed by anglers. The latter Bs. are carnivorous fishes, resembling the perch, and are good eating.

BREASTED (bres'ted), James Henry (1865-1935). American archaeologist. B. at Rockford, Illinois, he was diverted from entry into the Church to the study of Egyptology, intent on linguistic sources, and pub. 5 vols. of *Ancient Records of Egypt* (1906-7). Backed by John D. Rockefeller, Jr., he organized the Oriental Institute of Chicago, of which he was director 1919-35, acquired many antiquities for the univ. museum, and pub. the valuable *Development of Religion and Thought in Ancient Egypt* (1912), etc.

BREATHALYSER. Instrument (invented by Bork-

enstein of Indiana) for checking the amount of alcohol drunk during a given period. Breath samples are taken, e.g. from a suspected drunken driver, in small self-sealing plastic bags, and are bubbled through a diluted solution of potassium dichromate in 50% sulphuric acid. A built-in colorimeter then gives a reading of the degree of colour change in the yellow dichromate to blue, this change being brought about by the presence of alcohol in the air. Since it is known that one part of alcohol is present in air for every 2,100 parts in blood at a temperature of 34°C (the mean breath temperature), the amount of alcohol consumed can thereby be measured. In the U.K. their use was legalised in the Road Safety Act 1967.

BRECHT (brekht), Bertolt (1898-1955). German poet, playwright and theatre producer. B. of bourgeois family in Augsburg, he became known after the F.W.W. as a dissolute Bohemian out to shock and singing songs to a guitar accompaniment. *Drums in the Night* (1918) is a play with one of his typical returning soldier heroes; *The Threepenny Opera* was an attempt to set Gay to a propagandist tune (See KURT WEILL); *Mother Courage* (1939) attacked war and inadvertently made a heroine of 'Mother Courage', actually intended as a symbol of the little people who make war possible; and *Galileo*. A Communist, he went into exile in Scandinavia and the U.S. under the Hitler regime. After the S.W.W. he became an Austrian citizen and eventually settled in E. Berlin to direct his own company, the Berliner Ensemble, founded 1949. His controversial influence has led to varying estimates of his permanent value.

BRECKNOCKSHIRE or **BRECONSHIRE.** Border county of Wales, bounded on the N.E. by the river Wye, and on the E. and S.E. by the Welsh border. Much of it is mountainous; in the E. the Black Mountains rise to 2,660 ft.; the Brecon Beacons reach 2,907 ft. Only one-quarter is tilled. The chief rivers are the Wye, the Yrŵn, and the Usk. The co. town is Brecon; other towns are Builth Wells, Crickhowell, Hay. Area 733 sq. m.; pop. (1961) 55,544.

BRECON or **BRECKNOCK.** Welsh cathedral town (bor.) and co. town of Brecknockshire, situated on the Usk. It has ancient fairs, and the priory church of St. John became in 1923 the cathedral of the bishopric of Swansea and Brecon. Pop. (1961) 5,797.

BRECONSHIRE. See BRECKNOCKSHIRE.

BREDA (brädah). Historic Dutch town in N. Brabant. Charles II made here the Declaration that paved the way for his Restoration in 1660. Pop. (1967) 119,289.

BREEDING. The rearing of animals or the cultivation of plants, using the crossing of different varieties to change the characteristics of an existing breed or variety, or produce a new one. Cattle may be bred for increased meat or milk yield, sheep for thicker or finer wool, horses for speed or stamina, bees for better honey, etc. Plants, such as cereals, may be bred for disease resistance, heavier and more rapid cropping, and hardiness to adverse weather or climate. Radiation is among the plant breeder's new tools; see RICE. See also EUGENICS.

BREEDING. Process in a nuclear reactor in which more fissile material is produced than was used in the operation of the reactor. Thus thorium can be turned into uranium-233, or plutonium-239 from uranium-238, both by the fission of natural uranium-238. The need is to use rare natural fissionable material only to initiate breeding of new fissile material, which can continue the process indefinitely with abundant raw material.

BREMEN. City and seaport of Germany on the Weser, 43 m. from the open sea. It was one of the Hanseatic towns, and a free imperial city from 1646. In 1867 it became a member of the N. German Confederation, and in 1871 of the German Empire. During the S.W.W. it was repeatedly bombed, and

BREAD FRUIT

BOCHUM (bokh'oom). German town in the Ruhr industrial district of N. Rhine-Westphalia, between Essen and Dortmund. Its metallurgical industries made it a frequent target for British bombers during the S.W.W. Pop. (1966) 353,796.

BODE (bō'de), Johann Elert (1747–1826). German astronomer. He was director of the Berlin observatory, and propounded *Bode's Law*, which states that the proportionate distances of the planets from the sun out to Uranus are found by adding 4 to each term of the series 0, 3, 6, 12, 24, etc., if the asteroids be included between Mars and Jupiter. The law breaks down for Neptune and Pluto, however.

BODENSEE. German name of LAKE CONSTANCE.

BODH GAYA. Another form of BUDDH GAYA.

BODIN (bodañ'), Jean (1530–96). French political thinker. He became an attorney in Paris, and in 1574 pub. a tract explaining that prevalent high prices were due to the influx of precious metals from the New World. His *De la république* (1576) has been described as originating political economy.

BODLEY, Sir Thomas (1545–1613). English diplomat and scholar. He was employed by Queen Elizabeth on diplomatic missions, but retired in 1597, and began to restore the library at Oxford (originally founded by Humphrey, duke of Gloucester, in the 15th cent.), which was opened in 1602, and is named after him the Bodleian Library. He was knighted in 1604.

BODMIN. Co. tn. (bor.) of Cornwall, England, 30 m. W.N.W. of Plymouth. B. was a great agricultural market. Pop. (1961) 6,209. *B. Moor* to the N.E. is a granitic area, culminating in Brown Willy (1,375 ft.).

BODONI (bōdō'nē), Giambattista (1740–1813). Italian printer, who managed the printing-press of the duke of Parma and produced books, chiefly editions of the classics, that were magnificent specimens of the craft.

BOEHM (bōm), Sir Joseph Edgar (1834–90). Sculptor. B. at Vienna of Hungarian parentage, he settled in England. Among his statues are those of Gordon in St. Paul's Cathedral and Wellington at Hyde Park Corner.

BOEHME (bō'me), Jakob (1575–1624). German mystic. He became a shoemaker in Görlitz, and although persecuted as a heretic after the appearance of his mystical *Aurora* (1612) continued to write theosophical treatises, which won followers in Germany, Holland, and England. He claimed divine revelation of the unity of everything and nothing, and found in God's 'eternal nature' a principle to reconcile evil and good.

BOEOTIA (bē-ō'shya). Ancient district of central Greece. The chief city was Thebes. The modern prefecture of B., pop. (1961) 114,474, has Levadeia as its cap.

BOER (bor; Dutch, farmer). Dutch settler in S. Africa. For BOER WARS see SOUTH AFRICA.

BOERHAAVE (boor'hahve), Hermann (1668–1738). Dutch physician. He was prof. of medicine, botany, and chemistry at the Univ. of Leyden, and made it the leading school of medicine.

BOETHIUS (bō-ēthius), Anicius Manlius Severinus (c. 480–524). Roman statesman and philosopher. He rose to high rank under the Gothic king Theodoric, but was eventually imprisoned on suspicion of treason, and executed at Pavia. While in prison he wrote his *De Consolatione Philosophiae*.

BOGART, Humphrey (1899–1957). American actor, celebrated in 'tough' parts. Entering films in 1930, he appeared in *The Petrified Forest*, *The Maltese Falcon*, *The Caine Mutiny*, and others.

BOGHAZKÖI (bo'gahzkō'ē). Turkish village in Asia Minor, c. 90 m. E. of Ankara. It is on the site of Hattusas, the ancient Hittite capital estab. c. 1640 B.C. Thousands of tablets discovered by excavations here over a number of years by the German Oriental

Society revealed, when their cuneiform writing was deciphered by Bedrich Hrozný (1879–1952), a great deal about the customs, religion, and history of the Hittite people. Pop. (est.) 1,000.

BOGNOR REGIS (rē'jis). English seaside resort (U.D.) in Sussex, 66 m. S.W. of London, which owes the Regis in its name to the convalescent visit of George V in 1929. Pop. (1961) 28,144.

BOGORODSK. Name until c. 1930 of NOGINSK.

BOGOTÁ (bōgōtah'). Cap. of the S. American rep. of Colombia, on the edge of the plateau some 8,500 ft. above sea-level. Founded in 1538, it is an archiepiscopal see with a cathedral, 1563, and several univs. Industries include iron and steel, tobacco, textiles, clothing, leather, etc. Pop. (1964) 1,697,311.

BOHEMIA. Historic kingdom of Central Europe, consisting of a square block of highland bounded by the Bohemian Forest, the Erzgebirge, the Sudeten Mts., and the Moravian Heights, and drained by the Vltava River, on which Prague stands.

The name B. derives from the Celtic Boii, its earliest-known inhabitants. By the 5th cent. Czechs and other Slav peoples had conquered the country, which became Christian by the end of the 9th cent. The Bohemian princes were tributary to the emperor, but the native dynasty became extinct in 1306, and the crown passed to the House of Luxemburg, the 2nd of whom, Charles I (1346–78) was also emperor as Charles IV, and founded Prague Univ. in 1348. Under his son Wenzel (1378–1419) there was a strong reforming movement led by John Huss, whose burning at the stake caused a civil war. In 1457 George of Poděbrad became king, the first native ruler since 1306. He was followed by Vladislav of Poland, whose son Louis was killed at Mohács in 1526; the archduke Ferdinand of Austria was then elected king, and henceforth until 1918 B. was under Habsburg rule. The Hussites supported the Reformation, and a revolt in 1618 precipitated the Thirty Years War. The Battle of the White Mountain in 1620 ended Czech freedom. In 1918 B. became a province of the new rep. of Czechoslovakia; it was abolished as an administrative division in 1949.

BOHLEN (bō'len), Charles Eustis (1904–). American diplomat. Ed. at Harvard, he entered the Foreign Service in 1929, and in 1945 accompanied Roosevelt to the Yalta conference. Ambassador to the U.S.S.R. 1953–7, he was Asst. to the Sec. of State (in Soviet Affairs) 1959–62, ambassador to France 1963–8, then Deputy Under-Sec. for Political Affairs.

BOHR (bōr), Niels (1885–1962). Danish physicist: Nobel prizewinner 1922. After work with Rutherford at Manchester, he became prof. at Copenhagen in 1916 and founded the Institute of Theoretical Physics there, of which he became director, in 1920. He fled from the Nazis in the S.W.W. and took part in work on the atomic bomb in the U.S.A.

BOIARDO (bōyahrdō), Matteo Maria, count (1434–94). Ital. poet, famed for his *Orlando Innamorato* (1486).

BOIL. Inflamed nodule beneath the skin, formed by the infection of the root of a hair by a staphylococcus. Bs. are only likely to occur when general resistance is low, as in those who are fat, overfed, diabetic, or have mild blood-poisoning.

BOILEAU (bwalo'), Nicolas (1636–1711). French poet and critic. Called to the bar in 1656, he turned to literature on receiving a legacy. After a series of keen contemporary satires, his *Épîtres* (1669–77) led to his joint appointment with Racine as historiographer royal in 1677. Later works include *L'Art poétique* (1674), the mock-heroic *Le Lutrin* (1674–83), and a translation of Longinus *On the Sublime* (1674). The close friend of Racine, Molière, and La Fontaine, he was elected to the Academy in 1684.

BOILING POINT. For any given liquid, the temperature at which the application of heat raises the

BREWING. The modern brewhouse looks more like a science laboratory, but the same traditional individual care is given to the product. Here inspection is made of the hops boiling in the coppers. Courtesy of Arthur Guinness Son & Co. Ltd.

addition of other sugars such as glucose. It is boiled with hops, which act as a preservative, and give the resulting product a characteristic flavour. Apart from the use of other sources of starch, such as rice and maize and the use of different types and qualities of malt and sugars, the process for the production of beer, stout and lager need not vary greatly up to this point but thereafter the differences are more apparent.

The cooled, hopped wort is mixed either with top fermenting yeast (*Saccharomyces cerevisiae*) for English-type beer or stout, or with bottom fermenting yeast (*Saccharomyces carlsbergensis*) for lager. The fermentation by which the yeast converts the sugars to alcohol and carbon dioxide is, in the case of the English-type beer and stout a warm process (c. 60°F.) and in the case of the lager, a cold process (c. 45°F.). The finishing varies but, in general, consists of maturation followed by filtration. The length of maturation, and the degree of filtration all have a considerable effect on quality and flavour. Draught beer is filled into casks which are nowadays usually aluminium or stainless steel, together with enough carbon dioxide in solution to force the beer from the cask and give it a head in the glass. Bottled and canned beer also contains dissolved carbon dioxide but in these cases it gives additional sparkle and life.

BREWSTER, Sir David (1781-1868). Scottish physicist, famous for his discoveries regarding the diffraction and polarization of light.

BREZHNEV, Leonid Ilyich (1906-). Russian politician. Son of a steelworker, he became an engineer and metallurgist. During the S.W.W. he was a political worker with the army and afterwards held party office in his native Ukraine. He succeeded Voroshilov as pres. of the U.S.S.R. (1960-4), and in Oct. 1964 succeeded Khrushchev as First Sec. (Gen. Sec. from 1966) of the Soviet Communist Party.

BRIAND (brē-on'), Aristide (1862-1932). French statesman. B. at Nantes, he became a journalist in Paris. An ardent socialist, he helped Jaures to found *L'humanité*, and in 1902 was elected to the French Chamber. In 1906, as Minister of Public Instruction and Worship, he carried through the law separating Church and State. Henceforth he was one of the Radical Socialists. B. was several times Prime Minister: 1909-11, when he broke the railway strike of 1910 by mobilizing the strikers for army service; 1913, when he extended the period of military service from 2 to 3 years; 1915-17; 1921-2; 1925-6; and 1929. Subsequently he was often Foreign Minister. In 1925 he concluded the Locarno Pact, and in 1928 the Kellogg Pact; in 1930 he outlined his favourite scheme for the United States of Europe.

BRIANSK (brē-ansk'). Russian town and rly. junction in the R.S.F.S.R. on the Desna. It has foundries, sawmills, cement and brickworks, etc. Pop. (1967) 276,000.

BRIDGE. A construction which provides a continuous path or road over water, valleys, ravines, or above other roads. Bs. may be classified into 4 main groups: (1) the arch; (2) the girder; (3) the cantilever; and (4) the suspension B. Examples of these types are: (1) Waterloo B., London, and the Sydney Harbour B.; (2) the St. Louis Municipal B., crossing the Mississippi, which has 3 spans, each 668 ft., and carries a double deck with 2 railway lines and a road; (3) the Forth B. which is 5,440 ft. long, and has 2 main spans, each span consisting of 2 cantilevers, one from each tower; (4) the Golden Gate Suspension B., San Francisco, which has a gigantic span of more than $\frac{1}{2}$ m. Steel is pre-eminent in the construction of long-span Bs. because of its high strength-to-weight ratio, but in other circumstances reinforced concrete has the advantage of lower maintenance costs. Light alloy may be used in special cases. See TUNNEL for B.-TUNNELS.

BRIDGE (Straight Bridge). Card game, probably originating in Greece, which was introduced into Britain about 1880. From the Portland Club, where it was 1st played in 1894, it rapidly spread - to the detriment of whist - but about 1908 was superseded by its offspring, Auction B. See AUCTION B.; CONTRACT B.

BRIDGES, Robert Seymour (1844-1930). British Poet Laureate. B. at Walmer, he qualified as a doctor in London, but abandoned medicine for literature in 1882. His 1st vol. of poems in 1873 was followed by the sonnet-sequence *The Growth of Love* (1876), *Eros and Psyche* (1885), *Shorter Poems* (1896), and dramatic pieces such as *Prometheus the Firegiver* (1883), *Nero* (1885-94), and the masque *Demeter* (1904). In 1913 he was appointed Poet Laureate and became a founder of the Society for Pure English. He won popularity with his war anthology of prose and verse *Spirit of Man* (1916), followed by *New Verse* (1925), and *The Testament of Beauty* (1929), a long philosophical poem which won immediate currency. He was an eager experimenter in metre and was a friend of Hopkins (q.v.), whose poetry he pub. in 1918 when he felt that the time was ripe for such a daring new voice to be heard.

BRIDGET (453-523). A patron saint of Ireland, also known as St. Brigit or St. Bride. She founded a

BRIDGE. The Verrazano-Narrows Bridge, opened in 1964, is the world's longest with a centre span of 4,260 ft.—60 ft. longer than that of the Golden Gate Bridge. It spans the mouth of New York harbour, and was named after the Italian explorer who in 1524 was the first European to sail into the bay.

Courtesy of Amman & Whitney, Consulting Engineers.

lives. They are named after JOHN BOLLAND (1596–1665), who pub. the first 2 vols. in 1643.

BOLL-WEEVIL. Small American beetle (*Anthonomus grandis*) of the family Curculionidae: the female lays eggs in the unripe pods or 'bolls' of the cotton plant, and on these the larva feeds, causing great destruction.

BOLOGNA (bōlō'nyah). City of N. Italy, at the foot of the Apennines on the Reno and Savena, 50 m. N. of Florence. The city has 2 leaning towers, a cathedral, a univ. (founded in the 11th cent.), and many industries, principally concerned with foodstuffs. B. was the site of an Etruscan town, later of a Roman colony, became a rep. in the 12th cent., came under Papal rule in 1506, and in 1860 was united with Italy. Pop. (1966) 481,740.

BOLSHEVISM (Russ. *bolshinstvo*, a majority). Doctrines of the extreme Socialists or Communists who effected the Russian Revolution of 1917. The word came into use following a conference of Continental and British Socialists held in London in 1903, at which there was a split between the Russian Social Democratic party led by Lenin, and the moderate delegates. The former being in the majority were called *Bolshevik*, and their opponents the *Menshevik* (Russ. *menshinstvo*, a minority). Since 1952 Bolshevik is no longer the official alternative for Communism.

BOLSOVER (bōl'zover, or bow'zer). English coal-mining centre in Derbyshire, 6 m. E. of Chesterfield. B. dates from the 11th cent. There are also limestone quarries nearby. Pop. (1961) 11,770.

BOLTON. Important textile-making town (co. bor.) in Lancs, England, 11 m. N.W. of Manchester. It became a co. bor. in 1888. Pop. (1961) 160,887.

BOLTON ABBEY. Ruins of a priory (begun c. 1150) on the r. Wharfe, 6 m. E. of Skipton, Yorks, England; name also of the neighbouring village.

BOLTZMANN, Ludwig (1844–1906). Austrian physicist and authority on the kinetic theory of gases. B.'s constant k (1.375×10^{-16} ergs per degree) is the ratio of the mean total energy of a molecule to its absolute temperature, and the principle of the equipartition of energy is known as B.'s law.

BOLZANO (boltsah'no). Town in Italy, in Trentino-Alto Adige region, on the Isarco at its confluence with the Talvera; formerly in Austria. Pop. (1966) 100,466.

BO'MA. Town in the Rep. of Congo (Kinshasa) on the estuary of the r. Congo, 55 m. from the Atlantic. It was the oldest European settlement in the Belgian Congo, of which it was the cap. until 1929. Pop. c. 11,000.

BOMB. An explosive projectile used in warfare. Aerial bombing started in the F.W.W. when the German Air Force carried out 103 raids on Britain, dropping 269 tons of bombs. In the S.W.W. nearly twice this tonnage was dropped on London in a single night, and at the peak of the Allied air offensive against Germany more than 10 times this tonnage was

BOMB. Extensive atom bomb tests were carried out by U.S. forces at Bikini atoll in the Pacific in 1946. On July 1 a bomb was exploded at a height of 1,000–1,500 feet above the assembled test fleet of 75 warships, and on July 25 a bomb was exploded under water. Beneath the vast atomic cloud the warships look like toys and the battleship *Arkansas* was sunk by the blast.

Photo: Keystone Press Agency Ltd.

regularly dropped in successive nights, on one target. Raids in which nearly 1,000 heavy bombers participated were frequent and the same town might be subjected to this terrible punishment by day and night.

They were delivered either in 'precision' or 'area' attacks and great advances were made in 'blind' bombing, in which the target is located solely by instruments and is not visible through a bomb-sight. In 1939 B.s were commonly 250 and 500 lb. but by the end of the conflict the 10-tonner was being produced, though even these paled beside the atom B. This derives its explosive force from nuclear fission as a result of a neutron chain reaction; 3 were exploded during the S.W.W.: 1st a test explosion on 16 July 1945, at Alamogordo, New Mexico, U.S.A.; then on 6 Aug. the 1st to be used in actual warfare was dropped over Hiroshima (q.v.) and 3 days later another over Nagasaki. These were 'nominal', i.e. nominally equal in destructive power to 20,000 tons of T.N.T. Russia 1st detonated an atom B. in 1949 and Britain in 1952 (in the Monte Bello Islands off Australia). Later developments have incl. the fusion or hydrogen bomb (q.v.), and by the 1960s intercontinental 100-megaton nuclear warheads could be produced (5,000 times more powerful than those of the S.W.W.) and the U.S.A. and U.S.S.R. between them possessed a stockpile sufficient to destroy all mankind. See **FALLOUT**.

Methods of delivery have also changed since Germany pioneered the V1 flying bomb and V2 rocket bomb, so that in the 1960s it was recognized that the era of bombers with free-falling bombs was over, and that future development would lie with missiles launched from aircraft, land sites or submarines. The danger of such nuclear weapons naturally increases with the number of nations possessing the ability to produce them (France and China became nuclear powers in 1960 and 1964 respectively), and the possibility of 'policing' states to check on their testing of bombs has been complicated by the development of underground testing.

BRISBANE. Rising above the fountain and palm trees of King George Square, the City Hall was completed in 1930. In pioneer days the site was a water-hole.
Courtesy of Agent-General for Queensland.

mountains. Among its notable buildings are the Parliament house and Govt. buildings, an Anglican and a R.C. cathedral, museums, etc. Ascot racecourse is to the E. Queensland univ. was estab. here in 1909. B. was named in 1824 after Sir Thomas B., (q.v.), who 1st had the site occupied as a penal colony, 1824-39, opened to free settlers 1842. Greater B. has an area of 385 sq. m.; pop. (1966) 777,935.

BRISSET (brësö), Jacques Pierre (1754-93). French revolutionary leader. B. at Chartres, he became a member of the Legislative Assembly and the National Convention, but his party of moderate republicans - the Girondins, or Brissotins - fell foul of Robespierre and B. was guillotined.

BRISTOL. English city and seaport (co. bor.; also co. of itself) in Gloucestershire with some of its suburbs in Somerset, situated 8 m. from the mouth of the Avon on the Bristol Channel. It includes Avonmouth and Portishead Dock. Since Saxon times it has been a trading centre, and in the Middle Ages it handled important wool traffic. From B. John Cabot sailed to discover Newfoundland. In the 17th and 18th cents. B. developed a large commerce with the American colonies and the W. Indies, and it was to the fore in the slave trade.

The principal buildings incl. the cathedral and the 14th cent. church of St. Mary Redcliffe; the univ. (1909), technical colls., and many schools. At the junction of 2 modern motorways, B. plans further

BRISTOL. With a span of 702 ft., the Clifton Suspension Bridge, built by Brunel 1832-64, strides across the Avon gorge just below the city. Clifton itself, on the heights to the right, was a fashionable 18th cent. resort, and is now a 'prestige' residential suburb. Courtesy of Bristol Public Relations Office.

dock development, and there has been rapid industrial expansion. Manufactures incl. aircraft engines, shoes, chocolate and cocoa, tobacco, chemicals, and there are nuclear and general engineering, printing and ship-building industries. Wines and spirits are imported. There is an airport at Lulsgate Bottom. Pop. (1961) 436,440.

BRISTOL CHANNEL. Seaward extension of the Severn estuary, 85 m. long, width 5 m. at first, opening to 43 m. between S. Wales, Lundy Island and N. Devon. It receives the rivers Usk, Wye, Severn, Avon, etc. and has very high tides.

BRITAIN. Ancient. The name B., indicating present-day England, Scotland and Wales, is derived from the Roman name Britannia which is in its turn derived from the ancient Celtic. Before the Celts arrived B. was inhabited for thousands of years by people who had already learnt to tame animals and to grow corn in a primitive fashion; built Stonehenge (perhaps about 1800 B.C.) and buried their chiefs in barrows. About 1000 B.C., Britain was conquered by the Celts, tall, fair-haired people who swept across from the Continent in 2 great waves of migration. First came the Goidelic Celts of whom traces may still be seen in the Gaels of Ireland and the Highlands; there followed the Brythonic Celts or Bretons who were closely allied in blood and culture to the Gauls of

BATTLE OF BRITAIN. In this series of air conflicts in 1940 the German attempt to destroy Britain's air bases and communications as a prelude to invasion was defeated, mainly by the gallantry of the pilots of R.A.F. Fighter Command. This vivid impression of the battle by Paul Nash is now in the Imperial War Museum.

France. The early British craftsmen were highly skilled in pottery and metal-work. Tin mines in Cornwall attracted merchant seamen from Carthage.

BRITAIN, Battle of. Air battle over Britain which lasted from 10 July to 31 Oct. 1940: one of the decisive battles of history. It has been divided into 5 phases: (1) 10 July-7 Aug., the preliminary phase; (2) 8-23 Aug., attack on coastal targets; (3) 24 Aug.-6 Sept., attack on Fighter Command airfields; (4) 7-30 Sept., daylight attack on London, chiefly by heavy bombers; and (5) 1-31 Oct., daylight attack on London chiefly by fighter-bombers.

At the outset the Germans were in a strong position. They controlled all the French and Dutch airfields, and the entire seaboard from North Cape to Hendaye. The front-line strength of the Luftwaffe was over 3,000 aircraft, and German industry was capable of producing over 1,000 operational types a month. As a preliminary to invasion the Germans launched a tremendous air attack on Britain, but failed to defeat the R.A.F.; and although they had assembled a great army, they had to abandon their plans.

The battle was won by the men of Fighter Command under Air Chief Marshal Sir Hugh (later Lord) Dowding. The number of German planes destroyed in the battle amounted to 1,733.

canonized in 1482. He entered the Franciscan order in 1243, became professor of theology at Paris, and in 1256 general of his order. In 1273 he was created cardinal and bishop of Albano, and d. at the 2nd Council of Lyons. His eloquent writings earned him the title of the 'Seraphic Doctor'.

BONDFIELD, Margaret Grace (1873–1953). British Socialist. From being a shop assistant she became a trade union organizer among women workers. She was a Labour M.P. (1923–4 and 1926–31), and was the 1st woman to enter the Cabinet—as Min. of Labour, 1929–31.

BONE, Sir Muirhead (1876–1953). British etcher. Famed for scaffolding subjects, such as his 'Great Gantry, Charing Cross', in the B.M., he was an official artist to the forces during the F. and S.W.W.s. His brother, Sir David William B. (1874–1959), a master mariner, wrote many books on life at sea.

BÔNE (bohn). Algerian seaport, in Constantine prov., 260 m. E. of Algiers. One of the best harbours on the African coast, it has industrial plants, flour mills, etc.; railway communication with Algiers and Touggart; and an airfield. It was occupied by the French in 1832, but since Algerian independence has been known by the Arabic form of its name Annaba—city of jubile trees. Pop. (1967) 165,000.

BONE. Hard animal tissue consisting of a network of fibres impregnated with salts of lime. A bone is a portion of B. tissue having a definite size and shape and forming part of the skeleton. Human beings have c. 200 distinct Bs. which form the hard core of the body, preserving its shape, and providing fixed points from which the muscles can work, and to which ligaments are anchored.

B. forms early in the unborn child. Plates of B., e.g. those forming the skull, develop from membrane; long Bs. from cartilage or gristle. B. is formed by the cells enlarging and depositing fine granules of phosphate and carbonate of lime in the spaces between them. The original membrane or cartilage disintegrates and is carried away. Experiments have been made in setting broken Bs. with plastic.

BONHAM-CARTER, Lady Violet. *See* ASQUITH OF YARNBURY, Lady.

BONHEUR (bonör'), Rosa (1822–99). French animal painter, who exhibited at the Paris Salon from 1841. Her best work is 'Horse Fair' (1853).

BONIFACE (bon'ifäs). Name of 9 popes. The most notable was B. VIII (c. 1228–1303). Succeeding to the office in 1294, he exempted the clergy from taxation by the secular government by a bull of 1296. Philip the Fair of France and Henry III of England forced him to give way by excluding the clergy from certain lay privileges. His bull of 1302 asserting the complete temporal and spiritual power of the papacy was equally ineffective.

BONIFACE, St. (680–754). 'Apostle of Germany'. Originally named Wynfrith, he was b. in Devon and became a Benedictine monk. After a preliminary missionary journey to Frisia in 716, he was given the task of evangelizing Germany by Pope Gregory II in 718, and was appointed archbishop of Mainz in 746, but returned to Frisia 754 and suffered martyrdom near Dokum.

BONIN (bōnēn') and Volcano Islands. Island groups in the Pacific, c. 800 m. E. of the Ryukyu Is. The B. Islands number 27 (in 3 groups), largest being Chichijima: area 40 sq. m.; pop. (1968) c. 200. The Volcano Islands number 3, incl. Iwojima, scene of some of the fiercest fighting of the S.W.W.; total area 11 sq. m. The B. and V. Is. were under U.S. control, following the 1952 peace treaty, until returned to Japan in 1968.

BONINGTON, Richard Parkes (1801–28). British painter. His family settled in France in 1817 and he rapidly developed a talent for seascapes and landscapes in watercolour. In the last few years of his life

he also painted in oils, and excelled in depicting the transitory effects of light. The Wallace Collection has a fine selection of his work. He d. of tuberculosis.

BONITO (bonē'tō). Popular name of a smaller species of tunny not exceeding 3 ft. in length (*Thynnus pelamys*), belonging to the mackerel family (Scombridae), and common in tropical seas.

BONN. Cap. of the W. German Federal Rep. 15 m. S.S.E. of Cologne, on the left bank of the Rhine. An important Roman station, it was captured by the French in 1794, annexed by them in 1801, and was allotted to Prussia in 1815. Remarkable features are the cathedral (begun 11th cent.), the univ., the observatory, and Beethoven's birthplace. Industries have grown up in the suburbs, and in the S.W.W. B. was frequently bombed. B. was chosen W. German cap. in 1949. Pop. (1966) 138,515.

BONN. The cathedral. Courtesy of the German Tourist Information Bureau.

BONNARD (bonahr'), Pierre (1867–1947). French painter. One of the Nabi group led by Maurice Denis, he made an idea rather than an object his starting point, using colour with a decorative effect in street scenes of Paris, landscapes and interiors with figures.

BONSAI (bonsī). Dwarf tree cultivation. Formerly limited to Japan, which originated the practice, it has in recent years spread increasingly to the West. Collectors will pay as much as £1,000 for specimens which may be several hundred years old.

BOOK. Permanent portable written record. Early substances used in B.-making include leaves, bark, linen, silk, clay, leather, and papyrus. Early in the Christian era (c. 100–150), the codex or paged book, as against the roll, began to be adopted. Vellum was generally used for B. production by the beginning of the 4th cent. and its use lasted until the 15th, when it was superseded by paper.

BOOKBINDING. B. only emerged as a distinct art when printing made less expensive materials than precious metals and wood essential. The principal ornament of leather B., gold tooling, was probably introduced to Europe from the East by the Venetian Aldus Manutius, and adopted in England by Thomas Berthelet, binder to Henry VIII. Famous binders include Nicholas and Clovis Eve (16th cent.), Le Gâcon, Samuel Mearne (17th cent.), A. M. Padeloup, N. D. Derôme, Roger Paynes (18th cent.), Francis Bedford (19th cent.), and T. J. Cobden-Sanderson, C. Ricketts (20th cent.). Modern cloth binding common to England and America was first introduced by Leighton in 1822, but since the S.W.W. synthetic bindings have been increasingly employed.

BOOKKEEPING. Keeping books of account, i.e., records of commercial transactions, in a systematic and accurate manner (*see* ACCOUNTANCY). The earliest-known work on double entry B. was by Luca Pacioli, pub. in Venice in 1494. The method which he advocated had, however, been practised by the Italian merchants for several hundred years before that date. The first English work on the subject, by the schoolmaster Hugh Oldcastle, appeared in 1543. Double entry is a system which recognizes the duality inherent in every business transaction, each item being entered in the books twice—as debit and as credit.

BOOK OF THE DEAD. Ancient book of the Egyptians, known to them as the *Book of Coming Forth by Day*, and forming a guide-book for the deceased through Hades to the kingdom of Osiris. It is extant in 3 main versions, known as the Heliopolitan,

COTMAN. Water colour 'Greta Bridge'. In the British Museum, which dates from c. 1806 and is powerfully effective in the simplicity of its design.

COSTA RICA (rē'kah). A Central American rep. lying between the Caribbean Sea and the Pacific. It was discovered by Columbus, and from 1563 until 1821 was under Spanish rule. Since then it has been independent. Its chief troubles have been boundary disputes with its neighbours.

Most of C.R. is an elevated tableland, and there are a number of high volcanic mountains. The chief river is the San Juan. The country is divided into 7 provs. The capital is San José, pop. (1967) 185,640; other towns are Cartago, Heredia, Alajuela, Liberia, Limón, and Puntarenas.

Agriculture is the principal industry, but much of the country remains to be cleared. The principal product is coffee, followed by bananas and cacao. There is gold, silver, etc., and mineral surveys are in progress: timber is produced.

C.R. is governed by a president and a single chamber, the Legislative Assembly, both elected for 4 years. Roman Catholicism is the state religion. The language is Spanish. There is a national system of education, and English is taught in all secondary schools. Area 19,690 sq. m.: pop. (1966) 1,490,000.

CO'STELLO, John Aloysius (1891–). Irish statesman, leader of the Fine Gael party. B. in Dublin, he was Attorney-General under Cosgrave 1926–32, and P.M. of the Rep. 1948–51 and 1954–7, and led the Opposition 1951–4 and 1957–9.

COSTER, Charles de (1827–79). Belgian writer. B. at Munich, he was one of a group of young writers who set out to produce a distinctively Flemish literature instead of using French. In *La Légende de Thyl Uylenspiegel* (1867) he achieved a true masterpiece.

COSTER, Laurens Janszoon (1370–1440). Dutch printer, b. at Haarlem. According to some authorities, he invented movable type, but after his death an apprentice ran off to Mainz with the blocks and, taking Gutenberg into his confidence, began a printing business with him.

COST OF LIVING. This phrase came into common use during the F.W.W., when it was desired to measure the rise in prices of goods in general consumption, partly as a guide to necessary increases in wages. In Britain the first C.O.L. index was introduced in 1914 and based on the expenditure of a working-class family of man, wife and 3 children; the standard is 100. This, officially known from 1947 as the *Index of Retail Prices*, has been revised from time to time, as a result of inflation and a general rise in prices. Supplementary to it in reaching estimates of C. of L. is the *Consumer Price Index*, calculated from 1938 on the expenditure of all consumers.

In the U.S. a Consumer Price Index, based on the expenditure of families in the iron, steel and related

industries, was introduced in 1890. The modern index is based on the expenditure of the urban wage-earner and clerical-worker families in 46 large, medium and small cities, the standard being 100.

COSTUME. See **DRESS**.

COSWAY, Richard (1742–1821). British artist. Elected R.A. in 1771, he was the most accomplished of the 18th cent. miniaturists and painted the chief members of the Prince Regent's court.

COTMAN, John Sell (1782–1842). British landscape painter. B. at Norwich, he went to London to study c. 1798, returning to Norwich in 1807 as a drawing master. In 1834 Turner helped him to an appointment at King's Coll., London. He achieved a balanced harmony of forms in subdued tones, and was fond of depicting ships and bridges. His sons, Miles Edmund (1810–58) and Joseph John (1814–78) were also landscape painters.

COTONEASTER (kōtōnē-as'ter). Genus of trees and shrubs belonging to the Rosaceae and closely allied to the hawthorn and medlar. Its leaves are simple and entire, and woolly beneath, and the conspicuous but small and unpalatable fruits persist through the winter.

COTONOU (kot'onoo). Chief port of Dahomey, on the Gulf of Benin. It is a road and rail centre, and has an airport. Palm products and timber are exported. Pop. (1965) 85,000.

COTOPA XI. Highest active volcano in the world, situated to the S. of Quito in Ecuador. It is 19,500 ft. high, and was first climbed in 1872. Its name is Quichua and means shining peak.

COTSWOLDS (kots'wōldz). Range of hills in Gloucestershire, England, some 50 m. long, between Bristol and Chipping Camden. They rise to 1,070 ft. in Cleve Cloud, near Cheltenham, but average 500–600 ft.

COTTA. German publishing house established at Tübingen in 1659. **JOHANN FRIEDRICH C.** (1764–1832) pub. the works of Schiller, Goethe, Jean Paul, etc., and founded the *Allgemeine Zeitung* (1798).

COTTBUS. See **KOTTBUS**.

COTTET (kotēh'), Charles (1863–1925). French painter, best known for his paintings of life in the coastal region of Brittany.

COTTON, Sir Robert Bruce (1571–1631). English antiquary. At his home in Westminster he built up a fine collection of MSS. and coins, many of which had come from the despoiled monasteries. His son, Sir Thomas C., added to the library, and in 1700 it was bestowed on the nation by Sir John Cotton. Its contents are in the British Museum.

COTTON, Thomas Henry (1907–). British golfer. B. in Cheshire, he won the British Open Championship in 1934, 1937 and 1948.

COTTON. Commercial cotton mainly processed by industry consists of the fibres surrounding the seeds in the ripened fruit or boll. Most frequently cultivated is *Gossypium herbaceum*, believed to be of eastern origin, but introduced to America in the 18th cent. However, the longest fibres come from Sea Island Cotton (*Gossypium barbadense*), considered to be a native of the New World and now grown in the West Indies, which is so named from its early cultivation on the islands that fringe Georgia and South Carolina. Many cultivated cottons are hybrids.

The C. shrub grows 4–5 ft. and requires 200 days free from frost coupled with moderate rainfall or irrigation. Bright sunshine and rich soil are important for the ripening of the bolls. In the U.S.A. the seed is sown in March or April and the C. is picked in late summer or autumn. The principal C. lands of the world are in the sub-tropical regions. In the U.S.A. the principal States are in the South from the Carolinas and Georgia to Texas, Arizona and California, excluding the swampy Gulf Coast and Florida. The other main C.-growing areas in order of importance

BRITISH GUIANA. See GUYANA.

BRITISH HONDURAS. British crown colony on the Caribbean Sea adjacent to Guatemala and Mexico. The coastal area is low and swampy, but inland it rises to mountains of considerable height. Numerous small rivers flow into Honduras Bay, on which stands Belize, the cap. and chief seaport. Most of the people are of mixed blood, descending from Negro slaves, native Indians, and British, Spanish, and German buccaneers and settlers. More than 90 per cent of the land is covered with forests, and much fine timber is exported. Tropical products are grown and cattle are reared. The climate is tropical.

Woodcutters from Jamaica were probably the first settlers about 1638. In the 18th cent. large numbers of Negro slaves were imported. The Spaniards continued to dispute possession of the country until 1798 when it came under British control; in 1862 it became a colony, subordinate to Jamaica, and in 1884 a separate colony. Under the constitution of 1964 it has a gov. and national assembly (House of Reps. and Senate). Guatemala lays claim to B.H. and in 1968 the B.H. and Brit. govts. rejected the proposals of a U.S. mediator for settlement of the dispute since they failed to recognise B.H.'s right to independence. Area 8,867 sq. m.; Pop. (1966) 111,255.

BRITISH INDIAN OCEAN TERRITORY. British colony in the I.O. estab. in 1965 to provide certain defence facilities for the govts. of the U.K. and U.S.A. It consists of the Chagos Archipelago c. 1200 m. N.E. of Mauritius, by which it was formerly admin., which has a pop. of 1,000; and the is. of Aldabra (pop. 100), Farquhar (172), and Desroches (112) some 300 m. northwards of Madagascar, which were formerly admin. by the Seychelles. The B.I.O.T. has its admin. centre at Victoria on Mahé in the Seychelles. Area 72 sq. m. incl. lagoons; pop. (1965) 1,400.

Diego Garcia, largest is. of the Chagos Archipelago, is on the direct staging route from the U.K. to Australia and the Far East, via the Red Sea, and has a good airfield site: the excellent harbour was used by the Navy in the S.W.W. Copra, salt fish, and tortoise shell are exported. Pop. c. 500.

BRITISH ISLES. Group of islands off the N.W. coast of Europe, consisting of Great Britain (England, Wales, and Scotland), Ireland, the Channel Islands, Orkney and Shetlands, Isle of Man, and many others which are included in various counties, e.g. Isle of Wight, Scilly Isles, Lundy Island, and the Inner and Outer Hebrides (qq.v.). The islands are divided from Europe by the North Sea, Strait of Dover, and English Channel, and face the Atlantic to the W.

BRITISH LEGION. Organization to promote the welfare of veterans of war service and their dependants. Estab. under the leadership of Haig in 1921 (royal charter 1925) it is open to both men and women; it is non-political. The sale on Remembrance Sunday of Flanders poppies made by disabled members raises much of its funds.

BRITISH MUSEUM. Largest and most important museum of the U.K. Founded in 1753 with the purchase of Sir Hans Sloane's library and art collection, and the subsequent acquisition of the Cottonian, Harleian, and other libraries, the B.M. was opened at Montagu House, Bloomsbury, in 1759. Rapid additions led to the construction of the present buildings (designed by Sir Robert Smirke) by 1852, with later extensions in the circular reading room (1857), and the N. wing or Edward VII galleries (1914). In 1881 the Natural History Museum was transferred to S. Kensington, and in 1906 and 1932 respectively provincial and London newspapers were stored at Colindale. The B.M. library receives a copy of every publication issued in the U.K., and contains about 5,500,000 printed vols., and some 55,000 MSS.

BRITISH THERMAL UNIT (Btu). The amount

of heat required to raise 1 lb. of water through 1°F. **BRITISH VOLUNTEER PROGRAMME.** Name by which the various schemes under which volunteers from the U.K. are sent to work in overseas developing countries have been known since 1966. They number c.1000 graduates and c.500 school leavers or cadets annually, and serve up to 2 years. Voluntary Service Overseas (1958) is the best-known of these organisations, which inspired the American Peace Corps (q.v.).

BRITTAIN, Vera (1894—). British writer. B. in Staffs, she was a V.A.D. nurse 1915–19, and pub. a vol. of reminiscences *Testament of Youth* (1933) and a biography of her friend Winifred Holtby (q.v.) *Testament of Friendship* (1940).

BRITTANY. Ancient division and former independent duchy, later prov., of France, which covered its N.W. peninsula and was in 1790 divided into depts. (Finistère, Côtes-du-Nord, Morbihan, Loire-Atlantique, Ile-et-Vilaine). The land is one of ridges and valleys; rivers are short and torrential. The sea is the dominating factor, and the Bretons are noted fishermen and mariners.

B. was the Roman Armorica, which was devastated by the Northmen after the Roman withdrawal. During the Angle and Saxon invasions of Britain, many Celts from that land joined their fellow Celts in B., which thus acquired its name. It became a duchy about 1000, lost much of its independence following the marriage in 1491 of Anne, Duchess of Brittany, to Charles VIII of France, and was formally annexed to the French crown in 1547. Rennes is the chief town; Brest is an important civil and naval port. The Breton language is close to Welsh and Cornish.

BRITTEN, Edward Benjamin (1913—). British composer. B. at Lowestoft, he was ed. at Gresham's School, Holt, and the R.C.M. In America when the S.W.W. broke out, he returned in 1942 and devoted himself to composing at his home in Aldeburgh, Suffolk, where he estab. an annual music festival. He is known for his songs — he has often accompanied the tenor, Peter Pears — and also for his operas, *Peter Grimes* (1945) based on a tale by Crabbe, the chamber opera *The Rape of Lucretia* (1946), *Billy Budd* (1951), and *A Midsummer Night's Dream* (1960). His oratorio *A War Requiem* (1962) was written for the dedication of Coventry Cathedral. He was awarded the O.M. 1965.

BRIXHAM. Seaside resort in the C.B. of Torbay Devon, England, 6 m. S.W. of Torquay. William of Orange (William III) landed here in 1688. Pop. (1961) 10,679.

BRNO. Industrial town and the 2nd city of Czechoslovakia, at the junction of the Svratka and

BRITTEN. Greatest in stature among modern English composers, Britten could also have made a pre-eminent name as pianist or conductor. He is here seen at rehearsal, for a B.B.C. concert with the London Symphony Orchestra.

Photo: Godfrey MacDonnic.

War of American Independence, is now within the city of B. Pop. (1960) 697,197.

BOSTON. Seaport (bor. from 1545) in Lincs., on the Witham, 4 m. from its mouth. The church of St. Botolph is England's largest parish church, and one of its finest; its tower, known as 'Boston Stump', is a landmark for seamen. In 1882 a dock was built, and the river deepened for seagoing vessels. B. has water connections with all parts of the Fen country. Pop. (1961) 24,903.

BOSTON TERRIER. American breed of dog, but British in origin. It is on terrier lines, but with the short head of the bulldog. The coat is black with a white blaze on the head, white collar and 'socks'.

BOSWELL, James (1740–95). Scottish biographer and man-of-letters. B. at Edinburgh, the son of the judge Alexander B., Lord Auchinleck, he studied law but centred his ambitions on literature and politics. He first met Johnson in 1763 before setting out on the Continental tour during which he met Rousseau, Voltaire, and General Paoli, whom he commemorated in his popular *Account of Corsica* (1768). In 1766 he was admitted as an advocate, and in 1772 renewed his acquaintance with Johnson in London, as became his custom almost every year. Establishing a place in his intimate circle, he became a member of the Literary Club in 1773, and in the same year accompanied Johnson on the journey later recorded in the *Journal of the Tour to the Hebrides* (1785). On his succession to his father's estate in 1782, he made further attempts to enter Parliament, was called to the Eng. bar in 1786, and was Recorder of Carlisle 1788–90. In 1789 he settled in London, and in 1791 produced the greatest of Eng. biographies, the *Life of Johnson*. His long-lost personal papers were acquired for publication by Yale Univ. in 1949. See ISHAM, RALPH.

JAMES BOSWELL

BOSWORTH. Last battle of the Wars of the Roses, fought on 22 Aug. 1485 near the village of Market B., 12 m. W. of Leicester. Richard III, the Yorkist king, was defeated and slain by Henry of Richmond, who became Henry VII.

BOTANY. The study of plants; this is subdivided into a number of smaller studies, e.g. the distinction of the differences and resemblances of plants is termed taxonomy, their external formation plant morphology, their internal arrangement plant anatomy, their microscopic examination histology, their life history plant physiology, and their distribution over the earth's surface in relation to their surroundings, plant ecology. Palaeobotany concerns the study of fossil plants, while economic B. deals with the utility of plants. Horticulture, agriculture, and forestry are specialized branches of B.

The most ancient botanical record is carved on the walls of the temple at Karnak, about 1500 B.C. The Greeks in the 5th and 4th cents. B.C. used many plants for medicinal purposes, the first Greek Herbal being drawn up about 350 B.C. by Diocles of Carystus. Botanical information was collected into the works of Theophrastus of Eresus (380–287 B.C.), a pupil of Aristotle, who founded the technical plant nomenclature. Cesalpino in the 16th cent. sketched out a system of classification based on flowers, fruits, and seeds, while Jung (1587–1658) used flowers only as his criterion. John Ray (1627–1705) arranged plants systematically, based on his findings on fruit, leaf, and

flower, and described about 18,600 plants. Swedish Carl Linné or Linnaeus (1707–78), who founded systematics, included in his classification all known plants and animals, working them into a rigid framework, and giving each a binomial descriptive label. Banks, Solander, Brown, Bauer, and others travelled throughout the world studying plants, and found that all could be fitted into a systematic classification based on Linnaeus' work. Linnaeus was also the first to recognize and accept the sexual nature of flowers, this work being followed up later by Sprengel, Amici, Robert Brown, and Charles Darwin. Later work revealed the detailed cellular structure of plant tissues, and the exact nature of photosynthesis and the manufacture of plant food. Sachs (1832–97) defined the function of chlorophyll, and the significance of plant stomata. Engelmann (1843–1909) worked on the effect of the spectrum on chlorophyll; the effect of nitrogen on plant life was revealed about the same time, and the study of plant functions has assumed a comprehensive form.

BOTANY BAY. Inlet on the E. coast of Australia, 5 m. S. of Sydney, N.S.W. Discovered by Capt. Cook in 1770, it was so named by him on account of the variety of plants found on its shores by Joseph Banks, the expedition's botanist. Chosen in 1787 as the site for a penal colony, it proved unsuitable, and the settlement was made where Sydney stands. But the name B.B. continued to be popularly used for any convict settlement in Australia.

BOT-FLIES. Group of dipterous insects, forming the family Oestridae. The larvae are parasitic, internally or externally, on horses, sheep, cattle and deer.

BOTHA (bō'ta), Louis (1862–1919). S. African soldier and statesman, b. at Greytown, Natal, of Boer parents. Elected a member of the Volksraad in 1897, he supported the more moderate Joubert

BOTANY. A selection from thousands of botanical terms.

years in prison as a conscientious objector, entered Parliament in 1929, and has campaigned vigorously for the freedom of colonial peoples. *Inside the Left* (1942) was a political autobiography. He became a life peer 1964.

BRODIE, Israel (1895–). Chief Rabbi of the United Hebrew Congregations of the British Commonwealth 1948–65, and senior Jewish Chaplain to the Forces 1944–8. In 1964 he upheld the conservative position in the dispute over orthodoxy.

BROGAN, Sir Denis (1900–). British expert on French and U.S. affairs. B. in Glasgow, he became prof. of political science at Cambridge, and has pub. *The Era of Franklin D. Roosevelt* (1952), *The French Nation* (1957), *America in the Modern World* (1961), etc. He was knighted in 1963. His brother Colm B. (1902–) is well-known as a journalist.

BROKEN HILL. Mining town in N.S.W., Australia, in a district containing rich deposits of zinc, lead, tin, and silver. Pop. (1966) 30,023.

Another **BROKEN HILL** (re-named Kabwe in 1967) is the H.Q. of Central Prov., Zambia. It is served by hydro-electric stations at Mulungushi and Lunsemfwa and copper and cadmium are mined. Pop. 45,500.

BROMBERG. German name for Bydgoszcz.

BROMFIELD, Louis (1896–1956). American novelist. B. in Mansfield, Ohio, he studied agriculture at Cornell univ. and was subsequently to use the proceeds of his successful *The Rains Came* (1937) to estab. himself as a farmer. Some of his books have only the facility of the journalist, a profession he followed for some years, but exceptions are *The Strange Case of Miss Annie Spragg* (1928) and *Mrs. Parkington* (1943) dealing with the golden age of N.Y. society.

BROMINE. A chemical element, a dark brown-red liquid, very volatile, and with an unpleasant irritating smell – whence the name given to it in 1826 by its discoverer Balard (Gk. *bromos*, a stench). Its symbol is Br; atomic weight 79.92 and atomic number 35. It does not occur free in nature, but its compounds are found in sea water, mineral springs, etc.

Bromides, formed by combining metallic elements with B., e.g. potassium bromide, are used in medicine as sedatives.

BROMLEY. Bor. of Greater London from 1965, on the Ravensbourne. The palace of the bps. of Rochester (1777) is now a teachers' training college. H. G. Wells was born in B. Pop. (1967) 302,660.

BRONCHITIS. Inflammation of the bronchi. *Acute*

B. is the most common acute disease of the lungs. It may be due to sudden exposure to cold, but is more usually caused by extension of a cold in the head. It may develop into *Chronic B.*

BRONOWSKI (bronoſki), Jacob (1908–). British scientist. B. in Poland, he settled in England in 1920 and was ed. at Jesus Coll., Cambridge. In 1942 he became head of a number of mathematical units dealing with the statistical and economic effects of bombing. At the end of the war he was Scientific Deputy to the British Chiefs of Staff Mission to Japan. In 1959–64 he was Director-General of Process Development in the N.C.B. He is author of the classic radio

BRONOWSKI. Well known for his forthright appearances on television and radio in the U.K., Dr. Bronowski also has a reputation in the U.S. and in 1964 became deputy director Salk Institute for Biological Studies.

play *The Face of Violence* and of the philosophical

THE BRONTË SISTERS. Emily, Anne and Charlotte, painted by their brother Patrick Branwell c. 1835.

Photo: N.P.G.

treatise *The Western Intellectual Tradition* (1960).

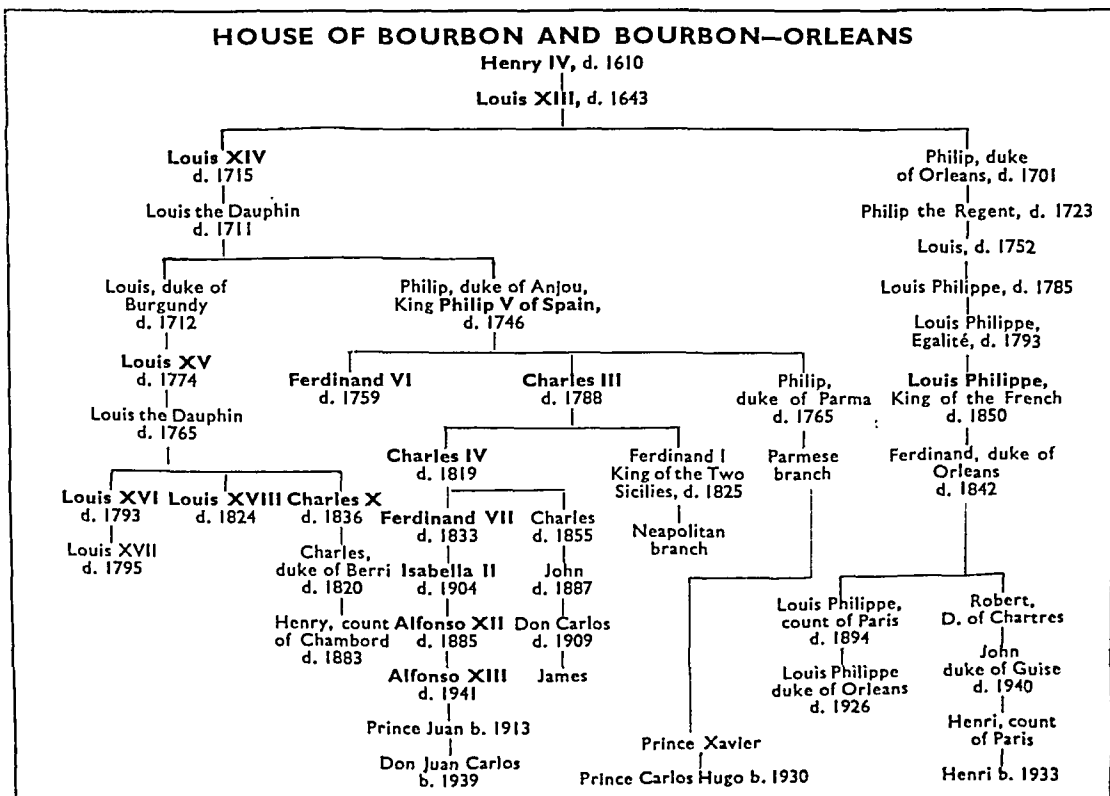

BRONTË. Name of three sisters, famous as novelists: **CHARLOTTE** (1816–55), **EMILY JANE** (1818–48), and **ANNE** (1820–49). The daughters of an Irish clergyman, Patrick B. (1777–1861), they were b. at Thornton, near Bradford, whence in 1821 the family moved to Haworth. After their mother's death the sisters and their brother **PATRICK BRANWELL** (1817–48) were brought up by an aunt. In 1824 the older girls went to a school for clergymen's daughters, but were soon removed; Charlotte later described the school as 'Lowood' in *Jane Eyre*. For some years the sisters earned their living as governesses, and in 1842 Charlotte and Emily entered Mr. Héger's school at Brussels; Emily returned to Haworth on their aunt's death, but Charlotte, who had conceived a hopeless passion for Héger, did not finally leave Brussels until 1844. Meanwhile Branwell, who shared something of his sisters' genius, had become a drunkard and an opium addict. The sisters now discovered that each was secretly engaged in literary activity, and in 1846 they pub. a joint collection of poems under the pseudonyms of Currer, Ellis, and Acton Bell. Charlotte's first novel, *The Professor*, failed to find a publisher, though Emily's *Wuthering Heights* and Anne's *Agnes Grey* were accepted. *Jane Eyre*, issued in 1847, won a sensational success. During 1848–9 Branwell, Emily, and Anne all d. of consumption. *Shirley*, dealing partly with the Luddite riots, appeared in 1849, and *Villette* in 1853; it derives largely from Charlotte's Brussels experiences. Abandoning her anonymity, she visited London, and made the acquaintance of Thackeray, Harriet Martineau, and her biographer, Mrs. Gaskell. In 1854 she m. her father's curate, A. B. Nicholls, but their happy married life was cut short by her death a year later. Emily's only novel, *Wuthering Heights*, a share in which has been claimed for Branwell on insufficient evidence, is a work of strange, wild power unique in English literature. The same power is discernible in her poems, which are greatly superior to those of her sisters. Anne's two novels, *Agnes Grey* and *The Tenant of Wildfell Hall*, are mainly interesting through their author's association with her greater sisters.

BRONZE. Alloy of copper and tin, yellow or brown in colour; one of the first metallic alloys known to man. It is harder than pure copper and more suitable for casting. It contains 4–11 per cent

BOULOGNE-SUR-MER (boolōny'-sūr-mār). French port and seaside resort on the English Channel, Pas-de-Calais dept., and French terminus of the cross-

SIR ADRIAN BOULT
Photo: Godfrey MacDomnic.

BOURBON (boorboŋ'). A royal house of Europe whose members have occupied the thrones of France,

Kansas in 1855. In 1856 he was responsible for the 'Pottawatomie massacre' when 5 pro-slavery farmers were killed. In 1858 he formed a plan for a refuge for runaway slaves in the mountains of Virginia. With 18 men, he seized, on the night of 16 Oct. 1859, the govt. arsenal at Harper's Ferry in W. Virginia, and resisted all attacks until on 18 Oct. U.S. marines under Col. Lee stormed the place. B. was seriously wounded. He was tried at Charleston and hanged on 2 Dec. In the northern states B. was quickly hailed as a martyr. The words of the song 'John Brown's Body' were written c. 1860, probably by Thomas B. Bishop: the tune is of uncertain origin.

BROWN, John (1810–82). Scottish essayist. B. in Lanarkshire, he became a physician at Edinburgh, and is remembered for his vols. of essays, *Horae Subsecivae* (Leisure Hours), pub. in 1858 and 1861.

BROWNE, E(lliott) Martin (1900–). British theatrical producer, famous for his presentation of T. S. Eliot's plays in London and N.Y. He was visiting prof. in religious drama at the Union Theological Seminary, N.Y., 1956–62.

BROWNE, Maurice (1881–1955). British actor-manager. With Harold Munro (q.v.) he gave encouragement to the Georgian poets, then went to the U.S. and founded with Ellen Van Volkenburg the influential Chicago Little Theatre in 1912. Among his London productions was the sensationally successful *Journey's End*.

BROWNE, Robert (1550–1633). English Puritan leader, founder of the Brownists. B. near Stamford, he took to preaching in Norwich, and was several times in prison in 1581–2 for attacking Episcopalianism. For a time he retired to Middelburg in Holland, but later made his peace with the Church and became master of Stamford Grammar School. From 1591 he was a rector in Northants.

The community which B. founded in Norwich and Holland continued on Nonconformist lines, developing into modern Congregationalism. In a work pub. in 1582 B. advocated doctrine.

BROWNE, Sir Thomas (1600–62). English author and physician. B. in London, he travelled widely on the Continent as a student of medicine before settling at Norwich in 1637. He cultivated a personal mode of expression which still gives value to his main works: *Religio Medici* (1643), a justification of his profession; *Vulgar Errors* (1646), an examination of popular legend and superstition; *Urn Burial and The Garden of Cyrus* (1658); and *Christian Morals* (1717). He was knighted in 1671.

BROWNIAN MOVEMENT. When colloidal particles are suspended in a fluid medium they are subjected to impacts from the molecules of the medium and are in continuous random motion. This phenomenon was first observed by Robert Brown in 1827.

BROWNING, Elizabeth Barrett (1806–61). British poet. B. near Durham, née Barrett, she fell from her pony in girlhood and injured her spine, and was treated by her father as a confirmed invalid. In 1844 she pub. *Poems* (incl. 'The Cry of the Children'), which led to her friendship and secret marriage with Robert B. in 1846. The *Sonnets from the Portuguese* (1847) were written during their courtship and represent her work at its best. Freed from her father's oppressive influence, B.'s health improved, and during the years in Italy she wrote *Casa Guidi Windows* (1851), the poetic novel *Aurora Leigh* (1857), and other verse.

BROWNING, Sir Frederick Arthur Montague (1896–1965). British soldier, deputy commander of the 1st Airborne Army at Arnhem in 1944 and Chief-of-Staff S.E.A.C. 1944–6. He held posts in the Royal Household after retiring from the army in 1947, and from 1959 was Extra Equerry to the Queen and Duke of Edinburgh. See DAPHNE DU MAURIER.

BROWNING, Robert (1812–89). Poet. B. in Cam-

THE BROWNINGs. Bronze cast of the clasped hands of the poets by Harriet Hosmer, 1853. Photo: N.P.G.

berwell, he wrote his first poem *Pauline* (1833) under the influence of Shelley; it was followed by *Paracelsus* (1835) and *Sordello* (1840), which marked the development of his use of psychological analysis and interest in obscure characters of literature and history. In 1837 he achieved moderate success with his play *Strafford*, and in the series of *Bells and Pomegranates* (1841–6), which contained *Pippa Passes* (1841), *Dramatic Lyrics* (1842) and *Dramatic Romances* (1845), he included the dramas *King Victor and King Charles*, *Return of the Druses* and *Colombe's Birthday*.

In 1846 he met Elizabeth Barrett, whom he m. the same year and took to Italy. Here he wrote *Christmas Eve and Easter Day* (1850); and *Men and Women* (1855), containing some of his finest love-poems and dramatic monologues, which were followed later by *Dramatis Personae* (1864), and *The Ring and the Book* (1868–9), based on an Italian murder story. After his wife's death in 1861 B. had settled in England and now enjoyed an established reputation, although his latest works such as *Red-cotton Night-Cap Country* (1873), *Dramatic Idylls* (1879–80), and *Asolando* (1889), still prompted opposition by their rugged obscurity of style. Although the charge of facile optimism is unfounded, B. is less valued today for his philosophy than for the range of his poetry. The *Pied Piper of Hamelin*, *Home Thoughts from Abroad*, *Rabbi ben Ezra*, etc., are constant anthology pieces.

BROWN SHIRTS. The S.A. (*Sturm-Abteilung*), or Storm Troops, the private army of the German Nazi Party; so called from their uniform.

BRUBECK (broo'bek), Dave (David Warren) (1920–). American jazz musician. B. at Concord, California, he studied the piano and worked under Darius Milhaud at Mills Coll., Oakland (1946–9), beginning to record in 1950. He is a jazz 'intellectual' and his quartet (formed 1951) combines improvisation with the disciplines of modern classical music.

BRUCE, David (1898–). American diplomat. B. in Baltimore, Maryland, where he practised law, he has been ambassador to France 1949–52, W. Germany 1957–60, and the U.K. from 1961. One of the few Democrats to hold office in Eisenhower's administration, he was the President's special representative in Europe 1953–5, assisting the negotiations which led to the adoption of the Western-European Union Treaty.

BRUCE, James (1730–94). Scottish explorer. He was British consul at Algiers (1763–5), and then set out to explore the Roman remains in the Near East. Starting from Alexandria in 1768 he reached the source of the Blue Nile in 1770, and followed the river downstream to Cairo by 1773.

BRUCE, Robert (1274–1329). Scottish hero. He was the grandson of Robert de Bruce (1210–95), who unsuccessfully claimed the Scottish throne in 1290. B. shared in the national rising led by Wallace, and soon after the latter's execution in 1305 he rose again

The game can be played as singles, pairs, or rinks (4 men a side).

BOWRA, Sir Cecil Maurice (1898–). British classical scholar. Warden of Wadham Coll., Oxford, from 1938, he has pub. such outstanding studies as *Greek Lyric Poetry* (1936), *From Virgil to Milton* (1945), *The Romantic Imagination* (1950) and *Primitive Song* (1962). He was knighted in 1951.

BOX. Genus of shrub, and small trees (*Buxus*) of the family Euphorbiaceae. The common box (*B. sempervirens*) has compact evergreen foliage.

BOXER. Medium-sized dog of continental origin, with a short, smooth coat, and in a wide range of colour.

BOXERS. Name given to bands of fanatical Chinese nationalists who in 1900 at the instigation of the Empress Dowager besieged the foreign legations in Peking, and murdered European missionaries and thousands of Chinese converts. An international punitive force was dispatched, Peking was captured on 14 Aug. 1900, and China agreed to pay a large indemnity.

BOXING. Fighting with the fists, originally using the bare knuckle and without 'rounds', though later each fall marked the end of a round and a fight of 276 such rounds is on record.

Jack Broughton (1705–89), English champion for many years, is said to have introduced gloves, though only for practice bouts. B. became popular with the nobility or 'Corinthians' (See JOHN JACKSON), but only lost its reputation for brutality with the introduction of the Queensberry Rules (drawn up by the 8th Marquess in 1866), which with certain modifications still obtain in Britain, but have been superseded in the U.S. by those of the Amateur Athletic Union of America. Official professional organizations are the B. Board of Control in Britain and the Nat. B. Asscn. and N.Y. State Athletic Commission in the U.S.: the British amateur body is the Amateur B. Asscn. B. champions are classified according to weight as heavyweight (no limit), light heavyweight (175 lb.), middle-weight (160 lb.), welter-weight (147 lb.), lightweight (135 lb.), featherweight (126 lb.), bantam-weight (118 lb.), and flyweight (112 lb.). Outstanding heavyweight champions have been John L. Sullivan (bare-knuckle champion) 1882–92, James J. Corbett (1st Marquess of Queensberry champion) 1892–7, Jack Dempsey 1919–26, Joe Louis 1937–49, Floyd Patterson 1956–9 and 1960–2, and Cassius Clay (q.v.) from 1964—all of U.S.A.

BOYCOTT, Charles Cunningham (1832–97). Land agent of Lord Erne in co. Mayo, Ireland, who strongly opposed the Irish Land League, with the result that the peasants refused to work for him; thus arose the word 'boycotting'.

BOYD ORR, John, 1st baron (1880–). British nutritional expert, an advocate of world federalism. In 1936 he caused a sensation by proving in *Food, Health and Income* that half the nation was undernourished, and was director-general of the F.A.O. 1945–8. In 1949 he was awarded a Nobel peace prize.

BOYE, Karin (1900–41). Swedish poet and novelist. Her first poems appeared in 1922. Her novel *Kallacain* (1941) was concerned with totalitarian ideology.

BOYER (bwah-yeh'), Charles (1899–). French actor. Going to Hollywood in 1934, he made a reputation as 'the great lover' in such films as *Mayerling*.

BOYLE, Charles, 4th earl of Orrery (1676–1731). Irish soldier and diplomatist who was worsted in his dispute with Bentley over the authenticity of the

BOXER

Letters of Phalaris. The orrery, a contrivance for studying the solar system, is named after him.

BOYLE, Sir Edward Charles Gurney (1923–). British Cons. politician. He entered parliament in 1950, and became Economic Sec. to the Treasury (1955–6) resigning at the Suez crisis; Parl. Sec. to the Treasury (1959–62), and Min. of Education (1962–4).

BOYLE, Kay. Pseudonym of the American author Baroness Joseph von Frankenstein (1903–). B. in St. Paul, Minnesota, she has written vols. of short stories such as *Wedding Day* (1930), and psychological novels incl. *Plagued by the Nightingale*.

BOYLE, Robert (1627–91). Irish natural philosopher, 7th son of the 1st earl of Cork. From 1654 he lived in Oxford. In 1659 he discovered the elasticity of air, and in 1662 enunciated *Boyle's Law*: that the volume of a gas varies inversely with its pressure. He was one of the founders of the Royal Society, and in 1661 pub. *The Sceptical Chemist*. He studied the Bible languages, and by his will founded the B. lectures for the defence of Christianity.

BOYNE. Irish river, 70 m. long, flowing past Drogheda into the Irish Sea. It gives its name to the battle fought on 11 July 1690, near Drogheda, in which James II was defeated by William III.

BOY SCOUTS. Non-military and non-political youth organization originating with an experimental camp held in 1907 for 24 boys from every class of society by Baden-Powell (q.v.) on Brownsea Is., Poole Harbour, Dorset. The island was in 1962 acquired by the National Trust. Baden-Powell's book *Scouting for Boys* (1908) led to the incorporation of the B.S. Asscn. by royal charter in 1912, and the movement has spread throughout the Commonwealth as well as to foreign countries. The corresponding organization for girls is the Girl Guides, inc. by royal charter in 1922. The scheme was introduced to the U.S. by William D. Boyce, a Chicago publisher who had visited England and met Baden-Powell and the Boy Scouts of America were inc. in 1910: a similar organization for girls, the Girl Scouts of the U.S.A., was founded in 1912. World membership: Scouts 10,000,000, Guides 6,000,000.

BOZEN. German form of BOLZANO.

BRABANÇONNE (brahboñson'), La. National anthem of Belgium, written and composed during the revolution of 1830.

BRABANT. District of W. Europe, comprising the Belgian provinces of Brabant and Antwerp and the Dutch province of N. Brabant. During the Middle Ages it was an independent duchy, and after passing to Burgundy, and thence to the Spanish crown, was divided during the Dutch War of Independence. The southern portion was Spanish until 1713, then Austrian until 1815, when the whole area was included in the Netherlands. In 1830 the influential French-speaking part of the pop. in the southern Netherlands rebelled, and when Belgium was recognized in 1839, S. Brabant was included in it. The Dutch prov. of N. Brabant has an area of 1,921 sq. m.; pop. (1966) 1,700,866; cap. 'sHertogenbosch. Brabant prov. Belgium, is 1,267 sq. m. in area; pop. (1966) 2,130,276; cap. Brussels.

BRABAZON OF TARA, John Theodore Cuthbert Moore-Brabazon, 1st baron (1884–1964). British pioneer motorist and the 1st English aviator. During the F.W.W. he was in the R.F.C. He was a Cons. M.P. 1918–29 and 1931–42, Min. of Transport 1940–1, of Aircraft Production 1941–2, and a peer from 1942.

BRACEGIRDLE, Anne (c. 1663–1748). English actress who made her first London appearance in 1680 and had a brilliant career on the stage until 1707, esp. in Congreve's plays, and she may have secretly married him.

BRACHIOPODA (braki-o'pōda), or Lamp-shells. Group of marine animals, usually treated as a separate, isolated phylum. They have 2 shells placed dorsally

belief in the Copernican system of astronomy, and was burnt at the stake.

BRUNO, St. (c. 1030–1101). Founder of the Carthusian order. B. in Cologne, he became a priest, and controlled the cathedral school of Rheims 1057–76. Withdrawing to the mountains near Grenoble, as a result of an ecclesiastical controversy, he founded the monastery at Chartreuse in 1084.

BRUNSWICK. District in the Land of Lower Saxony, (W.) Germany. Once an independent duchy, it became a rep. in 1918.

The city of B., on the Oker, 32 m. S.E. of Hanover, was one of the chief cities of N. Germany in the Middle Ages, and a member of the Hanseatic League. It was cap. of the duchy of B. from 1671. There is a technical univ. Pop. (1966) 231,785.

BRUSA. Alternative form of **BURSA**.

BRUSSELS. Capital city of Belgium on the Senne, 27 m. S. of Antwerp. Notable buildings incl. the 13th cent. church of Ste. Gudule; the 15th cent. Hôtel de Ville, and the Maison du Roi in the Grande Place; the Royal Palace and the Houses of Parliament dating from the 18th cent.; and the univ. founded 1834. B.'s manufactures incl. lace, textiles silk goods, machinery,

BRUSSELS. The brilliant colour of its flower market and the ornate antiquity of the buildings which surround it make the Grande Place one of the most attractive squares in Europe. Courtesy of Belgian National Tourist Office.

chemicals, pottery, clothing, furniture, and *objets d'art*. It has rail and air communications with all the capitals of Europe, and canals connect it with Antwerp and the sea. B. was a Roman settlement, and in the 16th cent. became one of the chief cities of the Low Countries. When these were divided between the Dutch Rep. and Spain, B. remained Spanish, and later became Austrian, then French. It was chosen as cap. of Belgium, recognized by the Powers as independent in 1839. In both World Wars it was occupied by the Germans. Pop. (1966) 1,074,586.

BRUSSELS. Treaty of. Pact signed in Brussels on 17 March 1948 by the Foreign Ministers of Britain, France, and the Benelux countries (Belgium, Netherlands, Luxembourg), which set up Western Union. The contracting parties pledged themselves to an economic, political, cultural, and military alliance for 50 years. The military side of the alliance was in 1950 merged in the North Atlantic Treaty (q.v.).

Following the London Conference of 1954 the German Federal Rep. and Italy entered Western Union (renamed Western European Union) in 1955. (W.) Germany agreed to limit its arms production; and Britain pledged itself to maintain 4 divisions and a tactical air force on the Continent of Europe.

BRUTUS (broo'tus), Marcus Junius (c. 78–42 B.C.). Roman leader. He sided with Pompey against Caesar

during the civil war, but on Pompey's defeat was pardoned by Caesar and raised to high office. He was, however, persuaded to become one of Caesar's assassins in the belief that the restoration of the rep. would follow. But the bulk of the army adhered to Caesar's lieutenant Antony, and Cassius and B. were defeated at Philippi in 42 B.C., whereupon B. committed suicide.

BRUXELLES. French form of **BRUSSELS**.

BRYAN, William Jennings (1860–1925). American Democrat politician. Elected to Congress in 1891, he made his name as an orator, and as champion of the 'free silver' movement. He was defeated as Democratic candidate for the presidency in 1896, 1900, and 1908, but was Wilson's Sec. of State 1913–15.

BRYANSK. See **BIANSK**.

BRYANT, Sir Arthur (1839–). British historian, noted for his studies of Restoration figures such as Pepys and Charles II, and a series covering the Napoleonic Wars of which *The Age of Elegance* (1950) is the most effective. He was knighted in 1954.

BRYANT, William Cullen (1794–1878). American poet. After practising as an attorney, he became a journalist in New York in 1825, and from 1829 was editor-in-chief of the *New York Evening Post*. His verse combines appreciation of nature with Puritan idealism in ethics. His *Thanatopsis* is one of the earliest masterpieces of American poetry.

BRYCE, James, 1st visct. (1838–1922). British statesman. Prof. of civil law at Oxford 1870–93, he entered Parliament as a Liberal in 1880, holding office under Gladstone and Rosebery. An admirer of the U.S. and author of *The American Commonwealth* (1888), he was ambassador to Washington 1907–13, doing much to smooth U.S.-Canadian relations. He received the M. in 1907 and viscountcy in 1913.

BRYONY. Two British climbing hedgerow plants. White B. (*Bryonia dioica*) belongs to the gourd family (Cucurbitaceae). Black B. (*Tamus communis*) is of the same family as the yam (Dioscoreaceae).

BRZESC NAD-BUGIEM. Polish name of **BREST**, White Russia.

BUBBLE CHAMBER. When an ionizing particle moves through a B.C., a vessel filled with a transparent highly super-heated liquid, it may start violent boiling along its path shown by a string of tiny bubbles. Photographic study of these tracks gives much information about the nature and movement of atomic particles and the interaction of particles and radiations. See **GLASER**, Donald.

BUBER (boo'ber), Martin (1878–1965). Israeli philosopher. B. in Vienna, he was driven from a professorship in comparative religion at Frankfurt by the Nazis, and taught social philosophy at the Hebrew Univ., Jerusalem, 1937–51. He attempted the re-appraisal of ancient Jewish thought in modern terms.

BUCCANEERS (Carib, *boucan*, wooden grid for smoking meat, the use of which was borrowed from

the natives of S. Domingo by early French hunters). Name given to the piratical rovers who infested the Spanish American coast in the 17th cent. Though mainly British, some were French, Dutch, and Portuguese; they were united in hatred of Spain and desire to plunder the Spanish Main. Among the most famous Bs. was Henry Morgan (q.v.). The ranks of the Bs. were divided by the outbreak of war between England and France in 1689, and the growth of

BRYONY. The white (left), and black forms.

JOHANNES BRAHMS in his study.

Photo: Paul Popper.

Requiem is best known. He was famed as a pianist and as a performer and conductor of his own works.

BRAILA (brah-ē'lah). Rumanian commercial and naval port on the Danube, 106 m. from its mouth. It exports grain, is connected with the Rumanian oil fields and manufactures man-made fibres, iron and steel, construction machinery, etc. Pop. (1966) 138,587.

BRAILLE (brahy; Eng. brāl), Louis (1809–52). French inventor in 1829 of the system of lettering or embossed dots which is named after him. He himself was blinded at the age of 3.

BRAIN, Dennis (1921–57). British horn player. His father Aubrey Harold B. (1893–) was prof. of this instrument at the R.A.M., where B. studied under him. Hindemith and Britten wrote works specially for him as a soloist.

BRAIN, Walter Russell, 1st baron (1895–1966). British neurologist, consulting physician to the London Hospital and to Maida Vale Hospital for Nervous Diseases. His books incl. *Diseases of the Nervous System*, *Mind Perception and Science* (1951) and *Speech Disorders* (1961). Created a baron in 1962.

BRAIN. That part of the central nervous system contained within the skull. The B. weighs a little over 3 lb. and consists of a soft white substance which during life is almost fluid. The greatest part of this is contained in the 2 cerebral hemispheres, which are situated on either side of the middle line of the skull and together form the cerebrum or great B. The cerebellum or small B. lies below the great B. at the back of the head, within the occiput; it also consists of 2 hemispheres. The medulla (marrow), or hind B., is a short conical structure which connects the B. with the spinal cord. The pons (bridge) joins the lower parts of the cerebellar hemispheres. The mid-B. consists of 2 broad strands of nerve tissue which run from the centre of the cerebral hemisphere to the pons, and of the structures lying over these.

The surface of the cerebral hemispheres is wrinkled (convolutions) or furrowed (fissures). These hemispheres are divided into the frontal, temporal, parietal, and occipital lobes, and the frontal lobes are separated from the parietal lobes by the fissure of Rolando, which divides the B. into the effector area in front – the part which is concerned with action and the receptor area behind – the part which is concerned with receiving stimuli. The outer parts of all the convolutions are made of grey matter which consists of innumerable nerve cells. The remainder of the cerebrum is formed of white matter, made up of nerve fibres. These conduct impulses from the end organs all over the body to the cortex. They cross from one side to the other in the pyramid of the

medulla, a fact which explains why each side of the brain governs the opposite side of the body.

The B. is enclosed by 3 membranes, which separate it from the skull. The cerebro-spinal fluid surrounds the whole of the B., spinal cord, and nerves, in a thin layer to form a kind of water-cushion in which the nerve tissues float.

There are 6 layers of B. cells, connected with certain functions. It is not possible to draw an exact map of the cerebral cortex, but many functions can be localized. Speech is governed by the left hemisphere in right-handed persons, and usually by the right hemisphere in left-handed persons.

BRAINE, John (1922–). British novelist. From Bradford grammar school he went on to selling furniture, working in a bookshop and as a laboratory assistant, before making a career as a librarian. His novel *Room at the Top* (1957), which estab. him as an author, created Joe Lampton, a typical modern go-getter.

BRAINS TRUST. Nickname applied to a group of experts who advised President F. D. Roosevelt on his New Deal Policy.

BRAITHWAITE, Dame Lilian (1873–1948). British actress, with a delightful technique in Noël Coward and Ivor Novello comedies; her latest success was as a lovable murderess in *Arsenic and Old Lace*. In 1943 she received the D.B.E.

BRAITHWAITE, Richard Bevan (1900–). British philosopher. Originally a physicist and mathematician, he was Knightbridge prof. of moral philosophy at Cambridge 1953–67 and has experimented in the provision of a rational basis for religion and moral choice.

BRAMAH, Ernest. Pseudonym of the British short-story writer Ernest Bramah Smith (1868–1948), creator of Kai Lung, a philosophically-minded Chinese, and of Max Carrados, a blind detective.

BRAMAH, Joseph (1748–1814). British inventor. B. near Doncaster, he became a cabinet-maker in London, and invented the B. lock (1784) and a hydraulic press (1796).

BRAMA'NTE (LAZZARI), Donato (c. 1444–1514). Italian architect and painter, whose real name was Donato d'Agnolo. B. at Urbino, he moved to Rome about 1500 and there under Pope Julius II commenced the rebuilding of St. Peter's.

BRAMBLING. A bird (*Fringilla montefringilla*) belonging to the finch family (Fringillidae) which visits Britain in winter, breeding in Asia and N. Europe.

BRAMWELL, George William Wilshire, 1st baron (1808–92). British judge. He was partly responsible for the Companies Act of 1862, and it was at his suggestion that limited liability companies were compelled to add the word 'Limited' to their title. He was made a peer in 1881.

BRANCUSI (brahn'koosh or brahnkoo'zi), Constantin (1876–1957). Rumanian sculptor. B. in S. Rumania, he studied at Bucharest before going to

BRAIN (human).

BUDAPEST. City of central Europe, cap. of Hungary. It lies on the Danube, and consists of Buda on the right bank, which includes the former royal palace and coronation church, and Pest on the left, which includes the houses of parliament, palace of justice, govt. offices, etc. 8 bridges connect the 2 cities. Pest grew rapidly following the establishment of the Dual Monarchy in 1867 when it was made the cap. of Hungary and became the centre of agriculture and trade; it was united with Buda 1872. Between the wars many new industries incl. textiles and chemicals were estab. at B. There is a univ. (1635) and the technical univ. (1856) was reorganized 1967. In 1944–5 the city saw prolonged fighting between the German and Russian armies. Pop. Greater B. (1967) 1,969,000.

BUDDHA and BUDDHISM (boo-). Buddhism, one of the great world religions, originated in India, where it is now extinct, but has spread to other parts of Asia, where it exists in 2 forms. In Ceylon, Siam, Burma, and Indo-China that known as the School of the Elders (Theravada) prevails. Its followers are reckoned at 54 millions. A much later form known as Mahāyāna has spread throughout China, Korea, Japan, Tibet, and Mongolia, with some 470 million adherents.

Buddhism originated with Gautama (c. 563–c. 483 B.C.), the son of a king of the Sākya, a tribe settled near modern Nepal, who was brought up in luxury, but at the age of 29 became aware of human ills and left his wife and home to seek a way of escape from the burdens of existence. After 6 years of extreme austerities he turned to meditation under a tree, the Bodhi tree (tree of Enlightenment) nr. Buddh Gaya, and became enlightened—hence his name Buddha (the Enlightened One). Enlightenment consisted of acquiring the four Truths: the fact of pain or ill; that pain has a cause; that pain can be ended; and the Noble Eightfold Way (right views, right intention, right speech, right action, right livelihood, right effort, right mindfulness, and right concentration) whereby pain may be ended. Adoption of the Way leads to a state of peace, *Nirvana*, the extinction of all craving for the things of sense, though not necessarily the annihilation of the individual. After his enlightenment, Buddha removed to Benares, where he began his teaching and founded the Sangha, or Order of monks. For the rest of his long life he moved here and there about N. India, but chiefly in the Magadha country (Bihar). He died at Kusinagara in Oudh at the age of 80.

The only complete canon of the Buddhist scriptures is that of the Singhalese (Ceylon) Buddhists, written in Pali, but other schools have essentially the same canon in Sanskrit. The scriptures are known as Pitakas or 'baskets', and there are 3 divisions: Vinaya or Discipline, listing offences and rules of life; Sūtra (Discourse) or Dhamma (Doctrine), containing an exposition of B. by Buddha and his disciples; and Abhidhamma or Further Doctrine, consisting of later discussions of the doctrine by various schools.

In common with other Indian religions, B. holds two fundamental doctrines, that of *karma* or action,

the belief that all deeds meet with reward or punishment in this life or in one and another of a long succession of lives; and that of transmigration or rebirth, according to which everyone is reborn in a happy or painful existence, wherein he experiences the fruit of past deeds. In Buddhism there is no belief in a permanent self. The object of the Noble Eightfold Way is to break the chain of *karma* binding the individual to rebirth, by attaining *Nirvana*, when there is final dissociation from the body.

About the beginning of the Christian era arose a new conception of Buddhism, known as *Mahayana*, 'the Great Career', in which the individual is exhorted not merely to attain Nirvana for himself, but to train to become a Buddha, and so save countless others. The elder school that prevails in Ceylon, Siam, and the East Indies is referred to as *Hinayana*, 'Base Career'. Those who set out on this 'Great Career' are called Bodhisattvas, and may be highly revered and even worshipped, much as are the gods of Hinduism. The original Buddhism, if not atheistic, at least found no place for God or gods. To this day the real strength of Buddhism lies in its lofty moral teaching, in particular its toleration and feeling of universal brotherhood, and in recent years there has been a growth of laymen's societies with temples of their own.

BUDDH GAYA (bood'gia). Indian village 6 m. S. of Gaya, in Bihar, where Gautama became Buddha while sitting beneath a Bo (Bodhi) tree, of which a supposed descendant is still preserved there.

BUDENNY (boodyen'ni), Simeon Mikhailovich (1883–). Russian marshal. He entered the army in 1903, joined the Red Army in 1918, when he fought against the 'Whites' under Wrangel, and in 1920 in the Polish War. In 1935 he became a marshal, and in 1940 Commissar of Defence. In 1941 he commanded the Russian armies in the S.W. sector, and eventually joined in the victorious sweep westwards.

BUDGE, Sir Wallis (1857–1934). British orientalist. He was keeper of the Egyptian and Assyrian antiquities at the British Museum 1893–1924, conducted excavations in Egypt and Mesopotamia, and wrote largely on ancient Egypt and Assyria.

BUDGERIGAR (bujrigahr'). Small, hardy species of Australian parrakeet (*Melopsittacus undulatus*). Feeding mainly on grass seeds, it breeds freely in captivity, and while normally bright green, yellow, white, blue, and mauve varieties have been produced.

BUDOJOVICE. See CESKE BUDEJOVICE.

BUDWEIS. German form of Budejovice: see CESKE BUDEJOVICE.

BUENOS AIRES (bwā'nos Ir'es). Cap. of the Argentine rep, largest city in the southern hemisphere, on the W. bank of the estuary of the Río de la Plata, some 150 m. from the sea. Although founded in 1536, B.A. is almost entirely modern, its development dating from its establishment as the cap. of the Argentine rep. in 1853. It is laid out on the American 'gridiron' plan, and there are many fine thoroughfares: e.g. Avenida de Mayo and Avenida de Julio. In the Plaza de Mayo are the cathedral, govt. palace, treasury building, and municipal offices; the Palace of Congress is in the Plaza del Congreso. B.A. has a nat. univ. (estab. 1821) and a great many industrial and manufacturing establishments, incl. meat-packing plants. Hostile Indians caused the first settlers of 1536 to withdraw, but the site was re-occupied in 1586, and in 1776 was made cap. of the viceroyalty of Río de la Plata. Pop. (1960) 3,200,000; of greater B. 7,200,000.

BUFFALO. City and port of U.S.A., in New York state, at the E. end of Lake Erie, close to the mouth of the r. Niagara. It is a leading commercial, industrial, and transport centre, with many large and small industries. Pop. (1960) 532,759.

BUFFALO. Several species of wild cattle, mostly large, distinguished by their horns being flattened at

BUDDHA. A bronze statuette from Kashmir just under 8 in. high, and of the 7–8th century.
Photo: British Museum.

books illustrated by himself which have a similar bold energy of style, incl. *Breakdown* (1960). His wife Jean E. Cooke (1927—) is a sensitive artist in her own right.

BRATISLAVA (brahtislav'a). City and chief port of Czechoslovakia, on the Danube, 38 m. E. of Vienna. A trans-shipment centre, the town has engineering and chemical industries, oil refineries, ship-building yards, and the Slovak univ. founded in 1919. Pop. (1967) 277,000.

BRATTAIN (brat'un), Walter Houser (1902—). American physicist. B. in Amoy, China, son of a teacher, he joined 1929–67 the staff of Bell Telephone Laboratories. In 1956 he was awarded a Nobel prize jointly with William Shockley and John Bardeen for their work on the development of the transistor which replaced the comparatively costly and clumsy vacuum tube in electronics.

BRAUCHITSCH (browkh'itsh), Walther von (1881–1948). German field marshal. A staff officer in the F.W.W., he replaced in 1938 von Fritsch as C-in-C. of the army and became a member of Hitler's 'secret cabinet council'. He was dismissed after the failure before Moscow in 1941. Captured in 1945, he d. before being tried.

BRAUN (brown), Eva (1910–45). German Nazi. B. at Munich, she became secretary to Hitler's photographer and personal friend, Hoffmann. Her name was associated with Hitler's for years, and she is supposed to have married him in the air-raid shelter of the Chancellory at Berlin on 29 April 1945. They then committed suicide together.

BRAUNAU (brow'now). Town and railway junction in Austria, on the Inn, which here forms the frontier with Bavaria, Germany. Adolf Hitler was b. here, 1889. It has an aluminium plant, tanneries, breweries, etc. Pop. c. 12,000.

BRAZIL. Largest of the S. American countries occupying the N.E. part of the great land mass. On the E. and N.E. it faces the Atlantic Ocean, being bordered on the landward side from N. to S. by French Guiana, Surinam (Dutch), British Guiana, Venezuela, Colombia, Peru, Bolivia, Paraguay, Argentina, and Uruguay; thus B. has a land frontier with all the S. American republics except Ecuador and Chile. It has a coastline 4,100 m. in length and an estimated area of 3,287,000 sq. m., making it the 4th largest country in the world, occupying nearly half the total area of S. America.

Geography. B. is a country of plains and plateaux. There are 3 main plains – those of the Amazon and Paraná–Paraguay rivers, and the coastal lowlands. The flat Amazon lowlands in the N. cover some 1,000,000 sq. m. Along the northern frontier are several chains of mountains averaging 3,000–5,000 ft. though Mt. Roraima (q.v.) rises to 8,625 ft. The whole E. and S.E. part of B. is occupied by a great system of scarps and plateaux with a tipped-up scarp edge along the S.E. coast, reaching over 9,000 ft. behind Rio de Janeiro (Pico da Bandeira, 9,462 ft.). B.'s largest river system is that of the Amazon. The São Francisco enters the Atlantic some 80 m. S.W. the Paraná, with its tributary the Paraguay, by the Plate estuary in Argentina. The Equator passes through N.B. and the Tropic of Capricorn through the S. The Amazon basin has a permanently hot, wet climate, and a dense tropical vegetation. Among the almost impenetrable Amazonian forests is found the Pará rubber tree, as well as the Brazil nut, rosewood, and other trees of commercial value. The S. uplands produce Araucaria pine and other timber suitable for furniture. Most of the plateau surface is covered with savanna grassland and scattered trees. In the N. the poor prairie country is dominated by cactus.

POPULATION. In 1967 the population of B. was 87,209,000. The Brazilians are mainly of Portuguese descent, though there is a considerable admixture

BRAZIL. Rising cloud-capped and uninhabited, the plateau of Mount Roraima (q.v.) is believed by the few Indians of the surrounding countryside to be the source of all diamonds in the area, but fear of the evil spirits said to haunt it prevents their venturing near it.

Photo: The Oxford & Cambridge Expedition to South America.

of Indian and Negro blood. In the interior are found native Brazilian Indians. During the past 60 years immigration from Europe and Japan has been considerable. The pop. is concentrated in the coastal areas. The official language is Portuguese. Elementary education is free and compulsory, but illiteracy remains widespread; there are 24 official and 10 Catholic universities.

Economic Development. B. is mainly an agricultural country, with the greatest world production of several crops, such as coffee and castor oil beans, and large crops of cocoa, sugar, and tobacco. Cotton is grown in the S., cacao in the S.E., manioc (tapioca) in the S. centre; non-cultivated products include maté in the S., rubber and B. nuts in the Amazon basin. The castor oil plant grows wild. Excellent cattle and sheep are reared and B. now surpasses Argentina as a livestock producer. Other products include oranges, bananas, rice, wheat, maize, and grapes. The country has large mineral resources, many of them undeveloped. The existing mines are mainly in the S. and S.E. Coal, iron, manganese, nickel, gold, bauxite, and others are worked. Diamonds are found at Diamantina in Minas Gerais, the principal mining state. Emeralds, sapphires, topaz, rock crystal, etc., are also found. Petroleum is worked in Bahia; and hydro-electric power has been developed on the São Francisco r. (Paulo Afonso Falls), the Sorocaba r., and elsewhere. Textiles, automobiles, trucks, and paper are produced. The rivers constitute a principal means of communication, extending with canals to close on 22,000 m. of navigable waterways. There is also a road system, rail network (concentrated in the S.E.) and air services.

Towns. The capital is Brasília (q.v.). The former capital, Rio de Janeiro, has a fine harbour. São Paulo, with its port Santos, is the principal coffee town. Porto Alegre, Salvador, Maceió, Recife, Fortaleza, Belem and Manaus are ports. Bello Horizonte and Diamantina are mining towns.

ADMINISTRATION. Under the constitution of 1967 B. is a Federal Rep. (22 States, 4 Federal Territories and 1 Federal District), and the pres. is indirectly elected by an electoral college of all members of Congress (Senate and Chamber of Deputies) and State legislatures, themselves elected by universal suffrage (except for illiterates).

History. The first European to reach B. in 1500 is reputed to have been a Spaniard, Vicente Yanez Pinzon, and later in the year a Portuguese, Cabral, landed there. B. was claimed by Portugal, and in 1532 coastal settlements were established. From 1632 to 1654 the Dutch had a foothold in the N.E. Rio de Janeiro became the cap. in 1763. When Portugal was

l'homme, which in 1916 placed on record B.'s view that permanent peace was possible only through a league of nations. He received a Nobel Prize in 1927.

BUJUMBURA (bōōjumbōō'rah). Cap. (formerly called Usumbura) of Burundi, on Lake Tanganyika. The Univ. was founded 1960. There is a steamer service to Kigoma in Tanganyika, and an international airport. Pop. 70,000.

BUKHARA (bōōkhah'rah). Ancient city in Central Asia, formerly the capital of the independent emirate of B., annexed to Russia in 1868. It is the cap. of B. region, Uzbek S.S.R., in which it was included in 1924. On a branch of the r. Zarafshan, it is a great Islamic centre, has famous schools and colleges, and makes silk and cotton textiles, leather goods, etc. Pop. (est.) 60,000. Kagan, 9 m. to the S.E., called Novaya (new) Bukhara until c. 1935, grew up round the station on the Transcaspian railway.

BUKHAREST. See BUCHAREST.

BUKHOVINA (bōōkhōv'nah). Region covering c. 4,000 sq. m. in S.E. Europe. Part of Moldavia during the Turkish régime, it was ceded by Turkey to Austria in 1777, becoming a duchy of the Dual Monarchy, 1867–1918; then it was included in Rumania. North B. was ceded to Russia, 1940, and included in Ukraine S.S.R. as the region of Chernovtsy; the cession was confirmed by the peace treaty of 1947. The part of B. remaining in Rumania became the region of Suceava.

BULAWAYO (boolahwah'yō). City of Rhodesia and former cap. of Matabeleland, standing at an alt. of 4,450 ft. on the r. Matsheumlope, a trib. of the Zambesi. Founded on the site of the kraal, burned down 1893, of Lobenguela, the Matabele chief, B. has developed with the exploitation of goldmines in the neighbourhood. Notable buildings include Govern-

BULAWAYO. Laid out on a rectangular plan, Bulawayo has fine wide thoroughfares such as Abercorn Street. Arcades protect from the overhead sun, and market women still carry their traditional headloads.

Courtesy of the High Commissioner for Rhodesia.

ment House, once belonging to Rhodes, who is buried in the Matopo hills above B. It is the centre of the Rhodesian railway system and has an airport. Pop. (1967) 259,000 (incl. 52,000 Europeans and 7,000 non-African other races).

BULB. Instrument of vegetative reproduction characteristic of many monocotyledonous plants, e.g. daffodil, snowdrop, onion. It is composed of the fleshy leaf-bases of the previous year's plant, enlarged by the food material they contain for the nourishment of the new plant.

Bs. are grown on a commercial scale in temperate countries, e.g. in parts of E. Anglia (England), and particularly in Holland.

BULGA'NIN, Nikolai (1895–). Russian soldier. He helped to organize Moscow's defence in the S.W.W., became a Marshal of the Soviet Union in 1947, and was Min. of Defence 1947–9 and 1953–5. On the fall of Malenkov in 1955 he became 'P.M.' (Chmn. of Council of Ministers 1955–8) until ousted by Krushchev, and by 1959 had been stigmatized as anti-Party.

BULGARIA. Republic of S.E. Europe between the Danube on the N., Greece and Turkey-in-Europe on the S. The Balkan mountains form the backbone of the country, but in the S. between these and the Rhodope mountains is a stretch of low land drained into the Black Sea by the Maritsa and other rivers.

Divided from 1964 into 28 provs., B. is mainly agricultural with an ideal climate for cereals; industrial crops include sugar beet, tobacco, rose oil. Exploitation of the forests (covering nearly a third of the country) and of minerals (iron, manganese, copper, lead, pyrites, etc.) is increasing. Textiles and chemicals, especially fertilizers, are the chief industrial products. Oil, discovered in the 1950s and 1960s, is refined at Pleven and Burgas, and a new industrial centre, Dimitrograd, was developed from 1947. The principal towns are Sofia, the cap.; Plovdiv, the agricultural centre; and the Black Sea ports of Burgas and Varna. Area 42,796 sq. m. Pop. (1967) 8,334,000.

History. Under the Romans B. formed the prov. of Moesia Inferior. It was later occupied by Slavs who, conquered in the 7th cent. by the Bulgars from Asia, eventually absorbed the invaders though they gave their name to the country. In 865 Khan Boris adopted Eastern Orthodox Christianity (still the national religion), and under his son Simeon (893–927), who assumed the title of Tsar, B. became a leading power. In 1014 it was absorbed into the Byzantine empire, and although a 2nd Bulgarian empire was founded after the revolt of 1185, the last independent tsar died c. 1393, and B. passed under Ottoman rule until the national revival of the 19th cent. resulted in the creation of an autonomous principality under Turkish suzerainty in 1878, and the declaration of independence by Ferdinand I in 1908. In 1912–13 B. assisted in the defeat of the Turks, but was herself defeated in the 2nd Balkan war in 1913.

In 1915 B. entered the F.W.W. on the side of the Central Powers, and was again defeated; and in 1918 Ferdinand abdicated in favour of his son Boris III, who became virtual dictator from 1934. In 1941 B. became an ally of Germany, and German troops occupied the country, which declared war on Britain and the U.S.A., but never on Russia, though Russia, to compel B. to surrender, declared war against B. in 1943. King Boris d. in 1943 following a visit to Hitler; his son Simeon II lost his throne after a referendum, 1946, and a rep. was proclaimed. Following the 1947 peace treaties, which restored the frontiers of 1919 except that B. retained S. Dobruja ceded by Rumania in 1940, B. adopted a Communist constitution drawn up on the Russian model by Georgi Dimitrov (q.v.).

Language and Literature. Earliest of the Slavonic languages to be reduced to writing (9th cent.), Bulgarian is a member of the southern group, and is written in a modified Cyrillic character. Modern B. literature is not linked directly with the medieval, and was founded in the 19th cent. by Liuben Karavelov (1837–79), the epic poet Petko Slaveikov (1827–95), the lyric poet Christo Botev (1848–76), and the novelist and dramatist Ivan Vaso (1850–1921), who was also the first poet of liberated B. To the late 19th cent. belong Anton Strachimirov (1872–1937), Petko Y. Todorov (1879–1916), Pentcho Slaveikov (1866–1911), and Peyo K. Yavorov (1877–1914). Recent writers incl. Cyril Christov, Dobre Nemirov, Nicolai Rainov, Georgi Karaslavov, Ludmil Stoitinov, Dimitir Polianov, G. Meliv, Elin Pelin (pen-name of Dimitri Ivanov), and the women poets

was captured by the British 26 April 1945, when it was found to have suffered severe damage. The 15th cent. town hall, the 11th cent. cathedral, the Stadthaus, and the merchant hall were some notable old buildings. The industrial part of B. centres on the docks. Pop. (1966) 601,884. The Land of B. consists of the city of B. and Bremerhaven; area 156 sq. m.; pop. (1966) 749,600.

BREMERHAVEN. Port at the mouth of the Weser, Germany, serving as outport for Bremen, 34 m. S.S.E. Pop. (1966) 147,765.

BRENNAN, Christopher John (1870–1932). Australian poet. His poems, pub. in Sydney in 1913, clearly reveal the influence of the French symbolists.

BRENNER PASS (4,495 ft.). Lowest of the Alpine passes, it leads from Trentino-Alto Adige, Italy, to Austrian Tirol, and is about 12 m. long. It is traversed by the rly. from Verona to Innsbruck.

BRENTANO, Klemens (1778–1842). German poet, novelist, and dramatist. B. at Ehrenbreitstein, the son of an Italian merchant, he became a leader of the younger Romantics. His poetry reflects the lyric note of the folk-songs which he and L. A. von Arnim (q.v.) collected (1805–8); his other works include the erotic novel *Godwi* (1802), the mystic religious poems *Romanzen vom Rosenkranz* (1852), and plays. He excelled in lyric narrative and in the popular fairy-story.

BRENTANO, Lujo (1844–1931). German economist, author of works on the medieval guilds, etc., and a prominent pacifist, and won a Nobel peace prize 1927.

BRENTWOOD. English town (U.D.), chiefly residential, in Essex, 18 m. N.E. of London. There is some light industry. Pop. (1961) 51,959.

BRESCIA (bre'shah). Italian city, the fort of the Brescian Alps, 52 m. E. of Milan. It is capital of B. prov., and an episcopal see. Pop. (1966) 197,501.

BRESLAU. German name of WROCLAW.

BREST. French naval base, commercial port, and town on Brest Roads, a great bay at the W. extremity of Brittany, 313 m. W. of Paris. The naval base is well equipped; and the commercial harbour handles a considerable trade. B. has iron and steel works, chemical factories, etc.

As the key to the Channel approaches, B. has changed hands many times. During the F.W.W. it was the port of disembarkation of American troops. In the S.W.W., it was in German occupation 1940–4 as a U-boat base. Pop. (1962) 142,901.

BREST. Town in White Russia S.S.R., U.S.S.R., on the r. Bug, 210 m. S.W. of Minsk. From 1921 to 1939 it was in Poland. The Treaty of Brest-Litovsk (an

older name of the town) between Russia and the Central Powers was signed here in 1918 during the F.W.W. Pop. (1967) 91,000.

BRETON (bre'ton'), André (1896–). French author. Among the leaders of Dada – *Les Champs magnétiques* (1921), an experiment in automatic writing, was one of the most notable products of the movement, he was also a founder of Surrealism, publishing *Le Manifeste du surréalisme* (1924). Of his other works, *Najda* (1928), the story of his love affair with a medium is the most striking.

BRETON. Celtic vernacular of Brittany, belonging to the Cymric group and closely related to the extinct Cornish tongue. It developed from the speech of British emigrants of the 5th and 6th cents. Although superseded by French in the upper prov., B. has never lost its foothold in Lower Brittany; and in the 19th cent. the Romantic revival led to the collection of popular folk-tales, legends, and ballads, followed by the rise of original national poets such as Jaffrennou and Berthou at the end of the century.

BRETTON WOODS. Township in New Hampshire, U.S.A., where an International Monetary Conference was held 1–22 July 1944, under presidency of Henry Morgenthau, U.S. Sec. to the Treasury. At the conclusion of the Conference a Draft of a United Nations' Monetary Agreement was published, providing for the creation of an international monetary fund. See MONEY.

BREUER (broi'-er), Josef (1842–1925). Viennese physician, a discoverer of the form of psychiatric treatment known as Psychoanalysis. He applied it successfully to cases of hysteria, and collaborated with Freud in *Studien über Hysterie* (1895).

BREUIL (broy), Henri (1877–1961). French prehistorian. B. at Mortain, the Abbé B. became prof. of historic ethnography and director of research at the Inst. of Human Palaeontology, Paris, in 1919. He is famed for his establishment of the genuine antiquity of Palaeolithic art and his stress on the anthropological approach to the early history of man.

BREVIARY (Lat., a summary or abridgement). The book of the canonical office in use in the R.C. church. It is usually in 4 vols., one for each season.

BREWER, F. Cobham (1810–97). C. of E. divine, historian, and popular writer. His best-known work is the *Dictionary of Phrase and Fable* (1870).

BREWING. The alcoholic fermentation of an aqueous extract of cereal grains with the addition of hops. The medieval distinction between beer containing hops and ale without hops has now fallen into disuse and in modern terminology beer is strictly a generic term including ale, stout and lager. However, it is usual in Britain to refer to ale as beer and to regard stout and lager as products different from beer. In this usage beer is light coloured and top fermented; stout is dark coloured and top fermented and also contains roasted malt or barley; and lager is light coloured and bottom fermented.

Before the middle of the 19th cent. brewing was localized and even many private houses and institutions made their own beer. With modern transport facilities, production tends to be concentrated in a few large breweries and the beers are nationally distributed. The character of different beers arose originally from the water from which they were brewed, e.g., Burton became the most famous centre for English ale brewing and Pilsen gave its name to the most widely drunk lager, but modern water treatment processes enable brewers to reproduce these beer types from almost any local water supply.

The B. process starts with malted barley which primarily consists of starch and diastatic enzymes. This malt is ground in a mill and mixed with hot water which allows the conversion of the starch to sugars by the enzymes. The aqueous extract of these malt sugars – the 'wort' – may be strengthened by the

BREMEN. Overseas Harbour is one of the most modern of the port's basins. Grain ranks high among Bremen's imports, as the giant elevator and silo in the background illustrate, and the famous A. G. Weser dockyards can be seen to the left of the silo. Courtesy of the German Tourist Information Bureau.

sub-family (Emberizinae) of the finches (Fringillidae), but of heavier build. The Bs. are best represented in the New World, though a number of species are native to the Old, 5 of which breed in Britain: the corn B. (*Emberiza miliaria*), the yellow B. or yellowhammer (*E. citrinella*), the ciril B. (*E. cirius*), the reed B. (*E. schoeniclus*), and the snow B. (*Plectrophenax nivalis*).

BUNUEL (boon'yoo-el), Luis (1900–). Spanish film director, famous for his controversial and often anti-clerical films, e.g., *L'Age d'Or* (1930), *Los Olvidados* (1950) and *Viridiana* (1961).

BUNYAN, John (1628–88). English author. B. near Bedford, the son of a tinker, he followed his father's trade, but at 16 was conscripted into the Parliamentary army. Released in 1646, he passed through a period of religious doubt before joining the fellowship of the Baptists in 1653. In 1660 he was

committed to Bedford county gaol for preaching, where he remained for 12 years, refusing all offers of release on condition that he would not preach again. Chief of the books written during his confinement was *Grace Abounding* (1666) describing his early spiritual struggles. Set free in 1672, he was elected pastor of the Bedford congregation, but in 1675 was again arrested and imprisoned for 6 months in the gaol on Bedford bridge where he began *The Pilgrim's Progress* (1678). The book achieved instant success,

JOHN BUNYAN

Photo: N.P.G.

and a second part followed in 1684. Among his many later publications only *The Life and Death of Mr. Badman* (1680) and *The Holy War* (1682) retain living interest.

BUOYANCY. The lifting effect of a fluid on a body wholly or partly immersed in it. This was studied by Archimedes in the 3rd cent. B.C. His principle states that the upward thrust or apparent loss of weight of a substance wholly or partly immersed in a fluid is equal to the weight of fluid displaced.

BURBAGE, Richard (c. 1567–1619). English actor. He is thought to have been the original Hamlet, Othello and Lear, and built the Globe Theatre c. 1599.

BURBANK, Luther (1849–1926). American plant breeder. B. in Mass., he evolved the B. potato in 1872, and 3 years later settled at Santa Rosa, Calif., where he originated many fruits, vegetables, and flowers.

BURBOT. See Cod.

BURCHFIELD, Charles Ephraim (1893–). American artist. B. in Salem, Ohio, he is noted for landscapes and studies of small-town America, which made him a forerunner of the regionalist movement of the 1930s.

BURCKHARDT, Jakob (1818–97). Swiss historian and art-critic, b. at Basle, where in 1845 he became prof. of history. In 1860 he pub. *The Civilization of the Renaissance in Italy*, a standard work.

BURCKHARDT, John Lewis (1784–1817). Swiss traveller, whose intimate knowledge of Arabic enabled him to travel throughout the Middle East, visiting Mecca disguised as a Moslem pilgrim in 1814.

BURDETT, Sir Francis (1770–1844). English radical. He m. the wealthy Sophia Coutts, dau. of a banker, and having bought a parliamentary seat became a champion of liberal opinion. He was imprisoned in 1820 for censuring the Peterloo massacre, and agitated for parliamentary reform and R.C. emancipation. After 1837, however, he voted with the Conservatives. His dau. Angela Georgina Burdett-Coutts (1814–1906) was created a baroness in 1871 and was a financially able practical philan-

thropist. She was a close friend of Dickens. See COUTTS.

BURDOCK. A plant (*Arctium lappa*), of the family Compositae, a frequent roadside weed in Britain. It is a bushy herb, with hairy leaves, and ripe fruit enclosed in burs which are provided with strong hooks.

BURGAS (boor'gahs). Black Sea port of Bulgaria, handling a large export trade. There is an oil refinery (1963). Pop. (1965) 106,127.

BURGENLAND (boor'genlahnd). S.E. prov. of Austria, extending from the Danube southwards along the western border of the Hungarian plain.

Extensive forests supply timber. Lignite, antimony, and limestone are worked. Eisenstadt (pop. c. 7,000) is the cap. Area 1,531 sq. m.; pop. (1961) 270,875.

BÜRGER, Gottfried August (1747–94). German poet, b. at Halberstadt. In 1773 he became famous with *Lenore*, and he also wrote many other ballads and lyrics.

BURGH (bur'o). A local govt. area in Scotland corresponding to the English borough. Each B. has a town council consisting of provost, magistrates, and councillors.

BURGH (boorg), Hubert de (d. 1243). Justiciar of England. He rose to high office under Richard I, and in 1215 was appointed chief justiciar. His defeat of the French fleet in the Straits of Dover in 1217 ended French intervention in England. Until his dismissal in 1232, he was Henry III's chief minister.

BURGHLEY (ber'li), William Cecil, baron B. (1520–98). English statesman. B. at Bourne, Lincs, and ed. at Cambridge, he became private sec. to the Protector Somerset, and in 1550 one of the king's secretaries. He was deprived of most of his offices under Mary, but on Elizabeth's accession he became one of her most trusted ministers. He was largely responsible for the religious settlement of 1559, and in 1560 persuaded Elizabeth to send an army to Scotland to support the reformers. He also took a prominent part in the events leading up to the execution of Mary Queen of Scots in 1587. In general he was an advocate of caution and moderation, and was at great pains to avoid any breach with Spain before the strength of England was fully prepared. In 1571 he was created Baron Burghley, and in 1572 Lord High Treasurer.

BURGLARY. Formerly the crime of breaking into any dwellinghouse by night, i.e. between 9 p.m. and 6 a.m., with intent to commit a felony: outside these hours the same act was called housebreaking. In 1969, under the Theft Act (1968), the distinction was abolished. B. (maximum sentence 14 years) and aggravated B. (involving the use of firearms, etc., and a maximum of life imprisonment) are limited neither by the type of premises or time of day. In the U.S.A. state law varies, but the crime of B. is not usually limited as it used to be in Britain.

BURGOS (boor'gōs). Spanish city, 135 m. N. of Madrid, cap. of B. prov. and former cap. of the old kingdom of Castile. The Gothic cathedral was built 1221–1567. Pop. (1964) 94,774.

BURGOYNE (bergoin'), John (1722–92). British soldier and dramatist. He served in the Seven Years War, and on the outbreak of the American War of Independence was given command of a force intended to invade the colonies from Canada, but was surrounded and surrendered at Saratoga in 1777. He wrote comedies, among them *The Maid of the Oaks* (1775) and *The Heiress* (1786).

BURGUNDY. Ancient kingdom and duchy of varying size in the valleys of the Saône and Rhône; later a prov. of France, divided in 1790 into the depts. of Ain, Côte-d'Or, Saône-et-Loire, and part of Yonne. The Burgundi were a Teutonic tribe and overran the country c. 400. From the 9th cent. to the death of the duke Charles the Bold in 1477, it was the nucleus of a powerful principality. On Charles's death the duchy was incorporated into France. The capital of B. was Dijon; the province is famous for its wines.

church and monastery at Kildare, and is said to have been the daughter of a prince of Ulster.

BRIDGEWATER, Francis Egerton, 3rd duke of (1736–1803). Pioneer of British inland navigation. With James Brindley as his engineer, he constructed (1762–72) the B. canal from Worsley to Manchester, and thence to the Mersey, a distance of 42 m.

BRIDGMAN, Percy Williams (1882–1961). American physicist. B. at Cambridge, Mass., he was ed. at Harvard where he was Hollis prof. of mathematics and natural philosophy 1926–50 and Higgins univ. prof. 1950–4. His research in machinery producing high pressure led in 1955 to the creation of synthetic diamonds by General Electric.

BRIDGWATER. English seaport (bor.) in Somerset on the Parret, 33 m. S.W. of Bristol. The manufacture of bath-brick is the chief industry. Pop. (1961) 25,582.

BRIDIE, James. Pseudonym of Osborne Henry Mavor (1888–1951). Scottish dramatist. B. in Glasgow, where he became prof. of medicine at Anderson Coll., he achieved success in 1931 with *The Anatomist*, dealing with Burke and Hare. Later plays incl. biblical dramas in the modern idiom (*Tobias and the Angel*) and fantasies.

BRIDLINGTON. English market town and resort (bor.) in E. Riding, Yorks, 25 m. N.N.E. of Hull. B. Quay, a mile away, is a watering-place. Pop. (1961) 26,007.

BRIDPORT. English market town (bor.) in Dorset, 15 m. W. of Dorchester. Sailcloth, fishing nets and cordage are manufactured. Pop. (1961) 6,517.

BRIEUX (brê-ô), Eugène (1858–1932). French dramatist, an exponent of the naturalistic problem play attacking social evils. His most powerful plays are *Les trois filles de M. Dupont* (1897); *Les Avariés* (1901; *Damaged Goods*), long banned for its outspoken treatment of syphilis; and *Maternité*.

BRIGGS, Henry (1561–1630). British mathematician. B. near Halifax, and ed. at Cambridge, he was Savilian prof. of geometry at Oxford from 1619. He is best known for his work in constructing the system of logarithms still in popular use.

BRIGHOUSE, Harold (1882–1958). British playwright. B. and bred in Lancs, in his most famous play *Hobson's Choice* (1916) he dealt with a Salford boot-maker's courtship, using the local idiom.

BRIGHOUSE. English market town (bor.) in the Yorkshire W. Riding, 5 m. N. of Huddersfield, with woollen and worsted factories. Pop. (1961) 30,783.

BRIGHT, Sir Charles Tilston (1832–88). British telegraphic engineer, who in 1858 succeeded in laying the first trans-Atlantic cable from Newfoundland to Ireland.

BRIGHT, John (1811–89). Liberal statesman. B. at Rochdale, the son of a Quaker millowner, he became a partner in his father's business. He was among the founders of the Anti-Corn Law League in 1839, and after entering parliament in 1843 led the struggle there for free trade, together with Cobden, which achieved success in 1846. His *laissez-faire* principles also made him a prominent opponent of factory reform. His influence was constantly exerted on behalf of peace, as when he opposed the Crimean War, Palmerston's aggressive policy in China, Disraeli's anti-Russian policy, and the bombardment of Alexandria. During the American Civil War he was outspoken in support of the North, and he was largely instrumental in securing the passage of the reform bill of 1867. He sat in Gladstone's cabinets as President of the Board of Trade 1868–70 and Chancellor of the Duchy of Lancaster 1873–4 and 1880–2, but broke with him over the Irish Home Rule Bill. B. owed much of his influence to his oratorical powers.

BRIGHT, Richard (1789–1858). British physician. He was for many years on the staff of Guy's hospital; 'Bright's Disease', an inflammation of the kidneys, is named after him.

BRIGHTON. Exotic as a fairy tale the Royal Pavilion was built 1784–1827 for the Prince of Wales. The original furnishings and decoration have now been restored, and the Banqueting Room is seen with the table magnificently set.

Photo: Brighton Corporation Royal Pavilion Committee.

BRIGHTON. English holiday resort (co. bor.) on the Sussex coast, 51 m. S. of London, seat of the Univ. of Sussex (1963). Originally a fishing village called Brighthelmstone, it became known as B. at the beginning of the 19th cent., when already it was a fashionable health resort. The Prince Regent, afterwards George IV, stayed there, and built the Pavilion which now belongs to the town and contains a concert hall, museum, assembly room, etc. B. has a sea frontage of $5\frac{1}{2}$ m. Some of the buildings along and near the front are good examples of Regency architecture. There are 2 piers, parks, a racecourse, an aquarium, famous schools include B. Coll. and Roedean Girls' School. B. became a borough in 1854, and a co. bor. in 1888. Pop. (1961) 163,159.

BRILL. Flat-fish (*Rhombus laevis*) of the turbot genus, of a sandy brown colour, varied with white spots and darker brown on the upper side. It is abundant off the coast of Britain.

BRILLAT-SAVARIN (brê-yah'-sahvahrān'), Anthelme (1755–1826). French gastronomist, the author of *Physiologie de goût*, a witty guide to the pleasures of the table.

BRINELL HARDNESS TEST. The hardness of a substance is calculated from the area of indentation made by a 10 mm. hardened steel or sintered tungsten carbide ball under standard loading conditions in a test machine and is equal to the load (kg) divided by the surface area (mm²). Johann Auguste B. (1849–1925), inventor of the machine for testing metals and alloys in 1900, was a Swedish engineer.

BRINDISI (brin'dizi). Italian city and seaport on the Adriatic, in Apulia, 65 m. S.E. of Bari. One of the oldest Mediterranean ports, it was the terminus of the Appian Way from Rome. Its modern importance dates from the opening of the Suez Canal in 1869. It is the seat of an archbishopric, and has an 11th cent. cathedral and a 13th cent. castle. Pop. (1961) 70,084.

BRINDLEY, James (1716–72). British engineer. B. in Derbyshire, he was employed by the duke of Bridgewater for the construction of the Bridgewater canal, and played a great part in the rapid development of canal construction in Britain.

BRISBANE, Sir Thomas Makdougall (1773–1860). Scottish soldier and astronomer. After serving under Wellington, he was Gov. of N.S.W. 1821–5, and Brisbane in Queensland is named after him.

BRISBANE. Cap. and chief port of Queensland, Australia, on Moreton Bay, near the mouth of B. river, dredged to carry ocean-going ships. There are dry-docks, wharves, and warehouses, tobacco and shoe factories, breweries, and tanneries.

B. is a well-planned city, built on a plain backed by

Episcopal Church of Scotland in 1661. He pub. his *History of the Reformation in England* in 1679. His Whig views having brought him into disfavour, he retired to The Hague on the accession of James II, and became the confidential adviser of Princess Mary and William of Orange. He returned to England with the latter in 1688, and was appointed bp. of Salisbury. His best-known work is his *History of His Own Time*.

BURNET, Sir Macfarlane (1899–). Australian virologist. He was awarded the O.M. in 1958 in recognition of his work on such diseases as influenza, polio and cholera, and 1944–65 was director of the Walter and Eliza Hall Inst. for Medical Research and prof. of experimental medicine at Melbourne. His books incl. *Viruses and Man* (1953) and *Integrity of the Body* (1962).

BURNE'TT, Frances Eliza Hodgson (1849–1924). Anglo-American writer. B. in Manchester, she lived in the U.S.A. from 1865. She wrote many novels and plays, and the famous children's story *Little Lord Fauntleroy* (1886).

BURNEY, Frances (Fanny) (1752–1840). British novelist and diarist. The dau. of Dr. Charles B. (1726–1814), historian of music, she belonged to the circle of Dr. Johnson, and achieved success with her first novel *Evelina*, pub. anonymously in 1778. She obtained a post at court 1786–91, and in 1793 m. the French émigré General D'Arbly. She pub. 2 further novels, *Cecilia* (1782), and *Camilla* (1796), and her diaries and letters appeared in 1842–6.

BURNHAM, James (1905–). American philosopher. B. at Chicago, he was a Rhodes scholar at Oxford. Prof. of philosophy at N.Y. univ. 1932–54, he argued in *The Managerial Revolution* (1941) that world control is passing from politicians and capitalists to the new class of business executives, the managers. Later books incl. *The Coming Defeat of Communism* (1950) and *Congress and the American Condition* (1959).

BURNLEY. Manufacturing town (co. bor.) in Lancs, England, 12 m. N.E. of Blackburn. It is an important cotton-weaving centre, and a large variety of cloths are manufactured. Pop. (1961) 80,588.

BURNOUF (bürnoof'), Eugène (1801–52). French orientalist. B. at Paris, he was prof. of Sanskrit at the Collège de France from 1832. He deciphered MSS., thus revealing to the western world the full Zoroastrian teaching for the first time.

BURNS, John (1858–1943). British labour leader. B. in Battersea and trained as an engineer, he was sentenced to 6 weeks' imprisonment for his part in the Trafalgar Square demonstration on 'Bloody Sunday'—13 Nov. 1887—and in 1889 was a leader of the strike securing the 'dockers' tanner' (wage of 6d. per hr.). In 1892 he entered Parliament as an Independent Labour M.P. and in 1906 was the 1st working man to be a member of the Cabinet (Pres. of the Local Govt. Board). In 1914 he was appointed pres. of the Board of Trade, but resigned on the outbreak of war.

BURNS, Robert (1759–96). Scottish poet. B. at Alloway, Ayrshire, the son of a farmer, he became joint tenant, after his father's death in 1784, with his brother in a farm at Mossgiel, where many of his best poems were written. In agriculture he proved less proficient and having in addition been crossed in his love for Jean Armour among others, he decided to emigrate to Jamaica. He was dissuaded by the success of his *Poems*, chiefly in the *Scottish dialect* (1786), which made him the lion of the Edinburgh season 1786–7. A 2nd enlarged edition in 1787 proved profitable, and in 1788 enabled him at length to marry Jean Armour and settle to farming at Ellisland, near Dumfries. In 1789 he obtained a part-time post as district excise-officer, and when his farm once more failed in 1791, he transferred to a full-time post.

B.'s fame rests equally on his poems and his songs,

of which he contributed some 300 to Johnson's *Scotts Musical Museum* (1787–1803), and Thomson's *Scottish Airs with Poetry* (1793–1811); sometimes wholly original and at others combining inspiration from several popular versions, they attain lyric perfection. His English verse is negligible; the full vigour of his genius waited on his use of the Scots dialect as in 'Holy Willie's Prayer', 'Tam o' Shanter', and 'Jolly Beggars'.

BURNS. Injuries to the tissues caused by heat, light, or corrosive substances. A 'scald' is a burn caused by hot liquid or vapour; the nature of the injury is the same. Bs. include injuries made by invisible rays, whether these are of lower frequency than visible light (heat, infra-red), or of higher frequency (ultra-violet, X-rays, radium emanations).

Bs. are divided into two classes, superficial and deep, according to whether the skin is partially destroyed, or whether it is wholly destroyed and the muscle beneath it is damaged. All Bs. cause some degree of shock, and this is often more dangerous than the local effect. The treatment of a bad B. or scald is therefore first directed against shock and infection. The B. itself is treated with as little damage to sound tissue as possible. Oils, acids, dyes, and creams in great variety are applied, to exclude the air and prevent the absorption of noxious substances, ease pain, and encourage the natural repair of the skin and tissues.

BURR, Aaron (1756–1836). American politician. B. in New Jersey, he served on Washington's staff during the War of Independence, and in 1800 received the same no. of electoral votes as Jefferson in the presidential election. Through the influence of Alexander Hamilton the House of Representatives voted in favour of Jefferson (Feb. 17, 1801), but B. was vice-pres. 1800–4. B. never forgave Hamilton, whom he thought also prevented his becoming Gov. of N.Y. State in 1804, and killed him in a duel that year. As a result he became a social outcast, and had to leave the U.S.A. for some years following an attempt to raise an armed force for the invasion of Mexico.

BURRA, Edward (1905–). British artist. B. in Kensington, his work incl. genre watercolours with a humorous touch, as well as more dramatic works showing the influence of El Greco and Goya. Notable are 'Mexican Church' (1938) and 'Soldiers' (1942), both in the Tate Gallery.

BURROUGHS (bur'öz), Edgar Rice (1875–1950). American novelist. B. at Chicago, he had a varied career, before writing a score of 'Tarzan' books, romantic stories of the adventures of an ape-man, which were widely popular, beginning with *Tarzan of the Apes* (1914).

BURROUGHS, William (1914–). American novelist. Member of a 'big-business' family, he was b. in St. Louis, Missouri, ed. at Harvard and has had a variety of jobs as reporter, advertising man, private detective, etc. Well known to devotees of the American 'beat' movement, he estab. his reputation with *The Naked Lunch* (1959) dealing with the world of the drug addict: *The Ticker that Exploded* (1962) is science fiction.

BURROUGHS, William Seward (1857–98). American inventor. A bank clerk, he patented an adding machine, which with many improvements and developments was successfully produced and marketed by the firm bearing his name.

BURSA. City in Turkey-in-Asia, 60 m. S. of Uskudar, cap. of B. il, and cap. of the Ottoman Empire 1326–1423. The commercial centre of a fertile district, it produces silk. Its port is Mudania, 16 m. N.W., on the Sea of Marmara. Pop. (1965) 212,500.

BURSLEM. Parish in Staffs, England, one of the most important towns of the Potteries. Formerly a separate borough, and included in the co. bor. of

BRITISH ANTARCTIC TERRITORY. Colony created in 1962 from part of the Falkland Islands Dependencies. It consists of all British territories S. of lat. 60°S. and includes the S. Shetlands, area 1,800 sq. m., the S. Orkneys, 1,240 sq. m., and Graham Land. B.A.T. has no permanent pop. apart from the personnel of meteorological and other scientific stations.

BRITISH BROADCASTING CORPORATION (B.B.C.). See BROADCASTING.

BRITISH COLUMBIA. The Pacific coast province of Canada, lying between the Rocky Mts. and the sea; on the N.W. and on the S. it touches the U.S.A. It has 3 great parallel ranges – the Rockies, the Columbia mountain system, and the coast range – interspersed with valleys, lake basins, heavily timbered forests, rolling uplands, and plateaux. Mt. Fairweather on the Alaska border is 15,300 ft. The chief rivers are the Fraser and the Columbia, and there are more than 80 lakes. The coast is deeply indented.

The capital is Victoria, on Vancouver Island; the commercial metropolis is the port and city of Vancouver on the mainland. Other cities are New Westminster, formerly the capital, a freshwater port on the Fraser; Nanaimo, on Vancouver Island, centre of the coal-mining industry; Prince Rupert, centre of the halibut fishery; Nelson, on Kootenay Lake, centre of mining and lumbering; Vernon and Kelowna, both in the Okanagan, in the heart of the fruit-growing area; Trail, 50 m. S.W. of Nelson, headquarters of the Consolidated Mining and Smelting Co.; and Kamloops, at the confluence of the N. and S. Thompson rivers, a ranching and farming centre.

Vancouver Island was discovered by the Spanish in 1774. The territory was ceded to Britain in 1790, and entered the Canadian Confederation in 1871 as a province. B.C. has a Lieutenant-Governor and a legislative assembly, elected for 5 years, and is represented in the federal parliament by 6 senators

BRITISH COLUMBIA. The unspoiled coastline of the province is an increasing attraction to tourists. This is Breaker Beach, near Bamfield, on Vancouver Island.

and 22 members of the House of Commons. There are 4 univs.: Univ. of B.C. at Vancouver (1908), Victoria (1963), Simon Fraser Univ. at Burnaby (1963), and Nelson (1963).

Area 366,255 sq. m.; pop. (1966) 1,873,674.

(BRITISH) COMMONWEALTH (OF NATIONS) On 15 May 1917 Jan Christian Smuts, then S. African Min. of Defence, and in London as representative of his country in the Imperial War Cabinet of the F.W.W., suggested that 'British commonwealth of

nations' was the right title for the British Empire. The name was recognised in the Statute of Westminster (1931), but after the S.W.W. a growing sense of independent nationhood among members of the C. led to the simplification of the title to THE COMMONWEALTH.

The C. is now a free association of sovereign independent states, the full 'members of the C.', together with a number of dependent terrs., such as colonies and protectorates, which rank as 'C. countries'.

The members are: United Kingdom, Canada (1867), Australia (1901), New Zealand (1907), India (1947), Pakistan (1947), Ceylon (1948), Ghana (1957), Malaysia (1957-63), Nigeria (1960), Cyprus (1961), Sierra Leone (1961), Tanzania (1961-3), Western Samoa (1962), Jamaica (1962), Trinidad and Tobago (1962), Uganda (1962), Kenya (1963), Malawi (1964), Malta (1964), Zambia (1964) Gambia (1965), Singapore (1965), Guyana (1966), Botswana (1966), Lesotho (1966), Barbados (1966), Swaziland (1968).

In the case of C. countries which have reached self-governing maturity but are too small to bear the full responsibilities of 'members of the C.' there may be special status, for example, as an Associated State of the U.K. (q.v.).

There were 3 impulses behind the growth of the British Empire. The 1st, the impulse to seek freedom of religious practice, was the main element in the creation of the original colonies in N. America. The 2nd, the search for trade, had some part in N. America (notably through the Hudson's Bay Company) and was the overriding influence in the Far East and in many parts of Africa. The 3rd, which came into play in the 19th cent., was the urge felt by the Christian community in Britain to carry the gospel to the heathen; it resulted in the exploration and opening up of vast areas in the interior of the 'dark continent' of Africa.

HISTORY. England, Wales, Ireland, and Scotland, the 4 countries of the British Isles, came under one sovereign with the accession of James VI of Scotland as James I of England in 1603; and it was in the reign of this monarch that, in 1607, the 1st successful English colony was founded overseas, in N. America at Jamestown, Virginia. British settlement spread up and down the E. coast of that continent until in 1664, when the British secured New Amsterdam (New York) from the Dutch, there was a continuous fringe of colonies from the present S. Carolina in the S. to what is now New Hampshire in the N. These colonies, and others formed later, had democratic institutions and a good deal of freedom, and it was the attempt of George III and his unwise minister Lord North to coerce their inhabitants into paying taxes to the home government that roused the colonists to resistance which came to a head in the War of American Independence, 1775-83, and led to the creation of a new independent state, the United States of America, from the 13 English colonies then lost.

But before this happened, the British had set up colonies and trading posts in other parts of the world, and conquered territories from other European empire builders. Settlements were made in Gambia and on the Gold Coast (1618) in Bermuda (1609) and others of the W. Indian islands; Jamaica was taken from Spain in 1655; Acadia (Nova Scotia) was secured from France by the Treaty of Utrecht, 1713, which recognised Newfoundland and Hudson Bay (as well as Gibraltar in Europe) as British. New France (Quebec), Cape Breton Island, and Prince Edward Island became British as a result of the Seven Years War, 1756-63.

In the Far East, the East India Company, chartered 1600, set up factories, as their trading posts were called, on the W. coast of India at Surat, 1612; on the E. coast at Madras, 1639; and on the Hooghli, one of the mouths of the Ganges, 1640. Bombay came to

BUTE. Scottish island in the Firth of Clyde, separated from Argyllshire by a narrow winding channel called the Kyles of B. It is 15½ m. long, has a fertile soil, and is a great holiday resort for Glasgow. Rothesay is the chief town. Area 47 sq. m.; pop. (1961) 9,779.

With Arran and other adjacent islands it forms the co. of B.; area 218 sq. m.; pop. (1961) 15,129.

BUTLER, Sir James Ramsay (1889–). British historian, Regius prof. of modern history at Cambridge 1947–54 and chief historian for the official military histories of the S.W.W. He was knighted in 1958.

BUTLER, Joseph (1692–1752). British theologian. In 1740 he became dean of St. Paul's, in 1747 refused the primacy, and in 1750 became bp. of Durham. He defined his philosophy in *Fifteen Sermons* (1726) and in his *Analogy of Religion* (1736) refuted Deism, attempting to prove that the element of revealed religion in Christianity is inherently probable even if not capable of logical proof.

BUTLER, Josephine Elizabeth (1828–1906). British social reformer. *Née* Grey, she was b. in Northumberland and m. Dr. Butler, later canon of Winchester. She agitated for the admission of women to higher education, helped to secure the Married Women's Property Act, worked for the improvement of the lot of 'fallen' women, and carried on a campaign against the Contagious Diseases Acts of 1864–9, which made women in garrison towns liable to compulsory examination for V.D. The Acts were repealed 1883–6.

BUTLER, Nicholas Murray (1862–1947). American educationist and political writer. B. in New Jersey, he became prof. of philosophy at Columbia univ. in 1890, and was pres. of the univ. 1901–45. He advocated women's suffrage and the repeal of prohibition, and worked for the improvement of international relations. In 1931 he was awarded half the Nobel peace prize.

BUTLER, Reg (1913–). British sculptor. B. in Herts, he held his 1st one-man show in 1949, and caused a sensation by winning the international Unknown Political Prisoner competition in 1953. He is primarily concerned with the human figure, using distortion to achieve striking effects.

BUTLER, Richard Austen, baron B. of Saffron Walden (1902–). British Cons. politician, known as 'Rab' from his initials. B. in India, he was ed. at Marlborough and Pembroke Coll., Cambridge and was M.P. for Saffron Walden 1929–65. As Min. of Education in the Coalition 1941–5, he was responsible for the 'Butler' Act of 1944 establishing the lines of post-war educational development, was Chancellor of the Exchequer 1951–5, and Lord Privy Seal 1955–9. A likely candidate for the premiership in 1957, he was given the additional post of Home Sec. under Macmillan, and in 1962 became Deputy P.M. with the new title of First Sec. of State. On the resignation of Macmillan in 1963, he again narrowly missed the premiership, but continued under Home as Sec. of State for Foreign Affairs until 1964. He became a life peer and master of Trinity Coll., Cambridge, in 1965.

BUTLER, Samuel (1612–80). English satirist. The son of a Worcs. farmer, he served in the household of the countess of Kent, and then of Sir Samuel Luke, a colonel in the Parliamentary army. After the Restoration he became secretary to the earl of Carberry. His poem *Hudibras*, pub. in 3 parts in 1663, 1664 and 1678, became immediately popular for its

biting satire against the Puritans. His prose *Characters* are also of high merit.

BUTLER, Samuel (1835–1902). British author. B. in Notts, the son of a clergyman, he refused to go into the Church, and became a sheep-farmer in New Zealand (1859–64). He made his name by the satirical *Erewhon* (1872) describing a visit to the imaginary country, Erewhon, i.e. Nowhere reversed. A sequel, *Erewhon Revisited*, was pub. in 1901. *The Fair Haven* (1873) was a satirical examination of the miraculous element in Christianity. *Life and Habit* (1877) and other works were devoted to a criticism of the theory of natural selection. In *The Authoress of the Odyssey* he maintained that the *Odyssey* was the work of a woman. B.'s fame was greatly increased by the posthumous publication of his *Note-books* and his largely autobiographical novel, *The Way of All Flesh*, written 1872–85; pub. 1903.

BUTLIN, Sir William Edmund (1899–). British pioneer of holiday camps. B. in S. Africa, he went in early life to Canada, but later entered the fair business in England. His chain of camps provide 'all-in' holidays with amusements, meals and sleeping chalets at an inclusive price. He was knighted in 1964.

BUTOR (bütor), Michel (1926–). French writer. Ed. at the Univ. of Paris, he is a practitioner of the 'anti-novel' of which Robbe-Grillet (q.v.) is the theoretician. These incl. *Passage de Milan* (1954), *Degrés* (1960) and *L'Emploi du temps* (1963): *Mobile* (1962) is a vol. of essays.

BUTT, Dame Clara (1873–1936). British contralto. B. in Sussex, she had an unusually rich and powerful voice, and Elgar's *Sea Pictures* (1899) was specially written for her. She m. in 1900 the baritone Kennerley Rumbold (1870–1957), and in 1917 became D.B.E.

BUTT, Isaac (1813–79). Irish politician. B. in Donegal, he taught political economy at Dublin univ., and founded in 1870 the Home Rule movement. He was ousted from the leadership of the parliamentary party by Parnell.

BUTTE (bü). City in Montana, U.S.A., 50 m. S.W. of the state capital Helena. Here are the copper smelting works of the Anaconda Mining Co., owners also of the copper, silver and other mines in the vicinity. B. was founded in 1864 during a rush for gold, soon exhausted; copper was found some 20 years later. Pop. (1960) 27,877.

BUTTER. A fatty dairy product made from milk by churning the cream. Besides the cow, the goat, sheep, ass, mare, camel, and buffalo have been used for milk production.

BUTTERCUP. Genus (*Ranunculus*) of the family Ranunculaceae, many species having divided leaves which have earned the alternative name of crow-foot, and shining yellow cuplike flowers. Common in Europe and Asia, and naturalized in N. America, are the bulbous B. (*R. bulbosus*), the creeping B. (*R. repens*), and the meadow crowfoot (*R. acris*); native to N. America are the marsh B. of the east (*R. septentrionalis*) and the California B. (*R. californicus*). The florists' B. is *R. asiaticus*.

LORD BUTLER

Photo: Daily Herald.

BUTTERFIELD, Sir Herbert (1900–). British historian, prof. of modern history at Cambridge from 1944 and Regius prof. 1963–7. His books incl. *The Origins of Modern Science* (1949), *George III and the Historians* (1957) and *International Conflict in the Twentieth Century* (1960).

Dutch occupied it in 1650, and Cape Town remained a port of call for their E. India Company until 1795 when, French revolutionary armies having occupied the Dutch Republic, the British seized it to keep it from the French, and under the Treaty of Paris, 1814, bought it from the new kingdom of the Netherlands for £6,000,000. British settlement began in 1824 on the coast of Natal, proclaimed a British colony in 1843.

Resentment over the abolition of slavery (1833) in all British possessions led a body of Boers (Dutch for farmers) from the Cape to make the great trek north-eastwards, 1836, and found Transvaal and Orange Free State. Conflict between the British govt., which claimed sovereignty over those areas (since the settlers were legally British subjects), and the Boers culminated, after the discovery of gold in the Boer territories, in the S. African War of 1899–1902, which brought Transvaal and Orange Free State definitely under British sovereignty. Given self-govt. in 1907, they were in 1910, with Cape Colony (self-governing 1872) and Natal (self-governing 1893), formed into the Union of S. Africa, 4th dominion of the Empire.

The British S. Africa Company, chartered 1889, extended British influence over S. Rhodesia (a colony in 1923) and N. Rhodesia (a protectorate in 1924); with Nyasaland, taken under British protection in 1891, the Rhodesias were in 1953 formed into a federation (1953–63) with representative govt. Uganda was made a British protectorate in 1894, to put an end to inter-tribal wars. Kenya, formerly a protectorate, became a colony in 1920, certain districts on the coast forming part of the Sultan of Zanzibar's dominions remaining a protectorate.

In W. Africa, British control was extended from time to time in Gambia and the Gold Coast. Sierra Leone colony started in 1788 with the cession of a strip of land to provide a home for liberated slaves; a protectorate was established over the hinterland in 1896. British influence in Nigeria began through the activities of the National Africa Company (the Royal Niger Company from 1886) which bought Lagos from an African chief in 1861 and steadily extended its hold over the Niger Valley until it surrendered its charter in 1899; in 1900 the two protectorates of N. and S. Nigeria were proclaimed.

The F.W.W. ousted Germany from the African continent, and in 1921–2, under League of Nations mandate, Tanganyika was transferred to British administration, S.W. Africa to South Africa; Cameroons and Togoland, in W. Africa, were divided between Britain and France.

The establishment of the greater part of Ireland as the Irish Free State, with dominion status, came in 1922. A new constitution adopted by the Free State in 1937 dropped the name and declared Ireland (Eire) to be a 'sovereign independent state'; 12 years later S. Ireland became a republic outside the Commonwealth, though remaining in a special relationship with Britain.

British India was given independence in 1947 as the 2 dominions of India (predominantly Hindu in religion) and Pakistan (predominantly Moslem). A startling constitutional development came in 1950 with India's decision to become a republic but, with the full consent of the other members, to remain within the Commonwealth. This made it simple for Pakistan, a rep. from 1956, and Ghana (the former Gold Coast Colony), a dominion 1956, a rep. 1960, to remain members of the Commonwealth. Independence within the Commonwealth followed for Nigeria in 1960, for Sierra Leone in 1961, and the process continued. (For the position of other parts of the Commonwealth, see under separate headings.) This emergence of Commonwealth members inhabited by populations of non-British blood brought about

changes of attitude within the group; and when the Union of S. Africa in 1961 adopted a republican form of govt., it decided, owing to the strong differences between its govt. and other members of the Commonwealth (incl. Britain) over 'apartheid' (total separation of different racial groups in the S.A. Republic), not to seek re-admission to the Commonwealth. Another crisis was provoked by Rhodesia's unilateral declaration of independence 1965. Mandatory sanctions were imposed by the U.N., and African and Asian states pressed for the solution of the problem by force. In Canada divisive nationalism, based on language and culture instead of 'colour', became vocal in the 1960s in Quebec.

Consultation at top level on major topics takes place at *Commonwealth Conferences* specially convened, but there was no permanent organisation until at the 1965 conference it was suggested, mainly by the Afro-Asian members, that one should be estab. on the lines of the United Nations. The unanimous choice as first Secretary-General of the *Commonwealth Secretariat* (H.Q. at Marlborough House, in London's Pall Mall) was Canadian diplomat Arnold Smith (1915–). The Commonwealth Office, formerly the only day-to-day link with the C. countries, was merged with the Foreign Office in 1968.

Bodies dealing with C. affairs incl. the *Royal Commonwealth Society* (1868), *Commonwealth Institute* (q.v.), *Commonwealth Development Corporation* (q.v.), and *Commonwealth Foundation* (1965) estab. to assist contacts between professional people and organisations in the C. countries. See **COMMONWEALTH DAY**.

BRITISH COUNCIL. Semi-official organization which was inaugurated in 1935 and granted a royal charter in 1940; has for its chief aims the promotion overseas of a wider knowledge of the U.K., excluding political and commercial matters, and the development of cultural relations with other countries.

BRITISH EMPIRE. A British order of chivalry, instituted by George V in 1917. There are military and civil divisions, and awards are made to men and women who have rendered distinguished service to the Empire at home or abroad. The ranks are: G.B.E., Knight Grand Cross or Dame Grand Cross; K.B.E., Knight Commander; D.B.E., Dame Commander; C.B.E., Commander; O.B.E., Officer; M.B.E., Member.

BRITISH EXPEDITIONARY FORCE (1939–40). British army that served in France and was evacuated, mainly from Dunkirk, in May-June 1940. It was commanded by Gen. Visct. Gort.

BRITISH COMMONWEALTH. The Commonwealth Institute, opened in Holland Park, Kensington, in 1962 has 3 tiers of exhibition galleries, an art gallery and a cinema.

Courtesy of John Laing & Son Ltd.

BYDGOSZCZ (bid'goshch). Town in Poland, 65 m. N.E. of Poznan on the river Brda. It is an important railway and canal junction and was Prussian from 1772 to 1919, when it was restored to Poland. Pop. (1966) 258,000.

BYELORUSSIA. See **WHITE RUSSIA**.

BYELUY (byeh'le). Andrey. Pen-name of the Russian poet and novelist Boris Bugaiev (1880-1934). A leader of the Symbolist poets, he also revolutionized Russian prose with the novels *Silver Dove* (1910) and *Petersburg* (1916), and the autobiographical *Kotik Letae* (1922).

BYNG, John (1704-57). British admiral. When in 1756 the island of Minorca was invaded by the French, B. was ordered to sail to the relief of Fort St. Philip which was still resisting, but failed in the attempt. After the fort's fall he was court-martialled and condemned to death, and shot at Portsmouth.

BYNG OF VIMY, Julian Byng, 1st visct. (1862-1935). British general. A son of the 2nd earl of Strafford, he commanded the 3rd Cavalry Division in 1914, the Cavalry Corps in 1915, the IXth Army Corps at the Dardanelles, and the Canadian Army Corps in 1916-17 in France. After his victory at Vimy Ridge he took command of the 3rd Army, and in Nov. 1917 made the brilliant tank attack on Cambrai. He was Gov.-Gen. of Canada 1921-6, and was made a viscount in 1926, and a field marshal in 1932.

BYRD (bird), Richard Evelyn (1888-1957). American airman and explorer. B. in Virginia, he served in the navy from 1912. After an expedition to Greenland in 1925, on 9 May 1926, he flew to the N. Pole and back to Spitzbergen in 15½ hours. In 1928 he organized an expedition to the Antarctic, and in 1929 made a successful flight to the S. Pole. He made a 2nd expedition to the Antarctic in 1933-5, and discovered coal deposits 180 m. from the pole; in 1939 he was given command of an official expedition sent to the Antarctic by the U.S. govt., and in Dec. 1946 he led the largest expedition ever to visit the Antarctic.

BYRD, William (1543-1623). English composer, b. probably at Lincoln, where he became organist in 1563. He shared with Tallis the honorary post of

organist in Queen Elizabeth's Chapel Royal, and in 1575 he and Tallis were granted a monopoly in the printing and selling of music. B. was the founder of the English school of madrigal writers and also composed music for the virginals, but his church music represents his most important work.

BYRNES (burnz), James Francis (1879-). American statesman. B. at Charleston, S. Carolina, he sat in Congress as a Democrat 1911-25, and became Senator for S. Carolina in 1931. In 1943 he was appointed Director of War Mobilization, and in 1944 the task of reconversion of industry to peace-time production was added to his office. From June 1945 to Jan. 1947 he was Secretary of State. His memoirs, *Speaking Frankly*, were pub. in 1947.

BYRON, George Gordon, 6th baron (1788-1824). British poet. Born in London, he succeeded his great-uncle in the title in 1798. He was ed. at Harrow and Cambridge, and pub. the juvenile poems *Hours of Idleness* in 1807. Their harsh criticism by the *Edinburgh Review* provoked his satire, *English Bards and Scotch Reviewers* (1809). He then undertook the tour of Portugal, Spain, and the Balkans, which he described in the first 2 cantos of *Childe Harold*. Their publication in 1812 made him famous overnight, while the series of Oriental verse romances which followed were even more successful. In 1815 he m. Anne Milbanke, but a year later a separation ensued which caused such a scandal that B. was hounded out of England. He first settled in Switzerland, where he met Shelley, and under his influence wrote *The Prisoner of Chillon* (1816), the 3rd canto of *Childe Harold* (1816), and *Manfred* (1817). The next 3 years he spent in Venice, where in spite of his debauched life he produced much of his finest work, incl. *Beppo* (1818), the 4th canto of *Childe Harold* (1818), and *Mazeppa* (1819), and began work on his masterpiece, *Don Juan* (1819-24). In 1819 he removed to Ravenna, as the lover of Countess Guiccioli, and there dabbled in Italian revolutionary politics, and wrote his rhetorical series of tragedies and the masterly *Vision of Judgment* (1822). He sailed for Greece in 1823, in order to aid the Greek struggle for independence, but d. of fever at Missolonghi in 1824. His writings, his life and his death contributed to make him the patron saint of romanticism and revolutionary liberalism in 19th cent. Europe.

BYZANTINE (bizan'tin) ART. A style of painting, architecture, etc., which originated in Byzantium (4th-5th cents.) and spread to Italy, throughout the Balkans, and to Russia, where it survived until modern times. It is a mixture of Greek and Oriental elements, and is characterized by the use of rich colours, particularly gold, geometrical designs on a flat surface, distorted figures, and (in architecture) the use of the dome supported on pendentives. Classical examples of B. architecture are St. Sophia, Constantinople, and St. Mark's, Venice. A modern example is Westminster Cathedral. The first great Italian painters to break away from the formalism of the B. style were Cimabue and Giotto, who painted religious subjects in a naturalistic style.

BYZANTINE EMPIRE. The Eastern Roman Empire, with its capital at Constantinople (Byzantium). The Emperor Constantine removed his capital to Constantinople in A.D. 330, but it was not until 395 that the Empire was finally divided into E. and W.

BYRON. In Albanian dress by Thomas Phillips, 1813. Photo: The National Portrait Gallery.

BUZZARD

BYBLOS. In Roman times the city expanded rapidly, its new buildings including the magnificent amphitheatre excavated by Dunand shown here. Adjoining it were baths and a fine temple dedicated to an unidentified male god.

Courtesy of the Lebanese Embassy.

BRNO. Set in the beautiful Moravian countryside are the grounds of the International Trade Fair, first held in 1959 and now an annual event. On the left is the multi-storey administration building. Courtesy of the Czechoslovak Travel Bureau.

the Svitava. It has a fortress; the 15th cent. cathedral of St. Peter; a 16th cent. Rathaus; and a univ., founded in 1918. The Bren gun was first manufactured here. Pop. (1961 est.) 320,000.

BROAD, Charlie Dunbar (1887–). British philosopher. B. in London, he was ed. at Trinity Coll., Cambridge, and was Knightbridge prof. of moral philosophy at the univ. 1933–53. His books incl. *Perception, Physics and Reality* and *Lectures on Psychic Research* (1962), discussing modern scientific evidence for survival after death.

BROAD ARROW. The mark resembling an arrow-head placed on govt. stores. Of doubtful origin, the B.A. came into general use in the 17th cent. and is still used to mark govt. property, such as Post Office mail-bags, but it has long been abolished on prison dress.

BROADCASTING. The transmission of sound and vision programmes by radio. B. may be organized

under complete state control, e.g. Soviet Union; or private enterprise, e.g. the U.S.A. where it is only limited by the issue of licences from the Federal Communications Commission to competing commercial companies; or operate under a compromise system, e.g. Australia (where official and commercial cos. compete), Canada (where a govt. corporation also sells time to advertisers) and Britain, where although sound broadcasting is entirely controlled by the B.B.C. (a centralized body appointed by the State and responsible to Parliament, but with policy and programme content not controlled by the State), there is also a commercial Independent Television Authority (1955). In Japan, which ranks next to the U.S. in the number of TV sets owned, there is a semi-governmental radio and television B. corporation (NHK) and numerous private TV cos. See RADIO and TELEVISION.

BROADMOOR. Place in S.E. Berks, England, the site of a special hospital opened 1863 for persons then described as criminally insane. It was transferred from Home Office to Min. of Health control in 1949, and in 1968 rebuilding was planned.

BROADS, The. A district of c. 5,000 acres in Norfolk and Suffolk, England, containing about 12 large freshwater lakes or 'broads' and many small ones. The largest B. is Hickling, 3 m. round. The total length of waterway available for light craft is some 200 m. The Bs. are famous as a holiday resort.

BROADSTAIRS. Seaside resort (U.D.) in N.E. Kent, England, 77 m. S.E. of London on the E. coast of Thanet. Pop. (1961) 16,979.

BROADWAY. Main street (18 m. long) of, and a great theatre and trade centre in, New York City.

BROCH (brokh), Hermann (1880–1951). Austrian novelist, best known for *Der Tod des Vergil* (1945: *The Death of Virgil*), a study of the last 18 hours in the poet's life, expressing his own sense of the inadequacy of poetry or any art as a full means of perception of truth. After a period under Nazi arrest he escaped to England and then to the U.S.A.

BROCK, Sir Thomas (1847–1922). British sculptor. B. at Worcester, he is known for his memorial to Queen Victoria in front of Buckingham Palace.

BROCKWAY, Fenner, baron (1888–). British Labour politician. During the F.W.W. he spent several

BROADCASTING. The radio 'chain' (1) a newsreader (2) the V.H.F. transmitting mast at Wrotham (3) the sound control room showing beyond the technical operations supervisor's desk, on the far right, the main control desk with the simultaneous broadcast position (right) miscellaneous switching and monitoring position (centre, below the main source-to-destination indicator panel) and (left) a desk carrying some monitoring facilities as well as alarm lamps to indicate abnormal apparatus conditions; to the extreme left are 2 of the 3 two-channel control and monitor positions and (4) F.M. transmitters at Sutton Coldfield. Courtesy of the British Broadcasting Corporation.

the Brazilian coast and the river Plate. Returning to England he planned a voyage to China by way of the N.E. passage, encouraged the formation of the Co. of Merchant Adventurers of London in 1551, and in 1553 and 1556 directed the Co.'s expeditions to Russia.

CABRINI (kahbrē'nē), Frances (1850-1917). The first R.C. saint in U.S.A. B. in Lombardy, she founded the Missionary Sisters of the Sacred Heart in America, and estab. many schools and hospitals in the care of her nuns. She was canonized in 1946.

CACCINI (catshē'nē), Giulio (c. 1545-1618). Italian singer and composer. From 1578 he was in the service of the duke of Tuscany at Florence, and his brief vocal compositions in recitative style paved the way for the growth of opera.

CACHALOT (kash'-) or Sperm-whale (*Physeter catodon*). The largest of the toothed whales. It has a large blunt snout, with the nostrils opening above at the tip, and an enormous head. The male may attain a length of 60 ft.; the female is only half that size. The C. favours the warmer oceans and is gregarious; it is much sought by whalers on account of its spermaceti.

CACTOBLASTIS. Genus of moths of the family Pyralidae. The most important species is *C. cactorum*, whose caterpillars feed on the prickly pear (*Opuntia*). For this reason they have been introduced into Australia in order to check the prickly pear menace.

CACTUS. Typical genus of plants of the family Cactaceae, and in common speech applied to the whole family. They are recognized by their woody axis being overlaid with an enlarged fleshy stem, which assumes various forms and is usually covered with spines. The leaves are usually very much reduced, and frequently are absent. The flowers are often large and brightly coloured. The fruit is fleshy and often edible, as in the case of the prickly pear.

The Cactaceae are a New World family, though some species are found in the warmer parts of the Old and others have been introduced from the New to the Old, e.g. in the Mediterranean area, and have become a pest. They grow in the driest and rockiest situations.

CADBURY, George (1839-1922). British manufacturer of cocoa and chocolate. The firm of C. was a pioneer in industrial welfare, and the garden village of Bourneville (q.v.) was estab. for its workers.

CADDIS FLY. Common name for all the insects forming the order Trichoptera. They are moth-like in appearance, their wings covered with hairs, and their mouth-parts are of the biting type. They feed on the juices of plants. Their larvae are aquatic.

CADE, Jack (d. 1450). English rebel. A prosperous Kentish landowner, he took the lead when the men of Kent rose in 1450 against the misgovernment of Henry VI. He defeated the royal forces at Sevenoaks and occupied London, whereupon under promise of reforms and pardon the rebels dispersed. But C. was then hunted down and killed near Heathfield, Sussex.

CADIZ (Span. kah'déth). Spanish city and naval base, cap. and seaport of the prov. of C., standing on C. Bay, an inlet of the Atlantic, 64 m. S. of Seville. Probably founded by the Phoenicians about 1100 B.C., it was a centre for the tin trade with Cornwall. It was recaptured from the Moors by the king of Castile in 1262, and rose to great importance after

the discovery of America in 1492. The English burned it in 1596. Pop. (1965) 129,728.

CADMIUM. Symbol Cd., at. wt. 112.41, at. no. 48. C. is a soft silver-white metal. It is used in standard cells for the accurate determination of electromotive force (e.m.f.) in electroplating; as a constituent of one of the lowest-melting alloys; and in bearing alloys with low coefficients of friction. It is also used as control rods in nuclear reactors on account of its high absorption of neutrons. Its industrial importance has greatly increased in recent years.

CADWALADER (d. c. 634). Welsh hero. The son of Cadwallon, King of Gwynedd, N. Wales, he defeated and slew Eadwine of Northumbria in 633. About a year later he was killed in battle.

CAECILIA (sē'sī'liā). Typical genus of amphibians of the order Gymnophiona. Small worm-like animals, destitute of limbs, they have a wide distribution in tropical countries.

CAEDMON (kad'mon) (7th cent. A.D.). First English Christian poet. Bede says that he was a cowherd in the monastery of Whitby, when in a dream a stranger ordered him to sing, whereupon on waking he produced a poem on the Creation. Of this Bede appends a Latin translation, but the original Old English poem is preserved in some MSS. C. then became an inmate of the monastery and composed poems on sacred subjects.

CAEN (kañ). French town in Normandy, cap. of Calvados dept., on the Orne, 9 m. from the English Channel. St. Étienne church was founded by William the Conqueror, whose body was brought here after his death at Rouen. In the S.W.W. C. was severely damaged during the 5 weeks of heavy fighting that preceded its capture by the British 2nd Army on 9 July 1944. The univ., founded in 1432 by Henry VI of England, was among the casualties, but was rebuilt by 1957. C. is a business centre with ironworks and important industries. Its building stone is celebrated, and several English cathedrals are built of it. Pop. (1962) 95,238.

CAERLEON (kahrlē'on). Town (U.D.) in Monmouthshire, England, on the Usk, 3 m. N.E. of Newport. It was the site of a Roman legionary camp and there are remains of an amphitheatre. Pop. (1961) 4,184.

CAERNARVON (kahr-). Co. town (royal bor. since 1963) of Caernarvonshire, Wales, on the S.W. shore of the Menai Strait, 8 m. S.W. of Bangor. It was a Roman station and is a market town and a port. The first Prince of Wales (later Edward II) was b. at C. Castle in 1284: the investiture of the Duke of Windsor as Prince was carried out in 1911, and that of Prince Charles planned for 1969. The Earl of Snowdon became Constable of the castle 1963. Pop. (1961) 8,998.

CAERNARVONSHIRE. Co. in N.W. Wales,

CAEN. The church of St. Étienne, or l'Abbaye-aux-Hommes where William the Conqueror is buried, is a fine example of Romanesque architecture, and dates from 1070.

Photo: Courtesy of the French National Tourist Office.

of tin; for bell-metal, bronze containing 15 per cent or more of tin is used. Phosphor B. is hardened by the addition of a small percentage of phosphorus. Silicon B. (for telegraph wires) and aluminium B. are similar alloys of copper with silicon or aluminium, but usually contain no tin.

BRONZE AGE. Period of early history and pre-history when bronze was the chief material used for tools and weapons. It lies between the Stone Age and the Iron Age and may be dated 5000–1200 B.C. in the Near East, and about 2000–500 B.C. in Britain.

BRONZINO (bronzē'nō), Il (1503–72). Pseudonym of the Italian artist Agnolo di Cosimo, favourite painter of Cosimo I, duke of Tuscany. His portraits of the Medici circle have a simple elegance and incl. some attractive child studies. He was influenced by Michelangelo.

BROOK, Clive (1887–). British actor. B. in London, he is a polished stylist and appeared in films and plays on both sides of the Atlantic, e.g. *Second Threshold*.

BROOKE, Sir Basil. See BROOKEBOROUGH, VISCT.

BROOKE, Henry, baron B. of Cumnor (1903–). British Cons. politician. He entered Parliament in 1938, as Min. for Housing 1957–61 was responsible for the Rent Act (1957) providing for progressive relaxation of rent control, and 1962–4 was Home Sec. He was created a life peer in 1966.

BROOKE, Sir James (1803–68). British administrator, known as 'the white rajah'. B. nr. Benares, he served in the army of the East India Co. In 1838 he headed a private expedition to Borneo, where he helped to suppress a revolt, and in 1841 the Sultan gave him the title of Rajah of Sarawak. He was succeeded as Rajah by his nephew, SIR CHARLES JOHNSON B. (1829–1917), who in turn was succeeded by his son, SIR CHARLES VYNER B. (1874–1963), who in 1946 arranged for the transfer of Sarawak to the British Crown.

BROOKE, Rupert Chawner (1887–1915). English poet. B. at Rugby, where he was ed., he travelled

abroad after a nervous breakdown in 1911, but in 1913 won a fellowship at King's Coll., Cambridge. Later that year he toured America (*Letters from America*, 1916), N.Z. and the S. Seas, and in 1914 became an officer in the Royal Naval Division. After fighting at Antwerp, he sailed for the Dardanelles, but died of blood-poisoning on the Greek island of Skyros, where he is buried. The 5 war sonnets pub. immediately after his death made him the symbol

RUPERT BROOKE. Posthumous portrait by J. H. Thomas. Photo: N.P.G.

of the F.W.W. 'lost generation': 'Grantchester' and 'The Great Lover' are perpetual anthology pieces.

BROOKEBOROUGH, Basil Brooke, visct. B. (1888–). Statesman of N. Ireland. Entering Parliament as a Unionist in 1929, he was Min. for Agriculture 1933–41, for Commerce 1941–5, and P.M. of N. Ireland 1943–63. He was a staunch advocate of strong links with Britain. He succeeded to his father's baronetcy in 1907, and was created a visct. in 1952.

BROOK FARM. Farm in W. Roxbury, near Boston, Mass., U.S.A., which in 1841–7 was the scene of a liberal communistic experiment led by George Ripley (1802–80), a former Unitarian minister. Financial difficulties and a disastrous fire led to the community's dissolution.

BROOKLANDS. Former motor racing track, 1 m. from Weybridge, Surrey, England, opened in 1907 as a testing-ground for motor-cars, and closed in 1946.

BROOKLYN. Most populous borough of New York City, U.S.A. Occupying the S.W. end of Long Island, on New York Bay and East r., it is connected with Manhattan Island by bridges, tunnels, and ferries. It is an important commercial and industrial centre; its waterfront, with many great docks, basins and wharves, extends to 33 m.; and at Wallabout Bay, East r., is the important Brooklyn U.S. Navy Yard.

B. is noted for the number and standard of its public buildings; cultural activities are the concern of the Brooklyn Institute, founded in 1823. Of the more than 60 parks, Prospect is the most important. Area 89 sq. m.; pop. (1960) 2,627,319.

BROOKS, Van Wyck (1886–1963). American critic. Though b. in New Jersey, B.'s spiritual home was New England, where he settled in Connecticut in 1920. He valued the 'rational intensity of the Puritan ideal' and his study *The Flowering of New England* (1936) was the first of a 5-vol. series covering American literature 1800–1915.

BROOKWOOD. Part of Woking, Surrey, England, the site of the first public crematorium in England, first used in 1885.

BROUGHAM, Henry Peter, 1st baron B. and Vaux (broom and vawks) (1778–1868). British statesman. B. in Edinburgh, he was a founder of the *Edinburgh Review* to which he contributed from 1802 onwards. From 1811 he was chief adviser of the Princess of Wales (afterwards Queen Caroline), and in 1820 he defeated the attempt of George IV to divorce her. He sat in Parliament 1810–12 and from 1816, and supported the causes of public education and law reform. When the Whigs returned to power in 1830, B. was made Lord Chancellor and created Baron B. and Vaux. His speeches in support of the Reform Bill were a notable effort, but his dictatorial and eccentric ways led to his exclusion from office when the Whigs next assumed power in 1835. After 1837 he took an active part in the business of the House of Lords.

BROUWER (brow'wer), Adriaen (c. 1605–38). Flemish artist. Influenced by Hals, with whom he may have studied, he developed an animated style of rendering peasant scenes. Avoiding bucolic romanticism, he captured in detail the squalid debauchery, and was himself said to have lived a Bohemian existence.

BROWN, Ernest William (1866–1938). British mathematical astronomer. Ed. at Cambridge, he devoted himself to the study of the lunar theory. His *Tables of the Motion of the Moon* was pub. by Yale univ., where B. was prof. of mathematics 1907–32. He also pub. *Planetary Theory* (1933).

BROWN, Ford Madox (1821–93). British painter. B. at Calais, he studied in Belgium, and later came to England where he was associated with the Pre-Raphaelites, though he did not actually join the movement. His best-known pictures incl. 'The Last of England' (Birmingham), and 'Christ Washing St. Peter's Feet' (Tate Gallery, London), and he had a gift for strong colour.

GEORGE BROWN
Photo: Daily Herald.

BROWN, George (1914–). British Labour politician. Entering Parliament in 1945, he was briefly Min. of Works in 1951 and contested the leadership of the party on the death of Gaitskell. He ultimately accepted the deputy leadership under Wilson, and was 1st Sec. of State and Min. for Economic Affairs 1964–6, and For. Sec. 1966–8.

BROWN, John (1800–59). American anti-slavery leader. B. in Connecticut, he settled as a farmer in

CAHORS (kah-ohr). French city, cap. of Lot dept., on the r. Lot 60 m. N. of Toulouse. It is a market centre, and has an 11th cent. cathedral. Gambetta was b. here. Pop. (1962) 19,280.

CAILLAUX (kahyô'), Joseph (1863-1944). French statesman. Several times Min. of Finance and Min. for Foreign Affairs, he was P.M. 1911-12. In 1913, when he was Finance Min., his wife shot and killed G. Calmette, editor of *Le Figaro*, who had threatened to publish letters written by C. to her while she was still another man's wife. C. resigned and defended her on her trial, and she was acquitted. Suspected of defeatism during the F.W.W., he was arrested in 1918, tried and condemned to 3 years' imprisonment in 1920, but released the next day and fully amnestied in 1924. Subsequently he was again twice Min. of Finance.

CAIN. O.T. character, the first-born son of Adam and Eve. He murdered his brother Abel from motives of jealousy, as Abel's sacrifice was more acceptable to the Lord than his own, and so became the world's first murderer.

CAIN, James Mallahan (1892-). American novelist. B. at Annapolis, he entered journalism and is the author of *The Postman Always Rings Twice* (1934), *Double Indemnity*, and *Mildred Pierce* (1941).

CAINE, Sir Hall (1853-1931). British novelist. Though b. in Cheshire, he was of Manx parentage and the island figures largely in his rather melodramatic works which incl. *The Deemster* (1887), *The Bondman* (1890, also dramatized), *The Manxman* (1894), and *The Woman Thou Gavest Me* (1913). He lived with D. G. Rossetti in London for a time and pub. in 1882 *Recollections of Rossetti*. He was knighted in 1918.

ÇA IRA (sah êrah'). Song of the French Revolution, written by a street singer, Ladré, and set to an existing tune by Bécourt, a drummer of the opera.

CAIRN. British breed of terrier dog, the original terrier of the Scottish Highlands. It is shaggy, compact, and short-legged, weighing not more than 14 lb., and used in Scotland for going to ground to fox, badger, otter, etc., among rocks and cairns.

CAIRNGORMS. Mountain group in Scotland, N. part of the Grampians, including Ben Macdui (4,296 ft.), Braeriach (4,248 ft.), Cairntoul (4,240 ft.), and Cairngorm (4,084 ft.), which are the highest peaks in the Br. Isles with the exception of Ben Nevis.

CAIRNS. Seaport of Queensland, Australia, with a fine harbour, concerned largely with the export of sugar. Pop. (1961) 25,358.

CAIRO (kî'rô). Cap. of the United Arab Rep. and of Egypt, largest city in Africa, on the right bank of

the Nile, 8 m. above the apex of the Delta, and 100 m. from the Mediterranean; the most important trading and distributing centre of the Near East and N. Africa.

El Fustat (Old Cairo) was founded by the Arabs c. A.D. 641, Cairo itself c. 1000 by the Fatimite ruler Gowhar. C. is 20 m. N. of the site of ancient Memphis, while outside C. at Gizeh are the Pyramids and the Sphinx. C. has many ancient buildings, incl. the citadel, the univ. (originally a mosque) of El Azhar, dating from c. 1000, and the mosques of El-Hakim and Amru; modern buildings incl. the govt. offices, museums, hospitals, opera house. Parts of C. are still medieval; the modern quarters reflect the city's functions as a commercial, government, and tourist centre. At Helwan, 15 m. to the S., iron and steel works are planned (1968) to utilise power from the Aswan High Dam. Its people are predominantly of mixed Arab and pre-Arab blood. The majority are Moslems, but there is a considerable Coptic Christian community. Pop. (1960) 3,346,000.

CAISSON DISEASE. See BENDS.

CAITHNESS (kâth'nes). Co. in the extreme N.E. of Scotland. The low-lying N.E. part produces oats and vegetables. Towards the S.W. the land rises, and in the higher parts sheep are reared. The co. town is Wick; the only other town of importance is Thurso. Area 686 sq. m.; pop. (1961) 27,345.

CAIUS (kēs), John (1510-73). English doctor, physician to Edward VI, Mary, and Elizabeth. He extended in 1557 the building of Gonville (and Caius) College, Cambridge, founded by Edmund Gonville in 1348.

CALABRIA. Administrative region occupying the 'toe' of Italy; area 5,810 sq. m.; pop. (1961) 2,045,215. It contains the provs. of Catanzaro, Cosenza, and Reggio di C. In Roman times the name C. was given to the 'heel' of Italy.

CALAIS (kahlä'). Seaport and town in Pas-de-Calais dept., N. France, 148 m. N. by W. of Paris, and 25 m. E.S.E. of Dover across the English Channel. The old town is surrounded by the harbour and canals. It was taken by Edward III in 1347, and was held by the English until 1558. C. was in German hands from May 1940 till 1 Oct 1944, when it surrendered to the Canadians. Pop. (1962) 70,707.

CALAS (kahlahs'), Jean (1698-1762). A French Protestant, who in 1761 was accused of murdering his son to prevent his joining the R.C. Church. In spite of his complete denials, he was found guilty and executed. His widow escaped to Switzerland, and enlisted the aid of Voltaire, who succeeded in getting the trial reviewed and Calas' innocence was proved. A grant was paid to the family by Louis XV.

CALCEOLARIA (kalsēolā'ria), also 'slipper flower' (Lat. *calceolus* 'slipper'). Genus of plants of the family Scrophulariaceae, native to S. America and including shrubby and herbaceous species. The brilliantly coloured flowers, much enlarged in highly cultivated greenhouse specimens, resemble pouches or 2-lipped slippers. Cs. were introduced to Europe c. 1830.

CALCITE (-s-). A form of calcium carbonate (CaCO_3) and the constituent of chalk, limestone, and marble. There are two distinct crystalline forms, viz. 'nailhead spar', where the crystals are flat and tabular in shape, and 'dog-toothed spar', with sharply pointed pyramidal crystals. Iceland spar, a variety of the first type, possesses the property of double refraction and is used in optical instruments. C. is one of the most abundant mineral constituents of the earth's crust.

CALCIUM. Chemical element, a silvery-white metal, one of the alkaline earth metals. Symbol, Ca; atomic weight 40.07; atomic number 20. It was discovered by Sir Humphry Davy in 1808 and is very widely distributed, mainly in the form of its carbonate CaCO_3 , which occurs in a fairly pure condition as chalk and limestone. C. is an essential component of

CAIRO. Within the walls of the citadel built by Saladin in the 12th cent. are several mosques, the loveliest being that built of alabaster by Mohammed Ali. Its 2 slender minarets stand out, even among the 400 which pierce the sky over the city.

Courtesy of the Egyptian State Tourist Administration.

against Edward I, and was crowned king of Scotland in 1306. He defeated Edward II at Bannockburn in 1314, and in 1328 the treaty of Northampton recognized Scottish independence, and B. as king.

BRUCE, Stanley Melbourne, 1st visct. B. of Melbourne (1883–1967). Australian statesman. Called to the Bar in 1906, he practised in England until 1914. After serving in the F.W.W., he returned to Australia, where he was elected to the Commonwealth parliament in 1918 as a member of the National Party, becoming P.M. and Min. for External Affairs in a National-Country Party coalition (1923–9). He was Australian Minister in London (1932–3), and High Commissioner (1933–45), and 1951–61 was 1st Chancellor of the Australian National Univ., Canberra. In 1947 he received a viscounty.

BRUCKNER (brook'ner), Anton (1824–96). Austrian composer. B. at Ansfelden, son of a country schoolmaster, he was a choirboy at the monastery of St. Florian where he later became apprentice organist. As cathedral organist at Linz 1856–68, he composed in his leisure time and was much influenced by Wagner, and from 1868 was at Vienna, where he became prof. at the Conservatoire in 1871. He wrote numerous choral works, and 9 symphonies, one unfinished.

BRUEGHEL (brö'khel), Pieter (c. 1525–69). Flemish painter, whose pictures of peasant life are distinguished by vividness of colouring and expression, and by a grotesque and often satirical humour. His son **PIETER B. THE YOUNGER** (1564–1637), called 'Hell' B., painted chiefly religious subjects; another son **JAN B.** (1568–1625), known as 'Velvet' B., was a painter of flowers, landscapes, and seascapes, and often collaborated with Rubens.

BRUGES (brüz), City and episcopal see of Belgium, capital of W. Flanders province, 10 m. from the North Sea, with which it is connected by canal, and 58 m. N.W. of Brussels. It has its name from the many bridges that cross its many waterways. Among its notable buildings are the cathedral of St. Sauveur, dating from the 7th cent.; the church of Notre Dame, dating from the 8th cent.; the Hôtel de Ville, begun in 1376; and the famous belfry (13th cent.) above the Halles (markets). Medieval B. was the most important place in Flanders, with a thriving woollen industry, but was superseded by Antwerp and Amsterdam, though it is still important for textile and lace manufacturing. Pop. (1966) 52,249.

BRUGGE, Flemish form of BRUGES.

BRUMMELL, George Bryan (1778–1840). English man of fashion known as 'Beau' B. The friend of the Prince of Wales (later George IV), he was for several years the recognized leader of fashion. Eventually, however, his fortune was exhausted, he quarrelled with the Prince, and in 1816 fled to France.

BRUNEAU (brünō), Alfred (1857–1934). French composer and critic. He is celebrated for his operas, the most famous being *Le Rêve* (1891), and *L'Attaque du Moulin*, with libretti supplied by his friend Zola.

BRUNEI (broonī'). State in N.W. Borneo, surrounded on all sides by Sarawak. It came under Brit. protection in 1885 and was occupied by the Japanese 1941–5. Under the constitution of 1959 (amended 1965), there is a Privy Council, Council of Ministers (elected) and Legislative Council (part nominated, part elected). The Menti Besar, or chief minister, is appointed by the sultan, Hassanal Bolkiah (1922–), who succeeded on his father's abdication in 1967. Oil revenues provide excellent social services; other products are rubber and sago. The cap. is B. (Pop. 57,000) on B. river. Area 2,226 sq. m.: Pop. (1966) 127,195.

BRUNEL, Sir Marc Isambard (1769–1849). Engineer and inventor. B. in Normandy, he served with the French navy until 1792, when he went to New York. Coming to England in 1799, he did engineering

work for the Admiralty, improved the port of Liverpool, and planned a tunnel under the Thames from Wapping to Rotherhithe which was constructed 1825–43. He was knighted in 1841.

His son, **Isambard Kingdom B.** (1806–59), assisted his father in the Thames tunnel project, and in 1833 became engineer to the G.W. Railway, which adopted the 7 ft. gauge on his advice. In 1838 he designed the *Great Western* which was the first steamship to cross the Atlantic regularly, and sailed from Bristol to New York. His next ship was the *Great Britain* (1845), the first large ship to be constructed of iron and to have a screw propeller; larger still was the *Great Eastern* (1858). Brunel Univ. (1966) at Uxbridge is named after them.

BRUNELLESCHI, (broonel-les'kē) or **BRUNEL-LESCO** (-skō), Filippo (1377–1446). Italian architect. The first of the great Renaissance architects, he was a pioneer in the scientific use of perspective. His great work was the completion of the cathedral church of Santa Maria del Fiore in Florence.

BRUNETIÈRE (brüntiär), Ferdinand (1849–1906). French critic. He became editor of the *Revue des deux mondes* (1893), and prof. at the École Normale (1886). He was a fearless critic.

BRÜNING, Heinrich (1885–). German politician. Elected to the Reichstag in 1924, he led the Catholic Centre Party from 1929, and was Reich Chancellor 1930–2, when political and economic crisis forced his resignation. He then went to the U.S., but was prof. of political science at Cologne univ. 1951–5.

BRÜNN, German form of BRNO.

BRUNNER (broon'ner), Emil (1889–1966). Swiss theologian. Ordained a minister of the Reformed Church in 1912, he taught at Zürich 1924–53 and Tokyo 1953–5. B. was one of a group of Swiss pastors who combined after the F.W.W. to reject revelation through reason, and stress dependence on grace.

BRUNNER, Sir John Tomlinson (1842–1919). British industrialist. In 1873 he founded with Ludwig Mond the great chemical manufacturing firm of Brunner, Mond and Co., which was incorporated in Imperial Chemical Industries Ltd., in 1926.

BRUNO (broo'nō), Giordano (c. 1548–1600). Italian philosopher. He became a Dominican in 1563, but his sceptical attitude to Catholic doctrines compelled him to leave Italy c. 1577. After visiting Geneva and Paris, he lived in England (1583–5), where he wrote some of his finest works. He then returned to the Continent, and after much wandering was arrested in Venice by the officers of the Inquisition, who took him to Rome in 1593. He was imprisoned, but refused to renounce his heretical religious views and his

BRUNSWICK. Built in the 14th and 15th centuries, the Town Hall is a magnificent example of Gothic architecture. Courtesy of the German Tourist Information Bureau.

resumed playwriting when made honorary chaplain to the king in 1663. Many of these later dramas were *autos sacramentales*, outdoor plays for the festival of the Holy Eucharist. Most famous of his regular plays, of which some 118 survive, are the tragedies *El pintor de su deshonra*, *El Alcalde de Zalamea*, *El Médico de su honra* and *El Mayor monstruo los celos*; the historical *El Principe constante*; the dashing intrigue *La Dama duende*; the philosophical *La Vida es sueño*; and the religious *El Purgatorio de San Patricio*. He died in poverty.

CALDWELL, Erskine Preston (1903–). American novelist. B. in Georgia, he worked among the poor whites of the South as a journalist, cotton picker and stage assistant and achieved sensational success with *Tobacco Road* (1932), later dramatized and filmed, telling of a squalid share-cropping family in the back lands of the cotton country, which was banned in many places. Later books incl. *God's Little Acre* (1933) and *Trouble in July* (1940) analysing racial antagonism.

CALDY ISLAND. Is. off the Pembrokeshire coast, Wales. The small Cistercian monastery is famous for its manufacture of perfume.

CALEDONIAN CANAL. A waterway across the N.W. of Scotland, linking the Atlantic and the North Sea. Of its length of 61 m. only a stretch of 23 m. is artificial, the rest being composed of lochs Lochy, Oich, and Ness. The C., now used chiefly by small pleasure steamers, etc., was built by Thomas Telford, 1803–23.

CALENDAR. A system devised for the distribution of time into periods convenient for the purposes of civil life. The word comes from the Lat. *kalendae* or *calendae*, the first day of each month on which solemn proclamation was made of the appearance of the new moon. All early Cs. except the ancient Egyptian were lunar. The C. in use over a great part of the world today rests on the Roman C. as revised by Julius Caesar and Augustus, but many modifications have been made in the course of time.

Quite early in their history the Romans had a civil year of 355 days; but the seasons depended on the solar year which was about 11 days longer than the lunar, and to bring the 2 years into harmony, additional days were intercalated. In 46 B.C. Caesar introduced the year of 365 days, and an extra day in every 4th year. He took the length of the solar year as 365 days, 6 hours. Actually, however, it is only 365 days, 5 hrs. 48 mins. 46 secs. and through the centuries the discrepancy mounted up until in the 16th cent. it amounted to 10 days. In 1582 Pope Gregory XIII proclaimed his Gregorian or New Style C., with the aim of putting the Julian error right and also to secure uniformity as to the date at which each year should be reckoned as beginning. At first only states in the Roman obedience accepted the new C., but in the 18th cent. Protestant states began to fall into line. Britain adopted it in 1751, by which date the accumulated error amounted to 11 days, so it was enacted that the day following 2 Sept 1752 should be renumbered 14 Sept. France, which had adopted the Gregorian C. in 1582, abandoned it from 1793 to 1805 in favour of the Revolutionary Calendar. Turkey and Russia did not adopt it until 1917, and the Eastern Orthodox Church in Russia and the Balkans not until 1923.

About 1930 the League of Nations decided that it would be advantageous to change to what is now called the World C., i.e. equal quarters perpetual, with an extra-calendrical day at the end of the year and a similar day in the summer every Leap Year. The proposal is still before the U.N. The 8-day week involved brought objections from orthodox Jewry.

CALGARY. Second city of Alberta, Canada, on the Bow, at the foot of the Rockies. It has grain elevators, flour mills, etc., and is a tourist centre. Fort Calgary was set up by the N.W. Mounted Police

CALIFORNIA. One of the loveliest and most important of the old Spanish Franciscan Missions is San Fernando, founded in 1797. The Convento or Long Building (1810–22), is famous for its façade of 19 arches and the adobe walls are 4 ft. thick. Courtesy of the Mission San Fernando.

in 1875. The C.P.R. reached it in 1833, and C. rapidly developed. The Univ. of C. became independent of Alberta Univ. 1966. Pop. (1961) 249,641.

CALHOUN (kálhōon'), John Caldwell (1782–1850). American statesman. B. in S. Carolina, of Scots-Irish descent, he was elected Vice-President in 1824, and again in 1828. Throughout he was a defender of the 'States' Rights' as against the Federal Government and the institution of Negro slavery.

CALI (kahlē'). Industrial city of Colombia, S. America; capital of Valle Dept. It was founded in 1536. Sugar is manufactured. Pop. (1964) 637,929.

CALIBRATION. Comparison of scale marks with a standard, as in testing the accuracy of measuring instruments.

CALICO. A plain woven cotton material; the name derives from Calicut on the Malabar coast, an original source of Indian Cs.

CALIFORNIA. A Pacific state of the U.S.A., lying between Oregon and the Mexican province of Lower California. Its popular name is the 'Golden State' because of its gold mines, and as a result of a post-S.W.W. boom surpassed N.Y. as most populous state of the union 1964.

C. contains 2 great mountain ranges. The Sierra Nevada running along the eastern boundary with an average breadth of about 80 m., includes the Yosemite and other famous canyons, and its chief peak is Mt. Whitney (14,495), the highest mt. in the U.S.A. excluding Alaska. Along the coast is a series of disconnected ranges called the Coast Range, longer but lower than the Sierra Nevada. Between the 2 ranges lies the great valley of C., watered by the Sacramento, the San Joaquin, and tributaries which together drain most of the state.

Extending over nearly 800 m. from N. to S., C. has a varied climate, on the whole one of the best in the world. Vast quantities of fruit are produced and other temperate and sub-tropical produce. Petroleum refining, food canning, and meat packing are the main industries. At Hollywood is the film metropolis. Sacramento is the capital; but Oakland, San Diego, Longbeach, and the ports Los Angeles and San Francisco, are larger.

C. was first settled by the Spaniards in 1769. It formed part of Mexico from 1822 to 1848 when it was ceded to U.S.A. It became a state of the union 2 years later. The discovery of gold in 1848 led to the gold rush of the following year (the 'forty-niners') and mining has continued on a large scale, though petroleum has outstripped gold in importance. Area 158,693 sq. m.; pop. (1960) 15,717,204.

CALIFORNIA, Lower. See LOWER CALIFORNIA.

CALIFURNIUM. See TRANSURANIUM ELEMENTS.

CALIGULA, Gaius Caesar (A.D. 12–41). Roman

naval power in the 18th cent. put an end to their activities.

BUCHER (boots'er), Martin (1491–1551). German Protestant reformer. From 1549 he was regius prof. of divinity at Cambridge. He attempted to reconcile the viewpoints of Luther and Zwingli.

BUCHAN (buk'an), Alexander (1829–1907). Scottish meteorologist. He was sec. to the Scottish Meteorological Soc. from 1860, and evolved from tabulated records the series of 6 cold and 3 warm spells tending to occur between certain dates each year which are named after him.

BUCHAN, John, baron Tweedsmuir (1875–1940). Scottish statesman and author. Called to the Bar in 1901, he was Cons. M.P. for the Scottish Univs. (1927–35), and on his appointment as Gov. Gen. of Canada (1935–40) was raised to the peerage. In addition to biographies of Raleigh, Scott, Cromwell, Julius Caesar, and Augustus, he pub. thrilling adventure stories which won wide popularity and incl. *Prester John* (1910), *The Thirty-Nine Steps* (1915), *Greenmantle* (1916), *Huntingtower* (1922), *The Three Hostages* (1924), and *The House of the Four Winds* (1935); and the autobiographical *Memory Hold the Door* (1940).

BUCHAN (bukh'an) **NESS**. Most easterly cape of Scotland, in Aberdeenshire, 3 m. S. of Peterhead.

BUCHANAN (bukan'an), George (1506–82). Scottish humanist. Forced to flee to France in 1539 owing to some satirical verses on the Franciscans, he returned to Scotland c. 1562 as tutor to Queen Mary. He became principal of St. Leonard's Coll., St. Andrews, in 1566, and wrote *Rerum Scoticarum Historia* (1582).

BUCHANAN (bukan'an), Jack (1891–1957). British musical comedy actor. B. at Helensburgh, he played in London and N.Y. in *Charlot's Revue*, etc., and his songs such as 'Good-Night Vienna' epitomized the inter-war period.

BUCHAREST (bookarest'). Cap. of Rumania, on the Dombovita. Although open to the plains, except on the W. and S.W., it has a comparatively mild winter. Once a citadel built by Prince Vlad the Impaler to stop the advance of the Ottoman invasion in the 14th cent., it was the cap. of the Princes of Wallachia from 1698, and of Rumania from 1861. Little of the old

BUCHAREST. The characteristic houses of the Village Museum (1936) in Herastrau Park are furnished exactly as they were when inhabited, and form one of the most interesting open-air museums in the world.

Courtesy Rumanian Nat. Travel Office

town remains, but there are fine 17–18th cent. churches, the 18th cent. Mogosoia Palace (now a museum), the univ. (1864), the Palace of the Grand Nat. Assembly, the Fine Arts Museum, Nat. Museum of Antiquities,

and the Cismigiu Gardens planned in the 19th cent. The international airport is at Baneasa. Pop. (1966) 1,650,000.

BUCHMAN (bōōk-), Frank N. D. (1878–1961). American evangelist. In charge of Christian work at Penn. State Coll. 1909–15, he visited Oxford in 1921 and gathered round him the 'Holy Club', nicknamed the 'Oxford Group' when a number of members visited S. Africa, noted for its group confessionals. In 1938 he launched in London the anti-Communist campaign for Moral Rearmament (M.R.A.).

BUCHNER (būkh'ner), Ludwig (1824–99). German materialist philosopher. Forced to resign his lectureship in medicine at Tübingen university owing to the materialist views of his *Kraft und Stoff* (1855), he worked as a physician in Darmstadt and pub. several similar works. His brother Georg B. (1813–37), author of *Dantons Tod* and *Wozzeck*, was a dramatist.

BUCK (née Sydenstricker), Pearl S. (1892–). American novelist. Dau. of missionaries to China, she wrote novels of Chinese life, such as *East Wind – West Wind* (1930) and *The Good Earth* (1931), and received a Nobel prize in 1938.

BUCKINGHAM, George Villiers, 1st duke of (1592–1628). English courtier. Introduced to the court of James I in 1614, he soon became his favourite, being made earl of B. in 1617 and a duke in 1623. He failed to arrange the marriage of Prince Charles and the Infanta of Spain (1623), and on returning to England negotiated Charles's alliance with Henrietta Maria, sister to the French king. Following Charles's accession, B. attempted to form a Protestant coalition in Europe and Britain drifted into war with France, but he failed to relieve the Protestants besieged in La Rochelle (1627). His policy was attacked in Parliament, and when about to sail again for La Rochelle he was assassinated at Portsmouth.

BUCKINGHAM. Market town (bor.) of Bucks, England, on the Ouse. Primarily an agricultural centre, it has an Edward VI grammar school. Pop. (1961) 4,377.

BUCKINGHAM PALACE. The London home of the British Sovereign. Originally built in 1703 for the duke of B. it was bought by George III in 1762 and reconstructed by Nash 1825–36. It was permanently occupied by Queen Victoria, and in 1913 a new front was added. It was slightly damaged by bombs during the S.W.W.

BUCKINGHAMSHIRE (Bucks). S. midland county of England touching Northants in the N. and the Thames in the S. It is an agricultural county, the Vale of Aylesbury being particularly fertile. Woods are extensive in the N., and the S. is noted for its beech trees. The chief rivers are the Thames, Colne, Thame, Ouse and Ousel; the Grand Union Canal passes through the county. Manufactures include furniture, paper and agricultural machinery. The co. town is Aylesbury; other towns incl. Buckingham, High Wycombe, Slough, Beaconsfield, Eton, Marlow, Amersham. Area 749 sq. m.; pop (1967) 552,470.

BUCKLE, Henry Thomas (1821–62). British historian. The 1st 2 vols. of his unfinished *History of Civilization in England* (1857–61) were remarkable for pointing out the influence of food, soil, climate, etc. on the course of history.

BUCKTHORN. Genus of thorny shrubs (*Rhamnus*) of the family Rhamnaceae, of which 2 species, *R. catharticus* and *R. frangula* (alder B.), are British.

BUCKWHEAT. Plant (*Fagopyrum esculentum*) of the family Polygonaceae, producing a grain of high nutritive value for human and animal consumption, which can be grown on poor soil in a short summer.

BUDAEUS (boodē-us). Latin form of the name of Guillaume Budé (1467–1540), French scholar. He persuaded Francis I to found the Collège de France, and also the library that formed the nucleus of the Bibliothèque Nationale.

CALVARY. The Church of the Holy Sepulchre, said to have been erected on the site of the Crucifixion. There are some topographical difficulties, but the tradition is continuous since the time of Constantine and may well be true.

to Geneva, and assist in the work of reformation. But in 1538 he was expelled because of public resentment at the many and too-drastic changes he introduced. At Strasbourg he m. a widow, and devoted himself to translating the N.T. In 1541 the Genevans invited him back. He accepted and established in the face of strong opposition a theocracy. The black mark on his rule is the burning of Servetus for heresy in 1553. He supported the Huguenots in their struggle in France, and afforded a refuge to English Protestants driven overseas by the Marian persecutions. His theological system is known as Calvinism (q.v.), and his Church government as Presbyterianism (q.v.).

CALVIN, Melvin (1911–). American chemist, prof. of chemistry (from 1947) and also director of the bio-organic chemistry group at the Lawrence Radiation Laboratory (from 1946), Univ. of California. An authority on photosynthesis, he received a Nobel prize in 1961 for research into the carbon dioxide assimilation of plants – a factor in plant growth.

CALVINISM. That interpretation of Christian doctrine that was formulated by John Calvin (q.v.) and became predominant in Scotland, parts of Switzerland and Holland, and has greatly influenced Protestant theology to the present time. Its central doctrine is that of predestination, by which is meant that certain souls (the elect) are predestined by God to salvation (although this does not obviate the need for faith and perseverance), whilst others are doomed to eternal damnation. C. stresses the total depravity of human nature, but insists that salvation is offered through the sacrifice of Christ, made only on behalf of the elect. Faith and repentance are also necessary, but the theory of irresistible grace implies that the operation of Divine grace which makes these possible is predetermined. C. is marked by logic and

lucidity, but even those churches originally C. in doctrine rarely accept it in its strict sense nowadays. Nevertheless during the present century there has been a marked revival of Neo-Calvinist thought, largely through the influence of Karl Barth (q.v.).

CALVINISTIC METHODIST CHURCH (Welsh Presbyterian Church). The only church of entirely Welsh origin, it arose from the work of Rev. Griffith Jones (1684–1761), and was first organized in 1743. From 1795 its members began to separate from the Church of England owing to persecution, and from 1811 it ordained its own ministers. Its members in 1960 numbered c. 150,000.

CAM. English river on which Cambridge stands; it rises near Ashwell, Herts, and flows through Cambridgeshire to join the Ouse $3\frac{1}{2}$ m. S. of Ely. It is sometimes called the Granta.

CAMAGÜEY. City of Cuba, cap. of the prov. of C., in the centre of the island. It was founded c. 1514, and has a 17th cent. cathedral. Pop. (1960) 191,379.

CAMARGO (kahmahrgō), Marie-Anne de Cupis de (1710–70). French dancer. B. in Brussels, she became a ballet star in Paris in 1726. She was the first ballerina to adopt a shortened skirt, and the first to attain the *entrechat à quatre*. She retired in 1751. The Camargo Society, founded in 1930, was named after her.

CAMBACÈRES (kōnbahsārās), Jean Jacques Regis de, duke of Parma (1753–1824). French statesman. He came into prominence during the French Revolution and rose to an influential position under Napoleon. In 1815 C. went into exile, but regained his civil rights in 1818.

CAMBODIA. Kingdom of S.E. Asia, lying between Thailand on the W. and Vietnam on the E. and S., with a coast on the Gulf of Siam. It forms no geographical unit, but consists of (a) the low-lying middle valley of the Mekong; (b) the vast area, formerly a sea gulf, whose centre is the Great Lake or Tonle Sap; (c) the highlands adjoining the upper course of the Mekong; and (d) the mountains bordering the Gulf of Siam. The greater part of the surface is wild and uncultivated, but the central plain is immensely fertile, since in June the swollen Mekong causes the Great Lake to overflow and to inundate some 1,000 sq. m. of territory. When in October the flood waters retreat, a thick layer of fertilizing slime is left behind, and on this rice, maize, soya beans, tobacco, etc. are grown, rice being the chief product. Above the earth, perched high on stilts, are the houses of the Cambodians. Matches, cigarettes, bricks, textiles, etc., are manufactured on a small scale. The forests are valuable. Much dried fish is exported.

CAMARGO. Gay and wildly extravagant, she was almost the ruin of such admirers as Louis de Bourbon, comte de Clermont. Nicholas Lancret captures in this portrait the grace and fire which owed something to her Spanish descent.

Reproduced by permission of the Trustees of the Wallace Collection.

BUFFALO. The remarkable horns of these Cape buffalo meet in a helmet-like mass on the forehead and may measure 4 ft. across from the extremity of one outward curve to the other. Once there were herds several hundred strong, but shooting has reduced them to such small groups as this in Wankie National Park. Courtesy of the High Commissioner for Rhodesia.

the base and triangular in section. True Bs. are confined to the eastern hemisphere and fall into 2 distinct groups, African and Asiatic.

The typical African B. (*Synceros caffer*) inhabits open bush country, generally near rivers all over Africa S. of the Sahara. The Cape B. stands about 5 ft. in height, is black and has horns set close together to form a helmet-like mass on the forehead. Other races inhabit E. Africa. The dwarf B., sometimes called the bush-cow, is about 3½ ft. high. It is red, and lives in the Congo forest.

In Asiatic Bs., of which there are 3 distinct species, the head is relatively longer and the ears smaller. The common Indian B. or water-B. (*Bubalus bubalus*) is black and up to 5½ ft. high, with long, widely separated horns. They can be domesticated readily, and have been introduced into Australia, Italy, etc. The Tamarau or Philippine B. (*B. mindorensis*) is about 3½ ft. high, with short close-set horns growing backwards, and is intermediate between the Indian B. and the anoa (*B. depressicornis*), which inhabits Celebes and is about 3 ft. high. The so-called B. of America is the bison (q.v.).

BUGFET (büfeh'), Bernard (1928–). French artist. B. in Paris, he has exhibited annually since 1948, and besides oils and water colours, is known for his lithographs, book illustrations and murals. His rapidly produced canvases are pessimistic, reflecting a feeling of nausea at the unpleasantness of life.

BUFFON (büfoñ'), Georges Louis Leclerc, Comte de (1707–88). French naturalist. In 1739 he became keeper of the Jardin du Roi, and was elected to the Academy in 1753, when he delivered his *Discours sur le style*. He encouraged the popular study of natural history, and pub. a 'Natural History' in 44 vols. (1749–1804).

BUG. Name loosely applied to various insects, and in the U.S.A. to various kinds of beetles (*Coleoptera*), but in England more particularly to the bed-bug and its allies, which form the sub-order Heteroptera of the order Hemiptera.

The bed-bug (*Cimex lectularius*) is a brownish, flattened, wingless insect, with an unpleasant smell, found in old houses, and issuing forth at night to suck the blood of sleepers. The Heteroptera include a number of families. Some are predatory, feeding on other insects; some suck the juice of plants, such as the squash B. (*Anasa tristis*) and the cotton stainer (*Dysdercus suturellus*); other Bs. such as the water-scorpions (Nepidae), water boatmen (Notonectidae), and pond skaters (Hydrometridae), are aquatic; and one genus (*Halobates*) is marine.

BUG (boog). Name of 2 rivers in eastern Europe. The West B. rises E. of Lvov, and flows past Brest to the Vistula some 20 m. below Warsaw. The South B. rises near Proskurov in the Ukrainian S.S.R. and flows S.E. to enter the Black Sea below Nikolaev.

BUGANDA (boog-). Region of Uganda, the largest of the 4 kingdoms recognized as in a federal relationship to the central govt. 1962–6, when its Kabaka, Sir Edward Mutesa II (1924–) was also pres. Deposed under the 1966 constitution introduced by Milton Obote, he fled the country. The chief towns are Kampala, cap. of B. and of Uganda, and Entebbe (qq.v.). Area 26,000 sq. m.; pop. c. 1½ millions. The people are known as the Baganda.

BUGATTI (boogaht'è), Ettore (1882–1947). Automobile designer and manufacturer of racing cars, b. in Milan. He designed his first car in 1899 and established a factory at Strasbourg (then German) in 1907. Refusing to work for Germany in the F.W.W. he went to Italy and then to France, where he was naturalized and produced many racing cars, etc.

BUGLE. Wind instrument, belonging to the brass family. It resembles the trumpet, but has a shorter tube and a less expanded bell, and is constructed of copper plated with brass. It has long been in wide use as a military instrument.

BUGLE. Perennial herb (*Ajuga reptans*) belonging to the family Labiatae, and common throughout Britain. B. has numerous running stems, leaves frequently tinged with red or purple, and a whorl of 6 or 10 blue flowers.

BÜ'GLOSS. Name of several plants of the family Boraginaceae, distinguished by their rough bristly leaves and small blue flowers.

BUHL (bool). Process of inlaying various metals, particularly brass and silver, into tortoise-shell or occasionally wood, which was invented by the Frenchman C. A. Boulle (1642–1732).

BUILDING SOCIETY. Institution which attracts investment, and from the proceeds makes advances on the security of first mortgage on property.

B.Ss. are mutual institutions and operate on public utility lines. They do not themselves engage in actual building operations today, but the first B.Ss. were directly concerned with the erection of houses. The first B.S. was estab. in Birmingham in 1781, and in 1836 the first Act of Parliament regulating their activities was passed. Among recent developments reflecting social change have been the increase of advances to mortgagors above the 80 per cent of the surveyor's valuation formerly usual, and the extension of the period of repayment beyond 20 years, consequences of higher house prices, longer expectation of working life, earlier marriage, etc. Most of the capital is provided by way of shares, attractive to small investors because income tax is borne by the B.S.: interest rates for borrowers are rendered less oppressive by income tax relief on mortgage repayments.

Originating in Britain, where there are c.500 with assets of some 6½ thousand million pounds, B.Ss. are now world wide, flourishing espec. in the U.S.A. and the Dominions.

BUISSON (büësoñ'), Ferdinand (1841–1932). French pioneer of the idea of a league of nations. For 13 years he was president of the *Ligue des droits de*

BUG. 1, Bed-bug; 2, Squash bug; 3, Frog hopper; 4, Pond skater; 5, Leaf hopper; 6, Boatman.

CAMBYSES (reigned 529–522 B.C.). Emperor of Persia. Succeeding his father Cyrus, he assassinated his brother Smerdis and conquered Egypt in 525. Here he outraged many of the native religious customs, and was said to have become mad. On his way back he d. in Syria by suicide or accident.

CAMDEN, William (1551–1623). English antiquary. B. in London, he pub. his *Britannia* in 1586, and became headmaster of Westminster School in 1593. The C. Society was founded in 1838.

CAMDEN. Industrial city of New Jersey, U.S.A., on the Delaware, connected with Philadelphia by a suspension bridge 8,536 ft. long (main span 1,750 ft.) opened in 1926. Pop. (1960) 117,159.

CAMEL. A large cud-chewing mammal (*Camelus*) of the order Artiodactyla with a humped back, and differing from typical ruminants by having a three-chambered stomach, tusk-like canines above and below and a similar isolated outer upper incisor, and by the two toes having broad soft soles for walking on the sand, and hoofs resembling nails. With the Llamas they constitute the sub-order Tylopoda.

There are 2 species, the Arabian one-humped C. or Dromedary (*C. dromedarius*) and the shorter-legged Central Asiatic or Bactrian two-humped C. (*C. bactrianus*). Both have long been domesticated.

The dromedary is adapted to life in the sandy plains of Arabia and N. Africa, and is very hardy and capable of standing great privations. It feeds on desert vegetation and carries a reserve of fatty tissue in the hump, which it can draw on when needed.

Cs. vary in colour from dark brown to light cream. From remote times they have been of great value to the tribes which domesticated them, and the wealth of chieftains was assessed by the herds of Cs. they owned. The walking pace of a C. is 3 m. an hour, and it can keep this up for 30 m. even when carrying 600 lb. A lightly built type of dromedary is capable of twice this speed when not heavily burdened.

CAMELLIA. Genus of oriental evergreen shrubs of the family Theaceae, nearly allied to the tea plant. Numerous species, such as *C. japonica* and *C. reticulata* have been introduced into Europe.

CAMELOT (kam'elot). Legendary capital of King Arthur (q.v.). A possible site is the Iron-Age hill fort of South Cadbury Castle, nr. Yeovil in Somerset, where excavations from 1967 have revealed relics dating 3000 B.C. to A.D. 1100, incl. remains of a large 6th cent. settlement.

CAMEO. A precious stone on which a design is carved in relief. Cs. were used by the ancient Greeks and Romans as a means of decorating goblets, vases, etc., and were worn as personal ornaments.

CAMERA. See PHOTOGRAPHY.

CAMERON, Basil (1884–). British conductor. B. at Reading, he conducted the symphony orchestras of San Francisco (1930–2) and Seattle (1932–8), and since 1940 has been an associate conductor of the London 'Proms'.

CAMERON, Charles (c. 1740–1812). Scottish architect. He studied architecture in Rome, and in 1779 was summoned to Russia by Catherine the Great. He designed part of the palace and built the cathedral of Tsarskoe Selo (Pushkin).

CAMERONIANS. Sect of Scottish Presbyterians named after Richard Cameron, a fanatical Covenantanter who was slain in a skirmish in 1680. It came into being after the Revolution of 1688, when Presbyterianism was re-established in Scotland. But prelacy and dissent were also tolerated, and the Cs.

stood for the complete restoration of the Presbyterian system that was established by the National Covenant in 1638, reaffirmed by the Solemn League and Covenant of 1643, and had then existed up to 1649. In 1743 the Covenanters of the old and original school became the Reformed Presbyterians, and in 1876 most of them united with the Free Church of Scotland.

CAMEROON, Republic of. Country of W. Africa. The cap. is Yaoundé. It exports cocoa, coffee, palm-kernels and palm-oil, bananas, ground-nuts, cotton, and grows for home use cassava, millet, maize. Cattle, goats, and sheep are reared. Area 183,580 sq. m. Pop. (1968) 5,200,000.

History. The Cameroons was a German possession, 1884–1916, when during the F.W.W. it was captured by Allied forces. After that war, it was in 1922 divided and admin. under League of Nations mandate by France and Britain which in 1946 placed their respective areas under U.N. trusteeship. French Cameroons was in 1960 proclaimed an independent rep. outside the French Community. British Cameroons consisted of 2 detached portions admin. from 1946 as part of Nigeria – the N. within the N. Region, the S. as a separate region. S. Cameroons received a ministerial form of govt. in 1958. Plebiscites were held in both parts in 1961; the N. chose to remain in Nigeria, the S. chose to join the Rep. of Cameroon.

CAMISARDS. French Huguenots of the Cevennes, who following the revocation of the Edict of Nantes in 1685 rose in revolt and maintained a resistance until 1705, when they were crushed by a French army under Marshal Villars. They were named from the *camise*, a white peasant blouse which they wore.

CAMOENS (kam'ō-ens) or **CAMÕES** (Port. kah-mōn'ēsh), Luís Vaz de (1524–80). Portuguese poet. B. at Lisbon or Coimbra, of Galician descent, he studied at Coimbra, and c. 1545 went to Lisbon where he is said to have wooed a lady of the court to whom the *Rimas* are addressed. Banished from the cap. on some unknown cause, he served in Africa (1547–9) where he lost an eye fighting at Ceuta. Returning home, he wounded a king's equerry in 1552, and was released on condition of going to India. He arrived in Goa in 1553 and accompanied 2 military expeditions to the Red Sea and Persian Gulf, before being sent to Macao in an official capacity. In 1558 he was shipwrecked while returning to Goa, but the MS. of his epic poem *Os Lusíadas* was saved. In 1567 he left Goa for Mozambique, and by 1570 had reached Lisbon, where in 1572 he pub. the national epic of Portugal, the *Lusíads* (which tells of the voyage of da Gama and incorporates much of Portuguese history). He was granted a small pension in recognition of its success, but d. in poverty of plague. In 1880 his remains were taken to the national pantheon at Belem.

CAMOMILE. Plant of the daisy (*Compositae*) family. The most important species *Anthemis nobilis* is a perennial herb common in Europe, the solitary flower-heads have yellow centres surrounded by white florets and when dried make a bitter tonic. It used to be thought that it grew faster the more it was trodden upon.

CAMO'RA. Secret society in Naples and S. Italy. About 1820, prisoners in the Neapolitan dungeons banded themselves against their gaolers. On their release they maintained their unity, and dominated the life of Naples. They practised smuggling, robbery, and blackmail, and from 1848 went into politics. In 1911 the C. was suppressed.

CAMPAGNA ROMANA (kahmpahn'yah rōmah-nah). Lowland stretch of the Italian peninsula, incl. and surrounding the city of Rome. Lying between the Tyrrhenian Sea and the Sabine Hills to the N.E., the Alban Hills to the S.E., it is drained by the lower course of the Tiber and a number of small streams, most of which dry up in the summer. Prosperous in

BACTRIAN CAMEL

Dora Gabe and Bagriana (pen-name of Elisabeth Belceva).

BULL, John. Typical Englishman, especially as represented in cartoons. The name came into popular use after the publication of Dr. John Arbuthnot's *History of John Bull* (1712) advocating the Tory policy of peace with France.

BULL, Olav (1883–1933). Norwegian poet. From his first vol., which appeared in 1909, he stood in the front rank of Norway's lyricists.

BULL, Papal. Document or edict issued by the pope; so called from the circular seals (medieval Lat. *bulia*) attached to them. Famous P.Bs. include Leo X's condemnation of Luther in 1520; and Pius IX's proclamation of papal infallibility in 1870.

BULL-BAITING. One-time popular Eng. sport in which a bull was set upon by a pack of vicious dogs. B. was made illegal in 1835.

BULLDOG. British dog of ancient but uncertain origin. Coming into prominence in the days of bull-baiting, it developed the characteristic underjaw which left the nostrils free for breathing whilst the dog retained its grip on the bull's throat. The head is broad and square, with a deeply wrinkled skull, small folded ears, and nose laid back between the eyes. The chest is broad, and the back, arched and tapering to the powerful hindquarters, marked by the distinctive short, thick, kinked tail.

BULLER, Charles (1806–48). British diplomat. He became private sec. to the Gov.-Gen. of Canada, Lord Durham, in 1838, and assisted him in preparing the report which resulted in the union of Upper and Lower Canada.

BULLER, Sir Redvers Henry (1839–1908). British soldier. Joining the army in 1858, he commanded the British armies in S. Africa against the Boers. Defeated at Colenso and Spion Kop, he eventually relieved Ladysmith but was superseded by Lord Roberts.

BULL-FIGHTING. Contests between men and bulls; the national sport of Spain and of Spanish S. America. It was common in Greece and Rome, and was introduced into Spain by the Moors in the 11th cent. B. takes place in an arena, or bull-ring, where a bull is let loose. The animal is at first tormented by men on horseback, called *picadores*, who wound it with lances, and then by the *banderilleros* who plunge darts into its neck. Finally the *matador* with his sword and muleta (a red cloth attached to a stick) enters. Lured by the red cloth, the enraged animal charges at the matador who steps aside, and deals the death blow by plunging his sword between the bull's left shoulder and the shoulder-blade.

BULLFINCH. Species of finch (*Pyrrhula pyrrhula*) of the family Fringillidae, distinguished by its thick-set form, silky plumage, and stout parrot-like bill. The male has a pinkish-crimson breast, grey back, and glossy black head, wings and tail. The B. is a common British resident.

BULLHEAD, or Miller's Thumb. Small freshwater fish (*Cottus gobio*), of no food value, with large, broad head, and sharp spines on the gill covers. The marine father lasher, or sting fish (*C. scorpius*), is of the same genus, and is so called because the male guards the eggs, and agitates the water with his tail to ensure them a supply of oxygen.

BULLITT, William Christian (1891–1967). American diplomatist, who was sent on a special mission to Russia by President Wilson in 1919, and was American ambassador to Russia 1933–6, and to France 1936–41. In *The Great Globe Itself* (1946), he argued that the Russian govt. aimed at world conquest.

BULLROARER. Australian aboriginal musical instrument; it consists of a piece of wood of varying size, which is fastened by one of its pointed ends to a cord, by which it is whirled round the head to create a whirring noise. Both among the aborigines and other primitive races the B. is of great magical significance.

BULL TERRIER. British dog, originating in the 1850s, of which there are 3 recognized varieties, the white, the coloured, and the miniature.

BÜLOW (bü'loh), Hans von (1830–94). German pianist and conductor. He studied under Wagner and Liszt, and in 1857 m. the latter's dau. Cosima. He was professor of pianoforte at the Stern conservatorium in Berlin (1855–64), and in 1864 obtained a post under Ludwig II of Bavaria, and was the first conductor of *Tristan* and the *Meistersinger*. His wife left him to live with Wagner whom she m. in 1870.

BULWER-LYTTON. See **LYTTON**.

BUMBLE-BEE. Family of social insects (Bombidae) belonging to the super-family Apoidea of the order Hymenoptera. They have broad hairy bodies, which are usually dark brown or black, banded with yellow or orange, and live in small colonies, usually underground. The queen lays her eggs in the hollow nest of moss or grass at the beginning of the season, and the larvae are fed on pollen and honey, and develop into workers. In the summer, males and perfect females are produced, and all die at the end of the season except the fecundated females, which hibernate, to form fresh colonies in the spring.

BUMBRY, Grace (1937–). American mezzo soprano. A Negress, b. in St. Louis, Missouri, she was ed. at Boston Univ. and Chicago's Northwestern Univ., and was a favourite pupil of Lotte Lehmann at the Music Academy of the West. In 1960–3 she joined the Basel Opera. Her roles incl. Amneris in *Aida*, Carmen, and Eboli in *Don Carlos*.

BUNCHE (bunch), Ralph (1904–). American administrator, specializing in African and colonial affairs. A Negro and grandson of a slave, he was principal director of the U.N. Dept. of Trusteeship 1947–54, and then U.N. Under-Sec., acting as mediator in Palestine 1948–9 and as special representative in the Congo 1960. In 1950 he was awarded the Nobel peace prize.

BÜNN, Ivan Alexeyevich (1870–1953). Russian writer. B. in Voronezh, he wrote realistic stories of peasant life: *Derevnya* (1910: *The Village*); and *Gospodin iz San Frantsisko* (1916: *The Gentleman from San Francisco*), dealing with the death of a millionaire on Capri, which won him in 1933 a Nobel prize. Among later books *The Well of Days* (1930) has autobiographical elements and forms part of a longer work. He was also a poet and translated Byron and Longfellow.

BUNKER HILL. Small hill in Charlestown (now part of Boston), Mass., U.S.A., near which on 17 June 1775 the first considerable engagement

was fought in the American War of Independence; the colonists were defeated.

BUNSEN (boon'sen), Robert Wilhelm von (1811–99). German chemist. He was prof. of chemistry at Heidelberg 1852–98, and is credited with the invention of the B. burner. His name is also given to the carbon-zinc electric cell which he invented in 1841 for use in arc-lamps. About 1859 he discovered 2 new elements, aesium and rubidium.

BUNTING. Group of birds usually treated as a

BUMBLE-BEE. Below: 1, pupa; 2, larva.

and branches which are exposed to the action of steam, and afterwards refined.

CAMPI (kahm'pē). Family of Italian painters practising in Cremona in the 16th cent., the most famous being Giulio C. (c. 1502-72).

CAMPINAS (konpē'nahs). City of São Paulo state, Brazil, situated on the central plateau; a centre for the coffee-growing areas. Pop. (1960) 185,000.

CAMPION, Edmund (1540-81). English Jesuit and R.C. martyr. B. in London, he took deacon's orders in the English church, but fled to Douai, where in 1571 he recanted Protestantism. In 1573 he became a Jesuit at Rome, and in 1580 was sent to England as a missionary. He was betrayed by a spy in 1581, committed to the Tower, and hanged, drawn and quartered as a traitor. He was beatified in 1886.

CAMPION, Thomas (1567-1620). English poet and musician. He entered Gray's Inn in 1586 and later qualified as a doctor and practised in London. He pub. Latin *Poemata* (1595); *The Art of English Poesie* (1602); a textbook of music, and 4 *Bookes of Ayres* for which he composed both words and music.

CAMPION. Name given to several plants, belonging to the genera *Lychnis* and *Silene*, of the family Caryophyllaceae, e.g. the garden C. (*L. coronaria*), the wild white and red Cs. (*L. vespertina* and *L. diurna*) and bladder C. (*S. inflata*).

CAMPOBASSO (kahmpōbah'sō). Cap. of the Italian prov. of the same name, in Abruzzi e Molise, about 120 m. E.S.E. of Rome; it is noted for cutlery. Pop. (1961) 34,314.

CAMPS, Francis Edward (1905-). British pathologist. Trained at Guy's Hospital, where he was later house physician, he in 1963 became prof. of forensic medicine at London and a consultant to the Home Office. His books incl. a study of the forensic aspects of collaboration with Sir E. S. (1956) and *Forensic Medicine* (1956).

CAMUS (kahmū'), Albert (1913-60). French writer. Of Breton and Spanish parents, he was b. in Algeria, became a journalist in Metropolitan France and was active in the S.W.W. Resistance, when he edited the clandestine *Combat*. *L'Étranger* (1942: *The Outsider*) tells of a meaningless killing in the harsh sun of N. Africa, and the same sense of the absurdity of the universe was expressed in the essays *Le Mythe de Sisyphe* (1942). Later books are the novel *La Peste* (1948: *The Plague*) and *L'Homme révolté* (1952: *The Rebel*), a study of the inevitable corruption of ideal revolutionary ideas by murder and oppression which marked the end of his association with Sartre. He was awarded a Nobel prize in 1957.

CANAAN (kā'nān). Area of the Palestinian coast inhabited as early as the 3rd millennium B.C. by the Canaanites, Semitic-speaking peoples of mixed race who were known to the Greeks of the 1st millennium B.C. as Phoenicians. See PHOENICIA.

CANADA. A federal union of 10 provs. and 2 territories, an independent community within the British Commonwealth of Nations, occupying (except for Alaska, U.S.A.), the entire northern half of N. America. N. and S. its territory extends from about the latitude of Rome to a few hundred miles short of the

CANADA. Forest covers a third of her land area and newsprint is her largest single export. In the pulp mill skilled hands guide the logs over the steam which enables the bark to be peeled off easily.

Photo by Malik, Ottawa.

N. Pole; E. and W. it stretches across 88° of longitude and embraces 5 Standard Time (hour) zones. It is divided from the U.S.A. by the 49th parallel of latitude in the W., the Great Lakes and St. Lawrence r. in the centre, and the 45th parallel to the northern hump of Maine in the E., the boundary on the Atlantic being the Saint Croix r. Of its area of 3,851,113 sq. m., c. 290,000 sq. m. are lakes and rivers.

Physical Features. In the N. and E. centre the old Precambrian continent, often called the *Canadian Shield*, has, broadly, the conformation of a great plain, and is profusely dotted with lakes and rock basins. While parts of it support productive forests, it is almost devoid of good agricultural soils; its riches lie in its minerals, furs, and hydro-electric water power. The *Appalachian Region* in Quebec, New Brunswick, and Nova Scotia consists for the most part of rounded hills and shallow valleys; it is productively forested, and contains considerable stretches and numerous pockets of fertile soil. The *St. Lawrence Lowlands*, an area which supports more than half the population, constitutes the southern interior of eastern central Canada. There are no elevated areas except a few intrusions of igneous rock near Montreal. The *Great Plains* or *Prairies* extend from the edge of the Canadian Shield to the Rocky Mts. There are 3 prairie steppes, roughly located in southern Manitoba, Saskatchewan, and Alberta respectively. Much of the soil is of great depth and very fertile. The *Cordilleran Region*, occupying British Columbia, the Yukon, and a narrow boundary zone of Alberta, consists of 'a sea of mountains' in 3 roughly parallel bands, the Rockies, the Selkirs, and the Coast Ranges. The highest peaks are in Yukon Territory, notably Mount Logan (19,539 ft.) and Mount St. Elias (18,024 ft.). British Columbia possesses fertile valleys devoted to fruit growing and dairying.

The chief coastal indentations are on the Atlantic side, where the Gulf of St. Lawrence and the St. Lawrence Waterway, opened 1959, give ready access by water to the heart of the Dominion. The inland lakes and waterways are remarkable for their number and size. The rivers incl. the St. Lawrence (1,900 m.), Saguenay, and Ottawa, flowing into the Atlantic; Nelson (360 m.), Churchill (1,000 m.), Saskatchewan (1,205 m.), Dubawnt, and Albany, flowing into Hudson Bay; the Columbia (1,214 m.), of which 459 m. is in C., and Fraser, flowing into the Pacific Ocean; Yukon (c. 1,900 m., some 700 m. in Canada), flowing into the Bering Sea; the Mackenzie (2,514 m.), Peace (1,054 m.), Back, Athabaska, Liard, and Coppermine, flowing into the Arctic Ocean.

BURIAT (boo'rē-at). An A.S.S.R. within the R.S.F.S.R. In Central Asia with L. Baikal forming its western boundary, it adopted the Soviet system in 1920. Its name was shortened from Buriat-Mongol in 1958. It is largely steppe, and cattle-breeding is the chief occupation. Ulan-Ude is the cap. Area 135,700 sq. m.; pop. (1967) 780,000.

BURKE, Edmund (1729–97). British statesman and author. B. in Dublin and ed. at Trinity Coll., he settled in London in 1750, and achieved literary fame in 1756 by his *Vindication of Natural Society* and *Essay on the Sublime and Beautiful*. He entered Parliament as a Whig in 1765, and took a prominent part, as orator and pamphleteer, in the opposition to George III's attempts to dominate English politics and coerce the Americans, e.g. by his *Thoughts on the Present Discontents* (1770) and *Speech on Conciliation* (1775). He was paymaster of the forces in Rockingham's government of 1782, and in the Fox-North coalition of 1783, and after the collapse of the latter spent the rest of his career in opposition. He then threw himself into the attack on Hastings' misgovernment in India, and was among the managers chosen to conduct his unsuccessful impeachment. As a fanatical opponent of democracy, he denounced the French Revolution in *Reflections on the Revolution in France* (1790), which brought to an end his long friendship with Fox. He defended his conduct in his *Appeal from the New to the Old Whigs* (1791) and *Letter to a Noble Lord* (1796), and attacked the suggestion of peace with France in *Letters on a Regicide Peace* (1795–7). He retired in 1794 with a govt. pension to his estate at Beaconsfield, where he died. By modern Conservatives he is regarded as the greatest of their political theorists.

BURKE, Robert O'Hara (1820–61). Irish explorer. Going to Australia in 1853, he became inspector of police in Victoria, and in 1860 was chosen to lead an expedition into the interior. This ended tragically, Burke and his 2 companions perishing in the desert.

BURKE and **HARE**. Murderers. William B. and William H., two Irishmen living in Edinburgh, during 1827–8 murdered at least 15 people and sold their bodies to the anatomists. B. was hanged in 1829 on H.'s evidence. Hare is said to have died a beggar in London in the 1860s.

BURKE'S PEERAGE. Popular name of the annual *Genealogical and Heraldic History of the Peerage, Baronetage, and Knightage of the United Kingdom*, first issued by John Burke (1787–1848) in 1826.

BURMA. Rep. of S.E. Asia, lying between India and the Bay of Bengal in the W., China and Thailand in the E. Vast tracts of hill jungle lie on the Indian border, and great areas of mountains and gorges on the Chinese.

The geographical divisions are: (1) the coastal strip from Akyab to Cape Negrais, some 1,400 m. long and cut off from the rest of the country by (2) the Arakan mountains, except where the delta of the Irrawaddy gives entry into (3) the main plain of B., stretching N. from Rangoon 400 m. to Mandalay. To the E. of it lie (4) the Shan State, a tableland of hilly country. N. of Mandalay is (5) the Kachin State, 500 m. long and 200 m. broad, a country of jungle, mountains, and patches of cultivation in the river valleys. W. of the plain lie the Naga and Chin Hills, a similar waste of hill and jungle.

The largest river of B. is the Irrawaddy, its principal tributary the Chindwin. Flowing parallel to the Irrawaddy is the Sittang, whose mouth is only 50 m. E. of the Irrawaddy's; the Salween flows through the eastern part of the Shan State. Over half of B. is forested, the wetter parts with a dense tropical jungle, or a monsoonal forest, in which teak is found; the drier parts have a scrub vegetation merging into semi-desert.

The Burmese, most of whom are Buddhists, are the

dominant people. The principal other peoples are the Karens, Shans, Kachins, Chins, and Arakanese.

B. is in the main an agricultural country, producing rubber, tobacco, ground-nuts, cotton, etc., and large quantities of rice (much of it exported). Rubies, sapphires, and jade, petroleum, wolfram, lead and tin are among its mineral products; teak is obtained from its forests. Area 261,789 sq. m.; pop. (1967) 25,800,000.

History. The Burmese date their era from A.D. 638, when they had arrived from the region where China meets Tibet, and were semi-savage. By 850 they had organized a little state in the centre of the plain at Pagan, and from 1044 until 1287 they maintained a hegemony over most of the area of B. as it now is, and developed a distinctive civilization, one of its chief characteristics being Buddhism, of the original Hinayana type, and the particular ecclesiastical architecture of the pagoda and monastery. In 1287 Kublai Khan's grandson Ye-su Timur occupied B. after destroying the Pagan dynasty. After he withdrew, anarchy supervened. From c. 1490 to 1750 the Toungoo dynasty maintained itself, with increasing difficulty; and in 1752 Alaungpaya once more unified the country and founded Rangoon as his cap. In a struggle with Britain, 1824–6, his descendants lost the coastal strip from Chittagong to Cape Negrais. The 2nd Burmese War, 1852, resulted in British annexation of Lower B. (the southern section of the plain, including Rangoon). Thibaw, the last Burmese king, precipitated the 3rd Burmese War, 1885, and the British seized Upper B., 1886. The country was united as a prov. of India until made a separate country with its own constitution in 1937. The Japanese invaded B. in 1941, and occupied the country 1942–5. Negotiations with Britain followed the liberation of B., and on 4 Jan. 1948 B. achieved complete independence outside the British Commonwealth.

Under the republican constitution of 1947 there was an elected pres. and parliament with a Chamber of Deputies and Chamber of Nationalities, but the constitution was suspended in 1962 and Gen. Ne Win headed a Revolutionary Council in establishing a socialist one-party state. There have been minority revolts, e.g. that of the Karens which resulted in a grant of autonomy in 1954.

BURNE-JONES, Sir Edward (1833–98). British painter and designer, b. at Birmingham of Welsh ancestry. Under Rossetti's influence he abandoned his intention of taking orders and devoted himself to art. He drew his inspiration from medieval ballads and legends, classical mythology, and the Bible. He received a baronetcy in 1894.

BURNET, Gilbert (1643–1715). British bishop and historian. B. in Edinburgh, he was ordained in the

BURMA. A market scene in Upper Burma. Courtesy of the Burmah Oil Co. Ltd.

producer of wool. Fur-farming is an important industry in Prince Edward Island, Ontario, Quebec and Manitoba. C. supplies the British market with huge quantities of bacon and other pork products, beef, cheese, evaporated milk, dried eggs, dressed poultry and fruit and vegetable products.

Of the total area, 800,000 sq. m. is classified as bearing productive forests. The cutting of pulpwood for the manufacture of newsprint is a very important branch of Canadian forest operations.

Mining ranks second after agriculture. For a number of years C. has been among the world's leading producers of gold, but during the S.W.W. stress was shifted to base-metal production. C. produces 90 per cent of the world's supply of nickel. Uranium ore is mined near Great Bear Lake. The large iron and steel industries of Nova Scotia and Ontario depend on ore from Newfoundland, including Labrador, and elsewhere. Despite some of the largest coal deposits in the world, C. imports large quantities of coal and other fuels. Petroleum and natural gas are important products of Alberta and half the world's potash is in Saskatchewan. Water-power is the basis of a very large part of Canadian industry.

C.'s fishing grounds are among the most extensive and prolific in the world. Fur trade with the Indians led to the early exploration of C., but fur-trapping is now supplemented by fur-farming.

In the 20th cent. C. has grown into one of the leading manufacturing countries of the world. Manufacturing is highly concentrated into Ontario and Quebec.

Communications. The 1st great period of railway construction was in the 1850s. Confederation was followed by rapid railway development, at first in the E., and then, after British Columbia agreed to enter the confederation if a railway link was provided, by the building of the Canadian Pacific Railway (q.v.) connecting Pacific with Atlantic coasts. During the F.W.W. 90 privately owned railway systems were taken over by the Canadian Govt. and, with the Intercolonial, welded into the greatest single transport enterprise in America (the Canadian National system).

The trans-Canada highway from Halifax, Nova Scotia, to Vancouver, British Columbia, is an all-weather, continuous motor road 4,195 m. long. The 1,257 m. of the Alaska Highway within Canada were absorbed in the Canadian road system in 1946. As in other countries with enormous distances, air transport has grown steadily in importance; scheduled air services cover some 31,544 m.

Art. Early painters of note included Cornelius Krieghoff (1812-72), who recorded *habitant* pioneer life; Antoine Plamondon (1804-95), a Quebec portrait painter; and Paul Kane (1810-71), painter of the Plains Indians. A native Canadian style developed with

CANADIAN ART. A pioneer of Canadian painting was the German-born Cornelius Krieghoff, who found his inspiration in the hard life of the early settlers. This characteristic 'Winter Landscape', in the National Gallery of Canada, is reminiscent of the Dutch art of the 17th cent.

Courtesy of National Film Board, Ottawa.

the landscapes of Tom Thomson (1877-1917) and the 'Group of Seven' - J. E. H. MacDonald (1873-1932), Franklin Carmichael (1890-1945), A. J. Casson, Lawren Harris, A. Y. Jackson, Arthur Lismer, and F. H. Varley - who worked as a group 1919-33.

Painters dependent on English or U.S. 19th cent. realism included Horatio Walker (1858-1938), William Brymner (1855-1925), and Homer Watson (1855-1936). Among Impressionist painters were A. Suzor-Côté (1869-1937), Clarence Gagnon (1881-1942) and, most important, J. W. Morrice (1865-1924). Followers of later movements were Emily Carr (1871-1945), Goodridge Roberts (1904-), David Milne (1882-1953), Stanley Cosgrove, P. E. Borduas (1905-60), Henri Masson, J. P. Riopelle, Alfred Pelland, Jacques de Tonnancour, and Harold Town.

Ecclesiastical wood-carving in the French Norman tradition has been continuous from the early 18th cent. Realist sculptors include Philippe Hébert (1850-1917), Walter Allward, Emmanuel Hahn (1881-1957), Elizabeth Wyn Wood, and Louis Archimbault.

20th cent. architecture has followed international style except in the prov. of Quebec which developed its own traditions.

Literature. ENGLISH. Canadian literature in English began early in the 19th cent. in the Maritime Provs. with the humorous tales of T. C. Haliburton (1796-1865); Charles Healey (1816-76), a poet of note, belonged to Kingston, Ontario. The later 19th cent. brought the lyrical output of Charles G. D. Roberts (1860-1943), Bliss Carman (1861-1929), Archibald Lampman (1861-99), and Duncan Campbell Scott (1862-1944).

Fiction begins with 'Ralph Connor' (the Rev. C. W. Gordon, 1860-1937), who wrote of pioneer life, and Gilbert Parker (1862-1932), whose field was the historical novel. Realism in fiction developed with Frederick P. Grove, Mazo de la Roche, and Morley Callaghan. They were followed by Robertson Davies, Hugh MacLennan (1907-), Mordecai Richler, E. A. McCourt, and W. O. Mitchell. The humorous works of Stephen Leacock (1869-1944) brought him world-wide fame.

Though their merits as poetry are not high, the verses of Robert W. Service (1874-1958), 'Bard of the Yukon', and W. H. Drummond (1854-1907), who affectionately satirized *habitant* life, maintained their popularity. Memories of the F.W.W. lived in the well-known poem 'In Flanders Fields' by John

Stoke-on-Trent in 1910, it began to make pottery in 1644.

BURT, Sir Cyril Lodowic (1883–). British psychologist, a pioneer in intelligence tests and psychological tests for special abilities in school-children. He worked with the L.C.C. Education Dept. 1913–32, and was prof. of education (1924–31) and psychology (1931–50) at London univ. He was knighted in 1946.

BURTON, Sir Richard Francis (1821–90). British traveller and orientalist. B. at Torquay, in 1842 he became a subaltern in the Indian army. He made himself master of 35 oriental languages. In 1853 he went on pilgrimage to Mecca; in 1854 he explored the interior of the Somali country, and in 1856 was commissioned by the Foreign Office to explore the sources of the Nile; with J. H. Speke he discovered Lake Tanganyika in 1858. From 1861 he was a British consul – from 1871 at Trieste, where he d. Every country of the many he visited was made the subject of a remarkable book, but he is chiefly remembered for his literal translation of the *Arabian Nights* (1885–8).

BURTON, Robert (1577–1640). English philosopher. B. in Leics, he was ed. at Oxford, and remained there for the rest of his life as a fellow of Christ Church. His fame rests on his *Anatomy of Melancholy* (1621), a remarkable compendium of information on the medical and religious opinions of the time.

BURTON UPON TRENT. Brewery centre (co. bor.) in Staffs, England, 123 m. N.W. of London. Other industries incl. copper, iron and boiler works. Pop. (1961) 50,766.

BURUNDI. Country in central Africa, lying on the E. of Lake Tanganyika. Part of the former Belgian trust territory of Ruanda-Urundi (q.v.), it became independent 1962, and in 1966 the P.M., Captain Michel Micombero, deposed the King (Mwami Ntare V) and proclaimed himself pres. of the Rep. of B. Coffee, hides and livestock are exported. The chief towns are Bujumbura (cap., formerly called Usumbura) and Kitega (former royal cap.). Area 10,747 sq. m.; pop. (1965) 3,000,000.

BURY (ber'i). Cotton-spinning town (co. bor.) in Lancs, England, on the Irwell, 10 m. N. of Manchester. Other industries incl. calico-printing, dyeing and engine-making. Pop. (1961) 59,984.

BURY ST. EDMUNDS. Market town (bor.) in Suffolk, England, capital of W. Suffolk. On the Lark, 28 m. E. of Cambridge, it is named after St. Edmund, the martyred king of E. Anglia, whose remains were re-interred here in 903. It makes agricultural implements, beet sugar, etc. There are remains of the once magnificent Benedictine Abbey founded in 1020. Pop. (1961) 21,144.

BUSBY (buz'bi), Richard (1606–95). English headmaster of Westminster school from 1640. Among his pupils were Dryden, Locke, Atterbury, and Prior, and he was renowned for his floggings.

BUSH, Alan Dudley (1900–). British composer. As a student under John Ireland, he experimented in 12-note composition, but has subsequently tried to keep his style simple in accordance with the ideas of Marxism, which he adopted when studying philosophy in Berlin. His works incl. the operas *Wat Tyler* (1953) and *Men of Blackmoor* (1956), both much more successful on the Continent than in Britain, and the *Byron*

Symphony (1962). Since 1925 he has been prof. of composition at the R.A.M., where he himself trained.

BUSHBUCK (*Tragelaphus*). African antelopes, with hairy tails and only a spiral twist in the horns. The largest species (c. 4 ft. high) is the mountain or Buxton's B. (*T. buxtoni*) of S. Abyssinia. The common

B. (*T. scriptus*), the smallest species (less than 3 ft. high), is found over most of Africa S. of the Sahara.

BUSHEL. A dry measure legally standardized in Britain in 1826 as the 'imperial bushel' of 8 gallons (or 4 pecks): some U.S. states have different standards according to the goods measured.

BUSHIDO (boo'shidō). Code of honour of the Japanese military caste of *Samurai*, analogous to the English conception of 'chivalry'.

BUSHIRE (booshēr). Port in Persia, on the Persian Gulf 140 m. S.E. of Abadan. Founded 1736, it was Persia's chief port until the rise of Abadan. It has an airfield. Pop. 30,500.

BUSHMEN. A nomadic race of hunters, living in the central parts of S. Africa, particularly the Kalahari Desert. They are thin and of small stature, with dark yellow skins, prominent cheekbones and a low skull. Only about 26,000 survive today. Their language, which is monosyllabic, has the same curious 'clicks' as that of the Hottentots. They have no tribal chiefs, live in holes in the ground or in reed huts, and wear rough skins. Ancient B. paintings found in mountain caves show remarkable artistic talent.

BUSHRANGERS. Australian armed robbers of the 19th cent. The first Bs. were escaped convicts. The last gang was led by the Kelly brothers in 1878–80. They form the subject of many Australian ballads.

BUSONI (boosō'nē), Ferruccio Benvenuto (1866–1924). Italian pianist, composer, and musical critic. B. near Florence, he made his first public appearance at the age of 7. In 1891–3 he was at the Conservatoire of Boston, U.S.A., and later lived in Berlin, Bologna, and Zürich. Most of his music was for the piano, but he also composed several operas. As a critic he was influential in suggesting new standards of value.

BUSTAMANTE, Sir (William) Alexander (1884–). Jamaican statesman, né William Alexander Clarke. Of mixed blood, his father being Irish and his mother a mulatto, he adopted the name B. to show his opposition to racial discrimination. As leader of the Labour Party, he was chief min. 1953–5 and P.M. 1962–7, when Jamaica seceded from the proposed W.I. Federation following a referendum campaign headed by B. He was knighted in 1955.

BUSTARD. Family of large running birds (Otidae), with a superficial resemblance to turkeys, inhabiting dry plains in Europe, Asia, and Africa. The great B. (*O. tarda*) and the little B. (*O. tetrax*) are occasional visitors to Britain.

BUTANE. C₄H₁₀ paraffin hydrocarbon b.p. 1°C, density at 0°C = 0.60, obtained from petroleum distillation. It is liquefied under pressure in steel cylinders and used as fuel for industrial and domestic purposes, e.g. portable cooking stoves.

BUTE, John Stuart, 3rd earl of (1713–92). British Tory statesman. He succeeded his father in the title in 1723, and in 1737 was elected a representative peer for Scotland. Upon the accession of George III in 1760, he became the chief instrument in the king's policy for breaking the power of the Whigs and establishing the personal rule of the monarch through Parliament, and in 1762 was appointed Premier. His position as the king's favourite and the supplanter of the popular Pitt made him hated in the country. After the Seven Years War in 1763 he resigned.

SIR
ALEXANDER
BUSTAMANTE

of 453,793. Total area 2,807 sq. m.; pop. (1960) 908,718.

CANARY A bird (*Serinus canarius*) belonging to the finch family (Fringillidae). It is nearly allied to the European serin (*S.c. serinus*), which is now regarded as a sub-species only, but in a wild state is confined to Madeira and the Canary Islands. It was first bred in Europe as a cage-bird in Italy, in the 16th cent. As songsters, those known as rollers have the sweetest voice and the most sustained powers. They are bred in Germany, esp. in the Harz mts. British breeds include the Scotch fancies, Lizards, London fancies, and Yorkshires.

CANBERRA (kan'bra). Federal cap. of the Commonwealth of Australia, standing in the Australian Capital Territory enclosed within New South Wales, on a tributary of the Murrumbidgee; it was selected as capital in 1908. It contains the Parliament House, first used by the Commonwealth Parliament in 1927, the Australian Nat. Univ. (1946), and the C. School of Music (1965). Area (Australian Cap. Terr. incl. the port at Jervis Bay) 939 sq. m.; pop. (1967) 102,258.

CANCAN. A stage dance performed by a line of dancers or as a solo. It first appeared about 1830 in Paris and came to symbolize Parisian naughtiness. The music latterly associated with the C. is the *galop* from Offenbach's *Orpheus in the Underworld*. The high kick was a speciality of the C.

CANCER (kan'ser). A group of diseases due to the growth of malignant tumours; a malignant tumour. The chief varieties are *carcinoma*, which grows from skin or mucous membrane, and *sarcoma*, which grows from connective tissue. These 2 categories are subdivided according to the kind of tissue from which the growth takes place.

Although no known human form of C. has been directly proved to be caused by a virus, laboratory experiment has identified numerous C. viruses in animals. The viruses can alter inherited characteristics and are easily transferred, not only from cell to cell, but from one species to another, though their effect may be different. Cells affected by C. virus continue to live, but vary from the norm in a number of different ways, e.g. they may multiply lawlessly.

Taken in its early stages C. can be successfully treated by surgery, X-rays from electron tubes for deep therapy, or surface therapy with radioactive sources, the traditional radium being replaced by giant sources of radioactive cobalt or caesium, the latter coming from the 'waste' from nuclear power

stations. In suitable cases needles containing short-lived radioactive radon (from radium) can be implanted in tissue, or a cure may be effected by chemical means.

CANDELA OUTERIÑO, Felix (1910-). Mexican architect. Professor at the National School of Architecture, Univ. of Mexico, from 1953, he founded with his brother a firm specializing in the design and construction of reinforced concrete shell structures.

CANDIA. Italian name for the Greek island of CRETE, also name of the largest city, founded c. 824. It has many Venetian remains, and is the seat of an archbishopric. Pop. (1961) 63,458.

CANDLE. A source of artificial light consisting of a rod or cylinder made of wax, tallow, or some other solid fatty material, enclosing a wick of cotton or flax. There is a declining demand for household Cs., except for coloured and fancy Cs.

The traditional spermaceti C. flame used as a candle-power standard has been replaced by the *candela*, symbol cd, which is 1/60 of the intensity of one square centimeter of a blackbody radiator at the temperature of solidification of platinum (2046°K).

CANDLEMAS. In the Christian Church, the feast of the Purification of the Blessed Virgin Mary, or the Presentation of the Infant Christ in the Temple, celebrated on 2 Feb.

CANE. Name applied to the reed-like stem of various plants such as the sugar-cane and bamboo, but more particularly to the group of palms called rattans, consisting of the genus *Calamus* and its allies; their slender stems are dried and used for making walking sticks, baskets, and furniture.

CANEA (kahn'ya). Cap. and principal port of Crete, about midway along the N. coast. It was founded in 1252 by the Venetians, and is still surrounded by a wall. Vegetable oils, soap, and leather are exported. Heavy fighting took place round C. during the S.W.W., following the landing of German parachutists in May 1941. Pop. (1961) 38,268.

CANIDAE (kan'idē). Family of mammals belonging to the Carnivora, distinguished by their walking on the toes (digitigrade), having non-retractile claws and an elongated muzzle, and by other anatomical characters. The dogs, wolves, jackals, and foxes are typical members.

CANNAE (kan'ē). Ancient Italian town in Apulia, where in 216 B.C. Hannibal defeated the Romans.

CANNES (kahn). Town of the French Riviera in Alpes-Maritimes dept., one of the most fashionable and most popular holiday resorts of the Continent. Until 1834 it was only a little seaport, but then it attracted the patronage of Lord Brougham (who d. here) and other distinguished visitors, and soon a handsome new town (La Bocca) grew up facing the Mediterranean. Completion of the railway to C. in 1884 added to its popularity. It has a famous casino. Pop. (1962) 59,173.

CANNIBALISM. The practice of eating human flesh, also called anthropophagy. The name is derived from the Caribs, a man-eating tribe of S. American and W. Indian natives, who impressed themselves upon the conquering Spaniards by their savagery.

C. has been practised throughout the ages and in most parts of the world. It has religious and superstitious motives, but modern outbreaks, e.g. in Russia after the Revolution, in the Nazi concentration camps, and in China under Japanese rule, have been caused by overpowering hunger, and food C. is possibly the original form.

CANNING, George (1770-1827). British Tory statesman. The son of a barrister, he was ed. at Eton and Oxford, and in 1793 entered Parliament. His wit and eloquence, best shown in his verse satires and parodies contributed to the *Anti-Jacobin* (1797-8), made him extremely valuable to Pitt, who gave him

BUTTERFLY. A small selection of the 68 British and many thousands of foreign species. Their names, habitat, and wing-span in inches are as follows. 1, *Cyclodites silvius*, Europe, 1½; 2, *Adopoea actaeon* (Lulworth skipper), England, 1; 3, *Argynnis adippe* (high brown fritillary), England, 2½; 4, *Satyrus achine*, Europe, 2; 5, *Papilio ulysseus*, New Guinea, 4½; 6, *Papilio marcellus* (zebra swallow-tail), N. America, 3; 7, *Pyraus atalanta* (red admiral), Europe, Asia, N. and S. America, 2½; 8, *Heliconius burneyi*, Peru, 2½; 9, *Precis octavia*, Africa, 2½; 10, *Colias myrmidone* (dark clouded yellow), Europe, 2½; 11, *Epinephele tithonus* (large heath or gatekeeper), England, 1½; 12, *Troides paradiceus*, New Guinea, 5½; 13, *Polygonia c-album* (comma), England, 2; 14, *Melanargia larissa* (eastern marbled white), Europe, 2.

BUTTERFLY. Name given to those insects which form the series Papilionoidea (or Rhopalocera) of the order Lepidoptera, the remainder of the order consisting of the moths (q.v.). Like moths, Bs. are clothed with microscopic scales, and feed upon nectar and other fluid substances which they imbibe through a tubular proboscis formed by the greatly modified maxillae; but they are distinguished from moths by their clubbed antennae and in the absence of a frenulum from the hind-wings. They are essentially day-flying insects, whereas most moths are nocturnal. Metamorphosis is complete; the caterpillars are very diverse in form, and the pupae or chrysalids are usually without the protection of cocoons. The life of the adult insect is usually only a few weeks, but species which hibernate live until the spring or early summer when they lay their eggs.

The Skippers or Hesperidae, the most primitive family of Bs., are characterized by all the veins in the fore-wings arising separately from the cell. In the remainder of the Bs. certain of the veins in the fore-wings are coincident and do not arise separately from the cell. The Swallow-tails or Papilionidae are a family of large or very large Bs., mainly tropical.

In the Nymphalidae, the largest family of Bs., with about 6,000 species, the fore-legs are so reduced as to be useless for walking. The subfamily Nymphalinae includes the Peacock, Purple Emperor, Tortoiseshells, Admirals and Fritillaries. The subfamily Satyrinae comprises the Meadow Brown,

Grayling, together with the Heaths, Ringlets, and many others.

The family Pieridae includes the Whites, Clouded Yellows, Orange Tips, and their allies. The Garden or Cabbage Whites (*Pieris rapae* and *P. brassicae*) are among the few injurious species. The Lycaenidae are a large family that incl. the Blues, Coppers, and Hairstreaks. They are mostly rather small, often with metallic coloration. The Erycinidae are essentially S. American; the sole British representative is the Duke of Burgundy fritillary (*Nemeobius lucina*).

There occur different seasonal forms among certain Bs., e.g. the European Nymphalid B. *Araschnia levana*, whose spring form is known as *levana* whilst the summer form *prorsa* was considered to belong to a different species. Other Bs., such as the African *Papilio dardanus*, have several distinct forms of female and only one type of male.

Although the caterpillars of most Bs. feed upon flowering plants, those of a few kinds are carnivorous.

BUXTON. Market town (bor.) and spa in Derbyshire, England, 36 m. N.W. of Derby; the highest town of its size in England, 1,000–1,150 ft. above sea-level. Since Roman times its healing waters have been

visited; there are private and public baths, and a hospital for the treatment of gout, rheumatism, etc. The town is also a popular winter resort. Pop. (1961) 19,236.

BUYSSE (boi'se), Cyriel (1859–1932). Flemish author, b. near Ghent. He wrote novels and short stories accurately delineating bourgeois Flemish life, e.g. *The Right of the Strongest* (1873).

BUZAU. Rumanian town in Ploesti region, on the river B., a tributary of the Danube. It is an important railway junction and trade centre, and the seat of a bishopric. Petroleum is found nearby. Pop. (1967) 82,454.

BUZZARD. Name applied to the larger and heavier built hawks, particularly to the subfamily Buteoninae, allied to the eagles. The common B. (*Buteo buteo*) was formerly a common British bird, but is now found in only a few districts. The rough-legged B. (*Archibuteo lagopus*) is an irregular autumn visitor. The honey B. (*Pernis apivorus*) is very scarce as a breeding species. The bird called B. in America is the Turkey B. (*Cartharistes aura*), one of the New World vultures. See illus. p. 190.

BYBLOS (bib'los). Town (modern Jebeil), 20 m. N. of Beirut, Lebanon. Known to the Assyrians and Babylonians as Gubla it had a thriving export of cedar and pinewood to Egypt as early as 3000 B.C. In Roman times called B., it boasted an amphitheatre, baths and a temple dedicated to an unknown male god: excavation continues.

declarations of Christ and the Apostles, and through the succeeding centuries it has been in gradual but uninterrupted growth, under the guidance of the Papacy and the episcopate assembled in oecumenical councils. The earliest compilations were in the East, and the C.L. of the Eastern Orthodox Church is comparatively small and easy of access. In the course of centuries, a great mass of C.L. was accumulated in the Western Church, which in 1918 was condensed in the *Corpus juris canonici* under Benedict XV. Even so, however, this is supplemented by many papal decrees, etc.

The C.L. of the Church of England consists of canons pub. in 1604, a few of which have been revised, while 2 new canons were added in 1892 and 1921. In 1939 the archbishops appointed the Canon Law Commission, whose report appeared in 1947. Many of the canons of 1603 were found to be obsolete, and it was recommended that the majority of the remainder should be redrafted.

CANOSSA. Ruined castle 12 m. S.W. of Reggio city in Reggio Emilia prov., Italy, where the emperor Henry IV did penance before pope Gregory VII in 1077, for having opposed him in the question of investitures.

CANOVA (kahnó'vah), Antonio (1757-1822). Italian sculptor. B. near Treviso, he traditionally modelled a lion in butter which brought his talent to notice, and his work has a sentimental delicacy which, though it led to the honour of executing the tombs of Clement XIII, Pius VII and Clement XIV, has not served his enduring reputation. 'Cupid and Psyche' in the Louvre and 'The Three Graces' at the Hermitage, Leningrad, are other famous pieces.

CANROBERT (koñrobär), François Certain (1809-95). Marshal of France. From 1835 he fought against the Arabs in Algeria, and in 1854-5 he held a command in the Crimean War. He distinguished himself on diplomatic missions, was made a marshal of France and senator, and fought again at Magenta and Solferino, and in the Franco-German war.

CANTAL (koñtah'). Range of mountains in central France which gives its name to Cantal dept. It is of volcanic origin. The highest point is the Plomb du Cantal, 6,096 ft.

CANTALOUPE (kan'talooop). Name of several small varieties of the melon (*Cucumis melo*), distinguished by their small and round ribbed fruits.

CANTERBURY. City (county borough) in Kent, England, on the Stour, 62 m. E.S.E. of London. C. is a cathedral city and the archdiocese of the primate of the Church of England, and also an old market town, the main trade being in hops, cattle, corn, and wool; brick-making and tanning are among its industries. From the time of the Norman conquest C. has been granted special privileges. Among its interesting features are the Dane John mound, remains of a Norman castle, fragments of the city wall and the great west gate, and the 18th cent. guildhall. Dominating all is the cathedral. Since A.D. 597 C. has been the centre of the English Church. The foundations of the present cathedral were laid by Lanfranc (1070-89), but the church has been rebuilt and added to, and its architectural styles range from Norman to Perpendicular. The King's School (1541) is built on the site of the monastery hall. The tombs incl. those of the Black Prince and Henry IV. Pilgrims were attracted to C. in the Middle Ages by the shrine of St. Thomas à Beckett, who was murdered in the N.W. transept of the cathedral, 1170. Such pilgrims are characterized in Chaucer's *Canterbury Tales*.

Excavation of areas bombed during Ger. air raids in the S.W.W. (espec. 1942) led to increased knowledge of the Roman city. The Univ. of Kent was estab. at C. in 1965. Pop. (1961) 30,376.

CANTERBURY. Archbishops of. The archbishop of C. is the Primate of All England, metropolitan of

CANTERBURY. St. Augustine's Chair in Canterbury Cathedral, used in the enthronement of all archbishops of Canterbury. Photo: British Travel and Holidays Association.

the Church of England, and first peer of the realm, ranking next to royalty. He crowns the sovereign, has a seat in the House of Lords, and is a member of the Privy Council. His ecclesiastical province is all England with the exception of the 6 northern counties and Cheshire, and his diocese includes most of Kent and a small part of Sussex. He appoints to many livings, and is empowered to confer degrees (Lambeth degrees) in divinity, law and medicine. His seat is the Old Palace, Canterbury, with a 2nd residence at Lambeth Palace, London. He is appointed, in effect, by the Prime Minister.

The first A. of C. was Augustine, who was despatched from Rome by pope Gregory in A.D. 597 to convert the Anglo-Saxon kingdom of Kent. Archbishops appointed this cent. have been: Randal T. Davidson, 1903; C. G. Lang, 1928; Wm. Temple, 1942; G. F. Fisher, 1945, and A. M. Ramsey, 1961.

CANTERBURY PLAINS. District of South Island, New Zealand, nearly 4,000 sq. m. in extent, a rich area of grassland between the mountains and the sea. From here comes C. lamb.

CANTHARIDES (Blister Beetle, or Spanish Fly). Family of beetles (Coleoptera) belonging to the section Heteromera. *Cantharis vesicatoria*, the Spanish fly, is the best-known species; it is bright golden-green, and about 2 in. long. The drug C., a dangerous aphrodisiac, is prepared from its dried body.

CANTILEVER. A horizontal beam fixed at one end to a rigid support and free to move at the other end. This type of structure is used widely in building and in C. bridges, where the projecting arms are built inwards from the piers to meet in the centre of the span, and in C. cranes where a straight steel truss rests on a central support.

CANTINFLAS. Stage-name of Mario Moreno Reyes (1911-). Of Mexican-Indian stock, he was b. in Mexico City, and ran away from school to join a travelling tent show. Greatest of the Latin-American stage and film comedians, he is also noted for his social work.

CANTON. Cap. of the prov. of Kwangtung, China, and principal commercial city of S. China, on the left bank of the Canton or Chukiang (Pearl river), about 75 m. N.W. of Hong Kong. It was the first Chinese port opened to foreign trade, the Portuguese visiting it in 1516, followed by British, French, and Dutch merchants. It was a treaty port from 1842 until occupied by the Japanese in 1938.

halves. When the W. Empire was overrun by barbarian invaders, the B.E. stood firm, and Justinian I (527–565) temporarily recovered Italy, N. Africa, and parts of Spain. During the 7th cent. Syria, Egypt and N. Africa were lost to the Arabs, who twice besieged Constantinople (673–7, 718), but the Byzantines maintained their hold on Asia Minor. The Iconoclastic controversy of the 8th and 9th cents. brought the emperors into conflict with the papacy, and in 867 the Greek Church broke with the Roman. Under the Macedonian dynasty (867–1056) the B.E. reached the height of its prosperity; the Bulgars proved a formidable danger, but after a long struggle were finally crushed in 1018 by Basil II. After Basil's death the B.E. declined, and in 1071–3 the Seljuk Turks conquered most of Asia Minor. In 1204 the W. crusaders sacked Constantinople and set Baldwin of Flanders on the throne. The Latin Empire was overthrown in 1261, and the B.E. maintained a precarious existence, until in 1453 the Turks captured Constantinople. The B.E. rendered great services to civilization, as the guardian of Greek culture and Roman law during the Dark Ages, as the centre whence Christian civilization penetrated the

Balkans and Russia, and as the bulwark of Christendom against Moslems and barbarians.

BYZANTINE LITERATURE. Written mainly in the Gk. *koinē*, a form of Greek accepted as the literary language of the 1st cent. A.D. and increasingly separate from the spoken tongue of the people, it is chiefly concerned with theology, history, and commentaries on the Greek classics. Its chief authors are the theologians St. Basil, Gregory of Nyssa, Gregory of Nazianzus, Chrysostom (4th cent. A.D.), and John of Damascus (8th cent.); the historians Zosimus (c. 500), Procopius (6th cent.), Bryennius and his wife Comnena (c. 1100), and Georgius Acropolita (1220–82); and the encyclopaedist Suidas (c. 975). Drama was non-existent and poetry, save for the hymns of the 6–8th cents., scanty and stilted, but there were many popular saints' lives.

BYZANTIUM. Ancient Greek city on the Bosphorus, founded by the Megarians c. 660 B.C. In A.D. 330 the capital of the Roman Empire was transferred there by Constantine the Great, who renamed it Constantinople (q.v.). Its Turkish name Istanbul (q.v.) is commonly used today.

C Third letter of the alphabet. It corresponds to Heb. *gimel* and Gk. *gamma*, both derived from the Semitic word for 'camel'. Originally representing a hard g, it was used by the Romans for k also.

In the Roman system the numeral C stands for a hundred; C. is also used for 'Celsius', formerly called 'Centigrade' in thermometer readings.

CABA'L. A clique of scheming politicians; applied particularly to Charles II's ministry (1667–73) whose initials made up the word – C(lifford), A(shley), B(uckingham), A(rlington), and L(auderdale).

CABBAGE. A plant (*Brassica oleracea*) of the family Cruciferae, allied to the turnip and wild charlock. It is an important table vegetable, and the numerous cultivated varieties – all probably descended from the wild cabbage or seakale – include kail, Brussels sprouts, common cabbage, savoy, cauliflower, sprouting broccoli, and kohlrabi.

CABBALA. See KABBALA.

CABELL (kab'el), James Branch (1879–1958). American author. B. in Virginia, he wrote a series of ironically humorous novels set in the fictitious medieval country of Poictesme. Of these, *Jurgen* (1919) was prosecuted by the N.Y. Soc. for the Prevention of Vice, and naturally had assured success.

CABER, Tossing the (Gaelic *cabar*, a pole). Scottish athletic sport. The C. is a tapering tree-trunk, some 20 ft. long. The tosser rests the C. on his shoulder, holding the thin end which he raises till it is about level with his elbow, runs forward as the C. begins to topple over, and hurls it into the air. A champion may achieve throws of over 40 ft.

CABET (kahbeh'), Étienne (1788–1856). French communist. B. at Dijon, he fled to England after the revolution of 1830, where he came under the influence of Robert Owen and his communistic ideals. Returning to France in 1839, he pub. a Utopian romance *Voyage en Icarie*, and in 1848 some 1,500 'Icarians' established a communistic colony in Texas. C. moved the colony to Illinois, but was expelled in 1856 and d. broken-hearted at St. Louis.

CABINET. In Britain the committee of ministers (selected by the P.M.) holding the most important

executive offices, who decide the govt.'s policy. The C. system originated in the 'C. councils' (C. meaning a small room, and hence implying secrecy), or sub-committees of the Privy Council, which under the Stuarts undertook specialized tasks. Under William III it became customary for the king to select his ministers from the party with a parliamentary majority. When George I ceased to attend C. meetings, the office of P.M. came into being, to supply a chairman for C. meetings; Walpole is usually considered the first, although the office was not legally recognized until 1905. Cabinet policy is a collective one, and a vote of censure on one minister usually involves the whole C. Meetings are strictly secret, and almost invariably confined to members; minutes are taken by the Sec. of the Cabinet, a high civil servant. In the U.S.A. a C. system developed early, the term being used from 1793, though it is not responsible as in Britain for initiating legislation. Members are selected by the Pres. and, again contrary to British practice, may neither be members of either house of Congress nor speak there, being responsible to the Pres. alone.

CABÍ'RI. Group of divinities worshipped in ancient times in Asia Minor and parts of Greece. They were demoniac powers of the underworld, and were believed to control fertility.

CABLE, George Washington (1844–1925). American novelist, b. in New Orleans. His *Old Creole Days* (1879) secured him recognition as an interpreter of a social system which ended with the Civil War, in which he fought as a Confederate cavalryman.

CABOT, John (c. 1450–98). Genoese navigator and discoverer of the N. American mainland. He was naturalized a Venetian, and made many voyages to the Levant. In 1484 he moved to London; and in 1496 C. with his three sons was commissioned by Henry VII to discover lands hitherto unknown. On 2 May 1497, he sailed from Bristol, and after 52 days he landed on Cape Breton Island (which he thought was the N.E. coast of Asia). In 1498 he sailed again and touched Greenland.

His 2nd son, Sebastian C. (1474–1557) was cartographer to Henry VIII of England, and then similarly served Ferdinand of Spain. In 1526–30 he explored

CAPETOWN. The oldest city of the republic, Capetown is built at the foot and on the lower slopes of Table Mountain (3,500 ft.), and is expanding seawards on the reclaimed land of Table Bay, seen in the foreground. Table Mountain offers difficulties, even for experienced climbers, and her streams supplement the city's water supplies.

987 on the death of Louis V, the last of the Carolingians, and maintained his claim against Charles of Lorraine, Louis's uncle. The dynasty he founded occupied the French throne until the Revolution.

CAPETANAKIS, Demetrios (1912-44). Greek writer. Born in Smyrna, he lived in Germany during the '30s and went to Britain in 1939, recording his experiences in *A Greek Poet in England*, ed. after his death by John Lehmann. He wrote in French, German and English, as well as Greek, and his English verse has a classic directness and simplicity of form.

CAPETOWN. City and oldest town of S. Africa, legislative cap. of the Union of S.A., and cap. of the province of Cape of Good Hope. It was founded in 1652 by Johan van Riebeeck, of the Dutch East India Co., and later German and Huguenot refugees joined the small community. C. is a vitally important port and the modern harbour, continually improved, can accommodate vessels of large size. With the expansion of population, new suburbs are developed. The city is well planned, and contains many handsome buildings; they include City Hall, the Houses of Parliament, and the castle, begun in 1666. The university is situated in the grounds of Groote Schuur (great barn), Cecil Rhodes's home, designated by him to be the residence of the Premier. Most industries of C. centre round port activities, but the cultivation of fruit and flowers is also important. Pop. (1960) 731,484 (279,404 white).

CAPE VERDE ISLANDS. Archipelago belonging to Portugal in the Atlantic Ocean off the W. coast of Africa, about 350 m. W. of Cape Verde in Senegal, the most westerly cape of Africa. There are 10 inhabited islands, the largest and most populous being Santiago. The cap. is Praia. The population contains a large Negro element. A Portuguese dialect is spoken. Area 1,557 sq. m.; pop. (1960) 201,549.

CAPILLARY (Lat. *capillus*, a hair). One of the network of innumerable minute blood vessels situated between the small arteries and the small veins. Their size is about 8/1,000 of a millimetre. The term is also applied to any very fine-bore tube or cylindrical space of very small radius. C. pressure is pressure due to C. force, and capillarity deals with the effects of elevation or depression of fluids in fine Cs. the study of which throws much light on surface-tension phenomena, wetting of materials, soils, etc., and separation of gases through porous media.

CAPITAL. In architecture, a stone placed on the

top of a column, pier, or pilaster, and usually wider on the upper surface than the diameter of the supporting shaft. It consists of 3 parts: the top member called the *abacus*, a block which acts as the supporting surface to the superstructure; the middle portion known as the bell or *echinus*; and the lower part called the necking or *astragal*. See ORDER.

CAPITALISM. Name given to the economic system in which the principal means of production, distribution, and exchange are in private (individual or corporate) hands. Almost synonymous is 'private enterprise', since reliance is put on the enterprise of private individuals and business companies and firms for the satisfaction of the community's economic wants, and not on government and municipal activities. The 'profit motive' constitutes the prime stimulus to productive exertion, and the 'price mechanism' determines what things shall be made, in what quantities, and under what conditions. The rival system is Socialism or Communism, in which the State is the dominant factor.

CAPITAL PUNISHMENT. Punishment by death, a form of penalty common to all ages. In England at the end of the 18th cent. more than 200 offences, incl. petty theft, carried the death penalty, though in practice it was imposed only for some 25. From 1810 onwards Sir Samuel Romilly and others conducted a vigorous campaign for the mitigation of the penal laws; several acts were passed at intervals, each reducing the number of crimes liable to so drastic a penalty, until an act of 1861 left only murder, treason, piracy with violence, and the firing of government arsenals and dockyards punishable by death. Disuse abrogated its imposition for the last 2 offences and, except for a few executions for treason in time of war, all executions in Britain since 1838 have been for murder. Until 1866, they were carried out in public.

Under an act of 1931 no pregnant woman, and under one of 1933 no young person under 18, could be condemned to death. Agitation for the abolition of the death penalty led to the act of 1957, which introduced a distinction between 'capital' murders (committed in furtherance of theft; by shooting or some form of explosion; in resisting arrest or escaping from police custody; on a police or prison officer carrying out his duty) and others: execution was by hanging. In 1965 C.P. was abolished, initially for 5 years, and 'imprisonment for life' substituted.

In the U.S.A. there is no C.P. in 13 states: Alaska, Hawaii, Iowa, Maine, Michigan, Minnesota, New York (with exceptions), N. Dakota, Oregon, Rhode Island, Vermont, W. Virginia, and Wisconsin. In others it is imposed for first-degree murder, in some (e.g. Alabama, Georgia, Virginia) for rape, in some (e.g. Florida, Washington state) for kidnapping, in some (e.g. Kentucky, Texas) for armed robbery. Execution is by electrocution in 21; lethal gas in 9 hanging in 7; and in Utah by shooting or hanging.

Brazil, the Netherlands, and Norway are among countries which have abolished C.P.; New Zealand abolished it in 1941, reimposed it in 1950. In the U.S.S.R. crimes punishable by death (by shooting) incl. bribe-taking, theft and currency offences. France uses the guillotine (q.v.); Spain garroting, a form of strangulation.

CAPONE (kapón'), Alphonse (1898-1947). American gangster, called Al Capone, b. in Brooklyn, the son of an Italian barber. During the prohibition period C. built up a criminal organization in Chicago city. No charges could be sustained against him until 1931, when he received a 10-year sentence for evading the payment of income tax. He was released in 1939.

CAPORE'TTO. Village on the Isonzo, near to which in 1917 the Italians under Cadorna were defeated by the Austro-Germans under Below. Then in Hungary, it was in Italy from 1918 until

separated by the Menai Straits from the island of Anglesey, to which it is connected by the Menai bridge. The S.W. is extended in the Lleyn peninsula, 30 m. long, terminating in Bardsey Island. The N. of the co. is occupied by the Snowdon group of mountains. The tidal river Conway forms part of the E. boundary. In the Lleyn peninsula, barley and wheat are cultivated and cattle reared. In the N. are the great slate quarries of Penrhyn. The co. town is Caernarvon; other towns include Pwllheli, Nevin, Beddgelert, and the resorts of Bangor, Llandudno, Criccieth, Penmaenmawr, Betws-y-Coed, Capel Curig, and Llanfairfechan. Area 569 sq. m.; pop. (1961) 121,194.

CAERPHILLY (kahr'fī'lī). Market town (U.D.) in a colliery area, 7 m. N. of Cardiff, Glamorgan-shire, Wales noted for its mild C. cheese. The castle was built by Edward I. Pop. (1961) 36,008.

CAESALPINUS or **CESALPINO** (chesalpē'no), Andreas (1519–1603). Italian botanist and physician. Director of the botanical garden at Pisa, he prepared the way for the Linnean system of plant classification.

CAESAR. Name of one of the most powerful families of ancient Rome. The greatest of the line was Gaius Julius Caesar (q.v.), whose grand-nephew and adopted son Augustus assumed the name of C., and in turn passed it on to his adopted son Tiberius. Henceforth it was borne by the successive emperors, becoming a title of the Roman rulers. The titles Tsar in Russia and Kaiser in Germany are both derived from C.

CAESAR, Gaius Julius (c. 102–44 B.C.). Roman statesman, general, and founder of the Empire. Descended from a distinguished patrician family, his sympathies were from the first with the popular or democratic party. He m. Cornelia, daughter of Cinna, and refused to divorce her at Sulla's bidding – whereupon he had to flee to Bithynia.

In 65 B.C. he was elected Aedile and nearly ruined himself with his lavish amusements for the Roman population. In 63 he was elected chief pontiff, although he was a freethinker. Two years later he was appointed governor of Further Spain. Returning to Rome in 60, he formed with Pompey and Crassus the first triumvirate, and was given the two provinces of Cisalpine and Transalpine Gaul. For the next 13 years he was almost continuously engaged in campaigning in Gaul. He defeated the Germans under Ariovistus, and sold thousands of the Belgic tribes into slavery. In 55 C. crossed into Britain, and repeated his visit in the next year. Two years later the Gauls under Vercingetorix rose in revolt and in 51 C. crushed them completely. The series of

campaigns thus completed was described by C. himself in his *Commentaries*.

C.'s governorship expired in 49, and of his two partners Crassus was dead and Pompey was now a rival. He had many enemies in Rome, and Pompey was authorized to lead an army against him. Declaring 'the die is cast', C. crossed the Rubicon from Gaul into Italy, and the Civil War began. In 48 C. followed Pompey to Epirus, defeated him at Pharsalus, and chased him to Egypt, where he was murdered. For the next 9 months C. dallied with Cleopatra, by whom he had a son; then marching into Asia Minor, he defeated King Pharnaces in a lightning campaign which he described in the words *Veni, vidi, vici* (I came, I saw, I conquered). Returning to Italy, he moved from triumph to triumph over the Pompeian party, and in 46 he was firmly established in the seat of power at Rome. He planned to reform the calendar, take a census of the Empire, establish Roman colonies overseas, and improve the law of local govt., but the vigour with which he prosecuted his plans aroused a fear that he was aiming at a personal dictatorship. A band of disgruntled republicans with Brutus and Cassius as their leaders formed a conspiracy to kill him, and on 15 March 44 B.C. – the Ides of March – he was stabbed to death in the Senate House.

CAESAR, Irving (1895–). American lyricist, b. in New York of Rumanian parents. He has written songs, and the musical comedy, *No, No, Nanette*.

CAESAREA. See **QISARAYA**.

CAESAREAN SECTION. The removal of a child from the womb through an incision in the abdominal wall. Julius Caesar is said to have entered the world in this way: hence the name.

CAESIUM (sē'sium). Chemical element. Symbol Cs, at. wt. 132.91, at. no. 55. It is used in the manufacture of photo-electric cells. Highly radioactive C. (Cs-137, half-life 30 years), a waste product from nuclear power-stations, is used for mass radiation and sterilization of foodstuffs, and medically for irradiation of surface tumours. See **CLOCKS**.

CAETANO (kahetah'nō), Marcello (1906–). Portuguese statesman. Prof. of admin. law at Lisbon from 1940, he was asst. P.M. 1955–8, and succeeded Salazar as P.M. in 1968. His inaugural speech suggested a liberalisation of policy.

CAFETÉRIA (Span., a coffee-shop). A help-yourself restaurant; supposed to have originated in New York in the 1880's. The first English use of the word was about 1923.

CAFFEINE (kaf'fē-in) (C₈H₁₀N₄O₂). The most important member of a group of nitrogenous substances found in tea, coffee, etc., for whose stimulant effect it is partly responsible.

CAGLIARI (kahlyah'rē). City and archiepiscopal see of Sardinia, Italy, cap. of Sardinia and of C. prov., on the Gulf of C. The cathedral, completed 1312, was later modernized; the univ. was founded in 1626, Pop. (1961) 181,499.

CAGLIOSTRO (kahlyos'trō), Alessandro di, count (1743–95). Italian charlatan, whose real name was Giuseppe Balsamo. B. at Palermo, he travelled widely, married, and set up as a specialist in the occult. In Paris in 1785 he became involved in the affair of the Diamond Necklace (supposed to have been ordered by Queen Marie Antoinette, but in fact by a band of swindlers), and was imprisoned in the Bastille. Later he was arrested by the Inquisition in Rome. A sentence of death for freemasonry was commuted to one of life imprisonment. He d. in the fortress of San Leone. His *Mémoires* are not authentic.

CAGOULARDS (Fr., hooded men). Popular name for the *Comité Secret d'Action Révolutionnaire*, a French fascist organization formed in 1937. It was supplied with arms from Italy and Germany, and was responsible for the murder of Italian anti-Fascists and other outrages.

CAERNARVON. Begun in 1284 for Edward I, Caernarvon Castle is one of the glories of North Wales. The walls are still entire and are seven to nine feet thick, enclosing an area of some three acres. Photo: Roy J. Westlake.

a man in a brawl in 1606 and fled from Rome where the Cardinal del Monte had been his patron, working in Naples, Malta and Sicily. His works incl. 'The Supper at Emmaus' (National Gallery), 'The Entombment of Christ' (Vatican) and 'The Death of the Virgin' (Louvre).

CARAWAY. Genus of plants (*Carum*) of the family Umbelliferae. *C. carui*, of Europe and Asia, is cultivated for its fruit, known as *C.* seeds, which are aromatic and pungent, containing a volatile oil, and are used for flavouring and also in medicine.

CARBIDES. Compounds of carbon and one other chemical element, the 2nd element being a metal, silicon, or boron. They occupy an important place in chemical technology, particularly calcium *C.*, which, as the generator of acetylene, acts as the starting-point of many basic organic syntheses. In recent years some metallic *Cs.* have come to hold a place of great importance in engineering technology on account of their extreme hardness and strength. The *C.* of tungsten and its ore, wolfram, is an essential ingredient of metallic *C.* tools as well as of ordinary high-speed tools.

CARBOHYDRATES. A group of compounds composed of carbon, hydrogen, and oxygen. On decomposition the *Cs.* yield water and a residue of carbon. *Cs.* include sugars—soluble crystalline compounds with a sweet taste; starches—more complex compounds, usually non-crystalline, and insoluble in cold water; and cellulose, which is fibrous and can be woven into textiles. *Cs.* form the chief foodstuffs of herbivorous animals.

CARBOLIC ACID. Phenol, C_6H_5OH . Extracted from coal tar, pure *C.A.* consists of colourless crystals, needle-shaped, which readily take up moisture from the atmosphere. The taste is pungent and slightly sweet and the smell strong and characteristic. It is a powerful and penetrating antiseptic, but because of its poisonous properties it is not now much used on human tissues. It is a strong disinfectant.

CARBON. Symbol *C*, at. wt. 12.011, at. no. 6. One of the most widely distributed non-metallic elements. It occurs free in nature as diamond and graphite (crystalline forms), in carbonaceous rocks such as chalk and limestone, as carbon dioxide in the atmosphere, as hydrocarbons in petroleum, coal and natural gas and as a constituent of all organic substances. See **ORGANIC CHEMISTRY**. In its amorphous form it is familiar as coke, charcoal, soot, etc.

Of the inorganic *C.* compounds, the most important is carbon dioxide (CO_2), a colourless gas with a very slightly acid taste, which is formed wherever *C.* is burned in an adequate supply of air. Carbon monoxide (CO) is formed whenever *C.* is oxidized in a limited supply of air. It is combustible, does not form an acid solution in water, and is tasteless. It is very poisonous owing to the stable compound it forms with the blood haemoglobin; it is the poisonous constituent of coal gas and motor-car exhaust fumes. Carbon disulphide (CS_2), a dense liquid with a sweetish odour, is the sulphur compound corresponding to the oxygen compound *C.* dioxide. An important group of compounds is known as the carbon halides, of which *C.* tetrachloride (CCl_4) is the best-known. Being non-inflammable it is used in certain fire appliances, but as it reacts with oxygen at high temperatures to produce phosgene ($COCl_2$), a poisonous war gas, the fumes are dangerous.

When added to steel *C.* forms a wide range of *C.* steels with useful properties. In pure form it is widely used as a moderator in nuclear reactors; as colloidal graphite (Dag, Aquadag) it is a good lubricant and, when deposited on a surface in a vacuum, obviates photoelectric and secondary emission of electrons. In the form of coal or coke (q.v.) *C.* is a widespread fuel. The isotope carbon-14 is greatly used as a tracer in biological research, since plants can be grown in an

Photo: British Travel and Holidays Association.

atmosphere containing radioactive *C.* in carbon dioxide, which passes into chemicals derived from the plant and hence becomes a 'label'. Carbon-14 is also useful for dating, as in archaeology, e.g. on death wood ceases to take up carbon-14 from the air and that already taken up decays at a known rate, allowing the time which has elapsed to be measured.

CARBONARI (kahr-bōnah'rē). A political secret revolutionary society in southern Italy in the first half of the 19th cent. The first members were republican rebels against Murat, the Bonapartist king of Naples, who took refuge in the Abruzzi and called themselves *C.* ('charcoal burners'). Subsequently the *C.* rose more than once against the Bourbon king; and though driven underground, played a part in Mazzini's 'Young Italy' movement.

CARBONATES. Important group of minerals formed by the combination of carbon dioxide with a basic element. The carbon dioxide dissolved by rain falling through the air, and also liberated by decomposing animals and plants in the soil, forms with water carbonic acid, which unites with various alkaline basic substances to form *Cs.* Of these, calcium carbonate ($CaCO_3$) is the most important.

CARBORUNDUM. Silicon carbide (SiC). A hard black artificial compound of carbon and silicon, discovered in 1891 by E. G. Acheson. It is harder than corundum but not so hard as diamond.

CARBUNCLE. A mass formed by a cluster of boils, or a garnet cut to resemble it in the shape of a rounded knob.

CARBURATION. Regular combustion, usually in a closed space, of carbon compounds such as petrol, paraffin, or fuel oil; regulated combustion is distinct from much more rapid burning such as explosion or detonation, and the definition applies particularly to combustion in the cylinders of reciprocating petrol engines of the types used in aircraft, road vehicles, or marine vessels. The device by which the liquid fuel is prepared for combustion is termed the *carburettor*.

CARCASSONNE (kahr-kahson'). City of S.W. France, cap. of Aude dept., on the r. Aude, which divides it into the ancient and modern town. Its medieval fortifications (much restored) are the finest in France. Pop. (1962) 43,709.

CARCHEMISH (kahr'k-). Ancient city on the right bank of the upper Euphrates, 50 m. N.E. of Aleppo, once the centre of a Neo-Hittite empire and in 605 B.C. the scene of a battle between Nebuchadnezzar and the Egyptians. On its site is the Turkish

bones, teeth, shells and leaves. C. compounds are very important to the chemical industry and include lime (calcium hydroxide $\text{Ca}(\text{OH})_2$); plaster of Paris (calcium sulphate $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$); calcium hypochlorite CaOCl_2 , a bleaching agent; calcium nitrate ($\text{Ca}(\text{NO}_3)_2 \cdot 4\text{H}_2\text{O}$) a nitrogenous fertilizer; calcium carbide CaC_2 which reacts with water to give acetylene (q.v.); calcium cyanamide (CaCN_2), the basis of pharmaceuticals, fertilizers and plastics incl. Melamine; calcium cyanide ($\text{Ca}(\text{CN})_2$) used in the extraction of gold and silver and in electro-plating, and others used in baking powders, fillers for paints, etc.

CALCULATING MACHINES. See COMPUTER.

CALCULUS. Name given to the methods of calculation which are used to deal with such matters as changing speeds, problems of flight, varying stresses set up in the framework of a bridge, electrical circuits, and in general the study of quantities which are continuously varying.

The INTEGRAL C. deals with the method of summation or adding together of the effects of continuously varying quantities. The DIFFERENTIAL C.

temple, etc. Buildings in oriental style incl. some magnificent palaces of Indian princes. From its position as the natural outlet of the Ganges and Brahmaputra valley, C. has an enormous overseas trade, and is a great commercial and industrial centre.

C. was founded 1686–90 by Job Charnock, head of Hooghli factory of the East India Company, when Hooghli was attacked by Mogul troops. The original Fort William was completed in 1702. Suraj-ud-Dowlah captured C. in 1756, and a number of its citizens d. in the Black Hole of C. In 1757 it was recaptured by Clive, and the modern C. began with the erection of a new Fort William and the formation of the Maidan.

CALDECOTT, Randolph (1846–86). British book illustrator, best known for illustrations to Washington Irving and his work for children: *John Gilpin* and *The House that Jack Built*.

CALDER, Alexander (1898–). American artist. B. in Philadelphia, Pennsylvania, he studied as an engineer, but in 1923 turned to art and originated 'stabiles' in 1931, and in 1932 'mobiles', with which latter his name is usually associated. One of his most famous large-scale mobiles is 'Point 125' (1957) in the lobby of Idlewild Airport, N.Y.

CALDER, Alexander Stirling (1870–1945). American sculptor, b. at Philadelphia. His works incl. a statue of Washington in New York, and a head of Winston Churchill (1944).

CALDER, Ritchie, baron Ritchie- (1906–). British pioneer science reporter and author. He undertook a series of U.N. missions to help solve problems of underdeveloped countries by science and technology, and was prof. of international relations at Edinburgh 1961–7. His books incl. *The Life Savers* (1961) on modern drugs. He was created a life peer 1966.

CALDERON (kahldārōn'), Ventura Garcia (1886–). Peruvian novelist and short-story writer. His many stories dealing with the lives of the Peruvian natives are noteworthy for their colourful realism.

CALDERON DE LA BARCA, Pedro (1600–81). Spanish dramatist and poet. B. in Madrid, he studied law at Salamanca (1613–19). In 1620 and 1622 he was successful in the poetical contests at Madrid; and while still writing dramas served in the army in Milan and the Netherlands (1625–35). By 1636 his first vol. of plays was pub. and he had been made master of the revels at the court of Philip IV, receiving a knighthood in 1637. In 1640 he assisted in the suppression of the Catalan rebellion. After the death of his mistress he became a Franciscan in 1650, was ordained in 1651, and appointed to a prebend of Toledo in 1653. He

deals in a similar way with rates of change. Many of its applications arose from the study of speed. Each of these branches of the C. deals with small quantities which during the process are made smaller and smaller, hence both comprise the INFINITESIMAL C. Differential equations represent complex rates of change and integrals are the empirical solutions. If no known processes are available, the integrations are made graphically or by machine.

The C. originated with Archimedes in the 3rd cent. B.C. in the means he devised for finding the areas of curved figures and for drawing tangents to curves; but his ideas could not germinate until the 17th cent., when Descartes showed how geometrical curves could be described and analysed by means of algebraic formulae. Then Fermat and later Newton and Leibniz immensely advanced the study.
